16. Then the *sutta* points out that living beings in any of the 31 realms are also “mind-made” because they have origins in *Paṭicca Samuppāda*, which, in turn, operates based on “*saññā vipallāsa*,” as I pointed out above, i.e., **the main reason for *taṇhā* to arise at the *votthapana* (V) stage in #10 above is *saññā vipallāsa***. Of course, it takes deep contemplation (and re-reading with a calm mind) for these ideas to sink in. As I keep repeating, it is difficult to put these ideas into words. One must take the time to read, contemplate, and ask questions.

- At marker 7.1, the *sutta* states, “They (*puthujjana*) **perceive** creatures as **real living beings with intrinsic identity**” (“*Bhūte bhūtato sañjānāti*.”)
- The Buddha called any living a “*bhūta*” or a “ghost” because it has that specific identity only for a particular duration (i.e., until the *kammic* energy that gave rise to it is exhausted). Then, it will take another form. For example, a *Deva* may take the form of a human or an animal at the end of life. There is no “ever-living *Deva*, human, or an animal.” **They all have transient existences**. However, many people worship various *Devās*, assuming them to have some special existence, yet *Devās* are also helpless in the rebirth process. They also do not have control over where they will be reborn!
- The *sutta* then goes through beings in various realms up to the highest *Brahma* realm of *Nevaśaṇṇānāsaññāyatana* at marker 18.1. They are all “*bhūta* existences.” See the connection to *yathābhūta* *ñāṇa* (or “knowledge about the true nature of things”) in the post “[Bhūta and Yathābhūta – What Do They Really Mean](#).” Also, see the links in #14 above.

17. At marker 19.1, it states, “They (*puthujjana*) **perceive the seen** as something real. (“*Diṭṭham diṭṭhato sañjānāti.*”)

- This is what we specifically discussed in #10 – #12 above. A *puthujjana* “incorrectly perceives” (*sañjānāti*)” some object or a person to be attractive (or ugly.) But there is nothing intrinsically attractive or ugly in a **form (*rūpa*) in the external world**. They are made of the SAME *pathavi, āpo, tejo, vāyo*.
- However, the mind, based on the “**distorted/defiled perception** or *sañjānāti*” makes its own “*cakkhuvīññeyyā rūpā*” or “**a misleading version of the external *rūpa* created by the defiled mind.**” In most *suttas*, “*rūpa*” refers to this “mind-made version” instead of the external *rūpa*. Thus, what the mind generates as a “beautiful person” is only a physical body made of *pathavi, āpo, tejo, vāyo*. A lion looking at the same person may be thinking about not its beauty but the suitability for a meal! Even among humans, the same person could be conceived as either beautiful or not so-beautiful by different people.
- Then, that verse repeated for what is heard, smelled, etc. All those are “mind-made impressions” based on *sañjānāti*.

18. A new section of the *sutta* starts at marker 27.1, repeating the above-discussed verses for a *sekha* (“a trainee” or a Noble Person striving to be an *Arahant*”): “A *bhikkhu* who is a trainee, who hasn’t achieved *Arahanthood* but lives aspiring to be one, knows the true nature of *pathavi* and things made of *pathavi* (*abhiññānāti*.)

- They have comprehended (*abhiññānāti*) how anything in this world originates in the mind based on *saññā vipallāsa*.
- Therefore, @ marker 27.4, “they **try to abstain from both taking pleasure or praising such things.**” (“*pathaviṃ pathavito abhiññāya pathaviṃ mā maññi, pathaviyā mā maññi, pathavito mā maññi, pathaviṃ meti mā maññi, pathaviṃ mābhinandi.*”) Here, “*mābhinandi*” is “*mā abhinandi*” or “**strive to abstain from praising.**”
- The rest of the verses proceed along the same lines, explaining that a *sekha* will strive to fully comprehend that the life of any living being arises based on *saññā vipallāsa*.

19. When that comprehension is complete, one has attained the *Arahanthood*, as explained starting at marker 75.1. An *Arahant* has fully comprehended (*abhiññānāti*) how anything in this world originates in the mind based on *saññā vipallāsa*.

- Therefore, @ marker 75.2, “they **do not take pleasure in or praise such things.**” (“*pathaviṃ pathavito abhiññāya pathaviṃ na maññi, pathaviyā na maññi, pathavito na maññi, pathaviṃ meti na maññi, pathaviṃ nābhinandi.*”) Here, “*nābhinandi*” is “*na abhinandi*” or “**never take pleasure in or praise such things.**”
- Then, @ marker 75.4, it says the reason is that an *Arahant* has no greed left in mind (“*Khayā rāgassa, vītarāgattā.*”)
- That sequence is repeated twice, saying that *Arahants* are also free of hate (@ marker 99.4) and delusion/*moha* (@ marker 123.4.)

20. Finally, @ marker 147.1, the sequence of #19 above is repeated for a Buddha (*Sammāsambuddha*.)

Summary

21. I have tried to present the key ideas/concepts embedded in the *Mūlapariyāya Sutta*. As for any critical *sutta*, it will take a book to describe the ideas/concepts fully.

- However, if someone can take the time to read the background material recommended in #1 of the first post in this subsection, "[Sotāpanna Stage and Distorted/Defiled Saññā](#)" and also read all the recommended links above, it should be possible to understand the key concepts.
- Of course, this post (or any other post) can be improved. Please don't hesitate to point out any mistakes or to ask for clarification of anything unclear.
- It is an unusually long post, but I wanted to get most of the main ideas in one post. We can make it better based on critical comments.

7.4.1.4 Fooled by Distorted Saññā (Sañjānāti) – Origin of Attachment (Taṇhā)

December 12, 2023

"Distorted *saññā*" arising automatically with sensory inputs falsely presents a world full of "sensory pleasures," which the Buddha called a "mirage." That is the origin of attachment (*taṇhā*.)

Key Points from the *Mūlapariyāya Sutta*

1. The key points from the *Mūlapariyāya Sutta* (which we discussed in "[Mūlapariyāya Sutta – The Root of All Things](#)") can be summarized in plain English as follows.

- Any "**perception/feeling of pleasure**" is not absolute and is mind-made. The detailed explanation is a bit involved since it involves a good background of other concepts like *saññā*, *vedanā*, *gati*, and *bhavaṅga*.
 - This situation can be compared to enjoying a magic show. We understand that a magic show is based on an illusion. However, since we get enjoyment from it, we pay money to watch a "good" magic show; here, a magic show is "good" if we cannot easily figure out the "trick" involved. The thrill will fade if we can see how the magician tricks us.
2. **The Buddha explained that our lives are based on such an illusion on a grand scale.** Even though we know that a magic show is based on an illusion, we would NEVER think of "pleasures in life" to arise from a "magic act"; **the illusion is that good.** It takes the efforts of a *Bodhisatta* through an incredible number of lives to figure that out.
- This "grand magician" is nature (or how the world operates based on our defiled minds), and only a Buddha can figure out the "trick." He explained that "trick" in several ways, and in my opinion, the best way to "see the trick" is to comprehend the *Mūlapariyāya Sutta*, i.e., how our "built-in" **distorted perceptions** fool our minds. Our minds automatically attach (*taṇhā*) to that **distorted perception**, and it turns into a **defiled perception**. This combined process is "*saññā vipallāsa*."
 - It is not easy to uncover that "trick," i.e., how the mind gets that **distorted perception** in the first place. Understanding it may take an effort, but it is worth the effort. The background material needed is in the first post of "[Sotāpanna Stage via Understanding Perception \(Saññā\)](#)." I will include at the end of this post.

The "Grand Magician"

3. The trick is the following: When we see an external object, the mind generates its version of that *rūpa* based on the mindset associated with the specific realm we are in; that mindset is called *uppatti bhavaṅga*, but don't worry about not fully understanding what that means.

- Therefore, living beings in different realms see and perceive the same object differently. For example, when a human sees a pile of feces (excrement or poop), it is a distasteful sight; however, to a pig, it is an attractive sight because that is food for it. In the same way, even though humans perceive the smell of poop as repulsive, it is an attractive, mind-pleasing smell for a pig.

- Therefore, the pile of poop does not have a built-in “repulsiveness” or “attractiveness.” **The respective perceptions (*saññā*) originated in the minds of a human and a pig!**
- Believing those “made-up” perceptions are REAL, a mind automatically generates expectations for repeatedly enjoying such sensory inputs, i.e., generates “defiled *viññāṇa*,” which the Buddha called a “magician.”

4. That is the crucial point embedded in the *Mūlapariyāya Sutta*. Please take the time to contemplate that; one can consider various examples from life experiences. While humans will not eat grass, a cow spends the whole day happily eating grass.

- Even among humans, such variations can be seen to a lesser extent. Some like classical music, whereas for others, it is too dull, and they may prefer heavy-metal music. Such preferences are not embedded in the music itself but in particular minds.
- Based on such “mirages” made up by our minds (based on *gati* we are born with), we automatically attach to external sights, sounds, tastes, etc., either with cravings or repulsiveness. Thus, it is this “distorted *saññā*” (which the Buddha called a “mirage”) that leads to the *viññāṇa* “making up” such **external stimuli into categories of attractive, repulsive, or neutral.**
- In reality, no external sensory input has intrinsic (built-in) attractive or repulsive properties. **Again, if fully sunk into the mind, this simple fact can make a massive difference in grasping Buddha’s teachings.**

Difference Between “Watching a Magic Show” and “Living Based on Distorted *Saññā*”

5. If the “trick” in a particular magic show is revealed, we can no longer get pleasure (*assāda*) from watching it. We can see that it is a fruitless/meaningless waste of time to watch.

- **In the same way, if we can fully comprehend the “trick” involved in conjuring up non-existent pleasurable sights, sounds, tastes, and smells, we will no longer crave them.** The only things that are at least “partially real” are the *sukha* and *dukha vedanā* associated with our physical bodies (where the *dukha vedanā* dominates in the long run.) We can overcome that, too, by avoiding rebirths in realms with “dense physical bodies.” Those *sukha* and *dukha vedanā* are absent in realms above the human realm.
- The other critical issue is that this is not just about “mindlessly enjoying made-up pleasures.”
- **Most people would not mind “made-up sensory pleasures” if that is the only outcome** (that is why they watch magic shows and movies.)

Distorted *Saññā* Makes Us Do Immoral Deeds

6. **The problem is that “distorted *saññā*” leads to unfathomable suffering.** That suffering is visible to us even in the human realm; we can also see the higher level of animal suffering. It is much higher in the other three *apāyās* that we cannot see. How is that suffering related to “distorted *saññā*”?

- Based on the “distorted *saññā*,” we tend to engage in immoral deeds to either get more of a “pleasing sensory experience” or to get rid of a “depressing sensory experience.”
- For example, to enjoy sensory experiences, people steal, lie, engage in sexual misconduct, and even kill. The problem is that all those actions (*kamma*) are going to have their consequences (*kamma vipāka*.) It may take only a second to shoot and kill another human, but that may lead to rebirth as an animal or even in “hell or *niraya*.”
- Therefore, the problem is that “distorted *saññā*” automatically leads to “defiled *saññā*” and makes us engage in immoral deeds. That leads to suffering in this life and future lives (by being reborn in the *apāyās*.)

- **Thus, understanding the role of the “distorted *saññā*” makes it easier to understand the “*anicca* nature,” i.e., such actions can only lead to more suffering.**

7. Most living beings are trapped in the lowest realm of “*niraya*,” where no “pleasures” can be found. It is all about *dukkha vedanā* felt by a physical body. We will not last a minute if we are subjected to that type of suffering. However, their bodies can bear it for millions and even billions of years. I am not saying that to scare anyone; that is what the Buddha saw for himself and recorded in the *suttās*.

- We can also engage in “moral deeds” that lead to rebirth in the “good realms.” However, that never leads to the “breaking the ten *saṃsāric* bonds or *saṃyojana*.” However, until at least three *saṃyojanās* are broken, rebirth in the *apāyās* is possible because temptations for some sensory pleasures will be unavoidable; see below.
- Even though we cannot confirm the existence of such realms as *niraya*, *Deva*, and *Brahma*, we can see that it makes sense within the broader worldview of the Buddha, i.e., once we understand how *Paṭicca Samuppāda* explains rebirths in all those realms.

Saññā (Our Perceptions About the World) Is a Mirage

8. Those are the key ideas expressed in the *Mūlapariyāya Sutta*. **The Buddha directly called *saññā* a mirage** in the “[WebLink: suttacentral: Phenapindūpama Sutta \(SN 22.95\)](#),” and we discussed that in the post, “[Sotāpanna Stage and Distorted/Defiled Saññā](#).”

- But bad translations of key *suttās* like the *Mūlapariyāya Sutta* have **hidden that key point** for centuries. Once you start seeing that “hidden gem” (i.e., that *saññā* is a mirage), you see it in other *suttās*; however, those highly condensed *suttās* need to be explained in detail, at least initially.
- Now, we need to understand why merely engaging in “moral deeds” (*puñña abhisāṅkhāra*) cannot lead to a “suffering-free mind” even though those **MUST** be undertaken too. Cultivating *puñña abhisāṅkhāra* (cultivation of the mundane eightfold path) avoids rebirths in the *apāyās* and also readies a mind to comprehend deeper concepts like “*saññā vipallāsa*” and to start on the Noble Eightfold Path.
- See “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#)” and “[Rebirths Take Place According to Abhisāṅkhāra](#).”

Connection to the “Hidden Pure Mind”

9. Let us also review the other critical concept that is related. We all have a “suffering-free pure mind” (let us call it the “*pabhassara* mind”; see “[Recovering the Suffering-Free Pure Mind](#)”) hidden underneath our defiled minds. Here, note that “*pabhassara citta*s” or “suffering-free, uncontaminated *citta*s” arise in a “*pabhassara* mind” free of defilements.

- **The mind of a *puthujjana* (average human) is covered with ten layers of defilements, i.e., ten *saṃyojana*.** Those are also the “mental bonds” that bind the mind of a *puthujjana* to suffering and the rebirth process: “[Dasa Saṃyojana – Bonds in Rebirth Process](#).”
- **The Buddha taught that it is impossible to figure out how the minds of all beings initially became contaminated with those ten layers of defilement.** The Buddha, upon his Enlightenment, kept looking back and could not discern a “beginning” when all those minds got “defiled” in the first place. (This issue of an “untraceable beginning” is built into the Principle of Causality. See the Summary at the end of the post, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#)” and “[The Infinity Problem in Buddhism](#).”) However, if someone can uncover that “*pabhassara* mind,” it will **NEVER** be defiled again because a “*pabhassara* mind,” by its nature, cannot be defiled. **That, again, is compatible with the presumption that there was “no beginning” to the rebirth process.**
- Therefore, it is pointless to spend the time on that issue. We have a limited time (left in this life) to uncover that “suffering-free mind.” *Nibbāna* is not an abstract thing. It can be attained in this life, which is

why it is “*sandiṭṭhika Dhamma*.” “*Sandiṭṭhika*” means “being able to see (or figure) out how the accumulation of “*saj*” leads only one way, i.e., further defiling a mind. Let us briefly discuss that.

“*Rupam, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvi*”

10. In the “[WebLink: suttacentral: Khandha Sutta \(SN 25.10\)](#),” the Buddha stated, “*Rūpaṃ, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvi*.” The English translation in the link translates that as “Mendicants, form is impermanent, decaying, and perishing.”

- That translation explains why Buddha’s teachings have been hidden for centuries. It is a prime example of a completely wrong “mundane, word-by-word translation”!
- Here, “*rūpa*” refers to the “mental reproduction of an external *rūpa*” (with “distorted *saññā*”); “*anicca*” does not mean “impermanence;” “*vipariṇāmi*” does not mean “decay,” and “*aññathābhāvi*” does not mean “perishing.” The translator did not even come close to explaining the meaning of that critical verse.
- A critical problem at the root is the following. By the words “*rūpa*” or “*rūpaṃ*,” the Buddha almost always referred to a “mental reconstruction of an external *rūpa*” and NOT an external *rūpa*. With his wrong understanding, the translator focuses on an EXTERNAL *rūpa*’s impermanence, decay, and perishing. An external *rūpa* indeed does all that. **But any average human can tell you those characteristics about an external *rūpa*. There is no need for a Buddha to teach that.**

11. The Buddha was trying to explain that **the misguided mind makes an “incorrect version of the external *rūpa*”** based on the mindset it was born with (*uppati bhavaṅga*.)

- Based on that “incorrect version of the external *rūpa*” (created based on the “distorted *saññā*,”) a mind then attaches to it and starts engaging in immoral (or at least unfruitful) actions that move it AWAY from the *pabhassara* mind.
- Thus, engaging in such unfruitful actions is of an “*anicca* nature,” i.e., one’s “*icca*” (pronounced “ichcha”) or “expectation” is more pleasure, but the eventual outcome is the opposite.
- “*Pariṇāmi*” is to proceed in the right direction with better results. However, with that “distorted *saññā*,” one moves in the wrong direction with unpleasant and dangerous outcomes; that is, “*vipariṇāmi*.”
- Finally, “*aññatha*” means “deviate for the worse” (moving away from the “*pabhassara* mind”) and is the opposite of “*ittha*” or the “stable state of *Nibbāna*.”
- A detailed explanation in: “[Aniccaṃ Vipariṇāmi Aññathābhāvi – A Critical Verse](#).” Please feel free to ask questions in the forum. These are critical issues to be understood.

Previously Unheard Teachings

12. I hope the above explanation makes it clear why the Buddha himself called his teachings “*pubbe ananussutesu dhammesu cakkhuṃ udapādi, ñāṇaṃ udapādi, paññā udapādi, vijjā udapādi, āloko udapādi*.” It means “the vision, knowledge, wisdom, the truth, and how to disengage from this suffering-filled world (*āloko*) arose in me, and **this has not been known to the world.**”

- The above verse appears in 15 places in the *Tipiṭaka*: “[WebLink: suttacentral search: pubbe ananussutesu dhammesu](#).”
- Until a Buddha discovers it, no human, *Deva*, or *Brahma* can figure out the above-discussed truth: Any “pleasurable experience available in any realm” arises because the *saññā* arise with any sensory input acts like a mirage: It gives the impression that certain things in this world have inherent “attractive or mind-pleasing” properties. It is like a mirage of a water-filled lake seen ahead in a hot desert, but anyone running toward it will never get any water and will die of thirst!

Required Background

13. This post is the third in a series of posts in the new section, “[Sotāpanna Stage via Understanding Perception \(Saññā\)](#),” linked below. It will help a *puthujjana* get to the *Sotāpanna* stage. **Furthermore, this material is ESSENTIAL for a *Sotāpanna* to attain the higher stages of *Nibbāna*.** Anyone wishing to learn the required background or to “brush up” on those required concepts, the following are the steps:

- i. For an introduction to *saññā*, see “[Saññā – What It Really Means](#).”
- ii. The concept of the “hidden pure mind” (*pabhassara citta*) is explained in the “[Recovering the Suffering-Free Pure Mind](#)” series of posts.
- iii. Then I realized that the *anicca*, *dukkha*, and *anatta* nature could be explained differently based on that approach. See “[Does “Anatta” Refer to a “Self”?](#)”
- iv. The current post is a follow-up to the two posts in the “[Does “Anatta” Refer to a “Self”?](#)” section.
- v. The current section has two previous posts: “[Sotāpanna Stage via Understanding Perception \(Saññā\)](#).”

7.4.1.5 Kāma Rāga Arises Due to “Distorted Saññā”

December 28, 2023

Kāma rāga (including sexual urges) arises due to “distorted *saññā*,” and such “distorted perceptions” arise based on the *gati* we have cultivated. I cannot emphasize enough the critical importance of understanding that.

Introduction

1. In my view, understanding (and confirming) our “distorted *saññā*” plays a critical concept in both attaining the *Sotāpanna* stage and also removing “*kāma rāga*” to attain the *Anāgāmi* stage.

- I have discussed the main idea in the post “[Fooled by Distorted Saññā \(Sañjānāti\) – Origin of Attachment \(Tanhā\)](#).”
- The Buddha compared our *viññāṇa* (overall mindset) to a magician; he figured out that the magic show is based on “distorted *saññā*.” The Pāli word “*saññā*” is conventionally translated as “perceptions,” but it has a broader meaning, as mentioned in the above post.
- **Furthermore, the “magic act” and the “distorted *saññā*” are not created by anyone or anything else but our own minds.** They arise based on the “*gati*” we have cultivated in this life and previous lives.
- That is a summary of what we have discussed up to now. Here, we will discuss a *sutta* that further helps clarify the above conclusions.

Background on *Ānanda Sutta* (SN 8.4)

2. The following briefly summarizes the “[WebLink: suttacentral: *Ānanda Sutta* \(SN 8.4\)](#).” You can also read the English translation in the link.

- One day, Ven. Ānanda and Ven. Vaṅṅisa went out to collect alms. While walking Ven. Vaṅṅisa realized that “*kāma rāga*” (of a sexual nature) arose in his mind and started bothering him.
- Even though the *sutta* does not specify, it is possible that he saw a beautiful woman, and thoughts of lust arose in him. In Pāli, this “burning sensation” is “*kāma pariḷāha*.” Any adult would have experienced that in a sexual context. Once intense “*kāma rāga*” arises, there is a “burning desire” that urges one to “engage in some activity to fulfill that desire quickly.”

- A *puthujjana* (average person) tends to engage in sexual activity to relieve the mind of the “pressure” or the “burning desire.” One may briefly lose sensibilities and take highly inappropriate actions based on that “burning feeling of urgency” or “*kāma pariḷāha*.”

3. It seems that Ven. Vaṅḡsa faced a situation like that. He realized the dangers of that and asked for help from Ven. Ānanda.

- @ marker 2.1: ““*Kāmarāgena dayhāmi, cittaṃ me pariḍayhati; Sādhū nibbāpanaṃ brūhi, anukampāya gotamā*”ti.”
- Ven. Vaṅḡsa says: “I’ve got a burning desire for (sexual) pleasure. My mind is on fire. Please tell me how to quench these flames of desire.”

4. In the next verse, Ven. Ānanda explains that the cause is “Your mind is on fire because of **distorted perception**” (“*Saññāya vipariyesā, cittaṃ te pariḍayhati*.”)

- The problem with the translation in the link (or any other English translation) is that it does not explain what is meant by “perversion of perception.” That is all the English translation in the link says. As usual, the translator does a word-by-word translation that is meaningless.
- It has taken me many posts to get to this point regarding the concept of “distorted *saññā*.” See “[Sotāpanna Stage via Understanding Perception \(Saññā\)](#).” The first post in that section starts with links to the required background: “[Sotāpanna Stage and Distorted/Defiled Saññā](#).”
- That is the case with many *suttas* involving deep concepts. Such a *sutta* needs to be explained in detail. My upcoming posts will require that background. If anything is unclear, this is the time to ask questions at the forum.

5. In the next verse (@3.3 marker), Ven. Ānanda advises Ven. Vaṅḡsa to abstain from engaging with sensory inputs that can awaken lust: “Turn away from sensory inputs that are attractive, provoking lust” OR “*Nimittaṃ parivajjehi, subhaṃ rāgūpasamhitam*.”

- A “*nimitta*” is a sensory input (and turns into an *ārammaṇa*) if a mind binds to it. *Parivajja* is to abstain or avoid.
- “*Subha nimitta*” is an attractive/mind-pleasing sensory input. If engaged, it can generate *rāga* (lust in this case), and that is the meaning of “*rāgūpasamhitam*.” **Therefore, such a sensory input is a “*subha nimitta*” only for a *puthujjana*.** An *Ariya* should consider that leading to *rāga* and eventual suffering.

6. That is all about cultivating restraint of sensory faculties (*indriya saṃvara*.) One must do that first as a *Sekha* (or striving to be a *Sekha* or a Noble Disciple). See “[WebLink: suttacentral: Saṃvara Sutta \(SN 35.98\)](#).”

- Even though the defilements are NOT in external sensory objects (a woman in this case), one MUST avoid such enticing sensory inputs while training (i.e., as a *Sekha*.) After getting rid of *kāma rāga* (by cultivating *Satipaṭṭhāna*; see below), one could even live in a harem full of beautiful women without generating a trace of lust.

7. As we have discussed in recent posts, most *vedanā* (feelings) are mind-made and based on “distorted *saññā*.”

- As we have discussed, the sweetness of sugar or the beauty of a woman is a “distorted *saññā*” and is NOT a *vedanā*—enticing music, the smell of roses/fragrances, **are similarly “distorted *saññā*” and NOT *vedanā*.**
- When a mind attaches such “distorted *saññā*” that leads to “mind-made *vedanā*” or “*samphassa-jā-vedanā*.” See “[Vedanā \(Feelings\) Arise in Two Ways](#).”
- All sensory inputs except those felt by the physical body only generate neutral feelings (*adukkhamasukha vedanā*), as explained in that post.

- Therefore, such “mind-made *vedanā*” can be eliminated by understanding the concept of “distorted *saññā*.” The cultivation of *Satipaṭṭhāna* is based on that understanding.

8. Venerable Ānanda provides further instructions @ marker 4.1: “*Saṅkhāre parato passa, dukkhato mā ca attato; Nibbāpehi mahārāgaṃ, mā dayhittho punappunāṃ.*”

- When a mind attaches to “distorted *saññā*,” it can generate *mano*, *vacī*, and *kāya abhisāṅkhāra*. (Here, Ven. Vaṅṅīsa could only generate *mano abhisāṅkhāra* since they were walking.) Ven. Ānanda says to understand such *abhisāṅkhāra* as not suitable to be considered one’s own (*parato passa*), they lead to suffering (*dukkhato*) and must not be considered beneficial (*mā ca attato*.) The English translation in the link mistranslates “*attato*” as “self”; see [“Attato Samanupassati” – To View Something to be of Value.](#)”
- If one can avoid such sensory inputs, that is the first step in extinguishing (*Nibbāpehi*) the strong (*mahā*) *rāga*. Stop getting burnt by the fire of lust (*mā dayhittho punappunāṃ*.) Note that “*mā*” means to stop/avoid.

Application of *Satipaṭṭhāna*

9. Next verse @ 5.1: “*Asubhāya cittaṃ bhāvehi, ekaggaṃ susamāhitaṃ; Sati kāyagatā tyatthu, nibbidābahulo bhava.*”

- When the mind focuses on the “*asubha* nature of the sensory input” (*Asubhāya cittaṃ bhāvehi*), it turns to *samādhi* (*ekaggaṃ susamāhitaṃ*). With mindfulness (*Sati kāyagatā*), the mind will disengage from *kāma loka* (*nibbidābahulo bhava*.) Here, “*nibbidā*” means to “become free from the world” and “*bahulo*” means “abundantly.”
- We will discuss more on “*sati kāyagatā*” or “*kāyagatā sati*” in upcoming posts. The reference to “*kāyagatā sati*” in this verse is the initial version of *Satipaṭṭhāna* that we will focus on.

10. The subsequent verse (@ 6.1) refers to a **latter stage** after being able to get to the “*animitta* stage,” i.e., when the mind can voluntarily give up attaching to sensory inputs (*nimitta*.) That is the next version of *Satipaṭṭhāna* to be cultivated by an *Anāgāmi*: “*Animittaṇca bhāvehi, mānānusayamujjaha; Tato mānābhisamayā, upasanto carissasī’ti*”

- Meditate without taking any *nimitta*, completely give up the *māna anusaya* (at the *Arahant* stage), and when you overcome the sense of a “me/I” (*māna anusaya*), you can live in this world without any “burning urges” and with a “fully-cooled mind.”
- That is a brief description of the *sutta*.

Three Steps in Getting to the Arahant Stage

11. Per the above discussion, we can broadly categorize the way to *Nibbāna* (*Arahanthood*) as follows:

- Avoid craving-inducing sensory inputs as a *Puthujjana*/*Sotāpanna*.
 - Understand the concept of “distorted *saññā*” regarding *kāma loka* and cultivate *Satipaṭṭhāna*.
 - Repeat (ii) regarding *rūpa loka* and *arūpa loka*.
- Step (ii) is necessary to get to the *Anāgāmi* stage, but it will also help with step (i).
 - We will primarily focus on steps (i) and (ii).

Conventional Remedies for Sexual Arousement

12. In many situations, people do immoral activities to fulfill their desires for sensual pleasures. That includes desires for sights, foods, music, fragrances, and physical touch.

- The category is sexual activities is the most dangerous one because it can lead to rape and other highly immoral sexual activities.
- However, attachment to other sensory attractions (sights, sounds, taste, and smell) also binds a mind to the *kāma loka* (and all are based on the “distorted *saññā*”). The term *kāma rāga* includes all of them.

13. Most religions (and even non-religious teachers) teach HOW TO avoid such immoral activities based on *kāma rāga* (but mainly focus on the sexual aspects.)

- However, ALL of them base their advice on the assumption that it is an external object that causes “*kāma rāga*” and the accompanying “burning sensation” or “*kāma pariḷāha*.”
- While the Buddha advised “sense restraint” at the beginning of the practice, that by itself WILL NOT remove the “*kāma rāga anusaya*” or the “*kāma rāga saṃyojana*.”
- That is because a “suffering-free pure mind” is covered with layers of *anusaya/saṃyojana* (which cannot be removed merely with sense restraint, **but only with wisdom or *paññā***.) It remains hidden until a Buddha discovers that **uncovering the “hidden pure mind”** is the complete solution to the issue of suffering.

14. As discussed, a “pure mind” (*pabhassara* mind) is covered with seven types of *anusaya* or ten types of *saṃyojana*. See “[Recovering the Suffering-Free Pure Mind](#).”

- To uncover the “suffering-free pure mind,” we need first remove three types of *saṃyojana* (*sakkāya diṭṭhi*, *vicikicchā*, *sīlabbata parāmāsa*) by removing those wrong views.
- The next step is to remove *kāma rāga* (*paṭigha* is simultaneously removed), and one gets to the *Anāgāmi* stage. The remaining five *saṃyojana* (including *māna saṃyojana* and *māna anusaya*) are removed at the *Arahant* stage. See “[Conditions for the Four Stages of Nibbāna](#).”
- Therefore, no other teaching can lead to the “end of suffering.” Of course, all other religions (and the mundane version of Buddha Dhamma) teach how to live a moral life. That is only a superficial solution. A simple analogy is the following: When one has cancer, one may initially show the symptoms with fever; by taking an aspirin, one can subdue the fever, but that will not treat the root cause of cancer.

7.4.1.6 Distorted Saññā Arises in Every Adult but Not in a Newborn

January 5, 2024

Distorted *saññā* (and, therefore, defiled thoughts) do not arise in a newborn, per the “*Mahāmālukya Sutta* (MN 64.)” By looking into that, we can learn about the mechanism that gives rise to “distorted *saññā*” and the connection between the *gandhabba* and the physical body.

Introduction

1. We have been discussing the critical concept of “distorted *saññā*” (or “distorted perceptions about sensory inputs”) in the new section “[Sotāpanna Stage via Understanding Perception \(Saññā\)](#).”

- As we have discussed, there is no inherent “sweetness” in sugar or any “delicious meal.” Similarly, our perceptions of “pleasing music” or “attractive people” are “mind-made” due to “distorted *saññā*.” See #5, #6 of “[Vedanā \(Feelings\) Arise in Two Ways](#).”
- Our minds attach to such “mind-pleasing” sensory inputs and try to get more of them. That is when we start engaging in actions, speech, and thoughts to “get more of them” and generate “defiled thoughts” (*dasa akusala*.)
- The problem is that our actions, speech, and thoughts are based on *kāya*, *vacī*, and *mano saṅkhāra*, giving rise to suffering in the future. Those *saṅkhāra* lead to the *dasa akusala* (three with actions, four with speech, and three with the mind). See relevant posts in “[WebLink: PureDhamma Search: Search Results for dasa akusala](#).”

- That is what happens at the “*avijjā paccayā saṅkhāra*” step in *Paṭicca Samuppāda*.

Importance of Understanding “Person = Mental Body (*Gandhabba*) + Physical Body”

2. I think a big “mental block” exists in many people’s minds to look at the *gandhabba* as an alien entity. **You are your “mental body,” and the physical body is secondary.** Your thoughts (*cittās*) arise in your mental body. Once outside the physical body, the mental body can see, hear, and think independently; of course, it cannot taste, smell, or touch.

- It has been driven into our mind that our physical body (or the brain) creates thoughts. But the physical body is just a “shell” that becomes useless once the mental body (*gandhabba*) comes out of it.
- As we have discussed, a human *bhava* (existence) may last many thousands of years. It is that “mental body” that lasts through that whole time.
- Your essence is not your physical body or the brain but your mental body (*gandhabba*.) **However, the physical body and the brain play significant roles, while the mental body is inside the physical body.**

Mutual Interactions Between Mental Body and Physical Body

3. The issue is understanding how the *gandhabba* (mental body) trapped inside the physical body receives sensory inputs from the external world. That must be understood before understanding how *gandhabba* **recognizes** things in the external world (*saññā*).

So, the first step is: How does the *gandhabba* receive information about the external world? How does it see someone standing in front of the physical body?

Facts:

- Gandhabba* consists of only a *hadaya vatthu* (seat of the mind) and five *pasāda rūpa* (*cakkhu, sota, ghāṇa, jivhā, kāya*.)
 - If the *gandhabba* is OUTSIDE the physical body (as in out-of-body experiences OBE/NDE), it can see and hear by itself. Here, seeing and hearing happen via mechanisms we don’t understand.
 - But when the *gandhabba* is INSIDE the physical body, it is completely shielded from the external world.** Take just vision first. To see something, the physical eyes must work. And that light signal must be transmitted to the brain via optical nerves and processed by the brain. The brain MUST pass that information to the *gandhabba* (by a mechanism we don’t fully understand.)
 - Sometimes, during accidents or due to other medical reasons, one of those three components (physical eyes, optical nerves, brain function) may permanently or temporarily stop.
 - If the brain function stops (temporarily), the patient cannot see, hear, or respond in any way.
4. That is what happened to the woman in the following video. She temporarily lost brain function.

[WebLink: youtube: Are near-death experiences real? Here’s what science has to say. | Dr. Bruce Greyson for Big Think](#)

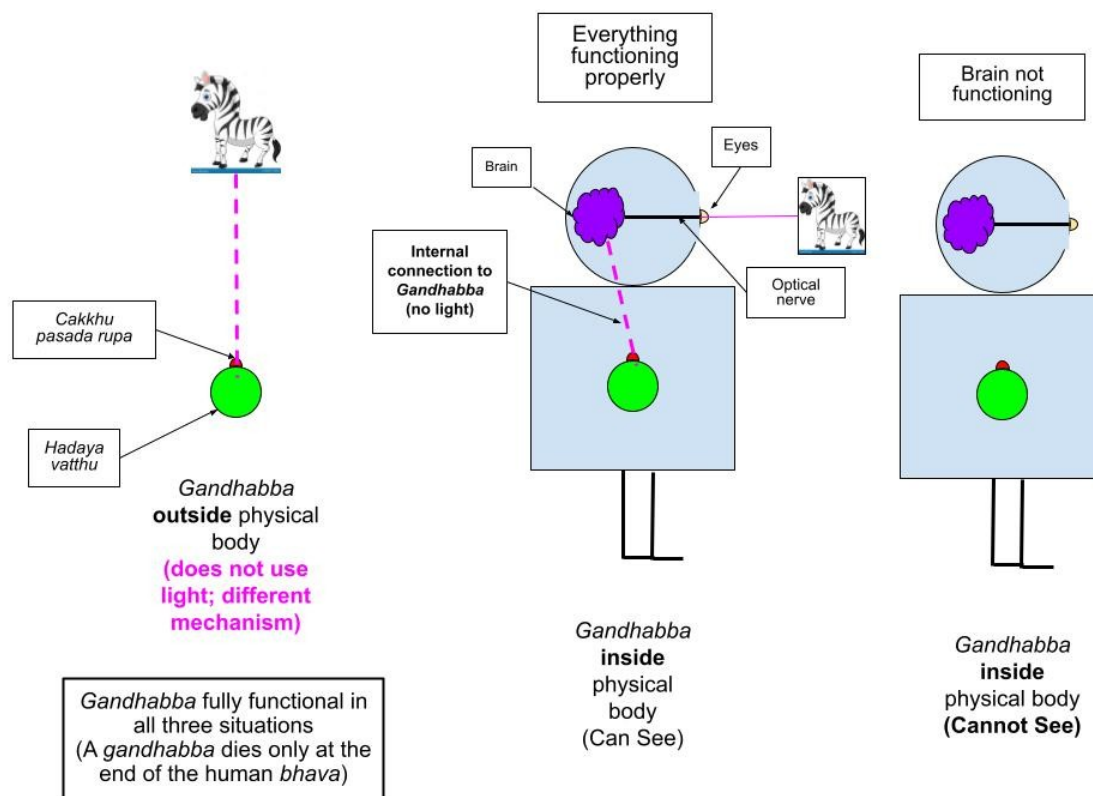

Notes:

- In most such cases, the patient recovers brain function after a while, and that would be the end of the story. However, the patient’s *gandhabba* came out of her body in the above case.
- The woman’s *gandhabba* may have come out of the paralyzed body at some point. It was in the room when Dr. Greyson came and followed him to the other room where her friend was. The *gandhabba* was watching and listening to the conversation between her friend and Dr. Greyson.

- iii. Once medical treatment restored her brain function, she could recall the conversation and tell Dr. Greyson about it in great detail. She not only heard but also saw the full details. That is why she noticed the stain on Dr. Greyson's tie!
- iv. So, she was able to see with her *gandhabba* body. **Can there be any doubts about that?**
- v. The *gandhabba* coming out of the physical body is not a common occurrence. However, he mentioned (maybe in another video) that about 10% of all people have experienced such an OBE. It is more common when patients undergo heart operations because the *hadaya vatthu* in the mental body overlaps the heart in the physical body.

Seeing While *Gandhabba* Being Outside and Inside a Physical Body

5. The following figure explains how the *gandhabba* sees while being outside and inside a physical body.

Gandhabba and Physical Body -1

Download/Print: [“WebLink: Image Download: Gandhabba and the Physical Body -1”](#)

Notes:

- a. While being OUTSIDE the physical body, the *gandhabba* sees using a different mechanism that does not involve light.
 - It is possible that the brain converts the image received from the eyes (via the optic nerve) to a type of signal used by the *gandhabba* while being OUTSIDE.
- b. A *gandhabba* (while being INSIDE the physical body) will also not see if the eyes are damaged, even if the brain works.
- c. The point is that while INSIDE the physical body, a *gandhabba* CAN NOT see on its own. It also cannot hear, smell, etc., if the brain is not functioning.

- That is also true for recalling memories “stored” in the external world (in *viññāṇa dhātu*). They also need to come through the brain. Therefore, a *gandhabba* is totally isolated from the world while INSIDE a physical body. The brain plays a critical role. See “[Memory Recall for Gandhabba in a Human Body.](#)” **It is a good idea to read this post.** It talks about how the brain uses a transmitter and a receiver to exchange information with *viññāṇa dhātu* (bullet #4). We will use that in the next step.
- That also happens while we are sleeping. The brain goes into an inactive mode while sleeping. But the *gandhabba* never goes to sleep. Yet, if it does not get a signal from the brain, it cannot experience anything.

Why Doesn't a Newborn Have Any Perceptions, Let alone “Incorrect Views”?

6. Now, let us look into the following statement of the Buddha in the “[WebLink: suttacentral: Mahāmālukya Sutta \(MN 64\)](#)”: “A baby doesn't even have a concept of ‘*sakkāya*,’ so how could ‘*sakkāya diṭṭhi*’ possibly arise in her?”

- Here, ‘*sakkāya*’ means to “crave worldly pleasures.” **Thus, ‘*sakkāya*’ means the same as “*pañca upādānakkhandha*”** (conventionally translated as “grasping five aggregates.”)
- In the recent posts mentioned in #1 above, we noted the fact that our cravings for sensual pleasures arise based on the “distorted *saññā*” (or “distorted perceptions about sensory inputs.”)
- So, why doesn't a newborn get that “distorted *saññā*” about sensory inputs?

7. As emphasized above, the baby's thoughts arise in the mental body, specifically at the “seat of the mind” or “*hadaya vatthu*.”

- **But sensory signals can come to the *hadaya vatthu* ONLY via the brain! A newborn does not have a developed brain.**
- A baby's brain grows very little while in the womb. After being born (i.e., after coming out of the womb), it takes about seven years for the brain to develop and fully understand the external world.
- The following short video explains that.

[WebLink: youtube: How baby brains develop](#)

8. Also, neural connections must grow in the brain to RECOGNIZE a given sensory signal. For example, a newborn does not know anything about “mother,” “milk,” toys,” etc. She would not perceive ANYTHING in the external world.

- As the baby grows, it will first recognize her Mom, Dad, family, a milk bottle, etc. That happens in the first few weeks.
- **That baby is NOT just the physical body nor just the mental body.** Those two must work together to give the baby her identity and function.

A Baby or an Adult is the Combination of *Gandhabba* and Physical Body

9. The following figure shows why a “baby” or a “grown adult” is the COMBINATION of the mental body (*gandhabba*) and the physical body.

Gandhabba and Physical Body -2

Download/Print: [“WebLink: Image Download: Gandhabba and the Physical Body -2”](#)

- A human *gandhabba* may live for many thousand of years. During that time, it can be born with many different physical bodies.
- The *gandhabba* is fully shielded from the outside world by the physical body. That way, *gandhabba*'s experience is limited to only those sensory inputs that can come via the physical body. Being trapped in a physical body is a consequence of one's craving to enjoy "close contact" like tastes, smells, and touch (sex.) But that limits the capabilities for seeing and hearing.
- A *gandhabba* can see and hear at long distances if it comes out of the physical body; it can also travel far by merely thinking about where to go.

Formation of Neural Networks in the Brain Requires for Recognition (*Saññā*)

10. A newborn (just born) has not seen anything yet and, thus, has no idea about her milk bottle. With time, she gets used to seeing it, and neural connections are made in her brain to identify it (see the above figure.) She understands that it has her food. In the same way, neural networks will be established in her brain (which keeps growing) to identify Mom, Dad, and others in the family, her toys, etc.

- Until the brain grows to its full development and most neural connections are established, the baby's understanding (or perception or *saññā*) about the external world will not be complete.
- **Until the ability to recognize/identify a specific item (*saññā*) is established, the baby cannot form a like or dislike for it.**
- See "[Saññā – What It Really Means.](#)"

11. First, the baby will identify the Mom and start bonding with her. That is the first type of "*rāga*" or attachment in this world. With time, the baby will start attaching to more things. In the same way, if she does not like a specific food, she may form a dislike (*paṭigha*) for it.

- That is why the Buddha said a newborn has no idea about *diṭṭhi*, defilements, etc.
- **Of course, the *gandhabba* inside the physical body of the baby has all *saṃyojana* and *anusaya* intact** (unless it is a *jāti Sotāpanna*.) But they must be triggered by a sensory event for defilements (*rāga*, *dosa*, *diṭṭhi*, etc.) to “come to the surface.”
- See “[Pañcupādānakkhandha – Arises With an Ārammana](#).”

For Defilements to Arise, *Saṃyojana/Anusaya* Must be Triggered

12. For *saṃyojana* or *anusaya*, etc., **to be triggered** (and to initiate *kamma* or *pañcupādānakkhandha* or *sakkāya* accumulation,) the baby must **first recognize things (*saññā*) and form a like or dislike** for them.

- Even when the brain is fully formed around seven years of age, strong *kāma rāga* (of a sexual nature) will not arise in a child. That *saññā* will grow over time. In other words, a strong *kāma rāga* of a sexual nature is not likely to be triggered in a seven-year-old, even though they will have the *kāma rāga anusaya/saṃyojana* intact.

“Distorted *Saññā*” Is Based on *Gati*

13. The “distorted *saññā*” is “built-in” to our mental AND physical bodies by *kammic* energy (via *Paṭicca Samuppāda*.) That is why it is hard to confirm that it is indeed a “mirage” or a “trick,” as the Buddha emphasized in the “[WebLink: suttacentral: Phenapindūpa Sutta \(SN 22.95\)](#).”

- Human *gati* differs vastly from those of animals, and within the animal realm, there is a wide variety of *gati*.
- This is a more profound point connected to *gati* cultivated as a human. For example, those born as pigs accumulated the *kammic* energy to “be born a pig” by engaging in lowly and “morally rotten” deeds when they were human. Thus, they are reborn as pigs “to like rotten things.” See #5 and #6 of “[Vedanā \(Feelings\) Arise in Two Ways](#).”

14. The “old physical body” that *Arahant* lives with still plays a critical role in bringing the “distorted *saññā*” even to the mind of an *Arahant* (if not in a *samāpatti*.)

- **However, *Arahant’s hadaya vatthu* has eliminated all *anusaya* and *saṃyojana*.** Thus, *Arahant’s* mind would not attach to that “distorted *saññā*” presented by the physical body (or the brain.)
- **Another way to say the above:** “*Arahant’s* (and also *Anāgāmi’s*) mind gets to the “*kāma dhātu*” stage but not to “*kāma bhava*.”
- See #3 and #4 of “[Upaya and Upādāna – Two Stages of Attachment](#).”

7.4.1.7 Purāṇa and Nava Kamma – Sequence of Kamma Generation

January 11, 2024; revised January 13, 2024 (#1, added #16)

A *Paṭicca Samuppāda* cycle starts at the “*purāṇa kamma*” stage with *Avyākata Paṭicca Samuppāda*. However, new and robust *kamma* (that could lead to rebirths in the future) is done in the “*nava kamma*” stage (via *Akusala-Mūla Paṭicca Samuppāda*) only if the mind starts generating *vacī* and *kāya kamma* consciously. [See “[WebLink: suttacentral: Kammanirodha Sutta \(SN 35.146\)](#).”]

Introduction

1. *Kamma* accumulation happens in two distinctive stages.

- In the first stage, the mind of a *puthujjana* attaches automatically to sensory input (*ārammaṇa*) based on the “distorted *saññā*” we discussed in recent posts. **That attachment is due to “*saññā vipallāsa*.”**

Thus, “*saññā vipallāsa*” arises ONLY IF “fooled by the distorted *saññā*”; see “[Fooled by Distorted Saññā \(Sañjānāti\) – Origin of Attachment \(Tanhā\)](#).”

- ii. Of course, a mind must at least briefly become aware of the *ārammaṇa* — many sensory inputs “fly by” without us noticing them. If the mind becomes sufficiently interested in the sensory input, it will start the second stage of *kamma* accumulation with *javana cittās*.
 - Any sensory experience with at least (i) above will be registered as “*pañcupādānakkhandha*,” and a record of it (*nāmagotta*) will be preserved in *viññāṇa dhātu* (in the external world.) Note that those records DO NOT stay with the *hadaya vatthu* or *gandhabba*. The *gandhabba* (in a physical body) must retrieve memories from the *viññāṇa dhātu* via the brain. See “[Where Are Memories Stored? – Viññāṇa Dhātu](#).” Only the defilements” (*anusaya*, *saṃyojana*, *gati*, etc. are associated with the *hadaya vatthu/gandhabba*.)

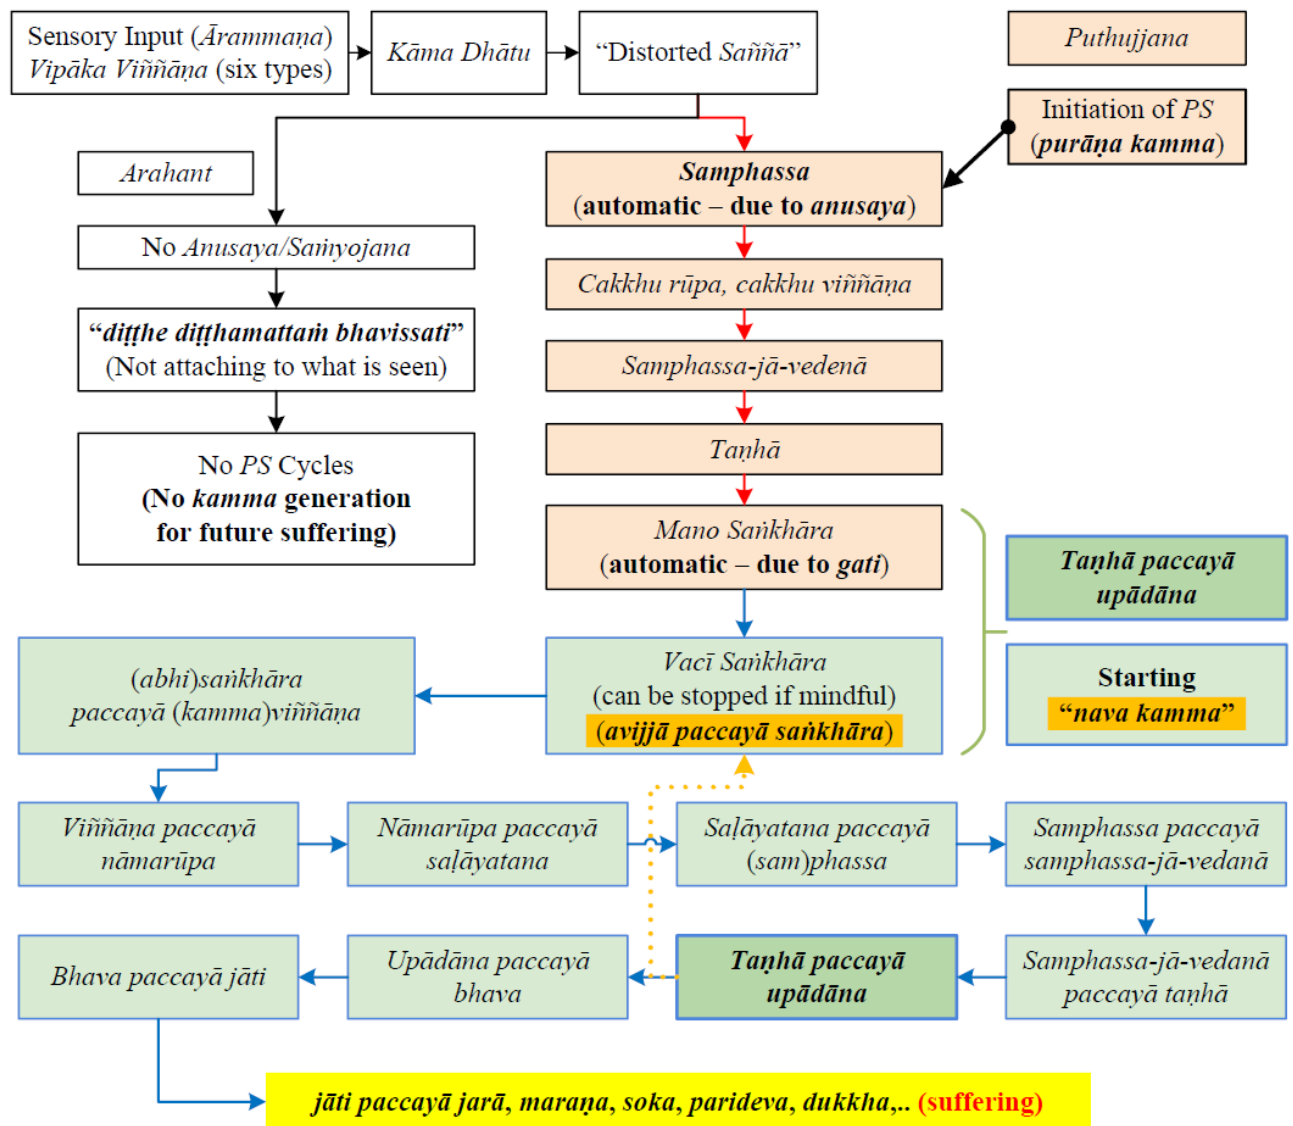

Purāṇa and Nava Kamma Stages of a Sensory Event

2. Therefore, the first attachment stage ALWAYS happens (at the “*purāṇa kamma*” stage.) *Kamma* (with initial *abhisankhāra*) happens in this stage but is not strong enough to bring *vipāka* in the future. Yet it initiates another round of *pañca upādānakkhandha*.

- **Therefore, a mind (sensory event) NEVER starts from the *pañcakkhandha* state for anyone below an Arahant.** The *pabhassara* mind arises only after all ten *saṃyojana* are removed from the mind (i.e., *hadaya vatthu*) at the *Arahant-phala* moment.
- If the second stage attachment (“*nava kamma*” stage) does not take place, no *javana cittās* will arise. **Strong *kamma* that can bring future *vipāka* (including rebirth) will occur only if *javana cittās* arise within the “*nava kamma*” stage.**

3. On this website, up to now, we had mainly discussed the “*nava kamma*” stage. However, I used that term only in recent posts when I first introduced the “*purāṇa kamma*” stage briefly.

- We have discussed the concepts of the following chart previously without using the terms “*purāṇa kamma*” and “*nava kamma*.”

Purāṇa and Nava Kamma - 1

Download/Print: “[WebLink: Image Download: Purāṇa and Nava Kamma – 1](#)”

- For example, a similar chart is in “[Difference Between Tanhā and Upādāna](#).” But the above chart has far more details.

Purāṇa Kamma Stage

4. “*Purāṇa kamma*” can be translated as “initial *kamma*” or “base-level of *kamma* generation.”

- **That stage happens automatically based on the “distorted *saññā*.”** As we have discussed, a *puthujjana* ALWAYS gets a “made-up” version of sensory input (altered by the “distorted *saññā*.”)
- A *Paṭicca Samuppāda* (PS) process always starts with an *ārammaṇa*. **The chart below** shows how a *cakkhu viññāṇa* starts with a *rūpa* (visual) as a sensory input. A sensory event starts on the left at the “*dhātu* stage.” While the mind of an *Arahant* stops there, that of a *puthujjana* keeps evolving to the right, becoming increasingly defiled.

Purāṇa and Nava Kamma - 2

Download/Print: [“WebLink: Image Download: Purāṇa and Nava Kamma – 2 \(3\)”](#)

- (I adopted the “cone representation” of the “expansion of viññāṇa” from the Sinhala discourse series [“WebLink: youtube: බුදු දහම, මර්ගඵල සහ මග චක්‍ර”](#); I highly recommend it for a Sinhala-speaking audience.)

Bahiddha and Ajjhata Viññāṇa

5. Kamma viññāṇa of a puthujjana starts right after the kāma dhātu stage when the mind automatically attaches to the “distorted saññā” due to the “hidden defilements” (anusaya/saṃyojana.) That happens with saṅkappa (only mano saṅkhārā) in the first citta vīthi.

- That first attachment is where the “altered rūpa” with “distorted saññā” is presented to the mind, and the mind generates the first stage of kamma viññāṇa called **“bahiddha viññāṇa.”** **Note that this “distorted saññā” is imparted via the physical body (and the brain.)** That is why an Arahant would also experience that “altered rūpa” (but would not attach to it, i.e., “bahiddha viññāṇa” does not arise in Arahant.) **The following steps are for a puthujjana.**
- In the next step, the mind attaches again with more saṅkappa (taking the bahiddha viññāṇa to be valuable), and that leads to the use of cakkhu indriya as an āyatana; thus, from now on in the process, “cakkhu” refers to “cakkhu āyatana.” The viññāṇa is stronger and at the **“ajjhata viññāṇa”** stage.

6. [“WebLink: suttacentral: Kammanirodha Sutta \(SN 35.146\)”](#): “Cakkhu, bhikkhave, purāṇa kammaṇ abhisankhataṇ abhisāñcetayitaṇ vedaniyaṇ daṭṭhabbaṇ..”

Translated: “Cakkhu arises via **purāṇa kamma**. It is to be understood (daṭṭhabbaṇ) as produced by abhisankhāra (abhisankhataṇ) and can lead to abhisāñcetana (abhisāñcetayitaṇ) and leads to (mind-made) vedanā (vedaniyaṇ).”

- When seeing an object, “Eye consciousness arises based on *cakkhu* and *rūpa*” OR “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*.” At this step, *cakkhu vīññāṇa* is already at the “*ajjhata vīññāṇa*” stage.”
- Here, “*cakkhu*” does not mean “eyes;” it means defiled “*cakkhu āyatana*” (versus undefiled “*cakkhu indriya*” for an *Arahant*.) That is precisely what the above verse says: It has already been defiled when the mind got contaminated by the “distorted *saññā*” when it moved from the “*kāma dhātu*” stage to the “*kāma bhava*.”
- This is depicted in the second chart above.

***Bahiddha Vīññāṇa* Arises Due to “Distorted *Saññā*”**

7. A *puthujjana*’s mind will automatically believe that the “*rūpa*” coming to the mind is a true representation of the external *rūpa*, i.e., that sugar is intrinsically sweet. This is not a “superficial trick” by a third-rate magician but a “sophisticated trick” that can be uncovered only by a Buddha. A human body is designed (by *kammic* influence) to provide that “attractive *saññā*” because those who are born human have craved them in past lives.

- See, for example, #5 and #6 of “[Vedanā \(Feelings\) Arise in Two Ways.](#)”
- The primary reason for our tendency to indulge in sensual pleasures is this “distorted and made-up *saññā*.” See “[Kāma Rāga Arises Due to “Distorted *Saññā*”](#) (Note: “distorted *saññā*” leads to “*saññā vipallāsa*” ONLY for those not comprehending how that “trick” plays out.)
- Many people incorrectly think they must remove *kāma raga* from their minds by willpower. That could make things worse by becoming an “unhappy person.” On the other hand, once one comprehends that there is no intrinsic “sweetness in sugar” or “beauty of a woman,” it is much easier to get rid of *kāma raga*.

Root Cause of Attachment – “Distorted *Saññā*”

8. As we can see in the above chart, this “distorted *saññā*” is the root cause of our attachment to “attractive sensory inputs.” When we try to get “more of such **made-up** enjoyments,” we engage in *akusala kamma* that bring us “unintended harmful consequences (*kamma vipāka*),” including rebirth in suffering-filled realms (like the animal realm.)

- Enjoying “sensory pleasures” is very much like watching a good magic show. That is why the Buddha called *vīññāṇa* a “magician.”
- I have emphasized this in many recent posts because it is a critical point: “[Mūlapariyāya Sutta – The Root of All Things.](#)”
- We accumulate such *akusala kamma* in two stages. The first “subtle stage” is the “*purāṇa kamma* stage,” when *kamma* accumulation starts at a subtle level that our minds are unaware of.
- If the mind sufficiently attaches to the sensory input, we consciously start accumulating new, strong *kamma* with speech and actions based on *vacī* and *kāya saṅkhārā*. As shown in the first chart above, that happens at the “*taṇhā paccayā upādāna*” step in the *Akusala-Mūla Paṭicca Samuppāda* process. That is the “*nava kamma*” stage.

***Nava Kamma* Stage**

9. **[WebLink: suttacentral: Kammanirodha Sutta \(SN 35.146\):](#) *Katamañca, bhikkhave, nava kammaṃ? Yaṃ kho, bhikkhave, etarahi kammaṃ karoti kāyena vācāya manasā...***

- The **second chart** above shows how a mind gets defiled in real-time by repeatedly attaching to a sensory input (we assume a visual input.)

- The mind of anyone born a human (including an *Arahant*) starts at the *kāma dhātu* stage. **That physical body (and the brain) will automatically present to the mind an “altered rūpa” instead of a “true representation of the external rūpa.”** That is why a “distorted *saññā*” (e.g., the sweetness of sugar) arises in an *Arahant* as well as for a *puthujjana*.
- However, the mind of an *Arahant* would not attach to that “altered rūpa” because that mind has fully grasped how that “trick” takes place, as explained in the above charts.

General Attachment Sequence for *Kāma Dhātu*

10. The “[WebLink: suttacentral: Sanidāna Sutta \(SN 14.12\)](#)” points out the general sequence of steps involved in *kamma* accumulation based on any sensory input in *kāma loka*. We discussed that in the post “[Upaya and Upādāna – Two Stages of Attachment](#).”

- “*Kāma dhātum, bhikkhave, paṭicca uppajjati kāma saññā, kāma saññam paṭicca uppajjati kāma saṅkappo, kāma saṅkappam paṭicca uppajjati kāmacchando, kāmacchandam paṭicca uppajjati kāma pariḷāho, kāma pariḷāham paṭicca uppajjati kāma pariyesanā.*” OR “Attachment to *kāma dhātu* leads to *kāma saññā*, attachment to *kāma saññā* leads to *kāma saṅkappa*, attachment to *kāma saṅkappa* leads to *kāmacchanda*..and so on to *kāma pariyesanā*.”

11. In the post “[Contamination of a Human Mind – Detailed Analysis](#),” we discussed the following verse in the “[WebLink: suttacentral: Saññānānatta Sutta \(SN 14.7\)](#),” which discusses the six types of sensory inputs available in the *kāma loka*. Thus, it expended the general statement in the above verse:

“*Rūpa dhātum, bhikkhave, paṭicca uppajjati rūpa saññā, rūpa saññam paṭicca uppajjati rūpa saṅkappo, rūpa saṅkappam paṭicca uppajjati rūpacchando, rūpacchandam paṭicca uppajjati rūpa pariḷāho, rūpa pariḷāham paṭicca uppajjati rūpa pariyesanā*” OR “*Rūpa dhātu* gives rise to the perception of that **sight** (*rūpa saññā*.) That perception (if mind-attaching) gives rise to thoughts about it (*rūpa saṅkappa*.) Thoughts give rise to the desire for such sights (*rūpacchanda*.) The desire for sights gives rise to the passion for sights (*rūpa pariḷāha*.) The passion for sights gives rise to pursuing/investigating sights (*rūpa pariyesanā*.)” In the last one, “*pariyesanā*” means “investigations;” when one becomes interested in something, one investigates how to use it optimally.

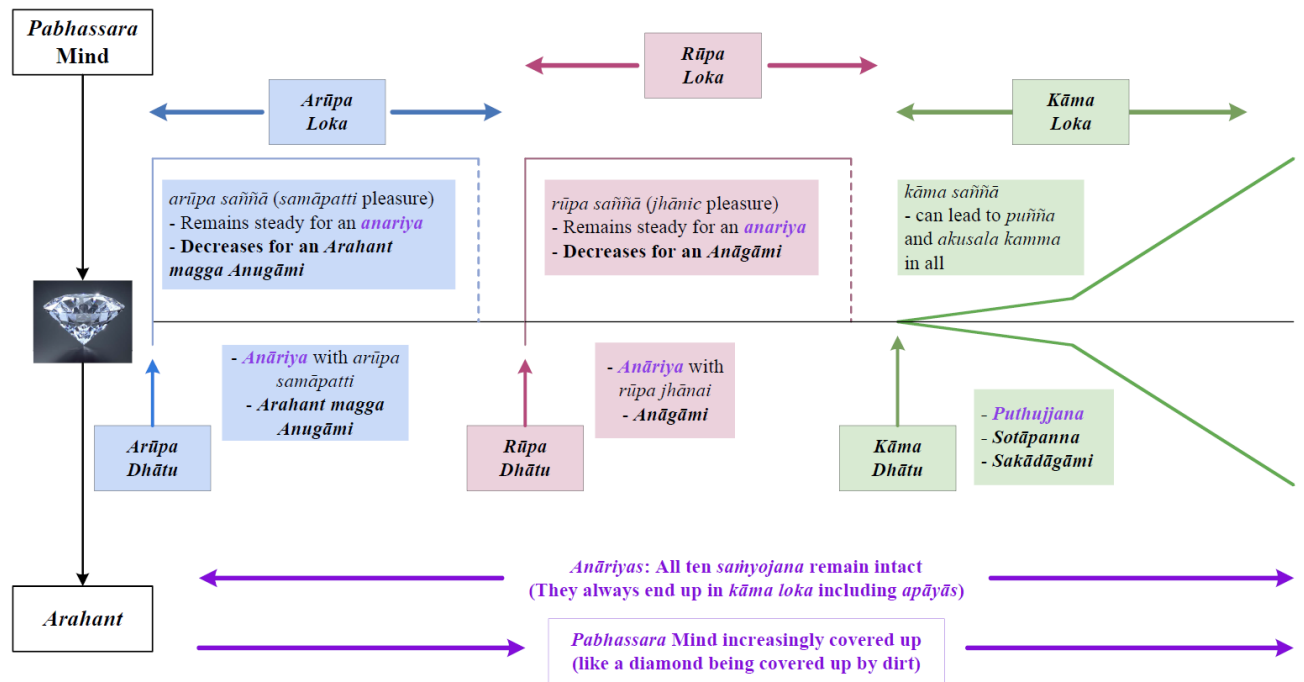

- Then the verse is repeated for all SIX senses ending with “*dhamma dhātum paṭicca uppajjati dhamma saññā, dhamma saññam paṭicca uppajjati dhamma saṅkappo, dhamma saṅkappam paṭicca uppajjati dhammacchando, dhammacchandam paṭicca uppajjati dhamma pariḷāho, dhammapariḷāham paṭicca uppajjati dhamma pariyesanā.*”

Broader View Including All Realms

12. The second chart above explains the effect of the “distorted *saññā*” on initiating the defilement of the mind (i.e., the growth of “*kamma viññāṇa*” or the “*pañca upādānakkhandha*”) in the *kāma loka*. In fact, it takes place mainly in the human realm.

- A somewhat similar “distorted *saññā*” also arises in the 16 realms of the *rūpa loka* (*rūpāvacara Brahma* realms) and the four realms in the *arūpa loka* (*arūpāvacara Brahma* realms.) However, “*kamma* accumulation” DOES NOT happen significantly in those realms.
- An *anāriya* yogi born in any of those 20 realms will experience the “*jhānic/samāpatti sukha*” until the end of their lifetime there. Then, they will be reborn in the *kāma loka*.
- **An Ariya born in one of those realms will also experience the “*jhānic/samāpatti sukha*,” which ALSO arises from “distorted *saññā*.”** However, they will again remove attachment to that “distorted *saññā*” and advance to the higher realms, eventually reaching *Arahanthood*.
- That is explained in the chart below.

Sabbe Saṅkhārā Aniccā

1. Mind of a human (in *kāma loka*) is far away from Nibbāna (*pabhassara mind*.)

2. The more kamma we accumulate, the further we move away. **That is why “sabbe saṅkhārā aniccā”** OR “all our actions seeking sensual pleasures are fruitless/will never led to stopping suffering in the rebirth process.”

3. Note that all *akusala kamma* are done in *kāma loka* (mostly in the human realm; we will discuss that later.)

Purāṇa and Nava Kamma - 3

Download/Print: [“WebLink: Image Download: Purāṇa and Nava Kamma - 3”](#)

13. A mind MUST first fall on one of the three *dhātus* (upon receiving an *ārammaṇa*.) Those in *rūpa* or *arūpa loka* do not receive “sensory sensory inputs,” so their minds fall on either the “*rūpa dhātu*” or the “*arūpa dhātu*.”

- For example, *anāriya Brahma* in a “*rūpa loka Brahma* realm” only receives the “distorted *saññā*” of “*rūpāvacara jhānic sukha*” and will automatically attach to it with “*saññā vipallāsa*.” They do not accumulate more *kamma*, but will return to *kāma loka* at the end of *Brahma*’s life. Unlike in the *kāma loka*, there is no way to accumulate (strong) *kamma* in the *rūpa* or *arūpa Brahma* realms.
- An *Anāgāmi* in *rūpa loka* will also get the “distorted *saññā*” of “*rūpāvacara jhānic sukha*” but can see the “*anicca* nature” of that *saññā* and can stop attaching to it.

14. Therefore, an *anāriya*’s mind can never move toward the “suffering-free *pabhassara mind*.” That is the crucial point to be seen from the above third chart.

- In particular, ANY action, speech, or thought of a human *puthujjana* will ALWAYS move their minds AWAY from the “suffering-free” *pabhassara mind*. That is a key reason why the *abhisankhāra* generation (via “*avijjā paccayā saṅkhārā*”) is of the “*anicca* nature.” In other words, “*sabbe saṅkhārā aniccā*.”
- That also means the mind of a *puthujjana* NEVER moves in the “*pariṇāmi*” direction or “for the better.” It always moves in the “*vipariṇāmi*” or “for the worse.”
- That is discussed in the post [“Aniccaṃ Vipariṇāmi Aññathābhāvi – A Critical Verse.”](#)

Purāṇa and Nava Kamma Stages – Connection to Paṭicca Samuppāda

15. As you may be able to see, the *purāṇa* and *nava kamma* stages correspond to the *Avyākata Paṭicca Samuppāda* and *Akusala-Mūla Paṭicca Samuppāda* processes respectively.

- For details, see “[Avyākata Paticca Samuppāda for Vipāka Viññāna](#).”
- Also see “[Upaya and Upādāna – Two Stages of Attachment](#).”
- In the *Sutta Piṭaka* the above two PS processes are treated together as just “*Paṭicca Samuppāda*.” The separation into two distinct processes is seen only in the Commentaries.

7.4.1.8 **Saññā Nidānā hi Papañca Saṅkhā - Immoral Thoughts Based on ‘Distorted Saññā’**

January 26, 2024; revised #6 January 27, 2024

“*Saññānidānā hi papañcasaṅkhā*” verse captures the root cause for defilements to arise in mind. The “built-in distorted *saññā*” is why it is so hard to eliminate the tendency to crave sensual pleasures. [*papañca* : [m.] an obstacle; impediment; delay; illusion; hindrance to spiritual progress. *saṅkhā* : (f.) enumeration; calculation; a number; definition.]

Previously Unheard Teachings of a Buddha

1. The Buddha called *saññā* a mirage in the “[WebLink: suttacentral: Phenapindūpama Sutta \(SN 22.95\)](#),” and we discussed that in the posts “[Sotāpanna Stage and Distorted/Defiled Saññā](#)” and “[Fooled by Distorted Saññā \(Sañjānāti\) – Origin of Attachment \(Tanhā\)](#).”

- Here, we will discuss another critical *sutta* with the above verse to provide evidence that the “sweetness of sugar” or the “beauty of a woman” is a “mirage” created in **the human mind** by the “distorted *saññā*” built into our biological bodies. Those are not *vedanā* but “made-up *saññā*.” **However, “distorted *saññā*” leads to “mind-made *vedanā*” or “*samphassa-jā-vedanā*,” i.e., becoming joyful or unhappy depending on the sensory input.**
- The physical and mental bodies of any living being arises via *kammic* energy (also called *uppatti bhava*), which gives rise to that existence. That happens via the “*bhava paccaya jāti*” step in the *Uppatti Paṭicca Samuppāda*.
- **That is the “previously unheard teachings of a Buddha.”**

Jāti (With a Physical Body) Dictated by *Paṭicca Samuppāda*

2. The “*bhava paccaya jāti*” step in the *Uppatti Paṭicca Samuppāda* came about **starting with attachment to similar sensory stimulations** (“*avijjā paccayā saṅkhāra*.”) Attachment to certain stimulations (“*paṭi icca*”) leads to “births to provide matching experiences” (*sama uppāda*); see “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”

- A pig’s birth is based on the lowly deeds (*kamma*) done with “*avijjā paccayā saṅkhāra*.” A lion’s birth is based on vicious deeds.
- Thus, the “sweetness of sugar” or the “beauty of a woman” would not arise in a pig or a lion. A pig’s mind craves garbage for food. A lion does not crave sugar or garbage but the flesh of other animals. For details, see “[Gati to Bhava to Jāti – Ours to Control](#)” and “[Gati \(Habits/Character\) Determine Births – Samsappanīya Sutta](#).”
- Human births are based on “good/moral *gati*” but mixed with *kāma rāga* (tendency to value sensory pleasures.) The “sweetness of sugar” or the “beauty of a woman” is unavoidable for anyone born with a human body; the Buddha experienced them, too. Thus, even an *Arahant* born a human would generate that “distorted *saññā*” (unless in a *jhāna* or *samāpatti*.)

- However, if people fully understand how that “distorted *saññā*” arises, their minds will no longer be fooled. That is what Bāhiya Dārucīriya (amazingly) understood when the Buddha only told him to realize “*diṭṭhe diṭṭhamattam bhavissati, sute sutamattam bhavissati, mute mutamattam bhavissati, viññāte viññātamattam bhavissatī’ti.*” That means, “Don’t go beyond what is seen, heard, experienced by the tongue, nose, body or with the mind.” **Ven. Bāhiya understood that anything that appears “mind-pleasing” is not a truthful depiction of reality.** See “[WebLink: suttacentral: Bāhiya Sutta \(KN Ud 1.10\)](#)”; English translations are always inadequate because the translator does not understand the deeper meaning. [See “[WebLink: wisdomlib.org: Bāhiya Dārucīriya Mahāthera](#)” from the book “[WebLink: PDF Download: The Great Chronicle of Buddhas](#)”.]

A Mind Always Falls on One of the Three “*Lokās/Dhātus*”

3. When not receiving sensory input via any of the six senses, the mind is in the “*uppatti bhavaṅga* state.” That is the “mindset” that one is born with. Since a human birth results from “good *kamma vipāka*,” that state of any human is positive. Only those in the *apāyās* (four lowest realms) have “negative” or “bad” *uppatti bhavaṅga* states.

- While in the *uppatti bhavaṅga* state, the mind is inactive, and no *javana cittās* arise. When an *ārammaṇa* is received via any of the six senses, the mind breaks away from that *uppatti bhavaṅga* state and focuses on the *ārammaṇa*, i.e., becomes active.
- This is analogous to a car being “in neutral” and starting to move only when it is put into a gear. While in the neutral gear, the car is “alive” but not engaged in moving.
- A human will NOT lose that “*uppatti bhavaṅga* state” until the end of human existence. Thus, an *Arahant* born a human will also have the mind in that “*uppatti bhavaṅga* state” unless in a *jhāna* or *samāpatti*.

4. Upon receiving an *ārammaṇa*, a human mind will “break away” from the “*uppatti bhavaṅga* state” and will first fall on the “*kāma dhātu*” stage corresponding to human *bhava*. It will automatically receive the “*kāma saññā*” associated with the “human *bhava*.” That includes “distorted *saññā*” of “sweetness in sugar,” “beauty of a woman,” or “stench of feces.”

- In contrast, a pig would receive a “distorted *saññā*” of an “attractive smell” with a pile of feces. In reality, feces is made of *suddhaṭṭhaka* (atoms and molecules in the language of modern science) and would not have “good or bad” qualities. This is a more profound point requiring in-depth contemplation.
- We are thrilled to watch a magic show where the magician performs “unbelievable actions.” But the magician always uses a “trick.” Once that trick is discovered, there is no “thrill in watching the magic show.”
- “Distorted *saññā*” is the best magic trick in the world. Nature itself is the magician. It is so good that no one but a Buddha can discover it. Since our physical bodies are built to provide that “distorted *saññā*,” no matter how many investigations are done (based on mundane techniques, including scientific experiments) to uncover the trick, they will all fail.
- It requires a “paradigm shift” to see how that trick is performed. **The Buddha described how *kamma* done with particular “*gati*” led to births with corresponding “distorted *saññā*,” as explained in #2 above.** That is the “previously unheard teachings of a Buddha.”

“*Saññānidānā hi papañcasaṅkhā*”

5. As we proceed, I will discuss several critical *suttās* on “distorted *saññā*.” The above verse appears in the “[WebLink: suttacentral: Kalahavivāda Sutta \(Snp 4.11\)](#).” The full verse is:

“*Na saññasaññī na visaññasaññī, Nopi asaññī na vibhūtasaññī; Evaṃ sametassa vibhoti rūpaṃ, Saññānidānā hi papañcasaṅkhā.*”

- In the *Tipitaka*, words are combined to compress the lines of text. If we expand the verse:

“*Na sañña saññī na visañña saññī, Nopi asaññī na vibhūta saññī; Evaṃ sametassa vibhoti rūpaṃ, Sañña nidānā hi papañca saṅkhā*”.

- As we discussed, accumulation to *pañcupādānakkhandha/paṇca upādānakkhandha* (or “*loka samudaya*” according to the Buddha) happens with the generation of “*akusala* accumulation” (***papañca saṅkhā***) in the “*nava kamma*” stage. But that process starts with the “*saṅkappa* generation” based on “distorted *saññā*” in the “*purāṇa kamma*” stage. See “[Purāṇa and Nava Kamma – Sequence of Kamma Generation](#).” [***papañca*** : [m.] an obstacle; impediment; delay; illusion; hindrance to spiritual progress. ***saṅkhā*** : (f.) enumeration; calculation; a number; definition.]
- But let us first look at the next verse that mentions various types of *saññā*.

6. “*Evaṃ sametassa vibhoti rūpaṃ*” means “once one comprehends the true nature of *saññā*, mind-made *rūpās* stop arising in mind.” In other words, *akusala* accumulation via “**giving priority to immoral or *papañca***” (***papañca saṅkhā***) has origins (*nidāna*) in *saññā*, which refers to the “distorted *saññā*.” Now, let us look at the first part of the verse.

- “*Na sañña saññī*” means one cannot grasp the truth with the “distorted *saññā*.” However, one cannot sort it out without that “distorted *saññā*” being experienced either, and that is what “*na visañña saññī*” means.
- For example, one cannot sort it out by losing *saññā* altogether and becoming “*asañña*.” We know that those who cultivate “*asañña saññā*” techniques (“*asañña Bhāvanā*”) end up in the “*asañña* realm” without generating any *saññā*. Such an “*asañña saññā*” state is when one becomes unconscious; while unconscious, *saññā* of any kind cannot arise because no *cittās* arise. Next, “*na vibhūta saññī*” means one cannot be without “(distorted) *saññā*” to grasp the truth, i.e., when in an *arūpa samāpattī*. These descriptions are in the “[WebLink: suttacentral: Kalahavivāda sutta niddesa \(KN Mnd 11\)](#).”
- The true nature of the “distorted *saññā*” we experience is discussed in the “[Mūlapariyāya Sutta – The Root of All Things](#).” As the *sutta*’s name implies, grasping this “root of all things” is the key to stopping ***papañca saṅkhā*** from arising. Also see “[Fooled by Distorted Saññā \(Sañjānāti\) – Origin of Attachment \(Tanhā\)](#).”
- **The “distorted *saññā*” includes “*subha* and *paṭigha saññā*” which need to be removed via *Satipaṭṭhāna* after going through the “*jānato* and *passato*” stages.** [heard (*jānato*) and fully comprehended (*passato*)]

“Distorted *Saññā*” Remains with a Living *Arahant*

7. *Arahanthood* is attained while experiencing the “distorted *saññā*” but understanding with wisdom how it arises. The key is to understand how that “distorted *saññā*,” the “mirage,” or the “trick,” is done. It is created by our own minds when we go through the *Paṭicca Samuppāda* process with *avijjā* and create future *uppati* (*bhava* and *jāti*.) **That rebirth (*jāti*) will automatically present that mirage or the “distorted *saññā*.”**

- **It is a vicious circle that keeps the rebirth process repeating perpetually UNTIL the “trick” is heard (*jānato*) and fully comprehended (*passato*.)**
- **Note that the ideal *saññā* (after getting rid of the “distorted *saññā*”) is the *saññā* that arises only in a “*pabhassara citta*.”** An *Arahant* in “*Arahant phala samādhī*” experiences that “pure *citta*.” That “*pabhassara citta*” is first experienced at the *Arahant phala* moment.
- On the other hand, an *Arahant*, while engaged with “*kāma dhātu*,” experiences “*cittās* with *kāma saññā*” as we discussed. Furthermore, an *Arahant* in a *jhāna* or *samāpatti* experiences *cittās* with “*rūpa saññā*” (“*jhānic* pleasures”) and “*arūpa saññā*” (“*samāpatti* pleasures”) respectively, but their minds do not attach to them either.

Arahants Experience the “Distorted *Saññā*” – *Tipiṭaka* Evidence

8. The “[WebLink: suttacentral: Nibbānadhātu Sutta \(Iti 44\)](#)” describes a living *Arahant* as “*Tassa tiṭṭhanteva pañcendriyāni yesaṃ avighātattā manāpāmanāpaṃ paccanubhoti, sukhadukkhaṃ paṭisaṃvedeti. Tassa yo rāgakkhayo, dosakkhayo, mohakkhayo—ayaṃ vuccati, bhikkhave, saupādisesā nibbānadhātu.*”

Translated: “Their five sensory faculties remain. So long as their sensory faculties operate, they **continue to experience the agreeable/disagreeable and to feel bodily pleasure/pain**. The ending of greed, hate, and delusion in them—is called the element of *nibbāna* with something left over.” Here, “what is left over” is their physical body with the sensory faculties. Here, “**agreeable and disagreeable**” refers to the **two main types of “distorted *saññā*”**: *subha saññā* for “**mind-pleasing experiences**” and “*paṭigha saññā*” for “**disliked experiences**.” As we have discussed they experience, for example, the “sweetness of sugar” or the “bad odor of rotten meat.”

- The key point is that their minds do not even go through the “*purāṇa kamma*” stage that takes place in a *puthujjana* automatically. Thus, no further additions to *pañcupādānakkhandha* will not happen for an *Arahant*.
- Even the Buddha experienced the “distorted *saññā*” because he was born with a human body. When describing various “characteristics of the Buddha,” the “[WebLink: suttacentral: Brahmāyu Sutta \(MN 91\)](#)” states, “*Rasapaṭisaṃvedī kho pana so bhavaṃ gotamo āhāraṃ āhāreti, no ca rasarāgapāṭisaṃvedī*” OR “He eats experiencing the taste, but **without experiencing attachment** for the taste.”

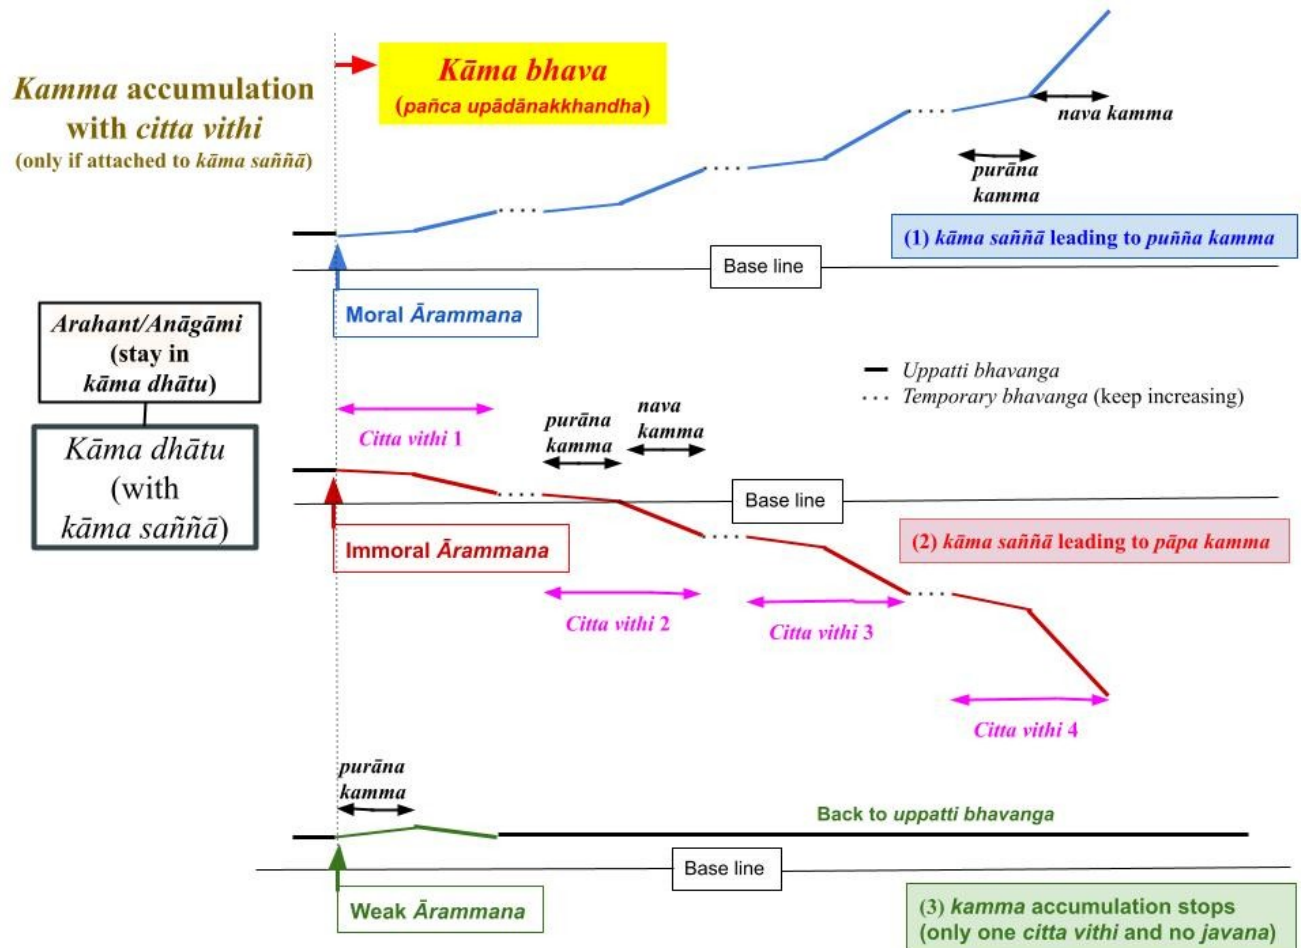

Attachment to “Distorted *Saññā*” Initiates *Kamma* Accumulation

9. Therefore, anyone born with a human body will experience the “distorted *saññā*.” But the mind of a Buddha or an *Arahant* will not go beyond that. They fully understand it is a “magic show.”

- The mind of anyone with *kāma raga anusaya/saṃyojana* will automatically attach to any *ārammaṇa* and the “*upaya* stage” or the “*purāṇa kamma*” stage is launched. **No *kamma* accumulation happens in this FIRST stage because no *javana cittās* arise.** This process happens **subconsciously**, without our awareness.
- However, if the mind becomes interested in the *ārammaṇa*, it gets into the “*upādāna stage*” or the “*nava kamma*” stage. That is the **SECOND stage. *Kamma* accumulation with *javana cittās* happens in this SECOND stage.** This process happens **consciously**, where we engage in *vacī* and *kāya saṅkhāra* (i.e., generate *vacī* and *kāya kamma*.)
- The *upaya* and *upādāna* stages were discussed in “[Upaya and Upādāna – Two Stages of Attachment.](#)” The alternative way of explaining the same process is to call them the “*purāṇa kamma*” and “*nava kamma*” stages. That discussion is in “[Purāṇa and Nava Kamma – Sequence of Kamma Generation.](#)”
- Those alternative terminologies appear in different *suttās*. It is good to be aware of the nomenclature.

Transition to the Second Stage

10. Transition to ***kamma* accumulation** or “*nava kamma*” stage happens if we generate *kāma guṇa* for that *ārammaṇa*. That means the sensory input (*ārammaṇa*) is strong enough to convince the mind to pursue it. That is illustrated in the following chart (and also that *Arahants* and *Anāgāmis* minds stop at the *kāma dhātu* stage with *kāma saññā*.) *Kamma* accumulation, once started with the first *citta vūthi*, will continue until either (i) a strong *kamma* is done with *vacī/kāya saṅkhāra*), or (ii) one mindfully stops the “*nava kamma*” stage close to the beginning.

Kamma accumulation with citta vithi

Download/Print: [“WebLink: Image Download: Kamma accumulation with citta vithi”](#)

- If the ārammana is not strong enough to trigger kāma guṇa (and generate kāmacchanda), then javana citta will not arise in the first citta vithi; thus, no “nava kamma” will be done. **Furthermore, no more citta vithi will arise, as shown in the chart above.** That is the case for most sensory inputs that go through our minds daily. We attach only to a small fraction.
- See “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#)” for details on how kāma guṇa arise in the mind.
- Obviously, kāma guṇa does not arise in the mind of an Arahant.

7.4.1.9 Kalahavivāda Sutta – Origin of Fights and Disputes

February 2, 2024

Kalahavivāda Sutta is a series of questions and answers on how the origins of fights, wars, conflicts, and disputes can be traced to “distorted saññā.”

The “[WebLink: suttacentral: Kalahavivāda Sutta \(Snp 4.11\)](#)” is a short *sutta* with highly condensed verses. I will translate each verse to provide the meaning. There are seven questions, with answers in the bullets.

First question

1. “*Kutopahūtā kalahā vivādā, Paridevasokā sahamaccharā ca; Mānātimānā sahapesuṇā ca, Kutopahūtā te tadiṅgha brūhi*” OR “Why are there conflicts and disputes? They exist with lamentation, sorrow, stinginess (*macchariya*), egotism (*māna*), arrogance/self-importance (*atimāna*), and slander

(*pesuṇā vācā*.) How do they arise?” [*pesuṇa* : [nt.] slandering. *pisuṇāvācā* : [f.] malicious speech. *pisuṇa* : [nt.] slander; malicious speech.]

- “*Piyappahūtā kalahā vivādā, Paridevasokā sahamaccharā ca; Mānātimānā sahapesuṇā ca, Maccherayuttā kalahā vivādā; Vivādajātesu ca pesuṇāni*” OR “Fights and disputes are based on what is liked (*piya*) and disliked (*appiya*.) When people perceive certain things to be *piya* and certain other things to be *appiya*, they fight to have more of *piya* and to get rid of *appiya*. That leads to lamentation (*Parideva*), sorrow (*soka*), stinginess (*macchariya*), egotism (*māna*), arrogance/self-importance (*atimāna*), and slander/gossip (*pesuṇā vāca*), eventually leading to fights and even wars among countries.
- **Note:** This is related to “*appiyehi sampayogo dukkho, piyehi vippayogo dukkho*” in the “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#).”
- **Note:** “*Kāma rāga*” and “*kāma guṇa*” arise in mind based on *piya* things: “[Kāma Rāga Arises Due to “Distorted Saññā”](#)” and “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#)” Furthermore, “*paṭigha*” (anger/dislike) arises based on opposites of “*kāma guṇa*.” **I had not discussed that specifically until now, but this sutta clarifies it.** What one person likes/craves, another person could hate; **like/dislike is not in the external object but in one’s mind.** Simple examples are discussed in “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”

Second Question

2. “*Piyā su lokasmim kutonidānā, Ye cāpi lobhā vicaranti loke; Āsā ca niṭṭhā ca kutonidānā, Ye samparāyāya narassa hontī*” OR “So where do those liked (*piya*) and disliked (*appiya*) things arise (in a mind)? What is the cause of greed (*lobha*), craving (*Āsā*), and the perception of *nicca* nature (*niṭṭhā*)? How can someone (*narassa*) be free of them (*samparāyāya*)?”

- “*Chandānidānāni piyāni loke, Ye cāpi lobhā vicaranti loke; Āsā ca niṭṭhā ca itonidānā, Ye samparāyāya narassa hontī*” OR “Those liked (*piya*) and disliked (*appiya*) things arise (in a mind) has origins (*nidāna*) in desire (*Chanda*), the same is the cause for greed, craving (*Āsā*), and the perception of *nicca* nature (*niṭṭhā*). When desire (*Chanda*) is removed, one can be free.”
- **Note:** “*Chanda*” here refers specifically to “*kāmacchandha*.” See “[Kāmacchandha and Iccha – Being Blinded by Cravings](#).”

Third Question

3. “*Chando nu lokasmim kutonidāno, Vinicchayā cāpi kutopahūtā; Kodho mosavajjaṇca kathaṅkathā ca, Ye vāpi dhammā samaṇena vuttā*” OR “What is cause of desire (*Chanda*)? How do people come to such conclusions (*Vinicchaya*) about *piya* and *appiya* things? Why do they generate extreme anger (*Kodha*) and resort to lies and gossip (*mosavajjaṇca kathaṅkathā*)? Please explain the causes.”

- “*Sātaṃ asātanti yamāhu loke, Tamūpanissāya pahoti chando; Rūpesu disvā vibhavaṃ bhavaṇca, Vinicchayaṃ kubbatī jantu loke*” OR “What they call pleasurable (*Sāta*) and undesirable (*asāta*) in the world arise only in mind based on desire (*Chanda*). With “**mind-made**” *rūpa* (with *piya* and *appiya* assigned by a mind), they come to **wrong conclusions** about things in the world.”
- *Kodho mosavajjaṇca kathaṅkathā ca, Etepi dhammā dvayameva sante Kathaṅkathā nānapathāya sikkhe, Nātvā pavuttā samaṇena dhammā*” OR “Because of the **pleasurable (*Sāta*)** and **undesirable (*asāta*)** arising in mind **for *piya* and *appiya* *rūpa*** (*Etepi dhammā dvayameva sante*), extreme anger (*Kodho*), wrong speech and deeds (*mosa*), as well as gossip (*Kathaṅkathā*) result. The Buddha teaches these origins based on his complete understanding of causes and effects (*Nātvā pavuttā samaṇena dhammā*.)”
- **Note:** Here, the answer came in two verses.

Fourth Question

4. “*Sātaṃ asātaṇca kutonidānā, Kismiṃ asante na bhavanti hete; Vibhavaṃ bhavañcāpi yametamatthaṃ, Etaṃ me pabrūhi yatonidānaṃ*” OR “How do **pleasurable (Sāta)** and **undesirable (asāta)** arise in a mind (*Sātaṃ asātaṇca kutonidānā*)? How can that be stopped (*Kismiṃ asante na bhavanti hete*)? Why do people have different ideas about (*yametamatthaṃ*) existence (*bhava*) and non-existence (*vibhava*)? Please tell me the root causes (*nidāna*) for those?”

- “*Phassanidānaṃ sātaṃ asātaṃ, Phasse asante na bhavanti hete; Vibhavaṃ bhavañcāpi yametamatthaṃ, Etaṃ te pabrūmi itonidānaṃ*” OR “**pleasurable (Sāta)** and **undesirable (asāta)** arise in a mind based on **samphassa** (*Phassanidānaṃ sātaṃ asātaṃ*). **Sāta** and **asāta** do not arise in mind in the absence of **samphassa**. Also, without **samphassa**, there will be no doubts about whether something exists or not (meaning things exist only if appropriate causes and conditions exist, i.e., one cannot emphatically say, “This exists (all the time)” or “This does not exist.”) That is why **samphassa** (“*saṇ*” + “*phassa*” or “contact with defilements in mind”) is the root cause (*nidāna*) for things to exist.”
In most cases, “phassa” needs to be interpreted as “samphassa.”

- **Note:** For an explanation of “*saṇ*,” see “[What is “Saṇ”? Meaning of Sansāra \(or Samsāra\).](#)”
- **Note:** Details in “[Difference between Phassa and Samphassa](#)” and “[Vedanā and Samphassa-Jā-Vedanā – More Than Just Feelings.](#)”

Fifth Question

5. “*Phasso nu lokasmi kutonidāno, Pariggahā cāpi kutopahūtā; Kismiṃ asante na mamattamatthi, Kismiṃ vibhūte na phusanti phassā*” OR “What causes **samphassa** arise in a mind (*Phasso nu lokasmi kutonidāno*)? What is grasped (*Phasso nu lokasmi kutonidāno*), and the presence of what (*kutopahūtā*) does **samphassa** arise in a mind? **How does the idea of a “me” (mamattamatthi) that longs for pleasurable (Sāta) and generates anger for undesirable (asāta) go away? How does phassa (mere sensory contact) become samhassa (contact laced with defilements or “saṇ,” i.e., saṇ phassa), and how can that stop (Kismiṃ vibhūte)?**

- “*Nāmaṇca rūpaṇca paṭicchā phasso, Icchānidānāni pariggahāni; Icchāyasantyā na mamattamatthi, Rūpe vibhūte na phusanti phassā*” OR “**Samphassa** arises when a mind combines *nāma* and *rūpa* with *icchā/taṇhā* (or the mind binds *nāma* and *rūpa* together to generate a *nāmarūpa* in mind with craving.)” *Icchā* is the root cause (*Icchānidānāni*), which does the grasping (*pariggahāni*); **if *icchā/taṇhā* is not present in the mind, that mind has lost the false idea of a “me.” If the mind does not generate a “mind-made rūpa” if samhassa is not there (Rūpe vibhūte na phusanti phassā).**

- **Note:** See details in the section on “[Nāma & Rūpa to Nāmarūpa](#)” and subsection “[Nāmarūpa Formation.](#)”

Sixth Question

6. “*Kathaṃ sametassa vibhoti rūpaṃ, Sukhaṃ dukhañcāpi kathaṃ vibhoti; Etaṃ me pabrūhi yathā vibhoti, Taṃ jāṇiyāmāti me mano ahu*” OR “How would a mind not generate a “mind-made rūpa” (*Kathaṃ sametassa vibhoti rūpaṃ*)? Since *sukha* and *dukkha* lead to **samphassa** and “mind-made rūpa” how can *sukha/dukkha* (this includes “*samphassa-jā-vedanā*”) be stopped from arising in mind (*Sukhaṃ dukhañcāpi kathaṃ vibhoti*)? Tell me how that can happen; I think that is the critical point to know (*jāṇiyāmāti* is related to “*jānato*”).”

- “*Na saññasaññī na visaññasaññī, Nopi asaññī na vibhūtasaññī; Evaṃ sametassa vibhoti rūpaṃ, Saññānidānā hi papañcasāṅkhā*”. This is the verse that we discussed in #5 of the previous post, “[Saññā Nidānā hi Papañca Saṅkhā – Immoral Thoughts Based on “Distorted Saññā.](#)” Please read the explanation there why “distorted *saññā*” is a root cause of *kāma rāga*.

- **Note:** Just as the “distorted *saññā*” is a root cause (*nidāna*) for *kāma rāga*, it is also a root cause (*nidāna*) for *paṭigha*” (anger/dislike), and thus, of **all fights, wars, and disputes**.

Seventh Question

7. “*Yam tam apucchimha akittayī no, Aññaṃ tam pucchāma tadiṅgha brūhi; Ettāvataggam nu vadanti heke, Yakkhassa suddhim idha paṇḍitāse; Udāhu aññaṃpi vadanti etto*” OR “You have answered every question I asked. I have one more question. Wise people (*paṇḍitā*) say this teaching leads to the highest purity. Is there anything else I need to know?”

- “*Ettāvataggampi vadanti heke, Yakkhassa suddhim idha paṇḍitāse; Tesam paneke samayam vadanti, Anupādisese kusalā vadānā.*” OR “This is indeed the highest purity to be attained, i.e., to comprehend how “distorted *saññā*” arises. But there is one more thing to add about this “**highest purity to be attained in this life itself**” That is ***Anupādisesa Nibbāna***. (*Anupādisese kusalā vadānā.*)
- “*Ete ca ñatvā upanissitāti, Ñatvā munī nissaye so vimamsī; Ñatvā vimutto na vivādameti, Bhavābhavāya na sameti dhīro*”ti.” OR “There are those who attain ***Anupādisesa Nibbāna***. **They can experience full Nibbāna** (*Anupādisesa Nibbāna*) even before the death of the physical body. They have understood, are freed, and do not engage in disputes. They do not have doubts about existence and non-existence, i.e., they have realized that existence is real (but filled with much suffering in the rebirth process) and can be stopped from arising.

My Additional Comments

1). The Buddha explained two types of *Arahanthood*: *Paññāvimutti* and *Ubhatovimutti*.

- **The *Paññāvimutti Arahanthood* can be attained without going through a single *jhāna*** (as in the case of Ven. Bahiya, Minister Santati, King Suddhodana, for example) or starting with any *anariya/Ariya jhāna*; see #15 through #17 of “[The 89 \(121\) Types of Citta.](#)”
- On the other hand, *Ubhatovimutti Arahants* are “released both ways,” meaning they are *Paññāvimutti* and also *Cetovimutti*, i.e., they have proceeded through all *Ariya jhānās* and *samāpatti*. **Thus, *Ubhatovimutti Arahants* can enter “*nirodha samāpatti*,” where “full *Nibbāna*” can be experienced even during this lifetime. They can experience it for up to seven days at a time.**
- Details on *Paññāvimutti Arahanthood* in “[Pannāvimutti – Arahanthood without Jhāna.](#)” Details on *Ubhatovimutti Arahants* in “[WebLink: suttacentral: Tapussa Sutta \(AN 9.41\) – Akuppā Cetōvimutti.](#)”
- It is those *Arahants* who have attained *Nibbāna* via both ways (*Ubhatovimutti Arahants*) who can experience the “**full *Nibbānic experience***” (*Anupādisesa Nibbāna*) while living.

2). The conventional belief is that ***Anupādisesa Nibbāna*** is possible only with the death of the physical body of an *Arahant*. However, the above verses show that an *Ubhatovimutti Arahant* can experience ***Anupādisesa Nibbāna*** (full *Nibbāna*) even during life.

- That is also confirmed in the “[WebLink: suttacentral: Nibbānadhātu Sutta \(KN Iti 44\).](#)” That *sutta* describes a *Paññāvimutti Arahant* @marker 3.1 (“*Katamā ca, bhikkhave, saupādisesā nibbānadhātu?*”) and *Ubhatovimutti Arahant* @marker 4.1 (“*Katamā ca, bhikkhave, anupādisesā nibbānadhātu?*”)
- Therefore, while many religions promise “everlasting happiness” after death, the “ultimate cooling down” promised by the Buddha can be experienced during this life itself for an *Ubhatovimutti Arahant*. Both *Paññāvimutti* and *Ubhatovimutti Arahants* experience full release from *domanassa vedanā* for the rest of their lives; they may experience only “*sārīrika vedanā*” due to ailments associated with the physical body they were born with. Even the Buddha suffered from those: “[WebLink: suttacentral: Sakalika Sutta \(SN 1.38\).](#)” [*sārīrika* : [adj.] connected with the body.]

3). **Summary of the Sutta:** Like the “[Mūlapariyāya Sutta – The Root of All Things](#),” the *Kalahavivāda Sutta* points out that it is essential to understand the concept of “distorted *saññā*.” The *Kalahavivāda Sutta* focuses on the “*paṭigha*” (anger/dislike) aspect. Of course, we have discussed that “distorted *saññā*” also leads to “*kāma rāga*.”

- Understanding “distorted *saññā*” is necessary to proceed beyond the *Sotāpanna* stage. Furthermore, it also makes it easier to attain the *Sotāpanna* stage, i.e., to get rid of “*sakkāya diṭṭhi*” because it is easier to see the “mirage” of “mind-made pleasures.” For example, the “sweetness of sugar” or the “beauty of a woman/handsomeness of a man” is a “mirage” created in **the human mind** by the “distorted *saññā*” **built into our biological bodies**. Those are not *vedanā* but “made-up *saññā*.” See “[Saññā Nidānā hi Papañca Saṅkhā – Immoral Thoughts Based on “Distorted Saññā](#).”
- **Biological bodies** in human and animal realms arise based on ***Paṭicca Samuppāda***: “*paṭi+ichcha*” leads to “*Sama+uppāda*,” i.e., “willingly attaching to the root causes” leads to “corresponding births.” One would not like to be born an animal. However, **if one acts like an animal**, an animal birth is unavoidable! If one engages in “lowly deeds,” one may be reborn as a pig. **That pig’s physical body arises, according to *Paṭicca Samuppāda*, to provide the “distorted *saññā*” of a “good smell and taste for rotten meat or feces.”** However, even in other realms where dense biological bodies are absent, the “subtle bodies,” for example, **of *Devās* and *Brahmās***, are also designed to provide the corresponding “distorted *saññā*.” See “[Paṭicca Samuppāda – “Paṭi+ichcha” + ‘Sama+uppāda’](#).”
- Here are all the posts on the concept of “distorted *saññā*” at “[Sotāpanna Stage via Understanding Perception \(Saññā\)](#).”

7.4.2.1 The Sotāpanna Stage

Revised February 24, 2020; August 15, 2020; major revision October 21, 201

It is imperative to learn the correct Dhamma from an *Ariya* to attain the *Sotāpanna* stage (one of the four requirements). See, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).” We will discuss an analogy for the *Sotāpanna* stage in that regard. We will briefly discuss *Sabbāsava Sutta* to show the importance of removing wrong views to get to the *Sotāpanna* stage.

Upaddha Sutta (SN 45.2) – Need to Know the Correct Buddha Dhamma From a Noble Friend

1. According to the “[WebLink: suttacentral: Upaddha Sutta \(SN 45.2\)](#)” once, Ven. Ananda told the Buddha that he thinks half (“*upaddhamidaṃ..*”) of the factors contributing someone getting to *Nibbāna* (by completing the *brahmacariya*) can be attributed to association with a Noble Friend (*kalyāṇamittā*.) Here, “*kalyāṇa*” means to “help remove defilements,” and “*mittā*” is a friend.

- But the Buddha explains that not just half, but the FULL contribution (“*sakalamevidaṃ..*”) comes from a *kalyāṇamittā*. Of course, the Buddha is the best *kalyāṇamittā*.
- The reason is clear. **Buddha Dhamma is never known to the world until discovered by a Buddha. An average human can learn about it ONLY from a Buddha or a true disciple of a Buddha who has also understood that Dhamma.**
- However, the guidance is REQUIRED only to understand this “new worldview” that has never been known to the world. That means once getting to the *Sotāpanna* stage, a human would understand the Eightfold Noble Path and how to follow it to bet to the *Arahanthood*.

- That is why getting to the *Sotāpanna* stage is the same as getting to *lokuttara Sammā Diṭṭhi*, not just mundane *Sammā Diṭṭhi*. Mundane *Sammā Diṭṭhi* would enable one to live a “moral life.” In contrast, *lokuttara Sammā Diṭṭhi* enables one to attain *Nibbāna*. See, “
- **Just by understanding the “new worldview,” a large number of defilements (*āsava/anusaya*) are removed from the mind and that is referred to as “*dassanā pahātubbā*” (removal with vision) in the *Sabbāsava Sutta* (see below.)**
- We can use the following mundane analogy to help explain the above idea.

An Analogy for *Sammā Diṭṭhi* (attaining the *Sotāpanna* Stage)

2. Suppose a man (X) lives in an area usually full of sense pleasures. But there are occasional flooding, droughts, and also Earthquakes. When such calamities occur, he gets distraught, and thus, his mind is not at ease most of the time.

- Yet, he has accumulated some wealth, and he believes that “everything will be OK” in the long run in the back of his mind.

3. Then, one day, an old friend (who has been on travel for many years) comes back and tells him that the reason he left was to find a better place to live. The friend says that he did some research and found out that this land is inherently unstable, and within several years, an Earthquake will destroy this area.

- Furthermore, he says that he found a very prosperous place and that there are no worries about flooding, drought, or Earthquakes. But it is a long journey to that place.

4. X tells the friend that he had heard about such beautiful places from other people before. He had followed them at times, but every time came back after trekking for some time because he could not see any benefit. Plus, he says, “how do I know what you say is right? I know that everything is not perfect here, but can you show evidence for your theory that there will be a big Earthquake? Also, how can I believe you that this place you found is so wonderful?”

5. The friend shows him all the evidence that he had gathered why this area is unsuitable for living in the long run. He also shows evidence about the prosperity of the new place and also describes the travel path.

- The evidence is compelling, and X decides to follow the friend’s advice and see what happens. That is analogous to becoming a *Sotāpanna Magga Anugāmi*.

6. X spends a lot of time reading about and contemplating all the evidence. Then he begins to realize that what the friend is saying is true. He decides to take an exploratory trip and makes suitable preparations, as suggested by the friend.

- Once in a while, he wonders whether all these preparations will be a waste of time. But as he keeps on assessing the evidence, he becomes more and more convinced that he needs to take that trip.

7. Then X starts on the trip and is encouraged by seeing some “landmarks” that the friend told him. Even though once in a while he thinks about all the “pleasures” he could have had if he stayed home, these “landmarks” encourage him to go further and then reaches one of the four “major stopovers” that the friend mentioned.

- At a certain point on the way, he becomes fully convinced about his friend’s conclusions. Now there is no going back for him. That is like getting to the *Sotāpanna* stage.

The Way to the *Sotāpanna* Stage

8. The key here is that without knowing about the Buddha’s world view (31 realms of existence and the suffering in the four lower realms, see “[The Grand Unified Theory of Dhamma](#)”), one does not comprehend the “*samsāric* suffering.” **Most suffering incurs when one is born in any of the four lowest realms.** That is important because it is possible that (especially young and wealthy people) may not experience that

much physical and mental suffering. And to have faith in the Buddha's worldview, one needs to spend some time examining the evidence for it.

9. When one sees why it is not fruitful to stay in "this world" of 31 realms, they have understood the true nature, the three characteristics *anicca*, *dukkha*, *anatta*, of "this world."

- *Sammā Diṭṭhi* is the realization that there is nothing "substantial" to be had by staying in "this world." This clear vision concludes that there is no point in doing immoral things (those that cause rebirth in the four lower realms).

10. We strive to gain or own "things" in this world because we perceive that we can achieve happiness eventually; this is *sakkāya diṭṭhi* or *sathkāya diṭṭhi* (both "Sakka" and "sath" mean "good" or fruitful, and "kāya" means "kriya" or actions. *Diṭṭhi* means views. Thus, *sakkāya diṭṭhi* is our wrong idea that our efforts to acquire "things" or "seek happiness" are beneficial and fruitful.

- When one truly understands *anicca*, *dukkha*, *anatta*, this wrong view goes away. One realizes that nothing we do can lead to permanent happiness "in this world."

11. Furthermore, for one who has seen *anicca*, *dukkha*, *anatta*, the mind does not allow serious wrongdoings (*vici+ ki+icca* = liking for wrong actions or things) that could lead to birth in the lower four realms.

- There is no doubt regarding the "world vision" that they realized. Thus *vicikicchā*, or the liking for unfruitful and harmful actions, is removed at the *Sotāpanna* stage.

12. Therefore, one needs to contemplate the true nature of the world. It is done by purifying the mind and cannot be done just by following certain rituals, such as just obeying precepts on certain days.

- Thus the idea of "*sīlabbata parāmāsa*" or "*Nibbāna* can be attained by following rituals" goes away at the *Sotāpanna* stage. One realizes what the Buddha said by "*saṁvaraṭṭhena sīlaṁ*."
- Unbreakable "*sīla*" (or moral behavior) comes with the correct vision/view. That must be monitored at ALL TIMES, not by "observing precepts" for a day or several days.

13. For one who has become "*dassanā sampanno*" (one with clear vision), the mindset changes not by following formal procedures. The change of perspective comes by understanding the futility of breaking any precepts or wrongdoings. Even if one does a wrong act, he would immediately realize it and avoid it in the future.

14. This is not to discourage people from observing precepts as a formality. Even mechanically observing those precepts is good to do. It is also a good habit to instill in children. It is customary in Buddhist countries for whole families to go to the temple and observe "*pañca sīla*" (five precepts) or "*aṭṭhaṅgika sīla*" (eight precepts) on *Poya* (Full Moon) days.

Key Points from the *Sabbāsava Sutta* (MN 2)

15. The key to attaining *Nibbāna* is to remove the *āsava* (residue from the fermentation of immoral thoughts/habits over many *samsāric* births). In the *Sabbāsava Sutta*, the Buddha listed seven steps to remove the *āsava* and to purify the mind, thus paving the way to *Nibbāna*. The seven steps are:

1. Removal by **clear vision** ("*dassanā pahātabbā*," where *dassana* is vision and *pahātabbā* is removal). That is a clear understanding of *anicca*, *dukkha*, *anatta*.
2. Removal by the restrained use of the sense faculties ("*saṁvaraṭṭhena pahātabbā*," where *saṁvara* is the disciplined use of the sense faculties: not to over-indulge in the senses).
3. Removal by good associations ("*paṭisevanā pahātabbā*," where *sevana* is an association: for example, with good friends and good deeds).

4. Removal by tolerance and patience (“*adhivāsanā pahātabbā*”). For example, even if tempted to steal because one is hungry, one should contemplate the consequences of stealing. There are ways to earn a living.
5. Removal by staying clear of “bad influences and environments” (“*parivajjanā pahātabbā*”). One needs to avoid bad friends, unwise locations for a living (due to floods, bad neighbors, etc.), avoid inappropriate times to go out, etc.
6. Removal by getting rid of certain things (“*vinodanā pahātabbā*”). One needs to get rid of immoral thoughts that come to mind, such as excessive sensory pleasure, hate, etc.
7. **Removal by meditation (“*bhāvanā pahātabbā*”). When one has a clear vision in #1, it becomes apparent what to contemplate.**

The clear vision is the first on the list. One should not undertake a journey without knowing the reason for the journey. Furthermore, one needs to understand how to get to the destination.

- In the same way, having a clear vision of the Buddha’s worldview is a prerequisite for starting on the Noble Path. What is *Nibbāna* and how to get there? See, “[Paticca Samuppāda, Tilakkhana, Four Noble Truths.](#)”
- There are four types of *āsavā*: *kāmāsava* (craving for sense pleasures), *diṭṭhāsava* (cravings due to wrong views), *bhavāsava* (craving for existence), and *avijjāsava* (cravings due to ignorance).

16. A *Sotāpanna* removes the *diṭṭhāsava* through clear vision. Once one understood the true nature of “this world” by contemplating *anicca*, *dukkha*, *anatta*, one would not commit any immoral acts to gain anything in “this world.” See, “[Anicca, Dukkha, Anatta.](#)” That alone saves one from future rebirths in the lower four realms.

- A *Sotāpanna* still has the other three *āsavā* left. Those are removed mainly by the meditation on the *Satta Bojjhaṅga* (seven *Bojjhaṅga*.)
- After attaining the *Sotāpanna* stage, one sees the Path to *Nibbāna* (and how to MEDITATE to get to *Nibbāna*.) That is “*bhāvanā pahātabbā*” in #7 above. Then he diligently follows the Path and reaches the following three stages, culminating in *Nibbāna*.
- As one can see, the other five steps (#2 through #6) listed in the *Sabbāsava Sutta* are common sense things to do AT ANY TIME. They make sense at any stage. Anyone can use those steps to enhance the quality of life and remove any bad habits—for example, alcohol/ drug use or even overeating can be bad for health.

A *Sotāpanna* Knows “What to Meditate On”

17. Many people start “meditating” even before understanding “what to meditate on.” **Of course, if one is doing “breath meditation,” there is nothing to learn.** It is an insult to the Buddha. Buddha’s meditations help one to stop future suffering from arising. For that, one must first realize the unfruitfulness/danger in remaining in this world (via the rebirth process.) See, “[Paticca Samuppāda, Tilakkhana, Four Noble Truths.](#)”

- The *Mahā Satipaṭṭhāna Sutta* covers all seven steps in #15 above in a somewhat different fashion. The correct *Ānāpānasati bhāvanā* (not the breath meditation version) covers those in a general way.
- As stated in the “[WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#)”: “*Evam bhāvitā kho, bhikkhave, ānāpānassati evam bahuḷikatā cattāro satipaṭṭhāne paripūreti*” or “*Bhikkhus, that is how ānāpānassati, developed and cultivated, fulfills cattāro satipaṭṭhāna.*”
- **Can “breath meditation” fulfill the *Satipaṭṭhāna Bhāvanā*?** One needs to be a *Sotāpanna* to properly cultivate *Ānāpānassati* or *Satipaṭṭhāna Bhāvanā* (i.e., to have optimum results.)

7.4.2.2 Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire

Revised August 5, 2022; May 16, 2023

Attaining the first stage of *Nibbāna* (*Sotāpanna* stage) will remove suffering in the *apāyā* forever, which could be more than billions or even trillions of years. This is not an exaggeration since we have been in this rebirth process from an untraceable beginning; see “[Evidence for Rebirth](#).” Thus any achievement in this life of 100 years is no match.

- Most people think that Buddha Dhamma is a pessimistic “religion.” It is neither a religion nor a pessimistic one. Let us discuss these two issues a bit first.
- In the “[WebLink: suttacentral: Cakkavattirāja Sutta \(SN 55.1\)](#)” the Buddha stated that a Noble Person (above the *Sotāpanna Anugāmi* stage) is better than an emperor ruling the whole Earth (*rājā cakkavattī*.) Let us discuss what that would be so.

1. Buddha Dhamma describes the true nature of “this world,” which is far more complex than most people think.

- A religion promises that if one abides by its tenets/doctrine and lives this life accordingly, one will be rewarded accordingly. In most religions, one is promised birth in heaven for eternity if this is kept.
- But a basic tenet in Buddha Dhamma is that this life of about 100 years is just a blip compared to the countless lives one has had in the past. **Even if we live a perfect life during these 100 years, that does not guarantee anything about our future lives** because we may have done *kamma* in PREVIOUS LIVES that could give rebirth in even the lowest four realms, the *apāyā*, including the *niraya* (hell).
- **The only way to GUARANTEE that one will NOT be reborn in the *apāyā* is to negate the causes (*lobha, dosa, moha*) that could give opportunities for all such bad *kamma vipāka* to come to fruition.** And that is possible only via attaining the *Sotāpanna* stage. Even though attaining the *Arahant* stage of *Nibbāna* via complete removal of *lobha, dosa, and moha* (and thus the ten *samyojana* or fetters) will do that too, attaining the *Sotāpanna* stage does not require all that. It just requires one to comprehend *anicca, dukkha, and anatta* to the extent that only three *samyojana* (fetters) are removed.
- Removal of three (or ten) *samyojana* cannot be achieved via following set rules/precepts. **One needs to purify one’s mind so that the true nature (*anicca, dukkha, anatta*) of this complex world of 31 realms is understood.** That is why Buddha Dhamma is not a religion per standard definition.
- On the other hand, if one only wants to take what is helpful to lead to moral life and use Buddha Dhamma as a religion, there is nothing wrong with that. That would be much better than living an immoral life. The deeper Dhamma will become more evident as one proceeds, providing the incentive to “dig deeper.”

2. Now to the second issue: Because the Buddha emphasized the “suffering in this world,” many think Buddha Dhamma is pessimistic. The Buddha did not say that this current life is necessarily filled with suffering (even though it has more suffering than people realize); rather, most suffering is encountered in the lowest four realms of the 31 realms. **Thus, this reality of suffering is to be understood in the context of this wider world view.** The Buddha just discovered the true nature of the (more complex) world.

- Furthermore, he showed how to be free from this inevitable suffering in future births and to attain permanent happiness, *Nibbāna*.

3. Please re-read the above material on those two key points. It is important to look at this “wider world view” when assessing what we should strive for in this life. This analysis leads to a whole new perspective if there is evidence to believe the “wider world view” of the Buddha with repeated rebirths in 31 realms, including the four *apāyā* with unimaginable suffering.

- Does it make sense to spend 60 years of an 80-100 year life to accumulate wealth and fame if one is to lose most of one's sensory enjoyment over the last few decades (and possibly have a major disease or memory loss)?
- Does it make sense to accrue unimaginable suffering in the *apāyā* in future births by committing any of the *dasa akusala* (ten defilements) to make money, get a promotion, live in a big house, get a prestigious position, etc. (for less than 100 years)?
- The realities of old age, disease, and death hold for a king, emperor, billionaire, or famous film star just the same as for an average person. In old age, all these achievements become a mental burden because one constantly thinks about the "good old days" and become depressed about not being able to enjoy the sensory pleasures just because the whole sensory system is breaking down.
- Here is a video that summarizes what I tried to explain in the above paragraph :

[WebLink: YOUTUBE: Aging Stars of the Golden Age](#)

4. This predicament holds for ANY being in ANY realm unless at least the *Sotāpanna* stage is attained. A *deva* or a *Brahma* could enjoy millions of years of pleasurable lives but WILL end up in the *apāyā* at some point in the future unless at least the *Sotāpanna* stage of *Nibbāna* is attained. There are several incidents mentioned in the *Tipiṭaka* where the Buddha emphasized how critically important is the *Sotāpanna* stage compared to any existence in the 31 realms:

- One time the Buddha was crossing a paddy field with 500 *bhikkhus* where many cattle were grazing and smiled. A Buddha (or an *Arahant*) does not smile frequently, so Ven. Ānanda asked the Buddha why he smiled. The Buddha said, "Each one of these has been the king of the *devas* at some in the past." Ven. Ānanda asked why that was a reason to smile. Then the Buddha said, "All these 500 *bhikkhus*, who are *Sotāpannas* or above, will never be born an animal. That is why I smiled."
- Another time the Buddha and Ven. Ānanda was walking and saw a piglet by the roadside, and the Buddha again smiled. Asked why, he said, "This piglet had been a princess in a life way back; she cultivated all *anāriya jhānā*, attained the highest *arūpāvacara samāpatti*, and had *abhiññā* powers. She was born in the highest *Brahma* world, but now she is just an animal. On the other hand, those who have attained the *Sotāpanna* stage in my *sāsana* will never be born in the *apāyā*." See "[WebLink: tipitaka.net Dhammapada Verses 338 to 343.](#)" (Note that the background story uses "sow" for "piglet.")

5. Many people do not believe in rebirth. But having a belief will not help if it is a wrong view. Considering the possible dire consequences IF one gets this world view wrong, it makes a lot of sense to spend some time and critically examine the evidence for rebirth in particular (see "[Evidence for Rebirth](#)") and the wider worldview of the 31 realms in general (see, "[The Grand Unified Theory of Dhamma](#)").

6. The *niyata micchā diṭṭhi* (established wrong views) is one of the stronger ones of the *dasa akusala* that could lead to birth in the *apāyā*; the key word there is "*niyata*," or "established," i.e., one firmly believes, for example, that there is no rebirth process. One could avoid this by at least having an open mind and NOT ruling out those possibilities. Even a *Sotāpanna* may not be truly convinced of some aspects of the broader worldview (but not rebirth): for example, he/she may not have any strong conviction on the existence of *deva* worlds or may not even think about such matters.

- Another point to consider is how the standard world views have changed since the Buddha revealed his Dhamma about a complex world with no discernible beginning. Philosophers since that time (Socrates was a contemporary of the Buddha) put forth many world views that have been discarded one by one: [WebLink: WIKI: Astronomy and cosmology](#)
- Within the past 100 years, the Buddha's worldview has gained much support from science and that pace is accelerating with the new string theories and quantum mechanics. With all these impressive advances science has made, it cannot account for 96% of the universe's mass; see [WebLink: NASA: Dark Energy, Dark Matter](#) and [WebLink: WIKI: Dark matter](#). This is because there is so much that we cannot

“see” with our eyes or even with the current scientific instruments; see “[Consciousness Dependence on Number of Dimensions](#).”

- There are good reasons to believe that science will reveal more of these currently hidden aspects of the universe in the future. Just imagine that even a hundred years ago, scientists believed the universe had only a few galaxies and was stable. Now we know that there are billions of galaxies in our universe, that there could be numerous universes, and all those are not stable, i.e., they are born and will perish in the future.
- Until recently, humans also had the wrong impression that the Earth is a special place in the universe. But now we know it is an insignificant “speck of dust” in a vast universe; see the video in “[The Grand Unified Theory of Dhamma](#).”

7. Please spend some quiet time contemplating these issues. These posts are not for reading pleasure; these are issues that have far more severe consequences than making a billion dollars. Some friends tell me I should “tone down” the content because the “realities of the world turn many people off.”

But my goal is not to have a vast readership. Instead, if I could convey the Buddha’s true message to even a few people, I would have accomplished my goal. There is ONLY ONE set of natural laws, and we cannot alter them, just like we cannot alter the laws of motion: If a car is headed to a brick wall, the vehicle needs to be stopped, or the consequences will not be good. Let me give a few examples of how the Buddha assessed this situation:

- Some *Brahmins* complained to the Buddha that he was not spending enough time debating them but would spend much time with even a few of his disciples. The Buddha asked this question: “Suppose a farmer has three paddy fields: one is extremely productive, another is OK but requires considerably more time to yield a good harvest, and the third field is of such poor condition it is impossible to get any harvest. Which field would the farmer put his efforts on? He will take care of the most productive field, disregard the third field, and spend whatever extra time he has on the second field. It is the same way with me. I want to help those interested and capable of learning my Dhamma. Debating with those who have closed minds is a waste of time.” See “[WebLink: suttacentral: Khettūpama Sutta \(SN 42.7\)](#).”
- One day the Buddha and Ven. Ānanda walked for many miles to a village to deliver a discourse. Everybody gathered, and the Buddha sat there for a few hours without starting the discourse. Finally, a farmer who had lost a cow and was out in the forest looking for it found the cow, went home, bathed, ate, and came hurrying to the event. The Buddha started the discourse right after he came in. When they were walking back after the discourse, Ven. Ānanda asked the Buddha why he kept everyone waiting until that one farmer came in. The Buddha said, “Ānanda, I walked all this way to give the discourse because of that farmer. I saw that he could grasp the Dhamma, and he did attain the *Sotāpanna* stage.”

8. The Buddha said, “This Dhamma is different from anything the world has ever seen.” And that is true. It takes time to grasp the complexity of this world, much of which is hidden from us (and only a Buddha is capable of finding them; see “[Dhamma and Science – Introduction](#)”). There is no need to rush and embrace everything; one needs to spend time contemplating the validity of Buddha Dhamma.

- There are many introductory but critical posts in the “[Moral Living and Fundamentals](#)” section. **That section is more about the basic concepts of Buddha Dhamma.** I would encourage even those familiar with “Buddhism” to peruse that section because, without the correct basics, one cannot grasp more advanced concepts. **And I am certain that 90% of “Buddhists” are unaware of some of these basic concepts.** Please comment on anything at this site, and don’t hesitate to point out incorrect concepts.

9. We can, in a way, compare this situation with the situation a parent faces with a teenager. The teenager wants to go out and have a good time with friends. But the parent says, “Do not just think about the immediate pleasures. If you do not study well and get good grades at school, you will not have a good job when you grow up.”

- It is the same here. We are trapped in a “rat race” to keep up with day-to-day pleasures and activities. The Buddha’s message is that there is a much longer time to think about.
- This life is just a drop of water compared to the vast ocean that is the *samsāric* journey of rebirths. It is imperative to take some time and contemplate the “bigger picture.” We may not get another chance of a human birth for millions or billions of years; this is NOT an exaggeration.

10. But the best part of the Buddha’s message, which has been lost for over a thousand years, is that the *nirāmisa sukha* is better than any sensory pleasure. We are under the illusion that sense pleasures are to be pursued. If one can taste the happiness from staying away from sense pleasures, one will NEVER value the sense pleasures. Those who have experienced even *anāriya jhānic* experiences will have some idea of such *nirāmisa sukha*.

- It is a feeling of huge release more than a pleasure in consuming tasty food, for example. And it is not temporary, especially if one can reach the *Sotāpanna* stage. Then that “base level” of relief is never lost, even in future births.
- When one starts on the Path by comprehending *anicca*, *dukkha*, and *anatta*, the sense of peacefulness, the release from stresses, is felt; that gives the incentive to stay on the Path even before attaining the *Sotāpanna* stage.
- The best part is the realization that one will never be born in the *apāyā*. Any king, emperor, or billionaire is not assured of that; on the contrary, the efforts to attain such temporary status may CAUSE one to be born in the *apāyā* if one engaged in *dasa akusala* to attain them.
- As Carl Sagan pointed out in the video in the post “[The Pale Blue Dot.....](#),” it is worthwhile to contemplate, “Where are all those kings and emperors who gained fame through the suffering of so many people?” They will likely be in an *apāya* suffering for millions of years.

Next, “[Myths about the Sotāpanna Stage](#)”,

7.4.2.3 Myths about the Sotāpanna Stage

Revised September 7, 2016; #6 revised on December 2, 2016; September 28, 2018; July 31, 2023

There are many myths and misconceptions about who a *Sotāpanna* is, and what needs to be done to become a *Sotāpanna*. Here we discuss some of these misconceptions.

1. When I was growing up in Sri Lanka, I was under the impression that a *Sotāpanna* could fly through the air, and an *Arahant* could vanish and reappear as he/she wished. These were the “mythical” status assigned to *Sotāpannas* and *Arahants*. I guess that is due to the fact that such attainments are perceived these days to be impossible to be attained on the one hand and also a clear idea of what those attainments mean has been lost.

- One is unlikely to identify a *Sotāpanna* or even an *Arahant* if one has even been associating with that person.
- Indeed, the attainment of even the *Sotāpanna* stage is not a trivial matter. And one cannot expect it to be trivial; see, “[Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire.](#)”
- A *Sotāpanna* is incapable of doing only six “bad *kamma*”: Killing mother, killing mother, killing an *Arahant*, injuring a Buddha, *Saṅgha Bheda* (teaching *adhamma* as Buddha Dhamma), having *niyata micchā diṭṭhi*; see, “[WebLink: suttacentral: Bahudhātuka sutta \(MN 115\).](#)” Here a *Sotāpanna* is referred to as “*diṭṭhisampanno puggalo*” (“person accomplished in view.”) Also, these six types of worst *kamma* are called “*ānantarika pāpa kamma*,” they lead to rebirth in an *apāya* without exception.

2. Attaining supernormal powers, such as flying through the air or vanishing and reappearing is possible even by developing *anāriya jhānā*. Most of such attainments are lost at death (even though the ability to get them back will be easier if one is reborn human again).

- Attainment of various stages of *Nibbāna* is accomplished by cleansing one's mind and it has nothing to do with developing supernormal powers. Even though it will be much easier for an *Arahant* or a *Sotāpanna* to develop such powers, by the time one attains such levels of purity of the mind they are not enamored anymore with such supernormal powers.
- Most of the *Arahants* who had supernormal powers at the time of the Buddha had developed those before encountering Buddha Dhamma. For example, Ven. Sāriputta and Ven. Moggallāna were *vedic brahmins* who had developed all *anāriya jhānā* and already possessed such powers before they met the Buddha.

3. Various stages of *Nibbāna* are attained by systematically removing the 12 types of *akusala citta* (immoral thoughts) or, put it differently, by removing the ten *samyojana*. There are other ways to describe those conditions too; see, "[Conditions for the Four Stages of Nibbāna](#)."

- The *Sotāpanna* stage is reached by removing the four *lobha citta* that is based on *micchā diṭṭhi* (wrong vision), and the *moha citta* of *vicikicchā*. It is important to note that it is still possible for the remaining seven *akusala citta* (including the two *dosa-mūla citta*) to arise in a *Sotāpanna*.
- **The four *lobha citta* that a *Sotāpanna* removes are the ones that are responsible for *vyāpāda*,** which is the robust version of anger that makes one eligible for rebirth in the *apāyā*; see, "[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#)." The two *dosa-mūla citta*, which give rise to milder versions of anger, are removed only at the *Anāgāmī* stage.
- Furthermore, *kāma rāga* (craving for sensual pleasures) is included in the other four *lobha-mūla citta*, that is, "*diṭṭhi vippayutta*" or "not associated with wrong views." Thus craving for sensual pleasures is also removed only at the *Anāgāmī* stage.
- **Therefore, attaining the *Sotāpanna* stage — while not trivial — is not as complicated as many people think if one has a *tihetuka uppatti*.** However, it is not possible to determine who has *tihetuka* or *dvihetuka paṭisandhi*; most people belong to those two categories. One with *dvihetuka paṭisandhi* cannot attain *magga phala* or *Ariya jhāna* in this life, but still can make progress towards *Nibbāna*; see, "[Paṭisandhi Citta – How the Next Life is Determined According to Gati](#)."
- On the other hand, many people are focused on trying to eliminate the perception of "self." That is not something that can be forced; it just HAPPENS at the *Arahant* stage. It is not possible to make that perception go away before that.

4. Turning to another myth, NO ONE ELSE can discern what *magga phala* one has attained: *Sotāpanna* or a higher stage of *Nibbāna*. Only a Buddha has that capability. Let me give an example to illustrate this point:

- One time, Ven. Sāriputta was giving instructions to a *bhikkhu*. The Buddha came along and told Ven. Sāriputta that the *bhikkhu* had already attained the *Arahantship* and thus there was no need to give instructions to him. It turned out that the *bhikkhu* in question did not say anything to Ven. Sāriputta out of respect for him.
- Now, Ven. Sāriputta is only second to the Buddha in this *Buddha Sāsana*. He and Ven. Moggallāna were the two chief disciples: Ven. Sāriputta was second in knowledge to the Buddha and Ven. Moggallāna was second in psychic powers to the Buddha.
- Thus, if Ven. Sāriputta was not able to discern whether that *bhikkhu* was an *Arahant* it would NOT be possible for anyone living today to determine the stage of *Nibbāna* (*Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, *Arahant*) of any other person.

- One could be of any race or even religion and still be a *jāti Sotāpanna* (and, even that person may not be aware of it). If one had attained the *Sotāpanna* stage in a previous life, he could in principle, be born anywhere in human or *deva* realms. Buddha Dhamma describes nature's laws; it applies to everyone similarly.
- Those people who attained various stages of *Nibbāna* during the early years had different religious beliefs. They sat down to listen to the Buddha, and by the time the discourse was over, they had attained various stages of *Nibbāna*. Some people came to debate the Buddha and left as *Sotāpannas*. One does not need to formally become a "Buddhist" to realize the true nature of "this world."

5. This is why one has to be very careful when dealing with other humans, and not offend anyone intentionally. It is very important to have at least some knowledge of the different weights of *kamma*; see, "[How to Evaluate Different Weights of Kamma](#)."

- Some people worry about inadvertently killing insects while cleaning the house, but do not think twice about saying a lie or a hurtful thing to a human. That is getting things backward.
- The severity of the *kamma* depends on the "level of the being" that it is directed at. It is EXTREMELY difficult to get a human life; thus a human life could be millions of times worth compared to any animal life. A *Sotāpanna* is at a more than thousand-fold higher level than an average human, and the subsequent levels are even higher.
- There is no being in the 31 realms that are at a higher level compared to an Arahant. That is why killing an Arahant is an *ānantarika pāpa kamma*, i.e., it will bring extremely bad *vipāka* in the very next life. And it is not possible to say whether a given person is an Arahant by looking at that person, or even associating with him/her for a short time.

6. How does one discern whether one has attained, say, the *Sotāpanna* stage?

- A *Sotāpanna* does not attain *Ariya jhānā* coincident with the *phala* moment. There one's "lineage" (*gotra*) is changed from a normal human to a *Sotāpanna* at the *gotrabu citta*. A similar *citta vīthi* runs in attaining a *jhāna*, but in a *jhāna* one's lineage is changed only to a *jhānic* state at the *gotrabu* moment; see, "[Citta Vīthi – Processing of Sense Inputs](#)."
- However, if one who just became a *Sotāpanna* had developed any *anāriya jhāna* previously, then that *jhāna* could be easily converted to an *Ariya jhāna* with some practice. Unlike an *anāriya jhāna*, an *Ariya jhāna* cannot be broken even if one forcefully tries to generate a sensual/hateful thought. Thus, for someone who has had *jhānic* experiences this may be a clue.
- Also, if one can get into the fourth *Ariya jhāna*, that means one is likely an *Anāgāmī*.
- Another way is to contemplate whether one is capable of doing any acts that could lead to rebirth in the *apāyā* (the four lowest realms). If one has ingrained characteristics or habits (*gati*) of an animal, then it is likely that person will be born an animal of that character. If one has extreme hate, and is capable of plotting to harm other people, then that person may be destined to the *niraya*. If one does not have any of such extreme greed, hate, and ignorance, then one may be free of the *apāyā*, i.e., one is likely to be a *Sotāpanna*.
- However, unless one is subjected to extreme pressures, it may not be possible to discern whether one has removed such "*apāyagāmī gati*." It is easier to live a moral life when one has enough resources and when nothing unexpected happens. But there are instances when perfectly "moral people" commit murders in a moment of rage.
- The *Sotāpanna* stage is attained purely via attaining *Sammā Diṭṭhi*, and removing 5 of the 12 possible *akusala citta*: 4 *lobha citta* associated with *micchā diṭṭhi* and the *vicikicchā citta* that arises out of ignorance of the true nature of "this world." All these five *citta* are removed via just comprehending *anicca*, *dukkha*, and *anatta* to a certain extent; see, "[Akusala Citta – How a Sotāpanna Avoids Apayagami Cittas](#)."

- Thus if one has any ESTABLISHED (*niyata*) wrong views (see, “[Ten Immoral Actions \(Dasa Akusala\)](#)”), then it is unlikely that one is a *Sotāpanna*. Attaining the *Sotāpanna* stage is not possible until one sees the “unfruitful nature” of existence anywhere in the 31 realms; and that is not possible if one has **ruled out** rebirth or the existence of other realms; see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”
- Also see, “[How Does One Know whether the Sotāpanna Stage is Reached?](#)” for more details.

7. Many people believe it is necessary to meditate a lot to attain the *Sotāpanna* stage. While it is beneficial to meditate, one can in principle be a *Sotāpanna* without doing any FORMAL meditation, as I explain below. I have given some examples from the time of the Buddha in #4 above; however, such cases are rare these days.

- There are basically two steps to get rid of *lobha*, *dosa*, *moha* or to attain *Nibbāna*: “*Dassanena pahātabbā*” (removal by vision or the “ability to see”) comes first; that is what is necessary to attain the *Sotāpanna* stage.
- However, in order to accomplish “*Dassanena pahātabbā*” or “to see clearly”, one needs to realize what the Buddha meant by “suffering”, which comes in two types. This is described in detail — starting with the first type of suffering that can be eliminated in THIS LIFE — in the “[Living Dhamma](#)” section.
- Various stages of *Nibbāna* are attained as *lobha*, *dosa*, and *moha* are removed in stages. One attains the *Sotāpanna* stage via “*dassanena pahātabbā*” i.e., one removes those five *akusala citta* associated with “wrong views” via discerning the true nature of “this world of 31 realms”, i.e., *anicca*, *dukkha*, *anatta*.
- Then, a *Sotāpanna* can remove the remaining seven *akusala citta* in three stages via meditation, i.e., “*bhāvanāya pahātabbā*” and attain the higher stages *Nibbāna*.
- Of course, it is good to meditate before the *Sotāpanna* stage; it will be beneficial to calm the mind and to contemplate on *anicca*, *dukkha*, and *anatta*. But the “*bhāvanā*” or meditation that is needed for the *Sotāpanna* stage cannot be restricted to formal meditation because moral conduct or “*sīla*” sets the necessary environment for the mind to “clearly see” by reducing *pancanivarana*; see, “[Living Dhamma](#).”

Next, “[Why a Sotāpanna is better off than any King, Emperor, or a Billionaire](#)”,

7.4.2.4 Sotāpanna Anugāmi and a Sotāpanna

Revised July 27, 2017; January 15, 2018; September 22, 2018; September 26, 2018; February 3, 2019; February 13, 2019; January 28, 2020; April 13, 2020; August 11, 2021; July 18, 2022 (#5 added)

Here we discuss the difference between a *Sotāpanna* and one striving for the *Sotāpanna* stage. The latter is on the right path (a *Sotāpanna Anugāmi*).

Who Belongs to the Saṅgha

1. The word *saṅgha* nowadays refers to the *bhikkhus*. Yet *Saṅgha* is “*saṇ*” + “*gha*,” or those who have either gotten rid of or are on the way to getting rid of “*saṇ*.” By that definition, one does not have to be a *bhikkhu* to belong to the *saṅgha*; see, “[What is “Saṇ”? Meaning of Sansāra or Saṁsāra.](#)”

In the salutation to the *saṅgha*, they are referred to as “*aṭṭha purisa puggalā*.” See, “[Supreme Qualities of Buddha, Dhamma, Saṅgha.](#)” Here, “*aṭṭha*” is eight, “*purisa*” does not mean male, but one with higher virtues and “*puggalā*” is a person. Thus there are eight types of people belonging to the *saṅgha*. Who are the eight?

- There are four who have started on the Noble Path/fulfilled the conditions for the four stages of *Nibbāna*: *Sotāpanna Anugāmi*, *Sotāpanna*, *Sakadāgāmi Anugāmi*, *Sakadāgāmi*, *Anāgāmi Anugāmi*, *Anāgāmi*, *Arahant Anugāmi*, and *Arahant*. Four of those are in the *Anugāmi* stages (working toward a given stage,) and the other four have reached their respective stage.

- A special *kamma* and *kamma vipāka* happens for Noble *kammā* (efforts toward a given stage.) Once “what needs to be done” is fulfilled, the *vipāka* follows in the next *citta* within a second. Thus when one gets into the *Sotāpanna magga citta*, for example, one receives the *Sotāpanna phala* in the next *citta*. Thus one becomes a *Sotāpanna* in two consecutive thought moments.
- However, when one starts grasping the *Tilakkhaṇa* (*anicca, dukkha, anatta*), one becomes a *Sotāpanna Anugāmi* (one on the way to attaining the *Sotāpanna* stage). Thus one becomes free of the *apāyā*. In later commentaries, they are also called “*Cūḷa Sotāpanna*” or a “junior *Sotāpanna*.”

Abhidhamma Explanation

2. The *citta vīthi* for a *magga phala* is discussed at the end of the post, “[Citta Vīthi – Processing of Sense Inputs](#)”:

B B B “BC BU MD P U A G Pa Fr Fr” B B B

[(B) *Upaccheda* (Arrest *Bhavaṅga*), (MD) *Manodvāra Āvajjana* (Mind Averting), (P) *Parikamma* (Preparation), (U) *Upacāra* (Close Proximity), (A) *Anuloma* (Conformity), (G) *Gotrabu* (Change of Lineage), (Pa) Path (*magga*), and (Fr) Fruit (*phala*).

āvajjana : ‘advertence’ of the mind towards the object, forms the first stage in the process of consciousness (*s.viññāṇa-kicca*). If an object of the 5 physical senses is concerned, it is called ‘five-door advertence’ (*pañca dvārāvajjana*); in the case of a mental object, ‘mind-door advertence’ (*mano-dvārāvajjana*).

parikamma : [nt.] arrangement; preparation; preliminary action; plastering.

upacāra : [m.] neighbourhood; preparative or preliminary action.]

- A *Sotāpanna Anugāmi* is getting closer to the “change of lineage” or G. The earlier stages of P, U, A, may be reached gradually. Once that level of comprehension is complete, one makes that transition (G), completes the *lokuttara kamma*, and immediately receives the *phala*.
- In a strict sense, it may be better to call one a *Sotāpanna Magga Anugāmi* (one trying to get to the *magga citta*) rather than *Sotāpanna Anugāmi*.
- The eight Noble Persons (*Ariyā*) are listed in the “[WebLink: suttacentral: Pathama Puggala Sutta \(AN 8.59\)](#)” and in “[WebLink: suttacentral: Puggala Sutta \(AN 9.9\)](#).” In both *suttā*, *Sotāpanna Anugāmi* is listed as “*sotāpatti phala sacchikiriyāya paṭipanno*.” One on the way to become an *Anāgāmi* is “*anāgāmi phala sacchikiriyāya paṭipanno*,” etc. In the second *sutta*, a average human is a “*puthujano*.”

The Eight Noble Persons

3. Thus it is clear that “*aṭṭha purisa puggalā*” consists of the eight *Ariyā* (Noble Persons) listed in #1. They are *Sotāpanna Anugāmi*, *Sotāpanna*, *Sakadāgāmi Anugāmi*, *Sakadāgāmi*, *Anāgāmi Anugāmi*, *Anāgāmi*, *Arahant Anugāmi*, and *Arahant*.

- A critical point to note is the change from being an “average human” (*puthujana*) to the Noble Person (*Ariya*) status. **That transition happens at the “gotrabu” (“gotra” is the clan or lineage) before the *Sotāpanna magga/phala* transition.** See the “*Citta Vīthi* for Attainment of *Magga Phala*” section at the end of the post, “[Citta Vīthi – Processing of Sense Inputs](#).” Also, see “[Sotāpanna Anugāmi – No More Births in the Apāyā](#).”
- The types of *āsava* eliminated at each stage are discussed at “[The Way to Nibbāna – Removal of Āsavā](#).”
- How *lobha, dosa, moha*, and also the ten fetters (*saṃyojana*) removed at each stage are discussed in “[Relinquishing Defilements via Three Rounds and Four Stages](#).”
- Both a *Sotāpanna Anugāmi* and a *Sotāpanna* would have “[Sotāpatti Aṅga – The Four Qualities of a Sotāpanna](#).”

The Stages of *Magga Phala*

4. A *Sotāpanna Anugāmi*/Sotāpanna is someone who has seen *Nibbāna*, not the full *Nibbāna*, but a glimpse of it. One becomes a *Sotāpanna Anugāmi* when one removes *avijjā* (ignorance) about the actual status of affairs in “this world of 31 realms”; see #5 below. With that understanding, their mind is purified to the extent that it will not allow them to do an immoral act that could lead to a birth in the four lower worlds (*apāyā*). Not only that, but one will also not “latch onto” a *kamma vipāka* resulting from such a robust immoral act in the past. Thus, an *Ariya* above *Sotāpanna Anugāmi* will never be born in an *apāyā* again.

The other three stages have similar “demarcation thresholds.”

- A *Sakadāgāmi* will never again be born in the human or lower four realms. They can still be born in the *deva* worlds (i.e., in *kāma loka*.) But those *devas* do not have “flesh and blood” bodies that lead to physical discomforts and diseases. In the *deva loka*, beings have subtle bodies that are not subject to old age and diseases.
- An *Anāgāmi* has overcome any desire to be born anywhere in the *kāma loka*, i.e., the 11 lowest realms. They have no *kāma rāga* (desire for sense pleasures) or *paṭigha* (hate).
- An *Arahant* has no desire to be born anywhere in the 31 realms and thus will never be reborn “in this world.” They have attained full *Nibbāna*, full release.

5. Subsection 1.1.55. *Āsavakkhayañānaniddesa* (toward the end of the “[WebLink: suttacentral: 1.1. Nānakathā \(Ps 1.1\)](#)” section) of the *Tipiṭaka* Commentary “*Paṭisambhidāmagga*” describes three types of *ñāṇa* attained on the way to the *Arahanthood*: “*Anaññātaññassāmītindriyaṃ kati ṭhānāni gacchati, aññindriyaṃ kati ṭhānāni gacchati, aññātāvindriyaṃ kati ṭhānāni gacchati? Anaññātaññassāmītindriyaṃ ekaṃ ṭhānaṃ gacchati—sotāpattimaggaṃ. Aññindriyaṃ cha ṭhānāni gacchati—sotāpattiphalaṃ, sakadāgāmaggaṃ, sakadāgāmiphalaṃ, anāgāmaggaṃ, anāgāmiphalaṃ, arahattamaggaṃ. Aññātāvindriyaṃ ekaṃ ṭhānaṃ gacchati—arahattaphalaṃ.*”

- It says the following. The first *ñāṇa* is *Anaññātaññassāmītindriya* attained at the *Sotāpanna Anugāmi* stage. The second one, *Aññindriya*, is attained and optimized at the intermediate six stages (*sotāpattiphala* through *arahattamagga*.) The third one, *Aññātāvindriya*, is attained at the *Arahant phala* moment.
- Thus, something definitive occurs when one gets to the *Sotāpanna Anugāmi* stage.

It Is a Step-by-Step Process

6. One must first hear the Buddha's real message before one can fulfill the conditions to attain the *Sotāpanna* stage. Thus, they need to go beyond the mundane eightfold path; see “[Buddha Dhamma – In a Chart](#).”

- In particular, a *Sotāpanna Anugāmi* (or *Sotāpanna Magga Anugāmika* or *Sotāpanna Magga Anugāmi*) has heard about *anicca, dukkha, anatta* (*Tilakkhaṇa*), or the “true nature of this world with 31 realms.” Of course, those concepts must come from a Noble Person who has grasped the basic idea.
- That is why the association with a “*kalyāṇa mitta*” or “*kalyāṇa mitra*” (basically a “Noble friend,” i.e., an *Ariya*) is a pre-condition for attaining the *Sotāpanna* stage; see, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”
- Once attaining the *Sotāpanna anugāmi*, one becomes a Noble Person (one of the *aṭṭha purisa puggala*), and thus is free from the *apāyā*, see “[Sotāpanna Anugāmi – No More Births in the Apāyā](#).”

Difference Between *Sotāpanna Magga Anugāmi* and a *Sotāpanna*

7. Let us take a simile to see this “demarcation” between *Sotāpanna Magga Anugāmi* and a *Sotāpanna*.

- Suppose that a precious treasure is known to be at the peak of a mountain. But it is not generally known where that mountain is. That is pretty much the status of Buddha Dhamma today. Most people know that it is valuable but they do not know what the correct version among the many different versions put forth today.
- As the Buddha said in his first sermon, “my Dhamma has not been known to the world before.” Thus one needs a Buddha or a true disciple of Buddha to show them what *Nibbāna* is and how to get to the *Sotāpanna* stage. That is an essential and critical point.
- Suppose someone gets directions to the correct mountain with the treasure. Then they know which country to go to and which geographic location in that country the mountain is. **This person is like one on the path to becoming a *Sotāpanna*, i.e., a *Sotāpanna Magga Anugāmi*.** They know exactly where to go and have a detailed map. And they have to get it from a Buddha or a true disciple of a Buddha. A true disciple has at least seen the mountain (a *Sotāpanna*), if not been to the top (an *Arahant*).
- Now they make the journey to the country and region where the mountain is. On the way there, they can verify the landmarks given by the “friend” (an *Ariya*). Similarly, a *Sotāpanna Magga Anugāmi* spends time contemplating the newly learned concepts of *anicca*, *dukkha*, *anatta*, *Paṭicca Samuppāda*, etc.
- Thus, with confidence, the person gets closer and closer to the mountain and starts seeing the mountain at some point. **At that point, the person has “crossed the boundary” to become a *Sotāpanna*.** They have seen a glimpse of *Nibbāna* for the first time. Now they can complete the journey without any help, even if the physical map is lost (i.e., even in a future life).

An Analogy

8. Going back to the simile of the mountain with treasure, different versions of “Buddhism” identify the mountain as being in different geographic locations. So people travel long distances and much effort to reach various mountains. All these are in remote places, and the journey is hard.

- Many people are wasting their time and effort targeting the “wrong mountain.” So, how does one know which “mountain” or version to pick? That is why it takes effort to weed out the wrong/incompatible versions of Buddha Dhamma; see, [“Why is it Critical to Find the Pure Buddha Dhamma?”](#)

Grasping the *Anicca* (Unfruitful) Nature of This World

9. In technical terms, one gets to the *Sotāpanna magga/phala* when one understands *anicca*, *dukkha*, and *anatta* (the three characteristics of this world or *Tilakkhaṇa*) to a minimum level, where one begins to realize that there is nothing in “this world” that can provide meaningful and unconditioned happiness.

- When one comprehends *anicca*, *dukkha*, and *anatta* to the extent that one can “see” this concept, **one is said to have the “*anuloma ñāṇa*.”** Here, “*anu*” means “through the understanding of *Tilakkhaṇa*,” “*lo*” means “craving for worldly things,” and “*ma*” means “removal,” and thus “*anuloma*” means “removal of craving for worldly things to some extent via the comprehension of *Tilakkhaṇa*.”
- We came across “*anu*” also in “*anupassanā*”; see, [“4. What do all these Different Meditation Techniques Mean?”](#) In a previous post, I also discussed how “*lobha*” comes from “*lo*” + “*bha*” or “immersed in craving for worldly things.”
- Thus it makes a huge difference if one incorrectly interprets *anicca* as “impermanence” and *anatta* as “no-self”; see, [“Anicca, Dukkha, Anatta – Wrong Interpretations.”](#)

10. Suffering is prevalent in the lower four realms (*apāyā*). We can see at least one of those, the animal realm. Let us discuss one way to contemplate *anicca*, *dukkha*, and *anatta* using an example from this life.

- When young, it seems like one can get anything one wants by working hard. But we all have seen how our parents, grandparents, or even famous people spent their old age suffering from various ailments, and finally dying helplessly.
- They may have “accomplished” many things. But they spend their whole lives working hard to achieve those, and then they have to leave it all behind.
- One may have a beautiful body when young, but for how long? We can see how that old movie star ages now. Some of them commit suicide because it is depressing to remember the “good old days” when one had all the attention in the world, but now it all seems to be slipping away.
- That is *anicca* and *anatta*. No matter how much we try, whatever we gain in this world lasts only a short time (in the *sansāric* time scale), and one becomes helpless in the long run. At some point, one realizes this and becomes distraught.

One Creates One's Own Future Suffering

11. When one comprehends the true nature of this world, such sad thoughts do not arise. People who follow the Path and even those who have wisdom from previous lives (*gati*) can realize that “all things in this world” are subjected to this arising/destruction process. Beings come to existence and die. But those existence are “created” by oneself. See, “[Origin of Life – One Creates One's Own Future Lives.](#)”

- That understanding itself leads to ease of mind. A stronger version of this “ease of mind” is the “*anuloma khanti*” that one experiences when attaining the “*anuloma ñāṇa*” (pronounced “anuloma gnana”). [*anulomikāya khantiyā samannāgata* (being of gentle and forbearing disposition)]
- The key to attaining the “*anuloma ñāṇa*” is to realize the fleeting nature of anything in this world. The next post discusses this.

Anuloma Ñāṇa and Sammatta Niyāma

12. With the “*anuloma ñāṇa*,” one realizes that permanently getting rid of suffering is impossible anywhere in the 31 realms. It can be achieved only by attaining *Nibbāna*. By this time, one has felt the *nirāmisā sukha*, and thus one needs to cultivate, “*etaṃ santaṃ etaṃ paṇītaṃ...*” the release one has felt, and the value of *Nibbāna*. Then one truly embarks on the Noble Eightfold Path and is said to get to “*sammatta niyāma*” and to *Sotāpanna phala*. [“*etaṃ santaṃ etaṃ paṇītaṃ yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho Nibbāna*’*ti.*” [WebLink: suttacentral: AN 9.36 : Jhānasutta](#), [WebLink: suttacentral: AN 10.6 : Samādhisutta](#), [WebLink: suttacentral: AN 3.32 : Ānandasutta](#), [WebLink: suttacentral: AN 11.8 : Manasikārasutta](#), [WebLink: suttacentral: AN 11.7 : Saññāsutta](#), [WebLink: suttacentral: AN 10.60 : Girimānandasutta](#)] [It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*] [*sammatta*: [abstr. fr. *sammā*] the ‘state of rightness’, are the 8 links of the 8-fold Path.]

- Therefore, it is critical to realize BOTH the unfruitful nature of this world with “*anuloma ñāṇa*,” AND to realize the value and cooling down due to *Nibbāna*, i.e., “*sammatta niyāma*.”
- Further details in the post, “[Anuloma Khanti and Sammattaniyāma – Pre-requisites for a Sotāpanna.](#)”

13. Thus it is critical to understand that *Nibbāna* is “*nicca, sukha, atta*,” after realizing that this world is “*anicca, dukkha, anatta*.” A *Sotāpanna* has understood both.

- Anything in this world (except *nāmagotta*) is a *saṅkhata*, i.e., it comes into being due to causes, stays in existence for a time, and then inevitably is destroyed. The arising of a *saṅkhata* is called “*udaya*” in Pāli, and the destruction is called “*vaya*.” Thus, “*udayavaya ñāṇa*” is the knowledge about that process.
- *Nibbāna* is the only *asaṅkhata*. Removal of all causes leads to *Nibbāna*.

- Many people have even attained the *Arahanthood* without actually having heard about these terms like “*udayavaya*” or “*anuloma*.” Thus it is imperative to realize that just reading about these concepts does not get one anywhere. One needs to “see” the *Tilakkhaṇa* or the unfruitfulness of craving for *saṅkhata* (through *saṅkhāra*) by true meditation or contemplation.
- Thus a *Sotāpanna* has the *udayavaya* (sometimes called *udayabbaya*) *ñāṇa*; see, “[Udayavaya Ñāṇa](#).”

Next, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#)”,

7.4.2.5 Sotāpanna Anugāmi – No More Births in the Apāyā

February 11, 2019; revised February 12, 2019; September 4, 2019; April 12, 2020; major revision August 29, 2022; September 22, 2023 (#4)

A human who attains a *magga phala* will never be reborn in an *apāyā* (one of the four lowest realms). An *Arahant* will not be reborn in any realm. An *Anāgāmī* will be reborn only in a *Brahma* realm. A *Sakadāgāmī* is born only in a *deva* realm, and a *Sotāpanna* only in a *deva* or human realm. A *Sotāpanna Anugāmi* is also free of the *apāyā*. Here, we discuss the evidence from the *Tipiṭaka* that is indeed the case.

Eight Types of Noble Persons

1. The “[WebLink: suttacentral: Patipanna Sutta \(SN 48.18\)](#)” describes the eight types of Noble Persons:

“*Pañcimāni, bhikkhave, indriyāni. Katamāni pañca? Saddhindriyaṃ ... pe ... paññindriyaṃ—imāni kho, bhikkhave, pañcindriyāni. Imesaṃ kho, bhikkhave, pañcannaṃ indriyānaṃ samattā paripūrattā araham hoti, tato mudutarehi arahattaphalasacchikiriyāya paṭipanno hoti, tato mudutarehi anāgāmī hoti, tato mudutarehi anāgāmiphalasacchikiriyāya paṭipanno hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sakadāgāmiphalasacchikiriyāya paṭipanno hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi sotāpattiphalasacchikiriyāya paṭipanno hoti. Yassa kho, bhikkhave, imāni pañcindriyāni sabbena sabbam sabbathā sabbam natthi, tamaham ‘bāhiro puthujjanapakkhe t̥hito’ ti vadāmi*”*ti.*

Translated:

“*Bhikkhus*, there are five *indriya* (faculties): *Saddhindriya*, *vīriyindriya*, *satindriya*, *samādhindriya*, *paññindriya*. One who has fully cultivated them is an *Arahant*. Someone who developed them less is an *Arahant Anugāmi*. One who has even less is an *Anāgāmī*.. *Anāgāmī Anugāmi*, ..*Sakadāgāmī*, ...*Sakadāgāmī Anugāmi*, ...*Sotāpanna*, ...***Sotāpanna Anugāmi***. Those who have not yet begun to cultivate the five faculties are ignorant humans (*puthujjanabhūmiṃ*) who are unaware of the true nature (*Tilakkhaṇa*).

- One on the way to becoming an *Anāgāmī* is “*anāgāmī phala sacchikiriyāya paṭipanno*,” etc. One on the way to become a *Sotāpanna* (or ***Sotāpanna Anugāmi***) is “***sotāpattiphalasacchikiriyāya paṭipanno***.”
- The eight Noble Persons (*Ariyā*) are also listed in other *suttā* too including “[WebLink: suttacentral: Pathama Puggala Sutta \(AN 8.59\)](#)” and in “[WebLink: suttacentral: Puggala Sutta \(AN 9.9\)](#).”

Sotāpanna Anugāmi Is Dhammānusārī or Saddhānusārī

2. An important way of classification of the Noble Persons (*Ariyā*) relevant to our topic is given in the “[WebLink: suttacentral: Tatiyasankhita Sutta \(SN 48.14\)](#)”:

“*Pañcimāni, bhikkhave, indriyāni. Katamāni pañca? Saddhindriyaṃ ... pe ... paññindriyaṃ—imāni kho, bhikkhave, pañcindriyāni. Imesaṃ kho, bhikkhave, pañcannaṃ indriyānaṃ samattā paripūrattā araham hoti, tato mudutarehi anāgāmī hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi **dhammānusārī** hoti, tato mudutarehi **saddhānusārī** hoti. Iti kho,*

bhikkhave, paripūraṃ paripūrakārī ārādheti, padesaṃ padesakārī ārādheti. ‘Avañjhāni tvevāhaṃ, bhikkhave, pañcindriyānī’ti vadāmī’ti.

Translated:

“*Bhikkhus, there are five indriya: Saddhindriya, vīriyindriya, satindriya, samādhindriya, paññindriya. One who has fully cultivated them is an Arahant. One who developed them less is an Anāgāmi, Sakadāgāmi, ...Sotāpanna, ...dhammānusārī, ...saddhānusārī, .*”

3. From #1 and #2 above, we can see that a *Sotāpanna Anugāmi* is either a *dhammānusārī* or a *saddhānusārī*.

- This is confirmed in the following *sutta*, which also confirms that one MUST start comprehending the *anicca* nature to become a *Sotāpanna Anugāmi*.

More on *Dhammānusārī* and *Saddhānusārī*

4. From the “[WebLink: suttacentral: Cakkhu Sutta \(SN 25.1\)](#)”:

“*Cakkhuṃ, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvi; sotaṃ aniccaṃ vipariṇāmi aññathābhāvi; ghāṇaṃ aniccaṃ vipariṇāmi aññathābhāvi; jivhā aniccaṃ vipariṇāmi aññathābhāvi; kāyo aniccaṃ vipariṇāmi aññathābhāvi; mano aniccaṃ vipariṇāmi aññathābhāvi. Yo, bhikkhave, ime dhamme evaṃ saddahati adhimuccati—ayaṃ vuccati saddhānusārī, okkanto sammattaniyāmaṃ, sappurisabhūmiṃ okkanto, vītivatto puthujjanabhūmiṃ; abhabbo taṃ kammaṃ kātuṃ, yaṃ kammaṃ katvā nirayaṃ vā tiracchānayaṇiṃ vā pettivisayaṃ vā upapajjeyya; abhabbo catāva kālaṃ kātuṃ yāva na sotāpattiphalaṃ sacchikaroti.*

Yassa kho, bhikkhave, ime dhammā evaṃ paññāya mattaso nijjhānaṃ khamanti, ayaṃ vuccati: ‘dhammānusārī, okkanto sammattaniyāmaṃ, sappurisabhūmiṃ okkanto, vītivatto puthujjanabhūmiṃ; abhabbo taṃ kammaṃ kātuṃ, yaṃ kammaṃ katvā nirayaṃ vā tiracchānayaṇiṃ vā pettivisayaṃ vā upapajjeyya; abhabbo ca tāva kālaṃ kātuṃ yāva na sotāpattiphalaṃ sacchikaroti’.

Yo, bhikkhave, ime dhamme evaṃ pajānāti evaṃ passati, ayaṃ vuccati: ‘sotāpanno avinipātadhammo niyato sambodhiparāyano’”ti.

Translated:

“*Bhikkhus, (the arising of) cakkhu is of anicca nature. (Same for sota, ghāṇa, jivhā, kāya, and mana). For details, see “[Aniccaṃ Vipariṇāmi Aññathābhāvi – A Critical Verse](#).”*

– One who believes these phenomena are this way is called a faith-follower (*saddhānusārī*). He/She has entered the Noble plane (*sammattaniyāmaṃ*), has entered the realm of Noble Persons (*sappurisabhūmiṃ*), and transcended the realm of the humans who are unaware of the true nature (*puthujjanabhūmiṃ*). He is incapable of doing any deed by which he might be reborn in hell, in the animal womb, or in the realm of hungry ghosts. *A saddhānusārī is incapable of dying (separating) from that Noble birth until he realizes the Sotāpanna stage (and thus eventually gets to the Arahant stage).*

After pondering with wisdom, one who has accepted that these phenomena are this way is called a Dhamma-follower (*dhammānusārī*)...” (The rest is the same as for a *saddhānusārī*).

One who knows and sees that these phenomena are this way is called a *Sotāpanna*. He will never again be born in the *apāyā*, headed for the *Arahanthood*.”

- Note that 11 *suttā* (AN 25.1 through AN 25. 10) state the same in various ways.

Sotāpanna Anugāmi Would Not “Die” From *Ariya* Birth

5. Therefore, from the above *suttā*, we can make the following deductions:

- A *Sotāpanna* is never again to be born in the *apāyā* and is headed for *Arahanthood*.
- A *Sotāpanna Anugāmi* is either a *dhammānusārī* or a *saddhānusārī*.
- In #4 above: “**A *saddhānusārī* (or a *dhammānusārī*) is incapable of “dying” (separating) from that Noble birth until he realizes the *Sotāpanna* stage.**” That does not mean a *Sotāpanna Anugāmi* will attain the *Sotāpanna* stage within that lifetime. Once “born as a Noble Person” one will not die from that **Noble birth**, i.e., one WILL get to the *Arahant* stage without ever getting a rebirth in the *apāyā*.
- So, a *Sotāpanna Anugāmi* may be born many times a human until getting to the *Sotāpanna* stage (may even have many human *bhava*, each with many human *jāti*).
- Once getting to the *Sotāpanna* stage, there would be only seven maximum number of “*bhava*” left, within which one WILL attain the *Arahant* stage.

Who Has *Avecca Pasāda*?

6. Another *sutta* that provides more information is “[WebLink: suttacentral: Pathamasaranānisakka Sutta \(SN 55.24\).](#)” It is a long *sutta* and a reasonably good translation is at, “[WebLink: accesstoinsight.org: Sarakāni Sutta: Sarakāni \(Who Took to Drink\).](#)”

Here are the relevant verses, which again describe the types of Noble Persons:

- (1). “Mahānāma, take the case of a person **endowed with unwavering devotion (*avecca pasāda*)** to the Buddha (*heva kho buddhe aveccappasādena samannāgato hoti*), the Dhamma, the Saṅgha, and has attained the *Arahanthood*. By the destruction of defilements he has gained release through wisdom, in this very life. The man is entirely released from the hell-state, from rebirth as an animal. He is free from the *apāyā*.
- (2). “Take the case of another man. He has **unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, and the Saṅgha. He has wisdom but has not yet gained full release, but has destroyed the five lower *saṃyojanā* (**an *Anāgāmi***). Upon death, he will be reborn spontaneously in a *Brahma* realm where he will attain *Nibbāna* without returning from that world. That man is also entirely released from the *apāyā*.
- (3). “Take the case of another man. He has **unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, and the Saṅgha. He has wisdom, but has not yet gained release. By destroying the first three *saṃyojanā* and weakening *kāma rāga*, *paṭigha*, and *avijjā*, he is a Once-returner (***Sakadāgāmi***), who will return once more to this *kāma loka*. That man is entirely freed from the *apāyā*.
- (4). “Take the case of another man. He is **endowed with unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, and the Saṅgha. He has the wisdom but has not gained release. By destroying three fetters, he is a Stream-Winner (***Sotāpanna***), not subject to rebirth in *apāyā*, assured of *Nibbāna*. That man is entirely freed from the *apāyā*.

Sotāpanna Anugāmi Does Not Have *Avecca Pasāda*

- (5). “Take the case of another man. He **does not have unwavering devotion (*avecca pasāda*)** to the Buddha (*na heva kho buddhe aveccappasādena samannāgato hoti*), the Dhamma, the Saṅgha. He has not yet gained wisdom and has not gained release. **But he has the following things to some extent:** the faculty of faith, energy, mindfulness, concentration, wisdom (*saddhā indriya*, *virīya indriya*, *sati indriya*, *samādhi indriya*, *paññā indriya*). He understands with insight, **at least moderately**, the Dhamma of the *Tathāgata*. **That man does not go to *apāyā*.**

- (6). “Take the case of another man. He does not have **unwavering devotion** (*avecca pasāda*) to the Buddha, the Dhamma, or the Saṅgha. He is not joyous and swift in wisdom and has not gained release. **But he has the following things to some extent**: the faculty of faith, energy, mindfulness, concentration, and wisdom (*saddhā indriya*, *virīya indriya*, *sati indriya*, *samādhi indriya*, *paññā indriya*). He understands with insight, **at least slightly**, the dhamma of the *Tathāgata*.. **He too will not go to the *apāyā*.**

Sotāpanna Anugāmī is Also Free of Apāyā

7. Note that in #6 above, for **each of the four *magga phala***:

“*Ayampi kho, mahānāma, puggalo parimutto nirayā parimutto tiracchānāyoniya parimutto pettivisayā parimutto apāyaduggativinipātā.*”

“..That man is **entirely free**... from the *apāyā*.”

- **For the last two types (*Sotāpanna Anugāmī*):**

“*Ayampi kho, mahānāma, puggalo agantā nirayaṃ agantā tiracchānāyonim agantā pettivisayaṃ agantā apāyaṃ duggatiṃ vinipātā.*”

“..That man **does not go** to the *apāyā*.”

- Taken together with the statements in the *suttā* discussed above, that means the following. **A *Sotāpanna Anugāmī* is also effectively released permanently from the *apāyā*.**

What is *Avecca Pasāda*?

8. A key phrase in many of the *suttā* is *avecca pasāda*. It is frequently translated as “unwavering devotion,” as in the above translation. But it has a deeper meaning.

- *Pasāda* means a combination of “trust, faith, reverence.”
- That comes when one understands the deeper meanings in Buddha Dhamma. In particular, when one starts comprehending *Tilakkhaṇa*, one can begin to see the unfruitfulness AND danger in trying to seek happiness in this world of 31 realms.
- **Then one starts losing cravings (“*ava*” + “*icca*”) for worldly things.** We remember that *anicca* is “*na icca*”; see, “[Anicca – True Meaning](#).” [*avecca* :[adv.] certainly; definitely; absolutely; perfectly; having known.]
- Therefore, *avecca pasāda* or “unwavering faith” is connected to realizing the *anicca* nature or the “unsatisfactory nature” of worldly things. That craving for worldly things leads to suffering (*dukkha*). And that in the end, leads to one becoming helpless (*anatta*), especially when born in the *apāyā*.
- One establishes *avecca pasāda* or “unwavering faith” in the Buddha, Dhamma, and Saṅgha, when one starts to comprehend *Tilakkhaṇa*.

Four qualities of a *Sotāpanna*

9. Four qualities of a *Sotāpanna* are in all *suttā* in the [WebLink: suttacentral: Sotāpatti Saṃyutta \(SN 55.1 ~ 55.74\)](#) of the *Saṃyutta Nikāya* (SN). The “[WebLink: suttacentral: Brahmācariyogadha Sutta \(SN 55.2\)](#)” has a concise statement about the qualities or qualifications of a *Sotāpanna*.

“*Catūhi, bhikkhave, dhammehi samannāgato ariyasāvako sotāpanno* *hoti avinipātadhammo niyato sambodhiparāyaṇo.*”

Katamehi catūhi? Idha, bhikkhave, ariyasāvako buddhe aveccappasādena samannāgato hoti: ‘itipi so bhagavā araham sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro purisadammasārathi satthā devamanussānaṃ buddho bhagavā’ti. Dhamme ... pe ... saṅghe ... pe ...

ariyakantehi sīlehi samannāgato hoti akhaṇḍehi ... pe ... samādhisaṁvattanikehi. Imehi kho, bhikkhave, catūhi dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo”ti.

Translated:

A Sotāpanna, never again to be born in the *apāyā*, **has acquired four qualities**:

- (1). He has **avecca pasāda in the Buddha**, i.e., he understands the following verse. “*Itipi so bhagavā araham sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro purisadammasārathi satthā devamanussānam buddho bhagavā’ti.*”
- (2). He has **avecca pasāda in the Dhamma**, i.e., he understands the following verse. “*Svākkhātō bhagavatā dhammo sandiṭṭhiko akāliko ehipassiko opaneyyiko paccattam veditabbo viññūhī’ti.*”
- (3). He has **avecca pasāda in the Saṅgha**, i.e., he understands the following verse. “*Suppaṭipanno bhagavato sāvakaśaṅgho, ujuppaṭipanno bhagavato sāvakaśaṅgho, ñāyappaṭipanno bhagavato sāvakaśaṅgho, sāmīcippaṭipanno bhagavato sāvakaśaṅgho, yadidaṁ—cattāri purisayugāni aṭṭha purisapuggalā, esa bhagavato sāvakaśaṅgho āhuneyyo pāhuneyyo dakkhiṇeyyo añjalikaraṇīyo anuttaram puñṇakkhettaṁ lokassā’ti.*”
- (4). He has the **Ariyakantha sīla** of the noble ones. It comes with penetrating wisdom and is unbreakable. It leads to *samādhi*.’

“Ariyakantehi sīlehi samannāgato hoti akhaṇḍehi acchiddehi asabalehi akammāsehi bhujissehi viññūppasatthehi aparāmatṭhehi samādhisaṁvattanikehi.”

“Ariyakantehi [with agreeable to the Ariyā] sīlehi [with ethical conduct] samannāgato [endowed with] [endowed with noble’s ethical conduct] hoti akhaṇḍehi [unbroken] acchiddehi [impeccable or faultless] asabalehi [spotless] akammāsehi [unmarred] bhujissehi [liberating] viññūppasatthehi [praised by sensible people] aparāmatṭhehi [not mistaken] samādhisaṁvattanikehi.”

Recital Is Not Enough

10. We note that those first three verses are the same as those in the supreme qualities of the Buddha, Dhamma, and Saṅgha; see, “[Supreme Qualities of Buddha, Dhamma, Saṅgha](#).”

- Therefore, those verses are not just for recitation. They **must be recited with UNDERSTANDING** before any serious meditation session.
- From #4 and #5 above, we see that one gets a “Noble birth” when attaining the *Sotāpanna Anugāmi* stage. A *Sotāpanna Anugāmi* is one of the “*aṭṭha purisa puggalā*.”

The four qualities of a *Sotāpanna* are discussed in “[Sotāpatti Aṅga – The Four Qualities of a Sotāpanna](#).” [*aṅga* : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

7.4.2.6 Four Conditions for Attaining Sotāpanna Magga/Phala

Revised March 22, 2016; Revised on September 22, 2017, June 28, 2019; November 4, 2021; November 25, 2021 (#3); September 17, 2022; rewritten December 16, 2022; revised February 25, 2024 (#9)

The four conditions for attaining the *Sotāpanna* stage per *Dutiya Sāriputta Sutta* are discussed. One must understand the “previously unknown real nature of this world” revealed by the Buddha.

Buddha Dhamma Is a New Worldview

1. Buddhism is commonly treated as “another religion,” but it is strikingly different from traditional religions based on a Creator. See [“Is Buddha Dhamma \(Buddhism\) a Religion?”](#)

- It is imperative to understand what the Buddha meant by “my Dhamma has not been known to the world.” Most people follow the mundane version of “Buddhism,” which mainly involve living a moral life and following rituals. Instead, they need first to understand the “real nature” of this world involving rebirths in suffering-filled existences.
- Becoming a *Sotāpanna* REQUIRES understanding that “previously unheard worldview” of the Buddha.
- There are eight types of Noble Persons, with the highest at the *Arahant* stage. One starts at the *Sotāpanna Anugāmi* stage; see [“Sotāpanna Anugāmi – No More Births in the Apāyās.”](#)

Pre-Conditions to Prepare for the *Sotāpanna* Stage

2. As discussed in the following posts, one must first complete the mundane (*lokiya*) eightfold Path to become a *Sotāpanna Anugāmi*. **The Noble Eightfold Path starts at the *Sotāpanna Anugāmi* stage.**

- I strongly advise reading the following posts and thinking about this issue: [“Buddha Dhamma – In a Chart”](#) and the discussion at [“What is Unique in Buddha Dhamma?”](#).
- As I pointed out in many posts, one on the mundane Path abstains from immoral deeds out of fear of bad outcomes.
- **But when one starts comprehending the Four Noble Truths at the *Sotāpanna Anugāmi* stage, one avoids such deeds because one sees the futility of such actions. What is the point in hurting others to acquire sensory pleasures that, in the end, do not provide any lasting happiness?** Not only that, but such actions will lead to much suffering in future lives.

Four Requirements to Attain the *Sotāpanna* Stage

3. In many *suttā*, including [WebLink: *suttacentral: Sotāpattiphala Sutta* \(SN 55.55\)](#) and [WebLink: *suttacentral: Duttiya Sariputta Sutta* \(SN 55.5\)](#), the four requirements for someone to attain the *Sotāpanna* stage of *Nibbāna* are stated: “*Cattārome, bhikkhave, dhammā bhāvitā bahulikatā sotāpattiphalasacchikiriyāya samvattanti. Katame cattāro? Sappurisasamsevo, saddhammassavanaṃ, yonisomanasikāro, dhammānudhammappaṭipatti.*”

- Association with “*sappurisa* (*sath + purisa* or “Noble friend,” i.e., an *Ariya*),” sometimes called a [“Weblink: *en.wikipedia.org: kalyāna mittā*”](#) (“*Kalyāṇa Mitra*” in Sanskrit.)
- Listening to Dhamma discourses by an *Ariya* (while reading is enough to get to the *Sotāpanna Anugāmi* stage, listening is necessary to attain the *Sotāpanna phala* moment, see #5 below).
- Understand *yoniso manasikāra* (how various rebirths occur according to *Paṭicca Samuppāda*).
- *Dhammanudhamma Patipadā* (make a determination to follow the Noble Path); see, [“What is Unique in Buddha Dhamma?”](#).

4. When someone starts fulfilling the above conditions one becomes a *Sotāpanna magga anugāmi* (or *Sotāpanna magga anugāmika*); see, [“Sotāpanna Anugāmi and a Sotāpanna.”](#)

- During this process, one removes three of the ten *saṃyojana* (or *sanyojana* or “mental bonds”). Those ten MENTAL bonds bind one to the cycle of rebirth; see, [“Relinquishing Defilements via Three Rounds and Four Stages.”](#)

Sotāpanna Phala Moment

5. One can become a *Sotāpanna Anugāmi* by listening or reading.

- A *Sotāpanna Anugāmi* becomes a *Sotāpanna* when the “new vision” firmly establishes in mind. That happens in a split-second while listening to a discourse by a Noble Person at or above the *Sotāpanna* stage.
- The *javana* power in a *sotadvāra citta vīthi* is necessary to fulfill the requirement of *saddhammassavanam* (*saddhamma* + *savanam* or “listening to Dhamma”) as one condition, as in #3 above.
- The following discourse by Waharaka Thero (in Sinhala) explains the mechanism. It is a deep analysis; I will write a post when enough background material is covered.
- Here is the *desanā* in the Sinhala language:

WebLink: PureDhamma mp3: සද්දනමේ සනවත්ත-03-සත්වත්-ඵලය-ලබද්දී-මනසඤ්ඤා-චිත්තචිතිය-පිලිබදව-පහදාලි-කිරීම-1

- There is still an open question of whether a recorded *desanā* would fulfill the condition. In a separate *desanā* Waharaka Thero has mentioned that listening to a recorded *desanā* should count, in his opinion.
- However, even if a *Sotāpanna Anugāmi* does not get to the *Sotāpanna* stage in this life, he/she WILL attain the *Sotāpanna phala* in a future life. A *Sotāpanna Anugāmi* is a Noble Person and is free of the *apāyā*; see, “[Sotāpanna Anugāmi – No More Births in the Apāyā.](#)”

Four Noble Truths, *Paṭicca Samuppāda*, *Tilakkhaṇa*

6. One first needs to find out WHY the Buddha said: “this wider world of 31 realms” has much suffering. Sensory pleasures keep us bound to the *kāma loka* and often to the four *apāyā*. That is the First Noble Truth.

- The Buddha also said that **if one comprehends the First Noble Truth, one will automatically understand the other three.** That essential vision or the first inkling of “*Sammā Dīṭṭhi*” is critical.
- Understanding *Paṭicca Samuppāda* is essential to understand the Four Noble Truths. *Paṭicca Samuppāda* explains how rebirths in various existences occur, including in the *apāyās* (the four lowest realms, including the animal realm.)
- That will lead to an understanding of the actual frightful nature of this world, i.e., *Tilakkhaṇa* (*anicca*, *dukkha*, and *anatta*.)
- Details at “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths.](#)”

Only a Noble Person Can Explain Those Concepts

7. Now, it is easier to grasp why the Buddha emphasized the importance of those four conditions. **First, since Buddha’s message is unique, it has to come from a Buddha or “someone whose knowledge traces back to the Buddha.”** The following is an analogy to explain that.

- The Buddha can be compared to a great tree, standing tall and firm. All other humans are like “climbers” that need a tree to “climb up.” Such climbers do not have strong enough stems, so they cannot stand erect on their own. They need the support of another plant or a stick to stand. Those plants are called climbers. Climbers have tendrils to hold the supporting plant or a post. Following are some examples.

- Let us think of a forest with numerous climbers but only one tree and no other supports such as sticks. The only way for a climber to “climb up” would be to get hold of that tree.
- Only climbers close to the tree can get hold of it and climb. But now others can get hold of them and climb too. Thus, as more and more climbers start climbing, the “access area” grows.
- Therefore, if we can find a climber climbing up, we can ALWAYS trace it back to the original tree. **In the same way, an Ariya or a Noble person (a Sotāpanna, Sakadāgāmī, Anāgāmī, or Arahant) can ALWAYS be traced back in lineage to the Buddha.**
- Because the message is unique, it has to come from the Buddha himself or someone whose lineage is traceable to the Buddha. Without being exposed to the correct message, one cannot attain even the Sotāpanna stage. Someone aspiring to become an Ariya MUST learn that Dhamma from another Ariya; see “[Buddha Dhamma – In a Chart.](#)”

8. **Now, we can see the logic of the first two conditions.** One has to learn Dhamma (the correct version), AND thus it has to come from an Ariya (Noble) person.

- The phrase “*kalyāṇa mitrā*” is Sanskrit; in Pāli, it is “*kalyāṇa mittā*” (pronounced “miththā”), for “a friend who helps to remove defilements” (“*kāla*” is for “dirty” or “blackish” as in “dirty water” and “*na*” is for “removing”).
- Many people consider “*kalyāṇa mitrā*” to be a “good friend” in the conventional sense. But it is more than just “good.” *One needs to know the message of the Buddha to convey it to others.*
- And, of course, one has listened to this correct message or read about it and then GRASP it.

Value of a Noble Friend

9. One time, Ven. Ānanda, who was the personal assistant to the Buddha for many years, in the end, approached the Buddha and said, “*Bhante* (Venerable Sir), I have been thinking that the future of the Buddha *Sāsana* (doctrine) must be dependent at least 50% on the *kalyāṇa mittā*.” [*kalyāṇamittā*]

- **The Buddha replied, “Ānanda, do not say that. The Buddha *Sāsana* will depend 100% on the *kalyāṇa mittā*.”** Now we can see why. See “[WebLink: suttacentral: Upaddha Sutta \(SN 45.2\).](#)” [[WebLink: suttacentral: Saṃyutta Nikāya 3.18 Good Friends - Kalyāṇamittasutta](#)]
- If that lineage breaks, that is the Buddha *Sāsana*’s end. The words may still be there in books, but there will be no one to explain the true meanings of the keywords, including *anicca*, *dukkha*, and *anatta*.
- In the *Vinaya Piṭaka*, the Buddha said Buddha Dhamma will FLOURISH only for 500 years (that does not mean it will disappear): “[20. Nuns \(Bhikkhuni\)](#)” There is also the “[Gotamī Sutta \(AN 8.51\)](#)” that says the same.

- After that, there will be periods where the teachings will go “underground,” meaning the absence of *Ariyas*, who can explain the teachings. A *jāti Sotāpanna* with the *paṭisambhidā ñāṇa* must be born from time to time to recover the actual teachings.
- The Buddha emphasized that his teachings (among humans) will not disappear as long as there are at least *Sotāpannas* among humans who can keep passing down the teachings to the next generation.
- That is in the “[Mahāparinibbāna Sutta \(DN 16\)](#)”: “*Yasmim kho, subhadda, dhammavinaye ariyo aṭṭhaṅgiko maggo na upalabbhati, samaṇopi tattha na upalabbhati. Dutiyopi tattha samaṇo na upalabbhati. Tatiyopi tattha samaṇo na upalabbhati. Catutthopi tattha samaṇo na upalabbhati. Yasmim kho, subhadda, dhammavinaye ariyo aṭṭhaṅgiko maggo upalabbhati, samaṇopi tattha upalabbhati, dutiyopi tattha samaṇo upalabbhati, tatiyopi tattha samaṇo upalabbhati, catutthopi tattha samaṇo upalabbhati. Imasmim kho, subhadda, dhammavinaye ariyo aṭṭhaṅgiko maggo upalabbhati, idheva, subhadda, samaṇo, idha dutiyo samaṇo, idha tatiyo samaṇo, idha catuttho samaṇo, suññā parappavādā samaṇebhi aññehi. –Ime ca, subhadda, bhikkhū sammā vihareyyuṃ, asuñño loko arahantehi assāti.*”
- **That means:** “Subhadda, in whatever teaching and training the noble eightfold path is not found, there is no true *Sotāpanna*, no *Sakadāgāmi*, no *Anāgāmi*, and no *Arahant* found. In whatever teaching and training the noble eightfold path is found, there is a true *Sotāpanna*, a *Sakadāgāmi*, an *Anāgāmi*, and an *Arahant* found. The noble eightfold path is found in this teaching (Buddha Dhamma) and training (*Vinaya*).
– As long as *bhikkhus* maintain the *Ariya* lineage, this world will have *Arahants*.”

Jāti Sotāpanna With Paṭisambhidā Ñāṇa

10. Thus, the teachings of the Buddha go “underground” for long periods. But once in a while, a “*jāti Sotāpanna*” is born who has fulfilled his *pāramitas* to bring back the message of the Buddha-like Venerable Mahinda about 600 years after the Buddha. They must not only *jāti Sotāpannas* but have the “*paṭisambhidā ñāṇa*” to figure out the true meanings of key Pāli words, such as *anicca*, *dukkha*, *anatta*, and *Paṭicca Samuppāda*.

- I believe this is such a time. Pure Buddha Dhamma was hidden for hundreds of years until revealed by Waharaka Thero: “[Parinibbāna of Waharaka Thero](#).”
- Many “climbers” worldwide have already started “climbing up.” I am encouraged by emails from many reading this website about their joy in comprehending the “pure Dhamma.”

Yoniso Manasikāra With the Comprehension of Paṭicca Samuppāda

11. **The third condition is to “act with *yoniso manasikāra*.”** Here “*yonī*” means “origin,” “*so*” means “oneself,” and “*manasikāra*” here means “comprehension.”

- One understands how one can be reborn in a given realm (existence) based on one’s actions (*abhisankhāra*.) One acts with the opposite of *yoniso manasikāra* (i.e., *ayoniso manasikāra*) when one generates *abhisankhāra* with “*avijjā paccayā sankhāra*.” **That initiates the *Akusala-Mūla Paṭicca Samuppāda* process.**
- “*Yonī*” in Pāli and Sinhala means the birth canal; thus, *yoniso manasikāra* means the “understanding of origins.” One grasps *yoniso manasikāra* (i.e., the causes that lead to births in various realms) by comprehending *Paṭicca Samuppāda*.

12. *Paṭicca Samuppāda* explains the arising of “*bhava*” and “*jāti*” according to one’s *gati*; see “[Gati to Bhava to Jāti – Ours to Control](#).”

- With that understanding, one will be motivated to cultivate “*gati*” to make good decisions, either automatically or by contemplating them. In other words, one can make better moral judgments and act with *paññā* (wisdom).

- No one wants to be born a dog. But if one acts like a dog, one will likely be born a dog. Dogs won't hesitate to engage in inappropriate behavior: they defecate anywhere, engage in sex with any female dog, possibly even their kids, etc. With the comprehension of *Paṭicca Samuppāda*, we can figure out what kind of actions/speech/thoughts (*abhisāṅkhāra*) lead to what types of rebirths.

Connection to Tilakkhaṇa

13. The *Vibhaṅgapakarana* (Book 2, p. 234) explains *ayoniso manasikāra* as “perceiving *anicca* as *nicca*, *dukkha* as *sukha*, and *anatta* as *atta*.” Thus acting with *yoniso manasikāra* requires comprehending *anicca*, *dukkha*, and *anatta*. That is another way to express the deductions from *Paṭicca Samuppāda*.

- To state that briefly, one generates *abhisāṅkhāra* with “*avijjā paccayā saṅkhāra*” because one believes that things in this world can provide happiness in the long run. But that is acting with *ayoniso manasikāra* because those only lead to “*bhava*” and “*jāti*,” ending with a “whole mass suffering.” To act with *yoniso manasikāra* is to see the unfruitfulness of these struggles to attain something that is not attainable. See #7 of “[Yoniso Manasikāra and Paticca Samuppāda](#).”
- Even more importantly, one will automatically avoid those deeds (done with *abhisāṅkhāra*) that can lead to rebirth in the *apāyā*.
- Thus “*yoniso manasikāra*” has a deeper meaning than just “appropriate attention.” In particular, a *Sotāpanna* comprehends “*paṭi + icca*” leads to “*sama+uppāda*”; see, “[Paticca Samuppāda – “Paṭi+ichcha”+“Sama+uppāda](#).”

Fourth Condition – *Dhammānudhamma Paṭipadā*

14. When meeting the first three conditions, one is set to fulfill the fourth, “*Dhammānudhamma Paṭipadā*.” Here “*Dhammānudhamma*” is “*Dhamma + anuhamma*,” where “*Dhamma*” is Buddha Dhamma, which is *Paṭicca Samuppāda*. The Buddha stated, “*Yo Paṭiccasamuppādam passati, so Dhammam passati*.” (i.e., “**Whoever understands *Paṭicca Samuppāda* understands my Dhamma.**”)

- Here we need to understand that “*Dhamma*” can mean to bear “things in this world” or “Buddha Dhamma,” which is to bear “things that will enable one to transcend/escape this world.” See “[Dhamma – Different Meanings Depending on the Context](#).”

15. *Anudhamma* means “other Dhamma compatible with *Paṭicca Samuppāda*,” and “*Paṭipadā*” is “to follow.” Thus it means following other aspects of Buddha Dhamma (such as *Tilakkhaṇa*, moral conduct, etc.)

- There are four *suttas*, starting with the “[Anudhamma Sutta \(SN 22.39\)](#)” that describe various “*anudhamma*” like *anicca*, *dukkha*, and *anatta*.
- Those *suttas* describe *Dhammānudhamma Paṭipadā* as living with a clear vision of the *anicca*, *dukkha*, and *anatta* nature of the *pañcakkhandha* (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*).

16. When one learns the true Dhamma from an *Ariya* (Noble) person, one begins to comprehend:

- (i). What is meant by suffering (*dukkha*),
- (ii). Suffering arises due to the *anicca* nature, and thus
- (iii). One has no refuge anywhere in the 31 realms (*anatta*).
- Then one realizes that to seek the only refuge (*atta*) of *Nibbāna*, one needs to act with *yoniso manasikāra* and follow the “*Dhammānudhamma Paṭipadā*.” See “[Dhammānudhamma Paṭipatti – Connection to Paticca Samuppāda/Tilakkhaṇa](#).”

Next, “[How Does One Know whether the Sotāpanna Stage is Reached?](#)”,

7.4.2.7 Sotāpatti Aṅga – The Four Qualities of a Sotāpanna

July 8, 2018; revised May 04, 2022; September 17, 2022; re-written September 18, 2022

Sotāpatti aṅga, or the four qualities of a *Sotāpanna*, are discussed in many suttas in the “*Sotāpatti Saṃyutta*” of the *Saṃyutta Nikāya*.

Introduction

1. There are over 70 suttā in the “*Sotāpatti Saṃyutta*” that repeatedly state the four “characteristics/qualities” (*Sotāpatti aṅga*) that one can use to determine whether one has attained the Sotāpanna stage of Nibbāna. The series of suttā start with “[WebLink: suttacentral: Cakkavattirāja Sutta \(SN 55.1\)](#).” [*aṅga* : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

- I was surprised to see that these four qualities of a *Sotāpanna* have not been discussed much in the current literature.
- Knowing them can help determine whether one has attained the *Sotāpanna* stage.

Sotāpatti Aṅga Associated With a *Sotāpanna*

2. The four qualities (or characteristics) of a *Sotāpanna* — who has attained the *Sotāpanna phala* — must not be confused with the **four conditions that must be fulfilled to get to the *Sotāpanna* stage.**

- Those four conditions can be found in “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”
- Those four conditions to attain the *Sotāpanna* stage are also called *Sotāpatti aṅga* sometimes; see, for example, “[WebLink: suttacentral: Dutiyasāriputta Sutta \(SN 55.5\)](#).” On the other hand, the four qualities of a *Sotāpanna* are also listed as *Sotāpatti aṅga* in the “[WebLink: suttacentral: Nandiyasakka Sutta \(SN 55.40\)](#).”
- Therefore, one must pay attention to which context the term *Sotāpatti aṅga* is used: whether to refer to the four conditions or the four qualities.

3. The four qualities of a *Sotāpanna* are stated succinctly in the “[WebLink: suttacentral: Brahmacariyogadha Sutta \(SN 55.2\)](#).” The Buddha asks: “*Catūhi, bhikkhave, dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo. Katamehi catūhi?*”

Translated: “*Bhikkhus, the ariyasāvaka Sotāpanna, free of the apāyā, has four qualities. Which four?*”

Then the Buddha gives the answer: “*Idha, bhikkhave, ariyasāvako **buddhe aveccappasādena samannāgato hoti**: ‘itipi so bhagavā araham sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro purisadammasārathi satthā devamanussānaṃ buddho bhagavā’ti. dhamme aveccappasādena samannāgato hoti... pe ... saṅghe aveccappasādena samannāgato hoti... pe ... ariyakantehi sīlehi samannāgato hoti akhaṇḍehi ... pe ... samādhisaṃvattanikehi. Imehi kho, bhikkhave, catūhi dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo’*”ti. [Four Qualities in **Bold Orange Colour**.]

Translated: “A *Sotāpanna* has reverence/faith (*pasāda*) in the Buddha, Dhamma, Saṅgha, that comes via losing deep-rooted cravings for things in this world (*avecca*). He is thus established in the *ariyakānta sīla* (moral conduct of the Noble Persons) that cannot be broken to make him/her do *apāyagāmi* actions (*kamma*). These are the four defining characteristics of a *Sotāpanna* free of the *apāyā*.” [*avecca* = *ava* (to overcome) + *icca* (liking or craving)]

- First, we note that the “[Supreme Qualities of Buddha, Dhamma, Saṅgha](#)” are listed in this *sutta*. Only the nine qualities of the Buddha are listed above in red. In the full *sutta*, the qualities of the *Dhamma* and *Saṅgha* are also fully listed.

Aveccappasāda and *Ariyakānta Sīla*

4. To fully understand this description of a *Sotāpanna*, we need to understand the meanings of two keywords: *aveccappasāda* and *ariyakānta sīla*.

- I have not seen *aveccappasāda* discussed in English texts; where it is mentioned, it is described as “unwavering confidence.”
- But the reason for that unwavering confidence is itself hidden in that word. **That is called “*pada nirutti*,” (in the Sinhala language, “*pada nirukti*”), i.e., the word’s meaning is in the word itself.** Let us discuss that hidden meaning now.

Ariyakānta Sīla = Unwavering Moral Conduct

5. Average humans — who are not yet *Ariyā* — highly value sensory pleasures. Most are even willing to do immoral actions to get more sensory pleasures. Even those “moral people” are addicted to enjoying sensory pleasures attainable by moral means without hurting others.

- However, that “moral conduct” is not guaranteed to hold. Even the most moral person WILL BE tempted to do an *apāyagāmi* action under sufficiently “enticing” or “tempting” conditions.
- When such a strong sensory input (temptation) comes, one who has not comprehended *Tilakkhaṇa* (in particular the *anicca* nature) WILL commit an *apāyagāmi* action at some point (in a future life, if not in this life).
- The “Unwavering/Unshakeable moral conduct” starts to grow as a *Sotāpanna Anugāmi* and is firmly established in a *Sotāpanna*.

6. It is impossible to have “Unwavering/Unshakeable moral conduct” until one comprehends how future suffering arises, i.e., Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. See “[Paticca Samuppāda, Tilakkhana, Four Noble Truths](#).”

- This is hard for many even to believe. They think their morality cannot be “broken.” However, we hear such “moral people” committing heinous acts that we never thought they were capable of now and then. The “unbreakable morality” can be attained only by seeing the unfruitfulness/dangers in sensory pleasures.
- **This is the uniqueness of Buddha Dhamma:** It is possible to make one’s mind NEVER to commit an *apāyagāmi* action (at the *Sotāpanna* stage) and NEVER commit a single *dasa akusala* at the *Arahant* stage.

7. Thus, a *Sotāpanna*’s moral conduct is unbreakable FOREVER, even through future births. No matter how tempting the external sensory input is, a *Sotāpanna* will NEVER do an *apāyagāmi* action (*kamma*). No willpower is needed to enforce it. That mind has fully grasped the futility/danger in such actions.

- **This unbreakable moral conduct of a *Sotāpanna* is called “*ariyakānta sīla*.”** *Kānta* (“*ka*” + “*anta*”) is the “cooled mindset” achieved via removing the two extremes (“*anta*”) the Buddha rejected: excess sensory pleasures and excess hardship or extreme austerity.
- *Ariyakānta sīla* is established only in *Ariyā*, who have comprehended this unique message of the Buddha about how suffering arises in this wider world of 31 realms and how that future suffering can be stopped and a permanent state without suffering (*Nibbāna*) can be attained.
- Furthermore, the Pāli (and Sinhala) word for a vehicle is “*riya*”, and the stopping of “*riya*” (*saṃsāric* vehicle/journey) is called “*Ariya*.” One who has taken the wheels off the vehicle for the *saṃsāric* journey is called an “*Ariya*.” See #13 of “[Nibbāna – Is it Difficult to Understand?](#)” Buddha (“*bhava uddha*”) has the same meaning: “[A Buddhist or a Bhaudhaya](#)?”

Buddha’s “Wider Worldview with Rebirth Process” Must be Understood

8. Without a Buddha explaining to us, it will be impossible to comprehend the widespread suffering in the wider world of 31 realms by ourselves.

- How many of us have watched (and enjoyed) television programs where a deer is eaten alive by a tiger? How painful is that experience for the deer? How much pain will a fish feel, dangling by a hook that pierced its mouth and unable to breathe?
- Our minds are programmed to think that animals are not living beings who can feel pain. But ALL living beings experience pain, perception (recognition), and many other mental qualities.
- In the *Abhidhamma* language, feelings (*vedanā*) and perception (*saññā*) are UNIVERSAL mental factors (*cetasika*) that arise with ALL thoughts of ANY living being.
- **Suffering is everywhere.** If we pay attention, we can see so much suffering, even among humans. We are unaware of much of the suffering in the wider world of the 31 realms. There is unimaginable suffering in the other three lowest realms and the animal realm.

Step-by-Step Process – Prerequisites

9. However, the reasons (or causes) for such suffering cannot be understood without investigating (and then being convinced of) the laws of *kamma* that REQUIRES the rebirth process.

- This is why one cannot comprehend the deeper aspects of Buddha Dhamma without first getting rid of the ten types of *micchā diṭṭhi* or the wrong views about this world of 31 realms.
- One who has not removed the ten types of *micchā diṭṭhi* will have *avijjā* at the highest level, which is called *moha*. Therefore, even a prestigious scientist can have *moha*; it has nothing to do with “book knowledge.” When one gets rid of those, one gets down to the *avijjā* level; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”

10. Once getting rid of the ten types of *micchā diṭṭhi*, one can start to “see” (not with eyes, but with wisdom) that **the real cause for suffering is *taṇhā* (getting attached) that arises due to *iccā* (our liking for sensory pleasures).** Furthermore, *taṇhā* has origins in “*iccā*” or cravings.

- Again, this is the uniqueness of Buddha Dhamma. Whereas a normal human cannot imagine a “happy existence” without sense pleasures, an *Ariyā* sees the opposite: unfruitfulness and dangers in sense pleasures.
- **The key to comprehending the *dukkha sacca* (First Noble Truth) and *Tilakkhaṇa* is to see the suffering that is hidden sense pleasures. The worst kind of suffering arises when one does immoral things to access sense pleasures; that is what a *Sotāpanna* first realizes.**
- **Note:** In both “*icca*” and “*avecca*” (or anywhere), the letter “c” is pronounced with the “ch” sound: “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”

Nirāmisā Sukha and *Aveccappasāda*

11. When one starts to realize the truth at the *Sotāpanna Anugāmi* stage, one starts experiencing a different kind of “happiness,” which is the *nirāmisā sukha*.

- **The real cause of this *nirāmisā sukha* is the abstinence from sensory pleasures.** Again, this is hard to explain and needs to be experienced.
- With that comes the realization of the value of a Buddha, unbreakable faith in him and a reverence for him. This is called *aveccappasāda* in the Buddha.

Aveccappasāda = *Ava Icca Pasāda*

12. Now, we can see the true meaning of *aveccappasāda*: “ava” means to overcome, and *iccā* is liking or craving. These two words, when combined, rhyme as “avecca.” Now, “*pasāda*” is reverence/faith. When the two words “*avecca*” and “*pasāda*” are combined, it rhymes as “*aveccappasāda*.”

- It must be a truly exceptional person to discover such an unimaginable cause for the suffering in this world, and to find the way out of that suffering (by removing *taṇhā* or “*iccā*” for worldly pleasures).
- **This unbreakable faith/reverence for the Buddha comes from comprehending the dangers of “*iccā*” for worldly pleasures: “*Buddhe aveccappasāda*.”**

13. Of course, one will simultaneously have “*Dhamme aveccappasāda*,” unshakeable faith in the Dhamma, the teachings of the Buddha, that allowed one to be free of the *apāyā*.

- Furthermore, one will not be able to learn this unique Dhamma of the Buddha without the *Saṅgha*, those *Ariyā* who have transmitted the true and pure Dhamma up to now. One could spend a lifetime learning “fake Dhamma” and will not be able to grasp the message of the Buddha. We are fortunate to learn the correct Buddha Dhamma, only because of the *Saṅgha*, who have faithfully and correctly transmitted the *Tiṭṭhaka* over all these years.
- That realization leads to “*Saṅghe aveccappasāda*,” reverence/faith in the *Saṅgha*.

Saṅgha and Bhikkhu

14. It is important to note that *bhikkhus* are not necessarily included in the *Saṅgha*. Only those eight Noble Persons (*attha purisa puggala*) are included in *Saṅgha*; see “[Supreme Qualities of Buddha, Dhamma, Saṅgha](#).”

- However, *bhikkhus* should always be treated with respect. They represent the *Buddha Sāsana*.
- As I understand, even a lay *Anāgāmi* should bow to any *bhikkhu*.

“Seeing *Anicca* Nature” Is to Understand *Paṭicca Samuppāda*

15. The Buddha described two sets of *Paṭicca Samuppāda* (PS) for a reason. One set (different versions of *Akusala-mūla* PS) describes the origin of the world or the origin of suffering. The other one describes *Kusala-mūla* PS for the stopping of suffering.

- Comprehending the “*Udayavaya Ñāṇa*” means understanding those two processes. “*Udaya*” is the “arising (of world/suffering)” or the *anuloma* (forward) PS. “[WebLink: suttacentral: Pathamabodhi Sutta \(Ud 1.1\)](#)” “*Vaya*” is the “stopping of that process” or the *paṭiloma* (reverse) PS process. “[WebLink: suttacentral: Dutiyabodhi Sutta \(Ud 1.2\)](#)”
- ANYTHING in this world can be stopped from arising. That means NOTHING in this world has any essence. They can only bring more suffering. Thus, one only becomes helpless (in the long run) if one pursues “worldly pleasures” with *abhisankhāra*.
- **The above two lists summarizes the *anicca, dukkha, and anatta* nature!** That “seeing” or *Sammā Diṭṭhi* comes just by comprehending the “wider worldview” of the Buddha. Details at “[Worldview of the Buddha](#).”

Ariyakānta Sīla and Aveccappasāda Realized via Sammā Diṭṭhi

16. A *Sotāpanna* has the “unique vision” or *Sammā Diṭṭhi* in the Noble Eightfold Path. A *Sotāpanna* has seen the ultimate truth about this world. That is the “previously unheard” Dhamma of the Buddha.

- Thus, when a *Sotāpanna* comprehends this “hidden truth” about the real nature of this world, he/she will **begin to see the danger of getting attached to sensory pleasures.**

- That “drastic change in vision” will automatically generate faith and reverence in the Buddha, *Dhamma*, and the *Saṅgha*, thereby generating *aveccappasāda* for them.
- This is why the Buddha, *Dhamma*, and the *Saṅgha* are called the Triple Gems and are worthy of homage; see “[Supreme Qualities of Buddha, Dhamma, Saṅgha.](#)”
- However, a *Sotāpanna* cannot avoid normal sensory pleasures. Most live married lives. Only at the *Anāgāmi* stage will one give up the desire for sensory pleasures. See, “[Vipallāsa \(Dīṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”

7.4.2.8 **Sammā Dīṭṭhi – Realization, Not Memorization**

May 13, 2018; revised June 20, 2020; September 4, 2022; January 19, 2023

***Sammā Dīṭṭhi* Is the Realization of the Origin of Suffering**

1. *Sammā Dīṭṭhi* (or comprehension of the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*) is the necessary first step to start on the Noble Eightfold Path. If one has gained *Sammā Dīṭṭhi* (i.e., if one is a *Sotāpanna*/*Sotāpanna Anugāmi*), one would have understood the Four Noble Truths and can “see” (not with eyes, but with *paññā*) the path to *Nibbāna*. See “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths.](#)”

- One has “seen” that there would be much suffering in future lives (especially in the *apāyā*), if one gets too attached to worldly things by assuming that they can provide lasting happiness (this is the comprehension of the *anicca* nature).
- The reason for such future suffering is immoral actions, speech, and conscious thinking (*kāya* and *vacī saṅkhāra* done with ignorance or *avijjā*). This is why the first step in *Paṭicca Samuppāda* is “*avijjā paccayā saṅkhāra.*”
- One can stop future suffering from arising by controlling one’s *kāya* and *vacī saṅkhāra* or staying away from *dasa akusala*.
- And the way or path to accomplish that is the Noble Eightfold Path.

Those are the Four Noble Truths. **However, the path to *Nibbāna* remains elusive until one comprehends the root causes of future suffering.**

Root Causes are *Rāga*, *Dosa*, *Moha* (*Avijjā*)

2. We can analyze it differently by first discussing *Nibbāna* and *Sotāpanna*.

- The “[WebLink: suttacentral: Nibbānapaṇhā Sutta \(SN 38.1\)](#)” clearly describes *Nibbāna* as, “*..ragakkhayo, dosakkhayo, mohakkhayo — idam vuccati nibbānanti.*” [[SN 38.1 Nibbānapaṇhāsutta](#)] That means *Nibbāna* is attained via removing greed, hate/anger, and ignorance from one’s mind.
- But *rāga*, *dosa*, and *moha* are not always present in mind. They remain hidden as *anusaya*.
- The step-by-step procedure to attain *Nibbāna* involves four steps, which remove seven types of *anusaya* or **mental fermentations** that contaminate a mind. That will lead to the stopping of the four types of *āsava*; see, “[The Way to Nibbāna – Removal of Āsavā.](#)” [*Dīṭṭhāsava*, *kāmāsava*, *bhavāsava*, and *avijjāsava*.]

3. Understand what *anusaya* or **mental fermentations** are, how they accumulate, and how they lead to grasping new *bhava* at the moment of death is essential.

- Let us take an example. When one keeps doing immoral things based on greed (hurting others, stealing, sexually misbehaving, etc. to satisfy that greed), then one’s mind accumulates “*anusaya* of greedy type.” “Mental fermentations” is a good translation for *anusaya*; **the longer one keeps them, the harder it becomes to remove them.**

- Another way to say that is to say one is cultivating “greedy *gati*.”
- This can be compared to adding rotten things to a pool of water. Contamination gets worse with time. Still, the dirt may settle down at the bottom of the pool, and the water may look relatively clean.
- However, when the water is disturbed, say by stirring with a long stick, some contaminants will come to the surface; that is *anusaya*. How much comes to the surface (as *āsava* or cravings/temptations) depends on how hard the water is stirred, i.e., how strong the sense input is. Furthermore, even a slight stirring can bring dirt up to the surface if there is a lot of dirt.

4. **Anusaya or mental fermentations are like mud at the bottom of the pool.** When a mind has built up a lot of *anusaya* accumulating deep inside, it is easier for them to come to the surface (i.e., for cravings to come to the mind) when one receives a corresponding sensory input (seeing an attractive person, for example). This is *āsava* or cravings. So, how one automatically responds in a given situation depends on those three parameters (*gati*, *anusaya*, *āsava*), which are interconnected: “[Āsava, Anusaya, and Gati \(Gathi\)](#).”

- Removal of the seven types of *anusaya* [*diṭṭhi*, *vicikicchā*, *kāma rāga*, *paṭigha*, *bhava rāga*, *māna*, *avijjā*] (the same as removing corresponding *gati*) leads to the stopping of the four types of *āsava*; see “[Conditions for the Four Stages of Nibbāna](#).”

First to Remove – *Diṭṭhi Anusaya*

5. **The most important of the four *āsava* [*kāmāsava*, *bhavāsava*, *diṭṭhāsava*, *avijjāsava*] is the *diṭṭhi anusaya*.** All other *āsava* are influenced by the wrong views one has. With the removal of *diṭṭhi anusaya* at the *Sotāpanna* stage, 99+% of all “mental junk” or “mental fermentations” disappear from the mind.

- **This is why the Buddha said that a *Sotāpanna* had removed defilements comparable to the soil on the whole Earth. The remaining defilements due to all other types of *anusaya* are comparable to the amount of soil picked up by one’s thumb.**
- Therefore, one needs to get a clear idea of what is meant by *Nibbāna* and to see why that necessarily means getting out of the rebirth process. The rebirth process is filled with so much suffering in the *apāyā*. The Buddha said that any given living being spends most of the rebirth process in the *apāyā*.

6. Therefore, the first, and most crucial step towards attaining *Nibbāna* is to remove *diṭṭhi anusaya* that builds up over time due to wrong views, at which time three types of *samyojana* are also removed; see, “[Conditions for the Four Stages of Nibbāna](#)”:

- The removal of *diṭṭhi anusaya* leads to the removal of *diṭṭhāsava* and also “*vicikicchā anusaya*.”
- Simultaneously, the three *samyojana* (*sakkāya diṭṭhi*, *vicikicchā*, *sīlabbata parāmāsa*) disappear.
- We will discuss these in the next post.
- They are all removed by the “right vision.” It is called “*dassanena pahātabbā*” or “removal via right vision.”

Unfruitful/Dangerous Nature of this World

7. The most challenging part of understanding is what is meant by the “right vision.” We have discussed at length on this website that it involves the comprehension of the unfruitful nature of this world or *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*): That one cannot achieve long-lasting happiness by pursuing enticing things in this world, that one will be subjected to suffering in the long run if one does that, and therefore, such an approach will lead to one becoming helpless (especially when one is reborn in the *apāyā*).

- That is the essential “right vision” that must REGISTER in one’s mind. The truth of that needs to be accepted by the mind.
- Just reading about this and memorizing it is not enough.

Seeing the Validity of the Rebirth Process – Essential Part of *Sammā Ditṭhi*

8. Let us take an example to illustrate this point. Some people do not believe in rebirth. That is a “wrong *diṭṭhi*” or “wrong vision” according to the Buddha. But if one’s mind does not see that rebirth must be valid, just reading about it will not change that impression in that mind.

- One should look at the evidence for rebirth with an open mind; see, “[Evidence for Rebirth](#).” One should contemplate that nothing happens without causes, i.e., *kammā* will have *vipāka*. That in turn leads to the conclusion that rebirth must be valid.
- This is why getting rid of the ten types of *micchā diṭṭhi* MUST happen before one can comprehend *Tilakkhaṇa* and become *Sotāpanna*. See “[Buddhism without Rebirth and Nibbāna?](#)”

9. One issue that I do not quite understand is that some people do not believe in rebirth but want to attain the *Sotāpanna* stage and even the *Arahant* stage! Don’t they realize the contradiction?

- One wants to attain the *Sotāpanna* stage to avoid births in the *apāyā*. So, if one does not believe in rebirth, why does one believe that it is possible to be born in the *apāyā*?
- We must also remember that even those who believe in rebirth have been in this rebirth for a time that has no traceable beginning. Therefore, we must have also held such wrong views in the past. It is not easy to get rid of these ten types of *micchā diṭṭhi*.

Sammā Ditṭhi – Correct Worldview

10. We still need more clarification on what happens when one truly comprehends *Tilakkhaṇa*.

- I think one good analogy is if one is wearing — say, blue-tinted glasses — all the time, then no matter how hard one tries, one WILL see the world see white objects as blue and other objects also distorted to appear with different colors.
- Removing a *diṭṭhi* (or wrong vision) is like taking off those tinted glasses. It happens when one’s mind comes to a certain stage of understanding. This is cultivating *paññā* (wisdom).
- The only way to remove those “tinted glasses” is to contemplate Buddha’s teachings and engage in *puñña/kusala kammā*, providing the conditions for the mind to comprehend those teachings.

11. A critical factor that most people disregard is how much of a difference it can make in one’s mindset when one stays away from *dasa akusala* and engages actively in *kusala/puñña kammā*. One’s mind becomes clear and sharp; one can comprehend more profound concepts easily; see, “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#).”

- Then one will be able to get rid of the ten types of *micchā diṭṭhi* and then make the transition to the Noble Path by starting to comprehend *Tilakkhaṇa*; see, “[Sīla, Samādhi, Paññā to Paññā, sīla, Samādhi](#).”
- Comprehending *Tilakkhaṇa* is different than learning mundane subjects like geometry or even mathematics. It can be complex or relatively more straightforward depending on how many “preparations” (*dāna, sīla, bhāvanā*) one has made in this life and also in previous lives; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#)” and “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#).”

Apāyagāmi Gati Removed with *Sammā Ditṭhi*

12. As we discussed above, the critical step in getting to the “right view” is for one’s mind to see the truth in the worldview of the Buddha: **Our world is much more complex than what we experience with our senses.** That there are more realms of existence, that suffering is worst in *apāyā*, and that unless we get rid of “*apāyagāmi gati*” one can end up in the *apāyā*.

- Those “*apāyagāmi gati*” are closely related to *diṭṭhāsava*, which arise and accumulate due to ignorance of the Buddha’s worldview or the fundamental nature of the world (*Tilakkhaṇa*).
- Furthermore, at the dying moment, the mind can grasp such an *apāyagāmi* sense input (*ārammaṇa*).
- As we have discussed before, those things happen AUTOMATICALLY, based on one’s *gati* (*āsava*). That is a crucial point to understand. Unless one is a *Sotāpanna*, those possibilities cannot be ruled out.

13. Another related key issue is the following. It does not matter not how many bad *kammā bīja* have been accumulated. Instead, what is important is whether one’s mind will grasp a *bhava* (*upādāna*) in a given realm. That depends only on the level of *paññā* (wisdom) one has cultivated and THEREFORE what kind of *gati* one has.

- **It DOES NOT matter how many *kammā bīja* suitable to give rebirth in the *apāyā* are there. If one has removed “*apāyagāmi gati*” by cultivating *paññā* to the *Sotāpanna* stage, then one’s mind would not grasp such *bhava*.**
- If one’s mind has removed all *gati* that can lead to rebirth in any realm, then one’s mind would not be able to grasp any *bhava*, and thus one would attain *Parinibbāna* at the dying moment.
- For example, Aṅgulimāla killed 999 people but attained *Arahanthood* within a week or so. Bad *kammā bījā* that he generated were still there, but his mind would not grasp (*upādāna*) them. See “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma](#).”

14. When one gets to *Sammā Diṭṭhi* (i.e., when one becomes at least a *Sotāpanna Anugāmi*), one’s *gati* have changed permanently. Since the next birth is according to one’s *gati*, one will not be born into a family with *micchā diṭṭhi*. This is how it is guaranteed that one will have only seven more *bhava* left.

- One may grasp *Tilakkhaṇa* by focusing on one of them. But that will lead to comprehension of all three, and even more characteristics like the *asubha* (unfruitful) nature. They are all interrelated.
- Even though *diṭṭhi vipallāsa* is removed and *Sammā Diṭṭhi* is complete at the *Sotāpanna* stage, two other types of *vipallāsa* remain until the *Arahant* stage. See “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”

7.4.2.9 How Does One Know whether the Sotāpanna Stage is Reached?

Revised March 23, 2017; May 15, 2018; September 22, 2018; August 12, 2019; February 11, 2020; July 3, 2022; August 5, 2022; October 9, 2022; May 16, 2023 (#7)

One can determine for oneself whether one has attained the *Sotāpanna* stage. It becomes clear that one has removed the characteristics (*gati*) suitable to be born in the four lowest realms (*apāyā*).

Sotāpanna Is the First Goal

1. The most precious thing sought by a *Bhauddhayā* (or a practicing Buddhist) is the *Sotāpanna* stage of *Nibbāna*; see, “[Why a Sotāpanna is better off than any King, Emperor, or a Billionaire](#).”

- It is *Arahanthood* that is the ultimate goal. A *Sotāpanna* will become an *Arahanthood* within seven *bhava*.
- Seven *bhava* is many more than seven births because, within a given *bhava*, there can be many births. See “[Bhava and Jāti – States of Existence and Births Therein](#).”
- Thus it is essential to know how to figure out whether one has attained that stage. Other than that person himself/herself, only a Buddha can say whether a given person has achieved *magga phala*; see, “[Myths about the Sotāpanna Stage](#).”

- As we discussed in that post, even Ven. Sāriputta (who was only second to the Buddha in Dhamma knowledge) could not do that. Some people claim they know whether another person has attained the *Sotāpanna* stage (and make money doing that).
2. A *Sotāpanna* has seen the way to *Nibbāna*. He/she still has more work to do, but can see a glimpse of *Nibbāna* from afar. The way to *Nibbāna* has become apparent.
- In another post, I described a simile. A traveler, looking for a particular mountain to get to the top can finally see an outline of it at a distance. He/she still has to travel to the mountain's base and climb up. Most of the hard work was to find the location of that mountain and get close to it. See, "[Sotāpanna Anugāmi and a Sotāpanna](#)" and "[The Sotāpanna Stage](#)."

***Nibbāna* Is the Stopping of the Rebirth Process**

3. In Buddha Dhamma, the ultimate goal is to stop the rebirth process anywhere in the 31 realms of this world. **That corresponds to realizing that there is only suffering to be had by staying in this rebirth process.** In particular, one has to comprehend the danger of rebirths in the lowest four realms (*apāyā*).
- The ONLY WAY to come to this realization is to comprehend the true nature of this world of 31 realms: *anicca*, *dukkha*, and *anatta*. And those do not mean impermanence, suffering, and "no-self"; see, "[Anicca, Dukkha, Anatta – Wrong Interpretations](#)."
 - Instead, it is to realize the unfruitfulness of striving to reach the mirage of happiness in this world of 31 realms and thus convince oneself that one is truly helpless in this cycle of rebirths.
 - Therefore, one must work diligently to stop future suffering by "giving up cravings for things in this world" and strive to reach the only oasis in this desert of the cycle of rebirths or *Nibbāna*. That is to release the mind from the burdens of the material world.

Comprehension of *Tilakkhaṇa* will change one's outlook on life

4. Once that idea sinks in, one's attitude, behavior, and outlook on life will change forever.
- Let us take an example. Once a child learns the way to add two numbers, there is no way that the child will ever forget that. There will be no second guessing. If an adult, even a teacher, tells that child that "two plus three is six," there is no way that that child will ever agree.
 - Attaining the *Sotāpanna* stage is like that. Deep down, one will KNOW the dangers of the rebirth process. Any happiness, whether due to health, wealth, or fame, is of NO VALUE in the long term. He/she has truly understood the value of the Buddha Dhamma and that **faith (based on understanding)** will prevail through future rebirths.
 - That is not a "magical effect." A living being is a continuous flow of *kammic energy*; see "[What Reincarnates? – Concept of a Lifestream](#)." Thus what happens at the *Sotāpanna phala* moment is to change the "*gati*" of that lifestream irrevocably. **One would have permanently shed any "*gati*" suitable for a hell-being (with *gati* of strong hate), a *peta* (intense greed), an *asura* (freeloading mentality), or an animal (a mixture of all those; "*tirisan*" or all three "*saṃ*").**
 - One way to assess is to see how much of one's such "*gati*" have changed for the better. (Throughout working towards the *Sotāpanna* stage). One should be able to see **significant** changes. For discussions on "*gati*" (or "*gathī*"), please use the "Search" box on the top right.

"Seeing" the True Nature of This World

5. Let us take another example. When we look in a mirror and see our image, we KNOW that it is not another person or oneself but merely an image. We don't need to think twice to realize that.

- But have you seen a dog barking at its reflection in a mirror or the water? A dog thinks it is another dog and barks at it. A dog would not know it is just a reflection.
- In the same way, an average human thinks very highly of his/her material wealth. One is willing to “do whatever it takes” to possess worldly things, titles, recognition, etc.
- But a *Sotāpanna* would instinctively know the unfruitfulness of such struggles. They may still enjoy sensory pleasures (and thus may still like to eat tasty food or engage in sexual activity, for example). However, they will not willingly go to extremes, such as engaging in sexual misconduct, having affairs outside the marriage, or being excessively greedy and exploiting others.
- A *Sotāpanna* has reduced *lobha* to *kāma rāga* and *dosa* (or *dvesha*) to *paṭigha*. In other words, greed or hate that was due to the total covering of mind by the five hindrances would reduce to “attachments” and “dislikes”; see, “[Lobha, Dosa, Moha versus Raga, Paṭigha, Avijjā](#).”
- The most important thing is that he/she will NEVER do an immoral deed strong enough to lead to rebirth in the lowest four realms [*Niraya*, *Tiracchāna-yoni*, *Peta-yoni*, and *Asura-yoni*], i.e., an *apāyagāmi* deed. We all KNOW that our reflection in a mirror is not real and thus will not try to talk to that reflection. Similarly, a *Sotāpanna* INSTINCTIVELY avoids doing anything that is profoundly immoral. He/she does not need to think about the consequences of such acts, etc. The mind will automatically block such actions.

Jhāna Can Be a Distraction

6. One could be a *Sotāpanna* (or even an *Arahant*) without being able to get to any *jhāna* beforehand. Many people in the time of the Buddha attained *Arahanthood* upon listening to a *desanā*. *Upacara* and *anuloma samādhi* are sufficient for one to get to the *Sotāpanna* stage. Also, *jhāna* and *magga phala* are two different things; see, “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”

- That becomes clear when we look at the possible rebirths of a *Sotāpanna*. A *Sotāpanna* could be reborn at or above the human realm.
- But if one has attained the first *anāriya jhāna*, one WILL be born in the *Brahma* realm. Thus a *Sotāpanna* with even an *anāriya jhānā* WILL NOT be reborn as a human.
- By the way, if one is not a *Sotāpanna* but has attained *anāriya jhānā*, he/she will also be born in a *Brahma* realm. But the difference is that he/she is not free from rebirths in even the lowest four realms.
- What I described above is consistent with the extension of 89 *cittā* to 121. The “additional 40 *cittā*” come about when attaining the four stages of *Nibbāna* for people at various (*anāriya*) *jhāna* levels; see, “[The 89 \(121\) Types of Citta](#).” However, these are technical details that may not concern most people. I just wanted to show consistency.

Ariya and Anāriya Jhāna Experiences Are the Same

7. We also need to keep in mind that the *jhānic/samāpatti* experience is the same for *anāriya jhānā/samāpatti* as for *Ariya jhānā/samāpatti*. They are mental states of the *rūpāvacara* and *arūpāvacara* realms; they still belong to this world of 31 planes. However, subtle differences exist due to *anusaya* being present in *anāriya jhāna*. See #8, #10, etc. in “[Tapussa Sutta \(AN 9.41\)– Akuppā Cetovimutti](#).”

- There were *yogis* even before the Buddha who could attain the highest *anāriya jhānā*, proceeded to higher *arūpāvacara samāpatti*, and also cultivated *abhiññā* powers. *Ceto vimutti* (or *ceto vimukthi*) with *anāriya jhānā* is not the same as *magga phala* with *paññā vimutti*. In the former, defilements are suppressed. In the latter, they have been removed. Even though the *arūpāvacara samāpatti* are called “higher *jhānās*” these days, that is incorrect. There are only four (five in *Abhidhamma* analysis) *jhānās*. The higher *arūpāvacara* mental states are *arūpāvacara samāpatti*; see “[The 89 \(121\) Types of Citta](#).”

- Of course, having even *anāriya jhānā* makes it easier to do *vipassanā* (comprehend *anicca*, *dukkha*, and *anatta*) and attain *magga phala*.

Ariya and Anāriya Jhāna Are Very Different in Essence

8. Just SUPPRESSION of *akusala* thoughts and craving for sensual pleasures (*kāma rāga*) can lead to *anariya jhāna*.

- On the other hand, attaining *Ariya jhāna* requires removing craving (*anusaya*) for sensual pleasures (*kāma rāga*). Thus one needs to be an *Anāgāmi* to attain even the first *Ariya jhāna*. See “[Possible Outcomes of Meditation – Samādhi, Jhāna, Magga Phala](#).”
- Here is a *desanā* from the Waharaka Thero describing the difference between *jhāna* and *magga phala* (it is in Sinhala, but I have extracted the essence in this post for others):

[WebLink: Listen to Waharaka Thero - Difference between Magga Phala and Jhāna in Sinhala](#)

Changes One Can See For Oneself

9. Even before reaching the *Sotāpanna* stage, one will notice changes in one’s behavior and attitude towards other humans and all living beings. All of those will gradually change as one starts following the Path.

- But there will be significant changes after attaining the *Sotāpanna* stage. That change may not be noticeable in a day. It could take weeks or a few months to see some critical differences in one’s lifestyle when one looks back.
- The tendency to get together with a lot of people will reduce. One will spend more time learning Dhamma and contemplating concepts that are still not entirely clear. Finding more about the real nature of this world is immensely enjoyable.
- One will also start noticing things that one has not noticed before. One will see clear instances of people’s “self-induced” suffering as they try to enjoy life by “partying harder” but only get exhausted.
- The only concrete way to be convinced of the *Sotāpanna* stage is to make sure that the three *samyojana* of *sakkāya diṭṭhi*, *vicikicchā*, and *sīlabbata parāmāsa* are absent. See, “[Sakkāya Diṭṭhi is Personality \(Me\) View?](#).”

Should One Declare One’s Attainments?

10. Then there is this question. Is it appropriate or even allowed by the Buddha for someone to declare the *magga phala* one has attained?

- What is stated in the *Tiṭṭaka* is the following. If one declares that one has a certain *magga phala* falsely intending to gain respect, money, publicity, etc., that is a bad *kamma*. A conventional *bhikkhu* becomes “*pārājika*,” loses the priesthood automatically, and thus could be born in the *niraya* for doing that.
- Declaration of a *magga phala* is not banned. “A person attaining the *Sotāpanna* stage may declare it if he/she wishes to do so,” in particular for the benefit of others. In the “[WebLink: suttacentral: Mahā Parinibbāna Sutta \(DN 16\)](#),” “*Katamo ca so, ānanda, dhammādāso dhammapariyāyo, yena samannāgato ariyasāvako ākaṅkhamāno attanāva attānaṃ byākareyya: ‘khīṇanirayomhi khīṇatiracchānayoni khīṇapettivisayo khīṇāpāyaduggativinipāto, sotāpannohamasmi avinipātadhammo niyato sambodhiparāyaṇo’ ti.*”
- The same verse (“A noble disciple who has this may declare of themselves: ‘I have finished with rebirth in hell, the animal realm, and the ghost realm. I am a stream-enterer! I’m not liable to be reborn in the lower realms and am bound for the final release-*Nibbāna*’”) appears in a series of four suttas (SN 55. 7 through SN 55.10); see, for example, “[WebLink: suttacentral: Pathamagiṇṇakāvasatha Sutta \(SN 55.8\)](#).”

- Most people who attain *magga phala* do not declare it; it is not a bragging point. It is the same with *jhānā*. Many people start off developing *jhānā* to attain supermundane (*abhiññā*) powers, but once they get there, they have already seen the fruitlessness of even those powers.
- In particular, when one develops *abhiññā* powers to be able to see previous lives, one becomes so disgusted with what one (and others) have gone through in past lives. One does not seek to look back much further.

Tipiṭaka Examples/Accounts

11. Now, let us discuss some episodes from the *Tipiṭaka* to clarify some of the above points.

- Visākhā (one of the chief female lay disciples of the Buddha) had attained the *Sotāpanna* stage at a young age. But she remained at that stage even without developing any *jhānā* or higher *magga phala* until death at age 120. The Buddha stated that she would be reborn as a *Deva* many times (as I remember 11 times).
- Similarly, the wealthy businessman Anāthapiṇḍika, who built the beautiful and expensive monastery *Jetavanaramaya*, attained the *Sotāpanna* stage upon hearing his first *desanā* from the Buddha. He died and was reborn in the Tusita realm (one of the six *deva* worlds). Since those *deva* worlds also belong to the *kāma loka*, it is clear that he never attained an *Ariya jhāna*.
- Mahānāma was a wealthy person who was related to Prince Siddhartha's family. The Buddha told him that he had attained the *Sotāpanna* stage. However, when engaging in his business activities, he often got frustrated and angry with his servants and yelled at them. After such an episode of outburst, he would think, "if I am still able to become angry like this, I must not have attained the *Sotāpanna* stage yet." So, he would see the Buddha, explain what happened, and ask whether the Buddha was sure about the declaration. He still had doubts about his attainment of the *Sotāpanna* stage until the Buddha confirmed it for the third time; see "[WebLink: suttacentral: Pathama Mahānāma Sutta \(SN 55.21\).](#)"
- **The key is that there is a difference between hate (*dosa*) and getting angry (*paṭigha*); *paṭigha* is removed only at the *Anāgāmī* stage.**

More Accounts From Tipiṭaka

12. Then there was the Sarakāṇi *brahmin*, who also belonged to a "high caste." He used to consume alcohol and get drunk regularly. His relatives, who were *vedic brahmins*, disowned him from their lot, saying he was unworthy to be one of them. He also attained the *Sotāpanna* stage, but could not give up the habit of drinking even after achieving that. When he died, Mahānāma (mentioned above) asked the Buddha where Sarakāṇi was reborn. The Buddha said Sarakāṇi had attained the *Sotāpanna* stage and had been reborn as a *deva*. Sarakāṇi's relatives laughed out loud contemptuously upon hearing this and declared, "if Sarakāṇi was a *Sotāpanna*, then we all should be *Arahants*." When Mahānāma reported this back to the Buddha, the Buddha said those ignorant *brahmins* would go by outward appearances. That description is in the "[WebLink: suttacentral: Pathamasaranānisakka Sutta \(SN 55. 24\).](#)"

- Of course, that episode does not imply that one could keep doing immoral activities and still attain the *Sotāpanna* stage. What we need to understand is that drinking alcohol by itself is not one of the *dasa akusala* (ten immoral actions), but heavy consumption could lead to it. Sarakāṇi probably continued with his long-time habit to some extent, but was unlikely to have "got drunk." **A *Sotāpanna* removes only strong greed (*lobha*). *Kāma rāga* or attachment to sense pleasures is removed only at the *Anāgāmī* stage.**
- In the *Mahanama sutta* (delivered to Mahanama mentioned above), the Buddha described the *sīla* (moral conduct) of a *Sotāpanna*: "*panatipata pativirato hoti, adinnādāna pativirato hoti, kamesu miccacara pativirato hoti, musāvāda pativirato hoti, surameraya majjapama dattana pativirato hoti.*" It is essential to realize the deep meanings of the "five precepts"; see "[The Five Precepts – What the Buddha Meant by Them.](#)"

- In the above, “*pativirato hoti*” does not mean “will not” but rather “will not do with liking.” After all, a *Sotāpanna* (unless had attained *Ariya jhānā*) is not yet released from the higher realms of the *kāma loka*, only from the lowest four realms.

Asmi Māna Removed Only at the Arahant Stage

13. Some people try to remove the sense of “me” or the sense of “self” to get to the *Sotāpanna* stage, but that is removed only at the *Arahant* stage.

- As long as one is bound to the 31 realms, a sense of “self” will be there. These “*gati*” are removed in stages, starting with “*gati*” suitable for rebirth in the *apāyā*, as discussed in #4 above. Even an *Anāgāmi* has a sense of “self” left, though most of his/her attachments for sense pleasures would not be there. One cannot pass a college exam without having graduated from high school.
- One has to advance systematically through stages; see “[The Way to Nibbāna – Removal of Āsavā](#)” and “[Conditions for the Four Stages of Nibbāna](#).”
- As long as one is bound to the 31 realms or “this material world,” it is not correct to say there is a “self” or there is “no-self”; they are both wrong and extreme views; see, “[Anicca, Dukkha, Anatta](#).”
- Any meditation with the wrong concepts of *anicca*, *dukkha*, or *anatta* “will not grow.” One should be able to “feel” one’s understanding “grow” if one is doing the correct types of meditation; see, “[13. Kammattana \(Recitations\) for the Sotāpanna Stage](#).”

Only a Buddha Can Know Another Person’s Attainments

14. Finally, only a Buddha could discern whether another person has attained *magga phala*. However, many instances of people declaring their attainments by themselves when that declaration helped a noble purpose.

- All those who participated in the first four Buddhist Councils (*Dhamma Saṅgāyanā*) were *Arahants*, according to the *Tipiṭaka*. Thus all those many thousands of *Arahants* who attended those four *Saṅgāyanā* must have declared the *Arahantship* by themselves.
- Ven. Ānanda attained the *Arahantship* just the night before the first Buddhist Council (*Saṅgāyanā*.) He came to the Council by air (with *abhīññā* powers) and entered the hall through the keyhole. He did that to dispel doubts from the other *Arahant*’s minds about his attainment.
- There are only a few instances of *Arahants* or even the Buddha performing such supernormal acts. It was essential to remove any doubts of others about the *Arahantship* of Ven. Ānanda because of the critical role he played at the First *Saṅgāyanā*.

Also see: “[Sotāpanna Anugāmi and a Sotāpanna](#),” “[Four Conditions for Attaining Sotāpanna Magga/Phala](#),” and “[Sotāpatti Anga – The Four Qualities of a Sotāpanna](#).”

7.4.2.1
0.1 **Assāda, Ādīnava, Nissaraṇa – Introduction**

November 1, 2017; revised May 25, 2022

1. This subsection replaces the old subsection, “Āsvāda (Mind-Made Pleasures), Ādeenava [ādīnava] (Bad Outcomes), Nissaraṇa (Relinquish).” I had used Sinhala terms in that series without realizing it. Also, I have basically re-written some of the posts — including the Introduction — to have a logical flow.

- Furthermore, this subsection was under “*Paṭicca Samuppāda*.” I have now moved it to the “*Sotāpanna* Stage,” where it is more appropriate.
- Here is the pronunciation of the three words: “[WebLink: Assāda, Ādīnava, Nissaraṇa](#).”

2. There are two main categories of “pleasures” that one experiences: (i) Those arising **due to *kamma vipāka***, and (ii) mind-made “pleasures” where we keep generating more *vacī saṅkhāra* (thinking/talking to ourselves in our minds) recalling such an experience of the first kind.

- For example, eating a piece of cake generates a “good feeling” via the taste itself. That belongs to the first category. This is a *kamma vipāka* and there are “no new *kamma* generated”; see, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna](#).”
- But if we get “attached to that taste” and start thinking about how good it is and crave for more, now we are generating *vacī saṅkhāra* (thinking/talking to ourselves about how good it is), then we are generating “new *kamma*.” This second type is called ***assāda*** (*āsvāda* in Sinhala). [*assāda* : [m.] taste; enjoyment; satisfaction.]

3. Therefore, ***assāda*** are basically “mind-made pleasures,” i.e., **only those in the second category**.

- Those of the first type arise AUTOMATICALLY due to sensory inputs. They arise due to our *kamma vipāka/gati* via *mano saṅkhāra*. *Mano saṅkhāra* **are defined** as *vedanā*, *saññā* which arise in each and every *citta*.
- Based on those initial feelings, we are also likely to start generating *vacī saṅkhāra* (talking to ourselves, which is defined as *vitakka/vicāra*, then actual speech) and then even generate *kāya saṅkhāra* (bodily actions). **We HAVE CONTROL over *vacī* and *kāya saṅkhāra*, and that is the key to changing our defiled *gati*.**
- It is important to realize that *vacī saṅkhāra* are associated with speech and also “talking to ourselves”: “[Correct Meaning of Vacī Sankhara](#).”

4. There is nothing we can do to stop the first kind. For example, even an *Arahant* WILL feel the “tastiness” of sugar or a nice meal (or saltiness of salt or unpleasantness of some medications/foods, etc). But he/she WILL NOT become attached to that taste and crave for more.

- **It is this *craving* and the subsequent conscious thinking about it (*vacī saṅkhāra*) that is called *assāda*, and that is what is bad because **that will extend the *saṃsāric* journey filled with suffering** as we will discuss in detail in this subsection.**
- So, it is important to distinguish between the AUTOMATIC generation of *mano saṅkhāra* (due to *vipāka*) and the CONSCIOUS generation of *vacī* and *kāya saṅkhāra*: “[How Are Gati and Kilesa Incorporated into Thoughts?](#)”

5. It is those CONSCIOUS generation of *vacī* and *kāya saṅkhāra* that contribute to future suffering (and also lead to *tāpa* or “heat” in mind right now): “[Suffering in This Life – Role of Mental Impurities](#).”

- We “get addicted” to things like drugs, alcohol, and even over-eating by constantly thinking about them. We tend to recall past experiences and create in our minds such future experiences. This is generating *vacī saṅkhāra* (talking to ourselves). Then we start talking and doing things accordingly.
- This is how we strengthen “old bad habits” and even develop “new bad habits” or *gati*. These habits or *gati* could be *saṃsāric gati* or new ones.
- There are many posts on the site on “*gati*” (or habits/character). A simple explanation is in “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#),” and there is a scientific explanation too: “[How Habits are Formed and Broken – A Scientific View](#).”
- This important concept of *gati* is not discussed in current Theravāda literature, but it can explain many other concepts.

6. The more we enjoy such “mind-made pleasures” or *assāda*, the more established those associated *gati* become. For example, a drug user/alcoholic is constantly thinking about either past experiences or the next, and is “building up” that *gati*. Then it will become increasingly difficult to be drug/alcohol free.

- There is an even worse consequence too: that *gati* becomes what one craves/thinks about and will become operational in *Paṭicca Samuppāda* via “*upādāna paccayā bhava*.” One can start a PS cycle just in mind by thinking about getting drunk via initiating *vacī saṅkhāra* and generating “*bhava* or existence of a drunkard.” Then of course one will follow-up with actual drinking, which is done via *kāya saṅkhāra*. Soon enough one will end up an alcoholic.
- Therefore, *ādinava* means “bad consequences or dangers.” In this case, what we perceive as “mental pleasures” (*assāda*) WILL have bad consequences both in this life **and in future lives**: In the above example, one is likely to be matched with an “alcoholic mother” in the next birth, and be born an alcoholic. [*ādinava* : [m.] disadvantage. 過患 (danger), 患難 (trials and tribulations), 過失 (negligence), 危難 (distress).]

7. This is another way to express the First Noble Truth. What a normal person thinks as “*somanassa*” (“*suva*” + “*manasa*” or “good feelings in the mind”) CAN actually be the cause for FUTURE suffering, **but ONLY IF one gets attached, as discussed above**.

- Note the difference between consuming tasty food and getting attached to it; seeing a nice picture and getting attached to it; hearing nice music and getting attached to it, etc.
- **Getting to that point of being able to experience “taste things” without getting attached to them is not easy**; that is not attained fully until the *Anāgāmi* stage. It requires more learning and contemplation (*Satipaṭṭhāna bhāvanā*).
- However, to first get to the *Sotāpanna* stage, one needs at least to “**see with wisdom**” that *assāda* does lead to *ādinava*; when that understanding sinks in, **that will prevent one from committing *apāyagāmi kamma***, i.e., one’s mind will get rid of the **coarse level of *assāda***. This subsection can help gain that “vision.”

8. When one fully understands the bad consequences (*ādinava*) of these mind-made pleasures (*assāda*), that means one has understood the First Noble Truth as well as the causes for it, how to eliminate those causes, and the way to do it, i.e., all four Noble Truths.

- That leads to the cessation of the *saṃsāric* journey, and that is called *nissaraṇa* (end of “*carana*” or journey (“*nis*” + “*charana*,” which rhymes as “*nissaraṇa*”). [*nissaraṇa* : (nt.) 1. going out; departure; 2. escape.]
- But it is a step-by-step process that starts with the *Sotāpanna Anugāmi* stage and culminates at the *Arahant* stage.

9. It will take several posts to explain the above in detail. However, understanding them will help with *Paṭicca Samuppāda* cycles and also with *Satipaṭṭhāna/Ānāpāna bhāvanā*.

- The first few subsections of the “[Living Dhamma](#)” section has all the fundamentals that are needed to help understand this subsection. The posts mentioned in #3 and #4 are especially important ones.
- *Assāda* is related to *āsava* and *anusaya* too, as well as *gati* (pronounced *gathi*) as we mentioned above. There are many posts on those key concepts on the site, and a couple was listed in #4 above. One could use the “Search” button on the top right to locate relevant posts.
- In the following, we will discuss a couple of more examples of *assāda*, *ādīnava* and *nissaraṇa* in simple terms.

10. We know many things that provide instant gratification but are harmful in the long term. A good example is smoking. A smoker gets an enjoyment with smoking. Furthermore, he/she wants it to be repeated again and again, and that is *assāda*. But it has been proven without a doubt that long-term smoking causes many health problems including cancer.

- Even though smoking has decreased over the years, many people still who smoke. I had a older friend who smoked heavily; I asked him why he would keep doing it since he knew about the bad consequences. He said the habit had been ingrained, and it was hard to break it. Many years ago, he died because of his bad habit. The last several years of his life were spent in hospitals, with parts of his lungs removed piece-by-piece, and eventually, he was on oxygen most of the time.
- Of course he finally gave up smoking when he was about to be hospitalized. It was too late by the time he clearly saw the “*ādīnava*” (when he actually experienced the bad consequences). The damage had been done.

11. However, his children clearly saw what he went through and understood that smoking might provide temporary enjoyment (*assāda*), but is bound to bring about bad consequences (*ādīnava*). Thus they stayed away from smoking (*nissaraṇa*).

- This is the key point that we will prove to be valid for ANY sense of pleasure in the end. But do not worry; **we do not have to (and cannot effectively) give up anything without understanding**. In fact, such forced “giving up” will only lead to more stress. Our minds will automatically avoid more and more “bad things” as we keep learning Dhamma.
- There are a few more “relatively easy to see” examples of “*assāda*, *ādīnava*, *nissaraṇa*,” even before we get to the deeper analysis in the next post.
- Craving for tasty foods is another very clear example. Most of us cannot “see” the bad consequences of overindulging in eating, and as a consequence we have a obesity problem in most countries. This has resulted in many health problems for those people and has led to increased healthcare costs for all. Still, many people are beginning to see the truth of “*assāda*, *ādīnava*, *nissaraṇa*” of overeating.
- Heavy drinking, use of drugs, and association with bad friends are relatively “easy to see” examples.

12. However, we can systematically understand the “root causes” for ALL such problems by using the guidelines provided by the Buddha. Once we understand the actual root causes, at least some of us can think through and avoid not only such “mundane problems”, but start seeing even more long-term benefits: It is the same line of reasoning that eventually leads to the four stages of *Nibbāna*.

- Thus even though Buddha Dhamma is focused on “eliminating the long-term suffering”, it can also help reduce some of the “short-term suffering” too.
- As a clear example of this, one can always examine the health of Buddhist monks. On average, they are much healthier than the “householders” in any of the Buddhist countries. They do not smoke and do not overeat.
- And one can clearly see their “joy in heart” and the calmness of their minds even though they have very few possessions and do not seek gratification in many sense pleasures that others value so highly.

13. This last point is worth thinking about some more. If one thinks deeply enough, one can see that even some common “sense pleasures” are not that different from the pleasure one gets by inhaling a drug. They give a highly enjoyable “burst of pleasure”, but inevitably lead to bad outcomes, even short term. One can get a hangover with a bad headache due to excess drinking, and in the case of overeating, one can feel the “discomfort” right away.

- We seek such sense pleasures because we don’t realize the value of just having a calm, peaceful state of mind. One does not understand the value of a “neutral mind” (which is called *upekkhā*), unless one can experience it. It is like getting rid of a headache that one has had for a long time. We do not realize the “incessant stress” that is with us, until we reduce it.
- Our minds are constantly under stress seeking sense pleasures. That is what we all had been doing in countless previous births too. That is why it is hard to recognize any negative consequences.

14. In the *Sambhodhi Vagga* of the *Aṅguttara Nikāya*, there are several *suttā* on *assāda*, *ādinava*, *nissaraṇa*. The “[WebLink: suttacentral: Pubbeva Sambodha Sutta \(AN 3.103\)](#)” provides a succinct statement on what they are:

“..ko nu kho loke *assādo*, ko *ādinavo*, kiṃ *nissaraṇan*’ti? Tassa mayham, bhikkhave, etadahosi: ‘yam kho lokam paṭicca uppajjati sukham somanassam, ayam loke *assādo*. Yam loko anicca dukkho vipariṇāmadhammo, ayam loke *ādinavo*. Yo loke chandarāgavinayo chandarāgappahānam, idam loke *nissaraṇan*’ti...”

Translated: “..What are *assāda*, *ādinava*, and *nissaraṇa* in this world? If one gets attached (*paṭicca*) to *sukha/somanassa*, that is *assāda*. That gives rise to the *dhammā* (the seeds for future suffering, because these are really “*kamma* seeds”) with *anicca*, *dukkha*, and *vipariṇāma* nature, which is called *ādinava*. Arising of such *dhamma* can be stopped by constraining the tendency to indulge in sense pleasures (*chandarāgavinayo*), and thus getting rid of the craving for sense pleasures (*chandarāgappahānam*)...”

- It is to be noted that *sukha* is “bodily pleasure” and *somanassa* is “mind pleasure.” We will discuss this highly condensed verse in the upcoming posts.
- In that *sutta*, the Buddha says that he was unable to attain the *Buddhahood* until he realized the need to see the dangers in sense attachments, and to work diligently to get rid of such cravings for sense pleasures.
- It is important to note that *dhammā* are really *kamma* seeds that lead to future *vipāka*; see, “[What are rūpa? – Dhamma are rūpa too!](#)” and “[What are Dhamma? – A Deeper Analysis.](#)”

12. Many other *suttā* that discuss these three key concepts. In particular, “[WebLink: suttacentral: Assāda Sutta \(AN 6.112\)](#)” is notable since it ties *assāda diṭṭhi* to *anicca saññā*:

“‘Tayome, bhikkhave, *dhammā*. Katame tayo? *Assādadiṭṭhi*, *attānudiṭṭhi*, *micchādiṭṭhi*. Ime kho, bhikkhave, tayo *dhammā*. Imesaṃ kho, bhikkhave, *tiṇṇaṃ dhammānaṃ pahānāya tayo dhammā bhāvetabbā*. Katame tayo? *Assādadiṭṭhiyā pahānāya aniccasaññā bhāvetabbā*, *attānudiṭṭhiyā pahānāya anattasaññā bhāvetabbā*, *micchādiṭṭhiyā pahānāya sammādiṭṭhi bhāvetabbā*. Imesaṃ kho, bhikkhave, *tiṇṇaṃ dhammānaṃ pahānāya ime tayo dhammā bhāvetabbā*’ti.”

- Or, contemplation of *anicca saññā* leads to the removal of *assāda diṭṭhi*.
- This is because the mind-made pleasures (*assāda*) are based on the wrong perception of *nicca saññā*, i.e., that those sense experiences are real and fruitful.

7.4.2.1 How Perceived Pleasures (Assāda) lead to Dukkha

0.2

March 11, 2016; revised October 31, 2017; February 10, 2020

1. The essence of the Buddha Dhamma is that what we PERCEIVE to be enjoyment (*assāda*) is actually the CAUSE of FUTURE SUFFERING; that is called *ādinava* (or dangers) of *assāda*. **But that understanding comes in stages.** This is a subtle point to understand, and requires some cleansing of the mind to “see.” Grasping the essence of Buddha Dhamma requires a concentrated mind.

- At a minimum, one should read these posts when the mind is calm. That will make a huge difference in comprehending Dhamma. Most people (especially those who come to this site) are not “immoral”, but the state of mind can change. Even an excited mind cannot grasp deep Dhamma. I discussed this in a few of my very first posts two years ago; see, for example, “[The Importance of Purifying the Mind](#).”
- This is why I highly recommend everyone to read the first several posts in the meditation section starting with “[1. Introduction to Buddhist Meditation](#).”
- Most people new to Buddha Dhamma (Buddhism), start at the wrong place: “Do I really need to give up all these sense pleasures?.” The answer is no. One will **voluntarily** give up things **that one will be convinced to be dangerous or at least unfruitful**. *Nirāmisa sukha* comes from this understanding.

2. The key here is to understand that “bhava” and “jāti” are according to one’s gati. That is because “bhava” arises via “*upādāna*” and *upādāna* means what one likes or enjoys; see, “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda”](#).”

- *Bhava* means “potential to bring about existence” and that existence is according what **one craves for (*upādāna*)**, **not what one wishes for**. *Upādāna* means things that one is **AUTOMATICALLY attracted to**. At least the initial reaction is automatic, and that is what counts at the *cuti-paṭisandhi* moment; see below.
- If one craves for sensual pleasures in the *kāma loka*, then it is hard to avoid a *bhava* and *jāti* in the *kāma loka*.
- More importantly, if one is seeking sense pleasures and is willing to do things that can be done only with “animal *gati*,” “*pretha gati*,” “*asura gati*,” or “*niraya gati*,” then no matter how much one wishes, one cannot avoid birth in those realms.
- **One cannot fool one’s mind.** One has to see the dangers in the lowest four realms to cultivate the desire and drive to be free of them.

3. The four lowest realms are collectively called the “apāyā.” Those who are destined to go to *apāya* have “*dugati*.” The word “*dugati*” comes from “*du*” + “*gati*” or immoral habits (character).

- On the other hand, those who have moral character have “*sugati*,” which means good (“*su*”) *gati*.
- Sometimes the *apāyā* themselves are also called *dugati*, and the higher realms are called *sugati*.
- **A given person could have both *sugati* as well as *dugati*. One becomes the *Sotāpanna* when the possibility for *dugati* to surface (i.e., *anusaya*) is permanently removed.**

4. It is hard to see the true *anicca* nature of the higher realms, i.e., in *sugati* (for example in the *deva* realm), until one is free of the lowest four realms. Most of us perceive *deva* realms to be full of happiness. Until one’s mind is purified to at least the level of a *Sotāpanna* it is hard to comprehend the futility of a birth in the *deva* realms.

- But the animal and human realms have enough visible suffering for us to be motivated.
- One cannot even imagine to comprehend the *anicca* nature of *rūpa loka* or *arūpa loka* until one is free of *kāma loka*, including the *deva loka*.
- This is why COMPREHENDING Dhamma **at each level** is the essential. It is a step-by-step process.

5. In the *Dhamma Cakka Pavattana Sutta*, the Buddha described three rounds of bondage (*tiprivattaya*); see, “[Dhammacakkappavattana Sutta](#).” Getting through those three walls is done via four stages of *Nibbāna* (*Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, *Arahant*).

- At each stage, one gains wisdom (*ñāṇa*) to “see further”, i.e., the *anicca* nature of higher realms. Thus one has to make progress systematically. This process is analogous to the following example. Let us visualize a person wearing glasses that have been covered with four layers of a dark, but see-through, film. One could see through a single layer of the film, but when all four layers are on, one is virtually blind.
 - A normal human without exposure to pure Dhamma is like a person wearing those glasses covered with all four layers. He/she could just barely see the immediate surroundings, but not much else. Such a person would only be concerned with the immediate surrounding, and will not be able to see any dangers existing not too far away.
6. When exposed to Buddha Dhamma for the first time, it is like bringing in more light. Even with the dark glasses, one can see a bit more clearly, and that is enough for most people to get interested and learn more.
- When one learns about the various aspects of Dhamma, one can see evidence that there is a much bigger hidden world out there, and at some point one could comprehend the dangers of rebirth in the *apāyā*. That stage can be compared to one layer of those dark films coming off. It is the attainment of the *Sotāpanna* stage. **This is a big step since *pañcanīvaraṇa* (those five factors that cover the mind) are permanently removed.**
 - Now, one can see much better, and thus has the ability to start comprehending the dangers of the higher realms in the *kāma loka*, i.e., the human realm and the *deva* realms. First one comprehends the dangers of sense pleasures associated with the human realm and when that happens one attains the *Sakadāgāmi* stage (one will never again be born in the human realm), and the second film comes off.
 - In two more stages (*Anāgāmi* and *Arahant*), the remaining two films come off and one will be able to clearly see the true nature of this world only at the *Arahant* stage.
 - Thus, it is useless to try to grasp everything at once or to try to give up “normal” sense pleasures forcefully. However, it is imperative to give up those extreme (immoral) behaviors (*gati*) to be free from *dugati* (*apāyā*).
7. The main problem is that some people go to extremes in seeking sense pleasures. They are willing to steal, lie, and even commit murder to acquire wealth, status, or titles. All those are perceived to lead to higher sense pleasures.
- But in doing so, one will be cultivating *gati* suitable for rebirth in the *apāyā*, i.e., *dugati*.
 - One may enjoy such sense pleasures for maximum of 100 years or so. But when one is born in the *apāyā* it is very difficult to get out. One could be trapped there for billions of years to come. This is the danger that many do not see.
 - This is the difference a Buddha makes. In the absence of a Buddha in the world, humans are unaware of the existence of these other 29 realms, and in particular, the four lowest realms.
8. **Those *akusala kamma* that makes one to be eligible to be born in the *apāyā* have a special name: *pāpa kamma*.** I guess the closest English translation would be “*akusala kamma* of the worst kinds.”
- As I have discussed in a previous post, there is a huge difference between *lobha* and *rāga*, *dosa* and *paṭigha*, and *moha* and *avijjā*: “**Lobha, Dosa, Moha versus Raga, Patigha, Avijjā.**”
 - *Pāpa kamma* are done with *lobha*, *dosa*, and *moha*, the stronger versions of greed, hate, and ignorance.
 - When one attains the *Sotāpanna* stage one is left with the milder versions of *rāga*, *paṭigha*, and *avijjā*. It basically means a *Sotāpanna* still likes to enjoy sense pleasures, but not at the expense of others.
 - A *Sotāpanna* is inherently incapable of doing anything that normally would qualify one to be born in the *apāyā*. Even under extreme pressure, a *Sotāpanna* would not be compelled to such *pāpa kamma*.
9. I have done analyses to show that such *pāpa kamma* are done because one has *micchā diṭṭhi*. When one has *micchā diṭṭhi*, one has the hidden ability (*anusaya*) to generate “*diṭṭhi sampayutta citta*” and

those are strongest of the 8 *lobha citta*; see, for example, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#).”

- Thus it is very important to understand what *micchā dīṭṭhi* is. One can use the Search box to find many relevant posts, but here is a simple explanation: “[Wrong Views \(Micchā Dīṭṭhi\) – A Simpler Analysis](#).”

10. Another issue to think about is which factor dominates the determination of the next *bhava* and thus *jāthi* (birth): *kamma vipāka* (seeds) from the past OR one's *gati* right now.

- We all have done both highly meritorious deeds and highly immoral deeds in the past. Those cannot be eliminated easily. But the critical point is that unless one “willingly grasp” any one of those *kamma* seeds at the *cuti-paṭisandhi* moment at the end of the current *bhava*, those *kamma* seeds cannot bring about a new *bhava*.
- When one attains the *Sotāpanna* stage, one permanently loses “*gati* suitable for the *apāyā*,” i.e., one loses “*upādāna*” for *bhava* in the lowest four realms. Thus even though we may have potent *kamma* seeds for such *bhava*, they CANNOT be grasped at the *cuti-paṭisandhi* moment.
- At the *Arahant* stage, one loses “*upādāna*” for *bhava* in all 31 realms, even though he/she may have even an uncountable number of *kamma* seeds from the past.
- This is why *Āṅgulimāla*, who killed 999 people, was able to attain the *Arahanthood* within 7 days. He lost craving for rebirth anywhere in the 31 realms. See, “[Account of Āṅgulimāla – Many Insights to Buddha Dhamma](#).”
- We just need to get rid of *gathi* suitable to be reborn in the lowest four realms to become a *Sotāpanna*. That is the critical and first step.

11. To repeat: Avoiding immoral behavior and actively engaging in moral behavior is not only for the prevention of creating bad *kamma* seeds or for creating good *kamma* seeds, but for changing our bad *gati*.

- The more critical end result we are looking for is to change our mindset, our *gati*. That starts with first getting rid of *dugati*. For most people, it is easy to see the dangers of the *apāyā*.
- When we lose *dugati* suitable for rebirth in the *apāyā*, we will not grasp such a *bhava* at the *cuti-paṭisandhi* moment.
- Until we lose both kinds of *gati* at the *Arahant* stage, we NEED TO cultivate *sugati* so that we will grasp only such a “good *bhava*” at the *cuti-paṭisandhi* moment.

12. Once one gets rid of *dugati*, one advances to the next stage automatically. It is hard to see the bad consequences of “*kāma gati*” (sense pleasures that keep one bound to *kāma loka*), until one is free of the “*apāya gati*” or *dugati*.

- In the same way, it is hard to see the *anicca* nature of “*rūpa* and *arūpa loka gati*” (*jhānic* pleasures that keep one bound to *rūpa* and *arūpa loka*), until one is free of the “*kāma gati*.”
- This is why it is totally useless to meditate on things like “there is no self” or “there is no ‘me’.” The feeling of a self (or more correctly the *samyojana* of “*māna*”) is removed only at the *Arahant* stage, which is infinitely far away compared to losing *dugati*.
- The perception of a “self” is going to be there as long as one craves for at least a trace of anything in the 31 realms. This is another point that needs a lot of contemplation. The critical point to understand is that it is unfruitful/dangerous to commit immoral actions to enjoy *assāda* or “mind-made pleasures.”

7.4.2.1 Vedanā (Feelings) Arise in Two Ways

0.3

Revised September 4, 2016; Revised February 9, 2017; October 17, 2017; November 5, 2018; May 5, 2020 (Same at [Vedanā \(Feelings\) Arise in Two Ways @ The Five Aggregates](#))

([Pañcakkhandha](#))); April 28, 2021; December 15, 2023 (#1, #3, #5); rewritten December 20, 2023; revised December 27, 2023 (#10)

Most *vedanā* are “mind-made” (“*samphassa-jā-vedanā*”) and have their origin in “distorted *saññā*.”

Introduction

1. The word *vedanā* means “becoming aware” of a sensory input. It comes from (“*ve*” + “*danā*”) which means “විඳ දැනවීම” in Sinhala. When an *ārammaṇa* (sensory input) comes to the mind (via any of the six senses), we become aware of it.

- Only sensory inputs to the “physical body” can bring *sukha* or *dukkha vedanā* directly. The other five types of sensory inputs only generate “neutral *vedanā*.” However, based on our “distorted *saññā*” (distorted perceptions) about the world, our minds attach to even those “neutral *vedanā*” and generate “mind-made *vedanā*” or “*samphassa-jā-vedanā*.”

Thus, *vedanā* can arise in two ways:

- One type of *vedanā* is a consequence of a previous *kamma* (or defiled action), i.e., a *kamma vipāka*. Our **physical bodies** feel those ***sukha* and *dukkha vipāka vedanā***. However, most *kamma vipāka* arise not due to a specific *kamma* but because we are born with a “dense physical body” that can be subjected to various external influences.
- The second is a direct consequence of attaching to a sensory input via liking, disliking, or even with a neutral mindset due to “distorted *saññā*.” Yes. There is an automatic attachment due to the following: **The version of the “external *rūpa*” coming to the mind is NOT authentic but depends on one’s *gati/anusaya/saṃyojana*.** Such a “distorted *saññā*” automatically arises with ANY sensory input. The explanation is a bit deep and is at [“Fooled by Distorted Saññā \(Sañjānāti\) – Origin of Attachment \(Tanhā\).”](#) That “distorted perception” leads to “**mind-made *vedanā***.” They are also called “***samphassa-jā-vedanā***” (which vary according to one’s current *gati*).

Vedanā Associated With the Physical Body

2. *Vedanā* (feelings) felt by the physical body are **three kinds**: *Sukha vedanā* (pleasant bodily feeling), *dukkha vedanā* (unpleasant or painful bodily feeling), and *adukkhamasukha* (without being painful or pleasant, just neutral.) Here, the combination of *adukkha* and *asukha* rhymes as “*adukkhamasukha*.”

- *Kamma vipāka* leading to *sukha vedanā* and *dukkha vedanā* happen to everyone, including *Arahants*. See [Ref.1](#).
- For example, the *Buddha* himself had physical ailments later in his life as *kamma vipāka*. Moggallāna Thero was beaten to death because of a bad *kamma* that he had done many lives before.
- The third type of *vedanā* felt by the physical body is “neutral” or “*adukkhamasukha*.”
- **The first two types of *vedanā* are felt only by the physical body (*sārīrika vedanā*); see #11 of [Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)**
- **These two are the only types of “real *vedanā*” felt by all living beings with “dense bodies,” including animals and *Arahants*; thus, they are “real.”**

Vedanā Associated With Other Sensory Inputs Are Neutral

3. All *vedanā* initially coming through the other five sense faculties are neutral, i.e., *adukkhamasukha vedanā*.

- Sensory inputs through the other five senses (eyes, ears, tongue, nose, and mind) ALWAYS lead to this type of “neutral” or “*adukkhamasukha*” *vedanā*.

- Then the question arises: “Why do I feel pleasure when tasting sugar or looking at a beautiful model”? Those are “mind-made *vedanā*” based on “distorted *saññā*” (our wrong perceptions about the external world.)
- Let us look at that second type of “mind-made *vedanā*.”

Mind- Made *Vedanā* (“*Samphassa-jā-Vedanā*”)

4. Sensory inputs coming in via the eyes, ears, tongue, nose, and mind are *adukkhamasukha* (without being painful or joyous, just neutral.) However, based on those sights, sounds, tastes, smells, and thoughts, our minds generate “distorted *saññā*” which lead to “mind-made” *vedanā* (*samphassa-jā-vedanā*), also called *somanassa* and *domanassa vedanā*.

- In #2 above, we saw that *sukha* and *dukkha vipāka vedanā* are felt only by the physical body (*sārīra*.) We may also form *somanassa* and *domanassa vedanā* based on *sukha* and *dukkha vipāka vedanā*. For example, one may become depressed upon getting injured; Thus, there is now a “mind-made *vedanā*” in addition to the *vedanā* felt by the body.
- These are *vedanā* that a mind generates due to ignorance about the “real nature of this world,” i.e., not having “*yathābhūta ñāṇa*.” See “[Bhūta and Yathābhūta – What Do They Really Mean.](#)”
- They do not arise in an *Arahant*.

Origin of the “Distorted *Saññā*”

5. The *vedanā* coming through the other senses (eyes, ears, tongue, nose, and mind) may feel “pleasant” or “unpleasant” NOT because of *kamma vipāka*, but due to “distorted *saññā*.”

- For example, all humans taste sugar to be sweet. That “sweetness” arises due to “distorted *saññā*.” Then, based on that “distorted *saññā*,” the mind becomes joyful, and that is *samphassa-jā-vedanā* or “mind-made *vedanā*.” See “[Contamination of a Human Mind – Detailed Analysis.](#)”
- The “sweet taste of sugar” or the “beauty of an actress” is a *saññā*, not a *vedanā*. However, based on that “distorted *saññā*” our minds automatically attach to them and generate “mind-made” *vedanā* called “*samphassa-jā-vedanā*.”
- However, average humans believe that “sugar” inherently has sweetness, i.e., that “sweetness” is a “*kāma guṇa*” associated with sugar. In the same way, they believe that “beauty” is inherent in the physical body of an actress. See “[Kāma Guṇa – Origin of Attachment \(Tanhā\).](#)”
- If “sweetness” was in sugar, all living beings should taste sugar to be sweet. However, pigs or cows don’t eat sugar; pigs like rotten meat, and cows like grass, but humans don’t like to eat either. Therefore, “sweetness of sugar” (or in rotten meat or grass) is NOT in sugar/rotten meat/grass but arises due to “distorted *saññā*.” Those “distorted *saññā*” arose because humans, pigs, and cows have “vastly different *gati*.”

If “Distorted *Saññā*” Is Not Real, Can We Eat Rotten Meat or Grass?

6. This “distorted *saññā*” is not a mere trick. The physical bodies of humans (and animals) are made by nature to be compatible with it.

- That is why the human digestive system is different from that of a pig or a cow. Our digestive system is designed to be compatible only with food that gives us those distorted perceptions of “sweetness” or “deliciousness.” If we eat rotten meat or grass, we will get sick.
- In the same way, pigs have their digestive system designed to digest rotten meat without any problem and *ditto* for cows to be able to eat grass.

- This is a more profound point connected to *gati* cultivated as a human. For example, those born as pigs accumulated the *kammic* energy to “be born a pig” by engaging in lowly and “morally rotten” deeds when they were human. Thus, they are reborn as pigs “to like rotten things.” (All living beings attached to the Earth were born human when the Earth was formed several billions of years ago: “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”) One’s rebirth is according to one’s *gati*; see, for example, “[Gati \(Habits/Character\) Determine Births – Samsappanīya Sutta](#)” and “[Gati to Bhava to Jāti – Ours to Control](#).” This is why I say that Buddha Dhamma is profound and self-consistent.
- First, it is necessary to have a good understanding of “distorted *saññā*” to understand the *samphassa-jā-vedanā* fully. We will discuss that in upcoming posts in “[Sotāpanna Stage via Understanding Perception \(Saññā\)](#).” But we can get an idea by looking at some examples.

Some Examples of *Samphassa-jā-Vedanā*

7. A *samphassa-jā-vedanā* arises due to attachment via greed or hate at that moment (i.e., due to one’s *gati*); see “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

- These are the *vedanā* (feelings) that *Arahants* do not feel. Since they do not have any “bad *gati*,” they do not commit any (*abhi*)*saṅkhāra*. The easiest way to explain this kind of *vedanā* is to give some examples:
 - a. Three people are walking down the street. One has an ultra-right political bias (A), the second has an ultra-left preference (B), and the third is an *Arahant* (C) who does not have special feelings for anyone. They all see a famous politician hated by the political right coming their way. **It is a given that the sight of the politician causes A to have displeasure and B to have a pleasurable feeling.** On the other hand, sight does not cause the *Arahant* to generate any pleasure or displeasure. **Even though all three see and identify the person,** they produce different feelings. *It is essential to realize that the feelings were created in A and B by themselves.*
 - b. Two friends go looking for treasure and find a gem. Both are overjoyed. It seems highly valuable; one kills the other to get all the money. Yet when he tries to sell the “gem,” he discovers it is not valuable. His joy turns to sorrow in an instant. **Nothing had changed in the object. It was the same piece of colored rock. What has changed is the perception of it.**

Another Example of *Samphassa-jā-Vedanā*

8. A loving couple had lived for many years without any problems and were happy to be together. However, the husband slaps his wife during an argument. The physical pain from the slap itself did not last more than a few minutes. But for how long would the wife suffer mentally? Even the husband, who did not feel any physical pain, would suffer for days if he loved his wife. **In both cases, the actual mental pain was associated with the attachment to each other.** The wife could have dropped something on her foot and would have suffered about the same amount of physical pain. But she would not have had any lingering mental pain associated with that.

- The initial sensory contact, by itself, did not generate any *kammic* energy.
- However, based on that sensory contact, we tend to pursue it either *somanassa* or *domanassa vedanā* based on “distorted *saññā*.” That is when we **start generating kamma**. For example, if we see our “worst enemy,” that is just “seeing.” But if we start thinking about how bad a person he is, we will generate “bad *vacī saṅkhāra*” and thus “bad *kamma*.”

Samphassa-jā-Vedanā Arise Due to *Taṇhā*

9. Thus, it is clear that in all the above examples, the “extra” happiness or suffering (other than due to *kamma vipāka*) arose from **within one’s mind**. And *taṇhā* (attachment via greed, hate, or ignorance) was the cause of it. See “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

- When we generate such “mind-made *vedanā*,” we also tend to do *kamma* (via *abhisāṅkhāra*), bringing more suffering in the future.

10. Therefore, *taṇhā* arises due to “mind-made *vedanā*.” They arose **INSIDE** the mind itself and did not come from outside. If external things can cause suffering, we will have to destroy external things to eliminate suffering. However, the Buddha showed that the root causes of suffering are within one's mind and can be eliminated.

- There is no inherent suffering or happiness in ANYTHING external; the sensory contact with an external thing CAUSES pain or happiness depending on our *gati* and *āsavās*.
- An *Arahant*, will still experience “distorted *saññā*” while living everyday life (i.e., unless they are in a *samāpatti*.) But since they have removed all *āsavās/anusaya/saṃyojana/gati* by comprehending the true nature (“*yathābhūta ñāṇa*”), they are free of attaching to “distorted *saññā*.” Even though they cannot get rid of any *dukkha vedanā* (until the death of their physical bodies), they don't become depressed about them. In the same way, they don't become joyful about *sukha vedanā*. They generate true “neutral or *upekkhā vedanā*” in response to ANY sensory input. Thus, “*avijjā paccayā (abhi) saṅkhāra*” or “(*samphassa-jā-*) *vedanā paccayā taṇhā*” or any other term in *Paṭicca Samuppāda* does not apply to them.

References

1. *Sukha vedanā* and *dukkha vedanā* due to *kamma vipāka* are not deterministic. We can avoid some by living mindfully; see “[What is Kamma? – Is Everything Determined by Kamma?](#)” Many *vipāka* can be reduced in strength with time if one starts acting with foresight and mindfulness. For example, eating healthy and exercising regularly can avoid many physical ailments.

- We can avoid some *kamma vipāka* by preventing conditions for them from arising just by using common sense. For example, going out at night in a dangerous neighborhood provides fertile ground for past bad *kamma vipāka* to appear. Many *kamma vipāka* CANNOT take place unless the conditions are right. See, “[Anantara and Samanantara Paccayā](#).”
- We have done innumerable *kamma* (good and bad) in our past lives. If we act with common sense, we can suppress bad *kamma vipāka* and make conditions for good *vipāka* to arise.
- Also, see the discussion on *kamma bīja* in “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).”

More on *vedanā* at: “[Feelings: Sukha, Dukha, Somanassa, and Domanassa](#),” “[Does Bodily Pain Arise Only Due to Kamma Vipāka?](#),” “[How Are Paticca Samuppāda Cycles Initiated?](#),” and “[Avyākata Paticca Samuppāda for Vipāka Viññāna](#).”

7.4.2.1 Feelings: Sukha, Dukha, Somanassa, and Domanassa

0.4

December 11, 2015; Revised November 19, 2018

In this post, we will discuss an important classification of *vedanā* based on whether they arise due to *kamma vipāka* or our defiled thoughts (*saṅkhāra*).

1. This is a sequel to the previous post, “[Vedanā \(Feelings\) Arise in Two Ways](#),” where we discussed how feelings arise due to *kamma vipāka* and also due to *mano saṅkhāra*.

- As discussed in several posts, we can avoid certain *kamma vipāka* from actually taking place by not making suitable conditions for them to appear, but some strong ones are hard to avoid; see, “[What is Kamma? – Is Everything Determined by Kamma?](#).”
- However, feelings (both good and bad) that arise due to *saṅkhāra* are totally avoidable, and *Arahants* are completely free of them. We discussed this in the previous post.
- Now let us discuss in detail **what types of feelings** arise due to those two causes.

2. First, let us discuss the feelings that we feel in **our physical bodies**.

- They include *sukha vedanā* such as bodily comforts one feels sleeping in a luxurious bed, eating tasty food, smelling nice odors, seeing something attractive, etc. They arise via the five physical senses.
- Then there are *dukha vedanā* that are again brought in via the five physical senses: injuries to the body, headaches, eating something untasteful, smelling a bad odor, hearing to an ear-piercing sound, etc.
- **Both those types of *vedanā* are due to *kamma vipāka*, and *Arahants* feel them too.** *Sukha vedanā* arise due to *kusala kamma vipāka* (past good deeds) and *dukha vedanā* arise due to *akusala kamma vipāka* (past bad deeds).
- **These *sukha* and *dukha vedanā* mainly exist in the *kāma loka*, where the dense bodies of the beings are sufficiently dense to impart them.** In fact, it is mainly in the lower five realms (including the human realm, that *dukha vedanā* exists as *kamma vipāka*. However, the worst types of *dukha vedanā* are in the lowest four realms (*apāyā*), and that is why a *Sotāpanna* is said to have overcome the worst of the suffering forever.
- In the *deva lokas*, it is mainly the *sukha vedanā* that results due to good *kamma vipāka*. That is why a *Sakadāgāmī* is never born at or below the human realm, and is said to become “healthy forever.”
- In the *rūpa loka* and *arūpa loka*, beings mainly have *jhānic* pleasures. Thus an *Anāgāmī*, who will never be reborn in the *kāma loka*, is said to become “peaceful forever.”

3. Some *vipāka vedanā* felt by the body are neutral. **Furthermore, all *vipāka vedanā* coming through the other four physical senses are also neutral:** *adhukkhamā asukha* (without being painful or joyful, just neutral) *vedanā*, which are commonly called *upekkha vedanā*.

- It is important to note that these *adhukkhamā asukha* or *upekkha vedanā* are the true reality of experience. *Vedanā* comes from (“ve” + “danā”) which means “*veema danaveema*” (වීම දැනවීම) in Sinhala. Basically, when we sense something via our six senses, we **become aware** that something happened, i.e., seeing a picture, hearing a sound, etc.; that is *vedanā*.
- For example, seeing a person X only leads to an *upekkha vedanā* for ANYONE initially.

4. However, within a fraction of a second of that seeing event, it COULD LEAD TO pleasant (*somanassa*) or unpleasant (*domanassa*) feelings DEPENDING ON WHO IS SEEING X. Person X’s wife or child will generate *somanassa vedanā* upon seeing X. However, an enemy of X will generate *domanassa vedanā* upon seeing X.

- On the other hand, a total stranger (or an *Arahant*) will not generate either *somanassa* or *domanassa vedanā* upon seeing X, and that is the true reality, as mentioned in #3 above.
- **Thus both *somanassa* and *domanassa vedanā* are MIND MADE, and arise due to *mano saṅkhāra*. And those *saṅkhāra* are generated based on one’s own *gathi* and *āsavas*.**
- In another example, if two people who are strong supporters of two opposing political parties see the leader of one political party, one will generate *somanassa vedanā* and the other will generate *domanassa vedanā* upon seeing that politician. **Thus, those feelings could not have resided with the politician, but arose entirely due to the *gathi* of those two people.**
- An *Arahant* will not generate either kind, because there is no attachment (or repulsion) to anything or anyone for an *Arahant*.
- **This is a very important point that one could do insight meditation on.**

5. We also know that both *sukha* and *dukha vedanā* can LEAD TO *somanassa* and *domanassa vedanā* too. For example, When one gets a headache due to a *kamma vipāka*, one could be agonizing over how long that will last, whether that will prevent one from going to a party next day, etc. Those are *domanassa vedanā* due to that initial *dukha vedanā* from the headache.

- On the other side, when one eats a tasty piece of cake (good *vipāka vedanā*), one could be start thinking about buying more of that cake and enjoying it later; that gives rise to *somanassa vedanā*.
- Both the *domanassa vedanā* and the *somanassa vedanā* in the above two examples are totally mind-made, i.e., due to *saṅkhāra*.

6. Therefore, based on the three types of *vedanā* (*sukha vedanā*, *dukha vedanā*, and *upekkha vedanā*) that arise due to *kamma vipāka*, ADDITIONAL two types of *vedanā* (*somanassa* and *domanassa vedanā*) COULD arise depending on the *āsava* and *gathi* of the person experiencing them.

- Those feelings that we feel IN THIS LIFE due to *saṅkhāra* are MOSTLY two kinds: *somanassa vedanā* and *domanassa vedanā*. Those *saṅkhāra* also make *bhava* (via thoughts, speech and actions) and those give rise to *kamma vipāka* mostly in future lives but also in this life itself as we discuss below in #11.
- Thus rebirths are also generated via (*abhi*)*saṅkhāra* and that is how the cycle of rebirths is maintained. That is why it is called *saṁsāra* (“*saṇ*” + “*sāra*,” where “*sāra*” means “good”), i.e., one perceives that it is good to keep doing *saṅkhāra* (“*saṇ*” + “*kāra*”, where “*kāra*” or “*kiriya*” is action).

7. This is why *Dukkha Sacca* (First Noble Truth) does not mean that we can ELIMINATE the *dukha vedanā* arising in our present physical body; those are due to *kamma vipāka* (the causes were already done).

- However, by gradually reducing *saṅkhāra* (with increased understanding of Buddha Dhamma), we can stop making new *saṅkhāra* and thus eliminate FUTURE suffering. This is the key to *dukkha sacca*. These *saṅkhāra* are also called *assāda* (*āsvāda* in Sinhala); see, “[Assāda, Ādinava, Nissarana](#).”

8. Still, we can reduce bad consequences from past *kamma vipāka* using what are called “strategies” (“*upakrama*”) in Buddha Dhamma.

- One is to be mindful and not to let conditions for past *kamma vipāka* to take place. This is discussed in, “[What Is Kamma? – Is Everything Determined by Kamma?](#)” and “[Anantara and Samanantara Paccaya](#).”
- If the *kamma vipāka* has already started imparting its effects (say, someone finds out that one has cancer), then one can work to alleviate that condition by using another related “strategy”: One can get medical help and adopt a lifestyle that is opposes the spreading of the cancer. Even here what we are doing is to overcome this bad condition by making suitable environment for “opposing good *kamma vipāka*” to bear fruit. Thus, if one does not make an effort, the bad *kamma vipāka* will run its course and one may die in short time.

9. Each living being’s body is designed to impart appropriate good and bad *kamma vipāka* suitable for the *kamma* seed that gave rise to that particular life.

- For example, an animal cannot implement “strategies” (“*upakrama*”) to overcome most of its *kamma vipāka*. For example, it is unable to do anything about a wound (other than licking it) or to think about dragging its cot to a sunny spot (our dog likes to be in the sun but we have to move her cot!).
- Some animals have built-in defenses for their survival, but they cannot make them any better. For example, some birds instinctively know how to build a nest, but that “nest design” has not been improved by them over millions of years. And baby turtles “know” the way to the ocean and start trotting in the right direction minutes after their hatching; see, “[How Character \(Gati\) Leads to Bhava and Jāti](#).”
- Animals also are unable to do strong good or bad *kamma*. Even though most animals kill other animals, that is not done with greed or hate, but just for survival. It is just like the instinct for the birds to build nests or the baby turtles to head in the right direction to the sea. In *Abhidhamma* language, they generate mostly, “*upekkha sahagata citta*” and those have much less *javana* power.
- Thus, animals cannot accumulate much good or bad *kamma*. Otherwise, they will never be able to escape that “*bhava*,” since most survive by killing other animals. In the same way, whenever they get a

“good life” (say as a human)— which is very rare — that is due to a good *kamma vipāka* done in a previous “good life.”

- But not all animals are the same. Those “higher up” animals like monkeys can accumulate *kamma* than “lower ones” such as worms, and cats and dogs are somewhere in between.

10. The potency of human *saṅkhāra* comes from the ability of humans to generate both “*somanassa saḥagata citta*” (thoughts with joy) for *kusala kamma* and *akusala kamma*. The *javana* power of those *citta* are very high.

- Thus when one is doing a good deed with joy, that brings much more merits compared to someone who is doing it just because others are doing it, i.e., with an “*upekkhā saḥagata citta*”; see, “[A Simple Way to Enhance Merits \(Kusala\) and Decrease Demerits \(Akusala\)](#).”
- Even more strong *javana* arise when a good deed is done with knowledge that it will lead to good results and why, i.e., one knows right from wrong.
- But the most potent *javana* arise when a good deed is done with understanding of the *anicca* nature, i.e., when one does it with “*somanassa saḥagata ñāṇa sampayutta citta*.” Thus, *paññā* (or *ñāṇa*) comes from an understanding that is deeper than just knowing right from wrong.
- It works the other way around for bad deeds: the most potent *javana* (with high *kammic* power that can lead to rebirth in the *apāyā*) are generated with “*somanassa saḥagata diṭṭhi sampayutta citta*,” i.e., thoughts with joy and **wrong vision**. A good example is someone who commits murder and enjoys and it is done with the *diṭṭhi* that such an action cannot bring bad consequences.
- But when one commits murder due to anger that is done with aversion and displeasure: “*domanassa saḥagata paṭigha sampayutta citta*”; see, “[Akusala Citta and Akusala Vipāka Citta](#).”

11. Now let us consider the consequences of *saṅkhāra* in this life, that we mentioned in #6 above. Suppose a teenager starts associating with bad friends and start drinking alcohol. Initially, he does not even like the taste of it, i.e., he may be generating a *domanassa vedanā* due to the taste of alcohol. But with the insistence of those friends he continues drinking.

- Then he makes a habit (*gathī*) of it, begins to perceive the taste as a *somanassa vedanā*, and starts making *saṅkhāra* about drinking. Even while in the middle of some other task, he starts thinking about the next party where he can drink, and what types of drinks there will be and so on.
- Now “*saṅkhāra paccayā viññāṇa*” step in the *Paṭicca Samuppāda* leads to making a “new *viññāṇa* for drinking.” The more he thinks about such parties and generate those *somanassa vedanā*, the more *viññāṇa*, *nāma rūpa*, etc that he makes for such “drinking events.”
- And the stronger that “*viññāṇa* for drinking” gets, the more he will be thinking about it (making more *saṅkhāra*). Then the habit is strengthened; see, “[How Habits are Formed and Broken – A Scientific View](#).”

12. Mind phenomena are complex. But with the background that we have accumulated, we can figure out some of the causes and possible effects. There is no need to memorize all these different terms; they will be carved into the memory as one contemplates and sorts out one’s own experiences.

To summarize: *Sukha* and *dukkha vedanā* arise due to *kamma vipāka*. *Somanassa* and *domanassa vedanā* arise due to *saṅkhāra*, which in turn arise due to our *gati* and *āsavas*. The more *saṅkhāra* we do, the stronger a given *gathī* (habit) becomes, which in turn become *āsavas* (cravings) and fuel the *sansāric* journey (rebirth process). This vicious cycle can be broken only through comprehending the *anicca* nature of this world.

7.4.2.1 Kāma Assāda Start with Phassa Paccayā Vedanā or Samphassa Jā Vedana 0.5

Revised April 29, 2021; January 23, 2023

I have to use too many Pāli words in posts with advanced concepts. There are no short phrases in English to give the same meanings as phrases like “*samphassa jā vedanā*.” Thus it will be beneficial to learn the meanings of these Pāli words and phrases and be able to pronounce them if that seems to be helpful. I have included some audio files in the post, “[Pāli Glossary \(A-K\)](#) and [Pāli Glossary \(L-Z\)](#).” Here is how to pronounce the Pāli words in the title of this post:

[WebLink: Listen to pronunciation of : *kāma-āsvāda-phassa-paccaya-vedanā-samphassa-jā-vedanā*](#)

1. In the previous post, “[What is Kāma? It is not Just Sex](#),” we saw that *kāma* is not sex or even attractive sense objects, ear-pleasing sound, tasty food, pleasant smell, or a sensual body touch as many believe. ***Kāma* is *vacī saṅkhāra* about sense-pleasing objects (constantly thinking about those pleasures)**, whether it is an eye-catching object, ear-pleasing sound, tasty food, pleasant smell, or a body touch.

- We saw that *kāma* (or *kāma āsvāda*) is *saṅkappa rāga* which means **thinking about** such sense objects and giving priority to them. We also saw that such *kāma assāda* (or *āsvāda* in Sinhala) are *vacī saṅkhāra* that arise when specific sensory inputs trigger our deep-seated *āśava/anusaya* (which are related to our habits or “*gati*”).
- Thus we can see that *kāma assāda*, *saṅkappa rāga*, *vacī saṅkhāra* mean the same thing. Of course, *vacī saṅkhāra* may also lead to *kāya saṅkhāra*.
- **To re-emphasize: *kāma assāda* are beyond actually experiencing those sense inputs that come our way due to good *kamma vipāka*** (even though one would need to stay away from high-pleasure activities, because one could get used to them and make corresponding habits). ***Kāma assāda* are craving and thinking and planning about such sense inputs.**
- Some extreme *kāma assāda* (or at least actions and speech initiated by them) can be suppressed by understanding their harmful consequences (*ādinava*.)
- Without a Buddha appearing in the world, we would not even realize that even milder *kāma assāda* have dire consequences (*ādinava*). Yet, as we saw in the previous post, they have harmful consequences.

2. The critical point we need to discuss is how to prevent milder — but still harmful — *kāma assāda* from arising in our minds. We have to use the same tactic discussed in the previous post and the introduction to this series, “[Assāda, Ādinava, Nissaraṇa – Introduction](#).”

- When a mind comprehends that specific actions are harmful, it avoids them. As discussed in that introductory post, the best way to quit smoking is to understand that habit’s destructive consequences fully. Another is cultivating a good habit (say, listening/reading Dhamma) instead.
- In the previous post, we discussed how we avoid immoral actions via speech and bodily actions by comprehending the dire consequences of such actions.
- In other words, the primary way to effectively remove bad habits (*nissaraṇa*) is to comprehend the dire consequences (*ādinava*) of such *kāma assāda* from arising in our minds.

3. This is where another critical aspect of Buddha’s “previously unheard Dhamma” comes into play. This unique message is that in addition to being harmful, *kāma assāda* are unfruitful in the long run. Even though we usually value them, when analyzed with the way the Buddha taught, we can see that they are just mind-made due to our ignorance of the true nature of this world.

4. It is essential to understand the big difference between *vipāka vedanā* and *kāma assāda*. We cannot stop *vipāka vedanā* from arising, but we can stop *kāma assāda* by cleansing our minds.

A *vipāka vedanā* normally triggers *kāma assāda*. Also, *kāma assāda* is **made up in our minds**. Let us take a simple example to gain more insight.

- Husband and wife are walking down the street, and the wife stops and looks at a beautiful painting on display in a store window. The husband looks at it, shrugs his shoulders and wants to move on. It is

somewhat expensive, so she is considering whether they can afford it now, but she would really like to buy it. The husband has no interest in it and thinks that it is a waste of money to buy it.

- They both saw the same painting as a *vipāka vedanā*. That was just the “seeing event,” and as we will discuss in *Abhidhamma*, **most *vipāka vedanā* are neutral**, like seeing or hearing. **The exceptions are bodily contacts**, which can be either bodily *dukkha vedanā* (like a cut or a headache) or *sukha vedanā* (like getting a massage or being in an air-conditioned room on a hot day) depending on whether it is harmful or a good *vipāka*.
- Now, any “happy feeling” generated in the wife’s mind would have been due to *kāma assāda*. The mind of the husband did not generate such a “happy feeling.” This is an important point. **The “happy feeling” in the wife’s mind could not have been a property of the painting**; if so, it should have given the husband the same “happy feeling”!

5. Thus in the above case, only the wife enjoyed *kāma assāda* due to seeing the painting. In other words, a *pavutti Akusala-Mūla Paṭicca Samuppāda* cycle operated only for the wife. Her deep-seated craving (*āsava/anusaya*) for such an object led to acting with *avijjā*.

- We could also state the same process by saying that “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ*” was followed by “*tiṇṇaṃ saṅgati phasso*” and “*phassa paccayā vedanā*”; see, [“Tanhā – How We Attach Via Greed, Hate, and Ignorance.”](#)
- Now she is attached and deliberately looks at the picture, “*avijjā paccayā saṅkhāra*” step started and then went through the step, “*(saṇ)phassa paccayā vedanā*” in a fraction of a second; see, [“Idappaccayatā Paṭicca Samuppāda.”](#)
- However, for the husband, who saw the same painting, there was no *āsava/anusaya* for such an object to “attach to it” and to act with *avijjā* and to initiate those processes; also see, [““Self” and “no-self”: A Simple Analysis – Do We Always Act with Avijjā?”](#)
- For some, this may be crystal clear but those who are not very familiar with the concepts may want to review those relevant posts.

6. Now that she is “attached” to the painting, the wife keeps looking at it for a while, leading to numerous such *pavutti Akusala-Mūla Paṭicca Samuppāda* cycles. Not only that, she will be enjoying “*kāma assāda*” about that picture even after they leave that place by thinking back about it. Now she has made a “*viññāṇa*” and a “*bhava*” for it.

- That “*kāma assāda*” can resurface with *Paṭicca Samuppāda* cycles that involve only the mind when she is at home: It starts with “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*,” i.e., she remembers the painting while washing dishes. How does she start thinking about the painting when she is busy with another task?
- One way to explain that is to say that “she had ‘cultivated’ a *viññāṇa*” for that painting, and now it can sometimes resurface even without a prompt. This is sometimes known as the “subconscious”; see, [“3. Viññāṇa, Thoughts, and the Subconscious.”](#)
- Another way to explain it by saying that she had made a “*bhava*” for liking that painting and it is a *dhamma* that can enter the mind when the conditions are right: “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.” However, that particular *dhamma* or concept or thought would never make contact with the mind successfully if she were listening to a discourse or thinking about a critical concept like *anicca* since she was doing a task that did not motivate her much (washing dishes) that is an opportunity for such “subconscious *viññāṇa*” to come to the surface.

7. Of course, now that the “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*” step will be followed by, “*tiṇṇaṃ saṅgati phasso*” and “*(saṇ)phassa paccayā vedanā*”; see, [“Difference between Phassa and Samphassa.”](#) Her “*gati*” for liking such pictures will make her mind “*samphassa*,” which in turn will lead to “*samphassa paccayā vedanā*” or “*samphassa jā vedanā*.”

- This is a *vedanā* that her husband will not get. He did not make a “*viññāṇa*” or a “*bhava*” for that painting and thus it will not come to his mind.

8. Now, suppose that they are walking by the same store a week later. The wife remembers the painting, but finds that it is no longer there; someone had bought it. Now, think about what happens to the two of them.

- The wife will be distraught: “I should have bought it; now I may not be able to find such a nice painting.” But the husband will not have any bad feelings, except may be some bad feelings about his wife not being able to get what she wanted.
- This is the suffering that we can stop from arising even in this life. It is not a *vipāka vedanā* but a “*samphassa jā vedanā*.” The wife got distraught only because she got attached to that painting, but the husband did not.

9. I just gave a straightforward example from real life. Of course, it is a relatively insignificant “*taṇhā*” without drastic consequences. I just wanted to use it, because most people can understand it. Of course, the consequences can be much harsher if one gets attached to something of more significance, keep thinking about it and make that “*viññāṇa* grow,” and eventually does something terrible to acquire it.

- a) For example, X who “falls in love” with Y, may be thinking about it all day and make a “very strong greedy *viññāṇa*” about X. So, X makes all kinds of plans in his mind about Y, and the more he does it, the more strong that *viññāṇa* gets.
- b) The more strong that *viññāṇa* is, the more it is likely to “come to his mind” because it is a *dhamma* that is constantly hovering around his/her mind (or in the subconscious). It is easy to start more PS process with “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*.”

10. Note the difference between a) and b) above. In a), the process starts with “*avijjā paccayā saṅkhāra*” when X first thinks about Y and starts thinking about Y with *avijjā* and gets “bonded to Y” in his/her mind. At this point, a “baby *viññāṇa*” is formed about Y.

- Now, since it is at an early stage, this “baby *viññāṇa* for Y” may not trigger “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*” (process b) often. And that *viññāṇa* may start dying out if X does not get to think about Y for a while.
- But if X sees Y again in a few days, then that “baby *viññāṇa* for Y” gets fed again. The sight of Y makes X go through many PS cycles and strengthens that “*viññāṇa* for Y.”
- If X gets to see Y often and may be even “hang out with Y,” that “*viññāṇa* for Y” will grow because now X is giving it a lot of food (*āhāra*).
- Now with a “strong *viññāṇa* for Y,” X’s mind will constantly be bothered with “*dhamma* about Y,” and it is more likely that “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*” will be triggered even while X is doing something else.

11. Then, one day, X hears Y is going to marry another person. What will happen to X? He will be highly distraught, and depending on the level of attraction (and his *gati*), he may do something terrible.

- For example, if the attraction (level of *taṇhā*) was firm, AND if X has a “violent character” (i.e., “violent *gati*”), then X may hurt Y or the person that Y got engaged to. Then not only will X suffer due to the “loss of Y,” but it would also have made causes for FUTURE SUFFERING by committing a bad *kamma*.

12. We can now see how both *taṇhā* and *gati* are critical concepts. One can lessen both by contemplating on the dire consequences (*ādinava*) of acting foolishly.

- Comprehending *anicca*, *dukkha*, and *anatta* is the best way. Then one’s *gati* will change permanently to the “moral *gati*” of a *Sotāpanna*, and one will never do anything that will lead to the birth in the *apāyā*. Even though a *Sotāpanna* may still generate “*samphassa-jā-vedanā*,” due to some sense inputs, those will be milder, and thus any suffering incurred would be mild.

- I hope that it is clear from this discussion that it is impossible to suppress *kāma assāda* or thoughts about sense objects forcibly. The only way is via purifying the mind by learning Dhamma (especially the *anicca* nature of this world) and thinking about the bad consequences of such thoughts (*ādinava*). This is what the Buddha realized as the *āsavakkhaya ñāṇa*, the way to get rid of *āsava* (and *anusaya*) via getting rid of bad habits (*gati*) and cultivating good habits (*gati*).
- And this is discussed in the meditation (*Bhāvanā*) section under, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

7.4.2.1 Sakkāya Diṭṭhi is Personality (Me) View? 1

March 10, 2017; revised January 20, 2018; June 1, 2019; October 3, 2019; July 24, 2020

In this post, we will discuss why interpretations of two key concepts — *sakkāya diṭṭhi* and *saṃyojana* — in many current English publications (including supposedly *Theravāda* texts) are incorrect.

Difference Between Wrong Views and Wrong Perceptions

1. Most texts describe *sakkāya diṭṭhi* as “self-illusion” or “personality belief,” i.e., “belief that a self or I exist” (you can Google “*sakkāya diṭṭhi*” and see). **Here it is essential to understand that there is a difference between “wrong view” and “wrong perception.”** A *Sotāpanna* would have removed the wrong view (*diṭṭhi*), but not the false perception (*saññā*.)

- But this **perception (*saññā*)** of a “self” (or a “soul” which is also called “*ātma*”) is NOT *sakkāya diṭṭhi* per *Tipiṭaka* as we discuss below. That is a *saññā* (perception) that we have carried from life-to-life. For a discussion on *saññā*, see, “[What is Saññā \(Perception\)?](#).”
- The deeply-embedded idea of a “self” or an innate sense of “me” is rooted in the *māna cetasika*.
- If one gets offended if treated with disrespect, that means one still has *māna* left. Even an *Anāgāmī* could be somewhat perturbed if he/she perceives to be treated badly. A component of *māna* — called *asmi māna* — is still left at the *Anāgāmī* stage. ***Māna* is removed not at the *Sotāpanna* stage, but the *Arahant* stage.**

A Sotāpanna Removes Only Wrong Views About an “Unchanging Self”

2. What is removed at the *Sotāpanna* stage is the **wrong view (*diṭṭhi*)** that there is something unchanging and permanent like a “soul” is associated with oneself. That goes with the belief that lasting happiness can be achieved by just living a moral life (even though that is essential.)

- When one can see that there is no “real essence” (like a “soul” or a “*ātma*”) associated with a living being, this **wrong view** of *sakkāya diṭṭhi* goes away. A lifestream evolves, according to *Paṭicca Samuppāda*; see, “[Anattā in Anattalakkhana Sutta – No Soul or a Ātma](#).”
- **Therefore, it is incorrect to believe that the perception of a “self” will go away at the *Sotāpanna* stage.** It is also dangerous, because one is trying to do something that is **not possible** to do at that stage. It is like a child in the primary school trying to get a Ph.D.

Sotāpanna Stage – Four Conditions

3. In the post, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#),” we discussed the four conditions that need to be satisfied to attain the *Sotāpanna* stage of *Nibbāna*.

- With fulfilling those conditions, one will break through *three saṃyojana* (mental bonds) and be permanently released from rebirths in the *apāyā* (four lowest realms). The Pāli word *saṃyojana* (or *sanyojana* or *sanyoga*) is usually translated as “fettors.” See, for example, the Wikipedia article: “[WebLink: WIKIPEDIA: Fetter \(Buddhism\)](#).”

- But as in many English publications (books, internet posts), the above Wikipedia article misdescribes *samyojana*.

4. **We are bound to the 31 realms in this world by ten “mental tethers” or *samyojana*.** It can be visualized as someone attached to a post by a rope, except that there is no one else that forcibly bind us to the 31 realms.

- *Sanyojana* or *sanyoga* (“*saṇ*” + “*yoga*” where “*yoga*” means to bind) means bound via “*saṇ*”; see, [“What is ‘Saṇ’? Meaning of Sansāra \(or Samsāra\).”](#)
- We voluntarily bind ourselves to this world with our minds, because we believe that somewhere in these 31 realms we can find permanent happiness.
- **Most people think they can find happiness in this life itself!** They don’t even pause to contemplate what happens when one gets old and helpless. If one takes time to observe, there are many examples around: famous, wealthy, and powerful, became disabled at old age, and died a miserable death.

Three *Samyojana* Removed

5. A *Sotāpanna* breaks through 3 of those ten *samyojana* — or “bonds” or “tethers” — and gets permanently released from the four lowest realms (*apāyā*). He/she does this by comprehending the true nature of this world, i.e., attaining *sammā diṭṭhi*.

The keyword “*sammā*” comes from “*saṇ*” + “*mā*,” which means “to become free of *saṇ*.” For example:

- “*Mā hoti jāti, jāti*,” means “may I be free of repeated birth.”
- “*Mā me bāla samāgamo*” means “may I be free of association with those who are ignorant of Dhamma.”
- Thus *sammā diṭṭhi* is to be free of wrong views. One gets some level of *sammā diṭṭhi* at the *Sotāpanna* stage and completes it at the *Arahant* stage.

Importance of Comprehending the Unfruitful/Dangerous Nature of This World (*Tilakkhaṇa*)

6. **One has to break those bonds in one’s mind.** One gains *sammā diṭṭhi* — right view to become free of ‘*saṇ*’ — by comprehending the true nature of this world of 31 realms.

Anicca – that nothing in this world can bring permanent happiness in the long run.

Dukkha – despite our struggles, we will be subjected to much more suffering than pleasures if we remain in the rebirth process.

Anatta – therefore, one is truly helpless in this struggle to attain “something of the essence in this world.” That is just an illusion.

- See, [“Anicca, Dukkha, Anatta – Wrong Interpretations.”](#)

Two Eightfold Paths

7. It is essential to realize that there are two Eightfold Paths with two types of *sammā diṭṭhi*. See, [“Buddha Dhamma – In a Chart”](#) and [“Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\).”](#)

- One first needs to reach a “moral mindset” by staying away from immoral acts embedded in the five precepts. That is attaining “**mundane *sammā diṭṭhi***.”
- Then one’s mind is cleansed enough to comprehend the Three Characteristics of this world: *anicca*, *dukkha*, *anatta*.

- When one gains this “*lokuttara sammā diṭṭhi*” to some extent, one will indeed start on the Noble Eightfold Path; see, “[How to Cultivate the Noble Eightfold Path starting with Anicca, Dukkha, Anatta.](#)”
- This distinction is hard to perceive for many people. I encourage them to read the first few subsections of the “[Living Dhamma](#)” section.

8. Now let us discuss how gaining *lokuttara sammā diṭṭhi* leads to the removal of three of the ten mental tethers (or fetters) that bind us to the rebirth process. In particular, to be released from the worst types of suffering in the *apāyā*.

- Those three *saṃyojana* are *sakkāya diṭṭhi* (also called *sathkāya diṭṭhi*), *vicikicchā*, and *silabbata parāmāsa*.

Two Prevailing Major Wrong Views

9. The Buddha discussed 62 types of *diṭṭhi* that were present during that time in the *Brahmajāla Sutta*. We don’t need to address all of them today, because there are only two of those wrong views that are prevalent today.

- Religious people (Creator-based religions), believe that there is a “permanent soul,” and one will be born in heaven or hell forever after this life. This idea of a “*āthma*” or a “self” was the *sassata diṭṭhi*.
- Science today believes that our thoughts arise in our brains, i.e., our mental body is the same as the physical body (“I am my body”). So, when we die, that is the end of the story because the physical body becomes dust; so they say, “enjoy life while it lasts.” That was the “*uccheda diṭṭhi*” (pronounced “uchcheda”) that the Buddha also rejected: “Life terminating with the death of the physical body.”
- Thus the Buddha rejected both wrong views that “a self exists” and “a self does not exist.” Things can exist due to causes, and if those causes do not exist, they cease to exist. That is the principle of cause and effect explained in *Paṭicca Samuppāda*. Beings exist due to *avijjā* and *taṇhā*, and they cease to exist when those cease to exist and reach permanent happiness (i.e., attain *Nibbāna*).

10. Even those religious people may subconsciously have that part of the *uccheda diṭṭhi* of “I am my physical body.”

- Our increasingly materialistic societies always feed this narrative — that it is so important to look beautiful and robust because my body is what I am — via television and movies.
- In other words, *sakkāya diṭṭhi* in the present day is rooted in the view of “I am my physical body.” That leads to the perception, “I can achieve happiness by providing a lot of pleasurable sense inputs to my body.”

Meaning of *Sakkāya* or *Sathkāya*

11. “*Sath*” means “good” or “fruitful.”

- And *kāya* can mean either **one’s actions** or **one’s body**, as we discussed in *Kāyānupassanā*; see, “[Kāyānupassanā – Section on Postures \(Iriyapathapabba\)](#).”
- ***Sakkāya diṭṭhi* encompasses mainly two views:** (i) “I am my body,” and I need to keep it beautiful above all. (ii) I can achieve happiness by diligently pursuing (good) things in this world.
- **This view is of course related to the perception of *nicca*. That it is possible to maintain things to our liking or *icca* (or *icchā*).** See, “[Sakkāya Diṭṭhi – “Me and Mine” View](#)”

Getting Rid of *Sakkāya Diṭṭhi*

12. Therefore, getting rid of *sakkāya diṭṭhi* in the present day requires one to realize that this physical body is “just a shell” that we have possession of only for about 100 years.

- That is why it is essential to realize the role played by our mental body, *gandhabba*, which could live for thousands of years. But that also will cease to exist when we grasp a new existence (*bhava*) at the *cuti-paṭisandhi* moment when the *gandhabba* itself dies.
- Our next existence depends not on how well we keep our physical bodies (they need to be healthy), but how well we “improve” our mental body. Learning *Dhamma* and living according to that *Dhamma* helps with the latter.
- I have given a more straightforward explanation of *gandhabba* at the “Living Dhamma” section: “[Mental Body – Gandhabba](#),” and there is a separate section in the *Abhidhamma* section that goes into more detail.

13. The second view associated with *sakkāya diṭṭhi* in #10 above. That one can achieve happiness by diligently pursuing things in this world. *Sakkāya diṭṭhi* can only be removed by comprehending the “*anicca* nature.”

- See, “[Anicca, Dukkha, Anatta](#).”
- When one comprehends *anicca*, one realizes that no matter what we do, staying in the rebirth process leads to net suffering. *Even though there are bouts of happiness to be had, those will be insignificant to suffering in the long run, especially when one is (inevitably) born in the apāyā.*

Cūḷavedalla Sutta (MN 44)

14. It should be noted that a full explanation of *sakkāya diṭṭhi* is given in the [WebLink: suttacentral: Cūḷavedalla Sutta \(MN 44\)](#) where Ven. Dhammadinna explains it to her former husband Visakha:

“..*Kathaṃ paṇāyye, sakkāyadiṭṭhi hotī*”ti? “*Idhāvuso visākha, assutavā puthujjano, ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaṃ adassāvī sappurisa-dhammassa akovido sappurisa-dhamme avinīto, rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ, attani vā rūpaṃ, rūpasmiṃ vā attānaṃ. Vedanaṃ ... pe ... saññāṃ ... saṅkhāre ... viññāṇaṃ attato samanupassati, viññāṇavantaṃ vā attānaṃ, attani vā viññāṇaṃ, viññāṇasmiṃ vā attānaṃ. Evaṃ kho, āvuso visākha, sakkāyadiṭṭhi hotī*”ti.

- First, it is essential to realize that “*atta*” in the above verse used in the conventional sense, to denote “I.”
- What we have discussed regarding “I am my body” is stated in the bold text above that can be translated as: “**I am my body, my body is me, my body is in me, I am in my body**”; see, “[Anattā in Anattalakkahana Sutta – No Soul or an Ātma](#).” Thus one may see one’s *rūpakkhanda* as one’s “*attā*” in four ways.
- In the same way, some people could take one’s *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* to be oneself in four ways as above. All these mental components give rise to the idea that “I remember this and that happened to me a long time ago; so there must be a continuation of me until the body dies.” Therefore, this wrong view encompasses 20 types of (“*visativatthuka*”) *sakkāya diṭṭhi*.”
- The French Philosopher Rene Descartes famously said, “I think; therefore I am”; he proposed that those thoughts arise in the pineal gland in the brain. That is a part of *uccheda diṭṭhi*.

Two Meanings of Atta

15. When one attains the *Sotāpanna* stage, one “sees with wisdom” (becomes “*dassanena sampanno*”) that it does not make sense to take the stand “I am my body,” etc. as above.

- However, “just seeing” that it makes sense, and verifying and experiencing that to be accurate, are two different things. One finally confirms that to be accurate and thereby gets rid of the perception of “me” (called “*asmi māna*”) only at the *Arahant* stage.

- There was a lengthy discussion on this issue at the discussion forum. I recommend reading it since it is not possible to put it in a short post like this; see, “[WebLink: Wrong English translations of Anicca, Anatta, Sakkāya diṭṭhi.](#)”

16. The confusion in conventional translations of *sakkāya diṭṭhi* seems to arise when they try to connect “*atta*” in the above verse (“*rūpaṃ attāto*”) as the opposite of “*anatta*” in *Tilakkhaṇa*. ***Atta* has two meanings**: one meaning is “I” or “myself” as in “*Atta Hi Attano Nātho*” (“only I can be of salvation to myself”), and that is the meaning implied in the above verse.

- The other meaning of “*atta*” is “in control” or “has an essence”, and the opposite of that is the *anatta* in *Tilakkhaṇa*: “one is helpless in this rebirth process.”
- Those two meanings are explained in “[Attā Hi Attano Nātho](#)” and in detail in, “[Pāli Dictionaries – Are They Reliable?](#).”
- That is why one needs to be cautious when using Pāli dictionaries. **One cannot define and fix the meaning of a Pāli word.** One HAS TO KNOW the context; see, “[Pāli Dictionaries – Are They Reliable?](#).”

What is *Vicikicchā*?

17. The second *saṃyojana* removed at the *Sotāpanna* stage is *vicikicchā*. Does it mean doubts about the Buddha, Dhamma, and Saṅgha as explained in many translations? It is informative to see how such doubts are related to the *Tilakkhaṇa*.

- *Vicikicchā* comes from *vi+chi+ki+icchā*. Our distorted views (*diṭṭhi*) that worldly things can lead to happiness lead to our liking (“*iccā*”) for them. We then take actions (“*kī*” or “*kiriya*”) are based on our craving. And, “*Cha*” means *citta* or the way we think, here based on such *diṭṭhi*. In this case, “*vi*” means “distorted” (විකූල in Sinhala.) **Therefore, to engage in actions (and thoughts) based on the wrong view that it is possible to maintain things to our liking is *vicikicchā*.** See, #11 above.
- Therefore, *vicikicchā* goes away simultaneously with the loss of *sakkāya diṭṭhi*.
- **One dissociates from such wrong views by comprehending “*anicca* nature.”** When one becomes a *Sotāpanna*, one automatically sees the “fruitlessness” in many immoral or inappropriate actions. One truly knows deep down that most of our efforts in pursuing sense pleasures are in vain. However, until one becomes an *Anāgāmī*, one is still attached to sense desires.
- For example, a *Sotāpanna* may still engage in sex, but will not engage in immoral sexual activities outside marriage. While the first can still lead to one’s rebirth in the human and *deva* realms, the latter can lead to births in the *apāyā*. A *Sotāpanna* is released only from the *apāyā*.
- In other words, if one has *vicikicchā*, one MAY do immoral *apāyagāmī* actions under tempting conditions. But a *Sotāpanna* is INCAPABLE of doing such actions under ANY circumstance. A *Sotāpanna* will not have any doubts about which activities are really immoral.

What is *Silabbata Parāmāsa*?

18. The third *saṃyojana*, *silabbata parāmāsa*, is the wrong view that *Nibbāna* can be attained by following specific precepts/rituals. They include five or eight precepts (or just by doing good things).

- Attaining *Nibbāna* REQUIRES *lokuttara sammā diṭṭhi*. To achieve *lokuttara sammā diṭṭhi*, one needs to grasp the *Tilakkhaṇa* (*anicca, dukkha, anatta*). See, “[Anicca, Dukkha, Anatta.](#)”
- **When one comprehends *anicca*, one stays away from immoral actions. That happens not because one is firmly adhering to a set of precepts or rituals. Now one knows deep inside that such activities are fruitless and dangerous in the long run.**

- However, following precepts (i.e., staying away from immoral deeds) is necessary to get to mundane *sammā diṭṭhi*. That enables one's mind cleansed enough to be able to comprehend *Tilakkhaṇa*.

Kāma Rāga NOT Removed at Sotāpanna Stage

19. Finally, a *Sotāpanna* needs to break two more *samyojana* or bonds — *kāma rāga* and *paṭigha* — to become free of the *kāma loka*. Only an *Anāgāmī* is free of rebirth anywhere in the *kāma loka*, which includes human and six *deva* realms.

- The last five *samyojana* (including the perception of a “self” or *māna*) will be removed only at the *Arahant* stage; see, “[The Cooling Down Process \(Nibbāna\) – How Root Causes are Removed.](#)”

July 24, 2020: A detailed discussion at “[The Five Aggregates \(Pañcakkhandha\)](#)” and “[Origin of Life.](#)”

7.4.2.1 Akusala Citta – How a Sotāpanna Avoids Apāyagāmi Citta

2

1. First I need to clarify the title. Of course, *citta* (pronounced “chittha”) are thoughts. All *kamma* start as *mano saṅkhāra*, i.e., one starts thinking about something and it escalates into speech and bodily action by the “wheeling” or “*riya*” process; see, “[Nibbāna – Stopping of the Sansāric Vehicle.](#)”

- The complete cessation of doing *saṅkhāra* happens only when one becomes an *Arahant*. But after attaining the *Sotāpanna* stage, this “wheeling process” stops for certain types of initial thoughts or *citta*.

2. We have seen that *apāya* is a common word for the lowest four realms of existence, see, “[The Grand Unified Theory of Dhamma.](#)” *Apāyagāmi* (“*apāya*” + “*gāmi*” means directed towards) *citta* are those that lead to potent *kamma* responsible for rebirth in the lowest four realms.

3. So, what *cittā* or thoughts get one started on the “wheeling process” or a “thought process” that leads to speech or bodily action of very bad consequences, i.e., birth in the *apāyā*? These are thoughts that arise because one does not have a full understanding of the “nature of this world”, i.e., the *Tilakkhaṇa*, or *anicca*, *dukkha*, *anatta*.

Out of the 89 possible *citta* (see, “[The 89 Types of Citta](#)”) 12 are immoral *citta*.

- 8 with the *lobha* (greed) root; *moha* root is there too.
- 2 with the *dosa* (hate, ill will) root; *moha* root is there too.
- 2 with just the *moha* (ignorance) root.

ALL TEN immoral acts (*dasa akusala*; see, “[Ten Immoral Actions \(Dasa Akusala\)](#)”) are done with these 12 types of *citta*.

4. We generate greedy thoughts because we “want to get possession of things that seem to provide happiness.” When we do not get what we want, we generate hate or ill will towards whoever is in the way.

- And we do both types of actions because we do not realize that it is not possible to achieve lasting happiness with anything in “this world.” Not only that, but we also do not realize that by doing those bad actions we accumulate bad *kamma* (i.e., accumulate *kammic* energy) that are going to have bad consequences in the future, either in this very life or in future lives.
- Thus ignorance of the true nature of “this world” is the cause of all bad actions done with greed and hate; this is why the *moha* root is in all of them. We also do certain bad actions just based on ignorance too, like comparing how one is “better” than another, etc.

A. The two ignorance-rooted *citta* are:

- One associated with *vicikicchā* (*vichi+ki+ichcha* = liking based on the distorted view, i.e., *diṭṭhi*). Commonly *vicikicchā* is described as “doubt”, which could be taken as “doubt about the true world view.” Just like a fish biting on a bait due to not “seeing” the hook, we just grab things without “seeing”

the consequences, i.e., possible harm to others and the consequences of such harmful actions for ourselves.

- One associated with *uddhacca* (restlessness or agitation of the mind). This is the opposite of *samādhi* or the ability to concentrate and be able to think through the consequences of actions. One could have *uddhacca* even if one knows the “true nature” of this world; it is sort of a cumulative result of all defilements accumulated through beginning-less *samsāra*. This is completely removed only at the *Arahant* stage.

All 12 types of *citta* have ignorance as a root (primary as in the above two types) or as secondary in the other ten *citta*. These ten *citta* can be divided into two categories in another way, i.e., based on whether such *cittā* arise mainly due to *vicikicchā* (i.e., due to not knowing the true nature of this world) or *uddhacca* (i.e., the agitation of the mind due to all accumulated defilements).

B. Out of the **eight greed-rooted *citta***, four arise with wrong view (*diṭṭhi*), i.e., due to lack of understanding of the “true nature of this world”, and that “this world” is much more complex than we perceive with our senses, and that our life does not end here, but what we do will have consequences for very long times into the future. The other four are done anyway, even with the right view, because of the agitation of the mind due to all “gunk” accumulated over the long *sansāric* journey. Thus the eight greed-based *citta* can be divided into two broad categories:

- Four done with wrong views (*diṭṭhi*) are removed at the *Sotāpanna* stage.
- Four dissociated from wrong view (i.e., it does not matter whether one has right view if defilements still cloud the mind; for example even one who has attained the *Sotāpanna* stage may do these four)

C. The **two hate-rooted *citta*** are also done regardless of whether one has the right view (at the *Sotāpanna* stage) or not:

- These two hate-rooted *cittā* are dissociated with wrong views but are due to the agitated mind (*uddhacca*). Thus they persist after the *Sotāpanna* stage, up to the *Anāgāmī* stage.

Now we can see the broad view:

5. Five *cittā* (*vicikicchā* and the four greed-rooted *citta* associated with wrong view) arise because one does not know the true nature of the world, *Tilakkhaṇa*, i.e., *anicca*, *dukkha*, *anatta*. They contribute to one of the four types of *āsava* called the *diṭṭhi āsava* or *diṭṭhāsava*.

These are the same *citta* that could lead to *apāyagāmī kamma*. **Thus when one attains the *Sotāpanna* stage, these five *citta* cease to arise forever, and one WILL NOT BE ABLE to do any such grave *kamma*.** Thus, the *Sotāpanna* stage is a very important stage of *Nibbāna* where *āsavakkhaya* happens to a significant level due to the removal of *diṭṭhāsava*:

- A *Sotāpanna* attains that stage just by getting rid of *diṭṭhi* or wrong views: *sathkāya* (or *sakkāya*) *diṭṭhi* is the view that lasting happiness can be attained via pursuing things in this world. *Vicikicchā* leads to tendencies and actions associated with wrong worldviews, and *sīlabbata parāmāsa* is the view that *Nibbāna* can be attained by following specific precepts/rituals without cleansing the mind.
- The other seven *citta* are the ones that are harder to remove. They arise due to an agitated mind which is a result of other defilements (*āsavas*) that we have accumulated over the long *samsāra*; see. “[The Way to Nibbāna – Removal of āsavas](#).”
- Out of these, the two hate-rooted *citta* are lessened in strength at the *Sakadāgāmī* stage and are removed at the *Anāgāmī* stage.
- The remaining four greed-rooted *citta* (those dissociated from wrong views) contribute to *kamarāga* (greed for things in the *kāmaloka*). *Kamarāga* is lessened at the *Sakadāgāmī* stage and completely removed at the *Anāgāmī* stage. Thus an *Anāgāmī* is unable to generate hateful thoughts or lustful

thoughts and is free from rebirth anywhere in the *kamaloka*. An *Anāgāmī* has removed *kamasava*, another part of the *āsava*.

- Finally, it is only at the *Arahant* stage that those remaining four greed-rooted *citta* (which still contribute to *bhavasava*) and the *uddhacca citta* (which still contribute to *avijjasava*) are completely removed. This is when all the defilements or *āsavas* are completely removed from one's mind.

6. It is clear that all five *akusala citta* that are removed at the *Sotāpanna* stage arise due to *micchā diṭṭhi*, i.e., not comprehending the Three Characteristics of existence: *anicca*, *dukkha*, *anatta*. Also see, “[Ditthi \(Wrong Views\)](#), [Sammā Ditthi \(Good/Correct Views\)](#).”

7. This realization of correct views CANNOT be attained by following rituals, such as just obeying precepts. It comes naturally when one COMPREHENDS the true nature of this world of 31 realms: *anicca*, *dukkha*, *anatta*; see, “[Anicca, Dukkha, Anatta](#).” That it is unfruitful to involve in any kind of activities to gain mundane pleasures by hurting other beings. Such an understanding makes irrevocable changes in one's *manomaya kāya*, and thus prevents one from doing such activities even in the future lives.

8. Now it is important to realize that a *Sotāpanna* can be a parent taking care of a family. He/she will be doing a job, driving kids to school, and doing all other daily tasks. But one does all this with the clear understanding that one should NOT do certain things. One could live a moral life suitable for a *Sotāpanna* without giving up ANY responsibilities as a regular “householder.” Actually one could even attain the *Anāgāmī* stage without becoming a *bhikkhu*. And there were many “householders” that had attained *Sotāpanna*, *Sakadāgāmī*, *Anāgāmī* stages at the Buddha's time; there are some even today.

7.4.2.1
3

What is the only Akusala Removed by a Sotāpanna?

Revised May 10, 2017; December 1, 2017; July 7, 2018; August 16, 2019; August 14, 2022

Micchā Diṭṭhi – Only Dasa Akusala Completely Removed by a *Sotāpanna*

1. Upon attaining the *Sotāpanna* stage, *micchā diṭṭhi* (the ten types of *micchā diṭṭhi* together with wrong views of *nicca*, *sukha*, and *atta*) is COMPLETELY removed. That is one *akusala* out of *dasa akusala*. But that accounts for more than 99% of *akusala* (defilements) from one's mind since the “*apāyagāmi* strength” of the other nine *akusala kamma* are also removed.

- That illustrates the importance of removing *micchā diṭṭhi* and why I have so many posts on that. Also, see the first discourse in “[Three Marks of Existence – English Discourses](#).”
- Some people think a *Sotāpanna* is incapable of breaking the five precepts based on an incorrect translation of the [WebLink: suttacentral: Gihi Sutta \(AN 5.179\)](#). The relevant verse is: “..ariyasāvako pāṇātipātā *paṭivirato* hoti, adinnādānā *paṭivirato* hoti, kāmesumicchācārā *paṭivirato* hoti, musāvādā *paṭivirato* hoti, surāmerayamajjapamādaṭṭhānā *paṭivirato* hoti.”
- However, “*paṭivirato hoti*” does not mean “abstains from” as translated at many online sites; it means “does not do with liking.” Thus, a *Sotāpanna* may — under some conditions — break the five precepts. It is only an *Arahant* that will not break five precepts or engage in *dasa akusala*.
- The five precepts have deeper meanings, too: “[The Five Precepts – What the Buddha Meant by Them](#).”

2. With the removal of *micchā diṭṭhi*, a *Sotāpanna* will be incapable of doing the following six deeds (per “[WebLink: suttacentral: Bahudhātuka Sutta \(MN 115\)](#)”).

- (i.) Killing one's mother.
- (ii.) Killing one's father.
- (iii.) Killing an *Arahant*.
- (iv.) Injuring a Buddha.

- (v.) Causing *saṅgha bheda* (spreading wrong Dhamma is included here).
- (vi.) Taking refuge in anyone other than a Buddha (i.e., believing in other ways of “salvation”).
- Furthermore, a *Sotāpanna* will avoid an unimaginable amount of future suffering.

Future Suffering Removed by a *Sotāpanna*

3. [WebLink: suttacentral: Nakhasikha Sutta \(SN 13.1\)](#) describes the vast amount of defilement removed by a *Sotāpanna*.

- One time the Buddha picked up a little bit of dust with the tip of his fingernail and asked the *bhikkhus*, “What do you think *bhikkhus*? Which is greater: the little bit of dust I have picked up with the tip of my fingernail, or the soil in this great Earth?”
- Of course, the *bhikkhus* answered that the amount of soil on this Earth is vastly more massive than the bit of dust on a fingernail.
- Then the Buddha told the *bhikkhus* that the amount of suffering that a *Sotāpanna* has removed could be compared to the soil on the whole Earth. The amount that he/she has left to stop can be compared to the bit of dust on his fingernail.
- Therefore, the amount of suffering a *Sotāpanna* has left in future rebirths is insignificant compared to that of an average human.

4. More analogies are given in a series of suttas starting with “[WebLink: suttacentral: Pathamasinerupabbatarāja Sutta \(SN 56.49\)](#).” “The amount of suffering a *Sotāpanna* has to endure can be compared to **seven grains of sand** on top of mount Sineru. The amount of suffering a normal human has left to endure can be compared to sand in the whole mountain.”

- That is logical since the suffering encountered in the *niraya* never ceases. One birth in the *niraya* (hell) would lead to much more suffering than thousands of births in the human or higher realms.
- A *Sotāpanna* will NEVER be reborn in the four lowest realms due to the complete removal of ONE *dasa akusala*, that of *micchā diṭṭhi*. Furthermore, he/she will have only **seven future bhava** left and those in the human realm or the realms above it.

Removal of *Micchā Diṭṭhi* Is Enough to Become a *Sotāpanna*

5. That may be why most people tend to think that attaining the *Sotāpanna* stage requires attaining *jhānā*, all sorts of *abhiññā* powers, etc. **None of that is a requirement for achieving the *Sotāpanna* stage.**

- One may think that a *Sotāpanna* would have removed at least half of the ten evils (*dasa akusala*.) **It turns out that a *Sotāpanna* completely removes only one of the *dasa akusala*, that of *niyata micchā diṭṭhi*.** Of course, in achieving that, a *Sotāpanna* would have reduced the “*apāyagāmi* strength” of most of the other *dasa akusala*. That is the key to understanding. In particular, *abhijjā* [*abhijjhā*] or *lobha* reduced to *rāga* level and *vyāpāda* or *dosa* is reduced to *paṭigha* level; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”
- For a discussion on *dasa akusala*, see, “[Ten Immoral Actions \(Dasa Akusala\)](#).” As discussed in that post, *Niyata Micchā Diṭṭhi* (**established** wrong views) is an *akusala* done with the mind.
- A *Sotāpanna* is said to have achieved “*dassanena pahatabba*” or removal of defilements via correct vision. **He/she has removed an unimaginably vast amount of evils (“*keles*” or “*kilesa*” or “*klesha*”) with the removal of *micchā diṭṭhi*,** or attaining the first stage of *Sammā Diṭṭhi*: the true nature of this world of 31 realms.
- How a *Sotāpanna* reduces *dasa akusala* via getting rid of *micchā diṭṭhi* “to overcome *apāyagāmi citta*” is discussed in “[Akusala Citta – How a *Sotāpanna* Avoids Apayagami Citta](#).” Here is it described

how five out of the 12 *akusala citta* do not arise after the *Sotāpanna* stage; those are the five that lead to birth in the *apāyā*.

6. That is a critical point to understand. Removal of *micchā diṭṭhi* leads to the stopping of highly immoral actions. Most people worry excessively about the defilements done with the body and speech. They are afraid of even accidentally killing an insect or telling a “white lie.” Of course, those must be avoided, too, because moral behavior (speech and actions) are a prerequisite for cleansing the mind.

- But having *niyata micchā diṭṭhi* is million-fold more weighty. These and other types of *Niyata Micchā Diṭṭhi* (established wrong views) are discussed in “[Ten Immoral Actions \(Dasa Akusala\)](#)” and “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).”
- It would be beneficial to understand the weights of different types of *kamma*; see “[How to Evaluate Weights of Different Kammās](#).”
- If one has a vessel that is leaking water, there is no point in trying to plug the smaller holes first. One should seal the largest hole first, which in this case is getting rid of *micchā diṭṭhi* or false views (about this world).
- That may still not convince some. If so, see whether this conclusion contradicts anything in the *Tiṭṭaka*. One should carefully examine all the “requirements” that must be fulfilled to attain the *Sotāpanna* stage. It should become clear that this is all one needs to do.
- **And that comes only via learning Dhamma, the correct version**, the version discovered by the Buddha and passed down through generations of Noble Persons or *Ariyā*. We discussed in detail in the post, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”
- Of course, one needs to have removed *micchā diṭṭhi* even to become a *Sotāpanna Anugāmi*: “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”

The Next Step

7. A *Sotāpanna* has removed the “wrong views” about the nature of this world. But the tendency to “feel” that there are mind-pleasing things in this world is still there.

- That is why we need to comprehend the term *saññā*, commonly translated into English as “perception.”
- Of course, *Saññā* is one of 52 *cetasika* and one component of *pañcakkhandha*. It is one of the seven universal *cetasika* that arise with every *citta*.

8. *Saññā* works very closely with another universal *cetasika* called *manasikāra*. *Manasikāra* is the *cetasika* that brings old memories and future hopes into a *citta*. When *cetanā* “puts together the *citta*,” the *citta* recognizes the subject (*saññā*) and automatically produces *vedanā* (feelings) about it. Thus we can see the significant roles of those four *cetasika* right away.

- But *saññā* is not limited to “recognizing objects.” *Saññā* is the “inner understanding” of any concept.
- For example, when we hear “fire,” we immediately recognize that. Even a picture of a fire may flash in our minds. But a baby (or someone who does not understand English) does not have a “*saññā*” for that word; it means nothing to them. But the baby (or that person) can understand what “fire” means if we teach it to them.
- Growing up, we acquire innumerable “*saññā*” mostly by becoming familiar with them. We first recognize who “mother” and “father” are, know different colors, different objects, etc. For details, see “[Saññā – What It Really Means](#).”

9. Even though we acquire “*saññā*” for most objects and people, some strong *saññā* may be “passed down” from previous lives. That can take many forms.

- When visiting a place that one had never previously visited in this life, some people may already “know” about that place in great detail. Children who remember past lives have been reported to lead

investigators to various locations in faraway cities where they had lived in previous lives. Many adults have said they can walk a city with complete confidence that they are visiting for the first time.

- Then there is the “ability” to play the piano, recite *suttā*, or just be able to comprehend complex mathematics as a child, etc. Some of these cases discussed in “[Evidence for Rebirth](#).”

10. We “acquire” most *saññā* through our families first, then through friends, schools, workplaces, etc.

- Thus most of our “world views” or *diṭṭhis* are acquired through our families. Our first impressions of moral issues, politics, and religions come from our families.
- Those *saññās* are hard to change, depending on how forcefully and frequently they have been used.
- However, the human mind is unique. When given enough substantial evidence, one’s *saññā* about something or some concept can PERMANENTLY change. For example, when one learns how to do algebra (addition and subtraction, etc.) correctly, one will never forget that. And even if an authority figure (a teacher) insists that one plus two is four, even a child will not accept that. He/she can count fingers and show the teacher that the correct answer IS three.

11. As we grow up, we acquire *saññā* for more specialized tasks. One could “learn” to become a carpenter, a doctor, an engineer, etc.

- This “learning” is acquiring “*saññā*” for a particular task. It is not just memorizing how to do things. When a physician finishes his/her learning, he/she can “troubleshoot” a brand new patient and figure out what is wrong. When an engineer builds a new structure, it could be something that has not been made before. One acquires “skills.”
- Once one learns a “skill,” one will never forget that; at least it is easy to “get back to it.” One who had learned to ride a bicycle as a child may never touch a bike for 30-40 years. But even at old age, he can ride a bike with minimal effort.

Removal of “*Micchā Saññā*” or “*Saññā Vipallāsa*” Needed for Higher *Magga Phala*

12. A *Sotāpanna* acquires a basic level of understanding about “this world” and that “knowledge” or “comprehension” does not go away even in future lives.

- Once someone sees a “glimpse” of the Buddha’s core message, in the long run, there is no permanent happiness to be had by wishing for anything in this world
- That kind of a “vision change” does not happen quickly unless one has “*saññā*” about that from previous lives; that is why it is easier for some people to grasp these concepts.
- And this “*saññā*” cannot be acquired via memorizing *suttā*, how to recite the *Paṭicca Samuppāda* cycle, etc. Instead, one needs to COMPREHEND the concepts.
- The KEY concept to grasp is the “*anicca saññā*.”

13. The only way to “build up” the correct *saññā* is to make an effort to understand the key message of the Buddha. Humans usually have wrong perceptions or “*vipareetha saññā*” that one can find happiness in this life by working hard. Most people do not even think beyond this life, even if they believe in rebirth. That is also called the “*nicca saññā*” (pronounced “*nichcha saññā*”), i.e., by working hard or by sheer luck, one can achieve and maintain things in this world to one’s satisfaction.

- The fundamental teaching of the Buddha is about the “*anicca saññā*,” i.e., it is NOT POSSIBLE to maintain ANYTHING to one’s satisfaction in the long run. The *Sotāpanna* stage of *Nibbāna* is attained when the *anicca saññā* is cultivated to some significant extent.
- When one has developed the *anicca saññā* to this level, one’s mind automatically blocks “*apāyagāmi citta*.”

- As we discussed in the *Abhidhamma* section, *citta* flow very fast, and we do not have control over those initial *cittā*. In extreme cases like sudden rages or sheer greed, we will be unable to “control ourselves” without permanently removing “*apāyagāmi gati*” by getting rid of *micchā diṭṭhi*.
- It is this *anicca saññā* that grows as one attains higher stages of *Nibbāna* (*Sakadāgāmī* and *Anāgāmī*) and peaks at the *Arahant* stage. At the *Arahant* stage, one can see the “*anicca* nature” of ALL *saṅkhāra*, not only *abhisāṅkhāra*. That is what is expressed by “*Sabbe saṅkhāra anicca*,” and in the *Girimānanda sutta*, the Buddha told Ven. Ānanda, “*Ayaṃ vuccati Ānanda, sabba saṅkhāresu anicca saññā*”; see, “[Anicca, Dukkha, Anatta – According to Some Key Suttā](#).”
- Therefore, before worrying about *anicca saññā*, one must remove the **wrong diṭṭhi** by becoming a *Sotāpanna*. See, “[Vipallāsa \(Ditthi, Saññā, Citta\) Affect Saṅkhāra](#).”

14. When one develops the *anicca saññā* via learning Dhamma (listening and reading), the tendency to act immorally, even under extreme pressure, will slowly diminish.

- One would be able to see the corresponding “cooling down” (reduced stress level) when one thinks back after several months (it could be sooner for some people). One will gradually feel the *nirāmisa sukha* and be drawn to Dhamma. One would automatically start spending more time learning Dhamma.
- One does not need to force anything except to make an initial determination to verify the truth of what I have discussed above by reading (and listening) and developing the “*Dhamma vicaya*” *sambojjanga*. Make a habit of critically evaluating relevant posts at this site and from other sources. That is the best and most direct meditation technique for attaining the *Sotāpanna* stage. Buddha Dhamma is about learning the true nature of this world, which WILL automatically lead to the purification of the mind; see “[The Importance of Purifying the Mind](#).”
- The more one purifies one’s mind, the easier it will become to grasp the key Dhamma concepts and cultivate the “*anicca saññā*.” **And developing *anicca saññā* itself leads to the purification of the mind.** That is why learning becomes exponentially fast once getting some traction.

More on the *anicca saññā* (for those who may be *Sotāpannas*) at: [How to Cultivate the Anicca Saññā](#)

7.4.2.1 Udayavaya Ñāṇa

- [Udayavaya \(Udayabbaya\) Ñāṇa – Introduction](#)
- [Nibbatti Lakkhana in Udayavaya Ñāṇa](#)
- [Āhāra \(Food\) in Udayavaya Ñāṇa](#)
- [Udayavaya Ñāṇa – Importance of the Cittaja Kaya](#)

These posts can be better understood if one has a good understanding of the *gandhabba* or *manomaya kāya*: “[Manomaya Kāya](#).”

7.4.2.1 Udayavaya (Udayabbaya) Ñāṇa – Introduction

4.1

February 12, 2016; revised October 23, 2018; re-written November 23, 2020; re-written September 25, 2022

Udayabbaya or *udayavaya ñāṇa* is the knowledge of the mechanism responsible for the arising of rebirth (i.e., suffering) and the way to stop such arising (i.e., end of suffering.)

The *udayavaya ñāṇa* (*ñāṇa* pronounced “*ngāna*”; see the pronunciation guide in “[Pāli Glossary – \(L-Z\)](#)”) is also referred to as the *udayabbaya ñāṇa*.

- The actual Pāli word is *udayabbaya* (I had inadvertently used the Sinhala word *udayavaya*). A description of the *udayabbaya ñāṇa* is in the *Paṭisambhidāmagga Pakaraṇa*: “[WebLink: suttacentral](#).”

[1.1.6 Udayabbayañānaniddesa \(KN Patisambhidāmagga 1.1 Ñānakathā\).](#)” [*pakaraṇa* : [nt.] an occasion; a literary work or exposition.]

- However, it is about the arising (*udaya*) and destruction (*vaya*) of a *saṅkhata*. This is another example of two Pāli words combining to sound differently: *udayabbaya*.

Pronunciation of *udayavaya ñāṇa*:

[WebLink: Listen to Pronunciation: Udayavaya ñāṇa](#)

This series of posts needs to be rewritten. It may take some time since I am busy these days with other things.

- However, it is not urgent to study *udayabbaya ñāṇa* in detail. As I explain below, if one understands “[Paṭicca Samuppāda](#),” one would have the *udayabbaya ñāṇa*.

What is *Udaya* (Arising)?

1. Things in this world do not arise without causes. Births in the 31 realms occur due to six causes, which reduces to three root causes *lobha*, *dosa*, and *moha*. That is because the mundane versions of *alobha*, *adosa*, and *amoha* that give rise to births in the “good realms” above the four lowest realms are milder versions of *lobha*, *dosa*, and *moha*. See “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

- The “milder versions” of *lobha*, *dosa*, and *moha* can be removed only by comprehending the teachings of the Buddha embedded in “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).”
- The mechanism of the arising of any *saṅkhata* in this world is systematically described by “[Paṭicca Samuppāda](#).” Upon his Enlightenment, this was the first part of ultimate knowledge gained by our Bodhisatta to become a Buddha: “[WebLink: suttacentral: Pathama Bodhi Sutta \(KN Ud 1.1\)](#).”
- **This forward (or *anuloma*) *Paṭicca Samuppāda* describes the “*udaya*” part of the *udayabbaya ñāṇa*.**

One Meaning of “*Vaya*” – Destruction

2. Anything that comes into existence in this world WILL be destroyed, without exception. That is one meaning of “*vaya*.”

- For example, any *saṅkhata* that comes into existence will exist for a certain duration (during which it will undergo unexpected changes) and then cease to exist. See, for example, “[WebLink: suttacentral: Ānanda Sutta \(SN 22.37\)](#).”
- That is one meaning of “*vaya*.” But that is not the meaning implied in the *udayabbaya ñāṇa*.

Second Meaning of “*Vaya*” – “Stopping of Arising” or Permanent Destruction

3. The second meaning of “permanent destruction” achieved via eliminating all root causes is implied in the *udayabbaya ñāṇa*.

- A human being dies within about 100 years. **That “death of a person” is the previous meaning of *vaya* for a human.**
- However, that “lifestream” does not end at the death of the physical body. If that human *gandhabba* has more lifetime left, it will get into a suitable womb and give rise to another human body.
- Even when that human *gandhabba* dies, that lifestream will just “switch over” to another existence, such as *Deva* or animal.

4. A lifestream will come to an end ONLY at the *Parinibbāna* of an *Arahant*, i.e., when the rebirth process comes to an end. That is the meaning of *vaya* (complete and permanent stopping) in *udayabbaya ñāṇa*.

- That is achieved by eliminating *avijjā* (ignorance of the Four Noble Truths), i.e., “*avijjā nirodhā saṅkhāra nirodho*” leads to “*saṅkhāra nirodhā viññāṇa nirodho*,” etc. ending in “*bhava nirodhā jāti nirodho*” and, thus, to the end of suffering: “*Evametassa kevalassa dukkhakkhandhassa nirodho hoti’ti*.”
- That is the reverse of the *Paṭicca Samuppāda* or the *paṭiloma Paṭicca Samuppāda*, the second part of the *udayabbaya ñāṇa* gleaned by the Buddha: “[WebLink: suttacentral: Dutiya Bodhi Sutta \(KN Ud 1.2\)](#).”

Udayabbaya Ñāṇa – Fifty Types

5. The *Paṭisambhidāmagga Pakaraṇa* analyzes the *udayabbaya ñāṇa* by describing 25 factors that lead to “*udaya*” of the five aggregates and 25 factors leading to their “*vaya*”: “[WebLink: suttacentral: 1.1.6 Udayabbayañānaniddesa \(KN Paṭisambhidāmagga 1.1 Ñānakathā\)](#).”

- Each of the five aggregates arises via *avijjā*, *taṇhā*, *kamma*, *āhāra*, and *nibbatti lakkhaṇa*. The last refers to the arising of a physical body (for *rūpa*) according to *kammic* energy.
- Each of the five aggregates ceases to arise with the cessation of *avijjā*, *taṇhā*, *kamma*, *āhāra*, and *vipariṇāma lakkhaṇa*. The last is the natural death of a physical body in the case of *rūpa*. That happens at *Parinibbāna* of an *Arahant*.
- That is the basic idea of the *udayavaya* or *udayabbaya ñāṇa*.

7.4.2.1 Nibbatti Lakkhana in Udayavaya Ñāṇa 4.2

February 26, 2016

1. In the previous post, we discussed the first 25 factors that encompass what is involved in the “*udaya*” stage of *udayavaya*: “[Udayavaya Ñāṇa – Introduction](#).” Each of the five aggregates has five factors associated with it basically leading to its formation; thus there are 25 factors that give rise to **each person’s world**.

- The five aggregates or the *pañcakkhandha* is much more complex than most realize. Please read the posts on *pañcakkhandha* to familiarize with it if you really want to grasp the *udayavaya ñāṇa*: “[The Five Aggregates \(Pañcakkhandha\)](#).”
- Also note that a given *saṅkhata* (*sankata* in Sinhala) is a tiny fraction of *pañcakkhandha*. We have discussed the five stages of a *saṅkhata* (*sankata* in Sinhala), and it is related to *udayavaya ñāṇa*. Buddha Dhamma is so deep, all these different descriptions are well-connected at some level.
- Do not worry if all this seems to be overwhelming (of course some people will be able to see the connections). It will make sense with time. Just keep reading posts that you have already read. They will make more sense each time you go back and read, especially after reading other relevant posts.

2. It is important to grasp the fact that anything that we experience, we experience only for a fraction of a second. Then it is gone to the “past pile” (*atita*; pronounced “atheetha”) of the five aggregates or piles.

- Anything that we are only imagining or hoping to experience has not yet materialized; those are in the “future pile” (*anāgata*; pronounced “anāgatha”) of the five aggregates.
- Only a negligibly small fraction is being experienced at a given moment: the “present pile” (*paccuppanna*; pronounced “pachchuppanna”); see, “[Five Aggregates – Introduction](#).”

3. All these things arise as a *saṅkhata* (*sankata* in Sinhala), whether it is material (*rūpa*) or mental (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*). A given *saṅkhata* (*sankata* in Sinhala) itself (not the experience) may exist for

brief moment, or some may last a long time (especially those belonging to *rūpa* aggregate). But even then parts of it are continually being “passed on” to the past.

- Think about a human being X. He/she starts with a single cell and grows by the day, becomes a baby, a child, a young person, an old person, and then is perished. So, when another person Y, is watching X grow, the “*rūpa khandha*” of Y continuously grew, all the while making the “past *rūpa khandha*” bigger each moment. When X is observing himself, that experience goes to his “*rūpa khandha*.”
- At a given time, we can see only a momentary “snapshot” of a *rūpa khandha*. When X dies, all those stages –moment by moment — had gone to the past, and thus now belong to the “past *rūpa khandha*” of X and Y. Note that they are different: each one’s experience of X is different.
- Now we can see why each person’s *pañcakkhandha* is unique to that person.

4. Now we will analyze why all five aggregates have their origin in *avijjā*, *taṇhā*, and *kamma*: Because we have the wrong perception (*nicca saññā*) that we can eventually reach happiness by craving for things in this world (*avijjā*), we get attached to somethings or hate other things (*taṇhā*), and then act accordingly (*kamma*).

- After one attains *parinibbana* (i.e., when an *Arahant* dies), there is no world to experience. No more *pañcakkhandha*.

5. The other two factors of *āhāra* and *nibbatti lakkhana* describe the “progression” of a *pañcakkhandha* that have the origins in *avijjā*, *taṇhā*, and *kamma*.

- If it is a material thing (*rūpa*) it needs *āhāra* (food) to grow; they can be food that living beings eat or nutrients that plants need.
- If it is a mental thing (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*), it needs “mental food”: *phassa* (contact), *mano sañcetanā*, and *viññāṇa āhāra*. We will discuss these later.

6. Any one of those five aggregates needs a “blueprint” or a set mechanism to arise, grow, mature, decay, and eventually cease to exist. This is what the fifth factor, *nibbatti lakkhana*, is about.

- This “blueprint” is made according to those three causes: it is a complex plan which takes into account many aspects that are formed by the level of *avijjā* (ignorance), kind of *taṇhā* (greed, hate), and *kamma* (kind of acts that were done with body, speech, and mind).
- Those complex factors give rise to *nibbatti lakkhana*, “blueprint” for any one of the five aggregates to rise. It can be called “production characteristics” of that particular *saṅkhata* (*sankata* in Sinhala) belonging to one of the five aggregates.
- As we learn more, we will see that all five factors actually become causes, and are inter-related.

7. This is easier to see this with a human (or an animal). When a living being gets a human *bhava*, then based on a specific *kamma vipāka* that came to focus at the time of death in the previous *bhava*, a blueprint for the human *bhava* is automatically generated by *kammic* energy.

- That blueprint is the *manomaya kāya* or the *gandhabba* that we have discussed many times; see, the posts under the section “[Manomaya Kāya](#).”
- The arising of that human starting from a single cell in mother’s womb happens according to the “blueprint” in that *manomaya kāya*: eventual height, eye color, skin color, etc were determined when a suitable womb was automatically selected according to the “*gathi*” of that being. That “selection process” — which happens automatically and not decided by any superior being — had chosen the matching parents for the *gandhabba*.
- That was the role played by the *nibbatti lakkhana* in this particular case.

8. Thus the particular *bhava* is determined by the particular action (*kamma*): if that action was suitable for a dog *bhava*, then one would get a “dog *bhava*.”

- But other characteristics of that dog are determined by the overall “*gathi*” of that being that it had acquired through uncountable previous births.
- Thus *nibbatti lakkhana* is a complex entity that takes into account numerous things, but two are prominent: the specific *kamma* and overall *gathi*.

9. For example two different beings could get the same “dog *bhava*.” But no two dogs will look and behave alike. Some are vicious and some are loving. Some are big and some are small. The possible varieties are basically infinite. Even two “twin dogs” that look exactly the same will have at least some behaviour differences when they grow. Same thing applies to two humans.

- Thus *nibbatti lakkhana* is a complex mold of multiple factors. But only a Buddha can see why certain features are in a given being. Even a spot on dog is said to be due to some reason.
- Even though the “*bhava*” is determined by a specific strong *kamma* (called a *janaka kamma*), the actual body will reflect numerous *kamma vipāka* from numerous lives in the past.
- But as we have discussed elsewhere, what kinds of *kamma vipāka* can bring fruits will depend to a large extent on having suitable conditions available. If one acts foolishly that will allow some bad *kamma vipāka* from the past to bear fruit. In the same way, by acting with mindfulness one can avoid such bad outcomes and even bring about good outcomes due to past good *kamma vipāka*.
- There are several posts that discuss the above important fact. For example, “[What is Kamma? – Is Everything Determined by Kamma?](#)” and “[Anantara and Samanantara Paccayā](#).”

10. Therefore, it is important to realize that it is *manomaya kāya* does not determine one’s future rigidly; some of the “production characteristics” can change. It is not like making a robot in a factory according to a set blueprint.

- It is easy to see that one’s body structure can change according to one’s lifestyle. If one becomes careless and start eating indiscriminately, one will become obese. Even one’s character can change by one’s motivation and due to external influences.
- Thus *nibbatti lakkhana* are not deterministically set. The overall *gathi* can change and the *manomaya kāya* and the physical body in turn can change.

11. The main reason for this flexibility is that the *manomaya kāya* has three “components”: *kammaja kāya*, *cittaja kāya*, and *utuja kāya*; see previous posts on *manomaya kāya*.

- The *kammaja kāya* is the one that is really pre-set. It had taken into account the reasons (*kamma vipāka*) that led to the particular *bhava*.
- The critical component that is under OUR CONTROL is the *cittaja kāya*. This is basically how we think (that leads to our speech and bodily actions). And how we think depends on our level of ignorance (*avijjā*).
- The third component is the *utuja kāya*, which is basically the fine body of the *gandhabba*. It is being created and changed CONTINUOUSLY due to both the *kammaja kāya* and *cittaja kāya*. The fine matter based on *suddhatthaka* are being created due to *kammaja kāya* and *cittaja kāya*; see, “[The Origin of Matter – Suddhatthaka](#).”

12. Thus the evolvement of a human being is a complex process. But one could get a good basic understanding by comprehending the above basic structure. We will go into more details in the future, but let us discuss a few more important aspects.

- Now we can see that the physical body is just a “shell.” There is *gandhabba* inside that physical body and controlling it; see, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”

13. Thus, these physical bodies that we value so much are really lifeless shells. The essence — *gandhabba* — is hidden inside that physical body.

- The *utuja kāya* of the *gandhabba* is the one that is spread over the whole physical body gives it a “life.” It is a fine grid that overlaps our nervous system, and that is how we feel body sensations.
- Under some extreme stresses, the *gandhabba* can get out of the physical body. This is what is known as the out-of-body experience (OBE); see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).” When that happens the physical body is lifeless, and doctors have declared many heart patients undergoing operations to be dead for several minutes only to find out later that the patient is alive (*gandhabba* had returned to the body).

14. The critical point for our present discussion is the fact that once born with a human body, the human *gandhabba* can determine its own *nibbatti lakkhana* to some extent by wisely using the *cittaja kaya*.

- It is this *cittaja kaya* that ultimately makes it possible for a human to attain *Nibbāna*.
- One can change one’s *gathi* (habits/character) by comprehending first moral versus immoral, and then comprehending the *anicca* nature of this world.
- Most people do not realize the importance of the *cittaja kaya*. This is in essence why a Buddha is needed to reveal the true nature of this world, and to teach how to use the *cittaja kaya* (i.e., the way one thinks, and therefore speaks and acts): First to stay away from immoral behavior to cleanse the mind to some extent, and then to comprehend the *anicca* nature.

15. The *nibbatti lakkhana* for any *saṅkhata* (*sankata* in Sinhala) associated with any of the five aggregates work similarly. Let us consider a certain *viññāṇa* that we experience when seeing a person X.

- That *viññāṇa* depends on who is looking at X. If it is a loving parent for Y, then Y will generate a “loving *viññāṇa*” upon seeing X. That *viññāṇa* will arise, stay there for a certain time, and fade away as the mind is directed to something else. But when that *viññāṇa* arises, it arises with some *nibbatti lakkhana* associated with one’s own past experiences with X. An enemy of X (say, Z) could generate a “hateful *viññāṇa*.”

16. It is easy to see that other three aggregates in the above example will also arise accordingly.

- Y will generate happy feelings (*vedanā*), will recognize (*saññā*) X as a parent, and may generate some kind of action or speech via *saṅkhāra*. On the other hand, Z will generate an entirely different set.
- Thus the four mental aggregates are related to each other.

17. In Buddha Dhamma everything that we learn about is connected to each other at some level. It is the whole fabric of nature. Each and every piece of information is part of a complex puzzle. When one begins to see how it all fits together, one’s mind becomes joyful, and provides incentive and desire to learn more about the true nature of this complex world.

Next in the series, “[Āhāra \(Food\) in Udayavaya Ñāṇa](#).”

7.4.2.1 4.3 **Āhāra (Food) in Udayavaya Ñāṇa**

March 19, 2016; revised October 19, 2023; March 2, 2024

Āhāra in Buddhism (Buddha Dhamma) refers to “mental food” and not “physical food.”

1. The first part of the *Udayavaya Ñāṇa* involves the causes for the arising of *saṅkhata* (and hence, the arising of *pañcupādānakkhandha*). Out of the five main factors (*avijjā*, *taṇhā*, *kamma*, *āhāra*, and *nibbatti lakkhaṇa*), we discussed the *nibbatti lakkhaṇa* in the previous post of the series.

- Many posts on the site discuss the first three factors, so we will now discuss the remaining factor, *āhāra* (food), which is both a cause and a condition for the arising of *pañcupādānakkhandha*.
- Note that “*kāya*” can mean several different things, generally “a collection of entities.” Here, it refers to the mental body (*gandhabba*) and the physical body (*karaja kāya*.)

2. When we think of *āhāra* (food in both Pāli and Sinhala), we automatically think about the food we consume to stay alive. However, it is clear from the previous posts that a physical body is just a shell “controlled” by a *gandhabba*. There are many other posts on *gandhabba* in the “[Gandhabba \(Manomaya Kāya\)](#)” section. Here is a summary of some concepts discussed there:

- The physical body (*karaja kāya*) is what usually associate with perceiving a “me.” But we have a “*manomaya kāya*” (or “*gandhabba*,”) which is more important.
- In a way, the physical body is just a shell that we use for about 100 years or so and discard at death; the *gandhabba* leaves that dead body and waits for a suitable womb to make another physical body, if there is *kammic* energy left in the *human bhava*.
- The foods for the **origin (not the maintenance) of the physical body** are called *kabaḷikāra āhāra*. **There are cravings for “sensual pleasures” or *kāma rāga***. Since such physical bodies arise only in *kāma loka*, once one loses craving for *kabaḷikāra āhāra*, rebirths in *kāma loka* will be stopped as in the case of an *Anāgāmi*. [*kabaḷikāra* : (1) Things that need to be used for work (things like eating, drinking, etc.). (2) Work done (oil, resin, fertility). Do the job. made solid. *kabaḷikārāhāra* : Kavalikārāhāra [Kavali Kara + Nutrition] The food that needs to be absorbed by the work. *kabaḷa* : m. n. [Sk. kavala, BSk. kavaḍa] 飯塊, 飯球; rice cubes, rice balls.]
- Other three “mental foods” (*phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*) can give rise to all births.

3. A given *kammaja kāya* was created at the *cuti-paṭisandhi* moment by a powerful previous *kamma*, and its energy gets depleted with time. For example, if a particular *human bhava* came into existence with enough *kammic* energy to support human life for 1000 years, that energy will be slowly spent over 1000 years. In other words, *kammaja kāya* does not need additional energy, i.e., *āhāra*.

- The “[WebLink: suttacentral: Kāya Sutta \(SN 46.2\)](#)” explains that all types of “*kāya*” in all realms arise due to defilements.
- Therefore, all four types of *āhāra* lead to rebirths in *kāma loka*.
- Rebirths in all other realms (*rūpāvacara* and *arūpāvacara* *Brahma* realms) are based on *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

4. Craving *kabaḷikāra āhāra* means one is hoping for rebirth in the *kāma loka* to enjoy them; see “[How Perceived Pleasures \(Assāda\) lead to Dukkha.](#)”

- “*Kāma loka*” is where taste, smell, and touch (including sex) are available. Any desire to enjoy sights and sounds associated with those is included, too. Thus, *kabaḷikāra āhāra* means craving those via all five physical senses (*pañca kāma*.) An *Anāgāmi* has removed them.
- The stronger the craving for *kabaḷikāra āhāra*, the harder it is to “escape from the *kāma lokas*.”
- This is a good example of how (*abhi*)*saṅkhāra* or strong cravings/hopes/desires lead to corresponding *bhava* and, thus, corresponding births (*jāti*).
- In *Paṭicca samuppāda*, “*avijjā paccayā saṅkhāra*” is followed by “*saṅkhāra paccayā viññāṇa*,” and leads to “*upādāna paccayā bhava*” and “*bhava paccayā jāti*.” Thus, generating (*abhi*)*saṅkhāra* for *kabaḷikāra āhāra* leads to rebirths in the *kāma loka*, but most times in unexpected ways, as we discuss below in #6.

5. One NEEDS to consume physical food to provide one’s body with the nutrients it needs to live a healthy life. However, if one craves tasty foods, that generates *kabaḷikāra āhāra* and can become a CAUSE for the arising (*udaya*) of future births in the *kāma loka*.

- This is why it is NOT the actual consumption of tasty foods that contributes to making “*kāma bhava*.” It is the greed for tasty foods (*kāma assāda*); see the section on “[Assāda, Ādīnava, Nissarana – Introduction.](#)”

- The level of greed involved can manifest as “*gati*,” leading to various rebirths.
6. Excessive greed for food matches the “*gati*” of *pretha* beings. Thus, when one cultivates such greedy (*abhi*)*saṅkhāra*, it leads to corresponding “*pretha bhava*” and thus “*pretha jātī*” in the future.
- When encountering delicious food, some people lose any sense of decency. The greediness shows, and when eating such a meal, some display “animal-like” behavior, spilling food and getting it all over their face. That is a display of “greedy animal-like” *saṅkhāra*. When they cultivate such *saṅkhāra*, the corresponding birth could be a pig.
 - Some people do not like to share such food and like to keep others away from enjoying such meals. That could cultivate *saṅkhāra* of a “vicious dog.” We see such dogs all the time; they growl when another dog comes even close to their food.
7. Once one gets the basic idea, it is easy to see various kinds of *pretha* and animal *saṅkhāra* can be cultivated even without realizing it. They can lead to future births corresponding to such “*gati*.”
- And the cultivation of such extreme *gati* is a consequence of not knowing or not comprehending Buddha Dhamma, specifically *Paṭicca samuppāda* (“*paṭi icca*” leading to “*sama uppāda*”); see, “[Paṭicca samuppāda – “Pati+ichcha”+” Sama+uppāda.](#)”
 - And such *saṅkhāra* CANNOT be suppressed by sheer willpower alone. One needs to learn Dhamma and realize that they DO LEAD to bad consequences. Again, see the section on “[Assāda, Ādīnava, Nissarana – Introduction.](#)”
8. There are “good births” in the *kāma loka*: the human and *Deva* realms. *Bhava* (and birth) in those realms are also according to one’s (*abhi*)*saṅkhāra*, generated according to one’s dominant *gati*.
- Those who cultivate the human and *deva saṅkhāra* like to enjoy sensory pleasures but are not excessively greedy. They don’t have the mentality of “may all good things come to me, AND not to others.” They are content with what they get and willingly share the excess with others.
 - One is not released from the *kāma loka* until one’s cravings for sense pleasures completely go away when one comprehends not only the futility of such sensory pleasures but also their dangerous consequences.
9. At an even deeper level, the tendency to generate such extreme greed disappears AUTOMATICALLY when one starts comprehending the “*anicca* nature.” It is not possible to achieve and maintain pleasurable worldly things as one desires.
- And this change in the mindset and corresponding personal behavior may not reverse in a short time. But as one learns Dhamma, one can see the change over time: Sometimes in a few weeks or even several months.
 - The Buddha compared this “gradual transition” to the growth of a tree or a plant. One cannot see the change in the growth of a plant day by day; there is no point in checking it every day to see whether one can see the growth. But if one takes care of the plant by providing nutrients and keeping the weeds away, one can see the growth over a few weeks or months. And then, one day, we can reap the benefits of all that work when the plant blossoms and provides the flowers/fruits.
10. Therefore, the key is to LEARN Dhamma and comprehend it by contemplating it, which is MEDITATION. **But it is critical to learn the correct Dhamma.**
- An excellent example of the wrong way to meditate is what many people do with the *patikūla manasikāra bhāvanā*. Many translate “*patikūla*” as “*pilikuḷ*” in Sinhala, which means “to be rejected because it is repulsive”. They meditate on contemplating the repulsiveness of the body (sweat, urine, and feces generated by the body) and also the fact that once one chews on even the most delicious food, it becomes “vomit.”

- But the Buddha did not advise that. Just as we should not desire extreme sense pleasures, we should not be repulsed by the things mentioned in the above paragraph. They both generate *taṇhā*, in the first instant by attachment (craving) and in the second by aversion (*paṭigha*). The neutral mindset (*upekkhā*) comes from understanding the true nature of things.

11. Now we can see that the connection of *kabaḷīkāra āhāra* in the *udayavaya ñāṇa* has two facets:

- One plays a role in caring for the physical body inherited due to past causes. Not being mindful of what we eat can lead to harmful consequences for the body we already have. If we are mindful, we can make that body work optimally to achieve our mundane and transcendental goals. And, of course, if the physical body does not get enough physical food, it will die.
- The other is to be aware of the role *kabaḷīkāra āhāra* plays in generating physical bodies for us in future births via generating (*abhi*)*saṅkhāra* related to pleasurable foods. One can permanently stop generating future physical bodies (*nirodha* or “nir” + “udā”) by getting rid of the “*upādāna*” or craving for *kabaḷīkāra āhāra*.
- One can become an *Anāgāmi* (i.e., stop rebirths in the *kāma loka*) by comprehending the true nature of *kabaḷīkāra āhāra*. Then, one loses the craving for sensory pleasures in the *kāma loka*. But such a mindset is unfathomable for an average human who only sees the immediate sense of satisfaction. Furthermore, such a mindset CANNOT be achieved by sheer willpower; it has to be through understanding the *anicca* nature of *kāma loka*.

Next in the series, “[Udayavaya Ñāṇa – Importance of the Cittaja Kāya.](#)”

7.4.2.1 4.3.1 **Āhāra (Food) in Udayavaya Ñāṇa**

March 19, 2016; revised October 19, 2023; March 2, 2024

Āhāra in Buddhism (Buddha Dhamma) refers to “mental food” and not “physical food.”

1. The first part of the *Udayavaya Ñāṇa* involves the causes for the arising of *saṅkhata* (and hence, the arising of *pañcupādānakkhandha*). Out of the five main factors (*avijjā*, *taṇhā*, *kamma*, *āhāra*, and *nibbatti lakkhaṇa*), we discussed the *nibbatti lakkhaṇa* in the previous post of the series.

- Many posts on the site discuss the first three factors, so we will now discuss the remaining factor, *āhāra* (food), which is both a cause and a condition for the arising of *pañcupādānakkhandha*.
- Note that “*kāya*” can mean several different things, generally “a collection of entities.” Here, it refers to the mental body (*gandhabba*) and the physical body (*karaja kāya*.)

2. When we think of *āhāra* (food in both Pāli and Sinhala), we automatically think about the food we consume to stay alive. However, it is clear from the previous posts that a physical body is just a shell “controlled” by a *gandhabba*. There are many other posts on *gandhabba* in the “[Gandhabba \(Manomaya Kāya\)](#)” section. Here is a summary of some concepts discussed there:

- The physical body (*karaja kāya*) is what usually associate with perceiving a “me.” But we have a “*manomaya kāya*” (or “*gandhabba*,”) which is more important.
- In a way, the physical body is just a shell that we use for about 100 years or so and discard at death; the *gandhabba* leaves that dead body and waits for a suitable womb to make another physical body, if there is *kammic* energy left in the *human bhava*.
- The foods for the **origin (not the maintenance) of the physical body** are called *kabaḷīkāra āhāra*. **There are cravings for “sensual pleasures” or *kāma rāga*.** Since such physical bodies arise only in *kāma loka*, once one loses craving for *kabaḷīkāra āhāra*, rebirths in *kāma loka* will be stopped as in the case of an *Anāgāmi*. [*kabaḷīkāra* : (1) Things that need to be used for work (things like eating, drinking, etc.). (2) Work done (oil, resin, fertility). Do the job. made solid. *kabaḷīkārahāra* : Kavalīkārahāra [Kavali Kara

+ Nutrition] The food that needs to be absorbed by the work. **kabaḷa** : m. n. [Sk. kavala, BSk. kavaḍa] 飯塊, 飯球; rice cubes, rice balls.]

- Other three “mental foods” (*phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*) can give rise to all births.

3. A given *kammaja kāya* was created at the *cuti-paṭisandhi* moment by a powerful previous *kamma*, and its energy gets depleted with time. For example, if a particular *human bhava* came into existence with enough *kammic* energy to support human life for 1000 years, that energy will be slowly spent over 1000 years. In other words, *kammaja kāya* does not need additional energy, i.e., *āhāra*.

- In a way, all three types of mental foods are consumed by the *cittaja kāya*. And some of the energy from the *kammaja* and *cittaja kāya* are converted to *suddhaṭṭhaka* (matter), and that is what makes the fine body (*utuja kāya*) of the *gandhabba*, which is too fine for us to see.
- As I mentioned in the previous post in this section, “[Nibbatti Lakkhana in Udayavaya Ṇāna](#),” the critical component that is under OUR CONTROL is the *cittaja kāya*. We can overcome our “loosely preset destiny” embedded in the *kammaja kāya* by cultivating our *cittaja kāya*, or basically our thoughts and thereby our behavior (*gati*). This is what makes it possible to attain *Nibbāna*!

4. Let us first discuss the *kabaḷikāra āhāra*. There are two relevant meanings for this name. The first meaning is associated with what this type of *āhāra* does: to energize the physical body. Here “*kabaḷikāra*” comes from “*kayata bala dena*” in Pāli or Sinhala where “*kāya*” is body, “*bala*” is energy or power, and “*dena*” means provide.

- Therefore, *kabaḷikāra āhāra* here means the food we eat to make our bodies grow and keep energized. Without food, a physical body that starts in the womb of the mother cannot grow to a baby and then, once it comes out cannot grow into be an adult. Without *kabaḷikāra āhāra* that particular *saṅkhata* cannot survive, and thus is an essential factor contributing to part of the *pañcupādānakkhandha*.
- This kind of *kabaḷikāra āhāra* is essential for the survival of humans and animals (and also *devas*). *Devas* consume just one kind of *kabaḷikāra āhāra* called “*amurtha*”; it is a drink that they consume, which leaves no residuals. Thus, they don’t need to worry about sweating, urinating, or defecating.
- Thus *kabaḷikāra āhāra* are needed only in *kāma loka*. As we will see below, when one loses craving for *kabaḷikāra āhāra*, one will never be born again in the *kāma loka*, i.e., one becomes an *Anāgāmī*.
- There are no solid bodies (*karaja kāya*) in either *rūpa loka* or *arūpa loka*. In *rūpa loka* there is only the “*thrija kāya*” or the three mental bodies of *kammaja kāya*, *cittaja kāya*, and *utuja kāya*. Thus in the *rūpa loka* beings are essentially *gandhabbas* but that term is normally reserved for humans and animals when they are in the *para loka* waiting for a womb; see, “[Hidden World of the Gandhabba: Netherworld \(Paraloka\)](#).”
- In the *arūpa loka*, there is no *utuja kāya* either. Except for the *hadaya vatthu*, there is no *rūpa* associated with an *arūpa brahma*.
- It is not essential to know all these details, but these details are needed to complete the “big picture”, especially for those who are interested in finer details.

5. The second meaning of *kabaḷikāra āhāra* has a deeper meaning; here it is a CAUSE for the arising of FUTURE *saṅkhata*. Craving *kabaḷikāra āhāra* means one is hoping for rebirth in the *kāma loka* to enjoy them; see, “[How Perceived Pleasures \(Assāda\) lead to Dukkha](#).”

- Thus, the stronger the craving is, harder it is to “escape from the *kāma lokas*.”
- This is a good example of how (*abhi*)*saṅkhāra* or strong cravings/hopes/desires lead to corresponding *bhava* and thus corresponding births (*jāti*).
- In *Paṭicca Samuppāda*, “*avijjā paccayā saṅkhāra*” is followed by “*saṅkhāra paccayā viññāṇa*,” and leads to “*upādāna paccayā bhava*” and “*bhava paccayā jāti*.” Thus generating (*abhi*)*saṅkhāra* for

kabaḷīkāra āhāra leads to rebirths in the *kāma loka*, but most times in unexpected ways, as we discuss below.

6. One NEEDS to consume *kabaḷīkāra āhāra* to provide one's body with the nutrients it needs to live a healthy life. However, if one craves tasty foods in excess, *kabaḷīkāra āhāra* can become a CAUSE to for the arising (*udaya*) of future births in the *kāma loka*.

- This is why it is NOT the actual consumption of tasty foods that contributes to making “*kāma bhava*.” It is the excess greed for tasty foods (*kāma assāda*); see the section on , “[Assāda, Ādīnava, Nissarana – Introduction](#).”
- This second type of “*pada nirutti*” or the “origin of the phrase” *kabaḷīkāra āhāra* comes from “*kāya bali karana*” which means “leading to the distorted body.” Here the word “*bali*” or “distort” applies because **the body that one acquires in a future life** due to such greedy *saṅkhāra* could be much different than expected. **This is the deeper meaning of *kabaḷīkāra āhāra* in the *udayavaya ṇāṇa*.**

7. Such excessive greed for food matches the “*gati*” of *pretha* beings. Thus when one cultivates such greedy (*abhi*)*saṅkhāra*, it leads to corresponding “*pretha bhava*” and thus “*pretha jathī*” in the future.

- When encountering delicious food, some people lose any sense of decency. The greediness shows, and when eating such a meal some display “animal-like” behavior, spilling food and getting the food all over their face. That is a display of “greedy animal-like” *saṅkhāra*. When they cultivate such *saṅkhāra*, the corresponding birth could be that of a pig.
- And then some do not like to share such food and like to keep others away from enjoying such meals. That could cultivate *saṅkhāra* of a “vicious dog.” We see such dogs all the time; they growl when another dog comes even close to their food.

8. Once one gets the basic idea, it is easy to see various kinds of *pretha* and animal *saṅkhāra* can be cultivated even without realizing it and can lead to future births corresponding to such “*gati*.”

- And the cultivation of such extreme *gati* is a consequence of not knowing or not comprehending Buddha Dhamma, specifically *Paṭicca Samuppāda* (“*pati ichcha*” leading to “*sama uppāda*”); see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”
- And such *saṅkhāra* CANNOT be suppressed by sheer willpower alone. One needs to learn Dhamma and realize that they DO LEAD to bad consequences. Again, see the section on “[Assāda, Ādīnava, Nissarana – Introduction](#).”

9. There are “good births” in the *kāma loka* too: the human realms and the *deva* realm. *Bhava* (and birth) in those realms also are according to one's (*abhi*)*saṅkhāra*, which of course are generated according to one's dominant *gati*.

- Those who cultivate the human and *deva saṅkhāra* like to enjoy sense pleasures, but they are not excessively greedy. They don't have the mentality of “may all good things come to me, AND not to others.” They are content with what they get and willingly share the excess with others.
- One is not released from the *kāma loka* until one's cravings for sense pleasures completely go away when one comprehends not only the futility of such sense pleasures but also the possible dangers.

10. At an even deeper level, the tendency to generate such extreme greed goes away AUTOMATICALLY when one starts comprehending the “*anicca* nature.” It is not possible to achieve and maintain pleasurable worldly things (including food or beautiful bodies that result from eating such foods) as one desires.

- And this change in the mindset and the change in corresponding personal behavior may not reverse in a short time. But as one learns Dhamma, one will be able to see the change over time: Sometimes in a few weeks or even several months.
- The Buddha compared this “gradual transition” to the growth of a tree or a plant. One cannot see the change in the growth of a plant day by day; there is no point in checking it every day to see whether one

can see the growth. But if one takes care of the plant by providing it with nutrients and keeping the weeds away, one will be able to see the growth over a few weeks or months. And then, one day, we can reap the benefits of all that work when the plant blossoms and provides the flowers/fruits.

11. Therefore, the key is to LEARN Dhamma and also to comprehend it by contemplating it, which is MEDITATION. **But it is critical to learn the correct Dhamma.**

- A good example of the wrong way to meditate is what many people are doing with the *paṭikūla manasikāra bhāvanā*. Many translate “*patikūla*” as “*pilikul*” in Sinhala, which means “to be rejected because it is repulsive.” They meditate on contemplating the repulsiveness of the body (sweat, urine, and feces generated by the body) and also the fact that once one chews on even the most delicious food, it becomes “vomit.”
- But the Buddha did not advise that. Just as we should not desire extreme sense pleasures, we also should not be repulsed by the things that we mentioned in the above paragraph. They both generate *taṇhā*, in the first instant by attachment (craving) and in the second by aversion (*paṭigha*). **The neutral mindset (*upekkhā*) comes from understanding the true nature of things.**

12. Now we can see that the connection of *kabaḷīkāra āhāra* in the *udayavaya ñāṇa* has two facets:

- One plays a role in taking care of the physical body that we have inherited due to past causes. If we are not mindful of what we eat, it can lead to bad consequences for the body that we already have. If we are mindful, we can make that body work optimally to achieving our goals, both mundane and transcendental. And of course, if the physical body does not get enough *kabaḷīkāra āhāra*, it will die.
- The other is to be aware of the role *kabaḷīkāra āhāra* plays in generating physical bodies for us in future births via generating (*abhi*)*saṅkhāra* related to pleasurable foods. One can permanently stop generating future physical bodies (*nirodha* or “*nir*” + “*udā*”) by getting rid of the “*upādāna*” or craving for *kabaḷīkāra āhāra*.
- One can become an *Anāgāmi* (i.e., stop rebirths in the *kāma loka*) by comprehending the true nature of *kabaḷīkāra āhāra*. Then one loses the craving for any sensory pleasures in the *kāma loka*. But such a mindset is unfathomable for a normal human who only sees the immediate sense of satisfaction. Furthermore, such a mindset CANNOT be achieved by sheer willpower; it has to be through understanding the *anicca* nature of *kāma loka*.

Next in the series, “[Udayavaya Ñāṇa – Importance of the Cittaja Kāya.](#)”

7.4.2.1 Udayavaya Ñāṇa – Importance of the Cittaja Kāya 4.4

July 22, 2016; December 1, 2017; December 14, 2019

Three Components of Mental Body (*Manomaya Kāya*)

1. In previous posts in this series, we discussed *kabalīkāra āhāra* for the physical body and three types of *āhāra* for the “mental body” (or *manomaya kāya* or *gandhabba*): *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

- The *manomaya kāya* or the *gandhabba* consists of three components: *kammaja kāya*, *citta kāya*, and *utuja kāya*. The *kammaja kāya* gets its energy at the beginning of that *bhava*, and does not require any external *āhāra*. The *utuja kāya* is sustained continuously via fine *rūpa* produced by *kammaja kāya* and *cittaja kāya*.
- **Therefore, the three types of *āhāra* for the *manomaya kāya* are all consumed by the *cittaja kāya*. This *cittaja kāya* is nothing else but the stream of thoughts that we generate.**
- An aside: Sometimes the *gandhabba* can inhale “aroma” or *gandha* (*kabalīkāra āhāra*) and have a fine (misty) physical body too; **thus the name *gandhabba***, where “*abbha*” means “inhale” or in this

case “absorb.” Such “more solidified” are the ones that people can sometimes see, and even be captured by a camera.

The Big Picture

2. Now we can take a step back and look at the big picture, and it gives a very illuminating view. **This “big picture” could be very helpful in comprehending the *anicca* nature.** Of course, this is not the only way to grasp *anicca* nature.

- The physical body that we value so much and think about as “me” is just a temporary shell. Just like anything material in this world, it grows and peaks and then starts the downhill march ending in decay and eventual death. At the death of physical body, the *gandhabba* that comes out and has to wait for a suitable womb to start building a new body, if the human *bhava* still has more *kammic* energy left; see, for example, [“Bhava and Jāti – States of Existence and Births Therein”](#) and [“Gandhabba – Only in Human and Animal Realms.”](#)
- This is a key factor that contributed to the concept of a “self” (“āthma”) in Hinduism. Hindu *yogis* who cultivated *abhiññā* powers could look back at a finite number of previous lives and could see a *gandhabba* giving rise to repeated rebirths in human form (they likely practiced *jhāna* in those recent previous lives, which made it easier for them to attain *abhiññā* powers in this life).
- **However, they could not see far back enough to see that one could be born an animal or even worse too.**

An Analogy

3. For humans and animals, we can compare the physical body controlled by the *gandhabba* to a car (or any other vehicle) being driven by a person. The body of the vehicle is like our physical body, and the driver is analogous to the *gandhabba*. Without the *gandhabba*, the physical body cannot do anything; it would be a lifeless, i.e., a dead body. It is the *gandhabba* that “operates” the human body; see, [“Ghost in the Machine – Synonym for the Manomaya Kāya?”](#).

- The birth of a *gandhabba*, in turn, is due to the *kammic* energy that was created in a previous life. The *kammaja kāya* represents that energy (which will be slowly depleting with time.) The term *kammaja kāya* comes from “*kamma*” and “*ja*” and “*kāya*.” Here “*ja*” means “birth” or “origin” and “*kāya*” is the body. Thus *kammaja kāya* means the “body that was created due to *kamma*.”
- Similarly, *cittaja kāya* arises due to *citta* (loosely translated as thoughts).
- “*Utu*” means “change” and the *utuja kāya* is that part of the *gandhabba* body which arises by conversion of *kammic* energy and the energy from *citta* (*javana*).

We Have Control Over *Cittaja Kāya*

4. **Now, we can see the critical importance of *citta*.** *Kammaja kāya* itself arises due to previous *kamma*, i.e., by *citta* in a previous life. More specifically, *javana* in such *citta* provided the energy for a new *bhava* which lead to the *kammaja kāya*; see, [“Javana of a Citta – The Root of Mental Power.”](#)

- *Kammaja kāya* is just a result, and it will slowly lose its energy over the human existence. We cannot do anything about (but if one does an *anatarīya kamma* it will be shortened). **Thus it is only the *cittaja kāya* that we have control over. This is critically important. We have finally converged to the essence of a human being.**
- This is why the Buddha said “*Mano pubbangama Dhamma....*” The origin of anything in this world can be traced back to the mind (thoughts).

- Here we see the truth of the above statement for living beings. In the future, it will become clear that ANYTHING in this world has origins in the mind. That is the story in the *Aggañña sutta*. But we have to proceed step-by-step. An introduction at, [“Buddhism and Evolution – Aggañña Sutta \(DN 27\).”](#)

5. **We have the control over our own destiny via our thoughts or *cittaja kāya*. I cannot emphasize enough the critical importance of the *cittaja kāya*.**

- Therefore, we have to pay attention to what kind of *āhāra* (conventionally translated as food, but you can see that is not a good translation) that we provide for our thought stream. But we have control over only those thoughts that we initiate.

Two Types of *Citta* (*Viññāṇa*) and Associated Feelings (*Vedanā*)

6. **There are two types of thoughts. Some *citta* arise due to *kamma vipāka*.** For example, we may get to taste a delicious meal due to a good *kamma vipāka* and while eating it we feel “*jivhā viññāṇa*,” i.e., those come through our sense of taste. These do not have *abhisankhāra*. Also see, [“Moha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa”](#) and [“Vedanā \(Feelings\) Arise in Two Ways.”](#)

- **There is another set of *citta* that we initiate.** For example, based on that tasty meal, we start thinking about coming back to the same restaurant in the future, how to make it at home, etc. These generate *abhisankhāra*. The worst kind is *apuññābhisankhāra*, where we think about ways to get that meal in an immoral way, say, by stealing.
- But if it is just some food that quenches the hunger, we do not generate that type of *citta* subsequent to the *vipāka citta*.
- In another example, we see millions of things in a day (via *vipāka citta*), but generate *abhisankhāra* only in a few.

The Unending Cycle of *Kamma/Vipāka*

7. The Buddha said, “*kammā vipākā vaddanthi, vipākā kamma sambhavo, thasmā punabbhavo hotthi, evan loko pavaththathi.*”

- What that means is: “Because of *kamma vipāka* we experience sense inputs; based on those we initiate new *kamma* (*abhisankhāra*), and those, in turn, will bring *vipāka* in the future; that is how the world evolves (rebirth process continues).”
- **Thus the critical part is where we generate *abhisankhāra*. This is done with *javana citta*.** We will discuss this using *citta vīthi* in the future, but let us try to get some basic understanding of how these *javana citta* can be controlled. There are many posts in the [“Mind and Consciousness”](#) sections on *citta* and *citta vīthi*.

The Key Is to Change Our *Gati*

8. In fact, *javana citta* run too fast to control at that time. Billions of *citta* run in a second. How can we control them? **We cannot control them *in situ*, as they initially arise.**

- ***Javana citta* arise due to our *gati*!** This is the key.
- For example, an *Arahant* is not be tempted by any attractive sense input. He has removed all *āsavas* (cravings) and there is no *anusaya* to bubble up. He/she has “Noble *gati* of an *Arahant*.”
- On the other hand, a *Sotāpanna* may be tempted by that attractive sense input. He has not removed all *āsavas* (cravings); but he/she has removed *gati* suitable for the *apāyā*, so *javana citta* corresponding to highly immoral acts will not arise .
- The *āsava* (or *gati*) are analogous to the dirt in the bottom of a well. If the well water is perturbed, some dirt can come to the surface (*anusaya*). (i.e., if a sense input matching our *gati* comes into play, bad

thoughts automatically come into the mind). This is discussed in the post, “[3. The Second Level – Key to Purify the Mind](#)” in the Meditation section.

- When one attains the *Sotāpanna* stage, the worst types of “gunk” will be removed. The rest will be removed in three more stages (*Sakadāgāmi*, *Anāgāmi*, *Arahant*).

Ānāpānasati/Satipaṭṭhāna – Only Way to Change Gati

9. In a normal human, whether or not immoral *javana citta* will be triggered, will depend on his/her set of *āsavas* (or *gati*). If that particular sensory input is attractive (i.e., matches his/her *āsavas*), then he/she may automatically initiate a highly immoral act to pursue that sense input.

- But the key here is the following. Even if such immoral *javana citta* arise, one can still suppress them **before the actual act is done**, if one has learned *Satipaṭṭhāna* (or *Ānāpāna*.) For extremely immoral acts, like killing another human, most people will be able to control such thoughts even without knowing about *Satipaṭṭhāna*. **But the more one learns Dhamma, and the more one understands the consequences, one will be able to have firm control even over minor offenses.**
- Furthermore, the more one controls one's actions this way, the more one's *gati* will change for the better. **This is another key!** This has been discussed in detail in, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).” There are several posts under that topic.

Irreversible Change of Gati with Understanding of Tilakkhaṇa

10. A **large chunk** of immoral *gati* goes away just via comprehending *anicca*, *dukkha*, *anatta* at the *Sotāpanna* stage. In fact, those *gati* that are suitable to be born in the *apāyā* will be removed. **This is called “*dassanena pahāthabbā*,” i.e., “removal via correct vision.”**

- Thus highly immoral *javana citta* do not arise in a *Sotāpanna*. A well that has been cleaned of the visible dirt at the bottom can not be muddied by perturbing the water in that well. Just like that, highly immoral thoughts do not arise in a *Sotāpanna* because it is free of “worst gunk.”
- However, to be able to grasp *anicca*, *dukkha*, *anatta*, one's mind needs to be cleansed to some extent. One needs to gradual changing of one's *gati* or *āsava*. The way to get there is to practice the correct *Ānāpāna bhāvanā* (or *Satipaṭṭhāna bhāvanā*.) See, “[Is Ānāpānasati Breath Meditation?](#).”

Udayavaya Ñāṇa – How Suffering Arises and How It Can Be Stopped

11. Thus the key to *Nibbāna* is in the *udayavaya ñāṇa*: future rebirths arise (*uadaya*) due to *abhisankhāra* (or *cetanā*) in our *javana citta*. By controlling immoral thoughts via reducing our *āsava* (bad *gati*), **we can eventually stop them from arising.**

- This is done by always **being vigilant** about the moral or immoral thoughts that come to our minds; **this is *Satipaṭṭhāna***; see, “[Mahā Satipaṭṭhāna Sutta](#).” Then if the **thought is moral, we cultivate it (*āna*)**; if it is **immoral, we stop it (*pāna*)** before it leads to bad speech or actions; **this is *Ānāpāna***; see, “[7. What is Ānāpāna?](#).”
- The other key point is that the more cleans one's mind, the more one will be able to comprehend. **In particular, comprehending *anicca*, *dukkha*, *anatta*, REQUIRES a mind cleansed to some extent.**
- **I hope you can see that this is a feedback loop:** each time one goes through the loop (**being vigilant or *satipaṭṭhāna* to cleansing the mind or *ānāpāna* to more cleansed mind to grasping deeper Dhamma and back to being vigilant**), one makes progress.

Importance of Tilakkhaṇa

12. This effect is greatly amplified when one finally grasps *Tilakkhaṇa*: One comprehends the futility of staying in this rebirth process (*anatta*.) Anything that we acquire through much effort cannot

be kept to our satisfaction in the long run (*anicca*) and eventually lead to nothing but suffering (*dukkha*.) When one can “see” that, one will realize the urgency to reduce and remove one’s *āsava* (bad *gati*). This leads to the *Sotāpanna* stage.

- A huge chunk of *āsava* (bad *gati*) simply disappear just via this understanding of the *anicca* nature at the *Sotāpanna* stage. Highly potent immoral *javana citta* do not arise in the mind of a *Sotāpanna*. Then no more rebirth in the *apāyā* or the four lowest realms.
- Thus with *udayavaya ñāṇa*, one can really clarify the path to the *Sotāpanna* stage.
- Then the remaining *āsava* disappear (*āsavakkhaya*) via three more stages (*Sakadāgāmī*, *Anāgāmī*, *Arahant*) by continuing this process (*Ānāpāna* and *Satipaṭṭhāna*), and one attains *Nibbāna*, permanent happiness or the removal of all future suffering.
- But one also needs to do *Ānāpāna* and *Satipaṭṭhāna* before the *Sotāpanna* stage in order to cleanse the mind to a level that is capable of grasping *anicca*, *dukkha*, *anatta*.

Closing the ‘Gaps’

13. Finally, I would like to close the loop by pointing to the connection to the concepts we have discussed in the early posts. The *gandhabba* consumes three kinds of mental food: *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

- As we saw in the previous post in this series, “[Āhāra \(Food\) in Udayavaya Ñāṇa](#),” all three types of mental foods are consumed by the *cittaja kāya*. And this confirmed by the above discussion: Our initial sense inputs that COULD trigger *javana citta* come via *phassa*, sense contacts. They are JUST contacts. But based on those, we COULD accumulate new *kamma vipāka* (*abhisankhāra*) by making *samphassa*; also see, “[Vedanā \(Feelings\) Arise in Two Ways](#).”
- *Mano sañcetanā āhāra* (which are *abhisankhāra*) come into play during those *samphassa*; this simply means we start “making plans”, and also keep going back to that sensory input. With repeated triggers for a given sense input (*samphassa*) provides *āhāra* for that *viññāṇa*; for example, see, “[2. Viññāṇa \(Consciousness\) can be of Many Different Types and Forms](#),” and other relevant posts.

By reading the links given (and also using the “Search box” at top right) one should be able to clarify key issues. Please don’t hesitate to comment if you need help in clarifying a given concept.

14. Also, please make sure to enter your email address correctly when making a comment. Recently, one person entered incorrect address, and sent me the same question twice. Unfortunately, I have no way of letting him know that I replied each time.

8.1 Pāli Glossary

1/2/16: It seems that the audio files are not loading, so just removed the audio files.

We now have a [Popup Pāli Glossary with Pronunciation](#).

Possible Confusion in Pronunciation

It seems that the following conventions were adopted in order to make the text shorter.

In many cases:

1. “c” needs to be pronounced “**ch**” as in “**ch**arm” or “**ch**icago.”
2. “t” needs to be pronounced “**th**” as in “**th**ud” or “**th**row.”
 - For example, *citta* pronounced “chiththa”, *cakkhu* is pronounced “chakkhu”, *anicca* as “anichcha”, *anatta* as “anaththa”, *jāti* as “jathi”, *taṇhā* as “thanha”, *tilakkhana* as “thilakkhana.”
3. “d” needs to be pronounced “**th**” as in “**th**is” or “**th**at.” Note the difference in pronouncing “**th**” between 2 and 3.
 - For example, *vedanā* or *dāna* (as in giving) is pronounced this way.

Pronunciation Key

á rhymes like pat â → care ã → pay ā → father ê → pet ë → bee th → thin dh → this
ö → toe ü → moon ch → chin ng → thing

Common Pāli Words

I will keep adding more words to the glossary. If you would like me to add any missing words to the glossary, please send a comment.

10/6/15: I have added audio files. Please note the volume control below each audio.

Pāli Word	Audio	Pronunciation	Meaning
akusala		akusala	immoral, unwholesome
adosa		adhosa	non-hatred
alobha		alobha	non-greed
amoha		amoha	non-delusion
Anāgāmī		Anāgāmī	Non-Returner (to the human world)
Anariya		Anāriyā	One who is not yet a Noble One or Ariya
anatta		anaththā	not in-control, helpless
anicca		anichchā	inability to maintain to one's satisfaction
anantara			being in storage until retrieval (kamma vipāka)

Pāli Word	Audio	Pronunciation	Meaning
anupassana		anupassanā	contemplate with anicca, dukkha, anatta
anusaya			defilements arising from latent cravings (āsava)
apāya		apāya	common term for four lowest realms
abhijjā [abhijjhā]		abhijjā	strong greed
Arahant			Never to be born in any of the 31 realms
Ariya		āriyā	noble one (Sotāpanna or above)
arūpa		arūpa	without rūpa (not really correct)
avijjā		avijjā	ignorance
ahirika		ahirikā	shamelessness
ahetuka		ahāthuka	without good roots
akasa		ākāsa	space (the void in between rūpa)
aloka		āloka	light, dissociating from “this world”
āpo		āpo	cohesive element
ārammaṇa		ārammana	object of thought
āsava (asaya)		asāva	deep-seated craving
asevana		āsāvanā	repeated practice
bahiddha		bahidhdhā	external
bala			power
bhanga		bhangā	dissolution
bhava			existence level
Bhaudhayā (Buddhist)		Bhaudhdhayā	One striving to stop the rebirth process
bhāvanā		bhāvanā	meditation, constant contemplation & use
Buddha		Budhdha (not “Budhdhā”)	Buddha Gotama
bhavaṅga		bhavangā	life continuum
bhaya			fear
citta		chiththa	early stage of a thought (pure thought)

Pāli Word	Audio	Pronunciation	Meaning
dana		dāna	giving
dasaka			decad
deva		dāva	a being in 6th-11th realms
dhamma		dhammā	Buddha's teachings, phenomenon, mental object
dhammavicaya		dhammavichaya	investigation of concepts like anicca
dhātu		dhāthu	element
diṭṭhi			view, wrong view unless specified
domanassa		dhomanassa	displeasure
dosa		dhosa	hatred
dukha		dhukha	suffering
dukkha		dhukhkha	suffering & it can be overcome
dvara		dhvāra	door (to the outside world)
ekaggata		ekaggathā	one-pointedness (of the mind)
gandha			smell
gati		gathi	character
hadayavatthu		hadayavaththu	seat of mind
hetu		hāthu	root cause
hiri			shame
iddhipada		iddhipāda	means to accomplishment
kāmacchanda		kāmachanda	greed for things in kamaloka
kamaloka		kāmalōka	first 11 realms with five physical senses
kamavacara		kāmavachara	belonging to kamaloka
kamma		kammā	action, deed
kasiṇa		kasiṇa	meditation device (usu. a colored disk)
kāya		kāya	sensing (seeing, hearing, etc)
kaya		kaya	body
khaya			cutting off

Pāli Word	Audio	Pronunciation	Meaning
khana			moment, sub-moment
khandha			aggregate, collection, heap
kilesa (keles)		kilāsa	defilement
kukkucca		kukkuchcha	tendency to do lowly things
kusala			removal of defilements
lahuta		lahūta	lightness
lakkhana		lakhkhana	characteristic
lobha		lobha	greed
loka		loka	world
lokuttara		lokoththara	beyond this world, transcendental
maccariya		machchariya	extreme greed, hiding wealth
magga		magga	path
mana		māna	conceit
manasikara		manasikāra	memory
mano		mano	mind
manodhatu		manodhāthu	mind element
manodvara		manodvāra	mind door
manussa			human being
marana			death
metta		meththā	loving kindness
micchā diṭṭhi		michcha diththi	wrong views
middha		midhdhha	lethargic mind
moha		moha	delusion
mudita		mudhithā	appreciative joy
muduta		mudhuthā	malleability
mūla		mūla or mūla	root
nama		nāma	name, mental
nāmarūpa		nāmarūpa	name and form

Pāli Word	Audio	Pronunciation	Meaning
ñāṇa		ngāna	knowledge
nimitta		nimiththa	sign
nivarana		neevarana	hindrance
niraya			hell
niyama		niyama (not niyāma)	law of nature
oja		ojā	nutritive essence
paccaya		pachchayā	condition
pahāna		pahāna	abandoning
pancadvara		panchadvāra	five sense doors
pañcakkhandha		pancakkhandhā	five aggregates
pancaupadanakkhandha		pancaupādānakkhandhā	grasping/craving of five aggregates
paññā		pangngā	wisdom
pīti		peethi (preethi)	joy
paññindriya			wisdom faculty
paramatta		paramatthā	ultimate reality
pasāda rūpa		pasāda rūpa	sensitive matter (internal rūpa)
passaddhi		passaddhi	tranquility
pathavi			element of hardness
paṭicca		patichcha	bind to something willingly
paṭigha			aversion, dislike
pavutthi		pavutthi	during this life, current
peta (preta)		petā (pretha)	hungry ghost
phala			fruit, fruition
phassa			contact
puggala			individual
purisa			masculine
rāga		rāga	attachment to saṃsāra
rasa			taste

Pāli Word	Audio	Pronunciation	Meaning
rūpa		rūpa	matter (and energy)
rūpa kalapa		rūpa kalāpa	material group unit
rūpāvacara		rūpavāchara	belonging to rūpa loka
sadda		sadhdha	sound
sadharana		sādhāraṇa	universal, common
saddhā		sadhdhā	faith (through knowledge and understanding)
sahetuka		sahēthuka	with roots
Sakadāgāmī		Sakadagāmi	Once-Returner (one more rebirth as a human)
saḷāyatana		saḷāyathana	six sense bases
samādhi		samādhi	high concentration with pure mind
sammā			quench (defilements)
samāpatti		samāpaththi	meditative attainment
samanantara		samananthara	contiguity, matching with anantara
samatha		samathā	calming the mind
samauppada		samauppāda	birth of a similar kind
saṅkappa			ideas
saṅkhāra		saṅkhāra	actions leading to defilements
saṅkhata (sankata in Sinhala)		sankhatha	conditioned, formed by conditions
saññā		sangngā	perception
saṁsāra (also called saṁsāra)		saṁsāra	beginningless rebirth process
sasava		sāsavā	with craving
sati		sathi	mindful of anicca, dukkha, anatta
satipatṭhāna		sathipattāna	establishment of sati
sanyojana		sanyojana	bind to defilements, fetter
sīla		seela	virtue, moral conduct
sekha		sēkha	trainee (the three stages below the Arahant)
somanassa		somanassa	with joy

Pāli Word	Audio	Pronunciation	Meaning
sota		sotha	ear
Sotāpanna		Sothapanna	Stream Enterer (first stage of Nibbāna)
taṇhā		thanhā	attachment (bondage) due to greed, hate, or delusion
tejo		thājo	heat element
thina		theena	sloth
uddhacca		udhdhachchā	tendency to be high-minded (restlessness)
upādāna		upādhāna	clinging, like to hold onto
upekkha			equanimity, neutrality
uppatthi		uppaththi	birth
vacī		vachi	speech
vaṇṇa (varna)			color
vayama		vayāma	effort
vāyo		vayo	fluidity
vedanā		vādana	feeling
vicara		vichāra	sustained concentration on an object
vicikicchā		vichikichchā	acting without sati
vīmaṁsā		vīmaṁsā	investigation
vinnati		vingngāthi	intimation
viññāṇa		vingngana	(defiled) consciousness
vipāka		vipāka	result
vipassana		vipassanā	insight (via analysis of parts)
virati		virathi	abstinence from indulgence
viriya			effort
visuddhi		visudhdhi	purification
vitakka		vithakka	initial application of the mind on an object
vīthi		veethi	process (sequential)

Pāli Word	Audio	Pronunciation	Meaning
votthapana		voththapana	determining
vyāpāda		vyāpāda	ill will, stronger than paṭigha

8.2 Pāli Glossary – (A-K)

August 12, 2016; Revised May 27, 2017; February 19, 2020; May 29, 2022 (#4 added)

“Tipiṭaka English” Convention

1. I have revised the Pāli words to align with the convention used by most English texts. This convention was apparently adapted by the early European scholars (Rhys Davis and others) in order to keep the length of the word short. I will use this convention in new posts and try to update old posts gradually. See the following two posts for details:

- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)
- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2](#)

Additional Pronunciation Keys:

“a” is pronounced like “u” in cut; “ā” is pronounced like “a” in father

- “ī” is pronounced like “i” in sit; “ī” is pronounced like “ee” in bee
- “u” is pronounced like “u” in “put”; “ū” is pronounced like “oo” in cool
- “o” is pronounced like “oe” in “Moe”; “e” is pronounced like “a” in pay
- “c” needs to be pronounced like “ch” as in “charm” or “chicago”
- “ñ” needs to be pronounced like “gn” in “signor”

2. This glossary is in two posts, because there are a total of over 400 Pāli words included now. This is the first part of the glossary; second part at, [“Pāli Glossary – \(L-Z\).”](#)

- I have been able to get the audio files incorporated, and also have provided links to key posts whenever possible/needed.
- We also have a [Popup Pāli Glossary with Pronunciation](#), thanks to Mr. Seng Kiat Ng. If that GoldenDict dictionary is installed on your computer, you will be able to access this glossary from each post directly. Furthermore, it could provide translations from other online dictionaries as well.

3. Relevant posts on any of the words can be found by using the “Search” box on the top right.

Pāli Word	Meaning	Audio
abhaya	"a" + "bhaya"; doing something to stop someone's fear	
abhaya dāna	saving the life of a living being	
abhijjhā	strong greed	
abhiññā	supermundane powers	
abhisaṅkhāra	strong saṅkhāra that lead to rebirths and strong vipāka	
ādīnava	bad outcome: Assāda, Ādīnava, Nissarana – Introduction	
adhimokkha	arising to the top; reaching a high value	

Pāli Word	Meaning	Audio
adhivāsana	things one gets used to based on sansāric habits; part of gathi	
adinnādāna	stealing; taking something without permission	
adosa	without hatred	
ajjhatta	internal	
ākāsa	space (the void in between rūpa)	
ākāsānañcāya tana	first arūpa brahma realm	
ākāṁcaññāyatanā	third arūpa brahma realm	
akusala	immoral act	
āhāra	nutrients (for body or mind)	
ahetuka	without good roots	
ahirika	shamelessness	
akālika	remove defilements or timeless (no birth or death, i.e., Nibbāna)	
alobha	without greed	
āloka	light, dissociating from “this world”	
āmisa	mundane (belonging to 31 realms)	
amoha	without delusion; moral mindset	
amurta	fine food (drink) of devas	
Anāgāmī	Non-Returner (to the human world)	
anāgata	future	
ānāpāna	7. What is Ānāpāna?	
ānāpānasati	6. Ānāpānasati Bhāvanā (Introduction)	
anāriya	not Noble	

Pāli Word	Meaning	Audio
anatoppa	fear of doing immoral deeds	
anatta	not in-control, helpless	
ānenjābhi saṅkhāra	Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka	
anicca	inability to maintain to one's satisfaction	
Aniccata	tendency to change unexpectedly; characteristic of a rūpa: Rūpa (Material Form) – Table	
anidassana	Cannot be seen; can also mean pure as in anidassana viññāṇa	
animisa	without pausing for even a moment: Animisa Locana Bodhi Poojā – A Prelude to Acts of Gratitude	
aññamañña	depend on each other	
anantara	being in storage until retrieval (kamma vipāka)	
anumodanā	accept pattidana (transfer of merits or sharing of merits) with joy	
anupassanā	discard kileasa by contemplating with anicca, dukkha, anatta: see #6 of 4. What do all these Different Meditation Techniques Mean?	
anusaya	defilements arising from latent cravings (āsava) and kilesa	
apacāyana	paying respects to those with higher virtues: Puñña Kamma – Dāna, Sīla, Bhāvanā	
aparāpariya vedaniya	kamma vipāka that can materialize at any time in future	
apāya	common term for four lowest realms	
āpo	cohesive element	
Appanā samādhi	almost at jhāna: What is Samādhi? – Three Kinds of Mindfulness	
appaṇāta	not to liking; dislikes	
appaṭigha	cannot be grasped or touched	
apuñña	immoral	
apuññabhi saṅkhāra	highly immoral saṅkhāra	

Pāli Word	Meaning	Audio
Arahant	never to be born in any of the 31 realms	
ārammaṇa	object of thought	
Ariya	Noble person (Sotāpanna or above)	
arūpa	without rūpa	
asañña	without perception; without sañña	
āsava = āsaya	deep-seated craving	
āsavakkhaya ñāṇa	Knowledge of removing āsava: The Way to Nibbāna – Removal of Āsavas	
āsevana	repeated practice; associate	
asobhana	ugly or defiled (used mainly for cetasika)	
asura	one of the four apāyā; beings there have large bodies and are inactive	
assāda	enjoyment	
aṭṭa	past	
atta	opposite of anatta or eight	
attha	opposite of anatta; perception that one has total control	
avici	one of the niraya (hell)	
avihiṃsā	non-aggressive	
avinibbhoga	constituents not separable, as in a avinibbhoga rūpa kalapa	
avyāpāda = abyāpāda	not angry, kind	
āyatana	an indriya becomes as āyatana: Sorting out Some Key Pāli Terms - Tanhā Lobha Dosa Moha etc	
āyu	lifetime	
avijjā	Ignorance of Tilakkhaṇa	
bahiddhā	external	

Pāli Word	Meaning	Audio
bahijja	external	
bala	power	
bali	distort	
bīja	seed	
bhaṅga	dissolution; destruction	
bhava	realm of existence	
Bhauddhayā (Buddhist)	One striving to stop the rebirth process	
bhāvanā	meditation, constant contemplation & use	
bhavaṅga	life continuum	
bhaya	fear	
Bhikkhu	Buddhist monk	
bodhicitta	a Mahāyāna term denoting "enlightenment-mind"	
bojjhaṅga	bodhi aṅga or facilitating factor for Nibbāna	
brahma	a being in rūpa or arūpa brahma realms	
Buddha	Buddha Gotama	
cakkhu	eye or seeing	
cakkavāḷa	planetary system like our Solar system	
cetanā	intention; but deeper: “Details of Kamma – Intention, Who Is Affected, Kamma Patha.”	
cetasika	mental factor	
chanda	liking	
citta	thought (pure thought)	
cittānupassanā	doing anupassana via contemplating on thoughts	

Pāli Word	Meaning	Audio
citta vīthi	citta come in packets of a discrete number; a single citta does not arise	
cutūpapāta ñāṇa	ability to see all previous births	
cuti	death	
cuti citta	moment of death	
dāna	giving	
dasa	ten	
dasaka	decad; group of 10	
dassana	vision; but normally used for "comprehending"	
dassanena pahātabba	removing (kilesa) via comprehension of Dhamma	
desanā	verbal discourse	
deva	a being in 6th-11th realms	
Dhamma	Buddha's teachings, phenomenon, mental object	
dhammavicaya (sambojjhaṅga)	investigation of concepts like anicca	
dhammānudhamma patipadā	condition for attaining Sotāpanna stage: Four Conditions for Attaining Sotāpanna Magga/Phala	
dhammānupassanā	doing anupassana via contemplating on Dhamma	
dhātu	element	
dhyāna (same as jhāna)	meditative state with rūpa loka or arūpa loka consciousness	
ditta	observation	
ditthi	view, wrong view unless specified	
diṭṭhijukamma	"diṭṭhi"+"uju"+"kamma" or getting rid of wrong views on kamma: Puñña Kamma – Dāna, Sīla, Bhāvanā	
domanassa	mental agony, displeasure; not bodily suffering	

Pāli Word	Meaning	Audio
dosa	hatred	
dosakkhaya	dosa + khaya or removal of hate	
dugathi	"du" + "gathi" or habits that can lead to bad rebirths	
dukha	suffering	
dukkha	suffering & it can be stopped from arising	
dvāra	door (to the external world)	
ehipassiko	a quality of Dhamma, removing defilements in real time: Supreme Qualities of Buddha, Dhamma, Saṅgha	
ekaggatā	one-pointedness (of the mind)	
gandha	smell, odor	
gandhabba	Gandhabba (Manomaya Kāya)	
gati	character, habits	
ghāṇa	nose or smelling	
gotrabhu	change of lineage ("gotra") when getting close to a jhāna	
hadaya vatthu	seat of mind (in the gandhabbayā)	
hetu	root cause	
hiri	shamefulness for doing akusala kamma	
iddhi	special powers or knowledges	
iddhipāda	means to special (mental) accomplishment	
indriya	one of the six sense faculties when used without lobha, dosa, moha	
issa (irisiyā in Sinhala)	jealousy	
Itthi (sthree in Sinhala)	feminine	
jarā	getting old or weak	

Pāli Word	Meaning	Audio
Jaratā	one of 28 rūpa: Rūpa (Material Form)	
jāti	birth of a living being OR birth of anything	
javana	those citta with which saṅkhāra committed or kamma vipāka generated: Javana of a Citta – The Root of Mental Power	
jhāna (same as dhyana)	meditative state with rūpa loka or arūpa loka consciousness	
jivhā	tongue (more accurately jivha indriya) OR taste	
jīvita	life: jivita indriya maintains life	
Jvītindriya	one of the 7 universal cetasika: Cetasika (Mental Factors) OR one of the 28 rūpa: Rūpa (Material Form)	
kabaḷikāra	one of the 4 āhāra: Āhāra (Food) in Udayavaya Ñāna	
kappa (kalpa in Sinhala)	time duration of an entity: kappa of a human is about 100 years; mahā kappa is lifetime of the universe	
kalyāṇa mittā (or mitrā in Sinhala)	Noble friend: Four Conditions for Attaining Sotāpanna Magga/Phala	
kāmacchanda	greed for things in kamaloka	
kāma loka	first 11 realms with five physical senses	
kāma rāga	attachment to sense pleasures in kamaloka	
kāmāvacara	belonging to kamaloka	
kāmesumicchācārā	immoral ways of enjoying sense pleasures: The Five Precepts – What the Buddha Meant by Them	
kamma	action, deed	
kammanta	actions as in sammā kammanta	
kammaṭṭhāna	meditation verses or procedures	
khandha	heap, pile, or aggregate	
karunā	compassion in the suffering of others	
kasiṇa	meditation object in anāriya jhāna (eg. a colored disk)	

Pāli Word	Meaning	Audio
kāya	pertaining to the body or action	
kaya	physical or mental body	
kāyānupassanā	doing anupassana via contemplating on the bodily actions	
khaṇika samādhi	<u>What is Samādhi? – Three Kinds of Mindfulness</u>	
khaya	cutting off or gradually reduce	
khaṇa	moment, sub-moment	
kriyā	action, deed

8.3 Pāli Glossary – (L-Z)

August 12, 2016; Revised May 27, 2017; February 19, 2020; May 29, 2022 (#4 added)

“Tipiṭaka English” Convention

1. I have revised the Pāli words to align with the convention used by most English texts. This convention was apparently adapted by the early European scholars (Rhys Davis and others) in order to keep the length of the word short. I will use this convention in new posts and try to update old posts gradually. See the following two posts for details:

- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)
- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2](#)

Additional Pronunciation Keys:

“a” is pronounced like “u” in cut; “ā” is pronounced like “a” in father

- “ī” is pronounced like “i” in sit; “ī” is pronounced like “ee” in bee
- “u” is pronounced like “u” in “put”; “ū” is pronounced like “oo” in cool
- “o” is pronounced like “oe” in “Moe”; “e” is pronounced like “a” in pay
- “c” needs to be pronounced like “ch” as in “charm” or “chicago”
- “ñ” needs to be pronounced like “gn” in “signor”

2. This glossary is in two posts, because there are a total of over 400 Pāli words included now. This is the first part of the glossary; second part at, [“Pāli Glossary – \(A-K\).”](#)

- I have been able to get the audio files incorporated, and also have provided links to key posts whenever possible/needed.
- We also have a [Popup Pāli Glossary with Pronunciation](#), thanks to Mr. Seng Kiat Ng. If that GoldenDict dictionary is installed on your computer, you will be able to access this glossary from each post directly. Furthermore, it could provide translations from other online dictionaries as well.

3. Relevant posts on any of the words can be found by using the “Search” box on the top right.

Pāli Word	Meaning	Audio
lobha	excess greed: Lobha, Rāga and Kāmaccaṇḍa, Kāmarāga	
lahutā	lightness (e.g., <i>kāya lahutā</i> is lightness in body)	
lakkhaṇa	characteristic of	
loka	realm or world depending on the context	
lokiya	belonging to this world of 31 realms	
lokuttara	beyond this world of 31 realms, transcendental	
macchariya	hiding wealth due to extreme greed	

Pāli Word	Meaning	Audio
magga	path; procedure	
mahā	large or important	
māna	arrogance, self-admiration	
manasikāra	memory. Details at: Citta and Cetasika – How Viññāna (Consciousness) Arises	
mano	mind	
mano sañcetanā	<i>vedanā, saññā</i> that arise due to one's gati	
manodhatu	mind element	
manodvāra	mind door to <i>nāmaloka</i> ; see, Our Two Worlds: Material and Immaterial	
manodvāravajjana	a citta coming to the mind door as in <i>manodvāravajjana citta</i>	
manussa	human being	
marana	death (death of a physical body is not necessarily the end of human bhava; see, Antarābhava and Gandhabba)	
mettā	kindness. Has two meanings: "Ariya Mettā Bhāvanā"	
micchā dīṭṭhi	wrong views; see. "Wrong Views (Micchā Dīṭṭhi) – A Simpler Analysis"	
middha	lethargic mind	
moha	delusion; mind totally covered; see, "Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā"	
mohakkhaya	moha + khaya, removing delusion	
muditā	joy in the success of others	
mudutā	malleability; e.g., kāya midutā	
mūla	root (usually in root cause)	
musāvāda	lies, trying to deceive: The Five Precepts – What the Buddha Meant by Them	
muta	combined word for smelling, tasting, and touching	

Pāli Word	Meaning	Audio
nāma	name, mental	
nāmarūpa	name and form OR mental image of a nāma and rūpa	
namaskāraya (Sinhala)	Namaskāraya – Homage to the Buddha	
ñāṇa	knowledge	
nātha	with refuge, opposite of anātha	
nekkhamma	relinquish sense pleasures: Difference Between Giving Up Valuables and Losing Interest in Worthless	
neva saññā nā saññāyatana	fourth arūpa brahma realm	
Nibbāna	stopping the rebirth process: Nibbāna	
nibbatti lakkhaṇa	Nibbatti Lakkhana in Udayavaya Ñāṇa	
nicca	having total control, that ability	
niddesa	short description: Sutta Interpretation – Uddesa, Niddesa, Patiniddesa	
nimitta	sign; something resembling	
nirāmisa	neutral thoughts without sense cravings	
nirodha	nir + udā or stop from arising	
nissaraṇa	willingly give up assāda: Assāda, Ādīnava, Nissaraṇa – Introduction	
Nivana (Sinhala)		
nīvaraṇa	hindrance; covered mind	
niraya	hell	
niyama (or niyāma)	law of nature	
niyata	permanent, fixed	
ojā	nutritive essence	

Pāli Word	Meaning	Audio
oḷārika	rough, condensed	
opapātika	instantaneous and fully-formed birth as in deva and brahma realms	
pabhassara	devoid of greed, hate, and ignorance; e.g., pabhassara citta	
paccayā	condition	
paccuppanna	conditional arising; present moment arising due to conditions	
pahāna	abandon; remove	
pahātabba	removal	
pakiṇṇaka	particulars or occasionals as in pakiṇṇaka cetasika: Cetasika – Connection to Gati	
pāṇātipātā	killing a living being: The Five Precepts – What the Buddha Meant by Them	
panca	five	
pañcadvāra	five sense doors	
pañcadvāra vajjana cittā	Citta Vīthi – Processing of Sense Inputs	
pañcakkhandha	five aggregates	
pañcanīvaraṇa	five hindrances that cover the mind	
pañcaupādāna kkhandha	grasping/craving of the five aggregates: Pañcaupādānakkhandha – It is All Mental	
paṇīta	likable or good	
paññā	wisdom; comprehension of Tilakkhaṇa	
pāpa kammā	immoral actions	
para loka (paraloka in sinhala)	a human or animal gandhabba lives in para loka until a womb becomes available: Hidden World of the Gandhabba: Netherworld (Paraloka)	
pāramitā	strive through many rebirths: Paramita and Niyata Vivarana – Myths or Realities?	
paribramana	rotating around another body	

Pāli Word	Meaning	Audio
perideva	lamentation, especially upon remembering a past mishap	
parivajjana	staying clear of bad influences: The Sotāpanna Stage	
pīti	joy	
paññindriya	wisdom faculty	
parāmattha	ultimate reality	
pharusāvācā	harsh speech: Ten Immoral Actions (Dasa Akusala)	
pasāda rūpā	sensitive matter (five internal senses; not physical senses): Brain – Interface between Mind and Body	
passaddhi	tranquility	
pathavi	element of hardness	
paṭicca	get bonded to something willingly	
paṭigha	aversion, dislike	
patikūla manasikāra bhāvanā	4. What do all these Different Meditation Techniques Mean?	
paṭipadā	a procedure; way of living, like in majjima patipāda	
paṭiniddesa	detailed description: Sutta Interpretation – Uddesa, Niddesa, Patiniddesa	
paṭisandhi	Grasping a new existence (bhava)	
paṭisevana	good associations as in paṭisevana pahātabba: The Sotāpanna Stage	
pattānumodanā	Transfer of Merits (Pattidāna) – How Does it Happen?	
pattidāna	transfer of merits: Transfer of Merits (Pattidāna) – How Does it Happen?	
pavutthi	during this life, current	
pīlama (peleema in Sinhala)	incessant stress, agitation: Anicca – The Incessant Distress (“Pīlana”)	
peta (pretha)	hungry ghost; one of the four apāyā	

Pāli Word	Meaning	Audio
phala (pala in Sinhala)	fruit, fruition	
phassa	sense contact; most times it is defiled or samphassa: Difference between Phassa and Samphassa	
pisuṇāvācā	slandering: Ten Immoral Actions (Dasa Akusala)	
phoṭṭhabba	"poththa" + "abba", where "poththa" is skin: sense of touch	
pubbe	previous	
pubbenivāsān ussati ñāṇa	see #12 of Antarābhava and Gandhabba	
puggala	individual	
puñña kriyā	deed that makes one's heart joyful	
purisa	masculine	
rāga	attachment to the 31 realms: Lobha, Rāga and Kāmaccanda, Kāmarāga	
rāgakkhaya	rāga + khaya: removal of attachment to the 31 realms	
rasa	taste	
rūpa	matter AND energy	
rūpa kalāpa	elementary material group unit: Rūpa Kalāpa (Grouping of Matter)	
rūpāvacara	belonging to rūpa loka	
sabba	all	
sacca	truth, as in a Noble Truth	
sadda	sound	
saddhā	faith (through knowledge and understanding)	
sahajāta	born together	
sahetuka	with good roots as in dvihetuka and tihetuka; if no good roots it is an ahetuka birth	
Sakadāgāmī	Once-Returner (one more rebirth in kāma loka)	

Pāli Word	Meaning	Audio
saḷāyatana	six sense bases for a normal human	
samādhi	concentration on a good or bad mindset: What is Samādhi? – Three Kinds of Mindfulness	
samanantara	matching with anantara: Anantara and Samanantara Paccayā	
samāpatti	different from jhāna, see: Citta Vīthi – Processing of Sense Inputs	
sammā	quench (defilements): What is “Saṇ”? Meaning of Sansāra (or Saṁsāra)	
sammappadhāna	four main efforts to stop “saṇ” from arising: Two Versions of 37 Factors of Enlightenment	
samatha	calming the mind	
sāmisa	citta with kilesa or akusala cetasika	
sampajāna	sorting defiled thoughts: Satipatthāna Sutta – Structure	
sampappalāpa	frivolous talk: Ten Immoral Actions (Dasa Akusala)	
samphassa	“saṇ” + “phassa”: Difference between Phassa and Samphassa	
sampaṭṭiccana	where “gati” are incorporated into a citta vīthi: Citta Vīthi – Processing of Sense Inputs	
sampayutta	together and inseparable, like a dye dissolved in water	
samudaya	arising due to “saṇ”: “saṇ” + “udaya”	
samuppāda	birth of a similar kind: sama + uppada	
saṁvega or saṇvega	“saṇ” + “vega”: javana power in a citta due to “saṇ”: see #9 of Javana of a Citta – The Root of Mental Power	
saṇ	Saṇ	
sandiṭṭhiko	“saṇ” + “diṭṭhi” or enable seeing “saṇ”: Supreme Qualities of Buddha, Dhamma, Saṅgha	
saṅkappa	thoughts, ideas	
saṅkhāra	actions leading to defilements, habits	
saṅkhata (sankata in Sinhala)	arisen by conditions	

Pāli Word	Meaning	Audio
saññā	perception, identification	
saṃsāra or saṇsāra	beginningless rebirth process: What is “Saṇ”? Meaning of Saṇsāra (or Saṃsāra)	
saṃsāric	related to the rebirth process	
santati	one of the 28 types of rūpa: Rūpa (Material Form)	
saṃvara	“saṇ” + “vara” or stop “saṇ” by moral behavior: What is “Saṇ”? Meaning of Saṇsāra (or Saṃsāra)	
saṃvarena	via saṇvara as in saṇvarena pahatabba: The Sotāpanna Stage	
saṃvega	“saṇ” + “vega”: enhanced javana of a citta due to “saṇ”, i.e., highly emotional	
sapta or saptha	seven	
sāsana	Buddha sāsana is Ministry of the Buddha	
sasankhārika	immoral citta arising due to shrunken mind (thīna middha)	
sāsava	with craving	
satara (in Sinhala)	four	
sakkāya dīṭṭhi (or sathkāya dīṭṭhi)	perception that things in this world are worth striving for: How do we Decide which View is Wrong View (Ditthi)?	
sati	in the mindset of anicca, dukkha, anatta: Satipatthāna – Introduction	
satipatthāna	maintain sati: Mahā Satipatthāna Sutta	
saṅtiraṇa	where a decision is made in a citta vīthi: Citta Vīthi – Processing of Sense Inputs	
sanyojana or saṃyojana	bind to defilements or “saṇ”	
sīla	virtue, moral conduct	
silabbata paramasa	perception that Nibbāna can be attained via just obeying set precepts or procedures	
sekha	trainee (the three stages below the Arahant stage)	
sobhana	good, likable, moral	

Pāli Word	Meaning	Audio
soka	sorrow due to personal loss	
somanassa	with joy	
sota	Two possible meanings: ear and Noble Eightfold Path	
Sotāpanna	Stream Enterer (first stage of Nibbāna)	
Suddhatṭhaka	smallest material element: The Origin of Matter – Suddhatṭhaka	
suddhāvāsa	Brahma realms reserved for the Anāgāmīs	
sugati	"su" + "gathi" or moral habits/behavior; also good realms: Samsāric Habits, Character (Gati), and Cravings (Āsava)	
sukha	bodily pleasure, like with a massage; somannasa is mental	
sukuma	fine; not coarse	
suññatā	emptiness: What is Sunyata or Sunnata (Emptiness)?	
suta	sound	
sutta	discourse in the Tipiṭaka	
suva	as in Nivan suva:	
taṇhā	attachment (bondage) due to greed, hate, or delusion	
tatramajjhataṭṭhā	neutrality of mind; not upekkhā: Cetasika – Connection to Gati	
tejo	heat element	
Thero	One who has attained Nibbāna; nowadays it is used for non-Arahants bhikkhus too	
thīna	shrinking of the mind, not alert	
tuccha	lowly (behavior)	
tiparivaṭṭa	Three rounds of bondage to this world.	
tihetuka	paṭisandhi with three good roots	
tilakkhana	Three characteristics of the 31 realms: Anicca, Dukkha, Anatta	

Pāli Word	Meaning	Audio
Tipiṭaka	three piṭaka: sutta, vinaya, abhidhamma: Preservation of the Dhamma	
tisarana	refuge in Buddha, Dhamma, Saṅgha: Tisarana Vandana and Its Effects on One's Gati	
tivijjā	Three special knowledges of the Buddha: The Way to Nibbāna – Removal of Āsavā	
uccheda diṭṭhi	wrong view that death of the physical body is the end of a living being, i.e., disbelief in rebirth process	
udayavaya	arising and destruction of a saṅkhata (sankata in Sinhala): Udayavaya Ñāna	
udayavaya or udayabbaya ñāṇa	Udayavaya Ñāna	
uddhacca	tendency to be high-minded (restlessness)	
uddesa	very short description: Sutta Interpretation – Uddesa, Niddesa, Patiniddesa	
upacāra	close to	
upacāra samādhi	samādhi close to jhānic state	
upādāna	clinging, like to hold onto	
upekkha	equanimity, neutrality	
uppatti	birth	
utu	natural change kammaja and cittaja energies to rūpa	
utuja rūpa	rūpa produced via the transformation of kammaja and cittaja rūpa	
vacī	speech	
vaṇṇa (varna in sinhala)	color	
vaya	destruction or deviating to immorality	
vāyāma	effort	
vāyo	element of movement, motion	
vedanā	feeling or more precisely "sensing of an event": Vedanā (Feelings)	

Pāli Word	Meaning	Audio
vedanānupassanā	anupassanā on feelings: Satipatthāna – Introduction	
veyyāvacca	paying homage to and taking care of Holy places: Puñña Kamma – Dāna, Sīla, Bhāvanā	
vibhava	disbelief in rebirth: Kāma Tanhā, Bhava Tanhā, Vibhava Tanhā	
vicāra	sustained concentration on a thought object	
vicikicchā	acting without sati; uncertainty of what to do; doing inappropriate things	
vipassanā	insight meditation with and for clear vision: 4. What do all these Different Meditation Techniques Mean?	
vimāna	residence, normally of a deva	
vimansā	contemplation, investigation	
vimutti	release (from the rebirth process)	
vinaya	rules of discipline for bhikkhus: Kamma, Debt, and Meditation	
viññāṇaṇcāyatana	second arūpi brahma realm: 31 Realms of Existence	
viññata	comprehension via viññāṇa	
viññati	intimation. For example, kāya viññati is express intention via body movement.	
viññāṇa	defiled consciousness	
viññāṇaṇcāyatana	second arūpa brahma realm: 31 Realms of Existence	
vinodanā	in vinodanā pahatabba: The Sotāpanna Stage	
vipāka	result (of a kamma)	
viparināma	unexpected change	
vipassanā	removing defilements via insight of Tilakkhaṇa	
vippayutta	appear together, but separable; like a current in a wire	
virati	lose craving for indulgence	

Pāli Word	Meaning	Audio
virīya	effort	
visuddhi	purification	
vitakka	initial application of the mind on an object	
vīthi	street; but in a citta vīthi means a "packet of thoughts" with a certain number of citta	
votthapana	determining (citta)	
vyāpāda or byāpāda	ill will, stronger than paṭigha	
yojanā	distance of about 7 miles	
yoniso manasikāra	ability to see consequences of one's actions for future rebirths: Four Conditions for Attaining Sotāpanna Magga/Phala

8.4 List of “Saṇ” Words and Other Pāli Roots

June 29, 2017; revised November 9, 2018; March 17, 2023

1. Pāli is a phonetic language. It does not have its alphabet. *Tipiṭaka* was initially written down in Pāli with the Sinhala alphabet.

- Pāli verses are composed for ease of oral transmission. *Tipiṭaka* was orally transmitted faithfully for several hundred years.
- So, in many cases, root words are hidden in combined words in verses that were composed to rhyme better for easy oral transmission.

2. Rather than trying to find roots in Sanskrit, that is the way to find the roots. As I explained with evidence from the *Tipiṭaka*, **the Buddha prohibited using Sanskrit words, or even translating the *Tipiṭaka* to Sanskrit**; see, “[Preservation of the Buddha Dhamma](#).”

- That is because despite some similarities, in Sanskrit, many words were composed to sound more “impressive”, without paying attention to embedded meanings.
- For example, *Pratītyasamutpāda* is the Sanskrit term for *Paṭicca Samuppāda*. *Pratītyasamutpāda* sounds impressive but the meaning is not clear at all.
- On the other hand, it is evident in *paṭi + icca* leading to *sama + uppāda*; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”

3. Pāli words are combined in ways to rhyme better. By finding critical roots embedded in such “combined words,” one can quickly figure out the meaning.

- “*yadaniccaṃ taṃ dukkhaṃ, yaṃ dukkhaṃ tadanattā*” verse appears in many *suttā*.
- To understand it, we need to “expand it” or “unfold it”: “*yad aniccaṃ taṃ dukkhaṃ, yaṃ dukkhaṃ tad anattā*.”
- Now the meaning becomes clear: “*anicca* nature leads to *dukkha*, *dukkha* nature leads to *anatta* nature”; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”

4. The following are some examples of combinations of words to make a verse rhyme better for oral transmission.

Naidham = *na idham* or “not the case.”

Ayamantimā jāti = *ayam + antima + jāti* or “my last birth.”

Nūppajjati = *na + uppajjati*: “will not arise.”

Cittappasāda = *citta + pasāda*; note the two p’s in the combined word that allow it to rhyme better.

Similarly in: *Rūpakkhanda* = *rūpa khandha*: “*rūpa* aggregate.”

Aveccappasāda = *ava icca pasāda* or “faith that leads to overcoming *taṇhā* (attachment).”

Buddha = *bhava + uddha*: one who figured out how to stop existences (*bhava*) from arising.

Bhavaṅga = *bhava + aṅga*; intrinsic aspect of *bhava*.

Sakkāya = *sath + kāya*: good collections usually refer to the five aggregates. *Sakkāya diṭṭhi* is the view that the five aggregates should be embraced. [*sakkāya* = *sat + kāya*; **sat = sant**; **sant** : (ppr. of atthi), 1. 存在 (being, existing). 2. 善的, 真實 (good, true,) Nom. sg. m. *santo*; f. *satī*; nt. *santaṃ*; Acc. *santaṃ* & *sataṃ* (opp. *asaṃ*); Instr. *satā*; Loc. *sati* & *sante*; Abl. *santato*. -- pl. Nom. *santo*; nt. *santāni*; Acc. *sante*; Gen. *sataṃ*; Instr. *sabbhi*; Loc. *santesu*. -- Compar. *santatara*; superl. *sattama*.]

Anāpāna = *āna* + *āpāna*: “taking in” and “putting out.”

Note the pronunciation of the following words backwards to rhyme better:

- *Anāgāmi* = *na āgāmi*: not coming back (about not coming back to *kāma loka* for a person who has attained the *Anāgāmi* stage of *Nibbāna*).
- *Anatimāna* = *na* + *atimāna*: *atimāna* is “high-mindedness” and *anatimāna* is opposite or “humble.”

5. Just by knowing what is meant by the root “*saṇ*,” many Pāli words can be understood easily; see, “[What is “Saṇ”? Meaning of Saṇsara \(or Saṁsāra\)](#).”

- Note that some words are written and pronounced with emphasis on “n” rather than “ṇ”, because it rhymes better that way; a good example is *saṁsāra* (*saṇsāra*) which can be written and pronounced either way.
- On the other hand, *sammā* comes from “*saṇ*” + “*mā*,” but is always pronounced as “*sammā*,” because it rhymes easier that way; e.g., *sammā diṭṭhi*, *sammā saṅkappa*, etc.
- It must be kept in mind that “*saṇ*” has various levels. First one needs to remove ‘*saṇ*’ that lead to immoral activities that can lead to births in the *apāyā*; after one becomes a *Sotāpanna*, one should strive to eliminate “*saṇ*” involving sense pleasures; after becoming an *Anāgāmi*, the goal is to remove “*saṇ*” associated with *rūpa* and *arūpa jhāna*. I only stated “sense pleasures” in the Table.

6. I plan to add another table for Pāli words with a few more key “roots.”

Pāli Words with “*Saṇ*” Root

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
1	Sammā	saṇ + mā	mā means to “remove”	associated with removing “saṇ”
2	sammāpaṭipatti	saṇ + mā + paṭipatti	paṭipatti is a process	method or effort to remove “saṇ”
3	sammāvimutti	saṇ + mā + vimutti	vimutti is complete release	Arahant phala; Nibbāna
4	Sammanti	saṇ + mā	like gaccā to gaccanti	attaining peacefulness by removing “saṇ”
5	samantano	saṇ + anta; rhymes like samananta	anta is end	a process that gets rid of “saṇ”
6	Sammā diṭṭhi	Sammā + diṭṭhi	diṭṭhi is vision (here to see Tilakkhaṇa)	clear vision to see danger of (and how to remove) “saṇ”
7	Sammā saṅkappa	Sammā + saṅkappa	saṅkappa are conscious/unconscious thoughts	thoughts to removing “saṇ”
8	Sammā vācā	Sammā + vācā	vācā is conscious thoughts/speech	speech to remove “saṇ”
9	Sammā kammanta	Sammā + kammanta	kammanta is actions	bodily actions to remove “saṇ”
10	Sammā ajīva	Sammā + ajīva	ajīva is way one lives	living style to remove “saṇ”
11	Sammā vāyāma	Sammā + vāyāma	vāyāma is effort	effort to remove “saṇ”

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
12	Sammā sati	Sammā + sati	sati is mindfulness (about Tilakkhaṇa)	mindfulness to remove “saṅ”
13	Sammā samādhi	Sammā + samādhi	samādhi is the state of equanimity (sama + adhi)	state of samādhi resulting from removing “saṅ”
14	Sambhava	saṅ + bhava	bhava is existence	existence due to “saṅ”
15	Sambuddha	saṅ + bhava + uddha	uddha is rooting out	one who rooted out existence in 31 realms
16	Sambodhi			state attained by a sambuddha; Nibbāna
17	Sambhūta	saṅ + bhūta	bhūta refers to cattāro mahā bhūta	creation of bhūta via “saṅ” in the mind; The Origin of Matter – Suddhatthaka
18	Sammapañña	sammā + pañña	pañña is wisdom	wisdom to see the way to remove “saṅ”
19	Sammā-Sambodhi (Sammā-Sambuddha)		Emphasizing the achievement of sambodhi on one's own	reserved for the Buddhas
20	Sammatta	saṅ+mā+atta	atta means the “truths leading to sammā”	Sammatta niyama is a knowledge of a Sotāpanna.
21	Sambojjanga	saṅ +bodhi+aṅga; rhymes as sambojjanga	“aṅga” means factors	Factors that lead to Sambodhi
22	Sampajāna (Sampajanna)	saṅ + pajāna	pajāna is to comprehend	to figure out defilements (saṅ)
23	sammappadhāna	saṅ + mā+ padhāna	mā is to remove; padhāna means “first”	first to do to remove “saṅ”
24	Sambandha	saṅ + bandha	bandha is to bind, associate with	bind with someone/something with “saṅ”
25	sambhāvitā	saṅ + bhāvitā	bhāvitā is to use	engage in “saṅ” or sense pleasures
26	Sambheda	saṅ + bheda	bheda means to quarrel	fighting over pleasurable things or “saṅ”
27	Sambhīta	saṅ + bhīta	bhīta means to terrify	“saṅ” leading to terror (in mind or in future births)
28	Sambhoga	saṅ + bhoga	bhoga means pleasurable things, especially food	sense pleasures
29	Sambhunjati	saṅ + bhunja	bhunja means to eat or consume	engage in sense pleasures
30	sammoha	saṅ + moha	moha is delusion	extreme delusion
31	sampādesi / sampādetā	saṅ + pādesi	pādesi is to sort out and see	to clarify what is “saṅ”, as in "vaya dhammā saṅkhāra, appamādena sampādetā".
32	sampahanseti	saṅ +pahāna	pahāna is to remove	to remove “saṅ”

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
33	sampañño	saṇ + pañño	pañño means with wisdom, possessive of paññā	attained wisdom to see “saṇ”
34	Sampajāna	saṇ + pajāna	pajāna is to clarify	sort out or to clarify “saṇ”
35	sampayoga	saṇ + payoga	payoga is a clever plan to get something done	plan to access a pleasurable thing
36	Samphassa	saṇ + phassa	contact with saṇ (in the mind)	Vedanā (Feelings) Arise in Two Ways
37	Sampassati	saṇ + passati	passati means to comprehend	comprehend “saṇ”
38	sankiliṭṭha or saṇkiliṭṭha	saṇ + kilitha	kilitha is to defile	making mind defiled by adding “saṇ”
39	sankilesa or saṇkilesa	saṇ + kilesa	kilesa are defilements	things that defile the mind
40	Samsāra (Saṁsāra)	saṇ + sāra	sāra means “good”	perception that saṇ (things in this world) are good.
41	Sanseva (Samseva)	saṇ + seva	seva means to “associate”	to indulge in worldly pleasures
42	Samucceda (as in samucceda pahāna)	saṇ + ucceda	ucceda means to “remove from the roots”; pahāna is remove	samucceda pahāna means to “get rid of permanently”
43	saṇyoga or sanyoga	saṇ + yoga	yoga is to bind	bound with “saṇ” (to this world)
44	saṇyojanā or sanyojanā	saṇ + yo + ja	“yo” is to bind; “ja” is to produce	factors that leads to bonds to rebirth process
45	samudaya	saṇ + udaya	udaya is to arise	arising due to “saṇ”
46	Samutthāna	saṇ + utthāna	utthāna means “where it arises”	Samutthāna citta is same as cittaja; where “saṇ” originates (mind)
47	samvāsa or sanvāsa	saṇ + vāsa	vāsa live with	live together; sexual intercourse
48	Samvara (Sanvara)	saṇ + vara	vara means to stop, avoid	moral behavior
49	Samvaddha	saṇ + vaddha	vaddha is to "grow"	to add “saṇ”, i.e., defilements
50	Samvannanā	saṇ + vannanā	vannanā is to praise	to praise immoral acts
51	Samvattana (Samvattati)	saṇ + vattana	vattana is to “drop”	aiding in removing “saṇ”
52	samvedanā or sanvedanā	saṇ + vedanā	vedanā is to feel	feelings due to “saṇ”: samphassa jā vedanā
53	saṇvidhāna or sanvidhāna	saṇ + vidhāna	vidhāna means ordering	giving orders, organize (normally used mundanely)
54	saṇsaraṇa or sansaraṇa	saṇ + sarana	sarana means move around, travel	wandering in saṇsāra

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
55	Sariyutta (as in Sariyutta Nikāya)	saṇ + yutta	yutta means “contains”	Suttā in the Sariyutta Nikāya explain “saṇ” terms
56	Sancetanā	saṇ + cetanā	cetanā is intention (in a thought)	defiled thoughts
57	sanditthika	saṇ + dīṭṭhi	dīṭṭhi is seeing, vision	seeing “saṇ” with Buddha Dhamma
58	Sangāyanā	saṇ + gāyanā	gāyanā is to recite	Buddhist Council where suttā describing “saṇ” are recited.
59	Sanga	saṇ + ga	ga is to attach,	attach to “saṇ”
60	Sangati	saṇ + gati	gati is character, habit	bad character/habits
61	Saṅgha	saṇ + gha	gha is to remove	Those who have removed “saṇ” belong to Saṅgha; Nobles or Ariyā, but usu. include bhikkhus
62	Sāṅghika	possessive of Saṅgha		offered to Saṅgha
63	Sangīta (Sangeetha)	saṇ + gīta	gīta is a poem, song	music that bend mind towards sense pleasures
64	sankalpana or saṅkappa	saṇ + kalpana	kalpana means conscious thoughts	defiled thoughts
65	sankhitta	saṇ + kitta	kitta is action (kriya)	anything done with “saṇ” (defilements) in mind
66	Sansun	saṇ + sūn (û rhymes like put)	sūn means to destroy	calming the mind via removing “saṇ”
67	Sanvara	saṇ + vara	vara is to stay away from	discipline via staying away from “saṇ”, i.e., moral behavior
68	sanvega or samvega	saṇ + vega	vega is speed or rapidity	enhanced javana of a citta due to “saṇ”, i.e., highly emotional
69	saṅkhāra (should really be sankāra)	saṇ + kāra	kāra is action (all actions are initiated via thoughts)	Saṅkhāra – What It Really Means
70	Sankata	saṇ + kata	kata is a result	produced via saṅkhāra; anything in this world
71	Sansāra (Saṁsāra)	Saṇ + Sāra	Sāra is good, beneficial	What is “Saṇ”? Meaning of Sansāra (or Saṁsāra)
72	Santāpa	saṇ + tāpa	tāpa is heat	heating of the mind due to “saṇ”
73	Santutti (or Santhutti)	saṇ + thutti	thutti is to remove: Arogya Parama Labha..	ease of mind when “saṇ” removed; but commonly used to indicate happiness

8.5 The 89 (121) Types of Citta

Revised: October 29, 2015; August 31, 2017; June 3, 2018; July 31, 2018; August 28, 2022; May 16, 2023 (#7-#10)

Citta for Kāmaloka (in the 11 sense realms) - 54 in all

1. There are three main types of citta here: The differentiation is based on whether they have immoral roots (*lobha, dosa, moha*), *kammically* moral roots (*alobha, adosa, amoha*), or are *kammically* neutral, i.e., no roots.

- **12 immoral citta:** 8 with *lobha* roots; 2 with *dosa* roots, and 2 with *moha* roots. All ten immoral acts (*dasa akusala*) are done with these 12 types of *cittā*. Because of the 12 immoral *cittā*, **seven rootless (*ahetuka*) vipāka citta** can arise in the future. Thus, altogether there are **19 citta in this category**.
- **Eight moral citta:** four with all three moral roots and 4 with two moral roots (lacking in wisdom). They can give rise to two types of *vipāka citta*: **eight vipāka citta with no roots** and **eight vipāka citta with moral roots** (four of them have all three moral roots, and the other four are lacking in wisdom). Thus **24 types of citta are mentioned here**, of which 16 have moral roots, and eight are rootless (*ahetuka*).
- When these same **eight moral citta arise in Arahants, they are called *kiriya citta*** or functional *citta*. They have the same moral roots as the eight moral citta mentioned above but do not have any *kammic* potential or *kammic* consequences.
- All those citta with moral roots (8 *kiriya citta* for *Arahants* and 16 for others) are called *sobhana* (beautiful) citta.
- Finally, **three types of *kiriya citta* arise in citta vīthi: they are neither kamma nor kamma vipāka**. These are the three *kiriya citta* without any roots, and thus are rootless (*ahetuka*) *citta*. Two of these perform functions of (i) five-sense-door adverting consciousness (*pañcadvārāvajjana citta*) and the *votthapana citta*, and (ii) mind-door-adverting consciousness (*manodvārāvajjana citta*). (iii) The third one arises in only *Arahants* (when they smile about sense-sphere phenomena).
- Note that none of the seven *akusala vipāka citta* has roots. Also, eight *kusala vipāka citta* associated with *pavutti vipāka* (i.e., not giving rise to rebirth) do not have any roots. Those 15 *cittā* and the three *ahetuka kiriya citta* are involved in the *vipāka* phase of a given *citta vīthi*. They do not have any *sobhana* or *asobhana cetasika* other than the 7 universal *cetasika* and the 6 *pakiṇṇaka* (particulars) *cetasika*; see, “[Cetasika – Connection to Gati](#)” for various types of *cetasika*. Those 18 *cittā* are listed on p. 112 of [Ref.1](#) under the second group below the group of *akusala citta*.

2, The **54 kāmaloka citta** can be categorized in different ways.

Asobhana (Unbeautiful)		Sobhana (Beautiful)
Immoral- 12	Rootless – 18	Moral -24
<i>Lobha</i> (8)	Immoral <i>Vipāka</i> (7)	<i>Moral</i> (8)
<i>Dosa</i> (2)	Moral <i>Vipāka</i> (8)	Moral <i>Vipāka</i> (8)
<i>Moha</i> (2)	<i>Kiriya</i> (3)	<i>Kiriya</i> (8)

Citta for Rūpaloka (in the 16 Rūpa realms) - 15 in all

3. There are only 15 *cittā* that are predominantly present in the *Rūpaloka*. Five are *jhānic* moral *citta*, and five are *vipāka citta* due to those.

4. The five *jhānic* moral *cittā* can be experienced by humans when they develop *samādhi* and attain these (first through fifth) *jhānā*. However, they can only experience the corresponding five *vipāka cittā* when they are born in *Rūpalokas*.

5. The five *jhānic* states are characterized by five *jhāna* factors or mental concomitants: *vitakka* (initial application), *vicāra* (sustained application), *pīti* (zest), *sukha* (happiness), and *ekaggatā* (one-pointedness). All five factors are present in the first *jhāna*, and as one moves to higher *jhānā*, these factors are lost one by one, and in the fifth *jhāna*, only *ekaggatā* is left.

Pīti (zest) is the happiness in the mind, and *sukha* (happiness) is the tranquility of the body.

6. There are five more *jhānic kīriya cittā* experienced by *Arahants* when they attain these *jhānā*.

Thus there are 15 *cittā* in all that predominantly belong to the *Rūpaloka*.

Citta for Arūpaloka (in the 4 Arūpa realms)- 12 in all

7. There are only 12 *cittā* that are predominantly present in the *Arūpaloka*. These are not *jhānās* but “*arūpāvacara samāpatti*.” Four are *kusala cittā* (that one cultivates,) and four are *vipāka citta* due to those.

8. The four *kusala cittā* can be experienced by humans when they attain the *arūpāvacara samāpatti*. However, they can only experience the corresponding four *vipāka cittā* when they are born in *Arūpa loka*.

9. The first of the four *arūpāvacara samāpatti* is the attainment of the base of infinite space (*Ākāsānancāyatana*). A human must master the highest *rūpāvacara jhāna* to attain this *arūpāvacara samāpatti*.

The second is the base of infinite consciousness (*Viññāṇāṇcāyatana*). The third is the base of nothingness (*Ākiñcaṇṇāyatana*), and the fourth is the base of neither-perception-nor-non-perception (*Nevasaññānāsaññāyatana*). In this last type of consciousness, the perception factor (*saññā*) is so subtle that it can no longer perform the function of perception, i.e., one is unaware of the “world.” Yet perception is not altogether absent. This is another reason why the ancient *yogis* erroneously assumed this eighth *jhāna* to be *Nibbāna*.

10. There are four more *arūpāvacara samāpatti kīriya cittā* experienced by *Arahants* when they attain these *samāpatti*.

Thus there are 12 *cittā* in all predominantly belong to the *Arūpa loka*.

Lokuttara (Supermundane) Citta – 8 in all

11. These pertain to the four stages of *Nibbānic* attainment: *Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, and *Arahant*.

12. Each stage involves two types of *citta*: path consciousness (*magga citta*), and fruition consciousness (*phala citta*). The *magga citta* has the function of eradicating or permanently attenuating defilements.

- The *phala citta* has the function of experiencing the degree of liberation made possible by the *magga citta*.

13. Each *magga citta* arises only once and endures for one thought-moment. It is never repeated. The corresponding *phala citta* (which corresponds to a *vipāka citta* but is not called a *vipāka citta*) arises immediately after the *magga citta*. This contrasts mundane *vipāka cittā*, which can occur even many lifetimes after the corresponding *kusala* or *akusala citta*.

14. The *phala citta* can be repeated after one attains it. With practice, it can be sustained for long times, up to 7 days for an *Arahant*.

Thus, there are $54 + 15 + 12 + 8 = 89$ *cittā* in all.

How 121 Types of Citta are Possible

15. It is possible to further analyze the types of citta by refining the above method by considering that each *magga phala* can be reached from the vicinity of each *anāriya jhānic* state.

- One can attain *Nibbānic* states via the vicinity of each of the five *rūpa loka jhānic* states (**here, the *Abhidhamma* method of 5 *jhānā* is used, instead of the four mentioned in the *suttā***, where the first two *jhāna* in *Abhidhamma* categorization are taken to be one *jhāna*; in the *Abhidhamma* analysis *vitakka* and *vicāra* are removed in two steps, whereas in the *sutta* analysis it is assumed that they are removed in one step).
- Therefore, the five *jhānic* states can lead to the four *magga cittā* and four *phala cittā*.
- Thus here, there are 40 ways to attain *lokuttara cittā*. Therefore, in this case, the total number of *cittā* would be 121 ($= 54 + 15 + 12 + 40$) instead of 89.

16. Therefore, *magga phala* (including the *Arahant* stage) can be reached through any of the *jhānic* states or without going through any *jhānic* state.

- Of course, the eight *lokuttara cittā* (i.e., the four stages of *Nibbāna*) arrived are the same, regardless of whether they arrived via *jhāna*.
- To attain the first *Ariya jhāna*, one must be at least an *Anāgāmi*. See #6 of “[Samādhi, Jhāna, Magga Phala – Introduction](#).”

Important Conclusion Regarding *Jhāna* and *Magga Phala*

17. From the above it is clear that *magga phala* can be attained without *jhāna* (89 *cittā* analysis applicable). *Magga phala* can also be attained via each of the five *jhānic* states (in the *Abhidhamma* method), which correspond to the four *jhānā* discussed in the *suttā*; here the 121 *cittā* analysis is applicable.

- Furthermore, these *jhānic* states can be reached via either *anāriya jhāna* or *Ariya jhāna*. The experience seems to be the same.
- The only difference is that while *kāma rāga* is suppressed (*vikkhambhana pahāna*) in *anāriya jhāna*, it is REMOVED (*samuccheda pahāna*) in *Ariya jhāna*.
- For details, see, “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”

8.6 Cetasika (Mental Factors)

Revised January 24, 2020; May 15, 2020; June 8, 2020; August 23, 2022

Cetasika (mental factors; pronounced “chethasikā”) appear concomitantly with *citta* (thoughts; pronounced “chiththā”), and they cease together with *citta*. They define the character (good or bad or neutral) of the *citta*.

- The way to “[Lead a Moral Life](#),” or to “[Seek Good Rebirths](#),” or to “[Seek Nibbāna](#),” is to get rid of the bad (non-beautiful) *cetasika* and cultivate good (beautiful) *cetasika*. This is done by changing one’s habits via learning Dhamma and practicing it: see, “[Habits and Goals](#),” “[Sansāric Habits and āsavas](#),” and “[The Way to Nibbāna – Removal of Āsavā](#),” in that order.

1. Seven *cetasika* are in every *citta*. These are called **universals** (*sabba citta sādhāraṇa*):

- *Phassa* (contact); *vedanā* (feeling); *saññā* (perception); *cetanā* (volition); *ekaggatā* (One-pointedness) can become *Sammā Samādhi*; *jīvitindriya* (life faculty) *manasikāra* (memory).

2. Since they are universals, the above *cetasika* appears in both *kusala* and *akusala citta*. All are important mental factors:

- *Saññā* and *vedanā* are in *pañcakkhandha*.
- *Cetanā* determines *kamma*; it is the *cetasika* that “puts together a *citta*” by automatically incorporating other relevant *cetasika* according to one’s “*gati*.”
- *Ekaggatā* is the salient factor in *samādhi*.
- Consciousness cannot arise without *phassa*. Note that *samphassa* differs from *phassa*; see, “[Difference between Phassa and Samphassa](#).”
- *Jīvitindriya* maintains life.
- *Manasikāra* can be either *yoniso manasikāra* (important in attaining the *Sotāpanna* stage), and *ayoniso manasikāra* can lead to the accumulation of *akusala kamma*.

3. There are six *cetasika* that CAN appear in both types of *cittā*: *kusala* and *akusala*. However, they are found in only particular types of *cittā*. They are called **particulars** or *pakiṇṇaka*: [*pakiṇṇaka* : (adj.) [*pa+kiṇṇa* (pp. of *kirati*)+*ka*] scattered about; fig. miscellaneous, particular, opp. to *sādhāraṇa*.]

- *Vitakka* (focused application) can become *Sammā Saṅkappa*; *vicāra* (sustained application); *adhimokkha* (dominate). *Adhimokkha* is the *cetasika* that makes another *cetasika* to dominate a given *citta*; for example, to get *uddhacca*, *vicikicchā*, or *paṭigha* to strengthen.
- *Viriya* (effort) can become *Sammā Vāyāma*; *pīti* (joy); *chanda* (desire, not greed).
- **These are important *cetasika* and play key roles in morality/immorality since they can appear in both *kusala* and *akusala citta*.** For example, when one’s mind is covered with deep ignorance (*moha*), one may enjoy immoral deeds (*pīti*), makes a liking for them (*chanda*), and strive more (*virīya*) to do such acts.

4. Just like universals, these particulars can appear in either type of *cittā*, *kusala* or *akusala*. *Vitakka*, *vicāra*, and *pīti* are *jhāna* factors as well.

- *Viriya* and *chanda* are two factors in the four bases of mental power; see, “[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#).”
- *Adhimokkha* is important in decision making by making another *cetasika* dominant. All these factors can go in an *immoral* direction too.

5. There are 14 *asobhana cetasika* (**non-beautiful mental factors**) that appear only in *akusala citta*. Out of these, four universals appear in ALL *akusala citta*:

- **Moha** (delusion); *Ahira* (shamelessness); *Anottapa* (fearlessness in the wrong); *uddhacca* (restlessness or agitation).
- Both shamelessness and fearlessness of wrong encourage doing immoral acts. Restlessness causes unwise decision making.

The other ten are “occasionals” that appear in only particular types of *akusala citta*:

- **Lobha** (greed); *diṭṭhi* (wrong view); *māna* (conceit); **dosa** (hatred); *issā* (envy); *macchhariya* (extreme greed, also pretending one does not have wealth); *kukkucca* (worry, also feeling low); *thīna* (sloth, sluggishness); *middha* (torpor); *vicikicchā* (doubt arising from temptations).
- *Lobha* and *dosa* are two of the three immoral roots. Sloth and torpor normally rise together and are opposite of *virīya*; they are listed as one factor in Five Hindrances; see, “[Key to Calming the Mind](#).”

6. Twenty-five *sobhana cetasika* (**beautiful mental factors**) appear only in *kusala citta*. Out of those, 19 of them appear in every *kusala citta* and thus are called beautiful universals:

- *Saddhā* (faith); *sati* (moral mindfulness) can become *Sammā Sati*; *hiri* (shame of wrong); *ottappa* (fear of wrong); **alobha** (absence of greed); **adosa** (absence of hate/anger, of which *mettā* or “loving-kindness” is a part); *tatramajjhataṭṭā* (neutrality of mind, of which *upekkhā* is a part); *kāyapassaddhi* (tranquility of mental body); *cittapassaddhi* (tranquility of consciousness); *kāyalahutā* (lightness of mental body); *cittalahutā* (lightness of consciousness); *kāyamudutā* (malleability of the mental body); *cittamudutā* (malleability of consciousness); *kāyakammaññatā* (wieldliness of mental body); *cittakammaññatā* (wieldliness of consciousness); *kāyapāguññatā* (proficiency of mental body); *cittapāguññatā* (proficiency of consciousness); *kāyujjukatā* (rectitude of mental body); *cittujjukatā* (rectitude of consciousness).

The other six are occasionals that appear in only particular types of *kusala citta*:

- There are three abstinences: *Sammā Vācā* (right speech); *Sammā Kammanta* (right action); *Sammā Ājīva* (right livelihood).
- Two Illimitables (limit-less): *karuṇā* (compassion); *muditā* (appreciative joy; joy at other’s moral success).
- **Paññā** or *paññindriya* (wisdom or wisdom faculty). *Sammā Diṭṭhi* leads to *paññā*.

7. Mental factors in the **Noble Eightfold Path** are highlighted in green.

8. **Immoral roots** are highlighted in red. **Moral roots** are highlighted in purple.

9. As a rule, *sobhana* and *asobhana cetasika* CANNOT appear together in a given *citta*.

8.7 Rūpa (Material Form) – Table

Revised April 22, 2020; August 16, 2020; September 5, 2022

We discuss the 28 types of *rūpa* (material form) in Buddha Dhamma. For discussions on *rūpa*, see, “[What are Rūpa? \(Relation to Nibbāna\)](#)” and “[Rūpa \(Material Form\)](#).”

Concretely Produced (<i>Nipphanna</i>)	Abstract (<i>Anipphanna</i>) Rūpa
I. Great Elements (<i>Mahā Bhūta</i>)	VII. Limiting Phenomenon
1. <i>Pathavi</i> (Extension/Hardness)	19. <i>Ākasa dhātu</i> (space element)
2. <i>Āpo</i> (Cohesion/Fluidity)	IX. Communicating (<i>Viññati</i>) Rūpa
3. <i>Tejo</i> (Heat/Hotness)	20. <i>Kāya Viññati</i>
4. <i>Vāyo</i> (Motion/Pushing & Supporting)	21. <i>Vacī Viññati</i>
II. Internal (<i>Pasāda</i>) Rūpa	X. Mutable (<i>Vikāra</i>) Rūpa
5. <i>Cakkhu</i> (eye element)	22. <i>Lahutā</i> (lightness)
6. <i>Sota</i> (ear element)	23. <i>Mudutā</i> (Elasticity)
7. <i>Ghana</i> (nose element)	24. <i>Kammaññatā</i> (weirdness)
8. <i>Jivhā</i> (tongue element)	XI. Material Qualities (<i>Lakkhaṇa Rūpa</i>)
9. <i>Kāya</i> (body element)	25. <i>Upacaya</i> (production)
III. Gocara (Objective) Rūpa	26. <i>Santati</i> (continuity)
10. <i>Vaṇṇa</i> (visible)	27. <i>Jaratā</i> (Decay)
11. <i>Sadda</i> (Sound)	28. <i>Aniccatā</i> (Dissolving)
12. <i>Gandha</i> (Smell)	
13. <i>Rasa</i> (Taste)	
* <i>Phoṭṭhabba</i> (Tangibility, warmth, and movement) comes from 3 <i>mahā bhūta</i> of <i>pathavi, tejo, vāyo</i>	
IV. Bhāva (Faculties of sex) Rūpa	
14. <i>Itthi</i> (Feminine)	
15. <i>Purisa</i> (Masculine)	
V. Hadaya (Mind Base)	
16. <i>Hadaya Vatthu</i> (seat of the mind)	
VI. Life	
17. <i>Jīvitindriya</i> (Life faculty)	
VII. Nutritional	

18. *Oja* (Nutriment)**Types of *Rupā***

- The four great elements (#1 through #4), three *gocara rūpa* (#10, #12, #13), and nutriment (#18), ALWAYS appear together. They can NEVER be detected by themselves. They come together as *suddhaṭṭhaka* (meaning the smallest collection of those eight types of *rūpa*.) See “[The Origin of Matter – Suddhaṭṭhaka](#).”
- **There are nine *rūpā* created ONLY by kammic energy at the *paṭisandhi* moment.** Those are the five *pasāda rūpa* (#5 through #9), and four other *rūpa* (#14 through #17), including the seat of the mind (*hadaya vatthu*).
- **The 16 *rūpa* that are highlighted in blue are fine (*sukuma*) *rūpa*.** The other 12 are coarse (*oḷārika*) *rūpa*.
- *Nipphanna rūpa* are caused by *kamma*, *citta*, *utu* (*tejo*), and *āhāra* (*oja*). The other 10 (*anipphanna rūpa*) are not caused or conditioned by *kamma*, *citta*, *utu* (*tejo*), and *āhāra* (*oja*).
- The ten types of *anipphanna rūpa* (on the right side of the Table) are abstract *rūpa*.

Types of *Rūpā* Present in Different Realms

- All 28 *rūpā* arise in the *kāma*-realms. Eight *rūpā* comprising *sadda*, five *viññatti/vikāra-rūpā*, *jaratā-rūpa*, and *aniccatā-rūpa*, do not arise at the moment of birth (*paṭisandhi*.) During life time, they can arise.
- In the 15 *rūpa* realms, except for *Asañña*-realm, 23 *rūpā* arise (*ghāṇa-pasāda*, *jivhā-pasāda*, *kāya-pasāda*, *itthi-bhava* and *purisa-bhava* being excluded).
- Only 17 *rūpā* arise in the *Asañña* realm. They are the eight *avinibbhoga* (four *mahā bhūta* and *vaṇṇa*, *gandha*, *rasa*, *oja*), *jivita rūpa*, *ākāsa dhātu*, three *lahutadi*, and four *lakkhana-rūpā*;
- No *rūpa* above the *suddhaṭṭhaka* level arises (except for *hadaya vatthu*) in the *arūpa*-realms. Thus, only that trace of “matter” is present anywhere in the 31 realms. Ancient *yogis*, who attained all eight *anāriya jhānā*, could not see any *rūpa* in the *arūpa loka* and deduced that was *Nibbāna*. Only a Buddha can see a *hadaya vatthu*, i.e., a *suddhaṭṭhaka*. Thus, linkage to matter has not been severed in *arūpa loka*.

Definitions from *Dhammasaṅgaṇī*

The following are quoted from the “[WebLink: suttacentral: *Rūpavibhatti* DS 2.2.3](#)” section of *Dhammasaṅgaṇī* of the *Tiṭṭaka*.

- *Katamaṃ taṃ rūpaṃ itthindriyaṃ?* *Yaṃ itthiyā itthiliṅgaṃ itthinimittaṃ itthikuttaṃ itthākappa itthattaṃ itthibhāvo—idaṃ taṃ rūpaṃ itthindriyaṃ.*
- *Katamaṃ taṃ rūpaṃ purisindriyaṃ?* *Yaṃ purisassa purisaliṅgaṃ purisanimittaṃ purisakuttaṃ purisākappa purisattaṃ purisabhāvo—idaṃ taṃ rūpaṃ purisindriyaṃ.*
- *Katamaṃ taṃ rūpaṃ jīvitindriyaṃ?* *Yo tesaṃ rūpīnaṃ dhammānaṃ āyu ṭhiti yapaṇā yāpanā iriyaṇā vattanaṃ pālanā jīvitaṃ jīvitindriyaṃ—idaṃ taṃ rūpaṃ jīvitindriyaṃ.*
- *Katamaṃ taṃ rūpaṃ kāyaviññatti?* *Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā abhikkamantassa vā paṭikkamantassa vā āloketassa vā vilokentassa vā samiñjentassa vā pasārentassa vā kāyassa thambhanā santhambhanā santhambhitattaṃ viññatti viññāpanā viññāpitattaṃ—idaṃ taṃ rūpaṃ kāyaviññatti.*

- *Katamaṃ taṃ rūpaṃ **vacīviññatti**? Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā vācā girā byappatho udīraṇaṃ ghoso ghosakammaṃ vācā vacībhedo—ayaṃ vuccati vācā. Yā tāya vācāya viññatti viññāpanā viññāpitattam—idaṃ taṃ rūpaṃ vacīviññatti.*
- *Katamaṃ taṃ rūpaṃ **ākāsadhātu**? Yo ākāso ākāśagataṃ aghaṃ aghagataṃ vivaro vivaragataṃ asamphuṭṭhaṃ catūhi mahābhūtehi—idaṃ taṃ rūpaṃ ākāśadhātu.*
- *Katamaṃ taṃ rūpaṃ rūpassa **lahutā**? Yā rūpassa lahutā lahupariṇāmatā adandhanatā avitthanatā—idaṃ taṃ rūpaṃ rūpassa lahutā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **mudutā**? Yā rūpassa mudutā maddavatā akakkhaḷatā akathinatā—idaṃ taṃ rūpaṃ rūpassa mudutā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **kammaññatā**? Yā rūpassa kammaññatā kammaññattam kammaññabhāvo—idaṃ taṃ rūpaṃ rūpassa kammaññatā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **upacayo**? Yo āyatanānaṃ ācayo, so rūpassa upacayo— idaṃ taṃ rūpaṃ rūpassa upacayo.*
- *Katamaṃ taṃ rūpaṃ rūpassa **santati**? Yo rūpassa upacayo, sā rūpassa santati— idaṃ taṃ rūpaṃ rūpassa santati.*
- *Katamaṃ taṃ rūpaṃ rūpassa **jaratā**? Yā rūpassa jarā jīraṇatā khaṇḍiccaṃ pāliccaṃ valittacatā āyuno saṃhāni indriyānaṃ paripāko—idaṃ taṃ rūpaṃ rūpassa jaratā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **aniccatā**? Yo rūpassa khayō vayo bhedo paribhedo aniccatā antaradhānaṃ—idaṃ taṃ rūpaṃ rūpassa aniccatā.*
- *Katamaṃ taṃ rūpaṃ kabalīkāro **āhāro**? Odano kummāso sattū maccho maṃsaṃ khīraṃ dadhi sappi navanītaṃ telaṃ madhu phāṇitaṃ, yaṃ vā panaññampi atthi rūpaṃ yaṃhi yaṃhi janapade tesāṃ tesāṃ sattānaṃ mukhāsiyaṃ dantavikhādanaṃ galajjhoharaṇīyaṃ kucchivitthambhanaṃ, yāya ojāya sattā yāpenti—idaṃ taṃ rūpaṃ kabalīkāro āhāro.*

8.8 Rūpa – Generation Mechanisms

1. *Rūpa* (or matter) can be generated by four causes: *kamma*, *citta*, *utu*, and *Āhāra* (food). I will discuss these in detail later.

- *Kamma* here refers to volition (*cetanā*). The 25 kinds of *kamma* that produce *rūpā* are the volitions of the 12 *akusala citta*, 8 great *kusala citta*, and the five *rūpa loka kusala citta*. These *rūpa* are created with a time lag, when *kamma vipāka* bear fruits, like at the *paṭisandhi* to a new life. The three *rūpa dasaka* of *vatthu*, *kāya*, and *bhava* are created at *paṭisandhi* by *kamma vipāka*.
- The *rūpa* produced by the *citta* arise **at the same time as the *citta*** themselves, and only at the rising part of the *citta*. Out of the 89 possible *citta*, 75 *citta* can produce *rūpa* (4 *arūpa loka vipāka citta* and the two sets of fivefold sense consciousness cannot produce *rūpa*).
- Thus both *kammaja* and *cittaja* *rūpa* have mind as the direct cause. Both of these decay rapidly and are converted to *utuja rūpa*. What we normally see are the *utuja rūpa* and *āhārajā rūpa*, which have their origins also in the great elements of *tejo* and *oja*.
- The great element *tejo* is responsible for producing *utu samutthana rūpa*: Beginning from the moment of rebirth-linking, the internal *tejo* element found in the *rūpa kalāpas* born of *kamma* combines with the external *tejo* and starts producing organic material phenomena originating from *tejo*. Thereafter the *tejo* element in the *rūpa kalāpas* born of all four causes produces organic material phenomena born of *tejo* element throughout the life. Externally, *tejo* element also produces inorganic material phenomena, such as climatic and geological transformations.
- The nutritive essence, *oja*, is present in all *rūpa-kalāpas* both inside the body (internal) and outside the body (external). The external food, which is eaten, is digested in the stomach and dispersed through blood to all parts of the body. So the internal *oja* and the external *oja* meet in every part of the body. The combination of internal and external *oja* produce *āhārajā rūpas*.

2. The 8 *avinibbhoga rūpā* of *pathavi*, *āpo*, *tejo*, *vāyo*, *vaṇṇa*, *gandha*, *rasa*, and *oja* are ALWAYS found together. That unit or *kalāpa* is the smallest *rūpa* unit and is called the pure octad (*suddhaṭṭhaka*). **Those 8 *avinibbhoga rūpā* and the *ākāsa dhātu* are produced by all four causes.**

3. The four *lakkhaṇa rūpā* of *upacaya*, *santati*, *jaratā*, and *aniccatā* are not produced by any cause. They represent the nature of *rūpā*.

4. The remaining 15 *rūpa* are produced by different combination of the four possible causes as shown in the table below:

	Kamma Born	Citta Born	Utu Born	Āhāra Born
Cakkhu (eye)	Yes			
Sota (ear)	Yes			
Ghana (nose)	Yes			
Jivhā (tongue)	Yes			
Kāya (body)	Yes			
Sadda (sound)		Yes	Yes	
Itthi Bhva (femininity)	Yes			

Purisa (masculine)	Yes			
Hadaya vatthu (heart base)	Yes			
Jivitindriya (life faculty)	Yes			
Kāya viññatti (bodily intimation)		Yes		
Vacī Viññatti (vocal intimation)		Yes		
Lahuta (lightness)		Yes	Yes	Yes
Muduta (malleability)		Yes	Yes	Yes
Kammaññata (wieldiness)		Yes	Yes	Yes

8.9 Rūpa Kalāpa (Grouping of Matter)

Revised September 15, 2020; September 6, 2022; October 17, 2022 (#7); December 3, 2022 (#7)

1. There are 28 *rūpa* types discussed in *Abhidhamma*: “[Rūpa \(Material Form\) – Table](#).” They are not found separately in nature. The four causes produce them through tiny material groups called *rūpa kalāpā* or “elementary groups of matter.”

- All *rūpā* have origins in the four great elements of *pathavī*, *āpo*, *tejo*, and *vāyo*. However, they all arise together in the smallest unit of matter, a *suddhaṭṭhaka*. See “[The Origin of Matter – Suddhaṭṭhaka](#).” Four more *rūpā* (*vaṇṇa*, *gandha*, *rasa*, *oja*) derived from the great elements are in a *suddhaṭṭhaka*, making it an **octad** (composed of **eight** or an **aṭṭaka**.)
- There are 15 other elementary units (*rūpa kalāpā*) that derive from *suddhaṭṭhaka*. All 16 types of *rūpa kalāpā* are not further divisible. They are *avinibbhoga rūpa*.
- Let us briefly discuss them.

2. There are three *rūpa kalāpā* that have **nine units**: A *suddhaṭṭhaka* “energized” by *kammic* energy becomes a *jīvita navaka* (vital **nonad**) of nine units. That added unit is an “energy unit” called a *jīvita rūpa*. That *jīvita rūpa* keeps a physical body alive. Another element of nine units, a *sadda navaka* (sound nonad) is responsible for the sound created by *utu*, i.e., an *utuja rūpa*. Another is *kāyaviññatti navaka* created by *cittā* responsible for bodily intimation.

- Eight types of *rūpa kalāpā* have **ten units (dasaka or decad)** created by *kammic* energy: Here a *suddhaṭṭhaka* combines with a *jīvita rūpa* and another unit created by *kammic* energy to become a *dasaka*. Those eight types of *dasaka* are vital parts of a living being. For example, a *cakkhu pasāda rūpa* (together with the other nine units) creates a *cakkhu dasaka* responsible for seeing. In the same way *sota dasaka*, *ghana dasaka*, *jivhā dasaka*, *kāya dasaka* arise. *itthibhāva rūpa* and *purisabhāva rūpa* give rise to *itthibhāva dasaka* and *purisabhāva dasaka*. The seat of the mind, *vatthu dasaka* arises with the *hadaya vatthu*.
- The following are created only by *citta* (thoughts): One is *vacīvīññatti-sadda-dasaka* (vocal intimation decad) responsible for speech. *Kāyaviññatti-lahutādi-dvadasaka* (dodecad of bodily intimation) of 12 units with *kāyaviññatti* and three *lahutādi rūpa*. Another is *vacivīññatti-sadda-lahutādi-terāsaka* (tricad of sound) of 13 units with *vacivīññatti*, three *lahutādi rūpa*, and *sadda*.
- Then there is *lahutādi-ekadasaka* (*suddhaṭṭhaka* + *lahuta* + *muduta* + *kammaññata*) with 11 units created by *citta*. There is also *sadda-lahutādi-dvadasaka* (*suddhaṭṭhaka* + *lahuta* + *muduta* + *kammaññata* + *sadda*) with 12 units created by *utu*.

3. All *rūpa kalāpā* have the following characteristics.

1. All the *rūpā* in a *rūpa kalāpa* arise together, i.e., they have a common genesis.
2. They also cease or dissolve together, i.e. they have a common cessation.
3. They all depend on the four great essentials present in the *kalāpa* for their arising, i.e. they have a common dependence.
4. They are so thoroughly mixed that they cannot be distinguished, i.e. they co-exist.

4. It should be noted that *kalāpā* are so small that they are indistinguishable from pure energy. The origin of *rūpa* is a *javana citta*, which is formless and mass-less. Science has shown that the smallest “particle” detected, the Higgs boson, is indistinguishable from energy. See, “[The Origin of Matter – Suddhaṭṭhaka](#).”

5. There are 17 types of *kalāpā* produced in 21 ways:

9 *kammaja kalāpā* 6 *cittaja kalāpā* 4 *utuja kalāpā* 2 *āhāraja kalāpā* as shown below:

	Kamma Born	Citta Born	Utu Born	Āhāra Born
<i>Cakkhu dasaka</i> (eye decad)	Yes			
<i>Sota dasaka</i> (ear decad)	Yes			
<i>Ghana dasaka</i> (nose decad)	Yes			
<i>Jivhā dasaka</i> (tongue decad)	Yes			
<i>Kāya dasaka</i> (body decad)	Yes			
<i>Itthi dasaka</i> (female decad)	Yes			
<i>Purisa dasaka</i> (male decad)	Yes			
<i>Vatthu dasaka</i> (base decad)	Yes			
<i>Jivita navaka</i> (vital nonad)	Yes			
<i>Suddhaṭṭaka</i> (pure octad)		Yes	Yes	Yes
<i>Kāyaviññati navaka</i> (body intimation nonad)		Yes		
<i>Vacī viññati sadda dasaka</i> (vocal intimation decad)		Yes		
<i>Lahutādi eka dasaka</i> (undecad of mutability)		Yes	Yes	Yes
<i>Kayaviññati Lahutādi dva dasaka</i> (undecad of mutability)		Yes	Yes	
<i>Vaciviññati Sadda Lahutādi terasaka</i> (tridecad of mutability)		Yes		
<i>Sadda navaka</i> (sound decad)			Yes	

6. Internal and External Kalāpā

All the 21 *rūpa kalāpā* mentioned above occur internally in living beings. *Itthibhāva-dasaka* does not occur in males. Similarly, *pumbhava-dasaka* (or *purisabhāva-dasaka*) does not occur in females. For those who are born blind or deaf, *cakkhu-dasaka* or *sota-dasaka* are not present.

- **In the external (*bahiddha*) world, only the two *utuja-kalāpā* are found.** All inanimate things, such as trees, stones, earth, water, fire, corpses, etc., are made up of *utuja-suddhaṭṭhaka kalāpā*. The sounds produced by beating two sticks together, rubbing branches in the wind, or by instruments such as violin, piano, radio, cassettes, etc., are *utuja-sadda-navaka kalāpā*.

- From the internal *rūpas*, *kāya-pasāda*, *bhava-rūpa* (femininity and masculinity), *cittaja-rūpa*, *utuja-rūpa* and *āhāraja-rūpa* spread all over the body. So they will be present in the eye, the ear, the nose, the tongue and in every part of the body.

7. *Rūpa* in *Kāmaloka*

If circumstances permit, all 28 material qualities occur undiminished in an individual during a lifetime in *kāmaloka* (sense-sphere).

- In womb-born creatures, only three *kammaja-kalāpā* comprising body-decad, sex-decad and heart decad are manifested at the moment of conception (at *paṭisandhi*).

Here again, the sex-decad may not be manifested in some particular individuals. After conception, during life, the eye-decad and the rest are manifested slowly in due order. Of the groups of material qualities produced in four ways, *kammaja-rūpa* starts to form at the moment of conception and forms incessantly at every minor instant. *Cittaja-rūpa* begins to form from the second moment of consciousness, i.e., from the arising instant of the first *bhavaṅga*, which follows the rebirth-consciousness. *Cittaja-rūpa* continues to be formed for a lifetime.

- *Utuja-rūpa* starts to form from the existing instant of rebirth consciousness. The reason is that the *tejo-dhātu* (*utu*) present in the first *kammaja-kalāpā* comes to the static stage (*īhiti*) at that instant. From that time onward, the *tejo-dhātu* produces *utuja-rūpa* at every moment. Since *tejo-dhātu* is present in every *kalāpa*, every *kalāpa*, from the time it reaches the static stage, produces new *utuja-kalāpā* at every minor instant. And the new *utuja-kalāpā*, from the time they reach the static stage, again produce new *utuja-kalāpā* at every minor instant. So this process goes on forever.

Every *kalāpa* also contains the nutritional essence of *oja*. But *āhāraja-rūpa* forms when internal *oja* meets external *oja* at the time of diffusion of nutritional essence, and the combination of internal and external *oja* comes to the static stage. From that instant, *āhāraja-rūpa* is also formed at every minor instant. Old groups dissolve and disappear as new groups of material qualities are incessantly produced. Thus, the material phenomena go on uninterruptedly in the sense-sphere till the end of life like the flame of a lamp, or river stream.

Material Phenomena at Death: At the time of death, psychic life and physical life must cease together. This means that all *kammaja rūpa* that contains physical life must cease at the time of death. So at the beginning of the seventeenth *citta*, reckoned backward from the death-consciousness (*cuti citta*), the last *kammaja rūpa* is formed. This last *kammaja rūpa* will cease at the dissolving instant of the death-consciousness. *Cittaja rūpa* is formed till the arising instant of the *cuti citta*. This last *cittaja rūpa* will have lasted for a conscious-moment at the dissolution of *cuti citta* and thus will perish in another sixteen conscious-moments, which happens almost instantly. *āhāraja rūpa* is formed till the dissolving instant of the *cuti citta* because the support required for the formation of *āhāraja rūpa* can be furnished by *citta* up to that time. So at death, that last-formed *āhāraja rūpa* lasted only one minor instant. However in another fifty minor instants (*rūpa* lifespan – 51 minor instants or 17 conscious-moments), that *āhāraja rūpa* also ceases. Thus at the time of death, *kammaja rūpa*, *cittaja rūpa* and *āhāraja rūpa* cease almost instantly.

- But *utuja-rūpa* form and dissolve intill the corpse is converted into dust. A corpse consists of only *utuja-rūpa*.
- So when a person dies and is reborn in another life, material phenomena similarly arise from the instant of conception and go on arising till the time of death.

Arising of Material Phenomena in *Rūpa*-planes

In the *rūpa*-plane, nose-decad, tongue-decad, and *āhāraja-kalāpā* do not arise. At the *opapātika* rebirth, five *kammaja-kalāpā* (*vatthu*, *bhāva*, *kāya*, *cakkhu*, and *sota*) arise. During life, however, *cittaja kalāpā* and *utuja kalāpā* also arise. For the *Asañña Brahmā*, *hadaya vatthu* is there, but it is shielded by the

“physical body,” which has no *mana indriya*. Thus, it cannot interact with *dhammā* (or *viññāṇa dhātu*), and *cittā* cannot arise. Therefore, *cittaja kalāpā* do not arise.

- Thus in *kāma loka* and *rūpa loka*, the process of the arising of material phenomena should be understood in two ways, that is (1) at rebirth and (2) during life.
- For details, see “[Body Types in 31 Realms – Importance of Manomaya Kaya](#),” and “[Bhūta and Yathābhūta – What Do They Really Mean](#).”

8.10 Akusala Citta and Akusala Vipaka Citta

Revised November 4, 2017; October 22, 2021; October 27, 2021

Twelve Types of *Akusala Citta*

All ten *akusala kamma* are done with these 12 *akusala citta*. There are 8 greed-rooted, 2 hatred-rooted, and 2 delusion-rooted *citta*. Of course, *citta* (pronounced “chiththā”) are thoughts; any speech or bodily action starts with a thought.

- See, “[Conditions for the Four Stages of Nibbāna](#)” for a list of 12 *akusala citta*.

Both greed-rooted and hatred-rooted also have delusion as a root.

	Root	Assoc. with	Dissoc. with	Feeling	<i>Sasankhārika?</i>
1	Greed	Wrong view	—	Pleasure	No
2	Greed	Wrong view	—	Pleasure	Yes
3	Greed	—	Wrong view	Pleasure	No
4	Greed	—	Wrong view	Pleasure	Yes
5	Greed	Wrong view	—	Equanimity	No
6	Greed	Wrong view	—	Equanimity	Yes
7	Greed	—	Wrong view	Equanimity	No
8	Greed	—	Wrong view	Equanimity	Yes
9	Dislike	Aversion	—	Displeasure	No
10	Dislike	Aversion	—	Displeasure	Yes
11	Delusion	Vicikicchā	—	Equanimity	—
12	Delusion	Uddacca	—	Equanimity	—

1. The first *citta* is described as, “a thought rooted in greed (and delusion), associated with wrong views, accompanied by pleasure.” The others can be stated the same way.

- Those *cittā* that are associated with wrong views are the worst, even though wrong views are listed as #10 on the ten immoral actions, see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”
- *Citta* generated with pleasure means one is enthusiastic about it because of one’s habits (*gati*) or one starts liking it. For example, one who likes to go fishing has a bad habit; he gets pleasure by just thinking about it; thus it is stronger than one done with equanimity.
- A hateful *citta* is always arises with displeasure, but that displeasure can arise with ignorance. For example, someone who has wrong views may generate displeasure towards a moral person merely because of one’s wrong views. I have encountered some people who got upset with me when I pointed out that rebirth has evidence for it.
- *Sasankhārika* means with less *javana* power.
- See, the notes at the end of the post “[Conditions for the Four Stages of Nibbāna](#)” for details.

2. Since *vicikicchā* is also due to wrong views, those five *cittā* marked in red are the strongest *akusala citta* done with “wrong views” or “*diṭṭhi*.” Those five *cittā* stop arising in the mind of a *Sotāpanna*.

They can condition one’s mind to a “*gati*” suitable for birth in the *apāyā*; see, “[What is in a Thought? Why Gati are so Important?](#).”

- The *vyāpāda* or the strong hate — that makes one eligible for birth in the *apāyā* — actually arises from the first four types of *lobha citta*. It is also called “*dvesa*” or “*dvesha*” which means “second manifestation” or (“*dvi*” + “*vesa*”) of *lobha*. When one is burdened with extreme greed, it can turn to the second manifestation of extreme hate for anyone in the way.
 - Upon attaining the *Sotāpanna* stage, such habits or “*gatī*” are removed, and thus no adverse *kamma vipāka* comes to mind at the dying moment, as we point out below. The “*pati+ichcha sama+uppada*” or what is born is similar to what is grasped, is at play at the dying moment. One automatically grasps things one has a habit of liking; they automatically come to the forefront of the mind at the dying moment.
3. The other 7 *akusala citta* are stopped from arising in stages as a *Sotāpanna* cultivates the Path further.
- The two dislike (*paṭigha*)-rooted *cittā* (together with some potency of the remaining 4 greed-based *citta*, i.e., *kāma rāga*) are reduced at the *Sakadāgāmī* stage.
 - Those two dislike-rooted *cittā* are stopped from arising at the *Anāgāmī* stage. Also, the potency of the remaining 4 greed-based *citta*, i.e., *kāma rāga* is reduced to just *kāma* level.
 - **Finally, the remaining 4 greed-based *citta* and the *uddhacca citta* are removed at the *Arahant* stage.** Thus an *Arahant* will never experience an *akusala citta*.

Seven Types of *Akusala Vipāka Citta*

4. These 12 types of *citta* lead to 7 types of *vipāka* (resultant) *citta*.
- None of the *vipāka citta* has any unwholesome roots (greed, hate, delusion); of course, they also do not have the wholesome roots. **Thus they are called rootless (*ahetuka*) *citta*.**
5. Five of these *akusala vipāka citta* are the ones that lead to (undesirable) sense events through the five physical senses. Thus they are responsible for eye consciousness (*cakkhu viññāṇa*), ear consciousness (*sota viññāṇa*), nose consciousness (*ghāṇa viññāṇa*), taste consciousness (*jivhā viññāṇa*), and body consciousness (*kāya viññāṇa*).
- Except for the body consciousness which is accompanied by pain, the other four are accompanied by equanimity; see, “[Avyākata Paticca Samuppāda for Vipāka Viññāṇa](#)” and “[How Are Paticca Samuppāda Cycles Initiated?](#)”
 - Thus any feelings of displeasure etc due to what is seen, heard, smelled, or tasted, are in the thoughts that follow this “event” experienced through one of the physical senses. We will discuss this in detail in the *Abhidhamma* section.
6. The sixth *akusala vipāka citta* is called receiving consciousness accompanied by equanimity (*upekkhā-sahagata sampatīcchana citta*). This is a *citta* that accepts the sense impression to the mind (we will discuss it in the *Abhidhamma* section).
7. The seventh *akusala vipāka citta* is called the investigating consciousness accompanied by equanimity (*upekkhā-sahagata santīraṇa citta*). This is the *citta* that is responsible for the birth in the *apāyā* (lowest four realms), i.e., it acts as the *paṭisandhi citta* for the birth in the *apāyā*.
8. One may wonder how a *Sotāpanna* avoids the *apāyā*, because he/she is still capable of generating the 7 *cittā* that are not associated with *diṭṭhi* (see the Table above), and thus it is possible to generate this *apāyagāmī-paṭisandhi citta*.
- The point is that after becoming a *Sotāpanna*, such *vipāka* thoughts do not come to the mind at the last thought processes; **only the good *kamma vipāka* come to the forefront of the mind close to the dying moment because he/she no longer has the “*gatī*” suitable for a birth in the *apāyā*.**
9. It is hard to give up one’s bad habits (“*gatī*”), mainly because one does not fully comprehend the true nature of the world, i.e., *anicca*, *dukkha*, *anatta*, and thus has wrong views about this world with 31

realms. One needs to comprehend that one's actions have consequences not only in this life, but (mainly) in the future lives; also, whatever one gains by such harmful actions is just temporary, AND do not leave one with a peaceful mind.

8.11 **37 Factors of Enlightenment**

Revised January 20, 2016; May 13, 2019; March 11, 2020; August 20, 2022 (added references)

1. The 37 factors of Enlightenment (*Bodhipakkhiya Dhamma*) are the combined number of individual factors in:

- Four Factors of Mindfulness (*Cattāro Satipaṭṭhāna*); see “[Mahā Satipaṭṭhāna Sutta](#),”
- Four Supreme Efforts (*Cattāro Sammappadhāna*); see, for example, “[WebLink: suttacentral: Padhāna Sutta \(AN 4.13\)](#).”
- Four Bases of Mental Power (*Cattāro Iddhipāda*); see a series of suttas starting with the “[WebLink: suttacentral: Apāra Sutta \(SN 51.1\)](#).”
- Five Faculties (*Pañca Indriya*); see a series of suttas starting with the “[WebLink: suttacentral: Suddhika Sutta \(SN 48.1\)](#).”
- Five Powers (*Pañca Bala*); see, for example, “[WebLink: suttacentral: Punakūta Sutta \(AN 5.16\)](#).”
- Seven Factors of Enlightenment (*Satta Bojjhaṅga*); see the series of suttas starting with “[WebLink: suttacentral: Himavanta Sutta \(SN 46.1\)](#).” and
- Factors of the Noble Eightfold Path (*Ariya Aṭṭhaṅgika Magga*); see the series of suttas starting with “[WebLink: suttacentral: Kalyānamitta Sutta \(SN 45.49\)](#).”

2. These factors focus on various mental factors (*cetasika*) and *citta* that incorporate those *cetasika*. They are labeled with different names under each category in the Table below to highlight their application.

- For example, the *paññā cetasika* is labeled as *vīmaṃsā* in Four Bases of Mental Power, as *dhammavicaya* in *Satta Bojjhaṅga*, and as *Sammā Dīṭṭhi* in the Noble Eightfold Path.
- Under each category, I have listed the term used for that *cetasika* in that category. For example, in the Noble Eightfold Path, *Sammā Vāyāma* is the *virīya cetasika*.
- Thus even though there are 37 factors of Enlightenment, there are **only 14 cetasika** that will be cultivated while cultivating all seven above categories.
- Those seven categories are all interrelated. Thus all 37 factors may be cultivated by focusing only on *Cattāro Satipaṭṭhāna*, *Satta Bojjhaṅga*, or the Noble Eightfold Path.

3. In the “[WebLink: suttacentral: Bhāvanā Sutta \(AN 7.71\)](#),” the Buddha explained that one needs to cultivate those 37 factors to reach Nibbāna.

- However, there is no need to go through all of them individually. Cultivation of one set in full WILL fulfill the others.
- For example, in the “[WebLink: suttacentral: Mahāsatipaṭṭhāna Sutta \(DN 22\)](#)” Buddha explained that the cultivation of *Satipaṭṭhāna* is a guaranteed way to *Nibbāna*.
- Similarly, “[WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#)” explains that the cultivation of *Ānāpānassati* will fulfill *Satipaṭṭhāna*.
- Therefore, there can be many different ways to get to *Nibbāna* (*Arahanthood*.) The key step is to get to the *Sotāpanna Anugāmi* stage by comprehending the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. See “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”

4. It is also important to realize that *cetasika* is related to one's character (*gati*): “[Cetasika – Connection to Gati](#)”

5. The Four Supreme Efforts (*Cattāro Sammappadhāna*) are the efforts to purify the mind: (i) **remove** defilements (*akusala*) that have arisen, (ii) **prevent** new defilement (*akusala*) from arising, (iii) **enhance**

wholesome states (*kusala*) that have arisen, (iv) **initiate** new wholesome states (*kusala*). [WebLink: suttacentral: AN 4.14 Samvarasutta \(Restraint\)](#).

- Not to let an unwholesome thought arise which has not yet arisen. → **restraint (00)**
- Not to let an unwholesome thought continue which has already arisen. → **abandonment (01)**
- To make a wholesome thought arise which has not yet arisen. → **development (10)**
- To make a wholesome thought continue which has already arisen. → **protection (maintaining) (11)**

6. All 37 factors of enlightenment are fulfilled at the Arahant stage.

Item	Parameter Involved	Four Supreme Efforts	Iddhipada	Five Faculties	Five Powers	Four Factors of Mindfulness	7 Factors of Enlightenment	Path Factors	Count
1	Paññā (wisdom)		vīmaṃsā	paññā	paññā		dhammavicaya	sammā diṭṭhi	5
2	Vitakka (initial application)							sammā saṅkappa	1
3	Sammā vācā							sammā vācā	1
4	Sammā kammanata							sammā kammanata	1
5	Sammā ājīva							sammā ājīva	1
6	Viriya	four efforts (see #4 above)	virīya	virīya	virīya		virīya	sammā vāyāma	9
7	Sati (mindfulness)			sati	sati	kāya, vedanā, citta, dhamma	sati	sammā sati	8
8	Samādhi (one-pointedness)			samādhi	samādhi		samādhi	sammā samādhi	4
9	Saddhā (faith)			saddhā	saddhā				2

8.12 Conditions for the Four Stages of Nibbāna

Revised August 3, 2016; Revised November 19, 2018; August 21, 2022

1. The following Table shows the conditions to be fulfilled (i.e., factors to be eliminated) to attain each stage of *Nibbāna*.

- Each stage of *Nibbāna* can be characterized in various ways: The removal of ten *akusala citta*, fourteen types of *asobhana cetasika* associated with *citta*, ten *saṃyojana*, seven types of *anusaya*, four types of *āsava*, three types of *taṇhā*, etc.
- See #4 below for links to posts explaining those terms.

2. For example, to attain the *Sotāpanna* stage, three of the ten *saṃyojana* (or the ten fetters) are removed, *akusala citta* #1, 2, 5, 6, and 11 are removed (see #4 below for a list of the 12 types of *akusala citta*.) Also, the *apāyagāmi* strength in the other *citta* is removed at the *Sotāpanna* stage. *Citta* #9 and 10 weaken at lower stages and are removed at the *Anāgāmi* stage. The remaining *citta* (#3, 4, 7, 8 and 12) weaken with each stage of *magga phala* and are removed at the *Arahant* stage. There is a nice chart on p. 112 of *Bhikkhu Bodhi's* book “Comprehensive Manual of Abhidhamma.”

<i>Ariya Stage</i>	<i>Saṃyojana</i>	<i>Akusala Citta</i>	<i>Anusaya</i>	<i>Āsava (Asaya)</i>	<i>Kilesa (Asobhana Cetasika)</i>	<i>Taṇhā</i>	<i>Rāga</i>
<i>Sotāpanna</i>	<i>sakkāya diṭṭhi</i> ¹ , <i>vicikicchā</i> ² , <i>sīlabbata parāmāsa</i> ³	1, 2, 5, 6, 11 Also removes <i>apāyagāmi</i> strength in the rest	<i>diṭṭhi</i> , <i>vicikicchā</i>	<i>diṭṭhāsava</i>	Removed: <i>diṭṭhi</i> ⁶ , <i>vicikicchā</i> ¹⁴ , [<i>thina</i> ¹² , <i>middha</i> ¹³] Reduced: Rest of the <i>cetasika</i> . [<i>lobha</i> ⁵ , <i>dosa</i> ⁸ , <i>moha</i> ¹ to <i>rāga</i> ⁵ , <i>paṭigha</i> ⁸ , <i>avijjā</i> ¹]	<i>vibhava taṇhā</i>	All three <i>rāga</i> reduced
<i>Sakadāgāmi</i>	<i>kāma rāga</i> ⁴ (reduced) <i>paṭigha</i> ⁴ (reduced)	weakens 9, 10 also weakens <i>kāma rāga</i> in 3, 4, 7, 8	<i>kāma rāga</i> (reduced) <i>paṭigha</i> (reduced)	<i>kāmāsava</i> (reduced)	Especially reduced: <i>kāma rāga</i> ⁵ and <i>paṭigha</i> ⁸	Reduced: <i>kāma taṇhā</i>	All three <i>rāga</i> further reduced
<i>Anāgāmi</i>	<i>kāma rāga</i> ⁴ , <i>paṭigha</i> ⁵	9, 10 also removes <i>kāma rāga</i> in 3, 4, 7, 8	<i>kāma rāga</i> , <i>paṭigha</i>	<i>kāmāsava</i>	Removed: <i>kāma</i>	Removed: <i>kāma taṇhā</i>	<i>kāma rāga</i>

					<i>rāga</i> ⁵ and <i>paṭigha</i> ⁸ Regarding <i>cetasika</i>: <i>dosa</i> ⁸ , <i>issa</i> ⁹ , <i>macchariya</i> ¹⁰ , <i>kukkucca</i> ¹ removed.		
<i>Arahant</i>	<i>rūpa rāga</i> ⁶ , <i>arūpa rāga</i> ⁷ , <i>māna</i> ⁸ , <i>uddhacca</i> ⁹ , <i>avijjā</i> ¹⁰	3, 4, 7, 8, 12 (see below for a list of <i>akusala citta</i>)	<i>bhava rāga</i> , <i>māna</i> , <i>avijjā</i>	<i>bhavāsava</i> , <i>avijjāsava</i>	Removed: rest of the <i>asobhana cetasika</i> [<i>avijjā</i> ¹ , <i>ahirika</i> ² , <i>anattappa</i> ³ , <i>uddhacca</i> ⁴ , <i>māna</i> ⁷]	<i>bhava tanhā</i>	<i>rūpa rāga</i> , <i>arūpa rāga</i>

[***Saṁyojana*: Five Lower Bonds** (*pañca orambhāgiya saṁyojanā*) 1. *sakkāya diṭṭhi*, 2. *vicikicchā*, 3. *sīlabbata parāmāsa*, 4. *kāma rāga*, 5. *paṭigha*, **Five Upper Bonds** (*pañca uddhambhāgiya saṁyojanā*) 6. *rūpa rāga*, 7. *arūpa rāga*, 8. *māna*, 9. *uddhacca*, 10. *avijjā*.]

***Asobhana cetasika*:** 1. *moha* → *avijjā*, 2. *ahirika*, 3. *anattappa*, 4. *uddhacca*, 5. *lobha* → *rāga*, 6. *diṭṭhi*, 7. *māna*, 8. *dosa* → *paṭigha*, 9. *issa*, 10. *macchariya*, 11. *kukkucca*, 12. *thina*, 13. *middha*, 14. *vicikicchā*. Notes: → means “reduced to” after *Sotāpanna* stage.]

3. The ability to commit *akusala kamma* also is removed in stages as one progresses and is completely removed only at the *Arahant* stage. It is important to note that a *Sotāpanna* completely removes only one *akusala kamma*, that of having wrong views (*micchā diṭṭhi*): “What is the only Akusala Removed by a Sotāpanna?.” But this leads to removing many *kilesa* (mental impurities); see the Table.

4. *Āsava* and *anusaya* are discussed in the post, “Āsava, Anusaya, and Gati (Gathi).” *Kilesa* is discussed in “Diṭṭhi (Wrong Views), Sammā Diṭṭhi (Good/Correct Views).” For a discussion on *Dasa Saṁyojana*, see “Dasa Saṁyojana – Bonds in Rebirth Process.” The fourteen types of *asobhana cetasika* are discussed in “Cetasika (Mental Factors).”

- See “Kāma Tanhā, Bhava Tanhā, Vibhava Tanhā” for the three types of *tanhā*. Another way is to categorize into three types of *rāga*, i.e., *kāma rāga*, *rūpa rāga*, and *arūpa rāga*; see “Lobha, Dosa, Moha versus Rāga, Paṭigha, Avijjā.”

5. The 12 types of *akusala citta* are listed in, “Akusala Citta and Akusala Vipāka Citta.” But I thought it would be more explanatory to list them. The numbers below correspond to the numbers in the Table.

Lobha (Greedy) Citta (Also has the *moha* root)

1. *Citta* connected with a wrong view, accompanied by pleasure, and done with habit.

2. *Citta* **connected with a wrong view**, accompanied by pleasure, and done reluctantly.
3. *Citta* NOT connected with a wrong view, accompanied by pleasure, and done with habit.
4. *Citta* NOT connected with a wrong view, accompanied by pleasure, and done reluctantly.
5. *Citta* **connected with a wrong view**, accompanied by a neutral mind, and done with habit.
6. *Citta* **connected with a wrong view**, accompanied by a neutral mind, and done reluctantly.
7. *Citta* NOT connected with a wrong view, accompanied by a neutral mind, and done with habit.
8. *Citta* NOT connected with a wrong view, accompanied by a neutral mind, and done reluctantly.

Dosa (Hateful) Citta (Also has the *moha* root)

9. *Citta* associated with hate, accompanied by displeasure, done with habit.
10. *Citta* associated with hate, accompanied by displeasure, done reluctantly.

Moha Citta (only with the *moha* root)

11. *Citta* accompanied by a neutral mind, **associated with *vicikicchā*** (not aware of bad consequences)
12. *Citta* accompanied by a neutral mind, associated with *uddhacca* (unfocused).

Notes:

1. Even though recent Abhidhamma literature categorize *lobha* and *dosa citta* as *asaṅkhārika* (unprompted) and *sasaṅkhārika* (prompted), in original Abhidhamma, they were not categorized as such.
2. For example, the two *dosa-mūla cittā* are:
 - i. *Domanassa saḥagata paṭigha-sampayutta citta*.
 - ii. *Domanassa saḥagata sasaṅkhārika paṭigha-sampayutta citta*.
 - The first *citta* arises due to *sansāric* habits and thus is more potent. For example, someone who tends to easily get angry, normally generates such potent *citta*.
 - On the other hand, another person without such a habit, may not generate such a *citta* unless “forced hard”; it is done with reluctance, “when pushed to the limit”, or if the perceived “sense pleasures” are enticing. Then he/she is actually “incorporating new “*saṇ*” or initiating a new habit; thus, the name “*sasaṅkhārika*.”

8.13 Ultimate Realities – Table

1. This Table lists the three kinds of ultimate realities (*paramattha dhamma*) in this world of 31 realms; they are conditioned, i.e., they arise due to causes and perish subsequently on their own; nothing in this world is permanent. They do not arise if there are no causes, and when that happens *Nibbāna* is the result.

- *Nibbāna* is the unconditioned reality. It is attained when the six causes (*lobha, dosa, moha, alobha, adosa, amoha*) are not there. Then the mind cannot get a “foothold” anywhere in the material world.
- Cultivating the three causes of *alobha, adosa, amoha* (together with removing *lobha, dosa, moha*) is needed in following the Noble Eightfold Path, and when wisdom grows, all causes will be rejected by the mind automatically at the end.

2. Ultimate realities can be compared to the fundamental particles in physics. Even though it was believed in the early stages that atoms were the fundamental particles, now there are about 32 of such particles; but now the “particle nature” is dissolving into “energy packets” in elementary particle physics. In Buddha Dhamma, the 28 types of *rūpa* are very fine, and cannot be “seen” even with *abhiññā* powers; they are “energy packets.”

3. The table also shows how “this world of 31 realms” can be described via the five aggregates, the twelve sense bases, or 6 *dhatus* and how they incorporate the ultimate realities. There are other ways too. They are all compatible and consistent with each other.

- For example, 89 *citta* and 52 *cetasika* are included in the four “mental” aggregates, or in the mind base and mind objects, or just in the *viññāṇa dhātu*.
- Also note that the correct word is *khandha* and NOT *skandha* for the five “aggregates.” The Pāli (and Sinhala) word *khandha* means a “pile” (as in a pile of sand) and is still used to denote a hill in Sinhala. I just look up the meaning of “*skandha*” in Sanskrit and it says “Hindu god of war.” This is how the true meanings of the original words have been lost due to incorporation of “sophisticated sounding” Sanskrit words with no relevance.

Table: Analysis of the “world” and *Nibbāna* in terms of ultimate realities.

Lokaya (World of 31 Realms)				Nibbāna
Ultimate Realities (4 types)	Citta (89)	Cetasika (52)	Rūpa (28)	Nibbāna
Aggregates (5)		Vedanā khandha Saññā khandha Saṅkhāra khandha Viññāṇa khandha	Rūpa khandha	
Sense Bases (12)	Mind base	Mind Objects (also includes fine matter or sukuma rūpa)	5 internal (pasāda) rūpa 5 external rūpa (vaṇṇa, sadda, gandha, rasa, phoṭṭhabba)	
Dhātu (6)		Viññāṇa	pathavi, āpo, tejo, vāyo, ākāsa	
<i>saṅkhata</i> (<i>sankata</i> in Sinhala) include everything in this world (sentient beings have all six <i>dhātu</i> ; everything else in the world, like inert objects and plants, do not have <i>viññāṇa</i>)				asaṅkha ta
Notes:				
1. Number of <i>citta</i> can be 121 in the alternate scheme; see, The 89 (121) Types of Citta				

2. Vedanā, saññā are two cetasika; saṅkhāra has the rest of 50 cetasika; for a list of cetasika, see [Cetasika \(Mental Factors\)](#)
3. For fine (sukuma) rūpa, see [Rūpa \(Material Form\) – Table](#).

8.14 **31 Realms of Existence**

May 20, 2016; revised May 30, 2018; December 16, 2019; June 11, 2020; August 24, 2020
(revised #5 and many lifetimes, added #6); September 6, 2022 (#2, #3)

Realm	Description	Cause of Birth in Realm (Note 1)	Lifetime
The Apāyā (Undesired Realms)			
1. Niraya (Hell)	Unimaginable suffering.	Anantariya papa kamma, Ten akusala kamma with established wrong views.	Variable
2. Tiracchāna (Animal; Tirisan in Sinhala)	Microscopic to large animals.	Ten akusala kamma with established wrong views.	Variable
3. Peta (Hungry Ghosts; Preta in Sinhala)	Some live in our world unseen to us.	Ten akusala kamma with established wrong views.	Variable
4. Vinipāta Asuras (Asuras)	Some live in our world unseen to us.	Ten akusala kamma with established wrong views.	Variable
Sugati (Desired <i>Kāma Loka</i> Realms)			
5. Manussa (Human)	Most valued birth of all realms.	Puñña abhisāṅkhāra (thiethuka, dviethuka, and aethuka)	Variable (Note 2)
6. Cātummahārājika Deva	Fine bodies from this realm; no diseases.	Puñña abhisāṅkhāra.	500 CY 9M HY (Note 3)
7. Tāvātimsā deva	Sakka lives in this realm.	Puñña abhisāṅkhāra.	1000 CY 36 HY
8. Yama deva		Puñña abhisāṅkhāra.	2000 CY 144M HY
9. Tusitā deva		Puñña abhisāṅkhāra.	4000 CY 576M HY
10. Nimmānaratī deva		Puñña abhisāṅkhāra.	8000 CY 2304M HY
11. Paranimmita Vasavattī deva		Puñña abhisāṅkhāra.	16000 CY 9216M HY
Rūpa Loka (Fine Material Realms)			
12. Brahma Parisajja deva	Jhānic bliss in this and higher realms.	First jhāna (minor)	<u>1/3</u> kappa (Note 5)

Realm	Description	Cause of Birth in Realm (Note 1)	Lifetime
13. Brahma Purohita deva		First jhāna (medium)	1/2 kappa
14. Brahmakayika (Maha Brahma)		First jhāna (highest)	1 kappa
15. Parittaba deva		Second jhāna (minor)	2 kappa
16. Appamanabha deva		Second jhāna (medium)	4 kappa
17. Abhassara deva		Second jhāna (highest)	8 kappa
18. Parittha Subha deva		Third jhāna (minor)	16 kappa
19. Appamana Subha deva		Third jhāna (medium)	32 kappa
20. Subha Kinhaka deva		Third jhāna (highest)	64 kappa
21. Vehappala deva		Fourth jhāna various levels from here and above	500 kappa
22. Asañña satta	Body only; no mind		500 kappa
23. Aviha deva	Only Anāgāmīs		1000 kappa
24. Atappa deva	Only Anāgāmīs		2000 kappa
25. Sudassa deva	Only Anāgāmīs		4000 kappa
26. Sudassi deva	Only Anāgāmīs		8000 kappa
27. Akanittakha deva	Only Anāgāmīs		16000 kappa
Arūpa Loka (Immaterial Realms); see Note 4			
28. Ākāśānancāyatana deva		Fifth jhāna	20,000 kappa
29. Viññāṇañcāyatana deva		Sixth jhāna	40,000 kappa
30. Ākiñcaññāyatana deva		Seventh jhāna	60,000 kappa
31. Nevasaññānāsaññā deva		Eighth jhāna	84,000 kappa

Notes:

1. See, "[Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?](#)." *Akusala kamma* are the same as *apuññābhisaṅkhāra* (*apuñña abhisāṅkhāra*.)
2. The realms and the lifetimes are extracted from various *suttā*: see, for example, "[Dhammacakkappavattana Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#)", [WebLink: suttacentral: Saṅkhārupapatti Sutta \(MN 120\)](#), and "[Pāthama Mettā Sutta \(AN 4.125\)](#)."
 - In particular, [WebLink: suttacentral: Sāleyyaka Sutta \(MN 41\)](#) discusses how different types of *kamma* lead to rebirth among the 31 realms.
 - The "[WebLink: suttacentral: Visākhā Sutta \(AN 8.43\)](#)" gives lifetimes of various *deva* realms.
3. *Tihetuka* means *kusala kamma* done with *alobha*, *amoha*, and *amoha*.
 - *Dvihetuka* means *kusala kamma* done with *alobha/amoha* or *adosa/amoha*. They have not removed all ten types of *micchā diṭṭhi* but may have removed many. They grasp the new *bhava* without fully understanding, i.e., *javana citta* at the *cuti-paṭisandhi* moment will have “weak *javana* power.”
 - In contrast, one with *tihetuka* birth grasps the new existence with a full understanding of the laws of *kamma*. Therefore, *amoha* means **removal** of the ten types of *micchā diṭṭhi*.
 - *Ahetuka* births occur purely as a *vipāka* of a good *kamma* but without generating any *javana citta*. They have not removed most of the ten types of *micchā diṭṭhi*. Thus, “*ahetuka*” does not mean “without *hetu*” there. It just means an “unfortunate birth.”
 - See, "[Patisandhi Citta – How the Next Life is Determined According to Gathi](#)” for details.
4. CE = Celestial Years; M HY = Millions of Human Years.
5. A *Mahā Kappa* is the time for the Solar system to go through a complete cycle. A quarter of this (or an *Asaṅkheyya Kappa* or 20 *kappa*) is the life of the Earth or the Solar system. The solar system is born, destroyed, and reborn like living beings. See, "[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#)." The Buddha describes the length of one *kappa* in the "[WebLink: suttacentral: Pabbata Sutta \(SN 15.5\)](#)." The lifetimes of many realms given in [Ref. 9](#); in the English translation, the lifetimes can be found in section [WebLink: suttacentral: 18.6.2. Age Limit](#).
6. The connection between various *jhānic* states and the corresponding *Brahma* realms in, "[WebLink: accesstoinsight.org: The Thirty-one Planes of Existence](#)."
7. The names of the four *arūpa* realms are descriptive of their characteristics.
 - *Akāśānancāyatana* comes from “*ākāsa*” + “*ananta*” or infinite + “*āyatana*,” or the realm where the infinite space is the focus of the mind (*ārammaṇa*).
 - *Vinnānancāyatana* comes from “*viññāṇa*” + “*ananta*” or infinite + “*āyatana*,” or the realm where the infinite *viññāṇa* is the focus of the mind (*ārammaṇa*).
 - *Ākincannayatana* comes from “*ākin*” + “*ca*” or mind + “*āyatana*,” or the realm where the focus of the mind (*ārammaṇa*) is only the mind.
 - *Neva saññā nā saññā* comes from “*na*” or not + “*asaññā*” or without perception + “*nā*,” or not + “*saññā*” or perception, i.e., the realm where one cannot say whether there is either “no perception” or “there is perception.” One could go on for a short time without perception (just like in the *asaññā* realm), but it comes back since the “*bhava*” is still there.
8. The following video gives a good general description of the 31 realms:

[WebLink: youtube: Bhante Anandajoti: The Planes of Exist](#)
9. All the realms and their characteristics detailed at "[WebLink: suttacentral: Dhammahadaya Vibhaṅga](#)"

- English translation at “[WebLink: suttacentral: 18. Analysis Of The Heart Of The Teaching.](#)”

9.1 Paṭicca Samuppāda – “Paṭi+ichcha” + “Sama+uppāda”

Revised November 3, 2018; July 29, 2019; re-written March 15, 2022; revised February 2, 2024

“Yo Paṭiccasamuppādaṃ passati,
so Dhammaṃ passati.
Yo Dhammaṃ passati,
so Paṭiccasamuppādaṃ passati.”

“One who sees *Paṭiccasamuppāda*
sees the (Buddha) Dhamma.
One who sees the (Buddha) Dhamma
sees *Paṭiccasamuppāda*.”

([WebLink: suttacentral: Mahāhatthipadopama Sutta \(MN 28\)](#); at the end)

- *Paṭicca Samuppāda* explains how we accumulate *kammic* energy to “power up” future births. That sustains the rebirth process and will bring rebirths mostly in the *apāyās*. Thus, *Paṭicca Samuppāda* explains how future suffering arises.
- Whenever we get attached to sensory inputs (*ārammaṇa*) and think, speak, and act with *lobha*, *dosa*, and *moha*, we accumulate such *kammic* energy. We will discuss that in upcoming posts.
- Therefore, it is critical to understand *Paṭicca Samuppāda*, see the next post for details: “[Paṭicca Samuppāda – Overview](#).”
- Here is the pronunciation of *Paṭicca Samuppāda*:

[WebLink: Pronunciation of Paṭicca Samuppāda](#)

Paṭicca samuppāda, translated into English as “Dependent Origination,” does not convey the phrase’s accurate, complete meaning. It is better to keep the same name and understand what it means.

- The closest English translation is “Willful attachment leading to the existence of similar kind.”

“Paṭi+ichcha” Leads to “Sama+uppāda”

1. *Paṭicca* = *paṭi* + *icca*; here “*paṭi*” is bonding, and “*icca*” (pronounced “ichcha”; see #12 below) is liking.
 - Thus, *Paṭicca* is “bonding to something willingly” or “getting attached to something through a liking for it.”
 - This bonding depends on one’s *gati* (habits and likings) due to deep-seated *āsava*s (cravings).
 - The website has many posts on this key Pāli term: “*gati*.” One can get a list of relevant posts by typing “*gati*” in the “Search” box at the top right. Note that “*gati*” is pronounced as “gathi.”
2. *Samuppāda* = “*sama*” (same or similar) + “*uppāda*” (generation), i.e., an existence (*bhava*) of similar quality or kind.
 - Thus, *samuppāda* means leading to existence or experience corresponding to defilements that made one attach to the situation (*ārammaṇa*) in the first place.
 - Everything in this world arises due to six root causes: *lobha*, *dosa*, *moha* and *alobha*, *adosa*, and *amoha*; see, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”
 - Different types of *Paṭicca Samuppāda* cycles operate based on the kind of causes involved; see, “[Paṭicca Samuppāda Cycles](#).”
3. Therefore, “*paṭi+ichcha*” leads to “*Sama+uppāda*,” i.e., “willingly attaching to the root causes” leads to “corresponding births.”

- One would not like to be born an animal. However, **if one acts like an animal**, an animal birth is unavoidable!
- In the same way, if one cultivates “moral *gati*,” one is likely to be reborn as a human or *Deva*.

Connection to *Gati* – Simple Example

4. For example, when we generate potent hateful thoughts about a person, we could be in the mindset of an animal. At that moment, we may even behave like an animal, hitting and clawing at that person if things get out of hand. Even if we do not act physically, we will have that “animal-like” mindset.

- **At that moment, we generate a *gati* (character) corresponding to “*bhava*,” or existence similar to an animal. That, in turn, leads to grasping a corresponding “*bhava*.” Then “*bhava paccayā jāti*” leads to a similar “*jāti*” or birth, i.e., to act like an animal.**
- We generated a corresponding “*bhava*” in our minds because we got “bonded” to that situation via compatible thoughts, i.e., we developed a corresponding “*bhava*” in our minds. Results (effects) correspond to causes: cause and effect. If we keep cultivating certain “*gati*” or habits, corresponding kinds of “*bhava*,” and “*jāti*” will result. They are all interconnected.
- Strong feelings under such conditions create subtle energies called “*kammic energy*.” **That energy can build up to create a subtle “*manomaya kāya*” (*gandhabba kāya*) corresponding to a new existence (*bhava*.)**

5. Now, if we keep getting into fights with that person (or with others), we will be building up that “*bhava*,” which could lead to the formation of a very potent *kamma* seed; see, “[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka](#).”

- Furthermore, it becomes a “*gati*” as well (see “[Samsāric Habits and Āsavas](#)”). Then it is easier to get into such situations, and a vicious cycle starts leading to that *gati* taking hold.
- **Here, it is critical to understand that “*uppāda*” or “birth” is according to the “bonding with liking” (*paṭi icca*) for the *kammic* CAUSES. For example, no one wants to be born a dog. But one cannot avoid being born a dog if one willingly does “lowly things” appropriate for dogs and thus cultivates “*gati* suitable for a dog.” See, #4 of “[Kukkuravatika Sutta \(Majjhima Nikāya 57\) – Kammakkhaya](#).”**
- Many *suttas* in the *Tiṭṭaka* explain this critical point; see, for example, “[Gati to Bhava to Jāti – Ours to Control](#),” “[Gati \(Habits/Character\) Determine Births – Samsappanīya Sutta](#),” “[Patisandhi Citta – How the Next Life is Determined According to Gati](#)” and “[Samsāric Habits, Character \(Gati\), and Cravings \(Āsava\)](#).”

6. Now, we combine the two terms: “*Paṭicca Samuppāda*” means “attachment to something leading to the generation of the corresponding “*bhava*” (and thus *jāti*).”

- **The establishment of a *bhava*, in turn, leads to a corresponding *jāti* or birth:** “When one gets attached, it sets up the likelihood of a new birth of similar characteristics.”
- For example, **when someone habitually engages in “greedy actions,” they cultivate that “greedy *gati*.”** Then, it is likely to be manifested in a future birth by being born a *Peta* (hungry ghost).

Two Types of *Paṭicca Samuppāda*

7. Therefore, the establishment of an “existence” (*bhava*) could be two ways:

- Even during the current lifetime, a similar situation can arise. For example, “*gati*” formed via above mentioned “fights” with other people will tend to draw oneself to a similar outcome even with the slightest provocation. That is a “*pavutti bhava*” (and *jāti*) that lasts for a short time during current life; see, “[Idappaccayātā Paticca Samuppāda – Bhava and Jāti Within a Lifetime](#).” and “[Idappaccayātā Paticca Samuppāda](#).”

- If this hateful “*gati*” becomes profoundly ingrained and becomes a potent *kamma* seed, that could come to the mind at the dying moment. That could lead to a hateful “*uppatti bhava*” in the next existence, as an animal or even in the *niraya* (hell); see, “[Akusala-Mūla Uppatti Paṭicca Samuppāda](#)” and “[Bhava – Kammic Energy That Can Power an Existence](#).” [*uppatti* : [f.] rebirth; coming forth; origin. *upapatti* : [f.] birth; rebirth; approach.]

A Uppatti Bhava Can Lead to Many Births (Jāti)

8. Here, one should also be able to distinguish between “*bhava*” (existence) and “*jāti*” (birth). For example, an *uppatti bhava* may give rise to many births until the *kammic* energy in that *kamma* seed wears out; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- That is why, even though the human *bhava* is RARE, one may be reborn a human many times at a stretch. Only those born human in a previous life (or a few lives) can remember those lives; see, “[Evidence for Rebirth](#).”
- Different types of *Paṭicca Samuppāda* cycles are discussed in: “[Paṭicca Samuppāda Cycles](#).”

We Attach via Tanhā and Avijjā

9. We willingly get attached to pleasurable things by perceiving illusory happiness. We also get attached to stuff via hate, and the root cause is an attachment to something related.

- For example, we get “attached” to a person with hate if that person is blocking our access to something we like. We keep thinking about how bad he is, etc.
- Thus attachment is possible with greed or hate. That is what “*tanhā*” (in Sinhala, “තනුට හැසීම” or “get fused or attached to” in English) means; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”
- Therefore, realizing that “*tanhā*” does not mean just greed is essential. It could also be due to hate or dislike.
- The root cause of “getting attached to sensual pleasures” is “**distorted *saññā*” built into our biological bodies by kammic energy via the *Paṭicca Samuppāda* process.** See “[Sotāpanna Stage via Understanding Perception \(Saññā\)](#).”

Unimaginable Suffering in Some Existences (Among the 31 Realms)

10. Ultimately, both desire and hatred arise due to ignorance (*avijjā*), i.e., ignorance of unfruitful nature of “this world” of 31 realms, i.e., “[Anicca, Dukkha, Anatta](#).”

- We think living is pleasurable, but lives in some realms are filled with unimaginable suffering. Human birth is rare.
- There is unimaginable suffering in the lower four realms (see “[How the Buddha Described the Chance of Rebirth in the Human Realm](#)”).

We Create Our Future Lives!

11. No one else (or an external force) keeps us bound to “this world” of 31 realms; see, “[The Grand Unified Theory of Dhamma](#).” Like an octopus grabbing its prey with all eight legs, we willingly cling to things in “this world” of 31 realms filled with suffering.

- Unless we see the true unfruitful and even dreadful (in the lower four realms) nature of “this world” by comprehending “[Anicca, Dukkha, Anatta](#),” we will not let go of it.

Use Pāli Words Without Translating to Other Languages

12. The Buddha advised against translating keywords in Pāli (and even verses in deep suttas) to other languages. In most cases, there are no equivalent words in other languages.

The translation of *Paṭicca Samuppāda* to Sanskrit as ***Pratītyasamutpāda*** is an excellent example of this problem. See the explanation of ***Pratītyasamutpāda*** (the Sanskrit word for *Paṭicca Samuppāda*) on Wikipedia: [WebLink: wiki: Pratītyasamutpāda](https://en.wikipedia.org/wiki/Pratītyasamutpāda)

- I think you will agree that it is confusing at best, with multiple possible meanings.
- Even though “Dependent Origination” is better, it does not convey the whole meaning.
- On the other hand, for someone knowledgeable in Pāli or Sinhala, the meaning is evident in the name itself: *paṭi* + *icca sama* + *uppāda*. Once the roots are explained, anyone can understand them in any language!

Pronunciation of Pāli Words

13. It is highly beneficial to learn how to pronounce Pāli words. When the European scholars started writing the Pāli *Tipiṭaka* with the English alphabet, they came up with a unique system called the “**Tipiṭaka English**” Convention. It has helped keep the ‘word length’ short.

- For example, although written as “*gati*,” its pronunciation is “gathi.” Similarly, “*icca*” is for “ichcha.” If written as pronounced, “*dhammacakkappavattana*” would be “dhammachakkappavaththana.”
- See “[“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2](#)” for details.
- A pronunciation guide at “[Pāli Glossary – \(A-K\)](#)” and “[Pāli Glossary – \(L-Z\)](#).”
- Don’t be discouraged. Start gradually getting used to the method of learning the meanings/pronunciations. Learn the common keywords first.

Next, “[Paticca Samuppāda – Overview](#),”

9.2 Paṭicca Samuppāda – Overview

Revised November 4, 2018; August 27, 2022

1. Nothing can happen without a cause (“*hetu*” in Pāli or Sinhala). Everything happens for reasons or causes. Usually, many things simultaneously arise due to multiple causes.

- However, if one cause dominates, it appears to have happened due to one cause.

2. Due to our ignorance of the true nature of this world, we keep initiating new causes. If we do not add more fuel to the fire, the fire will extinguish when existing fuel runs out.

- *Akusala kammā* is fuel to the *saṃsāric* journey or the rebirth process.
- *Saṃsāric* journey does not end because we keep adding “fuel to the fire,” i.e., keep doing *akusala kamma*.

3. The *Paṭicca Samuppāda* (let us shorten it as PS) describes that process. It explains the arising of future births due to accumulated *kammic* energies.

- *Ācariya* Buddhaghosa understood only one aspect (the *Akusala-Mūla* PS) of the numerous applications of PS. Since Theravāda Buddhism adopted Visuddhimagga as the basis of Dhamma, this deep knowledge of PS went underground. [*ācariya* : [m.] teacher.]
- Many variations of PS can be found in the [WebLink: suttacentral: Pattecasamuppādavibhaṅga \(Vb 6\)](#) of the *Vibhaṅgappakarana* in the *Abhidhamma Piṭaka*.

4. Here are the main subsections in this section:

- Several PS cycles are discussed in this section: “[Paṭicca Samuppāda Cycles](#).” However, please read #7 below before going there.
- For those who want to avoid too many Pāli words: “[Paṭicca Samuppāda in Plain English](#).”
- What is meant by “*paccayā*” (conditions) and discussions on different types of conditions: “[Paṭthāna Dhamma](#).” An introduction to “*paccayā*” is in #5 below.
- “[Imasmim Sati Idam Hoti – What Does It Really Mean?](#)”

5. Even if there is a cause, its result (effect) does not manifest until the right conditions (“*paccayā*” in Pāli) appear.

- For details, see “[What Does “Paccayā” Mean in Pattecasamuppāda?](#).” We can get the basic idea from a few examples here.
- A matchstick has the potential to bring about a fire. But unless it is heated by striking on a hard surface, fire does not ignite.
- A bomb can explode and create much destruction. But it will not go off until triggered.
- We all have bad habits, but they do not manifest until triggered by an *ārammaṇa* or a “thought object” (a picture, sound, smell, touch, or thought). See “[Worldview of the Buddha](#).”

6. Therefore, if one acts mindfully, one can PREVENT many *akusala vipāka* and FORCE many *kusala vipāka*.

- We all have innumerable *akusala* accumulated in this *saṃsāra*;
- See, “[What is Kamma? Is Everything Determined by Kamma?](#),” and “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavā\)](#).”

7. It is necessary to understand that the terms in the standard PS cycle: “*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana, saḷāyatana paccayā phassa, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna*”

paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan'ti” are highly condensed.

- One could write a book on each term.
- At a minimum, one needs to get the basic idea of each keyword: *avijjā, saṅkhāra, ..bhava, jāti*.

8. Most modern texts in English translate those keywords to single words in English, which often leads to misinterpretations.

- **It is better to understand the meaning of each of those Pāli words and use those words. They can have different meanings based on the context.**

9. In the following, I will provide a few posts to read to get an idea of what those Pāli words mean. **The following terms are associated with the Akusala-Mūla PS.**

Avijjā: “[What is Avijjā \(Ignorance\)?](#).”

Saṅkhāra: In most cases, what comes to play is *abhisāṅkhāra* or “strong *saṅkhāra*.” But it is necessary to get the basic idea of “*saṅkhāra*” first: “[Saṅkhāra – What It Really Means](#).”

Viññāna: One of the complex Pāli words: “[Viññāna – What It Really Means](#).”

Nāmarūpa: Another complex word: “[Viññāna paccayā Nāmarūpa](#).”

Salāyatana: *Salāyatana* (six *āyatana*) are not six sense faculties, “[Nāmarūpa paccayā Salāyatana](#).”

Phassa: What comes into play in PS is not “*phassa*” but “defiled contact” or *samphassa*, “[Difference between Phassa and Samphassa](#).”

Vedanā: *Vedanā* in PS does not mean “feelings,” but “*samphassa jā vedana*”: “[Vedanā \(Feelings\) Arise in Two Ways](#).”

Tanhā: “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

Upādāna: “[Difference Between Tanhā and Upādāna](#).”

Bhava and Jāti: “[Bhava and Jāti – States of Existence and Births Therein](#)” and “[Gati to Bhava to Jāti – Ours to Control](#).”

- Of course, *gati* is another key Pāli word not discussed much these days. See “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#).”
- You can find more posts on each word using the “Search” box at the top. **Note:** only for online website.

10. It is clear from #7 above that all future suffering (*jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan'ti*) will stop with the stopping of the *Akusala-Mūla* PS.

- **It is also clear that all future suffering ends when there is no rebirth**, i.e., when the step “*bhava paccayā jāti*” stops and thus “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā*” step stops.
- As long as there are *jāti* (or births), the suffering will not end.

11. The *Akusala-Mūla* PS can be terminated by working on two main targets: *avijjā* and *tanhā*.

- It is pretty clear why we need to remove *avijjā*. If there is no *avijjā* (i.e., if one comprehends the Four Noble Truths), then an *Akusala-Mūla* PS will not even get started.
- *Tanhā* gradually reduces with changing our *gati*. That is discussed in the post: “[Difference Between Tanhā and Upādāna](#).”

9.3 Sakkāya Diṭṭhi and Paṭicca Samuppāda

February 4, 20121

Sakkāya Diṭṭhi arises in those who do not understand the *Paṭicca Samuppāda* process. We will discuss the steps in the *Paṭicca Samuppāda* process to clarify this critical point.

[Sakkāya Diṭṭhi – Wrong View of “Me” and “Mine”](#)

[What Reincarnates? - Concept Of A Lifestream](#)

[Anatta and Sakkāya Diṭṭhi – Two Different Concepts](#)

[Nibbāna - Rāgakkhaya Dosakkhaya Mohakkhaya - Part 1](#)

9.3.1 Sakkāya Diṭṭhi – Wrong View of “Me” and “Mine”

February 4, 2021; revised February 5, 2021 (added #9 and #10); major revision June 19, 2022; revised December 6, 2022

Sakkāya Diṭṭhi is the **wrong view of an unchanging essence** associated with a human. Materialists — who don’t believe in rebirth — believe the **essence is one’s physical body**. The other extreme is the belief that a **“soul-like” entity** survives the death of the physical body.

Definition of *Sakkāya Diṭṭhi*

1. Average humans who have not been exposed to the actual teachings of the Buddha have *sakkāya diṭṭhi*. Several *suttas* describe *sakkāya diṭṭhi* with the verse of [Ref. 1](#). In the following, I will discuss the meaning of that verse.

- **One group has the wrong view of *uccheda diṭṭhi*. They regard the physical body to be equivalent to “me.”** They believe that all mental phenomena arise in the body and are thus totally associated with the body. **Materialists of the present day** belong to this category. They believe that mental phenomena (thoughts) arise in the brain, and thus, they also stop with the physical’s body death.
- Therefore, those with *uccheda diṭṭhi* also believe that *vedanā, saññā, saṅkhāra, and viññāṇa* are **equivalent to “me.”** When the physical body dies, that is the end of all five entities, i.e., the five aggregates or *pañcakkhandha*.
- Thus, those with *uccheda diṭṭhi* have those **five types of wrong views** about an existence that is limited to just one life.

2. **The other group has the view that something unique to me (“essence of me that will never change and cannot be destroyed) must be moving from life to life. They don’t know what it is but the concept is the same as that of a “soul” in many other religions.** In those religions, a soul will live forever in heaven or hell.

- They have one of the following three views regarding their physical body: **it represents me, it is “in me”, or “me” is in the body temporarily.** Again, that “me” is a “soul-like entity.”
- They will also have the same views about mental factors (*vedanā, saññā, saṅkhāra, and viññāṇa*) as well. For example, regarding *vedanā* they have one of the following views: **it represents me, it is “in me”, or “me” is in *vedanā* temporarily.**
- People belonging to most major religions today have these **15 wrong views** of an “unchanging soul,” i.e., ***sassata diṭṭhi*.**

Those are the **20 types of wrong views** about existence: *vīsativatthukā sakkāya diṭṭhi*. I have done a deeper analysis with *Tipiṭaka* references in [“Sakkāya Diṭṭhi – Getting Rid of Deeper Wrong Views.”](#)

Getting Rid of *Sakkāya Diṭṭhi* Is the First Step to *Nibbāna*

3. To understand why those are wrong views (per Buddha Dhamma,) first, we need to clarify what kind of suffering the Buddha said can be stopped.

- When an average human thinks about suffering, they would think about the FEELING of pain or suffering. That could be physical suffering (injuries, sicknesses) or mental anguish like depression.
- But the Buddha taught that those kinds of suffering could only be “managed” but cannot be stopped. They can be managed by eating well, exercising, and following medical advice for injuries/sicknesses. One can control mental suffering partially by living a simple, moral life.

4. However, the Buddha said we must pay more attention to possible suffering in future lives. **Those lives are yet to arise, and we can stop ALL suffering associated with future births.** He taught that the death of the physical body does not end our suffering. One will be reborn either as human again or in one of 31 realms, including the animal realm.

- He said that most births in this process (called *samsāra*) are in the lowest four realms (*apāyās*) and that the animal realm is one of those four. Even though we cannot see those beings in the other realms, we can see the suffering of the animals, which is much harsher than for humans.
- The critical point is that we can stop such future suffering by attaining *Nibbāna*.
- When one understands the futility of seeking happiness in this world, one gets rid of *sakkāya diṭṭhi* and becomes a *Sotāpanna*. Then one follows the Noble Eightfold Path and becomes an *Arahant*, thereby attaining *Nibbāna*.

The Worst Wrong View Is *Uccheda Diṭṭhi* (Materialism)

5. From the above discussion, it is evident that Buddha Dhamma's main benefit is to help people attain *Nibbāna* and thus be free of future suffering in the rebirth process (*samsāra*.) The current body is a “result,” and *vedanā* that arises in that physical body cannot be stopped. We note that Ven. Mahā Moggallāna died a horrible death after being beaten due to a residue of an *ānantariya kamma* from a previous life.. However, ALL suffering for Ven. Mahā Moggallāna ended after his death (*Parinibbāna*.) For all others, there will be more future suffering after death.

- Thus it should be evident that the worst wrong view is to assume that one's life ends at death. If that is the case, there is not much benefit in studying Buddha Dhamma at a deeper level. One could be a “secular Buddhist” and try to live a moral life. **However, the term “secular Buddhist” is an oxymoron, just like the term “alone in a crowd” or “walking dead.”**
- Having the *sassata diṭṭhi* (believing in a permanent soul) is also wrong and is the other extreme. They may be reluctant (or afraid) to engage in immoral deeds for fear of being sent to hell permanently **but do not see any drawbacks in engaging in “legitimate sense pleasures.”**
- I say that those with the *uccheda diṭṭhi* may be worse because they do not need an INTRINSIC moral compass. Even though most materialists DO live perfectly moral lives, they could be more susceptible to committing offenses on impulse (when temptations become strong enough.)

If There is No Soul, “What” Is Reborn?

6. The two views of materialism and soul-view are easy to understand.

Materialism means one lives this life, when one dies, that is the end. Those with the soul-view do their best to live a moral life and hope to be born in Heaven (*Abrahamic* religions) or in a *Brahma* realm which is supposed to be permanent (Hinduism.)

- Most people have difficulty understanding Buddha's view. Since Buddha's view involves rebirth, it is difficult for them to see how it differs from the soul-view. The question frequently asked is: “What is reborn, if there is no soul?” *Paṭicca Samuppāda* explains that.

- **One quick way to see the difference is to compare Buddha's view with Hinduism's.** In *Abrahamic* religions, one will be born either in heaven or hell, i.e., there are not many rebirths. But in both Buddha Dhamma and Hinduism, there can be numerous rebirths. In Buddhism, that process ends when one attains *Nibbāna* (as an *Arahant*). In Hinduism, "reincarnation" ends when one is born in the realm of *Mahā Brahma*.
- The other key difference between Hinduism and Buddhism is the following. **In Hinduism, future lives are "reincarnations" of the same ātman** (similar to a soul in *Abrahamic* religions.) Reincarnation implies the same "essence" (as a soul) that moves from one life to another.
- In Buddha Dhamma, no such soul or *ātman* going from life to life. Instead of "REINCARNATION," it is REBIRTH. That is THE crucial difference.

How Is Rebirth Different From Reincarnation?

7. Reincarnation implies that there is SOMETHING unique AND unchanging in a human that gets carried to the next life. The body can take different forms, but there is a "unique life force" (my characterization of "ātman") that remains unchanged from life to life.

- "[WebLink: holy-bhagavad-gita.org: Bhagavad Gita: Chapter 2, Verse 22](http://holy-bhagavad-gita.org: Bhagavad Gita: Chapter 2, Verse 22)" explains that, "As a person sheds worn-out garments and wears new ones, likewise, at the time of death, the soul casts off its worn-out body and enters a new one."
- Thus, one may be born with a "different body" (outer garments), but the essence (personal identity or "ātman") remains.
- **The mechanism is very different in Buddha Dhamma. Paṭicca Samuppāda dictates the process.** "Personality" can change drastically from one existence (*bhava*) to another. I have tried to explain it in the post "[What Reincarnates? – Concept of a Lifestream](#)."

Concept of a Bhava – No Personality Involved

8. In Buddha Dhamma, a critical idea is the concept of a "*bhava*." A "lifestream" makes transitions from *bhava* to *bhava* based SOLELY on *kammic* energy. There is NO "personality" that remains FIXED.

Different types of unwise thinking, speech, and actions (dictated by different types of *saṅkhāra*) lead to different kinds of *bhava* and *jāti*.

- However, in adjacent lives, there will be similarities in character/habits represented by the term "*gati*." One's *gati* will significantly influence the next *bhava*. For example, if one lived an immoral life suitable for an animal, they WOULD likely BE born an animal.
- *Paṭicca Samuppāda* explains that. *Saṅkhāra* (one's thoughts, speech, and actions) that arise due to *avijjā* is at the beginning of the *Paṭicca Samuppāda* process. Then towards the end, it leads to a particular type of *bhava* (existence) and birth (*jāti*) in that existence.
- For example, if a human cultivates *arūpāvacara jhāna* (with *āneñjābhisaṅkhāra*), that will lead to existence as an *arūpāvacara Brahma*. See #5 of "[Saṅkhāra – What It Really Means](#)" for an explanation of how different types of *bhava* arise due to three broad categories of *abhisāṅkhāra*.

All Bhava Lead to Suffering

9. The *Akusala-Mūla Paṭicca Samuppāda* process describes how (*abhi*)*saṅkhāra* done with *avijjā* LEAD to various *bhava* and *jāti*. This is the first step in the *Akusala-Mūla Paṭicca Samuppāda* process: "*avijjā paccayā saṅkhāra*." Towards the end, it leads to *bhava*.

- Those *bhava* lead to births (*jāti*) among the 31 realms. Without exception, any *jāti* ends up suffering. That is the last step in the *Akusala-Mūla Paṭicca Samuppāda* process: “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti.*”
- In upcoming posts, we will go through the steps in *Paṭicca Samuppāda* to further clarify how the wrong view of *sakkāya diṭṭhi* sustains this process that keeps one bound to *samsāra*, the rebirth process. That is not the reincarnation of a “soul.”
- Until one understands that process, one has *avijjā*, i.e., ignorant about the Four Noble Truths.
- There is one more aspect that needs to be understood. Let us discuss that now.

Difference Between Wrong Views and Wrong Perceptions

10. Most texts describe *sakkāya diṭṭhi* as “self-illusion” or “personality belief,” i.e., “belief that a self or I exist” (you can Google “*sakkāya diṭṭhi*” and see). **Here it is essential to understand that there is a difference between “wrong view” and “wrong perception.”** A *Sotāpanna* would have removed the wrong view (*diṭṭhi*), but not the false perception (*saññā*.)

- But this **perception (*saññā*)** of a “self” (or a “soul” which is also called “*ātma*”) is NOT *sakkāya diṭṭhi* per *Tipiṭaka*, as we discuss below. That is a *saññā* (perception) we have carried from life to life. For a discussion on *saññā*, see “[What is Saññā \(Perception\)?](#)”.
- The deeply-embedded idea of a “self” or an innate sense of “me” is rooted in the *māna cetasika*.
- If one gets offended if treated with disrespect, that means one still has *māna* left. Even an *Anāgāmi* could be somewhat annoyed if they perceive being mistreated. A component of *māna* — called *asmi māna* — is still left at the *Anāgāmi* stage. *Māna* is removed not at the *Sotāpanna* stage but at the *Arahant* stage.

A Sotāpanna Removes Only Wrong Views About an “Unchanging Self”

11. At the *Sotāpanna* stage, the **wrong view (*diṭṭhi*)** that there is something unchanging and permanent, like a “soul” associated with oneself, goes away. Simultaneously, the wrong view that one can remove future suffering by just living a moral life (*sīlabbata parāmāsa*) will go away too. (However, living a moral life is necessary too.) Furthermore, any doubts about the teachings of the Buddha (*vicikicchā*) will also disappear simultaneously.

- When one can see that there is no “real essence” (like a “soul” or a “*ātma*”) associated with a living being, this wrong view of *sakkāya diṭṭhi* goes away. A lifestream evolves, according to *Paṭicca Samuppāda*; see, “[Anattā in Anattalakkhaṇa Sutta – No Soul or an Ātma.](#)”
- However, it is incorrect to believe that the **perception of a “me”** will go away at the *Sotāpanna* stage. That perception completely goes away only at the *Arahant* stage. See “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”

References

1. The following verse appears in many *suttas*, for example in the “[WebLink: suttacentral: Cūḷavedalla Sutta \(MN 44\)](#)”: “*assutavā puthujjano, ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaṃ adassāvī sappurisadhammassa akovido sappurisadhamme avinīto, rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ, attani vā rūpaṃ, rūpasmiṃ vā attānaṃ. Vedanaṃ ... pe ... saññāṃ ... saṅkhāre ... viññāṇaṃ attato samanupassati, viññāṇavantaṃ vā attānaṃ, attani vā viññāṇaṃ, viññāṇasmiṃ vā attānaṃ. Evaṃ kho, āvuso visākha, sakkāyadīṭṭhi hotī.*”

9.3.2 What Reincarnates? – Concept of a Lifestream

Revised August 3, 2016; revised March 27, 2018; September 6, 2019; November 12, 2019; August 22, 2020; re-written February 8, 2021; added #9 February 9, 2021; February 14, 2021 (#3 and #8); revised August 7, 2022

Reincarnation Versus Rebirth

1. Reincarnation is a Hindu concept where the “*ātma*” (“*ātman*”) or the soul remains the same but takes a different form. The *Rigveda* compares it to a person discarding an old suit and wearing a new outfit. See “[Sakkāya Ditthi – Wrong View of “Me” and “Mine.”](#)”

- **In Buddha Dhamma, it is a rebirth since there is no soul to reincarnate.** We have accumulated many “*kamma* seeds” (*kamma bīja*) which contain various “habits” and “character qualities” (called “*gati*”) In our long journey through *samsāra*. Those lead to different types of rebirths; see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka.](#)”
- At the end of this human existence, the *kammic* energy of the *kamma* seed for the present life is exhausted. At that moment, a new life starts with a new potent *kamma* seed. The selection of a new seed itself is a complicated process and depends on the potency of the available *kamma* seeds, but it happens within a thought moment.
- Let us first summarize Buddha’s description of sentient life. The following facts are indisputable.

No Discernible Beginning to *Samsāra* (Rebirth Process)

2. During the night of attaining the Buddhahood, the Buddha looked back at his rebirth process. He was able to scan eons in mere moments, but no matter how far back he looked, he could not see a “beginning.” He has given many similes (analogies) to indicate the “unimaginable length of the rebirth process.”

- For example, [WebLink: suttacentral: Assu Sutta \(SN 15.3\)](#) states: “*Bhikkhus*, this rebirth process has no discernible (*na pannāyati*) beginning. Beings whose minds are covered by ignorance and **are bound to this rebirth process with bonds of craving.**”
- Birth as a human is very rare among all those rebirths, as stated, for example, in the [WebLink: suttacentral: Nakhasikha Sutta \(SN 20.2\)](#). “*bhikkhus*, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans are many as the sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process.”
- Further details in “[Rebirth – Connection to Suffering in the First Noble Truth.](#)”

The Concept of a Lifestream

3. **The Buddha used the term “*satta*” to describe a living being going through that rebirth process.** In the [WebLink: suttacentral: Satta Sutta \(SN 23.2\)](#), Ven. Rādhā asked the Buddha: “..they speak of this thing called a ‘sentient being.’ How is a sentient being defined?”

- The Buddha answered: “Rādhā, when there is liking (*chanda*), strong liking (*rāgo*), reveling (*nandī*), and the tendency to attach (*taṇhā*), then a ‘**sentient being with cravings**’ (*satta*) is spoken of.” **Note that the Pāli word ‘*satta*’ means “to attach.”**
- In other words, as long as a ‘sentient being’ highly values things in this world, it will be reborn in this world. It could be reborn, a human, an animal, a Deva, etc., at various times. Thus, associating any such existence with an “unchanging entity” (such as a soul) is impossible. When born a human, a *satta* behaves like a human, and when born an animal, it acts like an animal, etc.

- I use the English word to describe “*satta*” as a “lifestream.” The term “sentient being” is more suitable to refer to a “*satta*.” On the other hand, “a lifestream” refers to the process that a *satta* goes through in *Samsāra*.
- A given lifestream can take various forms in the rebirth process. **There is no “core” or “soul” or “ātman” to talk about! On the other hand, as long as that fact is not understood, there is a *satta* in the rebirth process.**

A Bodhisatta is a Special Satta

4. Buddha Gotama, like any other Buddha, made a heroic effort to become a Buddha through many eons. When he made enough progress, he was declared a “*Bodhisatta*” by Buddha Deepankara many eons ago.

- A *Bodhisatta* is a special *satta* destined to become a Buddha. “*Bodhi*” means “towards liberation/release.” When a *satta* has fulfilled enough *paramitā* to become a Buddha, he is declared a “*Bodhisatta*” by existing Buddhas. See, “[Pāramitā and Niyata Vivarana – Myths or Realities?](#).”
- Even after becoming a *Bodhisatta*, it is possible to be born in the animal realm (but NOT in the other three realms in the *apāyās*.)
- Therefore, a sentient being is born in any given bhava ONLY according to causes and effects. That is described in *Paṭicca Samuppāda*, which starts with “*avijjā paccayā saṅkhāra*” and ends in “*bhava paccayā jāti*” and *jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*.
- There is no reference to a “special/particular being” in that whole process. Future existences (*bhava*) and births (*jāti*) within that existence only depend on past *kamma* (*saṅkhāra*) done with *avijjā*!

Transcending the “Satta State” to Attain Puggala Stages

5. All other living beings (*sattā*) overcome the “*satta* state” by learning how to do that from a Buddha or a true disciple of a Buddha (*Ariya*.)

- Note that “*satta*” is pronounced, “saththa.” See “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”
- There are eight such *Ariyā* (Noble Persons) as described in the “[WebLink: *suttacentral: Pathamapuggala Sutta* \(AN 8.59\).](#)” for example.
- They are: “*Sotāpanno, sotāpattiphalasacchikiriyāya paṭipanno (sotāpanna anugāmi), sakadāgāmī, sakadāgāmiphalasacchikiriyāya paṭipanno (sakadāgāmī anugāmi), anāgāmī, anāgāmiphalasacchikiriyāya paṭipanno (anāgāmī anugāmi), arahā, arahattāya paṭipanno (arahant anugāmi).*”
- Another special *satta* overcomes the “*satta* state” with his efforts. That is a *Pacceka* Buddha. A ***Pacceka* Buddha** has not fulfilled ALL the *paramitās* to become a ***Sammāsambuddha*** like Buddha Gotama. Therefore, a *Pacceka* Buddha cannot explain Dhamma like a *Sammāsambuddha*. Not that many *sattā* can attain *Nibbāna* during a *Pacceka* Buddha.

All Sattās Are Trapped in the Rebirth Process

6. Therefore, until the *Sotāpanna Anugāmi* stage is attained, all sentient beings are trapped in the rebirth process.

- They all have not overcome the “*satta* state” and thus could be born in the *apāyās* in the future.
- The lifestream of a *satta* in ANY of those 31 realms will flow ceaselessly until the fruitlessness AND danger in remaining in the rebirth process are comprehended.

- The danger is that most births in the rebirth process are in the lowest four realms (*apāyās*.) The reason for that is in the verse that describes a “*satta*” in #3 above: “**Rādha, when there is liking (*chanda*), strong liking (*rāgo*), reveling (*nandī*), and the **tendency to attach (*taṇhā*)**, then a ‘sentient being’ is spoken of.”**
- The Buddha referred to a sentient being (“*satta*”) as one with attachment to “worldly pleasures.”

Rest of the *Satta Sutta*

7. After explaining to Ven. Rādha the meaning of a “*satta*,” Buddha explained to him why those sentient beings are trapped in the rebirth process filled with unimaginable suffering.

Here is the English translation at Sutta Central (my revisions are in bold):

“Suppose some boys or girls were playing with sandcastles. As long as they’re not rid of greed, desire, fondness, thirst, passion, and craving for those sandcastles, they cherish them, fancy them, treasure them, and treat them as their own. But when **they grow up**, they get rid of greed, desire, fondness, thirst, passion, and craving for those **useless** sandcastles. Then they scatter, destroy, and demolish them with their hands and feet, making them unplayable.

In the same way, you should scatter, destroy, and demolish **the desire for mind-pleasing things in this world** and reject them. And you should practice for the ending of craving. You should scatter, destroy, and demolish **the desire for** feeling ... perception ... *saṅkhāre* ... *Viññāṇam*, making them unplayable. ***Taṇhākkhaya hi, rādha, nibbānan*” ti** (Rādha, *Nibbāna* is the elimination of *taṇhā*).”

Overcoming the Desire to Build Sandcastles

8. Thus, the Buddha compared the behavior of any living being in the “*satta* state” to children enjoying building sandcastles on a beach. Due to their ignorance (*avijjā*), they don’t realize the futility of building sandcastles for enjoyment.

- In the same way, until one hears and comprehends the actual teachings of the Buddha (Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*), one would not “see” the futility AND dangers in enjoying sense pleasures in this world. Children building sand castles only waste their time. On the other hand, *sattā* enjoying sensory pleasures pave the way to rebirths in the *apāyās* without realizing it.
- When one starts “seeing” the true nature of this world, one removes *sakkāya diṭṭhi* and becomes a *Sotāpanna Anugāmi*. That “vision” is fully established when one also removes any doubts (*vicikicchā*) and also sees that rituals (*sīlabbata parāmāsa*) will not get one released from the rebirth process. One is at the *Sotāpanna* stage at that point.
- However, that is only the beginning of the Noble Eightfold Path. Only the *diṭṭhi vipallāsa* (wrong vision) has been removed yet. With that “new vision” (*Sammā Diṭṭhi*), one needs to follow the other seven steps and get to *Sammā Samādhi* to remove *saññā vipallāsa* at the *Anāgāmi* stage and the *citta vipallāsa* at the *Arahant* stage. See, “**Vipallāsa (Diṭṭhi, Saññā, Citta) Affect Saṅkhāra.**”

Puthujjano Is a *Satta* in the Human Realm

9. Finally, a human in the “*satta* state” (i.e., who has not comprehended the Four Noble Truths) is a “*puthujjano*.” Thus, a *puthujjano* (normally translated as “**uninformed ordinary person**” in many translations) is a human with *sakkāya diṭṭhi*.

- In the “**WebLink: [suttacentral: Cūlavedalla Sutta \(MN 44\)](#)**,” Ven. Dhammadinnā is asked: “how does *sakkāya diṭṭhi* (identity view) come about?”
- She replied: “.. **uninformed ordinary persons** who have not been exposed to the teaching of the Noble persons have one of the following views. **One group has the wrong vision of *rūpa* (material**

form) in 4 ways: to regard *rūpa* as “mine,” or “I” as *rūpa*, or *rūpa* to be “in me,” or “I” to be “in *rūpa*.” Then there is the other group who regard one or more of the mental factors *vedanā* (feeling) ... *saññā* (perception) ... *saṅkhāra* (ways of thinking) ... *viññāṇa* (consciousness) as “mine,” or “I” as those, or them to be “in me,” or “I” to be “in them.” (We discussed this in #1 of the previous post, [“Sakkāya Diṭṭhi – Wrong View of ‘Me’ and ‘Mine.’”](#))

- Thus, any living being (human, *Deva*, *Brahma*, as well as any other living being) who has not comprehended the “world vision” of how suffering arises is a “*satta*.” A *satta* in the human realm is a *puthujjano*.

9.3.3 Anatta and Sakkāya Diṭṭhi – Two Different Concepts

February 13, 2021

Anatta is Not Sakkāya Diṭṭhi

1. As we discussed in the previous two posts [[Post 1](#) and [Post 2](#)], *sakkāya diṭṭhi* is the WRONG VIEW of “me” and “mine.” See, [“Sakkāya Diṭṭhi and Paṭicca Samuppāda.”](#)

- New existences (*bhava*) arise due to specific *kamma* done with different types of *abhisāṅkhāra* (*vacī abhisāṅkhāra* and *kāya abhisāṅkhāra*.) That is a process dictated by *Paṭicca Samuppāda*. Those *saṅkhārā* arise with having that wrong view (*avijjā*.) That is why the PS process starts with “*avijjā paccayā saṅkhārā*.”
- When one understands the *Paṭicca Samuppāda* process, one will see that it is such *saṅkhārā* (thoughts) arise because one believes that experiences in this world can bring happiness. Such experiences come through the body and mind, and one takes those as “me.” Those external things that be likes, one takes them to be “mine.” (To emphasize again, *saññā* and *citta vipallāsa* of “me” and “mine” will be removed only at *Anāgāmi* and *Arahant* stages. Removal of *sakkāya diṭṭhi* only removes the wrong view.)
- Those wrong views of a “me” and “mine” keep one bound to the rebirth process. **There is a living-being (*satta*) AS LONG AS there is the wrong of a “me” and “mine” associated with that lifestream.** We will discuss this in detail in upcoming posts.
- That wrong view is *sakkāya diṭṭhi*. As long as the *sakkāya diṭṭhi* is there, one will not overcome the “*satta*” state and become one of the 8 *Ariya puggalā*, as discussed in those previous two posts. **Furthermore, a “me” will exist (in the rebirth process) until that wrong view is removed.**
- That wrong view will be removed ONLY WHEN one sees nothing in this world TO BE CONSIDERED “me” or “mine.” Therefore, *sakkāya diṭṭhi* (the wrong view) is RELATED TO *anatta* (a characteristic of nature.)
- But *anatta* is NOT that wrong associated with a “me” or a “self.” **Anatta means EVERYTHING in this world is devoid of value.**

Anatta is Not “No-Self”!

2. Many people translate the word “*anatta*” as “no-self.” But the Buddha advised us to stay away from the following two extremes to describe a living-being (*satta*.)

- It is NOT correct to say that a *satta* (with the wrong view of a “self”) does not exist. That *satta* will live in one of the 31 realms as long as having that incorrect view. **Most importantly, life is real, and so is the suffering (together with infrequent happiness). Here, I am referring to the long rebirth process.**
- On the other hand, in ultimate reality, there is no “self” or a “soul” or an “*ātman*” traveling the rebirth process (*saṃsāra*.) When that is understood, that *satta* will cease to exist IN THIS WORLD, i.e., that lifestream will merge with *Nibbāna*.

- Instead of having endless debates about whether a “self” exists or not, it pays to focus on how the Buddha explained the existence of a *satta* suffering much in the rebirth process.
- **To repeat:** *abhisankhāra* ARISE in a mind BECAUSE a *satta* (living-being) acts with that wrong view. But if one understands this process, one can be mindful and stop such *sankhārā* from CONTINUING TO grow and LEAD TO new existences (*bhava*.) That is the basis of *Satipaṭṭhāna*.
- When one understands *Paṭicca Samuppāda*, one will see no need to follow either of those two extremes of whether there is a “self” or not.

What is *Anatta*?

3. The concept of *anatta* is intrinsically related to the other two: *anicca* and *dukkha*. Those three are the “three characteristics of nature.”

- None of those are DIRECTLY about a “person” or a “*satta*.”
- *Anicca*, *dukkha*, *anatta* are related by “*yadaniccā tam dukkham, yaṃ dukkham tadanattā*” (expanded: “*yad aniccā tam dukkham, yaṃ dukkham tad anattā*.”) That means, “everything in this world” is of *anicca* nature; (craving for them) leads to *dukkha*; therefore, **it is unfruitful to crave for anything in this world (*anatta*).**
- There are 12 *suttas* in the *Aniccavagga* of the *Saṃyutta Nikāya* 35 (SN 35.1 through SN 35.12), stating that ***anicca* (and *dukkha* and *anatta*) nature is associated with everything in this world.**
- There are 6 *suttas* in the *Aniccavagga* of the *Saṃyutta Nikāya* 2 (SN 22.12 through SN 22.17) stating the same and the above relationship among the three entities.

Inert Things Are of *Anatta* Nature Too!

4. The “[WebLink: suttacentral: Yadanattā Sutta \(SN 22. 17\)](#)” states: “*Rūpaṃ, bhikkhave, anattā. Yadanattā taṃ ‘netāṃ mama, nesohamasmi, na meso attā’ ti evametāṃ yathābhūtaṃ sammappaññāya daṭṭhabbāṃ. Vedanā anattā ...saññā anattā ...saṅkhārā anattā ...viññāṇaṃ anattā.*”

Translated: “*Bhikkhus, rūpa is of anatta nature. It has no essence and is of no value.* Any *rūpa* (including external *rūpa*) should be seen as it really is — with correct wisdom — thus: “This *rūpa* is not mine, this I am not, this should not be taken as “me.” Then the same is stated for the four mental components.

- There are other *suttas* explicitly stating that the **external world is also of *anatta* nature.** For example, the “[WebLink: suttacentral: Bāhirāyatana Anatta Sutta \(SN 35.227\)](#)” says: “*Rūpā, bhikkhave, anattā. Saddā ... gandhā ... rasā ... phoṭṭhabbā ... dhammā anattā. Evaṃ passāṃ ... pe ... nāparaṃ itthattāyāti pajānāti*” ti.

Translated: “*Bhikkhus, sights, sounds, smells, tastes, touches, and dhammā are of anatta nature.* Seeing this ... (a Noble Person) understands: “There is no value in any of those... (for them) there is no return to any state of existence in this world (i.e., they will attain *Nibbāna*).”

- **Does it make sense to say, “sights, sounds, smells, tastes, touches, and thoughts are not-self”?** Is having a “self” a possibility for sights, sounds, etc.? But that is the exact English translation of this *sutta* at Sutta Central!
- **Thus, it should be clear that ALL INERT THINGS in this world are also of *anatta* nature!**
- It is unfruitful AND dangerous to value them and to attach (*taṇhā*) to them.
- We will get to discuss this in detail in the future. But I just wanted to make the distinction between *sakkāya diṭṭhi* and *anatta*.

Sakkāya Diṭṭhi Is Related to *Anatta*

5. Of course, getting rid of *sakkāya diṭṭhi* and starting to comprehend *Tilakkhaṇa* (including *anatta* nature) happens simultaneously at the *Sotāpanna* stage. Those two concepts are related.

- This relationship is described in the “[WebLink: suttacentral: Anattalakkhana Sutta \(SN 22.59\)](#),” the second *sutta* delivered by the Buddha to the five ascetics.
- “*Rūpaṃ, bhikkhave, anattā. Rūpaṃca hidam, bhikkhave, attā abhavissa, nayidaṃ rūpaṃ ābādhāya saṃvattēyya, labbhettha ca rūpe: ‘evaṃ me rūpaṃ hotu, evaṃ me rūpaṃ mā ahoṣī’ti.’*” OR “*Bhikkhus, form no value and should not be considered one’s own. If rūpa (meaning one’s body in this case) belonged to oneself, one should be able to control it (without leading to sicknesses and injuries; one should be able to say: ‘Let my body be thus without affliction)’*”
- “*Yasmā ca kho, bhikkhave, rūpaṃ anattā, tasmā rūpaṃ ābādhāya saṃvattati, na ca labbhati rūpe: ‘evaṃ me rūpaṃ hotu, evaṃ me rūpaṃ mā ahoṣī’ti.*” OR “But this body has the *anatta* nature, it leads to affliction, and it is not possible to have it thus: ‘Let my body be this way; let my body not be the other way.’” **Therefore, “this body should not be considered as mine” is ONE ASPECT of the *anatta* nature.**
- In other words, one’s body is just like any other *rūpa* in this world. It is subject to the *anatta* nature dictated by *Paṭicca Samuppāda*. That is also why *sakkāya diṭṭhi* is wrong.
- The *sutta* explains that the same is true for the other four mental aggregates: *vedanā anattā, saññā anattā, saṅkhārā anattā, viññāṇaṃ anattā*.

Anattā Asārakaṭṭhenāti – Anatta Means Anything in this World is Void of Value

6. Finally, the following verse is in the “[WebLink: suttacentral: Khuddaka Nikāya Paṭisambhidāmagga 3.1. Mahāpaṇṇāskathā](#)” (towards the end) of *Paṭisambhidāmagga* in the *Tipiṭaka*: “*Rūpaṃ atītānāgatapaccuppannaṃ aniccaṃ khayaṭṭhena dukkhaṃ bhayaṭṭhena anattā asārakaṭṭhenāti..*”

- **Translated:** “any *rūpa* belonging to the past, present, or future is of *anicca* nature and (attaching to them) will lead to one’s downfall (*khaya*); it is of *dukkha* nature because it is dangerous (*bhaya*); it is of *anatta* nature because it is *useless (asāra.)*” [*asāra* : [adj.] worthless; sapless; vain.]
- Thus it is evident that *anatta* CANNOT be translated as “no-self.”

The next verse there is; “*Rūpaṃ atītānāgatapaccuppannaṃ aniccaṃ saṅkhataṃ paṭiccasamuppannaṃ khayadhammaṃ vayadhammaṃ virāgadhammaṃ nirodhadhammanti tulayitvā tīrayitvā vibhāvayitvā vibhūtaṃ katvā rūpanirodhe nibbāne khippaṃ javatīti—javanapaṇṇā. Vedanā ... pe ... saññā ... saṅkhārā ... viññāṇaṃ ... cakkhu ... pe ... jarāmaraṇaṃ atītānāgatapaccuppannaṃ aniccaṃ saṅkhataṃ paṭiccasamuppannaṃ khayadhammaṃ vayadhammaṃ virāgadhammaṃ nirodhadhammanti tulayitvā tīrayitvā vibhāvayitvā vibhūtaṃ katvā jarāmaraṇanirodhe nibbāne khippaṃ javatīti—javanapaṇṇā. Javanapaṇṇatāya saṃvattantīti—ayaṃ javanapaṇṇā. (14)*”

- Here it is emphasized that EVERYTHING in this world, including all *rūpa*, *vedanā*, *saññā*, *saṅkhārā*, *viññāṇa*, *cakkhu ... pe ... jarāmaraṇa*, are all of *anicca* nature and arise via *Paṭicca Samuppāda*. They ALL lead to eventual suffering (*dukkha*). They ALL are of no real value (*anatta*.) See #3 above “*yad aniccaṃ taṃ dukkham, yaṃ dukkham tad anattā.*”
- That is why we first need to understand the *Paṭicca Samuppāda* process.
- This post has many Pāli verses. But I wanted to quote directly from the *Tipiṭaka* to make things absolutely clear. It is critical to understand these fundamental concepts.

9.4.1 Nibbāna – Rāgakkhaya Dosakkhaya Mohakkhaya – Part 1

February 19, 2021; revised August 5, 2023

Nibbāna is defined as “*rāgakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan’tī*” OR “*Nibbāna* is the ending of *rāga*, *dosa*, and *moha*.”

What Is *Nibbāna*?

1. The above verse explaining *Nibbāna* appears in many *suttas*. The above quote is from “[WebLink: suttacentral: Nibbānapañhā Sutta \(SN 38.1\)](#).”

- There is a stronger version of *rāga*, i.e., *lobha* (extreme greed.) Someone with a *lobha* mindset CANNOT comprehend the Four Noble Truths. That is why *Nibbāna* is defined as above.
- All future suffering arises due to *lobha*, *dosa*, and *moha*. But until *lobha* is reduced to the *rāga* level, one cannot comprehend the Noble Truths. See, “[Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā](#).”
- Someone with a “moral mindset” which has removed the ten types of wrong views NORMALLY has reduced versions of *rāga*, *paṭigha*, and *avijjā*. However, their mindsets can also be elevated to stronger *lobha*, *dosa*, and *moha* under some conditions (if the temptation is high enough.)
- Someone who has removed the ten types of wrong views can comprehend the Four Noble Truths and remove *avijjā* (ignorance about this world’s real nature.) It happens in four stages culminating in the *Arahant* stage.
- That is a summary. We will discuss the details below and in upcoming posts.

Nibbāna Defined as Above Is the Ultimate Version

2. What is defined above is the ultimate version of *Nibbāna* or the “ultimate cooling down” via “eliminating ANY future suffering.”

- In the previous three posts in this series, I briefly laid out the key (and deeper) foundations of Buddha Dhamma. I did that so that one would see the outline. Of course, more explanations are needed to clarify them.
- We will gradually clarify those concepts.
- The way to do that is to realize that we CAN experience the early stage of “cooling down” by gradually reducing *lobha*, *dosa*, and *moha* to the *rāga*, *paṭigha*, and *avijjā*, AND trying to maintain them there without re-elevating to the *lobha*, *dosa*, *moha* levels.
- **A single Pāli word** captures *lobha*, *dosa*, *moha* (and the reduced versions of *rāga*, *paṭigha*, and *avijjā*.) That word is “*saṃ*.” See details in the section on “*San*.”

Sandiṭṭhikam Nibbānam* – One Needs to “See Defilements” to Get to *Nibbāna

3. One first needs to “see defilements” or “see ‘*saṃ*’” (*saṃ diṭṭhika*) to be able to see the path to *Nibbāna*.

- That is why the Buddha Dhamma is “*sandiṭṭhika*.” In the verse that points out the virtues of Buddha Dhamma, “*..bhagavatā dhammo sandiṭṭhiko akāliko ehipassiko opaneyyiko paccattam veditabbo viññūhīti*” it is one of the qualities that makes Buddha Dhamma unique.
- **One can experience the first stages of *Nibbāna* (cooling down of the mind) by “seeing the dangers of ‘*saṃ*’ and gradually getting rid of them.**
- That is the *Nibbāna* that can be experienced in this life! It is easily reached, especially if one can see the drawbacks of “*saṃ*” (greed, anger, delusion.)

4. That is what the Buddha explained to Jāṇussoṇi in the “[WebLink: suttacentral: Nibbuta Sutta \(AN 3.55\)](#).” A reasonable English translation is “[WebLink: suttacentral: Nibbāna \(AN 3.55\)](#).”

- Jāṇussoṇi asks the Buddha, “Master Gotama, it is said: ‘Directly visible *Nibbāna*, directly visible *Nibbāna*.’ In what way is *Nibbāna* directly visible, immediate, inviting one to come and see, applicable, to be personally experienced by the wise?”
- As explained there, a mind with **greed**, **hate**, and **delusion** (ignorance about the real nature) “..experiences mental suffering and dejection.”
- Thus if one can see the bad consequences of **greed, hate, and delusion (or ‘*saṃ*’)**, one can reduce those and reach a “better state of mind.” It is a “cooled state of mind” with less agitation and would not experience depression.
- In particular, it is easy to recognize when greed and anger arise in one’s mind. One should make an effort to control them. **That is the basis of *Ānāpānasati* and *Satipaṭṭhāna* meditations:** “being mindful.”
- That is why *Nibbāna* is directly visible AND can be experienced in this life itself!

***Ādittapariyāya Sutta* (The Fire Sermon) Is About the “Fire in a Mind”**

5. An English translation is “[WebLink: accesstoinsight.org: Ādittapariyāya Sutta \(The Fire Sermon\)](#).” As with all English translations, it is a ‘word-by-word’ translation without clarifying what is meant by that “fire.” (see other translations at Sutta Central: “[WebLink: suttacentral: Āditta Sutta \(SN 35.28\)](#)”)

- It says, “The **eye** is burning, **forms** are burning, **eye-consciousness** is burning, **eye-contact** is burning, also **whatever is felt** as pleasant or painful or neither-painful-nor-pleasant that arises with eye-contact for its indispensable condition, that too is burning.” **That may not make sense if one does not see**

that it is ATTACHMENT TO those five things that LEADS to “fires in the MIND.” Those five are associated with “seeing.”

- Even the direct translation says, “Burning with what? Burning with the **fire of lust**, with the **fire of hate**, with the **fire of delusion**.”
- Such 5 types of “sources of fire” arise with the other senses: hearing, tasting, smelling, body touches, and the mind itself.
- But all those 30 “sources of fire” ALWAYS lead to “fires in mind.” We MUST note that all 30 types of sensory experiences register in the mind!
- It is the MIND that will burn (sooner or later) due to the actions one takes (*kamma* via *saṅkhāra*) with the desire to seek pleasures with “seeing.”
- Some of that “burning” will materialize later in this life or even in future lives. **That “potential to bring suffering” is deposited as “kammic energy,” and that is also the same as “bhava” (cause for future suffering)!** That is a hard part of understanding. But we will get to that.

“Burning” (*Tāpa*) Has Root Cause in *Rāga* (Greed) and *Dosa* (Anger)

6. We attach to things that we like. This “attachment” is described in several ways by the Buddha: *icchā*, *taṇhā*, *nandī*, *piya*, *kāma*, etc. When exposed to such ‘likable things’ in this world, we become joyful and try to get more of them, even using immoral deeds. Therein lies the problem.

- Those things in this world that lead to such attachment and joyful feelings are those to which our ignorant minds assign “*kāmaguṇa*” or “characteristics/sources of *kāma*.” See “[Kāma Guṇa – Origin of Attachment \(Taṇhā\)](#).”
- Even though they may provide temporary joy, they always lead to “heat/burning” (*tāpa*) in mind.
- The word “*tappati*” in the *Dhammapada* verse in #10 refers to a mind that is ‘heated/burning.’

Rāga and *Dosa* – Two Faces of a Coin

7. *Rāga* and *dosa* are like the two faces of a coin, and the coin itself is *moha* (*avijjā*.) As long as *avijjā* is there, *rāga* OR *dosa* can arise.

- *Dosa* (anger/hate/dislike) is the opposite of *rāga* (and *lobha*.) There are things that we don’t like in this world. Furthermore, we also dislike/hate people who get in our way in our efforts to seek more sensory pleasures.
- We tend to evaluate external objects (people or objects) based on their ability to provide us with enjoyment/happiness or whether they appear ugly/distasteful/tend to get in our way. **Thus, we tend to put anything into one of those two categories:** like/dislike. This is due to the root cause of *moha*. This explicit “measuring” or ‘evaluation’ is “*māna*.”
- We do that by “measuring” with the perception of “me” and trying to decide what will enhance “my enjoyment” and minimize “my displeasure.” That is because of our *avijjā* or ignorance that such behavior will ONLY lead to future suffering.

Moha Is the Root Cause of *Rāga* and *Dosa*

8. Sometimes, the mind becomes uncertain (*vicikicchā*) about what to do. At other times, it becomes perturbed/excited (*uddhacca*) due to uncertainty about something. In such cases, only *moha* (or *avijjā*) is present.

- In other words, *moha* is the root cause of *rāga*, *dosa*, and all other *asobhana cetasika*.

- Furthermore, the deepest level of *moha* is in *māna*, *uddhacca*, and *avijjā*. Those are removed only at the *Arahant* stage. It is one of the last five *Samyojana* (bonds to the *samsāric* process) of *rūpa rāga*, *arūpa rāga*, *māna*, *uddhacca*, *avijjā*.
- By the way, *kāma rāga* is removed at the *Anāgāmi* stage. When one becomes an “*Arahant Anugāmi*” at the next level, one loses *rūpa rāga* and *arūpa rāga*. It is only at the *Arahant* stage that one removes the last three: *māna*, *uddhacca*, and *avijjā*. Here, *māna* and *uddhacca* are the last traces of *rāga* and *dosa* left. *Avijjā* is the last trace of *moha* removed that breaks ALL bonds to the rebirth process (*samsāra*.)

Avijjā and Taṇhā Go Together!

9. Because of our unwise perception of a “me,” we tend to attach to some things (*rāga*) and try to stay away from other things (*dosa*.) Either way, we are ‘mentally bound’ to both types. We tend to think about ways to get likable things closer and to keep unlikable things away. Thus, *taṇhā* is involved in both cases. See [“Taṇhā – How We Attach Via Greed, Hate, and Ignorance.”](#)

- It is impossible to get rid of *taṇhā* as long as we do not comprehend the real nature of this world explained by the Buddha and thereby get rid of *avijjā*.
- The first step towards that understanding is to live a moral life and cleanse the mind. That will enable one to comprehend this ‘previously unheard’ Dhamma: **Why sensory pleasures (*kāma*) WILL invariably lead to future suffering.**
- Therefore, we need to get to the next step of understanding *dasa akusala* and *dasa kusala*.
- Don’t worry too much about all these Pāli terms. They will become clear as we discuss them further. There is no need to memorize. If you understand the concepts, they will become familiar.

Dasa Akusala and Dasa Kusala

10. The path to *Nibbāna* is to avoid immoral deeds or *dasa akusala* (“[Ten Immoral Actions \(Dasa Akusala\)](#)”) and to engage in meritorious deeds or *dasa kusala* (“[Dasa Akusala/Dasa Kusala – Basis of Buddha Dhamma.](#)”)

- The **drawbacks of *dasa akusala*** are succinctly stated in the following *Dhammapada* verse:

Idha tappati, pecca tappati, Agony now, agony hereafter,
pāpakārī ubhayattha tappati. The wrong-doer suffers agony in both worlds.
“Pāpaṃ me katan”ti tappati, Agonized now by the knowledge that one has done wrong,
bhiyyo tappati, duggatim gato. One suffers more agony when gone to a state of woe.

- In the same way, the **benefits of *dasa kusala*** will be evident in this life and future lives:

Idha nandati, pecca nandati, Rejoicing now, rejoicing hereafter,
katapuñño ubhayattha nandati. The doer of wholesome actions rejoices in both worlds.
“Puññaṃ me katan”ti nandati, Rejoicing now in the knowledge that one has acted morally,
bhiyyo nandati, suggatim gato. One rejoices more when gone to a state of bliss.

- We will discuss the relationship of *rāga*, *dosa*, *moha* to *dasa akusala* and *dasa kusala* in the next post in this series.
- Before that please make sure to read the two posts: “[Lobha, Rāga and Kāmacchanda, Kāmarāga](#)” and “[Lobha, Dosa, Moha Versus Rāga, Patigha, Avijja.](#)” It is necessary to grasp the meanings of those various Pāli terms before reading the next post in this series.

Posts in this subsection at: “[Paticca Samuppāda – Essential Concepts.](#)”

9.4.2 Pañca Nīvaraṇa and Sensual Pleasures (Kāma)

February 28, 2021; revised March 1, 2021 (link in #1 revised, #8 and #9 re-written); July 17, 2021

Pañca Nīvaraṇa (Five Hindrances) are defilements that “cover the mind” and make the mind agitated or lethargic and susceptible to make bad decisions. Craving for sensory pleasures is the root cause for the covering of the mind.

Why Are They Called “Hindrances”?

1. These five are indicators for “mental states.” When they become elevated, one can easily make “bad decisions.” Furthermore, it is difficult for a mind to focus on any subject or comprehend new concepts with the five hindrances at high levels.

- *Pañca nīvaraṇa* does not cover a mind all the time. They can be triggered under the influence of temptations.
- In such instances, one could be tempted to engage in *dasa akusala* to ANY extent, depending on the temptation level. One may even do strong immoral deeds (*pāpa kamma*) that make rebirth in the *apāyās* possible.
- The possibility of *pañca nīvaraṇa* arising will permanently go away when one attains the *Sotāpanna* stage.
- That is why a *Sotāpanna* is permanently released from the *apāyās*.
- However, getting to the *Sotāpanna* stage REQUIRES **seeing (or understanding) that craving for sensory pleasures (kāma) is the root cause of all suffering**. Of course, even after “seeing” it correctly (i.e., removing the wrong vision) a *Sotāpanna* would still enjoy sensual pleasures because he had not removed the wrong perception (*saññā*).

What Is the “Previously Unheard Dhamma (Teachings)?”

2. The Buddha, in his first discourse, declared that his teachings had not been known to the world (in the absence of another Buddha.) That is the meaning of the verse, “*Idam dukkham ariyasaccan’ti me, bhikkhave, pubbe ananussutesu dhammesu.*” OR “*bhikkhus*, this is the noble truth of suffering **that was not heard before..**” **That highlighted part of the verse appears 12 times in the sutta** (3 times each for the Four Noble Truths)!

- The “previously unheard teaching” is that even though sensory experiences can provide short-lived pleasures, they ALWAYS lead to suffering in the long-term (during this life and especially in the rebirth process.)
- **The root cause for that suffering is the wrong view/perception of a “me” or *sakkāya diṭṭhi*.** That view/perception, in turn, arises because of the perceived “pleasure” in sensory experiences.
- We attach to worldly pleasures (with *icchā/taṇhā*) with that wrong view AND perception BECAUSE we think they can provide long-lasting happiness. **But the Buddha explained that there is hidden suffering in those pleasures.** See the previous posts in “[Sakkāya Diṭṭhi and Paṭicca Samuppāda.](#)”
- Upon attaining the *Buddhahood*, the Buddha was able to see the minds of countless living-beings and was first discouraged that most of them would not be able to comprehend his teachings. Then he realized that some have the ability to comprehend his deep Dhamma.

Kāmato Jāyatī Soko – Kāma Is a Root Cause of Suffering

3. “[WebLink: tipitaka.net: Dhammapada Verse 215](#)” provides the key idea:

Kāmato jāyatī soko, **From desire,** arises grief,

kāmato jāyatī bhayaṃ; from desire arises fear;
Kāmato vippamuttassa, Completely free from desire,
natthi soko kuto bhayaṃ. there is no grief; how can there be fear?

- The above verse is the 7th verse in that link. The verses 4th through 8th are the same verses with **synonymous words** for *kāma*: *piya*, *pema*, *rati* (pronounced “rathi”), and *taṇhā*. We have discussed that *icchā* is also the same as *taṇhā*. In English, we can use words like desire, attachment, craving, liking, etc., to express the same meaning.
- There are pleasurable experiences. Those are NOT *kāma*. More details at, “[What is “Kāma”? It is not Just Sex.](#)” **It is critical to read that post.**
- The desire to accumulate more such experiences is *kāma*. That desire has no bounds. If temptations are high enough, we may take extreme immoral actions to fulfill such desires. That is when we get into trouble. But the key is to figure out how to stop such temptations. That CANNOT be done with willpower.
- With that in mind, let us look into *pañca nīvaraṇa*.

What Are *Pañca Nīvaraṇa*?

4. *Pañca nīvaraṇa* are: *Kāmacchanda*, *vyāpāda* (or *byāpāda*), *thina-middha*, *uddhacca-kukkucca*, and *vicikicchā*. See “[Āvarananīvaraṇa Sutta \(SN 46.38\).](#)”

- In the *sutta*, the Buddha used two words, “*āvaraṇā*” and “*nīvaraṇā*” to describe these five. The word “*āvaraṇā*” means “to cover (the mind.)” When the mind is covered, it cannot grasp Buddha’s teachings, and thus *Nibbāna* (or cooling down) is prevented (the meaning of “*nīvaraṇā*.”)
- When a mind is “covered,” one cannot clearly see the consequences of one’s actions. It is like looking through a fog. One cannot see what lies ahead.
- Removing *pañca nīvaraṇa* from one’s mind is like lifting a fog. One can see far ahead with much clarity.
- But how do those 5 things cover a mind? We need to figure that out before we can remove them.

Kāmacchanda Is the Main *Nīvaraṇa*

5. *Kāmacchanda* is stronger than *kāma rāga*. It is like *lobha* but focused on *kāma*.

- *Kāmacchanda* is the highest level of attachment. Here one is willing to do abhorrent acts (killing, raping, etc.) to satisfy one’s desires.
- When *kāma* rises to the *kāmacchanda* level, one becomes unaware of the bad consequences of one’s actions. ***Kāmacchanda* comes from *kāma* + *icchā* + *anda*, or “being blinded by sensory attractions.”** Here, “*icchā*” is liking, and “*anda*” is blind.
- It is said that “one loses one’s mind” when blinded by attachment to sense pleasures, i.e., one cannot think rationally when one has *kāmacchanda*.
- See, “[Lobha, Rāga and Kāmacchanda, Kāmarāga.](#)”

Vyāpāda Is a Consequence of *Kāmacchanda*

6. The second *nīvaraṇa*, *vyāpāda*, arises because of *kāmacchanda*. But it is a different manifestation. Instead of becoming lustful, one becomes hateful and angry.

- That anger arises when one is prevented from satisfying one’s desire for sensual pleasures. *Paṭigha* (or displeasure) is a lower level of *vyāpāda* and is not a *nīvaraṇa*. One does not do “*apāyagāmī* deeds” with *paṭigha*.

- We have heard about people killing others to get their wealth or their spouses or other loved ones. That happens when one's mind becomes overwhelmed with *kāmacchanda*.
- *Dosa* (or *dvesha* in Sanskrit or Sinhala) is the ANGER that arises based on initial *lobha*. Here, *dvesha* comes from “*devana*” + “*vesha*” — දෙවන වෙශය — or second manifestation of *lobha*. We get angry when someone else is in the way of getting what we want. This statement is from “[Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā](#).”
- With *dosa*, one will inevitably take a “downward path.” That is the meaning of *vyāpāda* (“*vaya*” or “downward”+ “*pāda*” or “direction.”) Thus, *vyāpāda* is the same as *dosa*.

Other Three Nīvaraṇa Also Have Roots in Kāmacchanda

7. When one gets attached to sensory pleasures, one's mind becomes dull (Pāli word is *thīna*.) Because of that, the mind gets stuck (*middha*.)

- Thus, *thīna-middha* refers to a mind that has become lethargic and stuck. Such a mind would not be able to focus on anything, let alone difficult concepts. A good example is those addicted to watching movies, TV, sports, etc., all day. Their minds are stuck. Some people forget even to eat.
- A different manifestation is *uddhacca-kukkucca*. Here, one becomes “high-minded” (*uddhacca*) with perceived wealth or power and starts doing lowly deeds (*kukkucca*.) For example, a powerful politician or a wealthy person may engage in “lowly deeds” like bribery, rape, etc.
- A mind is susceptible to cravings for sensory pleasures because it has no true faith in Buddha Dhamma. It is not certain that the concepts in Buddha Dhamma are correct. For example, there are doubts about the laws of *kamma* or rebirth. Having such doubts is *vicikicchā*. Such doubts will go away only when one comprehends the Four Noble Truths.
- Further details at, “[Key to Calming the Mind – The Five Hindrances](#).”

Noble Truth on Suffering – Kāma Is the Root Cause of Suffering

8. A key aspect of comprehending Noble Truths is to see that *kāma* (craving for sensory pleasures) is the root cause of future suffering.

- It is embedded in the verse that describes the root cause of suffering: “*yampicchaṃ na labhati tampi dukkhāṃ*” (“*Yam pi icchaṃ na labhati tam pi dukkham*.” See, “[Essence of Buddhism – In the First Sutta](#).”
- “*Yam pi icchaṃ*” means “whatever is **liked or craved** for.” “*Na labhati*” means “not getting,” “*tam pi dukkham*” means “that leads to suffering.”
- Therefore, that verse simply says: “If one does not get **what one craves or likes**, that leads to suffering.”
- Note that *kāma* arises due to *icchā*.

Importance of Getting Rid of Micchā Diṭṭhi

9. *Micchā Diṭṭhi* has TWO levels. Not knowing that *kāma* is the root cause of suffering is the **deeper level of micchā diṭṭhi**.

- First, one needs to get rid of the 10 types of wrong views that include not believing in the laws of *kamma* and rebirth. The deeper level of wrong views is removed when one becomes a *Sotāpanna* and realizes that attachment to worldly things only leads to future suffering, i.e., understand the Four Noble Truths.
- That deeper level of *micchā diṭṭhi* starts fading away when one becomes a *Sotāpanna*. At that point, ALL FIVE *nīvaraṇa* are removed permanently.

- **An average human (*puthujjano*) thinks exactly the opposite way;** That one should live FOR sensory pleasures. That is why it is so hard to change that ingrained mindset. But it is not that different from the mindset of a fish who only thinks about the tasty bait and does not see the hidden dangers in biting into that tasty bait.

10. All relevant posts at, [“Paticca Samuppāda – Essential Concepts.”](#)

9.4.3 What is “Kāma”? It is not Just Sex

Revised October 31, 2017; revised December 18, 2018 (#13, #14); February 28, 2021 (major revision); March 5, 2021

Kāma means “*saṅkappa rāga*” or “thinking about and planning to enjoy more sensual pleasures.” Another related meaning is “giving priority to mind-made pleasures.”

Kāma* Is Assigning High Value for Sensory Pleasures in *Kāma Loka

1. “*Kāma*” comes from “*kā*” meaning “eat or destroy” and “*ama*” means *Nibbāna*. In our human world, which is a part of “*kāma loka*,” temptations for staying away from *Nibbāna* come from five physical senses.

- Some people believe “*kāma*” is just about engaging in sex. Some others believe attractive sense objects are “*kāma*” objects, and those lead to defilements. Both are not correct.
- While “attractive sense objects” can lead to “*kāma assāda*” or “mind-made pleasures”, the objects themselves don’t have *kāma*. An *Arahant* is not tempted by any such object. But an *Arahant* would eat a delicious meal offered, but would not crave such meals.
- Furthermore, an *Arahant* gets to that stage by learning and contemplating *Dhamma* (cultivating wisdom) and NOT by living a harsh life.
- The lowest 11 realms are collectively called “*kāma loka*” because all such made-up pleasures are available through all five physical senses in those realms.

Sensory Experiences are Not *Kāma*

2. This is a critical point to understand. There are sensory contacts that naturally bring pleasurable FEELINGS. For example, eating a cake or smelling a rose gives a pleasurable feeling. That experience itself is not *kāma* or *kāma rāga*.

- Rather, it is the DESIRE to enjoy more of those sensory experiences is *kāma*. That is why the word “*icchā*” and “*taṇhā*” are closely associated with *kāma/kāma rāga*.
- In the [“WebLink: suttacentral: Na Santi Sutta \(SN 1.34\),”](#) the Buddha defined “*kāma*” as that second kind mentioned above: “*Na te kāmā yāni citrāni loke, Saṅkapparāgo purisassa kāmo..*”.

Translated: “World’s pretty things are not *kāma*, **a person creates his/her own *kāma* by generating mind-made pleasures (*rāga saṅkappa*)..**”.

- Buddha said that this world has many attractive pictures, sounds, tastes, smells, and touches. But those are not “*kāma*.” The initial sense experience could be pleasant, but it is a *kamma vipāka* (no *saṅkhāra* generated in the initial sense input).
- When one attaches to such a sensory experience and **keep thinking about them**, one makes “*saṅkappa rāga*” (සංකප්ප රාග in Sinhala) about it (by generating *vacī* and *kāya saṅkhāra*), that is “*kāma*.” Each person generates his/her own *kāma* based on his/her *gati* or *saṁsāric* habits/cravings.

Saṅkappa Rāga* Is *Kāma

3. We experience those external sensory inputs in two ways:

- **We experience them directly:** For example, we see a person; hear a song; taste a piece of cake; smell a fragrance; someone we love gives a kiss. Those are actual sense contacts and **are due to *kamma vipāka***.
- But then we tend to re-live that experience over and over in our MINDS. You may be surprised, but most of our “sense pleasures” or “*kāma assāda*” are created by our minds. A sensory contact comes and goes away relatively quickly; but we keep thinking about it, sometimes for hours. **This “*kāma assāda*” is the one that we CREATE IN OUR MINDS, via *vacī saṅkhāra***.
- For example, we may just see an attractive item in a store display that provides sensory pleasure while we are looking at it for a few seconds.
- But then we start thinking about how nice it would be to be able to buy it, enjoy it, and analyze how to go about paying for it, etc. We may be thinking about it for several days. Please take the time and contemplate this point.
- The initial sense contact of several seconds led to hours of thinking about it and making up “additional pleasure.” That is *kāma assāda*.

What Are *Saṅkappa*?

4. Let us discuss what is meant by “*saṅkappa rāga*”: *Saṅkappa* means thoughts. *Rāga* means giving a high-priority (craving) for pleasures in *saṁsāra*; see, “[Lobha, Rāga and Kāmacchanda, Kāmarāga](#).”

- Thus “*saṅkappa rāga*” means thinking about such sense pleasures and giving priority to them. We tend to think for hours about an actual sensory experience that we enjoyed in the past or one that we are about to experience in the future.
- Sometimes we also think for hours about how to enjoy a certain sense experience that seems out of reach for various reasons. In all these cases, we can spend hours and hours thinking about them and getting *kāma assāda* (or “*āsvāda*” in Sinhala) from it.
- In fact, most times sexual enjoyment comes from just thinking about a past experience or an anticipated one. The actual contact pleasure is relatively short-lived.

Pleasurable Sensory Experiences Due to Good *Kamma Vipāka*

5. As we pointed out in #3 above, **some actual sense contacts** arise due to *kamma vipāka* (good *kamma vipāka* lead to good sense experiences and bad lead to bad). Those are not *kāma* or *kāma assāda*.

- Even an *Arahant* experiences such sense experiences due to *kamma vipāka*, both good and bad. He/she may eat tasty food when offered, ride in a luxurious car, or see eye-catching pictures while on the road.
- But he/she will not keep thinking about how to enjoy such sense experiences, i.e., there is no “*saṅkappa rāga*.”

6. It is relatively easy to distinguish between sense pleasures due to *kamma vipāka* and those due to *kāma assāda*.

- When one is offered a tasty meal, for example, that is due to a previous good *kamma*, i.e., it is a *kamma vipāka*. But when one starts thinking how good that meal was and starts thinking about how to enjoy another such meal, that is *kāma assāda*.
- In the same way, one may be born to a wealthy family and get all types of luxurious sense contacts, those are *kamma vipāka*.
- Whether rich or poor, when one is thinking about acquiring and enjoying new sense pleasures or reminiscing on past sense pleasures, that is *kāma assāda*.

What Is Wrong With *Kāma Assāda* or *Saṅkappa Rāga*?

7. Now we have two questions.

A. Why is it OK to experience direct sense pleasures that **naturally comes** one's way, but not good to enjoy "made-up mental pleasures" by thinking about them? (It is important to realize that even those direct sense pleasures INITIATED by oneself do not count as harmless; when we think about it a bit, we realize that such instances have their beginnings at "*saṅkappa rāga*," i.e., one must have thought about to initiate it).

B. How can one experience an enjoyable sensory pleasure and not be "tempted by it", i.e., not make "*saṅkappa rāga*"?

8. The answers to those two questions can be found in one explanation. But that requires analyzing the situation from a different vantage point than we are used to. This is the "Dhamma that has never been known to the world.." or "*pubbe anamussutesu Dhammesu..*".

- The *Akusala-Mūla Paṭicca samuppāda* cycle starts with, "*avijjā paccayā saṅkhāra*." Those "**made-up mental pleasures**" or "**kāma assāda**" are **precisely what *saṅkhāra* are**. These have bad consequences, or *ādinava*, through the rest of the *Paṭicca samuppāda* (PS) cycle: "*saṅkhāra paccayā viññāṇa*," "*viññāṇa paccayā nāmarūpa*,.....up to "*jāti paccayā jarā, maraṇa, soka, parideva*,...". Thus the endpoint is suffering.
- When we experience a "direct sense contact" that naturally comes our way, that is not *saṅkhāra* or *kāma assāda*. That is a *kamma vipāka*. They do not lead to future suffering.
- In other words, *saṅkhāra* in "*avijjā paccayā saṅkhāra*" is *saṅkappa rāga*. They eventually lead to suffering. That is the hard point to understand.

Early Comprehension – Agitation of the Mind Due to Excess "Sensory Pleasures"

9. Now, one could say, "well, the more such *saṅkappa rāga* that I make, it is better. I don't mind if the mind gets many such *assāda* in a given time."

- In order to analyze that, we need to look at the *ādinava* (bad consequences) of such *assāda*, other than the mind being pushed and pulled in many directions as we discussed in the previous bullet.
- If you watch too many movies/ TV shows or play video games all day, your mind will be agitated. You may not get a good sleep. This is the key reason for the scattered-ness of our minds. This is called *tāpa* or "heat in the mind"; see, "[Satipatthāna Sutta – Relevance to Suffering in This Life](#)."
- The problem is that each time we enjoy *kāma assāda*, we do (*abhi*)*saṅkhāra*, as we saw above. They lead to future suffering via the *Akusala-Mūla Paṭicca samuppāda* cycle. This is what we have been doing in countless births up to now.

10. That future suffering can arise both in this life as well as in future lives. It can materialize at different levels depending on the "strength of the *kāma assāda*."

- Let us start at the most extreme level. One decides that "I have to have this. I am going to do whatever it takes to get it." With such a mindset one can kill, steal, engage in sexual misconduct, lie, or make any number of other immoral acts with a "drunken mind" or a "covered mind."
- Of course, the bad consequences are many, even during this life. One could get caught and go to jail. Even otherwise, one will be under the constant stress of worrying about being caught.
- But stronger consequences will follow in future lives as well, with interest. Thus a normal moral person can see the "*ādinava*" in such strong *kāma assāda*.

- By contemplating on such “*ādīnava*,” it becomes easier for one’s mind to automatically reject doing such acts. That is “*nissaraṇa*.” Through an understanding of the consequences, one avoids such acts.

Long-Term Consequences of Craving “Sensory Pleasures”

11. At the next level, we may not do any of the immoral acts by body or speech, but may still accumulate *vacī saṅkhāra* via constantly thinking about them. It is important to realize that such conscious thoughts (*vitakka/vicāra*) are included in *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).”

- The problem with *vacī saṅkhāra* or *kāma assāda* is that they are addictive. One can spend hours and hours enjoying past sense events of perceived future events (especially involving sex, food, and also about one’s enemies).
- And *vacī saṅkhāra* or *kāma assāda* appear to be harmless. No one else can know about them. One could spend hours on end generating *kāma assāda* about an object of interest and derive enjoyment. But they have consequences.
- It must also be remembered that all those *kāya saṅkhāra* and *vacī saṅkhāra* that one suppressed by one’s will power started off as *mano saṅkhāra* (thoughts that just come to one’s mind) and then one normally “keeps going” by generating CONSCIOUS deliberate thoughts or *vacī saṅkhāra*, which can lead to actual speech and even bodily actions.
- Thus even though *dasa akusala* corresponding to speech and bodily actions were avoided, those due to *vacī saṅkhāra* (*kāma assāda*) would still count as bad *kamma*.
- This is why keeping the conventional five precepts is not sufficient; the hard part is to purify one’s thoughts or the mind; see, “[The Five Precepts – What the Buddha Meant by Them](#).”

Connection to *Āsava* and *Anusaya*

12. A key problem with *vacī saṅkhāra* or the *kāma assāda* is that they lead to the formation of bad habits (*gati*), which in turn lead to the formation of new *āsava/anusaya* or in strengthening old *āsava/anusaya*; see, “[Āsava, Anusaya, and Gati \(Gathi\)](#),” and other related posts.

- It can become a vicious circle. In a way, this is the “wheeling process” of “*riya*” that sustains the cycle of rebirths; see, “[Nibbāna – Is it Difficult to Understand?](#).”
- Even though *vacī saṅkhāra* (*abhijjhā, vyāpāda, micchā diṭṭhi*) seem to be harmless, those can lead to birth in the *apāyā*.
- When one starts controlling such conscious thoughts (*vacī saṅkhāra*), one *gati* will gradually change, and then those “automatic bad thoughts” or *mano saṅkhāra* will become less and less frequent because one’s *āsava/anusaya* will gradually reduce.
- The best and permanent way to change *āsava/anusaya* is to comprehend *anicca, dukkha, anatta*. When one realizes that “nothing in this world can be maintained to one’s satisfaction in the long run” (*anicca*), one’s mind automatically stops thinking about such “made up pleasures.”

13. Connection to *pañca nīvaraṇa* discussed at, “[Pañca Nīvaraṇa and Sensual Pleasures \(Kāma\)](#).”

9.4.4 Icchā, Taṇhā, Kāma – Root Causes of Suffering

March 7, 2021; March 8, 2021 (#2, #3)

An average human sees and perceives sensual pleasures are to be pursued. The Buddha taught that craving for sensual pleasures is the root cause of suffering. However, sensual pleasures can be experienced without having cravings for them.

Difference Between *Kāma* and Sensory Pleasures

1. As we discussed in the post, “[What is “Kāma”? It is not Just Sex](#),” there is a huge difference between *kāma* and “good sensory experiences.”

- *Kāma* is the DESIRE/CRAVING to enjoy more of those sensory experiences. That is why the word “*icchā*” and “*taṇhā*” are closely associated with *kāma* and *kāma rāga*.
- Wealthy people, including Kings, offered the Buddha tasty meals. *Jetavanārāma*, where the Buddha lived for many years, was built like a palace.
- Of course, the Buddha decided to spend the last several months of his life traveling, even while suffering some ailments. He could have stayed in *Jetavanārāma* or one of many such temples. He probably wanted to illustrate the suffering that he himself was experiencing in his old age.
- The Buddha's main message was that one would not be free of future suffering as long as one does not see the long-term bad consequences of sensory pleasures. But, one needs to get there in a step-by-step way. It is impossible to give up sensory pleasures willfully. One MUST first SEE the bad consequences of craving sensory pleasures.

The Analogy of a Drunkard

2. Let us consider person X an alcoholic. He likes to drink whenever he gets a chance because it is a pleasurable experience for him.

- When X goes to a physical exam, he is asked about his alcohol consumption. Upon hearing how much X drinks, the physician advises him to cut down on drinking.
- Yet, X has a hard time getting rid of the habit. He tries hard to “cut down,” but he is back to his routine drinking after a few days.
- One day, he experiences severe abdominal pain and swelling. When admitted to the hospital, his physician takes a scan of his liver and explains to him that it has been damaged and that except for the brain, the liver is the most complex organ in the body. The physician explains that he will have serious health problems soon unless he stops drinking.

(i) Now, for the first time, X “sees” the dangers in drinking alcohol and can cut down his drinking habit drastically. He has lost “*diṭṭhi vipallāsa*” or “wrong/distorted **views**” regarding drinking.

(ii) After a year, X goes for a checkup, and the physician asks him about his drinking habit. X says he does not drink as much as he used to because he is afraid of dying at a young age. But he says he still likes to drink and would have a drink when the urge becomes too strong. He still has “*saññā vipallāsa*” or “wrong/distorted **perceptions**” regarding drinking.

- The doctor gives the following advice: (i) keep contemplating on the dangers of damaging his liver and (ii) also keep contemplating on the relief that he has gained by stop drinking (no more abdominal pain/swelling, etc.), (iii) don't associate with those who like to drink, (iv) associate with those who don't drink in excess.
- Following the advice of the physician, X gradually loses his desire to drink. After several months, he realizes that the desire to “have a drink” is not there anymore. Now he has lost “*saññā vipallāsa*” regarding drinking as well.

The Similarities in the Noble Path

3. Humans (and all living beings) are like the alcoholic X in the analogy in #2 above. They can only see the “immediate pleasures” that mind-pleasing things in this world provide.

- The Buddha is like the physician who can see the dangers of that mindset. But it is hard to convince an average human that craving those “mind-pleasing things” can be not only unfruitful but also WILL HAVE dangerous consequences in the future.
- A *Sotāpanna* learns the dangers of *kāma assāda* from a true disciple of the Buddha (an *Ariya*.) That transition to the *Sotāpanna* stage happened when he started “seeing” the dangers of *kāma assāda*.
- **There is one difference between the two cases:** Unlike the physician who was able to take a scan of the damaged liver and convince X of the dangers, it is harder to explain the dangers to those who don’t even believe in rebirth. However, once that stage is reached, the similarities are there as below.

(i) A *Sotāpanna* “seeing the dangers in craving sensory pleasures” is similar to X, who started “seeing the dangers in heavy drinking.” **He has now removed *diṭṭhi vipallāsa*** about “sensual pleasures.”

- **There is a second difference between the two cases:** While it is possible for X to “lose his willpower” and to go back to his “old ways” of being an alcoholic, the mindset of a *Sotāpanna* WILL NEVER change, even in future lives.

(ii) Analogous to X, a *Sotāpanna* still has **not removed the MINDSET (*saññā vipallāsa*)** that sensory pleasures can provide “enjoyment.” Of course, he/she will not engage in immoral deeds to experience such sensory pleasures.

- Similar to X, a *Sotāpanna* should contemplate the drawbacks of craving worldly pleasures (i.e., contemplate *anicca*, *dukkha*, *anatta* nature or engage in *aniccānupassanā*, *dukkhānupassanā*, *anattānupassanā*) and associate with like-minded people striving for *Nibbāna*.
- As he contemplates the drawbacks of craving worldly pleasures, *saññā vipallāsa* fades away and one day he/she **attains the *Anāgāmi* stage** by completely eliminating *saññā vipallāsa*. After that, any desire for sensual pleasures will be gone.
- Many people have a hard time understanding the difference between *diṭṭhi vipallāsa* and *saññā vipallāsa*. I hope the above analogy is useful.

Difference Between *Kāmacchanda* and *Kāma Rāga*

4. Another way to express the above is the following. A *Sotāpanna* has removed *kāmacchanda*, but *kāma rāga* remains. When *diṭṭhi vipallāsa* is removed, one would NOT be “blinded” by sensual pleasures, i.e., *kāmacchanda* removed. But the tendency to like sensual pleasures (*kāma rāga*) remains because *saññā vipallāsa* is still there.

- Thus, a *Sotāpanna* can live the normal life of a householder. He/she can be married and bring up a family.
- **Only when *kāma rāga* intensifies may one be tempted to engage in activities harmful to others and oneself.** That becomes likely when one drinks too much alcohol or takes drugs. A *Sotāpanna* would instinctively abstain from such activities.
- Association with “bad friends” could make an average person engage in harmful activities. For example, hunting and fishing are immoral activities to be abstained from. Such activities are considered to be accepted “sports activities,” and many people engaged in such activities without realizing the dangers. Such activities fall under the “*vihimsā*” category (hurting other living beings for one’s pleasure) in Buddha Dhamma.
- Note that *vihimsā* is different from *vyāpāda*. With *vyāpāda*, one does immoral deeds with anger/hate. Actions with *vihimsā* are done with ignorance (*avijjā*).

Jhāna Correspond to Mindset of *Brahmas* Who Have Overcome *Kāma*

5. One is born in *Brahma* realms when one has cultivated *jhāna*. To cultivate *jhāna*, one must overcome *kāma* at least temporarily.

- Thus, one must at least temporarily suppress *kāma rāga* to cultivate *jhāna*. In fact, one MUST abstain from *kāma*, *vyāpāda*, and *vihiṃsā saṅkappa* (i.e., abstain from thoughts involving sensual, angry, or otherwise harmful thoughts towards other living beings).
- This is why a *Brahma* in any *Brahma* realm is free of *kāma rāga*, *vyāpāda*, and *vihiṃsā* thoughts during that *Brahma* existence. But unless they have attained *magga phala*, they have all three “hidden” or “temporarily suppressed” during that existence (as *anusaya*.)
- That is just a “side-track” to show the connection to *jhāna*.

Difference Between an Average Human and a Noble Person

6. The following table shows what we discussed above in summary form. The first and second columns show an average human and a Noble Person (*Ariya*). The four rows for the Noble Person depict the Four Noble Truths, as indicated by the third column.

Average Human	Noble Person	Four Noble Truths
<i>Kāma</i> (sensual experiences) are valuable.	Sensual experiences are empty of value and are suffering.	First Noble Truth (What suffering is)
Pursuing <i>Kāma assāda</i> is beneficial.	Pursuing <i>Kāma assāda</i> leads to suffering.	Second Noble Truth (root cause of suffering)
Not having enough sensual pleasures is suffering.	Future suffering stopped by losing cravings for <i>kāma</i> .	Third Noble Truth (stopping future suffering)
Noble Eightfold Path is not pleasurable.	Noble Eightfold Path is the way to stop suffering (i.e., to lose cravings for <i>kāma</i> .	Fourth Noble Truth (the way to eliminate suffering)

- The **First Noble Truth** states what suffering is. It is not the suffering that one FEELS. Sensual pleasures are devoid of value and cause suffering even during this life (by stressing the mind). Of course, more suffering will materialize in future lives too.
- The root cause of suffering in this life, and future lives, is craving sensory pleasures (*kāma*). That is the **Second Noble Truth**.
- The average human (*puthujjano*) believes that lack of sensual pleasures is suffering. That is why he/she strives for more sensory pleasures. But the **Third Noble Truth** says that all suffering can be stopped by losing cravings for sensory pleasures (*kāma*.)
- The average human (*puthujjano*) cannot understand why a Noble Person lives a life staying away from sensual pleasures. He/she perceives such a life to be suffering. But the Noble Person lives a stress-free life and is free from the births in the *apāyā* where there is unimaginable suffering. The way to become a Noble Person (i.e., the way to lose cravings) is the Eightfold Noble Path. That is the **Fourth Noble Truth**.
- Again, remember that *kāma* means “*saṅkappa rāga*” or “having a mindset that sensual pleasures (and even *jhānic* pleasures) are beneficial. Of course, one must first remove the craving for sensual pleasures (*kāma rāga*) before tackling *rūpa rāga* and *arūpa rāga* (cravings for *jhānic* pleasures.)

Ichchā Is the Root Cause of Suffering – In the First Sutta

7. In his first *sutta*, the Buddha defined suffering to arise originating with *icchā*. The First Noble Truth is stated as: “*jātipi dukkhā, jarāpi dukkhā, byādhipi dukkho, maraṇampi dukkhaṃ, appiyeḥi sampayogo dukkho, piyeḥi vippayogo dukkho, yampicchaṃ na labhati tampi dukkhaṃ—saṅkhittena pañcupādānakkhandaḥ dukkhā.*” See, “[Essence of Buddhism – In the First Sutta.](#)”

- There, he stated that suffering arises when one does not get the desired outcome: “*yam pi icchāṃ na labhati tam pi dukkhaṃ*” OR “one suffers when one does not get (*na labhati*) what one desired (*icchāṃ*).”
- Because of that desires (*icchā*), one would try to keep close (*upādāna*) those things that one desires. Those things are parts of the *pañcakkhandhā* that one likes, i.e., *pañcupādānakkhandhā*.
- For details, see “[Icchā \(Cravings\) Lead to Upādāna and to Eventual Suffering.](#)”

8. The connection between *icchā*, *taṇhā*, and *kāma* comes in the Second Noble Truth on how that suffering arises: “*yāyaṃ taṇhā ponobbhavikā nandirāgasahagatā tatrataṭṭhābhinandinī, seyyathidaṃ—kāma taṇhā, bhava taṇhā, vibhava taṇhā.*”

- Because of the *icchā* (or liking/desire), we get attached (*taṇhā*): “it is this attachment (*taṇhā*) which leads to renewed existence. That *taṇhā* is just for those delightful things in this world (*kāma taṇhā*), for continued existence (for those who believe in rebirth, i.e., *bhava taṇhā*), and for optimum pleasures while this life lasts (for those who do not believe in rebirth, i.e., *vibhava taṇhā*)”
- Here we note that *kāma taṇhā* is common to both groups with *bhava taṇhā* and *vibhava taṇhā*.

9. The Third Noble Truth states how that suffering **can be stopped from arising (*nirodha*)**: “*yo tassāyeva taṇhāya asesā virāga nirodho cāgo paṇinissaggo mutti anālayo*” OR “it is the remainder-less fading away and **cessation** of that *taṇhā*, the giving up and relinquishing of it, freedom from it, losing all affection for it.”

- Of course, the way to stop future suffering is in the Fourth Noble Truth: “*ayameva ariyo aṭṭhaṅgiko maggo, seyyathidaṃ—sammādiṭṭhi ... pe ... sammāsamādhi*” OR “it is this Noble Eightfold Path. That is, *Sammā Diṭṭhi ... Sammā Samādhi*.”

Icchā, Taṇhā, Kāma – Can be Removed Only via Noble Eightfold Path

10. **The key point here is that those three (*icchā, taṇhā, and kāma*) CANNOT be removed directly by willpower or rituals.** First, one needs to comprehend WHY *icchā, taṇhā, and kāma* GIVE RISE to suffering. That is the first step in the Noble Eightfold Path: ***Sammā Diṭṭhi***.

- Once that is understood, one will automatically follow the Noble Path. First, one will think accordingly (*Sammā Saṅkappa*.) Then the rest will also follow. One will speak (*Sammā Vācā*), act (*Sammā Kammanta*), make an effort (*Sammā Vāyāma*), live (*Sammā Ājīva*), with that mindset (*Sammā Sati*). Then one will automatically get to *Sammā Samādhi*.
- There are two descriptive ways to understand the suffering hidden in *icchā, taṇhā, and kāma*. One is to comprehend *Paṭicca Samuppāda*, and the other is to comprehend *Tilakkhaṇa*.
- Of course, those two ways are inter-related. That will become more clear as we proceeded. It should already be clear to some extent by now.

11. All posts in this subsection at, “[Paṭicca Samuppāda – Essential Concepts.](#)”

9.4.5 **Jāti – Different Types of Births**

March 14, 2021; revised March 15, 2021; July 29, 2022

Before understanding *Paṭicca Samuppāda*, we need to understand the 11 terms there. One critical word is *jāti*. There are different meanings of the word *jāti*, depending on the context.

Three Main Meanings of *Jāti*

1. The commonly-used meaning of *jāti* is “birth,” as in the birth of a human body. We celebrate “birthdays” based on the day someone was born in this life. As we see below, Buddha Dhamma has two other (different) meanings depending on the context.

- In the *Uppatti Paṭicca Samuppāda*, *jāti* means the birth in a new realm among the 31 realms. For example, a living being can be born as a human, animal, *Deva*, *Brahma*, etc.; that is a birth in that existence. See, “[Akusala-Mūla Upapatti Paṭicca Samuppāda.](#)”
- On the other hand, in *Idappaccayatā Paṭicca Samuppāda*, one can be “born” in countless “states” during a given lifetime. See #3 below.
- The above TWO are the main meanings of “*jāti*” in Buddha Dhamma. After understanding the concepts, one could use the same term appropriate for a given situation.
- Note that *jāti* is pronounced “*jāthi*” with “th” sound as in “three.” See “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”

“Birth of a Baby” as *Jāti* Needs to be Understood as the Mundane Version

2. The mundane meaning of “birth” as the birth of a human (or animal) baby is all we can “see” with our limited worldview.

- It takes a Buddha to comprehend the real nature of this complex world.
- The other two possible meanings of “*jāti*” require a basic understanding of the “wider world view.”
- That means possible births among 31 realms in a rebirth process. But it DOES NOT mean the “re-appearing” of a soul (as in Abrahamic religions) or a *ātman* (as in Hinduism.)

“Births” During a Lifetime – One Important Type of *Jāti*

3. This type of *jāti* happens during a lifetime. For example, one can become angry and be “born” in an “angry *bhava*” and “angry *jāti*” for a short time. An hour later, one may learn of a big promotion and become very happy. At that time, one is “born” in a “happy *jāti*.”

- Even before understanding births (*jāti*) in the rebirth process, it is important to understand how such temporary *jāti* arise. The Buddha discussed that in many suttas. See, for example, “[WebLink: suttacentral: Avijjā Sutta \(AN 10.61\).](#)” This sutta explains that one must associate with “good people,” cultivate good habits, and be mindful of one’s actions. That way, one is likely to be “born in good *jāti*” during a given *bhava*. That is the basis for guaranteeing good rebirths in the rebirth process (*saṃsāra*.)
- See “[Idappaccayatā Paṭicca Samuppāda](#)” for details on “temporary *jāti*.”

The Primary Meaning of *Jāti* – Birth in One of the 31 Realms

4. In the “[WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\).](#)” Ven. Sariputta explains in a bit more detail the material in the “*Dhammacakkappavattana Sutta* (SN 56.11).” That *sutta* states: “*Katamā cāvuso, jāti? Yā tesam tesam sattānam tamhi tamhi sattanikāye jāti sañjāti okkanti abhinibbatti khandhānam pātubhāvo āyatanānam paṭilābho, ayaṃ vuccatāvuso: ‘jāti’.*”

Translated: “What is *jāti*? It is the birth of beings in the various realms with one or more of the following stages: *jāti sañjāti okkanti abhinibbatti khandhānam pātubhāvo āyatanānam paṭilābho*. This is called birth.”

- English translations try to translate those words directly, but that does not convey the real meaning of those words. See, for example, “[WebLink: accesstoinight.org: Discourse on The Analysis of the Truths.](#)”

Births in the *Brahma* and *Deva* Realms Have Only the First step – *Jāti*

5. For *opapātika* (instantaneous) births in the *Deva* and *Brahma* realms, *jāti* is the ONLY stage involved. A *Brahma* or a *Deva* is born instantaneously, complete with “all parts of the body.” [*opapātika* : lit. ‘accidental’ (from *upapāta*, accident; not from *upapatti*, as PTS Dict. has); ‘spontaneously born’, i.e. born without the instrumentality of parents. This applies to all heavenly and infernal beings.]

- Here the “body” refers to the combination of the mental body and physical body composed of the four great elements. Of course, the physical bodies of *Brahmas* only have a few units of *suddhaṭṭhaka*. *Devas* have more “solid bodies” but are still not visible to us.
- More details in “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#).”

Humans and Animals Have Other Additional Stages of “Birth”

6. Humans and animals have those other four stages as follows. Let us describe human birth.

- (i) A human is first “born” with just 3 sets of *suddhaṭṭhaka* (*vatthu dasaka*, *kāya dasaka*, and *bhava dasaka*.) This happens at the *jāti* stage.
- (ii) Within a split second, 4 more *dasaka* (4 *pasāda rūpa* of *cakkhu*, *sota*, *ghāna*, and *jivhā*) are incorporated, leading to the *sañjāti* stage. **This is the same as the *gandhabba* state.** That *gandhabba* then stays for the duration of the human existence (*bhava*.) It is periodically pulled into a womb by *kammic* energy to be “born with a physical body.”
- (iii) When pulled into a womb, the *gandhabba* merges with a zygote, which is the *okkanti* state.
- (iv) Then, that embryo grows in the womb in the *abhinibbatti* stage.
- (v) When all body parts are formed, that is the *khandhānaṃ pātubhāvo* stage, and a baby then comes out of the womb. **That last stage is what we commonly call a “birth.”**
- (vi) The **sensory faculties** start working as *āyatana* after the baby is born. This is the last *āyatanānaṃ paṭilābho* stage.
 - See “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#)” and “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” for details.

Repeated “Births” Within Human and Animal *Bhava*

7. When that physical body dies, that is not necessarily the end of the “human *bhava*.” That *gandhabba* comes out of the dead body and waits for another womb. We also call this “repeated *jāti*” within that same human *bhava*. See “[Bhava and Jāti – States of Existence and Births Therein](#).” Per our discussion above, “*jāti*” in that post refer to the mundane meaning – which is the same as the *khandhānaṃ pātubhāvo* stage in #6 above. Thus, we need to understand the meaning of a word appropriate for the situation.

- When the *kammic* energy for the human *bhava* (human existence) is depleted, that *gandhabba* dies, which is the end of human *bhava*. Then it can grasp a new existence as a *Deva*, *Brahma*, an animal, etc.
- Therefore, we can see that a human can be in the ‘human *bhava*’ as a human *gandhabba* for many thousands of years. The same holds for animals. A fly lives with a visible “fly body” only for several days, but that “fly *bhava*” can last thousands of years. That is the “repeated births” within a given *bhava*. There are many more details that can be found by searching for posts on *gandhabba*; type the word “*gandhabba*” in the “Search” box on the top right.

There Are Other Types of *Jāti* Too!

8. When one gets deeper into Buddha Dhamma, one can see that everything in this world is “born” due to causes and effects, i.e., *Paṭicca Samuppāda*. For example, a tree is born out of a seed. A car is “born” in a factory. *Paṭicca Samuppāda* can describe all those.

- The Buddha explained this to Vāsetṭha in the “[WebLink: suttacentral: Vāsetṭha Sutta \(MN 98\)](#).” The English translation there is good enough to get the idea: “[WebLink: suttacentral: With Vāsetṭha \(MN 98\)](#).” **However, there is no need to get into those aspects initially.**
- However, in that *sutta*, the Buddha told Vāsetṭha that humans are the same as a species. But they can be “born” in various “*gati*” according to their actions. For example, one who steals is “born” a thief. In another example, the Buddha says, “I don’t call someone a *brahmin* (of high caste) based on the mother or womb they came from.” Furthermore, even an immoral person can change to be “born a moral person of good character.”
- Those are also “types of *jāti*.”

Jātidhammā* Different From *Jāti

9. It is to be noted that *jātidhammā* means something different from *jāti*.

- As explained in the “[WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\)](#),” *Jātidhammā* are *dhammā* responsible for *jāti*. Similarly, *jarādhammā*, *byādhidhammā*, and *sokaparidevadukkhadomanassupāyāsadhammā* are *dhammā* responsible for old age, disease, and all other sufferings associated with *jāti*: sorrow (*soka*), lamentation (*parideva*), suffering (*dukkha*), misery (*domanassa*), and despair (*upāyāsa*).
- A fairly good English translation: “[WebLink: accesstoinsight.org: Discourse on The Analysis of the Truths](#).”

Summary

10. The term *jāti* (birth) needs to be understood according to the given situation.

- When someone says, “I was born 30 years ago,” that refers to his/her birth with the present physical body. That person would not know when he/she was first “born” in the human realm. Thus we normally refer to birth as “to be born with a human body.” We say the same about animals; “This dog was born ten years ago.”
- However, in Buddhist terminology, birth (*jāti*) refers to two main types discussed above: the first happens many times during a given lifetime.
- The second type of *jāti* is the moment of appearance in any given realm. A living being could be born a *Deva*, *Brahma*, human, animal, etc.
- After the *Parinibbāna* (death) of an *Arahant*, birth (*jāti*) in any of the 31 realms of this world will not take place. In the “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#),” the Buddha stated, “*ayamantimā jātī*” or “this is my last birth.” At *Parinibbāna* (merging with *Nibbāna*), suffering stops without a trace.
- As long as there is a *jāti*, it ALWAYS ends up in death. That is why all *Paṭicca samuppāda* cycles end with decay (*jarā*) and death (*marañā*.) Even the *kusala-mūla* version of *Paṭicca Samuppāda* ends up with just “*jāti paccayā jarā marañam*.” See, “[Kusala-Mūla Paṭicca Samuppāda](#).”

Thus, even a Noble Person on the way to *Nibbāna* will encounter death. Of course, death is stopped at *Parinibbāna*.

- The *Akusala-Mūla* version of *Paṭicca Samuppāda* has “*jāti paccayā jarā, marañā, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*.” That has other types of suffering as well. See, “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”

9.4.6 Bhava – Kammic Energy That Can Power an Existence

March 21, 2021; revised March 27, 2021; May 31, 2022 (#4); August 31, 2022 (esp. #4)

Bhava is *kammic* energy created by the mind. It can power a new existence in *kāma bhava*, *rūpa bhava*, or *arūpa bhava*. Buddha means “to stop *bhava*” (*bhava* + *uddha*.)

Grasping a *Bhava* (Kammic Energy) Leads to *Jāti* (Birth) in That *Bhava*

1. There are different types of *jāti* or births. See, “[Jāti – Different Types of Births](#).”

- Nothing can arise without a cause and sufficient energy. **Any birth can arise only if kammic energy can sustain that birth.** Different types of energy can sustain different types of births.
- Three main types of *bhava* refer to *kammic* energies that can sustain existences in the *kāma loka*, *rūpa loka*, or *arūpa loka*. The Buddha explained that to Ven. Ānanda in the “[WebLink: suttacentral: Pathamabhava Sutta \(AN 3.76\)](#).” Venerable Ānanda asked the Buddha “*Bhante*, they speak of this thing called ‘*bhava*’. **How is *bhava* defined?**”
- As we know, all 31 realms in this world can be divided into three categories: 11 realms in *kāma loka*, 16 in *rūpa loka*, and four in *arūpa loka*. See, “[31 Realms Associated with the Earth](#).”
- Existences in those three are supported by *kāma bhava*, *rūpa bhava*, and *arūpa bhava*. We will see below that three different types of **energies** are created by the mind.

Kāma Bhava Required for Births in *Kāma Loka*

2. The Buddha explained *kāma bhava* as follows: “*Kāmadhātuvepakkaṇca, ānanda, kammaṃ nābhavissa, api nu kho kāmabhavo paññāyethā*”*ti*?

Translated: “If, Ānanda, a *kammic* energy established in the sensual plane (*kāmadhātuvepakkaṇca* or *kāma dhātuve pakkaṇca*) is not entered (*nābhavissa* or *na abhavissa*), can an existence in a sensual realm (*kāma bhavo*) come about?”

- Venerable Ānanda replied that it would not be possible. To be born in any of the 11 realms in the *kāma loka*, such an appropriate type of energy must be cultivated and then grasped to “start that birth in *kāma loka*.”
- Of course, there are different varieties of *kammic* energy powering the 11 realms in *kāma loka*.
- But they all have one thing in common: **craving sensory experiences** associated with all five six senses, and in particular, **the five physical senses**. Thus the term *pañca kāma* or “**five types of *kāma***.”
- Note that *Devas* in the 6 *Deva* realms have less dense bodies than humans. But they still have dense enough bodies to experience all five physical sensory inputs.

Rūpa Bhava Required for Births in the *Rūpa Loka*

3. In the same way as above, the Buddha explained *rūpa bhava*: “*Rūpadhātuvepakkaṇca, ānanda, kammaṃ nābhavissa, api nu kho rūpabhavo paññāyethā*”*ti*?

Translated: “If, Ānanda, a *kammic* energy established in the *rūpa* plane (*rūpadhātuvepakkaṇca* or *rūpa dhātuve pakkaṇca*) is not entered (*nābhavissa* or *na abhavissa*), can an existence in the *rūpa* plane (*rūpa bhavo*) come about?” No.

- Therefore, one must have cultivated the necessary type of energy to grasp a birth in one of the 16 *rūpāvacara Brahma* realms in *rūpa loka*. **Such energies are created with *rūpāvacara jhāna*.**

- To cultivate *rūpāvacara jhāna*, one MUST give up cravings for the **strongest** of the *pañca kāma*, i.e., those sensory experiences associated with a physical body. **Those are smell, taste, and physical touch.**
- That is why *rūpāvacara Brahmas* do not have **physical bodies**. **Those Brahmas are satisfied with just sights and sounds.**
- There is no need for a physical body if smell, taste, and body touches are not needed. A *rūpāvacara Brahma* has only a *manomaya kāya* or a “mental body.”
- As we have seen human *gandhabbas* can still see and hear after coming out of the physical body. A physical body with eyes and ears is not necessary to see and hear. Only the *cakkhu* and *sota pasāda rūpa* (in the *manomaya kāya*) are required for seeing and hearing. See, “[Mental Body Versus the Physical Body](#).”

Arūpa Bhava Required for Births in the Arūpa Loka

4. As can be expected, the Buddha explained **arūpa bhava** as follows: “*Arūpadhātuvepakkañca, ānanda, kammaṃ nābhavissa, api nu kho arūpabhavo paññāyethā*”ti?

Translated: “If, Ānanda, a *kammic* energy established in the *arūpa* plane (*arūpadhātuvepakkañca* or *arūpa dhātuve pakkañca*) is not entered (*nābhavissa* or *na abhavissa*), can an existence in the *arūpa* plane (*arūpa bhavo*) come about?” No.

- Therefore, one must have cultivated the necessary energy associated with the *arūpa bhava* to grasp a birth in one of the four *arūpāvacara Brahma* realms in **arūpa loka**. **Such energies are created with arūpāvacara jhāna.**
- To cultivate *arūpāvacara jhāna*, one MUST give up cravings for **all of the pañca kāma**. That is why *arūpāvacara Brahmas* do not have any *pasāda rūpa*. It has only *hadaya vatthu* in the *manomaya kāya*. They can not even see or hear. **They can only think.**
- Thus the only “matter” in *rūpāvacara Brahma* realms is the *suddhaṭṭhaka* in the *hadaya vatthu* of those *Brahmas*.
- We notice a trend from the above summary. Let us discuss that now.

“Level of Suffering” Decreases With “Decreasing Matter”

5. **In general**, “Level of Suffering” Decreases With “Decreasing Matter.” We see that sensory experiences with all six senses are available only in the 11 realms of the *kāma loka*. That is where most suffering is too! While the *Deva* realms with “less dense bodies” have optimum sensory pleasures with all six senses, the four lowest realms (*apāyās*) have the most suffering. The human realm in the middle has both pleasures and suffering.

- Of course, *pañca kāma* pleasures are available only in *kāma loka*. They include body touches, tastes, smells, sights and sounds. The first three types REQUIRE dense bodies to have “close contacts.” But there is a “price to pay” as we will discuss below.
- Furthermore, those who cultivate *rūpāvacara jhāna* (*Ariya* or *anāriya*) can see that “*jhānic* pleasures” are much better and longer-lasting than “*pañca kāma* pleasures.”
- The *rūpāvacara jhāna* are the first four *jhāna*. If one keeps going up to higher *jhāna*, they can see that the higher four *arūpāvacara jhāna* are better than the *rūpāvacara jhāna*.
- That is why it is easier for those who have cultivated *jhāna* to see that there is stress associated with “sensory contacts.” The closer the contact is, the stronger the stress level.

- However, there are some exceptions to this “rule.” While that trend holds well for the realms above the human realm, there are exceptions in the four lowest realms. In particular, some *petas* (hungry ghosts) have subtle (not dense) bodies.

Increasing “Cooling Down” With Decreasing Sensory Contacts

6. **In the long-run**, having more faculties for sensory experiences has “built-in” suffering much more than any pleasures. The ability to smell, taste and touch **requires** a dense physical body. Such a physical body comes with bodily pains, diseases, and can be subjected to injuries. Such drawbacks are minimum in *Deva* realms where those bodies have the least density. But in other realms in the *kāma loka*, such sufferings can be unbearable, especially in the *apāyās*.

- Those who cultivate such *rūpāvacara jhāna* can experience this “relief” in this life itself. As one progresses towards higher *rūpāvacara jhāna*, the physical body is felt less and less. In the fourth *jhāna*, one does not feel the physical body at all. Furthermore, those who cultivate such *rūpāvacara jhāna* are invariably born in *rūpāvacara Brahma* realms at the death of the present human body.
- When one transcends the fourth *jhāna* and gets into the higher *jhānās*, one will start seeing that **even *rūpāvacara jhāna* are stressful**. The relief becomes even higher as one proceeds to the highest *arūpāvacara jhāna*. At the highest *arūpāvacara jhāna*, one just feels that one is alive and the stress level is at the minimum. However, one with *anāriya jhāna* cannot go beyond that and stop that remaining stress, because one still has *anusaya* (latent defilements.) Furthermore, one with *anusaya* can be reborn even in the *apāyās* in future lives. This is why *anāriya jhānās* are useless in the end. See, [“Samādhi, Jhāna, Magga Phala – Introduction.”](#)
- But an *Arahant* who can attain the highest *jhāna* can “stop life altogether” and get into “*nirodha samāpatti*.” That can last up to 7 days, and one can “experience full *Nibbāna*” during that time. **But that is not an experience in this world that can be described with the *vedanā cetasika*.** We have no idea of what that would be like.

Parinibbāna Is Where There Is No Suffering

7. Not even a trace of stress – let alone any suffering — is left when an *Arahant* attains *Parinibbāna* at death. All three planes of existence (*kāma bhava*, *rūpa bhava*, *arūpa bhava*) are absent in *Parinibbāna*!

- This is why “this world of 31 realms” and *Parinibbāna* are mutually exclusive. One can exist ONLY in either “this world” OR in “full *Nibbāna*” (*Parinibbāna*.)
- Note that even an *Arahant* lives in “this world” until death, and is subject to suffering due to *kamma vipāka*. Even the Buddha had some ailments and Ven. Moggallāna was beaten to death.
- Therefore, even an *Arahant* is subjected to suffering as long as living in “this world of 31 realms.” Thus *Nibbāna* is not complete until the death of the *Arahant*.

Summary

8. *Bhava* is *kammic* energy created by the mind. In the above, we discussed three main types of *bhava* responsible for ALL births (*jāti*) in this world of 31 realms.

- As we can see, the mind creates the required *kammic* energy. That is quite clear in the cases of *rūpa bhava* and *arūpa bhava* where the corresponding *jhāna citta* produce that energy.
- Energies associated with *kāma bhava* are also produced in *javana citta*. Such *javana citta* arise when we are engaged in a strong *kamma*. For example, *javana* energy to fuel a birth in the *niraya* or hell (the lowest realm) is produced in the mind of the murderer while doing that killing.
- That is how different types of *bhava* are related to different types of *kamma*. Cultivating *jhāna* is a type of *kamma* too.

- Buddha means “to stop *bhava*” (*bhava* + *uddha*.) Only a Buddha can figure out how to stop grasping various types of *bhava* (*kammic* energies) that we have accumulated, and thus stop any and all future suffering. That is why “Buddha” is a shared title for all the Buddhās.

9.4.7 Bhava and Punabbhava – Kammic Energy Giving Rise to Renewed Existence

March 28, 2021

Bhava is *kammic* energy. When a *vipāka* due to that *kammic* energy is grasped (*upādāna*), that leads to a new existence (*punabbhava*.)

Summary of the Previous Post

1. *Bhava* is *kammic* energy created by the mind. It can power a new existence in *kāma bhava*, *rūpa bhava*, or *arūpa bhava*. Those are three main types of *bhava* responsible for ALL births (*jāti*) in this world of 31 realms.

- As humans, we can generate all three types of energies that CAN power a new existence in those three *bhava*. Depending on the details of *kammic* energies (i.e., specific *kamma* committed,) they CAN lead to births (*jāti*) in the 4 *apāyās*, the human realm, and 6 *Deva* realms in *kāma bhava*, or in 16 *Brahma* realms in the *rūpa bhava* or 4 *Brahma* realms in *arūpa bhava*.
- See, “[Bhava – Kammic Energy That Can Power an Existence](#).”

Bhava and Punabbhava

2. Just because there are energies that CAN power a new existence, that second step of **grasping** (*upādāna*) a new existence (*punabbhava*) DOES NOT happen automatically. **To be reborn in a new existence, *bhava* MUST become *punabbhava*** (“*puna*” + “*bhava*,” where “*puna*” is “repeat/renewed.”) In other words, the mind must grasp (*upādāna*) that “stored energy” (*bhava*) to energize the next existence.

- For example, Aṅgulimala killed 999 people just before he met the Buddha. So, he had created a strong *kammic* energy that could have led to a birth in the *niraya*, the lowest realm. That *kammic* energy was there in a “*niraya bhava*” to support existence in a *niraya*.
- To INITIATE that “*niraya bhava*,” his mind must latch onto that energy at the *cuti-paṭisandhi* moment at the end of the human *bhava*. However, he learned Dhamma and became an *Arahant*. Therefore, Ven. Aṅgulimala’s mind had become purified and would not latch onto existence in the *niraya*.
- In fact, since he had attained the *Arahanthood*, his mind would not latch onto ANY existence (*bhava*) in this world. He probably cultivated *jhanas* before his death, but birth in a *Brahma* realm was also not possible.
- **Thus, it is critical to understand the difference between *bhava* and *punabbhava*.**

To Be Born in an Existence (*Bhava*) It Must Be Grasped (*Upādāna*)

3. We all have done MANY of both good and bad *kamma* in this life and previous lives. At the end of the human *bhava*, one can bring a new existence (*punabbhava*.) For that to happen, the mind needs to go through the “*upādāna paccayā bhava*” step in *Paṭicca Samuppāda* at the *cuti-paṭisandhi* moment.

- However, depending on the “level of purity” of a given mind, it may not grasp certain types of *bhava*. For example, a *Sotāpanna*’s mind would not “grasp” (*upādāna*) a *bhava* in an *apāya*; such a *bhava* would not be compatible with the *gati* of a *Sotāpanna*.

- Similarly, an *Anāgāmi*'s mind would not grasp even a human or a *Deva bhava*. Since *Anāgāmi* has “seen” the perils of births in *kāma loka* (*kāma bhava*), “renewed *bhava*” (*punabbhava*) in the *kāma bhava* WILL NOT happen.
- The mind of an *Arahant* has seen the perils of ALL existences in this world. Thus, it would not grasp an existence in this world. At death, an *Arahant* will be released and will merge with *Nibbāna*.
- Even an *Arahant* would have accumulated many types of *bhava* (*kammic* energies), especially in previous lives. However, none of them will lead to *punabbhava* or “renewed existence” since that mind would not grasp any existence in this world. That mind has realized that no existence is free of suffering.

If There Is No New Existence (*Punabbhava*), There Is No Rebirth (*Jāti*)

4. Now we can clearly see what the Buddha stated in his first *sutta*, “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)”: “*Ñāṇaṇa pana me dassanaṃ udapādi: ‘akuppā me vimutti, **ayamantimā jāti**, natthi dāni **punabbhavo**’*” ti.

Translated: “The knowledge and vision arose in me: ‘Unshakable is the liberation of my mind. **This is my last birth**. Now there is no more **renewed existence**.’”

- There are many *suttas* with similar statements for *Arahants*. You can search for the verse “*natthi dāni punabbhavo*” at Sutta Central Search. That phrase means, “now there is no more renewed existence.”

“*Upādāna Paccayā Bhava*” Step in *Idappaccayatā Paṭicca Samuppāda*

5. We must understand many of the terms in *Paṭicca Samuppāda*, depending on the context. I have pointed out many times that “*viññāṇa*” in the “*saṅkhāra paccayā viññāṇa*” is ALWAYS a *kamma viññāṇa* and NOT a *vipāka viññāṇa* (like *cakkhu viññāṇa* or “seeing.”)

- In *Paṭicca Samuppāda* cycles that run **DURING a lifetime** (*Idappaccayatā Paṭicca Samuppāda*), the “*upādāna paccayā bhava*” step leads to TWO effects. (1) It CREATES *kammic* energies (or *bhava*) that can manifest AT THAT TIME. One can get to that *bhava* temporarily and be “born” in that *bhava* temporarily. (2) Also, part of the *kammic* energy generated will be preserved as a *kamma bīja* in the *viññāṇa* plane.
- For example, when someone gets into a fight, that angry mindset generates *kammic* energy in his/her *javana citta*. Part of that energy leads to a “temporary angry *bhava*” and, thus, a “temporary angry *jāti*.” An onlooker can see the change in his/her body: face will transform to an “angry face.” Also, part of the *kammic* energy generated will either give rise to a new *kamma bīja* or strengthen an existing *kamma bīja* for a *bhava* in the *apāyās*. Of course, that will be a tiny *kamma* seed. If one kills a human, that *kamma bīja* (or *bhava* energy) will become much stronger and could become strong enough to bring in a *punabbhava* (new existence) in the *apāyās*.
- The more he/she engages in similar actions throughout life (even without killing anyone), such *kamma bīja* (*bhava*) will grow and could contribute to *punabbhava*.

“*Upādāna Paccayā Punabbhava*” Step in *Upapatti Paṭicca Samuppāda*

6. There are different types of *Paṭicca Samuppāda* cycles that run in different situations. A special type of *Paṭicca Samuppāda* cycle (*Upapatti Paṭicca Samuppāda*) operates at the moment when the *kammic* energy (or *bhava* energy) for the current *bhava* runs out. **That is when a new or “renewed existence” is grasped (*upādāna*).**

- In this particular case, the “*upādāna paccayā bhava*” step becomes “*upādāna paccayā punabbhava*.”
- Therefore, in a *Paṭicca Samuppāda* cycle that runs at the *cuti-paṭisandhi* moment (at the end of the current existence), the step MUST BE interpreted as “*upādāna paccayā punabbhava*.”

7. Note that neither type of *Paṭicca Samuppāda* cycles operate for an *Arahant*, since the steps “*taṇhā paccayā upādāna*” OR “*avijjā paccayā saṅkhāra*” WILL NOT take place for an *Arahant*.

9.4.8 Concepts of Upādāna and Upādānakkhandha

April 3, 2021

Important concepts of *upādāna* and *upādānakkhandha* are discussed in this subsection:

[Difference Between Physical Rūpa and Rūpakkhanda](#) (This post is also in the section on “[The Five Aggregates \(Pañcakkhandha\)](#).”)

[Where Are Memories “Stored”? – Connection to Pañcakkhandha](#)

[Loka Sutta – Origin and Cessation of the World](#)

[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#)

[Key Steps of Kammic Energy Accumulation](#)

[Generating Kammic Energy in the “Upādāna Paccayā Bhava”](#)

9.4.8.1 Where Are Memories “Stored”? – Connection to Pañcakkhandha

April 7, 2021; revised April 8, 2021; September 10, 2022; March 4, 2023

Records of our memories (*nāmagotta*) are permanent. A handful of people worldwide have autobiographical memories, i.e., they can recall their past experiences in great detail. These memory records are the same as “*atīta pañcakkhandha*.”

Memory Versus Autobiographical Memory

1. An average human can only recall relatively few memories even from this life. During our waking hours, we experience many things. How many events from yesterday can you recall in detail? If you are asked what you ate for lunch or wore to work on a specific day last month, can you recall?

- There are only a handful of people in the world who CAN recall such things in great detail. They can remember **anything they experienced** on any given day for many years. That is a unique ability, and scientists call it “**Highly Superior Autobiographical Memory**” or HSAM.
- Note that this is not an ability of memorization. As we see below, some of them CANNOT memorize a poem, for example. They can recall whatever they saw, heard, stated, smelled, touched, or thought about. That is why it is called “**autobiographical memory.**”
- They can recall ONLY those things that they experienced. Suppose they had watched a TV show on a specific day, even several years ago. They can “bring back that memory” in their mind and re-live that experience. It is like “playing back” that TV show again in their mind!

- If you ask them what they ate for lunch on a specific day back in 1980, for example, they can “playback” that scene of them eating lunch on that day: They can tell you not only what they ate, but what the weather was like, and who they were with, etc. **It is as if their brain is a video recorder, and they can play back on any past event. But the brain cannot “store” events in such detail.**
- The critical point is that those with HSAM capability are RECALLING those memories from a depository. There is no way that such details can be stored in the brain. Scientists are “stuck” and have not been able to explain the phenomenon of HSAM; see the review article at the end of the post.
- Whatever ALL OF US experience goes into a depository in the *viññāṇa* plane (*nāma loka*) as we will discuss below. Different people have varying capabilities to retract that information.

First Recorded Case of Autobiographical Memory

2. That AMAZING ability first came to light with Jill Price, who contacted a team of scientists in the early 2000s about her ability to recall anything from 1974 onwards. Here is a video of her with Diane Sawyer on an ABC News program in 2008:

- She cannot recall all of her life, but just those events after 1974. The ability of HSAM just got “turned on” when she was a teenager.

[WebLink: youtube: The woman that never forgets - Jill Price First Interview!](#)

The Amazing Recalling Ability of Jill Price

3. Let us discuss the main points from the above video.

@1:10 minutes: She remembers everything since she was 14 years old.

@2:50 minutes: Diane Sawyer tests Jill’s ability to recall past events. She passes all tests.

@4:20 minutes: Jill says she has a “split-screen” in her head. She talks to Diane while “watching” the playback of whatever past event she recalls. She describes what she had for lunch on May 27, 2006. Remember that the above interview was recorded in 2008. Since she kept a detailed diary, anyone can check these accounts. One may think she has memorized all those detailed records, but that is impossible, especially since she can’t memorize even a poem.

Connection to Nāmagotta and Atīta Pañcakkhandha

4. Let us pause and make the connection to Buddha Dhamma.

- As discussed in the post, “[Difference Between Physical Rūpa and Rūpakkkhandha](#),” *rūpakkkhandha* is 11 types. But all 11 types are in 3 main categories: *atīta*, *anāgata*, *paccuppanna* (past, future, current.) All other types are included in these three types. For example, internal (related to one’s own body) and external *rūpa* must be of past, future, or present.
- The *paccuppanna* (or current) *rūpa* are those being experienced now. In a moment, it will go to the past and be added to the *atīta* (past) *rūpa* category. The category of *anāgata* (future) *rūpa* is those we hope/expect to experience.
- As we can see, the *atīta* (past) *rūpa* category dominates one’s *rūpakkkhandha*. It is also clear that *rūpakkkhandha* is one’s own; it is what one has experienced. **One person’s *rūpakkkhandha* is different from someone else’s.**
- Furthermore, those *atīta* (past) *rūpa* (i.e., *atīta rūpakkkhandha*) are just RECORDS of past *rūpa* that one has experienced. They are PERMANENT. Whatever happened cannot be changed.

Memories Are the Same as Atīta Pañcakkhandha (Past Experiences)

5. Now, here is another KEY point to remember. Whenever an event (registering of one of six kinds of *rūpa*) registers in the mind, corresponding mental aggregates (*vedanā, saññā, saṅkhāra, viññāṇa*) also register. **Thus all five aggregates (*pañcakkhandha*) arise and immediately go into *atīta pañcakkhandha*.**

- For example, suppose we hear a pleasing sound, for example. It may register as a *sukha vedanā*, and we recognize what that sound is (*saññā*.) Then we think about it (*saṅkhāra*) and the overall sensory experience is *viññāṇa* (in this case, *sota viññāṇa*.)
- Thus not only is that sound (*sadda rūpa*) registered in the mind but those mental components are also registered. Thus, a *rūpakkhanda* ALWAYS arises with the other four *khandhas* (aggregates.) In other words, *pañcakkhandha* arises with any sensory event and is immediately recorded as ***atīta pañcakkhandha*.**
- **Those records (*atīta pañcakkhandha*) are in the *viññāṇa* plane (*nāma loka*) and can be recalled at any time in the future. They are called “*nāmagotta*.”** (With each sensed event, a record of it gets added to *nāmagotta* in *viññāṇa dhātu* — via the *mana indriya* in the brain.)
- Details at “[Arising of Five Aggregates Based on an Ārammana](#),” “[Our Two Worlds: Material and Immaterial](#),” and “[Where Are Memories Stored? – Viññāṇa Dhātu](#).”
- Please note that reading and understanding the posts I refer to is necessary if one wants to understand these concepts. **Just reading a post or two will not do.**

People With *Iddhi* (Supernormal) Powers Can Recall Past Lives

6. Now, we can see how the Buddha could “look back” and recall his past lives extending trillions of years to the past.

- Just like Jill Price can recall any event that took place in HER life, the Buddha could recall any event that happened in his life. The only difference is that Jill Price can recall ONLY her current life from 1974. The Buddha could recall any event in his ANY previous life!
- By the way, anyone who can cultivate the fourth *jhāna* (*Ariya* or *anāriya jhāna*) could recall at least a few past lives. Even before the Buddha, many yogis could recall several past lives. Note that some children can remember events from their previous life.
- **One can recall past lives only because records of all past experiences are preserved in the *viññāṇa* plane (*nāma loka*).** Those memories are NOT stored in the brain, but the brain plays a role in “bringing those memories back.” A discussion on this subject is in “[Brain and the Gandhabba](#).”
- When an average human recalls (some of) past events, it is those *nāmagotta* that they recall. It is just that an average human can recall only significant events of his/her life. Many people with HSAM can recall all events from their current life.

Nāmagotta (*Atīta Pañcakkhandha*) Has Records of One's Life Experiences

7. Let us go back to discussing the video of #2 above.

@5:15 minutes: Jill Price says she was not “good in school” and could not memorize even a simple poem. She meant that she was an average student who was not exceptionally intelligent. What she has is not KNOWLEDGE, but an ability to RECALL memories. As she explains, **her memory is autobiographical**, i.e., she can **recall ONLY those events she has experienced** (seen, heard, tasted, smelled, touched, and thought about.)

@6:40 minutes: She says that she “travels in her head.” That means she can travel to the past and relive an experience as if it is happening now!

@6:40 minutes: She says she cannot go on the TV show “Jeopardy” and win because she does not have general knowledge about the world. She can recall ONLY those EVENTS that she experienced, for example, by watching TV. This is a critical point that I want to emphasize. It is not knowledge/wisdom that she has, but the ability to RECALL past events in great detail!

Summary

8. All our memories (including those from previous lives) are preserved in the *viññāṇa* plane (*nāma loka*.)
- The ability to recall memories is a complex subject. A Buddha can recall events from ANY life in the past. An average human can recall only bits and pieces from the current life. Between those two extremes, there is a huge variety of that capability.
 - Recalling a memory means playback of that old experience in one’s mind. Recalling an “experience” recreates that whole past event. That includes that part of the *rūpakkkhandha* and the events’s mental attributes (other four aggregates). Thus, it plays back that part of the “*atīta pañcakkhandha*.”
 - The five aggregates (*pañcakkhandha*) are one’s own. It has one’s past experiences, experiences happening at the present moment, and hopes/expectations of future experiences.

Implications

9. Each person is automatically attached (*taṇhā*) based on one’s past experiences. One would like to “keep them close,” i.e., have “*upādāna*” for those things. Those past experiences (*atīta pañcakkhandha*) influence one’s character/habits (*gati*.) That is how “*pañca upādānakkhandha*” arises. All these concepts are interrelated. I hope you can at least begin to appreciate these relationships.

- To break bad *gati* and to avoid *taṇhā/upādāna* for things that can get one into trouble, one must be able to clarify these concepts and “see” how future suffering arises due to them.
- The “cooling down of the mind” can result ONLY via gaining knowledge of this process. Following moral guidelines (precepts) is essential to get to the right mindset. But it is *paññā* (wisdom) that eventually leads to the right vision (*Sammā Ditṭhi*) at the *Sotāpanna* stage.

Further Information

10. Putting all the necessary information into one post is impossible. If one desires to comprehend these concepts, one must spend some time reading all related posts. I have mentioned some above.

9.4.8.2 Loka Sutta – Origin and Cessation of the World

April 16, 2021; revised September 27, 2021; rewritten with new chart March 18, 2023

The *Loka Sutta* succinctly states the origin of the suffering-filled world (i.e., the continuation of the rebirth process.) It is the attachment to sensory inputs triggering the *Paṭicca Samuppāda* process.

Buddhism – In Charts: 6. Timeline of Loka Samudaya

Download/Print: “[WebLink: PDF Download: 6. Timeline of Loka Samudaya](#)”

Loka Sutta – Arising of One's World

1. Here is how the Buddha described the “arising of one's world” in the “[WebLink: suttacentral: Loka Sutta \(SN 12.44\)](#)” (I separated the verse into five steps to match the above chart): “*Katamo ca, bhikkhave, lokassa samudayo?* (i) *Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ.* (ii) *Tiṇṇaṃ saṅgati phasso.* (iii) *Phassa paccayā vedanā;* (iv) *vedanā paccayā taṇhā;* (v) *taṇhā paccayā upādānaṃ; upādāna paccayā bhavo; bhava paccayā jāti; jāti paccayā jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā sambhavanti. Ayam kho, bhikkhave, lokassa samudayo.*”

Translated: “And what, *bhikkhus*, is the **origin of the world**? (i) In dependence on the eye and forms (*rūpa*), eye-consciousness arises. (ii) That is followed by “contact with the three types of ‘*saṃ*’ ” or “*samphassa*.” (iii) With *samphassa* as condition, *samphassa-jā-vedanā* come to be; (iv) with *samphassa-jā-vedanā* as condition, *taṇhā*; (v) with *taṇhā* as condition, *upādāna*; with *upādāna* as condition, existence (*bhava*); with *bhava* as condition, birth; with birth as condition, aging-and-death, sorrow, lamentation, pain, displeasure, and despair come to be. **This, *bhikkhus*, is the origin of the world.**” [For the word “*saṃ*” see “[What is “Saṃ”? Meaning of Saṃsāra \(or Saṃsāra\).](#)”]

- The word *samudaya* comes from “*saṃ*” + “*udaya*” which rhymes as “*samudaya*.” There is “*saṃ*” again! Now, “*udaya*” means to arise, and thus, “*samudaya*” means “arising due to *saṃ*.” **This means not the arising of the whole world with trillions of stars/planets but the re-arising of the world at death**

with a new rebirth. If “*saṇ*” (or the defilements of greed, hate, and ignorance) were to have been removed, one would not be reborn and experience this suffering-filled world again.

- Note that just a sensory experience CANNOT be the root cause of suffering. Rather, the attachment to sensory experience **with *samphassa*** is the root cause. That is the KEY POINT of this *sutta*. This is why I have bolded the verse, “*tiṇṇaṃ saṅgati phasso.*”
- Let us discuss the time sequence stated in the whole verse. The above chart is a summary.

Time Sequence in the Above Verse – The first Step Happens to Anyone

2. (Step 1 in the Chart) The whole process starts with a sensory input through one of the six senses. The above verse describes what happens when someone sees an object they attach to (the other five sense faculties work the same way.) That attachment (*tanhā*) eventually leads to suffering in some form.

- The process starts with “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ.*” That means *cakkhu vīññāṇa* arises when one sees an object. It just sees what that object is. No *kamma* generated here. That “seeing event” or *cakkhu vīññāṇa* occurs with the help of the *phassa cetasika*. **This *phassa* (contact) is between *cakkhu* and *rūpa*.**
- As discussed, *phassa cetasika* is a universal *cetasika* that arises with ANY sensory event. When you hear a sound or taste food, that involves the *phassa cetasika*. Any living being, including an *Arahant*, will experience all six sensory inputs.
- The next step is “*tiṇṇaṃ saṅgati phasso.*”

Tiṇṇaṃ Saṅgati Phasso – Misunderstood Key Verse

3. (Step 2 in the Chart.) This short verse is commonly mistranslated as, “The meeting of the three is contact.” See the English translation of the *Loka Sutta* at Sutta Central: “[WebLink: suttacentral: The World \(SN 12.44\).](#)”

- It does not make any sense to say “the meeting of *cakkhu*, *rūpa*, and *cakkhu vīññāṇa*.” Instead, *cakkhu vīññāṇa* (or seeing the object)” happens with the contact or meeting of *cakkhu* and *rūpa*. **There is no “meeting of the three.”**
- Instead, what happens in this second step is “contact with defiled *gati*” or “*samphassa*.” Here *samphassa* is “*saṇ phassa*” (“*saṇ*” + “*phassa*,” where “*saṇ*” are defilements (greed, anger, ignorance). It rhymes as “*samphassa*.” **Thus *samphassa* (contact with defilements) is an internal process in mind.**

4. To learn about “*saṇ*” see “[What is “Saṇ”? Meaning of Saṇsāra \(or Samsāra\)](#)” and “[List of “Saṇ” Words and Other Pāli Roots.](#)”

- There are **three** main “defiled *gati*” or “*saṅgati*”: ***lobha*, *dosa*, and *moha***. Those are the “**three**” referred to in verse. It can also refer to one’s defilements associated with the three entities of *cakkhu*, *rūpa*, and *cakkhu vīññāṇa*.
- Such detailed explanations are in the three Commentaries within the *Tipiṭaka*. The above explanation of “*phassa*” as “*samphassa*” is given here: “[WebLink: suttacentral: Paticca Samuppāda Vibhaṅga \(Abhidhamma Vb 6\).](#)” For details, see “[Difference between Phassa and Samphassa.](#)”

“Phassa Paccayā Vedanā” Is “Samphassa Paccayā Samphassa-Jā-Vedanā.”

5. (Step 3 in the Chart) Therefore, the third step, “*phassa paccayā vedanā*,” that comes after the step “*tiṇṇaṃ saṅgati phasso*” is “*samphassa paccayā samphassa-jā-vedanā*.” **This is a “mind-made *vedanā*” due to *samphassa*.**

- Note that “*jā*” means “generated by,” and thus “*samphassa-jā-vedanā*” means “*vedanā* generated by *samphassa*.” That *vedanā* would arise ONLY IF one gets attached to that sensory input.
- Now it is clear that the fourth step of “*vedanā paccayā taṇhā*” really is “*samphassa-jā-vedanā paccayā taṇhā*.” **An Arahant generates *vedanā* (in Step 1) but not *samphassa* or *samphassa-jā-vedanā* (in Step 3.)**
- One would attach to that *ārammaṇa* ONLY because it led to “*samphassa*” with the step “*tiṇṇaṁ saṅgati phasso*.”
- Again, the above analysis is at “[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga \(Abhidhamma Vb 6\)](#).”

“*Vedanā Paccayā Taṇhā*” Is “*Samphassa-Jā-Vedanā Paccayā Taṇhā*”

6. (Step 4 in the Chart) The critical step of “attaching to the sensory input” happens if one’s mind becomes joyful/stressful. For example, if one sees a beautiful object, hears a pleasing sound, eats tasty food, etc., one would want more of it. Thus, the mind can attach and “get stuck” with that sensory input. **That happens with a “new type of consciousness” or a “*kamma viññāṇa*” with a desire to fulfill an expectation.**

- As the “[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga \(Abhidhamma Vb 6\)](#)” explains, this “attachment” can take place for all six sensory inputs, i.e., there are six types of *taṇhā*: *Rūpa taṇhā*, *sadda taṇhā*, *gandha taṇhā*, *rasa taṇhā*, *phoṭṭhabba taṇhā*, *dhamma taṇhā*.
- That automatic attachment occurs because of the mindset that “it is possible to fulfill expectations and be PERMANENTLY happy by pursuing pleasurable things in this world.”
- Thus, one would make efforts “acquire such things” without realizing those are defilements (“*saṃ*”) that WILL lead to future suffering.

7. With such a mindset, “*cetana*” become *saṃcetana* (defiled intentions); with such “defiled intentions,” one would engage in (*abhi*)*saṅkhāra*. Here, “*saṅkhāra*” means “*saṃ* + *khāra*” or “actions with “*saṃ*.”

- That leads to the perpetuation of the rebirth process or *Saṃsāra* (“*sāra*” means “fruitful”; thus, *Saṃsāra* results because of that wrong view/perception of a “fruitful world.”)
- To remove that wrong view, one must “see” the correct worldview of the Buddha, see the perils of “*saṃ*,” and become “*Sandīṭṭhiko*” at the *Sotapanna* stage. Thus the verse, “*Sandīṭṭhikam Nibbānam*” in the “[WebLink: suttacentral: Nibbata Sutta \(AN 3.55\)](#).” Note that *diṭṭhi* here means “to see.”

Kamma Generation Starting With “*Taṇhā Paccayā Upādāna*”

8. (Step 5 in the Chart) The *Akusala-Mūla Paṭicca Samuppāda* process starts at this point of getting to the “*taṇhā paccayā upādāna*” step in a sensory event. This is where *kamma* accumulation (responsible for rebirths) starts. **That is why the Buddha called it the “origin of the world.”**

- One starts acting with *avijjā* and generates *abhisāṅkhāra* with a “*kamma viññāṇa*”: “*avijjā paccayā (abhi)saṅkhāra, (abhi)saṅkhāra paccayā (kamma)viññāṇa, ..*” leading to the whole mass of suffering: “*Evametassa kevalassa dukkhakkhandhassa samudayo hoti*.”
- For details, see “[Tanhā Paccayā Upādāna – Critical Step in Paṭicca Samuppāda](#),” “[Generating Kammic Energy in the “Upādāna Paccayā Bhava” Step](#),” and “[Difference Between Tanhā and Upādāna](#).”
- Above is a summary of the Buddha’s description of “*loka samudaya*,” or “origin of one’s world,” per the short “[Loka Sutta \(SN 12.44\)](#).” As you can see, even such a short *sutta* needs to be explained in detail.
- **This is why I emphasize that reading “word-by-word translations” of *suttas* is a waste of time, especially for those not well-versed in Buddha Dhamma’s fundamentals.**

“Loka Samudaya” Will Not Take Place for an Arahant

9. All steps after the first step of “seeing an object” will not arise for an Arahant because an Arahant would not generate *samphassa*. See #3 and #9 of the post “[Difference between Phassa and Samphassa](#).”

- Another way to state the same is to say that an Arahant does not have *saṅgati* (“*saṅ* *gati*”) or “defiled *gati*.” Arahant’s mind is pure, devoid of greed, hate/anger, and ignorance. Note that “*gati*” is pronounced “*gathi*,” like in “Thief.”
- For an Arahant, a “seeing event” is just that. No attachment. Thus, any sensory event would be limited to just experiencing that sensory input. The critical step of “*tiṇṇaṃ saṅgati phasso*” WILL NOT take place for an Arahant. Thus all other steps following it would not be there!
- That is why Arahant is free from future suffering. The root causes for the “arising of the world” (“*saṅgati*”) have been eliminated for an Arahant.

How Can Someone Get to the Arahant hood?

10. Now the question is: “How can someone attain Arahant hood, i.e., stop the rebirth process and attain Nibbāna?”

The Buddha provided the answer in the second part of the “[WebLink: suttacentral: Loka Sutta \(SN 12.44\)](#)”: “*Katamo ca, bhikkhave, lokassa atthaṅgamo? Cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ. Tiṇṇaṃ saṅgati phasso. Phassa paccayā vedanā; vedanā paccayā taṇhā. Tassāyeva taṇhāya asesavirāganirodhā upādāna nirodho; upādāna nirodhā bhava nirodho ...pe... evametassa kevalassa dukkhakkhandhassa nirodho hoti. Ayam kho, bhikkhave, lokassa atthaṅgamo.*”

Translated: “And what, bhikkhus, is the **cessation/ending** of the world? In dependence on the eye and forms, eye-consciousness arises. **That is followed by “contact with the three types of “*saṅ*” or “*samphassa*.”** With *samphassa* as a condition, *samphassa-jā-vedanā* come to be; with *samphassa-jā-vedanā* as condition *taṇhā*. **But with the remainder-less fading away and cessation of *taṇhā* result in the cessation of *upādāna*;** with the cessation of *upādāna*, cessation of existence (*bhava*); with the cessation of existence, cessation of birth; with the cessation of birth, aging-and-death, sorrow, lamentation, pain, displeasure, and despair cease. Such is the cessation of this whole mass of suffering. This, bhikkhus, is the cessation/ending of the world.

The removal of *taṇhā* starts at the *Sotāpanna* stage by comprehending the above-summarized process. Complete cessation of *taṇhā* happens in four stages: *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, and Arahant.

- Until Arahant hood, anyone COULD generate *samphassa*, depending on the sensory input. As one attains higher *magga phala*, there will be fewer *ārammaṇa* that could lead to *samphassa* or “contact with defilements.” For example, after attaining the *Anāgāmi* stage, one would not “attach to” any sensual pleasures available in *kāma loka*.
- An Arahant would have removed all defilements, and thus, the *Akusala-Mūla Paṭicca Samuppāda* process starting with “*avijjā paccayā saṅkhāra*” would not be initiated. That is the **cessation/ending of the world** for that Arahant!

A Sensory Experience is a Trigger to Initiate a PS Process

11. As *Loka Sutta* points out, the accumulation of *kammic* energy to “power up” future existences starts with sensory experiences. *Kamma* generation in *Paṭicca Samuppāda* (PS) process takes place in the “*taṇhā paccayā upādānaṃ*” step in #8 above.

- As discussed in the second part of the *Loka Sutta*, the critical point is the stopping of the sequence of events following a sensory experience at the arising of *taṇhā* due to “*samphassa-jā-vedanā*.” We cannot control it at that moment since it happens within a split second.
- **(Additional information:** Two critical things need to happen to reduce and eliminate *taṇhā* over time: (i) First, one must comprehend this whole process that we are discussing and also how the *Paṭicca Samuppāda* process works. That is the “*dassanā pahātabbā*” step, where a large fraction of wrong views is removed at the *Sotāpanna* stage by getting rid of wrong views. (ii) Once getting to the *Sotāpanna* stage, one needs to remove the tendency to attach to sensory pleasures with *Ānāpāna* and *Satipaṭṭhāna Bhāvanā*. One reaches higher stages of *magga phala* in this second stage of the “*bhāvanā pahātabbā*” step. In the [WebLink: suttacentral: Sabbāsava Sutta \(MN 2\)](#), “*dassanā pahātabbā*” is the “first removal,” and “*bhāvanā pahātabbā*” is the “last removal.”)
- We will discuss that in future posts again. But it has been discussed in some existing posts. See, for example, “[Vipallāsa \(Ditṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”

***Paṭicca Samuppāda* process Is Initiated by a Sensory Experience**

12. Therefore, the *Akusala-Mūla Paṭicca Samuppāda* process does not automatically start with “*avijjā paccayā saṅkhāra*.” No one would act with *avijjā* WITHOUT a cause. The cause for acting with *avijjā* is a TEMPTATION brought up by a SENSORY EXPERIENCE.

- One can see that by combining the *Loka Sutta* (SN 12.44) discussed above with the “[WebLink: suttacentral: Sabba Sutta \(SN 35.23\)](#).”
- This theme is seen in many *suttas*, including the *Chachakka Sutta* (MN 148). I have discussed that *sutta* in detail in another series of posts on the “[Worldview of the Buddha](#).” Just look at the introductory post of that series, “[Buddhist Worldview – Introduction](#).”
- Other posts in the series: “[Paṭicca Samuppāda – Essential Concepts](#).”

9.4.8.3 Dukkha Samudaya Starts With Samphassa-Jā-Vedanā

April 23, 2021; revised September 7, 2022

Dukkha samudaya means “origin of suffering.” *Kammic* energies for future suffering accumulate via *Paṭicca Samuppāda* (PS). We start acting with *avijjā* and initiate PS when sensory inputs trigger temptations and generate “*samphassa-jā-vedanā*” or “mind-made feelings.”

Critical Conclusions from *Loka Sutta* (SN 35.23)

1. In the previous post, “[Loka Sutta – Origin and Cessation of the World](#),” we reached the following conclusions. (you may want to print it and refer to it as we proceed.)

- *IPaṭicca Samuppāda* (PS) describes the key steps leading to future suffering.
- However, that process DOES NOT initiate with “*avijjā paccayā saṅkhāra*.” We don’t AUTOMATICALLY start acting with *avijjā*!

- **A sensory input (*ārammaṇa*) triggers the *Paṭicca Samuppāda* process:** sight, sound, taste, smell, touch, or the memory of a past event (*dhammā*.)
- **If the mind attaches to such a sensory event (*taṇhā*)** that attachment leads to *upādāna* (keeping it in mind and getting stuck in it.) Then **while in the “*upādāna paccayā bhava*” step**, we accumulate *kammic* energy for future births with *mano*, *vacī*, and *kāya saṅkhāra*. That is how the PS process gets to “*avijjā paccayā saṅkhāra*.”
- Before we discuss those details, it is critical to understand how this whole process starts with “getting attached” to certain sensory inputs (*ārammaṇa*) with “*samphassa-jā-vedanā*” or “**mind-made feelings.**”
- By the way, “*dukkha samudaya*” is the same as “*loka samudaya*.” That is why *Nibbāna* implies “stopping future rebirths” or “stopping the re-arising of this word.” **It may take time to absorb this critical point.**

“*Samphassa-jā-Vedanā*” – Example 1

2. A sensory input comes through one of the six senses: eyes (sights), ears (sounds), nose (smells), tongue (tastes), body (touches), and mind (memories). In Pāli, they are six types of *vipāka viññāṇa*.

- Let us consider a simple example starting with *cakkhu viññāṇa*. Suppose three people A, B, and C, sit in a small coffee shop. They are all facing the door, and person X walks in. Suppose that person X is a close friend of A, the worst enemy of B, and that C does not know X at all. We will also assume that all 4 are males.
- So, let us see what happens within a split second. A recognizes X as his friend, and a smile comes to his face. B recognizes X as his enemy, and his face gets darkened.
- On the other hand, X is just another person to C. He immediately goes back to whatever he is doing.

3. **That is an example of a “*cakkhu viññāṇa*,” a “seeing event.”** It is over within a split second, just like taking a photo with a camera takes only a split second, where the image is captured on the screen instantaneously.

- **However, something very complicated happens in the human mind when a “seeing event” occurs.**
- It is critically important to go slow and analyze what happens to see how complicated this process is (for a human mind) to capture that “seeing event.” It is much more complicated than just recording “a picture” in a camera.

4. Within that split second, A recognizes X as his good friend, and joy arises in his mind, and he becomes happy. B recognizes X as his worst enemy, and bad emotions arise in his mind, and he becomes angry. On the other hand, no extra feelings arise in him. He goes back to whatever he was doing.

- As we can see such vastly varying feelings arise due to the three steps that follow the “seeing event” or *cakkhu viññāṇa*. As we remember from the previous post (refer to the printout) those three steps are “*Tiṇṇaṃ saṅgati phasso; Phassa paccayā vedanā; vedanā paccayā taṇhā*.” As we discussed, the last two steps are “*samphassa paccayā samhassa-jā-vedanā*” and “*samphassa-jā-vedanā paccayā taṇhā*.”
- The three people, A, B, and C, generate different “*saṇ gati*” upon seeing X. Even though they all see the same person X, three different types of “*samphassa-jā-vedanā*”: joy, anger, and neutral feelings arise respectively in A, B, and C.
- How does the SAME “seeing event” (seeing X) lead to all these very different changes in the minds of three different people? (and the emotions even show up on their faces!)

5. Since all three people A, B, and C, are average humans, they have not removed “*saṇ gati*” or defilements from their minds. Such “*saṇ gati*” remain hidden as “*anusaya*” in all three.

- However, a trigger is needed to bring those “*saṇ gati*” to the surface. A has had “good experiences with X,” and thus “affectionate *saṇ gati*” arose in him upon seeing X. B’s experiences with X were not good, and those “bad memories” were triggered by seeing X.
- On the other hand, C has had no prior experiences with X. Thus, a trigger for “*samphassa-jā-vedanā*” was not there. But if C sees a person he is familiar with, that may trigger his “*saṇ gati*.”
- If C were an *Arahant*, he would not have any “*saṇ gati*” left. Thus, affection or anger would not arise upon seeing ANY person.
- The best way to comprehend this key point is to think about your own experiences.

Kamma Generation Depends on One’s Actions Based on the Initial “Attachment”

6. Once bound to an event with “*samphassa*,” that leads to corresponding “mind-made feelings” or *samphassa-jā-vedanā*. Joyous feelings arose in A and angry feelings arose in B upon seeing X. Both A and B got “attached” to that event. **Thus, *taṇhā* can arise via greed or anger.**

- Person A may start talking to X excitedly, especially if X is a close friend. B’s face may darken and many angry thoughts about his past experiences with X may arise in him. Both are “*samphassa-jā-vedanā paccayā taṇhā*” and “*taṇhā paccayā upādāna*.”
- The next step of “*upādāna paccayā bhavo*” depends on what happens next. In this case, B may start accumulating “bad *kamma*” just by cultivating “bad *vacī saṅkhāra*” in his mind, even if he does not say or do anything. Such “bad thoughts” arise via “*avijjā paccayā saṅkhāra*” where *saṅkhāra* are *vacī saṅkhāra* (not speaking out but talking to himself.)
- But it could get worse if B’s anger rises and he says something bad to X. That is also “bad *vacī saṅkhāra*.” If X responds and the situation escalates, B may hit X. That is getting to the “bad *kāya saṅkhāra*” stage. All these lead to the accumulation of “bad *kamma*” for B.
- That is a brief example of how one could generate *kammic* energy for future existences, even if this particular action may not be strong enough to “power up” a new birth. However, if the situation escalates and B kills X, then that would certainly be a strong *kamma* leading to new birth in an *apāya*.

“*Samphassa-jā-Vedanā*” – Example 2

7. Let us clarify it further with an example since it is critical to understand this issue. Suppose a friend visits an alcoholic (X) and brings a bottle of alcohol. Again, let us follow the steps in #2 of the previous post.

- First, X sees that his friend has brought a bottle of alcohol, his favorite kind. This is the “seeing event” in this example: “*cakkhuṇṇa paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ*.” This *cakkhu viññāṇa* is a *vipāka viññāṇa* and no *kamma* generated. Even an *Arahant* would see the bottle.
- Next is the CRITICAL step “*tiṇṇaṃ saṅgati phasso*” where X’s mind instantly makes the “*saṇ phassa*” or “defiled contact” with his “alcoholic *gati*.”
- **Note the two types of “contacts” in the above two processes.** In the first, the “*phassa cetasika*” in *cakkhu viññāṇa* makes the “contact” between *cakkhu* and *rūpa* (alcohol bottle) to give rise to *cakkhu viññāṇa* (seeing the bottle.) The second is a “defiled contact” (*samphassa*) that arises due to his craving for alcohol.
- On the other hand, if someone brought a bottle of alcohol to an *Arahant*, he would also see the bottle, i.e., *cakkhu viññāṇa* with the “*phassa cetasika*” will also arise in him. But there would be no “*tiṇṇaṃ saṅgati phasso*” and, thus, the process will stop there.

8. Once X got “attached” to the bottle of alcohol with *samphassa* he becomes joyful and that joyous feeling is *samphassa-jā-vedanā*: *Samphassa* led to “*Samphassa-jā-vedanā*.”

- Therefore, the “extra *vedanā*” made up by the mind is the “*samphassa-jā-vedanā*.” Here, “*jā*” means “generated with.” **That *vedanā* was generated by *samphassa* (*saṃ phassa*).**
- Suppose X’s wife is also home when the friend brings the bottle. She would not be happy to see the bottle, especially if she is trying to break the “drinking habit” of her husband. She may even get angry with her friend. That is also a *samphassa-jā-vedanā*.
- On the other hand, the *Arahant* will also see the bottle and will identify it as such. But there will be no joy or dismay. There will be no *samphassa-jā-vedanā*.

9. The “*samphassa-jā-vedanā*” of joyous feelings in X makes him attach (*taṇhā*), which immediately leads to the next step of *upādāna*. Which means his mind is now focused on the alcohol bottle.

- If his wife opposes him having alcohol often, she may become agitated. Even if she may not say anything, she could get mad at the friend for bringing the alcohol bottle. Does he not know that he is easily tempted? Did the two of them plan to “have a drink” without her knowing? She also gets to the “*taṇhā*” and “*upādāna*” stages.
- Of course, an *Arahant* would not “get attached” or “get stuck” (no *taṇhā* or *upādāna*.)

Generating *Kamma* Starts With the “*Taṇhā Paccayā Upādānaṃ*” Step

10. Therefore, once getting attached with *taṇhā*, the next step of “getting stuck and proceeding along” is likely to happen with “*taṇhā paccayā upādāna*” and “*upādāna paccayā bhavo*” steps.

- This is where X started getting ready to “have a good time with the friend.” He would think, speak, and act to have a “good time” with his friend.
- However, it is possible to stop the process at that point by acting mindfully. If X has seen the dangers of keeping his “drinking habit” he can think about the bad consequences of engaging in that practice and tell the friend that he is trying to eliminate his drinking habit. Thus he could start acting with “*vijjā*” (or wisdom) and NOT engage in “*avijjā paccayā saṅkhāra*.”
- **That is the basis of the correct *Ānāpānasati* or *Satipaṭṭhāna Bhāvanā*.**

9.4.8.4 Key Steps of Kammic Energy Accumulation

May 1, 2021; revised May 2, 2021; October 13, 2022

Here we discuss the critical steps in *kamma* accumulation. *Paṭicca Samuppāda* (PS) explains how one creates one’s future with our actions (*kamma* generated via *saṅkhāra*.) However, that *kamma* accumulation process starts not at the beginning of PS but in the middle of PS with a sensory experience.

Chronological Order of *Kamma* Accumulation

1. Let us first list the critical steps involved.

- (i). A sensory experience with one of the six sense inputs (seeing, hearing, smell, taste, touch, memory recall) is the first step.
- (ii). Attachment (*taṇhā*) to that sensory experience based on our habits/character (*gati*.)
- (iii). Embracing (willingly getting involved) in that sensory experience with specific goals.
- (iv). Thinking, speaking, and doing things to accomplish that goal.
 - During that last step, we accumulate *kammic* energy to bring about future rebirths and all other types of *kamma vipāka*.

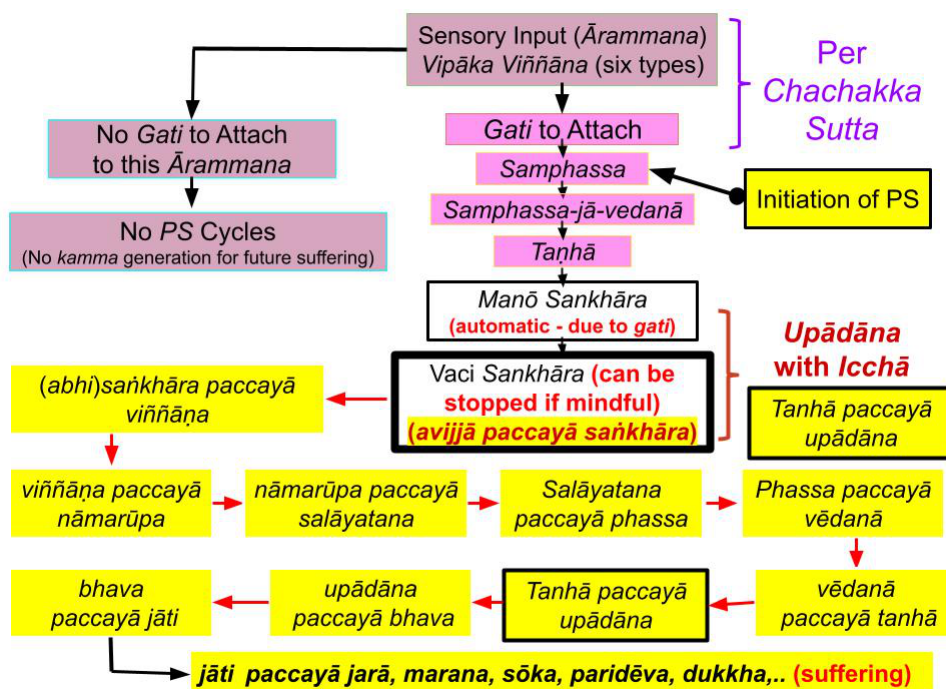

Matching the Steps in *Paṭicca Samuppāda*

2. We experience those sensory inputs with our five physical senses and the mind. In Pāli, those six are “*saḷāyatana*” or “all *āyatana*.”)

- A sensory experience starts with the “*saḷāyatana paccayā phasso*” step in PS. That verse means “making contact with one of the six *āyatana*.”
- Here, it is critical to see that an *Arahant* does not have “*āyatana*” but only “*indriya*.” *Arahant*’s six senses only capture a sensory experience. An *Arahant* has *indriya*, but they DO NOT become “*āyatana*.” ***Indriya become āyatana when rāga, dosa, moha (or “saṇ”) come into play.***

3. So, IF someone’s mind “gets involved” with a sensory experience and starts the “*saḷāyatana paccayā phasso*” step, that person’s *indriya* becomes *āyatana*. **That is the beginning of a PS process** based on that *ārammaṇa*. Then the mind automatically goes to the next few steps of “*phassa paccayā vedanā*,” “*vedanā paccayā taṇhā*,” and “attaches” (*taṇhā*) to that *ārammaṇa*. **As we discussed in previous posts, “*vedanā*” here really is “*samphassa-jā-vedanā*.”** See “[Loka Sutta – Origin and Cessation of the World](#)” and “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#).”

- Once “attached,” the mind automatically “pulls it close (*upādāna*)” and will start thinking, speaking, and acting on it. That is the “*upādāna paccayā bhavo*” step taking a side-step leading to “*avijjā paccayā saṅkhāra*.” This is when the PS process starts from the beginning. The following chart illustrates this critical point.

Download the pdf: “[WebLink: suttacentral: Icchā to Upādāna to Suffering.](#)”

- Let us take an example to illustrate this critical point.

Example of “*Salāyatana Paccayā Phasso*” Leading Automatically to “*Upādāna Paccayā Bhavo*” Step

4. Husband and wife are walking down the street, and the wife stops and looks at a beautiful painting on display in a store window. The husband looks at it, shrugs his shoulders, and wants to move on. But the wife is “attached” to that painting. So, she asks her husband whether they can go inside and take a good look at it.

- In this particular case, both saw the painting, i.e., “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” took place for both. But the critical step of “*tiṇṇaṃ saṅgati phasso*” DID NOT take place in the husband’s mind. Note that this is the sequence of events described in the *Loka Sutta*. See “[Loka Sutta – Origin and Cessation of the World.](#)”
- The exact sequence of events is stated slightly differently in the PS process (for the wife.) It starts with “*salāyatana paccayā phasso.*” It immediately goes through “*phassa paccayā vedanā,*” “*vedanā paccayā taṇhā,*” and “*taṇhā paccayā upādāna*” steps. **Now she is “stuck” with that *ārammaṇa* or the painting.** See, [Dukkha Samudaya Starts With Samphassa-Jā-Vedanā.](#)
- It is a good idea to have both of those posts printed out for reference.
- Now, the wife is at the “*upādāna paccayā bhavo*” step in PS and the *Loka Sutta* steps. **I hope you can see that the steps in the two versions describe the same processes that the wife’s mind underwent.**

Kamma Accumulation in the “*Upādāna Paccayā Bhavo*” Stage

5. At this point, the wife starts acting with *avijjā*. She starts generating *kamma* via “*avijjā paccayā saṅkhāra,*” “*saṅkhāra paccayā viññāṇa,*” “*viññāṇa paccayā nāmarūpa,*” etc., down to “*upādāna paccayā bhava*” again!

- Before we discuss those details, let me digress a bit to address some related issues.

Additional Details

6. Here, I want to emphasize an important point. Getting attached to a painting is not an immoral deed. But in a deeper sense, such actions keep one bound to the *kāma loka* and away from *Nibbāna*. That is why it falls under *avijjā*. **But only *Sotāpannas* who are trying to attain the *Anāgāmi* stage automatically avoid such actions.** I am just taking an example that everyone can understand.

- They both saw the same painting as a *vipāka vedanā*. Here, one should not assign such “*vipāka vedanā*” to a single past *kamma*. Our physical body is the result of incalculable past *kamma*. A “mundane event” CANNOT be traced back to a SINGLE *kamma* done in the past. **Only strong *kamma* (like killing a human) can lead to a specific *vipāka* (like getting a bad rebirth.)**
- That was just the “seeing event.” As discussed in *Abhidhamma*, **most *vipāka vedanā* are neutral**, like seeing or hearing. The exceptions are bodily contacts — either bodily *dukkha vedanā* (like an injury or a headache) or *sukha vedanā* (like getting a massage or being in an air-conditioned room on a hot day) — depending on whether it is a bad or a good *vipāka*.
- Now let us get back to our example.

“*Upādāna Paccayā Bhavo*” Stage Explained With the Above Example

7. Let us continue with our example to see how the wife keeps accumulating *kamma* with different types of *saṅkhāra* with the “*upādāna paccayā bhava*” step in PS.

- The painting is expensive, so the wife is considering whether they can afford it now, but she would really like to buy it. The husband is not interested in it and thinks it is a waste of money. Those are *saṅkhāra* done with *avijjā*, i.e., “*avijjā paccayā saṅkhāra*.” Now we can see how the PS process starts from the beginning starting with the “*upādāna paccayā bhava*” step.
- Now, any “happy feeling” in the mind of the wife would be due to her “*saṇ gati*” that comes to play at the “*tiṇṇaṃ saṇ gati phasso*” stage of getting attached to a sensory event; see, “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#).” This is also called *kāma assāda*.
- Such a “happy feeling” did not arise in the husband’s mind. This is an important point. The “happy feeling” in the wife could not have been a property of the painting; if so, it should have given the same “happy feeling” to the husband! Only the wife had “*taṇhā*” and “*upādāna*” for the painting.
- Now that she is “attached” to the painting, the wife keeps looking at it for a while. She will be enjoying “*kāma assāda*” about that picture even after they leave that place by thinking back about it. Now she has made a “*viññāṇa*” and a “*bhava*” for it.

Repeated PS Cycles Based on One *Ārammaṇa*

8. Numerous such *Paṭicca Samuppāda* cycles can operate for her based on that *ārammaṇa* even several days later.

- For example, that “*kāma assāda*” can resurface with *Paṭicca Samuppāda* cycles that involve only the mind when she is at home. It can now start with “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇaṃ*,” i.e., she just remembers the painting while washing dishes. How does she start thinking about the painting when she is busy with another task?
- One way to explain that is to say that “she had ‘cultivated’ a *viññāṇa*” for that painting, and now it can sometimes resurface even without a prompt. This is sometimes known as the “subconscious”; see, “[3. Viññāṇa, Thoughts, and the Subconscious](#).”
- Another way to explain it by saying that she had made a “*bhava*” for liking that painting and it is a *dhamma* that can come back to the mind when the conditions are right: “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.”

9. Of course, that “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇaṃ*” step will be followed by, “*tiṇṇaṃ saṇ gati phasso*” and “*(saṇ)phassa paccayā vedanā*”; see, “[Difference between Phassa and Samphassa](#).” Her “*gati*” for liking such pictures will make her mind “*samphassa*,” which in turn will lead to “*samphassa paccayā vedanā*” or, more accurately, “*samphassa-jā-vedanā*.”

- As long as that “*kamma viññāṇa*” (expectation of owning the painting) is present in her, the possibility of cultivating more *saṅkhāra* with that *ārammaṇa* (painting) will be there. Again, “cultivating *saṅkhāra*” here means to think and act on the desire to own the painting; see “[Saṅkhāra – What It Really Means](#).”
- However, that particular *dhamma* or concept or thought would never come to her mind if she were listening to a discourse or thinking about a critical concept like *anicca*. But such a “subconscious *viññāṇa*” gets an opportunity to come to the surface while doing a mundane task (washing dishes, in this case.)

One Way That *Kamma Viññāṇa* May be Removed from Her Mind

10. One way that can happen is IF IT BECOMES CLEAR that it would be impossible for her to fulfill her expectation due to events beyond her control. Suppose that a week later they are walking by the same store. The wife looks for the painting but finds it no longer there; someone had bought it. Now, think about what happens to the two of them.

- The wife will be distraught: “I should have bought it; now I may not be able to find such a nice painting.” But the husband will not have any bad feelings, except may be some bad feelings about his wife not being able to get what she wanted.
- This is the suffering that we can stop from arising even in this life. It is not a *vipāka vedanā* but a “*samphassa-jā-vedanā*.” The wife got distraught only because she got attached to that painting, but the husband did not.
- I have discussed this example and more in the post, “[Kāma Assāda Start with Phassa Paccayā Vedanā or Samphassa-Jā-Vedanā](#).”

11. Once it becomes clear to the wife that owning that painting is no longer possible, that expectation will automatically disappear from her mind. In other words, that “*viññāṇa* to own the painting” will no longer be there.

- Therefore, she will no longer think or act based on that *viññāṇa*. Since that *viññāṇa* is no longer there to trigger the step “*avijjā paccayā saṅkhāra*.” The rest of the steps in PS will also stop.
- **However, it is essential to note that her “*saṇ gati*” have not changed.** A similar *viññāṇa* can re-appear in her mind if that painting is returned to the store and will become available to purchase. Another similar painting could also do it.

Second Way That *Kamma Viññāṇa* May be Removed from Her Mind

12. The second way she could lose that desire for the painting (and thus that *viññāṇa* “to own the painting”) is if she attained the *Anāgāmi* stage. This time, the removal is permanent, with no “*saṇ gati*” or “*anusaya*” left for sensual pleasures.

- One gets to the *Anāgāmi* stage by realizing the fruitlessness of “owning such sense-pleasing objects.”
- **At that stage, she will not desire to own ANY “sense-pleasing objects.” In other words, her “*saṇ gati*” (or *anusaya*) would have been permanently removed from her mind.**
- That is a deeper discussion involving the “*anicca* nature.”

9.4.8.5 Generating Kammic Energy in the “Upādāna Paccayā Bhava”

May 7, 2021

Bhava is the energy that powers mindsets, existences, and rebirths. That energy is produced in the “*upādāna paccayā bhava*” step in *Paṭicca Samuppāda*. That is also where we cultivate “*bad gati*” to attach to various sensory inputs. That is the process we need to control to gradually reduce *taṇhā* to attain *Nibbāna* with *Ānāpānasati* and *Satipaṭṭhāna* meditations.

Sensory Trigger Is “*saḷāyatana paccayā phasso*” step in PS.

1. In the past two posts (“[Loka Sutta – Origin and Cessation of the World](#)” and “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#)”), we discussed the fact that **it is an *ārammaṇa* through one of the 6**

“sense doors” that triggers PS processes. The Pāli verse that describes such a trigger is, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇam..*” Let us call this “trigger description 1.”

- We did not specifically say it, but it is easy to see that this is the same thing that happens at the “*saḷāyatana paccayā phasso*” step in the “moment-to-moment PS” or the “*Idappaccayatā PS*.” See, “[Idappaccayatā Paticca Samuppāda](#).” Let us call this “trigger description 2.”
- In “trigger description 1” we have the first few steps of “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇam, tiṇṇam saṅgati phasso, phassa paccayā vedanā; vedanā paccayā tanhā*.”
- In “trigger description 2” the corresponding steps are, “*saḷāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā tanhā*,”
- The two processes highlighted in blue are the same. That becomes clear when we see that *saḷāyatana* (all “*āyatana*”) takes into account “contact with defiled *gati*” or “*saṅ phassa*” or “*samphassa*.”
- Please make sure you understand that point by reading the recent previous posts in “[Concepts of Upādāna and Upādānakkhandha](#).”
- By the way, there are many *suttās* that discuss “trigger description 1” and “trigger description 2.” See, “[315 results for tiṇṇam saṅgati](#)” and “[738 results for paticca AND uppajjati](#).”

Samphassa Is Already Included in “*Saḷāyatana Paccayā Phasso*” Step in PS

2. The above key point is also explained in “[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga \(VB 6\)](#)” in one of the original commentaries: “*Tattha katamo saḷāyatana paccayā phasso? Cakkhusamphasso sotasamphasso ghānasamphasso jivhāsamphasso kāyasamphasso manosamphasso—āyam vuccati “saḷāyatana paccayā phasso.”*”

Translation: “What is *saḷāyatana paccayā phasso*? It is *cakkhusamphasso sotasamphasso ghānasamphasso jivhāsamphasso kāyasamphasso manosamphasso*.”

Thus, contact with an “*āyatana*” MEANS a “defiled contact.” An *Arahant* DOES NOT have 6 *āyatana* (*cakkhāyatana* and so on). Instead, an *Arahant* has 6 *indriya* (*cakkhu indriya* and so on.) Thus an *Arahant* can see, hear, etc. But his mind will not make contact with “*saṅ gati*” because “*saṅ gati*” are absent. That means the step “*tiṇṇam saṅgati phasso*” will not occur as we discussed in the previous two posts.

- As I explained in the post, “[Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa](#),” a fundamental concept is first stated succinctly (“*uddesa*” or “utterance.”) That is the version of PS in most *suttās* where the 11 steps are briefly stated.
- Then a “*niddesa*” is a “brief explanation” that can be found in the commentaries (above verse is a good example. Of course, one should rely on the 3 original commentaries and NOT on more recent commentaries like *Visudhimagga*; see the above post.
- Then the concept needs to be explained in detail with examples (“*paṭiniddesa*”) My explanation of “*samphassa*” in the post “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#)” is an example of that.

Importance of the “*Upādāna Paccayā Bhava*” Step

3. **In other words, we start acting with *avijjā* ONLY IF we get attached to a sensory event (also called *ārammaṇa*.)**

- Attachment (*tanhā*) to an *ārammaṇa* directly leads to “*tanhā paccayā upādāna*” and “*upādāna paccayā bhava*” steps.

- It is at the “*upādāna paccayā bhava*” step that we start acting with *avijjā* via “*avijjā paccayā saṅkhāra*.” **That is when we start generating “kammic energy” for a corresponding existence (bhava.)** That “kammic energy seed” can germinate in the future and give rise to a corresponding birth (*jāti*.) Each *jāti* ends up in old age, disease, and death.
- (Note that the term “*jāti*” could also mean a “temporary birth” DURING a lifetime. For example, someone can get drunk and be “born” in a “drunken state” for a few hours.)
- **Thus, the origin of future suffering starts (i.e., the PS cycle starts at the beginning) WITHIN the “*upādāna paccayā bhava*” step.** A trigger is a sensory event. Let us discuss this critical issue.

Tendency to Attach to *Ārammaṇa* Is Cultivated in the “*upādāna paccayā bhava*” step.

4. Thus, it is at the “*upādāna paccayā bhava*” step that the full PS cycle starts as follows: “*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā salāyatana, salāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā tanhā, tanhā paccayā upādāna, upādāna paccayā bhava, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti.*” See “[Idappaccayatā Paticca Samuppāda](#).”

- But the above verse is in the “*uddesa*” version. It is a highly condensed statement of a complex process. It needs to be explained at least in “*niddesa*” (brief explanations) and in the “*paṭiniddesa*” version, preferably in a verbal discourse with many examples as needed to clarify subtle issues. My posts are somewhat in between *niddesa* and *paṭiniddesa*.
- For details on that see, “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#).”
- Let us re-visit an example to clarify what we discussed above in the “*paṭiniddesa*” version.

Re-Visiting a Previous Example

5. At #7 of the post, “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#),” we discussed the case of an alcoholic (X) tempted by the seeing of an alcohol bottle.

- As soon as X saw the alcohol bottle, his “*saṇ gati*” (craving for alcohol) emerged via “*tiṇṇaṃ saṅgati phasso*.” Then he immediately started generating *saṅkhāra* via “*avijjā paccayā saṅkhāra*.”
- With such *saṅkhāra*, he started cultivating a *viññāṇa* (expectation to have a drink) with “*saṅkhāra paccayā viññāṇa*.” Note that the “trigger event” for the whole process was a “*vipāka viññāṇa*” (*cakkhu viññāṇa*.) Now, he is cultivating a “*kamma viññāṇa*” (expectation to have a drink) via “*saṅkhāra paccayā viññāṇa*.”

“Feeding the *Viññāṇa*” – Generating Kammic Energy for “*Kāma Bhava*”

6. All of X’s conscious thoughts (*vacī saṅkhāra*) and actions (*kāya saṅkhāra*) lead to a *kamma viññāṇa* via the “*saṅkhāra paccayā viññāṇa*” step. All these *saṅkhāra* strengthens his “alcoholic mindset.” His thoughts, speech, and actions are based on that mindset.

- Note that until he gets drunk, he is not committing any immoral deeds. Yet, his desire to get drunk leads to a corresponding mindset. To put it differently, someone cultivating *jhāna* WOULD NOT get into such a situation because that person knows that such a mindset is not compatible with *rūpa/arūpa* realms (i.e., *rūpa/arūpa jhāna*.) It is compatible with realms in *kāma loka*, at least in the human realm.
- As long as one cultivates *saṅkhāra* compatible with *kāma loka*, it is impossible to be freed from *kāma loka*. **Even seeking “harmless sense pleasures” binds one to *kāma loka*. This is a deep and critical point.**

If Immoral *Saṅkhāra* Generated Suffering Will be Higher

7. Now, if X gets really drunk, he could start acting like an animal. In an extreme case, he and his friend could get drunk (and may be even using drugs) and become totally incoherent, and they may not be able to stay upright. That is getting into the mindset of animals. At some “wild parties,” immoral deeds like rapes could happen with such a mindset. If so, X could be cultivating the mindset suitable for an animal. This is called “establishing *viññāṇa* suitable for animal *bhava*.” That sets up a possible birth in a lower realm of *kāma loka*.

- That is the meaning of “*saṅkhāra paccayā viññāṇa*.” Such *kamma viññāṇa* are “fed” by strong *saṅkhāra* or “*abhisāṅkhāra*.”
- The key point is that repeatedly engaging in unwise behaviors will feed both “bad *gati*” and “*kamma viññāṇa*.” As we can see, “bad *gati*” directs one to engage in more similar actions. That feeds “*kamma viññāṇa*” or “*kamma bīja*” that can become strong enough to bring about a “bad *jāti*” such as one in the animal realm, and thus to future suffering.
- That is a brief going-over of the whole PS cycle ending up with future suffering.
- One can think about how other types of activities (triggered by sensory inputs) can lead to different PS cycles. For another example see, “[Idappaccayatā Paṭicca Samuppāda](#).”

Samphassa Takes Place Because of “*Sanj Gati*”

8. From the recent posts so far, we see that “getting attached to an *ārammaṇa*” starts with the “*tiṇṇaṃ saṅgati phasso*” step. That happens because of “*sanj gati*” or “defiled *gati*,” as discussed in #6 of that post.

- For example, someone who has an “angry character” is more likely to be triggered with an insult. A “greedy character” is easy to be bribed. An alcoholic is easily tempted to “have a drink.” Therefore, the critical step of “*tiṇṇaṃ saṅgati phasso*” or “*samphassa*” is closely associated with one’s *gati* (character/habits.)
- An *Arahant* has no “*sanj gati*” left, and thus his/her mind does not attach to ANY such sensory event (*ārammaṇa*). Of course, all sensory events like “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” takes place for an *Arahant*, i.e., he/she will see, hear, etc. But “*tiṇṇaṃ saṅgati phasso*” will not take place. An *Arahant* has removed *taṇhā*!
- **The key to eliminating *taṇhā* is to gradually reduce “*sanj gati*” in the 4 stages of *Nibbāna* and eventually eliminate it at the *Arahant* stage!**
- To get rid of such “*sanj gati*,” one needs to see the bad consequences in engaging in related activities. Thus, an alcoholic needs to understand the bad consequences in two ways: (i) drinking alcohol can lead to health problems and also can get one to engage in immoral activities, (ii) these activities involve “bad *saṅkhāra*” that can lead to births in lower realms.

Clarification of *Saṅkhāra*

9. Most people are familiar with the phrase “*avijjā paccayā saṅkhāra*” but do not comprehend the meaning of that phrase. Translation of “*saṅkhāra*” as “mental formations” may not convey the real meaning. Let me go through the example to make it clear.

- Let us look briefly at the actions of X once he is “attached.” Now, he wants to have a “drink” with his friend with snacks and watch a game on TV.
- All such activities are done with *mano*, *vacī*, *kāya saṅkhāra*. **First, he automatically thinks about such activities (*mano saṅkhāra*.) Then he will come up with a plan and starts speaking about such activities (*vacī saṅkhāra*).** He then starts working to put that plan in action with *kāya saṅkhāra*. Note that all 3 types of *saṅkhāra* arise in mind.

- **Kammic energy is generated in such *saṅkhāra* and lead to *kamma viññāṇa*.** Thus, “*saṅkhāra paccayā viññāṇa*” is really “*abhisāṅkhāra paccayā kamma viññāṇa*.” Sometimes, especially in Sinhala, it is also stated as “*abhisāṅkhāra paccayā abhiviññāṇa*,” where “*abhiviññāṇa*” just means “strong *kamma viññāṇa*.”
- The point is that this *viññāṇa* (that arises in the PS process) is DIFFERENT from the *vipāka viññāṇa* that arises in a sensory event like “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhuviññāṇam*.” **That *cakkhu viññāṇa* was a *vipāka viññāṇa* and had no *kammic* energy in it.**

Summary

10. The initial trigger for *kamma* accumulation is a *vipāka viññāṇa* that arises with sensory input (*ārammaṇa*.) That can be described in two ways: (i) “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇam* (any one of the six types of *vipāka viññāṇa*).” OR (ii) the “*saḷāyatana paccayā phasso*” in the PS cycle. Both describe the same process.

- If that person attaches to that sensory event (i.e., if it matches a “*saṇ gati*”), then he/she will start thinking/acting to engage with that experience. That starts PS processes at “*avijjā paccayā saṅkhāra*” and leads to the progression of that cycle ALL THE WAY to the end.
- That process is AUTOMATIC. We don’t have control over the initial steps of “getting attached.”
- The only way to control is to reduce one’s “*saṇ gati* gradually.” The key here is to realize that one is “attached” and is “generating *saṅkhāra*” and to stop generating such “bad *saṅkhāra*” once one becomes aware of it.
- If that alcoholic understood the PS process, he/she would realize that one needs to control one’s urges. This is what is meant by “being mindful” in the *Ānāpānasati* or *Satipaṭṭhāna* meditations.
- If X becomes good at controlling his urges, his “*saṇ gati*” (craving alcohol) will gradually diminish, and he will be free of that addiction over time.
- That is the way to break any bad habit (“*saṇ gati*”). On the other hand, one should willingly engage in activities that cultivate “good *gati*.” Those are the “*āna*” and “*āpāna*” in *Ānāpānasati*. See, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#).”

9.4.9 Six Root Causes – Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna)

July 19, 2018; revised December 23, 2018; re-written June 3, 2021 (like a new post); re-written August 21, 2022; revised December 10, 2023 (#3, #5, #6)

Loka Samudaya is not about “creating a whole new world.” When someone dies and is reborn, that is “arising into a new world” for that person. The stopping of the rebirth process is *loka nirodhaya*, the same as *Nibbāna*.

Meanings of *Samudaya* and *Nirodhaya*

1. *Loka Samudaya* (“*saṇ*” “*udaya*”) means “arising (again) into this suffering-filled world.” *Loka nirodhaya* (“*nir*” “*udaya*”) means “stopping the rebirth process permanently.” Then the world will cease to exist for that lifestream.

- As we have discussed before, the meanings of words (whether Pāli or in any language) need to be understood in the context. Thus, *loka Samudaya* is not about “creating a whole new world/universe.” It is about being reborn upon death.
- That may sound bad. But that will make sense when one understands that most rebirths are into realms filled with suffering.
- Let us consider an example to understand the implied meaning.

Life in the 31 Realms Arise Due to Six Root Causes

2. **There are six root causes (*mūlika hetu*) that lead to the arising of one's world:** *lobha* (greed), *dosa* hate/anger), *moha* (having ten types of *micchā diṭṭhi*), and *alobha* (non-greed), *adosa* (non-hate/anger), *amoha* (absence of *moha*). **Those latter three are only “superficial” and thus are mundane versions of *alobha*, *adosa*, and *amoha*.**

- When one acts with one or more of *lobha*, *dosa*, and *moha*, one is giving rise to *kamma bīja* (*kammic* energy) that can lead to rebirth in the four “bad realms” or the *apāyās*. In other words, one is generating bad *abhisāṅkhāra* or “*apuñña abhisāṅkhāra*,” therefore, “bad *viññāṇa*,” etc., which lead to “bad *bhava*” and “bad *jāti*” (see, “[Paticca Samuppāda](#)”).
- In the same way, one or more mundane *alobha*, *adosa*, or *amoha*, give rise to *kamma bīja* that can lead to rebirth in the “good realms” at or above the human realm. There, one is generating good *abhisāṅkhāra* or “*puñña abhisāṅkhāra*” with “good *viññāṇa*,” etc., which leads to “good *bhava*” and “good *jāti*.”

There Are No “Good Realms” In Ultimate Reality

3. However, those “good realms” at and above the human realm are also NOT free from suffering. Old age and death are inevitable in any realm.

- To look at it from another point of view, the **two sets** of root causes are like the **two faces of a coin**. Getting rid of just one face of a coin is impossible.
- In other words, getting a “good rebirth” does not mean one will not get “bad rebirths” later. Most rebirths are in the “bad realms.”
- Only when one comprehends the Four Noble Truths (closer to *Anāgāmi*/*Arahant* stages) can one understand the futility and dangers of rebirths in ANY realm of “this world.”
- That is why one must follow the path sequentially. See “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)”

Lobha, Dosa, Moha Lead to *Apāya* Births – Mundane *Alobha, Adosa, Amoha* to Births in Good Realms

4. *Lobha, dosa, and moha* are food (*āhāra*) for the *apāyās* (the lowest four realms.) They give rise to the worse form of *saṅkhāra*, i.e., *apuñña abhisāṅkhāra* (or *apuññābhisāṅkhāra*.) One does *pāpa kammā* (immoral deeds) with *lobha, dosa, and moha*.

- One does *puñña kammā* (moral deeds) with the **mundane versions of *alobha, adosa, and amoha***, i.e., with *puññābhisāṅkhāra*.

- The problem is that not only *pāpa kammā* but also *puñña kammā* are done with *avijjā* (ignorance.) **The ignorance here is that of the Four Noble Truths (which says birth in any of the 31 realms will not stop future suffering.)**

Moha and Mundane Amoha Can Arise in Any Average Human (Puthujjano)

5. In an average human, thoughts can arise with EITHER moral roots (based on **mundane amoha**) OR immoral roots (based on **moha**.)

- Moral deeds (*puñña kamma*) are done with mundane *amoha* and involve *puñña abhisāṅkhāra* (*puññābhisāṅkhāra*.) Immoral deeds (*pāpa kamma*) done with *moha* involve *apūñña abhisāṅkhāra* (*apūññābhisāṅkhāra*.)
- *Puñña kammā* make a mind joyful and bring good *vipāka*. *Pāpa kammā* leads to a stressed-out mind and leads to bad *vipāka*.
- For an average human, ***avijjā* remains as *anusaya* (hidden)** even with **mundane *amoha***. This is why a *puñña kamma* done by an average person belongs to *puññābhisāṅkhāra* that arises with “*avijjā paccayā saṅkhāra*” in “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”
- Only *kusala kamma* can lead to *Nibbāna*. ***Puñña kammās* automatically become *kusala kammās* with the comprehension of Four Noble Truths//*Paṭicca Samuppāda*/*Tilakkhaṇa*.**

All Six Root Causes Sustain the Rebirth Process

6. **Therefore, all six root causes lead to the continuation of the rebirth process. However, one needs to work to stop only the three “bad root causes” to stop the rebirth process (AND cultivate *paññā*):** “*rāgakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan’ti*.” See “[WebLink: suttacentral: Sāmandaka Sutta – SN 39.1](#)”

- The path to *Nibbāna* involves the **reduction of the three immoral roots and the cultivation of the three mundane moral roots first. Then one must comprehend the Four Noble Truths and cultivate *paññā* or wisdom.** That is when one can turn *puñña kammā* to *kusala kammā*.
- To attain *Nibbāna*, one MUST be born in a good realm. Therefore, the first objective is to avoid births in the *apāyās*. The three bad roots (*lobha*, *dosa*, *moha*) are also called *kilesa* (or *keles* or impure) because they can lead to rebirths in the *apāyās*.
- Once one is born in a good realm (especially the human realm), one can learn the Noble Truths from a Noble Person (*Ariya*) and, with sufficient work, comprehend them. That will elevate mundane *amoha* to *paññā* gradually.

Paññā Is Not Mundane Amoha – It Is Comprehension of Noble Truths

7. Mundane *amoha* is just the absence of *lobha* (greed) and *dosa* (hate/anger.) The deeper (*lokuttara*) *amoha* is *paññā* (wisdom) comprehension of the Four Noble Truths (which is the same as comprehending *Paṭicca Samuppāda* or *Tilakkhaṇa*.) One would understand all three if one understands one of those three.

- **When one comprehends the Four Noble Truths, one will lose the desire to be reborn in the “good realms,” too.** That is the same as “seeing the *anicca* nature.” It is also the same as genuinely understanding how cultivating various types of *saṅkhāra* (with *avijjā*) leads to births among the 31 realms.
- **When one’s *paññā* becomes optimum at the *Arahant* stage, one’s MIND will not go through the “*upādāna paccayā bhava*” step in *Paṭicca Samuppāda* leading to ANY rebirth.** See “[Concepts of Upādāna and Upādānakkhandha](#).”

- That is why completing the eighth step of *Sammā Samādhi* in the Noble Eightfold Path enables one to get to the *Sammā Ñāṇa* stage (when *paññā* is optimized.) Then one attains *Sammā Vimutti* (complete release from this world), i.e., “*dasa aṅgehi samannāgato Arahant*.”

“*Kusala-Mūla Paccayā Saṅkhāra*” In *Kusala-Mūla Paṭicca Samuppāda*

8. When someone starts following the Noble Path, that *avijjā anusaya* will be removed in stages. Thus, at least some *puñña kamma* will be effectively become *kusala kamma*.

- That is why the type of *saṅkhāra* in the ***kusala-mūla Paṭicca Samuppāda*** are “***kusala-mūla paccayā saṅkhāra***.” Thus such *saṅkhāra* may be called “***kusala saṅkhāra***.”
- “*Kusala*” comes from “*ku*” + “*sala*,” or getting rid of immoral (“*ku*”). All *kusala kammā* involve the three “good roots” of *alobha*, *adosa*, *amoha*, AND comprehension of the Noble Truths.
- As we know, ***puññābhisaṅkhara*** come under “*avijjā paccayā saṅkhāra*” in ***Akusala-Mūla Paṭicca Samuppāda***. See #6 of “[Saṅkhāra – What It Really Means](#).”
- By *Arahanthood*, all *puñña kamma* would become *puñña kiriyā*. Since an *Arahant* would not have defilements, there is no *akusala* to deal with. Thus, any ***puñña kamma done by an Arahant*** becomes NOT a *kusala kamma* but a ***puñña kiriyā*** (just a good deed without *kammic* power.)

Difference Between *Puñña Kamma* and *Kusala Kamma*

9. Therefore, one can do *puñña kamma* without getting rid of *avijjā*, i.e., without cultivating *paññā*. Most people (not even Buddhists) give, have compassion for others, etc. Being a Buddhist (in particular, a Noble Person) is more than that. That is a crucial point to remember.

- Only Noble Persons (at or above the *Sotāpanna Anugāmi* stage) can do *kusala kamma*. That requires understanding the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*.
- Therefore, for Noble Persons (up to the *Arahant* stage), a ***puñña kamma*** effectively becomes a ***kusala kamma***.
- An *Arahant* has no *akusala* to remove. Thus any ***puñña Kammā*** by an *Arahant* becomes a ***puñña kiriyā*** (just a good deed without *kammic* power) as explained in #8.

Two Eightfold Paths

10. Before getting to the Noble Eightfold Path, one must follow the mundane eightfold path; see “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”

- Therefore, “good deeds” are done at two levels: within the mundane eightfold path, one can do *puñña kamma*. More and more of the same deeds become “*kusala kamma*” as one starts comprehending the Noble Truths; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#).”
- In other words, *puñña kamma* are “contaminated” to some degree, and they become more potent *kusala kamma* in the Noble Path with the increasing comprehension of *Tilakkhaṇa*.
- For example, in “mundane *alobha*,” one loses the craving for some things and is willing to share those with others. In “*lokuttara alobha*,” one loses craving by seeing the worthlessness of things in this world.

Until Comprehending Noble Truths, All *Kamma* Perpetuate the Rebirth Process

11. It is inevitable that even the most moral “average person (*puthujjano*)” WILL generate “bad *abhisāṅkhāra*” either during this life or in the future life until one REMOVES the three bad root causes from

the mind via comprehending *Tilakkhaṇa*. They remain as *anusaya* and come to the surface under suitable conditions.

- For example, X may see an enticing object, and greed (*lobha*) may come to his mind.
- But at another time, X may see a hungry person and buy that person a meal with MUNDANE non-greed (*alobha*), non-hate (*adosa*), and *amoha*.
- An *Arahant* has removed all six root causes. But he/she may provide a meal to a hungry person out of *paññā* (wisdom) — doing the appropriate thing; it is also called a *kiriya*, just action without *kammic* consequences.

9.5.1 Kamma and Paṭicca Samuppāda – Introduction

March 27, 2020

The uniqueness of Buddha Dhamma (Buddhism)

Kamma and *Paṭicca Samuppāda* are closely related, with *saṅkhāra* bridging the gap. We will get to the role of *saṅkhāra* in the next post.

1. Many Eastern religions (Buddhism, Hinduism, Jainism, Sikhism) believe in *kamma* and rebirth. So, what is the difference in Buddhism?

- *Abrahamic* religions do not believe in rebirth. But they also teach that the way to get to a state of permanent happiness is to live a moral life. That means one needs to do good *kamma* and avoid doing bad *kamma*.
- On the other hand, all religions other than Buddhism are based on finding a permanent existence of happiness in a heavenly world. **Buddha Dhamma does not promise sensory pleasures in a heavenly realm. Attachment to sensory pleasures is what leads to future suffering.**
- By the way, Buddhism is not a religion. It is a fully self-consistent world view. When one comprehends that world view, one can see a permanent solution to the problem of suffering.
- **Understanding the Four Noble Truths** first requires understanding that **suffering exists in the rebirth process**. That understanding will reveal three more truths at the same time. (i) The Causes of future suffering, (ii) that those causes CAN BE REMOVED, and (iii) the WAY to stop that suffering from arising. **Therefore, it is necessary to first understand the “previously unknown suffering” that the Buddha revealed to the world.**

2. Buddhism (Buddha Dhamma) says the following.

- (i) There is no existence in this world where suffering is absent permanently. There are existences in higher-realms that are almost suffering-free, but they also have limited lifetimes.
- (ii) Even if one does good deeds and lives a moral life, one can have bad future births because of *kamma* from previous lives.
- (iii) On the other hand, even if one has lived immorally in this life, it is possible to attain *Nibbāna* in this life.
 - **Those three points may not be clear. In the next few posts, I will address those issues.**
 - The answers to those questions will also clarify the following. **The Buddha taught that it is not a good starting point to insist on whether a “self” exists or not.** Instead, we need to start by investigating how future births (and thus future suffering) arise. Just like in science,
 - Like science, Buddha Dhamma is based on the Principle of Causality. Nothing can happen without causes. **Yet, NOT all causes inevitably lead to their outcomes.** That is a crucial point to understand too.

Causes and Conditions Bring Future Births

3. If all causes just lead to their consequences, then *kamma* would lead to deterministic outcomes. For example, some religions teach that immoral deeds WILL lead to their results. So, they try to find ways to remove existing bad *kamma*. That is what the Buddha also tried to do for six years while striving to attain the Buddhahood.

- **On the night of his Enlightenment, the Buddha discovered that causes could bring their effects (results) ONLY if the right conditions are there.** That is *Paṭicca Samuppāda*, the Principle of Causes and Conditions. But one must understand what those conditions are. That is why *Paṭicca Samuppāda* is a profound concept.
- By the way, *Paṭicca Samuppāda* pronounced, “*patichcha samuppaada*.” The way Pāli words are written is different from standard English; see, [“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and [“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#).”
- *Paṭicca Samuppāda* explains how causes lead to their effects UNDER suitable conditions. **Therefore, we do not need to remove past *kamma*. We can purify our minds so that CONDITIONS for those bad *kamma* to bring *vipāka* will be absent.** That is how Aṅgulimāla, who killed almost a thousand people, was able to attain the *Arahanthood*; see below.
- Since this principle of CAUSES and CONDITIONS is a crucial point, let us discuss this a bit more with that analogy of a seed.

An Example of the Requirement of Conditions

4. An apple seed has the POTENTIAL to bring an apple tree to life, so the CAUSE is there in the seed.

- Suppose one prepares a plot by preparing the soil, providing water, and plants the seed there. If sunlight is also available, the apple seed will germinate, and an apple tree will grow. Those are the necessary CONDITIONS for that apple seed to germinate and give rise to an apple tree.
- However, if one keeps the apple seed in a cool, dry place, it will not germinate, i.e., necessary CONDITIONS are not present in that case for an apple tree to come to life. After a long time, the seed will become a “dud” and will never be able to give rise to a tree.
- Furthermore, when an apple seed is planted, a mango tree will not result from that, only an apple tree. **The RESULT (*vipāka*) is according to the CAUSE (*kamma* or more specifically *kamma bīja*).**

Example From *Tipiṭaka* – The account of Aṅgulimāla

5. In the same way, someone who attains the *Arahanthood* may have done highly immoral deeds even in the present life. But he/she would have eliminated the CONDITIONS that can bring the results of those deeds to fruition.

- The account of Aṅgulimāla is a good example to illustrate this point. He had killed almost a thousand people. Thus he had done enough bad *kamma* to be born in the *apāyā* many times. Yet he was able to attain the *Arahanthood* in a few weeks! See, [“Account of Aṅgulimāla – Many Insights to Buddha Dhamma](#).”
- When one does a bad *kamma*, a *kamma bīja* (*kamma* seed) is created. Under suitable conditions, that *kamma* seed can “germinate” and lead to a new birth, just as a seed can lead to the birth of a plant. We will discuss how such a *kamma* seed is created by one’s powerful thoughts (*javana citta*.)
- However, unlike in the case of plant seed, even potent *kamma* CANNOT bring *vipāka* to an *Arahant* to bring rebirth. In the case of Aṅgulimāla, the strong bad *kamma* of killing almost a thousand people was done in the same life that he attained *Parinibbāna*. At his death, those *kammic* energies were there,

but his mindset would not grasp them, i.e., the “*upādāna paccāyā bhava*” step in PS would not take place.

- Of course, we need to discuss that last point in detail in the upcoming posts.

6. Furthermore, the result (if it manifests) is compatible with the *kamma*. That is analogous to only an apple tree arising due to an apple seed. *Akusala kamma* (an immoral deed) will only lead to a birth in the *apāyā*. It will not lead to a birth in the human realm or a higher realm.

- Similarly, a *kusala kamma* (a good deed) will not lead to a birth in the *apāyā*. It will only lead to a birth in a good realm.
- Most importantly, even if the causes are there, corresponding results (*vipāka*) would not materialize if necessary conditions are not fulfilled.
- We all have done uncountable *kusala* and *akusala kamma* in our previous lives. **We need to be mindful to make conditions for good *kamma* to bring their *vipāka* AND for bad *kamma* not to bring their *vipāka*.**
- So, we can see why both CAUSES and CONDITIONS play roles in our daily life and in the rebirth process.

“Self” and “No-Self” Are Misleading Concepts

7. We can get some insights about the concept of a “self” from the fact that an *Arahant* would not have a rebirth. **If a permanent “self” existed, it would be impossible for an *Arahant* to attain *Parinibbāna* and to end the rebirth process.** That means there was no everlasting “self” like a “soul” or an “*Atman*” or “*ātma*.”

- However, that *Arahant* was possibly born in most of the 31 realms uncountable times in the past. During a human existence, for example, there was a “self” living his/her life. He/she was making his/her decisions.
- When that *Arahant* was born an animal, it would have had the mindset of an animal. When born in a *Deva* realm, that *Deva* would have enjoyed sensual pleasures for a long time.
- **Therefore, the idea that there is “no-self” while one is living life does not make sense either.** There is obviously “a self,” making decisions about how to live life. Even a wild animal has to decide how to get the next meal.

8. We can summarize as follows. While we live this life, we cannot deny that we exist. On the other hand, the idea of a “self” is a temporary one. That “self” keeps changing even during life, but will change drastically when grasping a “new *bhava*.” Thus, it is also not correct to talk about an “everlasting self.”

- The “sense of a self” goes away entirely only at the *Arahant* stage. Until then, we need to try to comprehend WHY it is unfruitful to take anything in this world to be “mine.”
- That does not mean one needs to start giving away everything that one owns. We have responsibilities to fulfill. Furthermore, the “giving” and “letting go” will happen AUTOMATICALLY as the mindset changes. I have personally experienced that.
- **Another critical point is that having the “big picture” helps clarify many issues.** That may sound contradictory, but that is true. See, “[The Framework of Buddha Dhamma](#).”

The Bigger Picture of 31 Realms

9. As we discussed in many previous posts, our world is much more complicated than what we can experience with our limited senses. I will summarize some relevant key points to the current discussion.

- The 31 realms in our world belong to three types of “loka” or “worlds.” The “*kāma loka*” has 11 realms, including the human realm. There are 16 realms in “*rūpa loka*” where *rūpāvacara Brahmā* live. Then, there are four realms in “*arūpa loka*” for *arūpāvacara Brahmā*.
- Those higher-lying two *lokā* are the simplest. In those 20 realms, there is only *jhānic* pleasure. A human can experience all those by cultivating *jhāna*. The lower four *jhānā* correspond to the *jhānic* experiences of the 16 *rūpāvacara Brahma* realms. The higher four correspond to the four *arūpāvacara Brahma* realms. All those *Brahmā* do not have “dense bodies” like ours. Their “bodies” have very little matter. They are even harder to “see” than even *gandhabbā*.
- The remaining 11 realms are in the *kāma loka*. Sensory pleasures associated with eating, smelling, and body touches are available only in those 11 realms. Living beings in those 11 realms have relatively “dense solid bodies” or *karaja kaya*. There is a complex variety of “bodies” in *kāma loka*. We can see very high complexity even within the animal realm. In general, *Devā* in the six realms have “bodies” much lighter than ours but denser than *Brahma*.

What Leads to Rebirth in Different Realms?

This has answers from the close relationship between *kamma* and *Paṭicca Samuppāda*, where **saṅkhāra** plays a key role.

10. To be born in those higher 20 realms, a human must cultivate *jhānā*.

- It is not necessary to follow Buddha Dhamma to cultivate either type of *jhānā* and to be born in those higher 20 realms. *Anāriya* (or non-Noble) meditation techniques (breath and *kaṣiṇa* meditations) can be used to cultivate those *anāriya jhāna*.
- However, that birth in a *Brahma* realm lasts only for the duration of the life there. Then one will be born back in the *kāma loka* based on the strongest *kamma vipāka* that comes to the mind of that *Brahma* at the dying moment.
- Rebirths in various realms in the *kāma loka* are much more complex. We will discuss those in the next post, where we will discuss the role of *saṅkhāra*.

Summary

11. We have discussed other ways of looking at the basic principles in Buddha Dhamma before. See, for example, “[The Framework of Buddha Dhamma](#).”

- The above is a simple summary of yet another way. We will continue to explore the connection between *kamma* and *Paṭicca Samuppāda* in the next post.
- It is essential to grasp the basic framework from different “vantage points.” Then we can slowly get into more profound aspects.
- Reviewing the “bigger picture” from different angles is necessary to get an idea of the beginning-less rebirth process. The world is complex, and understanding it is like putting together a big jigsaw puzzle. It takes a real effort, but it becomes joyful when one gets some traction.
- Once one starts understanding the essential aspects, one will see the value of the Buddha, his *Dhamma* (teachings), and the *Sangha*, who understood this profound Dhamma and transmitted it faithfully over 2500 years. **That is the real faith** (*saddhā*.)
- All previous posts in the series at “[Origin of Life](#).”

9.5.2 Dhamma and Dhammā – Different but Related

December 30, 2022; revised January 2, 2023; July 21, 2023

Dhammā means to “bear or give rise to things in this world,” and Dhamma explains how. Buddha Dhamma explains how such *dhammās* arise and how to stop them from arising.

Introduction – Different Types of Dhamma

1. In the post “[Dhamma – Different Meanings Depending on the Context](#),” we briefly mentioned that Dhamma generally means “various teachings/principles about our world.” But most of the discussion was focused on Buddha Dhamma, the teachings of the Buddha.

- All other types of dhamma are “*lokiya* dhamma.” They express various viewpoints about the world.
- Most religious teachings say that a Supreme being created the world, a Creator God; if one lives a moral life, one will be born in a heavenly realm with a permanent existence. Otherwise, one will be born in hell for eternity. People who follow such teachings are “**theists**.”
- Others believe that life ends with the death of the physical body; there is no afterlife. Because they don’t believe in a Divine entity creating life, they are called “**atheists**.”
- **Buddha Dhamma** has a unique position away from both above worldviews. It says rebirth happens according to the merits of deeds (laws of *kamma*.) Furthermore, it says most rebirths lead to much suffering. That suffering-filled rebirth process can be ended by understanding the causes/conditions for rebirth and removing necessary conditions. The endpoint is *Nibbāna* with no more suffering. **Buddhists** do not belong to either of the above two camps.

Underlying Principles for Various Teachings/Worldviews

2. The idea of a Creator can neither be proven nor disproven. It is faith-based. According to that belief held by **theists**, the Creator created both the physical world and humans.

- **Atheists** believe that the physical body defines life and that our thoughts originate in the brain. When the physical body dies, that is the end of life. The world originated with the “Big Bang,” and life evolved from inert matter over billions of years.
- **Buddhists** believe that life arises due to causes and suitable conditions for those causes to lead to their corresponding effects. The world itself and each sentient being (not only humans) have existed for eternity, i.e., a beginning is not discernible. That is the natural conclusion for a theory based on cause and effect. There would be no “First Cause” as in the case of a Creator, where the Creator is the First Cause. The world does not arise without a cause as in the “Big Bang theory” either.

Three Worldviews – Details of the Theories

3. How do things (people, animals, plants, mountains, oceans, etc.) come into existence? A self-consistent worldview needs to explain that.

- The “**Creator theory**” is the easiest to state but impossible to verify. It says the Creator created the world and the humans in it. Of course, it cannot be proven scientifically.
- Atheists’ position on the origin of the material world is the “**Big Bang Theory**” proposed by scientists. It states that everything in the universe originated in a “Big Bang,” where all the matter came into existence some 15 billion years ago. However, scientists cannot explain what happened before or at the moment of the “Big Bang.” Furthermore, it says that sentient beings evolved from inert matter over time; but the transition from inert matter to living sentient beings with minds has not been explained.
- **Buddha Dhamma has a self-consistent theory.** Summarizing that worldview in a paragraph or even a single post is impossible.
- I have dedicated a section to discuss all three worldviews, where the worldview of the Buddha is discussed in detail. See “[Origin of Life](#).” I will extract some critical elements from that to elaborate on the topic of this post.

4. Now, we can see the main arguments of the theists and atheists against each other.

- **Theists** say that consciousness cannot and does not arise from inert matter in the brain (as claimed without proof by scientists.)
- **Atheists** argue that there is no proof that a Creator can create everything in this world, including living beings.
- **Buddha Dhamma** teaches that there is no Creator and consciousness does not arise from inert matter. However, no permanent entity like a soul goes to the next life. Everything in this world (including our rebirths) arises via *Paṭicca Samuppāda*, the Principle of Causation in Buddha Dhamma.
- All three worldviews are discussed in detail in the section “[Origin of Life](#).”

What Are “*Dhammā*” in the Three Worldviews (Dhammas)?

5. Buddha Dhamma is the teachings/worldview of the Buddha followed by **Buddhists**. They believe that “*dhammā*” or “*kammic energies*” bear things (inert and living) in this world.

- In that sense, Christianity, Judaism, Islam, and Hinduism are examples of other “religious Dhammas” followed by the **theists**. They are Christians, Jews, Moslems, Hindus, etc. Except for Hinduism, in other religions, the **Creator “bears everything in this world.”** Hinduism is a hybrid of a Creator (*Mahā Brahma*) but also believes in the laws of *kamma* (even though not the same as Buddhism.)
- Modern science is an example of a “non-religious Dhamma” followed by many **atheists**. In modern science, **laws of physics “bear things made of inert matter.”** How all that matter was created at the “Big Bang” is unresolved. Even though modern science can explain many material phenomena, it cannot explain the origin of consciousness either.

6. Let us briefly discuss some contradictions/implausibilities with the worldviews (Dhammas) of the **theists** and **atheists**.

- **Theists** say the world (the Earth) was created in a day and is supposed to remain forever. But we know the Earth will be destroyed in a few billion years. Also, the Creator only created only a man and a woman. Where did billions of other people come from? If only the DNA in the original couple is responsible (without each human having a soul,) where did the other souls come from? That is a direct contradiction to their view of an unchanging soul that survives death.
- **Atheists** say that mental phenomena arise in the brain. But they have not made ANY progress in providing evidence for that. Also, they cannot explain numerous Near-Death Experiences (NDE) tabulated by heart surgeons and other physicians. Of course, there are numerous rebirth accounts from countries worldwide. Also, they cannot explain how all these galaxies came into existence in one moment some 15 billion years ago in a “Big Bang.”
- I have discussed these in detail in “[Origin of Life](#).”

Dhammā – What “Bear” Things in the World

7. In Buddha’s detailed theory, “*dhammā*” (with a long “ā” and usually starting with a lowercase “d”) means “to bear things in this world.” For example, “*Ye dhammā hetuppabhavā*” means “those *dhammā* that sustain the rebirth process or *saṁsāra*.”

- See “[Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammam.](#)”
- ***Dhammās*** are *kammic* energies created by ***abhisāṅkhāra***. Such *dhammā* with *kammic* energies are created in *javana citta* while cultivating *abhisāṅkhāra*; see “[Javana of a Citta – The Root of Mental Power](#).”

- Such *kammic* energies are strengthened in the “*upādāna paccayā bhava*” step. Such *kammic* energies (also called *kamma bīja*) can bring *kamma vipāka* during a lifetime or lead to rebirths (*jāti*.) Thus, ***dhammā***, *kammic* energy, *bhava*, and *kamma bīja* are closely related.
- Those *dhammā* are the *kammic* energies we all have accumulated through the rebirth process. We accumulate *kammic* energies with the *Akusala-Mūla Paṭicca Samuppāda* process, starting with “*avijjā paccayā (abhi)saṅkhārā*.”

8. Such *kammic* energies are established in the “*upādāna paccayā bhava*” step, where the PS cycles loop back to the “*avijjā paccayā (abhi)saṅkhārā*” step repeatedly, thus initiating many PS cycles. It is good to understand the: “[Difference Between Tanhā and Upādāna](#).”

- Such *kammic* energies (also called *kamma bīja*) can bring *kamma vipāka* during a lifetime or lead to rebirths (*jāti*.) Thus, ***dhammā***, *kammic* energy, *bhava*, and *kamma bīja* are closely related.
- **Everything in this world arises based on “*dhammā*” based on various types of *adhamma*.** Buddha Dhamma or *saddhamma* does not give rise to *dhammā*. Instead, **Buddha Dhamma help neutralizes/deactivates the *dhammā* that “sustains the world of 31 realms.”**

***Dhammā* May Include Everything in This World**

9. *Dhammā* is a complex word that embeds different meanings in different contexts.

- The second meaning of *dhammā* is a watered-down version of “bearing something in this world.” The Buddha explained that to Ven. Ānanda in the “[WebLink: suttacentral: Ānanda Sutta \(SN 22.21\)](#).”
- For example, **our physical body or any other material object** (at present) bears the results of causes that led to its arising. The Buddha says: “*Rūpaṃ kho, ānanda, aniccaṃ saṅkhatam paṭiccasamuppannam khayadhammam veyadhammam virāgadhammam nirodhadhammam.*”

Translated: “Ānanda, any *rūpa* is of *anicca* nature, prepared (by the mind), originated via *Paṭicca Samuppāda* (PS,) is a *khaya dhamma*, a *vaya dhamma*, a *nirodha dhamma*.”

- That verse needs to be explained in detail. **By “*rūpa*,” the Buddha refers to the “mental image of an external *rūpa*.”** The word-by-word translation in the above link, as follows, is WRONG or INCOMPLETE: “Ānanda, form is impermanent, conditioned, dependently originated, liable to end, vanish, fade away, and cease.”
- We will discuss in detail what is meant by “*khayadhammam veyadhammam virāgadhammam nirodhadhammam*” in upcoming posts.
- For example, a *nirodha dhamma* can be stopped from arising. The five types of *dhamma* discussed in this *sutta* arise via *Anuloma* PS and can be stopped arising via *Paṭiloma* PS. All those entities stop arising at the *Parinibbāna* of an *Arahant*. See “[Patiloma Paticca Samuppāda – Key to Nibbāna](#)” and “[Distortion of Pāli Keywords in Paticca Samuppāda](#).”

10. Next, the Buddha states that any *vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa* arising at any moment are also *dhammā* since they “bear” the mental states at that time.

- Therefore, *rūpa*, *vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa* arising are also ***dhammā***.
- Note also that *dhammā* can be the plural of *dhamma*. **Also, note that Dhamma (not italicized and without a long “a”) refers to teaching or explanation.**
- In a series of *suttas*, “[WebLink: suttacentral: Aniccādisuttanavaka \(35.43–51\)](#),” the Buddha stated that **anything in this world (*sabba*)** is of *anicca*, *dukkha*, and *anatta* nature. Note that *dukkha* and *anatta* nature are listed below the main text on *anicca*. (By the way, “*Sabbam, bhikkhave, anattā*” is a direct statement that contradicts the interpretation of *anatta* as “no-self.” The translator translates that as “Mendicants, **all is not-self**. ...” in the English translation, there: “[WebLink: suttacentral:](#)

[Aniccādisuttanavaka \(35.43–51\).](#)” Does that make any sense? How can we talk about a “self” for any *rūpa*, including a tree or a rock? But that is not the topic of this post.)

Dhammā* Arising via *Abhisañkhārā* Responsible for All *Dhammā

11. As we saw in #9 and #10 above, the Buddha stated, “Ānanda, any *rūpa* (or *vedanā*, *saññā*, *saṅkhārā*, or *viññāṇa*) is of *anicca*, *dukkha*, *anatta* nature, prepared (by the mind), **originated via *Paṭicca Samuppāda* (PS)**, is a *khaya dhamma*, a *vaya dhamma*, a *nirodha dhamma*.“

- **All types of “secondary *dhammā*” (discussed in #9, #10) arise via the primary type of *dhammā* (*kammic* energy, *bhava*, *kamma bija*) created in *Paṭicca Samuppāda* (PS) processes.** These are the *dhammā* that bring *vipāka* via, “*manaṇca paṭicca dhamme ca uppajjati mano viññāṇaṃ*.” These *kammic* energies are created in *javana cittās* with *abhisañkhārā*.
- As we have discussed, three types of *abhisañkhārā* initiate the creation of *kammic* energies (*bhava*) that can give rise to existences in the 31 realms in *kāma loka*, *rūpa loka*, and *arūpa loka*. Any *rūpa*, *vedanā*, *saññā*, *saṅkhārā*, or *viññāṇa* arising in any realm have root causes in those *kammic* energies (*dhammā*.)
- A basic description at “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).” Many sections provide detailed explanations; see, for example, “[Basic Framework of Buddha Dhamma](#).” Also see various subsections in “[Paṭicca Samuppāda](#).”

9.5.3 **Difference Between *Dhammā* and *Sañkhārā***

Revised March 22, 2017; April 17, 2017; November 5, 2017; July 19, 2018; August 9, 2019; January 11, 2020; June 7, 2022 (#8); rewritten January 6, 2023; revised January 9, 2023 (Heading of #9)

We discuss *dhammā* and *saṅkhārā* in the context of “*sabbe saṅkhārā aniccā*, *sabbe saṅkhārā dukkhā*, and *sabbe dhammā anattā*.“

***Dhammā* May Include Everything in This World**

1. A word meaning different things in different contexts is common in any language. For example, in English, “I **object** to the ruling” and “Moon is an **object** in the sky” mean two different things for the word “**object**.” The word *dhammā* may mean somewhat different things.

- As pointed out in the post “[Dhamma and Dhammā – Different but Related](#),” *dhammā* may include **everything in this world, in general**; see #9 and #10 there. Also, see the three *suttas* on *anicca*, *dukkha*, and *anatta* starting with “[WebLink: suttacentral: Sahetuanicca Sutta \(SN 22.18\)](#)” explicitly stating that.
- Anything can exist only if there is energy to sustain its existence. In that sense, anything in existence is a “*dhammā*” and is “bearing the causes” that gave rise to it.
- Our physical bodies can live for only up to about 100 years. Our human *gandhabbas* (the mental body) may live for thousands/millions of years depending on the *kammic* energy acquired at the *paṭisandhi* moment of “grasping this human existence.” A star, like our Sun, may last billions of years.
- The shortest existing entity in this world is a *citta*. It lasts less than a billionth of a second. There must be a “seat of the mind” or a *hadaya vatthu* to provide energy to give rise to a *citta*.

2. Thus, any mental or physical entity that arises (*uppāda*) stays in existence (*thiti*) and dies (*bhaṅga*.) These entities are *rūpa* (alive or inert) and the mental states (*vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa*) associated with *rūpa* with sentient life. Those entities (*rūpa*, *vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa*) are, thus, also called *saṅkhata* (prepared.) See “[WebLink: suttacentral: Saṅkhatalakkhana Sutta \(AN 3.47\)](#).”

- (By the way, we NEVER experience a single *citta* but only experience trillions of *citta* (aggregates or *khandha*), even over a short time. Even seeing a *rūpa* happens one trace at a time, and we experience only *rūpakkhandha*. See “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”)
- Thus, in a way, all *saṅkhata* are *dhammā* in general.

Dhammā With Embedded Kammic Energy

3. **However, a specific type of *dhammā* (kammic energies arising via *abhisāṅkhāra*) is the root cause of all *dhammā***; see #11 of “[Dhamma and Dhammā – Different but Related](#).” That is a deeper meaning of *dhammā*, **the root cause of all *dhammā***.

- Those ***dhammās*** are the *kammic* energies we all have accumulated through the rebirth process. We accumulate *kammic* energies with the *Akusala-Mūla Paṭicca Samuppāda* process, starting with “*avijjā paccayā (abhi)saṅkhāra*.”
- Thus, **a specific type of *dhammā* (kammic energies arising via *abhisāṅkhāra*) is the root cause of all *dhammā***. They eventually lead to all *dhammā*, including those in #1.

4. The Buddha taught that everything in this world has eventual causes in mind: “[Manopubbangamā Dhammā](#).” The verse, “*manopubbangamā dhammā*” means “all *dhammā* in this world have mind as the precursor.”

- That is why the famous verse: “*Ye dhammā hetuppabhavā, Tesam hetum tathāgato āha; Tesañca yo nirodho, Evaṁvādī mahāsamaṇo*” captures the essence of the Four Noble Truths, as pointed out in the *Peṭakopadesa*, one of the three original commentaries included in the *Tipitaka*.
- See “[WebLink: suttacentral: 1. Ariyasaccappakāsanapathamabhūmi](#),” where I have pointed to that verse. It says that **the verse represents the Four Noble Truths** (*Tattha katamāni cattāri ariyasaccāni?*.)
- I have discussed that in the post “[Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammanī](#).”
- Now we have the proper background to examine three famous *Dhammapada* verses in proper context. They refer to **specific *dhammā*, the root cause of all *dhammā*, i.e., kammic energies arising via *abhisāṅkhāra***.

Famous Dhammapada verses

5. The following three sentences appear in the *Dhammapada* verses 277, 278, and 279:

- “***Sabbe saṅkhārā aniccā***” or “all *saṅkhāra* are *anicca* (they give rise to *saṅkhata* that we cannot maintain to our satisfaction in the long run). A deeper interpretation is that it is futile to seek a “permanent happy existence” in the rebirth process.
- “***Sabbe saṅkhārā dukkhā***” or “all *saṅkhāra* eventually lead to *dukkha* (suffering).”
- “***Sabbe dhammā anattā***” or “all *dhammā* generated via such (*abhi*)*saṅkhāra* are without substance (not fruitful) at the end.”

6. An often-asked question is **why the first two verses refer to *saṅkhāra* and the third to *dhammā***.

- That question is reasonable because, as we saw in #1 above, everything in this world has the three characteristics: *anicca*, *dukkha*, and *anatta*. Thus, in general, *saṅkhāra* is included in *dhammā* too. Therefore, “***Sabbe saṅkhārā anattā***” and “***Sabbe dhammā aniccā***” are also correct statements.
- The point here is to highlight the fact that it is fruitless to engage in *saṅkhārā* and to generate the specific type of ***dhammā*** with *kammic* energies to give rise to future existences! That is what we discussed in #3 above.
- Because of that implication, those three famous verses in #5 also appear in several *suttas*. See, for example, “[WebLink: suttacentral: Uppādā Sutta \(AN 3.136\)](#).” There it is emphasized that those three

statements are inviolable; they are *dhammaniyāma*: “Uppādā vā, bhikkhave, tathāgatānaṃ anuppādā vā tathāgatānaṃ, *ṭhitāva sā dhātu dhammaṭṭhitatā dhammaniyāmatā*” or “*Bhikkhus, whether a Buddha arises or not, these are the laws of nature that always hold.*”

Dhamma and Dhammā

7. We discussed Dhamma and *dhammā* in “[Dhamma and Dhammā – Different but Related](#).” The word “*Dhamma*” is related to “*dhammā*” (with a long “a” indicating plural.)

- First, “**Dhamma**” (with uppercase “D” and a short “a”) means “teaching.” Thus **Buddha Dhamma** is “**teachings of the Buddha**” or “teachings that can lead to *Nibbāna*” (“*bhava uddha*” or “stopping *bhava* and thus rebirth.”) See “[A Buddhist or a Bhauddhayā?](#)”
- “*Dhammā*” (with a long “a”) is a broad category meaning “to bear things in this world.”

8. Everything in this world arises based on “*dhammā*” (with *kammic energies*) created via various types of *adhamma*.

- **Buddha Dhamma or saddhamma** does not give rise to *dhammā*; instead, Buddha Dhamma help neutralizes/deactivate *dhammā*. We will address that below. In other words, *dhammā* are associated with anything in this world, and **Buddha Dhamma** help transcend this world and attain *Nibbāna*, “the deathless state.”
- A short *sutta*, “[WebLink: suttacentral: Dhamma Sutta \(AN 10.182\)](#),” clarifies **Buddha Dhamma or saddhamma** and *adhamma*. It says, “taking a life, stealing, abusing sense pleasures, speaking untruth, slandering, harsh speech, gossiping, greed, ill-will, wrong views” belong to *adhamma*. Those are *dasa akusala*; see “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma](#).” Abstaining from *dasa akusala* is *saddhamma*.
- Another short *sutta*, “[WebLink: suttacentral: Dhamma Sutta \(AN 10.138\)](#),” describes *adhamma* as: “Wrong views, wrong thoughts, wrong speech, wrong actions, wrong livelihood, wrong effort, wrong mindset, wrong *samādhi*, wrong understanding, wrong *vimutti*.” The opposite, *Sammā Dīṭṭhi* through *Sammā Vimutti*, is *saddhamma*.
- However, *saddhamma* with *Sammā Dīṭṭhi* through *Sammā Samādhi* has two versions followed by the mundane and Noble Eightfold Paths. Those on the Noble Path have comprehended “[Paṭicca Samuppāda, Tilakkhana, Four Noble Truths](#).”

Adhamma and Mundane Version of Saddhamma Give Rise to Rebirths

9. In the post “[Dhamma – Different Meanings Depending on the Context](#),” we discussed different types of Dhamma.

- (i) “*Deva dhammās*” bear energy to sustain a *Deva* existence (*bhava*.) Thus, if one lives with “*Deva Dhamma*” and accumulates “*Deva dhammā*,” one is likely to be born a *Deva*. Similarly, *manussa dhammā* and *Brahma dhammā*, for example, bear energies to sustain human and *Brahma* existences.
 - (ii) In the same way, if one lives an immoral life, according to “animal Dhamma,” one is likely to be born an animal; one living with *niraya dhamma* (engaged in killings, rapes, etc.) one can be born in a *niraya* (hell.) One would accumulate “*niraya, peta, asura, animal dhammā*” by living an immoral life or living by *adhamma*.
- The first category is “**mundane saddhamma**” per the “mundane eightfold path” mentioned in #8. The second category is *adhamma*.
 - It is essential to understand that any *dhammā* “bears and sustains” things in this world of 31 realms; see #1 above.

- Both categories do not lead to *Nibbāna*, but the first category is NECESSARY to cultivate the Noble Path to *Nibbāna*.

Dhammā With Kammic Energies Responsible for Rebirth

10. At the moment of death, a strong *kamma bīja* or a *dhammā* comes to the mind via “*manañca paṭicca dhamme ca uppajjati mano viññāṇaṃ*.” That new *viññāṇa* is the *paṭisandhi viññāṇa* for the new life; see, “[What are rūpa? – Dhammā are rūpa too!](#)”. (However, “*manañca paṭicca dhamme ca uppajjati mano viññāṇaṃ*” can also bring *kamma vipāka* and memories during a lifetime as well; those are the “general type of *dhammā*.”)

- Therefore, a new life is now formed due to potent *dhammā* (or *kamma bīja*) originated via *abhisankhāra*. This new lifeform is also a *saṅkhata* because it arose due to that *abhisankhāra*.
- Details at “[Icchā \(Cravings\) Lead to Upādāna and to Eventual Suffering](#)” and “[Difference Between Tanhā and Upādāna](#).”
- After *Arahanthood*, the **generation of *dhammā* with kammic energy stops** because the *Akusala-Mūla Paṭicca Samuppāda* process, starting with “*avijjā paccayā (abhi)saṅkhāra*,” would not operate for an *Arahant*. However, the “general type of *dhammā*” will bring *kamma vipāka* memories **until the death of an *Arahant***.
- That is why all *dhammās* are “*nīrodha dhammā*” or “***dhammā* that can be stopped from arising.**” Of course, that happens with the total elimination of *avijjā* and the stopping of *Akusala-Mūla Paṭicca Samuppāda* processes starting with “*avijjā paccayā (abhi)saṅkhāra*.”

Saṅkhārā Are Our Thoughts Leading to Speech and Actions

11. *Saṅkhārā* are involved in thinking, speaking, and acting based on our intentions, hopes, and dreams. It is essential to realize that ALL *saṅkhārā* are based on our thoughts.

- “*Saṅkhāra*” include all three types (*kāya saṅkhāra*, *vacī saṅkhāra*, *mano saṅkhāra*) that lead to any action, speech, or just thought (in that order). They all arise in *citta* (our thoughts).
- We say “hello” to someone with *vacī saṅkhāra*. If we walk from the living room to the kitchen to get a drink, that is done with *kāya saṅkhāra*. But those do not initiate *kamma vipāka* and are *kammically* neutral.
- But if such thoughts involve *lobha*, *dosa*, and *moha*, they become strong *saṅkhāra* (*abhisankhāra*.) More on *saṅkhāra* at “[Saṅkhāra – What It Really Means](#).”
- *Abhisankhāra* (potent or strong *saṅkhāra*) gives rise to *kamma bīja*, which belongs to the primary type of *dhammā*.

Buddha Dhamma Does Not Lead to New Dhammā

12. At the beginning of the post, I mentioned that “*dhammā*” bear everything in this world of 31 realms. In #9 above, we discussed how rebirths in other realms arise via different types of *dhammā* created by following corresponding paths or Dhamma.

- Any teaching/way of life other than Buddha Dhamma is based on attempts to seek happiness while remaining in this world of 31 realms.
- Most people don’t even go that far. They only seek happiness in this life. The basic idea for most people is to get a good education and a job. **That is all most people are concerned with.**
- Then there are “religiously motivated people” who believe in an afterlife and follow a religion seeking to be born in a heavenly realm. They believe that will be a permanent existence full of happiness. But there is a “theory” that explains any reasoning behind that belief.

- In contrast, Buddha Dhamma is a “self-consistent theory” that explains the reasoning. That analysis is in the *Sutta Piṭaka* in the form of an outline but is more thorough in the *Abhidhamma Piṭaka*. The *Abhidhamma* analysis is the ultimate “Grand Unified Theory” that Einstein was seeking. However, he was very much off the track since such analysis MUST be based on mental phenomena, not material phenomena.

Buddha Dhamma Leads to Stopping of Arising (*Nirodha*) of *Dhammā*

13. Buddha Dhamma teaches how to stop potent *dhammā* from bringing rebirths.

- As discussed above, *dhammā* are *kammic* energies created as *bhava* in the *Akusala-Mūla* (or *anuloma*) PS processes.
- Those processes are initiated by an *ārammaṇa* coming to mind via one of the sensory inputs. Such processes lead to the creation of new *dhammā* and the grasping of new *bhava* (existence) at the *cuti-paṭisandhi* moment, i.e., at the end of the current *bhava*.
- That process is reversed in the “[Paṭiloma Paticca Samuppāda – Key to Nibbāna](#)” leading to *Nibbāna*. Also, see “[Distortion of Pāli Keywords in Paticca Samuppāda](#).”
- As a Noble Person progresses through the *Sotāpanna*, *Anāgāmi*, and *Arahant* stages, the possibility of grasping existence in an *apāyās*, *kāma loka*, and all 31 realms are removed respectively. **Rebirth in any realm WILL NOT lead to the end of suffering.**

14. That is why it is “*bhava uddha*” (Buddha) Dhamma. Instead of creating new *dhammā*, a Noble Person strives to “stop the accumulation of new *dhammā*” and “de-energize” existing *dhammā*! **That is the correct meaning of “*nirodha dhammā*”** in #9 of “[Dhamma and Dhammā – Different but Related](#).”

- Stopping (*nirodha*) of any *saṅkhata* at the *Parinibbāna* of an *Arahant*. After that, nothing of this world can arise, and thus, ***Nibbāna is the asaṅkhata*** or the “unconditioned” as translated commonly. See the second half of the “[WebLink: suttacentral: Saṅkhatalakkhana Sutta \(AN 3.47\)](#).” ***Nibbāna*** does not arise due to causes and conditions; **it is what results** when all conditions to bring the results (*vipāka*) of past causes (*kamma*) are removed. **Those conditions are *lobha*, *dosa*, *moha*, and the mundane versions of *alobha*, *adosa*, and *amoha*.**
- Also, see “[Nirodha and Vaya – Two Different Concepts](#).”

9.5.4 Kāma Assāda – A Root Cause of Suffering

April 4, 2020; revised April 6, 2020; August 9, 2023

Kāma Assāda – Sensory Pleasures

1. ***Kāma assāda*, or simply “*kāma*,” means “sensory pleasures.”** See, “[What is “Kāma”? It is not Just Sex.](#)”

- We all like and crave sensory pleasures. An average human likes to eat tasty foods, smell perfumes, and experience soothing bodily contact, including sex. He/she also wants to see related objects and listen to related sounds. Thus, an average human enjoys such sensory events through all five physical senses.
- Besides, we also tend to endlessly think about such “pleasures” and how to get more of them. Thus, we use all six senses to “enjoy sensual pleasures.” **That leads to *kāma taṇhā*, one of the three types of *taṇhā*: *kāma taṇhā*, *bhava taṇhā*, *vibhava taṇhā*.**
- The Buddha pointed out that we are trapped in the suffering-filled rebirth process because of this tendency to value sensory pleasures or *kāma assāda*. That is another way to discuss the “previously unknown suffering” that the Buddha introduced in his first discourse, *Dhammacakkappavattana Sutta*. The dangers in *kāma assāda* stated there as one extreme way to live life, or “*kāmasukhallikānuyogo*.”

- It is important to note that Buddha rejected the opposite extreme, too (“*attakilamathānuyogo*.”) There is no need to force oneself to eat less or to eat not-tasty food, be subject to unpleasant bodily contacts, etc. The “middle way” is to live a simple life away from both extremes and to contemplate and comprehend the “true nature of this world 31 realms.”
- It is not easy to comprehend the bad consequences/danger (*ādīnava*) of *kāma assāda*. We will go through a systematic analysis.

Connection to the Previous Post

2. In the previous post (“[Difference Between Dhammā and Saṅkhāra](#)”), we discussed that causes (*kamma bīja*) are not enough to bring about their results (*kamma vipāka*.) Just because one has done bad *kamma* does not mean one will have to face adverse consequences, especially unfortunate rebirths. The same is true for good *kamma*.

- We all have done enough good and bad *kamma* to sustain the rebirth process over billions of years. However, even Aṅgulimāla, who killed almost a thousand people, was able to nullify that *kamma*. He did that by purifying his mind (attaining *Arahantship*) and removing *avijjā* and *taṇhā* that fuel the *Upapatti Paṭicca Samuppāda* process.
- That indirect way of “overcoming” a *kamma bīja* is called *kammakkhaya*. It does not destroy any previous *kamma bīja*. Instead, one would remove the conditions for such *kamma bīja* to “germinate.” As we know, the removal of *avijjā* will stop the tendency to attach to “worldly things” (*taṇhā*). Then, the “*upādāna paccayā bhava*” step in *Upapatti Paṭicca Samuppāda* will not take place. See “[Kanha \(Dark\) and Sukka \(Bright\) Kamma and Kammakkhaya](#).”
- The key message of the Buddha was that the rebirth process in “this world” is filled with suffering. When one comprehends that “hidden suffering” of “this world,” one will strive to overcome the rebirth process and attain *Nibbāna*.
- “This world” (“*ayaṃ loka*”) consists of three *loka*: *kāma loka* (with 11 realms,) *rūpa loka* (with 16 realms,) and the *arūpa loka* (with four realms.) As we know, at the *Sotāpanna* stage, one overcomes rebirths in the four lowest realms (*apāyā*.) Rebirths in all realms in *kāma loka* will stop at the *Anāgāmi* stage. At the *Arahanthood*, rebirths in all three *lokā* (i.e., in all 31 realms) will end, and *Nibbāna* realized.

Most Living Beings Are Trapped in the Four Lowest Realms (*Apāyā*)

3. Over 99% of the living beings are trapped in the four lowest realms (*apāyā*) in the *kāma loka*. It is extremely difficult to get rebirth in a higher realm.

- For example, there are less than eight billion people on Earth. But there are a million times more ants on Earth! **There are a trillion types of lifeforms on Earth**; see, “[WebLink: sciencealert.com: The Largest Study of Life Forms Ever Has Estimated That Earth Is Home to 1 TRILLION Species](#).” These are mind-boggling numbers! That is not counting the other three realms in the *apāyā* that we cannot see.
- While it is hard to get rebirth in the human and Deva realms, it is EVEN HARDER to get rebirths in *rūpa loka* and *arūpa loka*, collectively called *Brahma loka*. That is because one has to overcome (at least temporarily suppress) *kāma rāga* (craving for sensory pleasures) to be eligible for rebirth in a *Brahma* realm. If one can attain a *jhāna*, that means one has at least temporarily suppressed (during this lifetime) attachment to sensory pleasures, especially the desire for sex.
- That is why it is tough for most people to attain *jhāna*.

Easy to Describe and Hard to Imagine Life in the Two *Brahma Loka*

4. Those *Brahmā* do not need “solid, dense bodies” like ours since they have overcome the desire for physical touch, taste, and smell. Solid, dense bodies are required for those three sensory contacts.

- *Rūpāvacara Brahmā* still have cravings for seeing and listening. But those two functions can be achieved without dense bodies and just with the two corresponding *pasāda rūpa*. A *pasāda rūpa* is a *suddhaṭṭhaka* that is “energized” by *kammic* energy. A *rūpāvacara Brahma* also has *hadaya vatthu* (seat of mind), another “energized” *suddhaṭṭhaka*.
- Those living-beings in the highest *loka*, the *arūpāvacara Brahma loka*, have only the mind. They have given up the desire to see and hear as well. Thus, they have only *hadaya vatthu*, just a single *suddhaṭṭhaka*!
- It is not easy for an average human to even imagine such lifeforms. Only a Buddha can discover such details about the “wider world of 31 realms.”
- Anyway, the point is that it is much easier to explain the lifeforms in the highest 20 realms. Furthermore, they mainly experience *jhānic* pleasures. Therefore, even sensory experience is easy to explain. That was briefly discussed in the previous post, “[Kamma and Paticca Samuppāda – Introduction](#).”

Eleven Realms in *Kāma Loka* Are Very Complex – Simplest Are the *Deva* Realms

5. Compared to the higher-lying 20 *Brahma* realms, life in the 11 realms in *kāma loka* is very complex.

- The 6 *Deva* realms in the *kāma loka* are the simplest. They have *opapātika* births (instantaneous births) without a “growth stage” like ours. Even though they have all five physical senses, their “physical bodies” are much less dense, almost like the *gandhabbā*.
- As we have discussed, a *gandhabba* is born with a mental body that is similar to a *Brahma*. That means just with a *hadaya vatthu* and a set of *pasāda rūpa*. Then that *gandhabba* can absorb aroma (scents) and become a bit denser, but still cannot be seen by average humans. See, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).” A *Deva* is similar to a *gandhabba* with a “bit more dense body” than just the mental body.
- *Devā* enjoy sensory pleasures and do not experience significant bodily ailments or diseases. Thus, the main difference between them and *Brahmā* is while *Brahmā* enjoy *jhānic* pleasures, *Devā* enjoy sensual pleasures or *kāma assāda*.

Complexity Starts at the Human Realm

6. As we know, suffering is the highest in the lowest four realms including the animal realm.

- Therefore, the human realm is unique. Some humans enjoy life, almost like some *Devā*, without even any health problems. Then are others who suffer almost like some animals due to either financial or health issues. Furthermore, a human could cultivate *jhāna* and enjoy *jhānic* pleasures like *Brahmā*.
- *Brahmā* and *Devā* are content with their sensual or *jhānic* pleasures. It is mostly those who had attained *magga phala* as humans who are interested in following the Path. On the other hand, those in the *apāyā* do not have the mental capacity even to comprehend Dhamma.
- That is why the human realm is the best-suited to follow the Noble Path. Humans can comprehend Dhamma. Furthermore, other than relatively few, they do experience enough suffering to be motivated to think about the problem of suffering.
- In this and a few upcoming posts, we will focus more on the reasons for living-beings to be born in all these different realms. That will help us understand the critical principles of *Paṭicca Samuppāda*.

Overview of the Three *Lokā*

7. We know that causes are not ENOUGH to bring rebirths in respective realms, as discussed in the previous post, “[Kamma and Paticca Samuppāda – Introduction](#).” But causes are NECESSARY to bring rebirth in a given realm. Without a cause, there cannot be a rebirth in a given realm.

- As discussed in that post, one MUST cultivate a *jhāna* to get rebirth in a *Brahma* realm. A *rūpāvacara jhāna* leads to rebirth in one of 16 realms in the *rūpāvacara Brahma* realms (in *rūpa loka*). An *arūpāvacara jhāna* will lead to rebirth in an *arūpāvacara Brahma* realm (in *arūpa loka*).
- **Of the three types of loka, *kāma loka* is the “default loka” for living beings.** Living beings have cravings for sensory pleasures (*kāma assāda*), and that is *kāma rāga*. One who has very strong *kāma rāga*, and is willing to do immoral deeds to enjoy them, has *lobha*.
- Those with *lobha* also have a higher version of *paṭigha*, and that is *dosa*. One acting with *lobha/dosa* can do immoral deeds (*pāpa kamma*) and make *kamma bīja* suitable to bring rebirths in the *apāyā* (four lowest realms in *kāma loka*.)
- To summarize, *lobha/dosa* are strong versions of *kāma rāga/paṭigha*; see, “[Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā](#).”
- Those with *kāma rāga/paṭigha* are capable of engaging in moral actions (*puñña kamma*.) Such *puñña kamma* are the causes to bring “good rebirths” in the human realm or the six *Deva* realms.
- The bottom line is that living-beings in *kāma loka* have strong cravings for sensual pleasures (*kāma rāga*.) Until those cravings are removed, it is not possible to overcome rebirths in *kāma loka*.
- As we know, even a *Sotāpanna* has *kāma rāga*. Only an *Anāgāmi* has removed *kāma rāga*.

Craving for Sensory Pleasures Is the Root of Most Suffering

8. From the above discussion, it should be clear that suffering in the rebirth process can be attributed to the innate tendency of living-beings to crave sensual pleasures (i.e, to have *kāma rāga*.)

- When they do immoral deeds (*pāpa kamma*) in their pursuit of sensual pleasures, they build-up *kammic* energies (*kamma bīja*) to bring about rebirths in the *apāyā*.
- Even those who just enjoy sensual pleasures (without doing immoral deeds like killing, stealing, sexual misconduct, etc) cannot “escape” the realms in the *kāma loka*. This is clear in the “*taṇhā paccayā upādāna*” and “*upādāna paccayā bhava*” steps in *Paṭicca Samuppāda*.
- In order to overcome or transcend the *kāma loka*, one MUST lose the cravings for sensual pleasures or *kāma assāda*. I will try to use the term “*kāma assāda*” in the future since it relates directly to *kāma loka*. Here “*assāda*” means “pleasures” and thus *kāma assāda* are sensual pleasures (taste, smell, and touches, including sex.)

Dangers in *Kāma Assāda*

9. What we discussed above is an essential teaching of the Buddha that is hidden these days. **The Buddha described “*kāma assāda*” or just “*kāma*” to be very dangerous.**

- [Bhaya Sutta \(AN 6.23\)](#) says: “ ‘*Bhayan*’*ti*, bhikkhave, *kāmānametaṃ adhivacanāṃ*; ‘*dukkhan*’*ti*, bhikkhave, *kāmānametaṃ adhivacanāṃ*; ‘*rogo*’*ti*, bhikkhave, *kāmānametaṃ adhivacanāṃ*;..” OR “ ‘**Danger,**’ ‘**suffering,**’ ‘**disease,**’..are terms for **sensual pleasures.**”
- [Bhaya Sutta \(AN 8.56\)](#) says, “ ‘Danger’ is a term for sensual pleasures. ‘Suffering,’ ‘disease,’ ‘infected wound,’ ‘pierced by a spear,’ etc., are terms for sensual pleasures.” And why is ‘danger’ a term for sensual pleasures? Someone who is caught up in sensual greed and shackled by lustful desire is not freed from dangers in the present life or lives to come. That is why ‘danger’ is a term for sensual pleasures..”
- See the English translations there for more details.

- There are many *suttā* that emphasize the hidden dangers in *kāma assāda* or *kāma rāga*. For example, [*Mahādukkhakkhandha Sutta* \(MN 13\)](#), [*Cūladukkhakkhandha Sutta* \(MN 14\)](#), [*Cūladhammasamādāna Sutta* \(MN 45\)](#), and many others discuss the *ādīnava* or “bad and dangerous consequences of indulging in sensual pleasures, i.e., dangers of *kāma assāda*.”
- I have given the links to the Pāli versions of those *suttā* at Sutta Central. One can access translations to several languages, including English, by clicking on the “down arrow” above the name of the *sutta*.

10. We will make the connection of various types of rebirths to *saṅkhāra* and *Paṭicca Samuppāda* in the next post.

- More on *assāda* and *ādīnava* at, [“Assāda, Ādīnava, Nissarana.”](#)

9.5.5 Gati (Habits/Character) Determine Births – Saṃsappanīya Sutta

April 11, 2020

Gati (Habits/Character) is a key concept

1. *Gati* (Habits/Character) is a key concept that has been hidden for hundreds of years, just like the true meanings of *anicca* and *anatta*. I just did a search for the keyword “*gati*” on *Tipiṭaka* at the Sutta Central and came up with [“WebLink: suttacentral: 515 results of search for gati.”](#) At the end of the post, I will discuss one *sutta* as an example, which describes how one with “crooked *gati*” is a candidate to be “reborn crooked.”

- Any given person thinks, speaks, and acts based on his/her views. If started with wrong views, one tends to go in the wrong direction. That is why *Sammā Diṭṭhi* or “correct views” comes first in the Noble Eightfold Path.
- *Avijjā* and *micchā diṭṭhi* go together. See, for example, [“WebLink: suttacentral: Avijjā Sutta \(SN 45.1\).”](#)
- Any person will have a certain set of *gati* at a given time, based on *avijjā* and *micchā diṭṭhi* at that time. As one makes progress on the path, *avijjā* and *micchā diṭṭhi* will be reduced and one’s bad *gati* will be reduced too.
- *Gati* is a common Sinhala word with the same meaning as in Pāli, so it would be easier for a Sinhala-speaking person to understand this post (ගති. “බලපත්‍රය” නිවැරදිවනම් බලපත්‍රයක් ලබා ගන්නා බැවිනි.)
- The Buddha explained that if one cultivates “dog *gati*” that could lead to rebirth as a dog in the [“Kukkuravatika Sutta \(Majjhima Nikaya 57\) – Kammakkhaya.”](#)
- An introduction to *gati* at, [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\).”](#) Further information at, [“9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).”](#)
- It is also important to know the difference between standard English and “*Tipiṭaka* English.” See, [““Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)” and [““Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2.”](#)

Five Main Types of Gati

2. The Buddha explained that there are five main types of *gati*. The [WebLink: suttacentral: Gati Sutta \(AN 9.68\)](#): “*Pañcimā, bhikkhave, gatiyo. Katamā pañca? Nirayo, tiracchānayo, pettivisayo, manussā, devā—imā kho, bhikkhave, pañca gatiyo. Imāsaṃ kho, bhikkhave, pañcannaṃ gatīnaṃ pahānāya ... pe ... ime cattāro satipaṭṭhānā bhāvetabbā*”ti.”

Translated: “*Bhikkhus*, there are five character qualities (*gati*). What five? (Those belonging to) hell, the animal realm, the ghost realm, humans (*manussā*), and *Devā*. To eliminate those five types of *gati*, you should cultivate *Satipaṭṭhānā*.”

- In the [WebLink: suttacentral: Saṅgīti Sutta \(DN 33\)](#): “*Pañca gatiyo—nirayo, tiracchānayo, pettivisayo, manussā, devā*.”
- By the way, *Saṅgīti Sutta* provides definitions of many key Pāli words.
- It is to be noted that all six *Deva* and 26 *Brahma* realms are included in the *Deva* category in many *suttā*, including the *Dhammacakkappavattana Sutta*. See #7 of, “[Dhammacakkappavattana Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa](#).”

3. In many English translations, the Pāli word “*gati*” is mistranslated as “destination.” But the correct translation is “habits/character” as explained in detail in the links in #1 and also at #8 below. We can also see that in other *suttā*, for example, in the *Mahāparinibbāna Sutta* (DN 16.)

- In the [WebLink: suttacentral: 9. Anāvattidhammasambodhiparāyana \(DN 16\)](#) section of *Mahāparinibbāna Sutta*, Venerable Ānanda asks the Buddha about several people who had recently died: “*sālho nāma, bhante, bhikkhu nātike kālaṅkato, tassa kā gati, ko abhisamparāyo?*” OR “the monk named Sālha has passed away in Nāḍika. What is his *gati* (that led to the new birth) and **where has he been reborn?**”
- However, it is true that one with “bad *gati*” (or *dugati*), for example, will have a “bad destination” (or *duggati*.) Similarly, one with “good *gati*” (or *sugati*), will have a “good destination” (or *sugati*.) Note the subtle difference in *dugati* and *duggati*, whereas the same word “*sugati*” is used for both “*gati*” and “destination.”
- Now, let us look at the connections between *gati*, *saṅkhāra*, and rebirths in various realms.

Connection to *Paṭicca Samuppāda*

4. As we know, *Paṭicca Samuppāda* dictates future existences (*bhava*) and births (*jāti*.) One generates (*abhi*)*saṅkhāra* due to *avijjā* and engages in three types of *abhisāṅkhāra*. This was discussed in detail in the posts, “[Kamma, Saṅkhāra, and Abhisāṅkhāra](#)” and “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).” It is essential to understand those posts.

- As explained there, those three types of *abhisāṅkhāra* are, *Puññābhisāṅkhāra* (*puñña abhisāṅkhāra*), *apuññābhisāṅkhāra* (*apuñña abhisāṅkhāra*), and *āneñjābhisāṅkhāra* (*āneñja abhisāṅkhāra*.)
- Those lead to various types of rebirths, per *Paṭicca Samuppāda*.

5. We can understand the connection between those three types of *abhisāṅkhāra* and the five types of *gati*, in simple terms, as follows.

- *Apuñña abhisāṅkhāra* (in the mind) lead to the ten types of *akusala kamma* and thus lead to rebirths in the *apāyā*. In other words, such *kamma* committed by those with *niraya*, *tiracchāna*, and *peta gati*.
- On the other hand, one with *manussa* or *deva gati* does *puñña kamma* with *puñña abhisāṅkhāra*. They lead to rebirths in the human, *Deva*, and the 16 *rūpāvacara Brahma* realms. It is to be noted that cultivation of the four lower *jhāna* falls under *puñña abhisāṅkhāra*.
- *Āneñja abhisāṅkhāra* are cultivated while practicing the highest four *jhānā* leading to rebirths in the four *arūpāvacara Brahma* realms. It is interesting to note that “*āneñja*” means “un-dying” and thus “permanent.” Ancient *yogis* (including Ājāra Kālāma and Uddaka Rāmaputta) thought these realms have infinite lifetimes and equated rebirths there to the cessation of the rebirth process. Of course, the Buddha found out that those also have finite lifetimes, even though extremely long, lasting eons (billions of years).
- Also see, “[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka](#)” and #14 of “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#)”

Good Realms Are *Sugati* and Bad Realms Are *Duggati*

6. There are several *suttā* that discuss various types of behaviors that lead to good and bad rebirths. Those with “good *gati*” tend to reborn in “realms with good *gati*” or “*sugati*” (“*sukha*” + “*gati*.”) On the other hand, those with “bad *gati*” tend to reborn in “realms with bad *gati*” or “*duggati*” (“*dukkha*” + “*gati*.”)

- For example, see, “[WebLink: suttacentral: Dukkha Sutta \(AN 5.3\)](#),” “[WebLink: suttacentral: Dukkha Sutta \(AN 6.75\)](#),”

7. The last verse of the “[WebLink: suttacentral: Vinopama Sutta \(SN 35.246\)](#)” is informative: “*Evameva kho, bhikkhave, bhikkhu rūpaṃ samanvesati yāvatā rūpassa gati, vedanaṃ samanvesati yāvatā vedanāya gati, saññaṃ samanvesati yāvatā saññāya gati, saṅkhāre samanvesati yāvatā saṅkhārānaṃ gati, viññāṇaṃ samanvesati yāvatā viññāṇassa gati. Tassa rūpaṃ samanvesato yāvatā rūpassa gati, vedanaṃ samanvesato ... pe ... saññaṃ ... saṅkhāre ... viññāṇaṃ samanvesato yāvatā viññāṇassa gati. Yampissa taṃ hoti ahanti vā mamanti vā asmīti vā tampi tassa na hoti*”ti.”

Translated: “So too, *bhikkhus*, a *bhikkhu* investigates a *rūpa* to see the connection to *gati* in that *rūpa*, he investigates feelings to see the connection to *gati* in those feelings, he investigates a perception to see the connection to *gati* in that perception, he investigates *saṅkhāra* to see the connection to *gati* in that *saṅkhāra*, he investigates *viññāṇa* to see the connection to *gati* in that *viññāṇa*. Through those investigations, *whatever notions of ‘I’ or ‘mine’ or ‘I am’ had occurred to him before no longer occur to him.*”

- The Buddha described a living being as a “collection” of the five aggregates: *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. A living-being, in any of the 31 realms, arises due to a certain *paṭisandhi viññāṇa* cultivated with a certain *gati*.
- What this deep *sutta* is saying that when one understands the *Paṭicca Samuppāda* process, one would be able to “see” how various types of *gati* lead to **corresponding rebirths**.
- Now we will discuss the [WebLink: suttacentral: Saṃsappanīya Sutta \(AN 10.216\)](#) which explains how a human can be reborn a “creeping creature” like a snake. [*sappana* :[nt.] crawling. *saṃsappi* : [aor. of *saṃsappati*] crept along; crawled; moved slowly.]

Saṃsappanīya Sutta (AN 10.216)

8. In this *sutta*, the Buddha has explained that one who engages in *dasa akusala* has “**bad *gati***” or “*dugati*” or “crooked/bad character.” Such people are eligible for rebirth in “bad realms” or “***duggati***.”

- Similarly, one who abstains from *dasa akusala* has “**good *gati***” or “*sugati*” or “straight/good character.” Such people are eligible for rebirth in “good realms” or “***sugati***.”

I am going to skip some standard verses and translate (explain) the critical verses to provide the essence.

- “*Bhikkhus*, I will explain to you how creeping, crooked creatures like snakes are born in this world.”

“Crooked *Kamma*” Done With “Crooked *Gati*” Lead to “Crooked Births”

9. “And what, *bhikkhus*, is that explanation of the Dhamma on creeping creatures? *Bhikkhus*, living-beings are the owners of their *kamma*, the heirs of their *kamma*. **They have *kamma* as their origin, *kamma* as their bondage, bound to their *kamma*.** Whatever *kamma* they do, good or bad, they will inherit the corresponding *vipāka*.

- In the following, the numbers refer to each of the *dasa akusala*.

(1) “Consider **someone who destroys life**. He is murderous, bloody-handed, given to blows and violence, merciless to living beings. He is crooked in bodily actions, speech, and thoughts. His bodily *kamma*, verbal

kamma, mental *kamma* are all crooked. His ***gati* is crooked and his rebirth is crooked (*jimhā gati*, *jimhupapatti***, where “*jimhā*” is “crooked” and “*jimhupapatti*” is “*jimhā*” + “*upapatti*”).

- For one with a crooked *gati* and rebirth, I say, there is one of two destinations: either the exclusively painful hells or a species of creeping animal. And what are the species of creeping animals? The snake, the scorpion, the centipede, the mongoose, the cat, the mouse, and the owl, or any other animals that creep away when they see people.
- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

(2) “Similarly, someone takes what is not given ... (3) ... engages in sexual misconduct ... (4) ... speaks falsehood ... (5) ... speaks divisively ... (6) ... speaks harshly ... (7) ... indulges in idle chatter ... (8) ... is full of greed ... (9) ... has a mind of ill will and intentions of hate ... (10) ... holds the ten types of *micchā diṭṭhi*. He creeps along by body, speech, and mind. His bodily *kamma* is crooked ... His *gati* crooked and his rebirth is crooked....

- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

“Straight *Kamma*” Done With “Straight/Honest *Gati*” Lead to “Good Births”

10. “*Bhikkhus*, beings are the owners of their *kamma*, the heirs of their *kamma*. They have *kamma* as their origin, *kamma* as their relative, *kamma* as their resort. Whatever *kamma* they do, good or bad, they are its heirs.

(1) “Consider someone **who has abandoned the destruction of life**. With the weapons laid aside, conscientious and kindly, he dwells compassionate toward all living beings. He does not engage in crooked bodily actions, speech, and thoughts. His bodily *kamma*, verbal *kamma*, mental *kamma* are all straight. His *gati* are straight and his rebirth is straight (good.)

- For one with a straight *gati* and rebirth, I say, there is straight *gati* (***uju gati***; where “*uju*” means “straight”) and births (***ujupapatti***). They have rebirths in either pleasurable heavens or eminent families, such as those of affluent householders, families that are rich, with great wealth and property, abundant gold and silver, abundant treasures and belongings, abundant wealth and grain.
- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

(2) “Having abandoned the taking of what is not given, someone abstains from taking what is not given ... (3) ... abstains from sexual misconduct ... (4) ... abstains from false speech ... (5) ... abstains from divisive speech ... (6) ... abstains from harsh speech ... (7) ... abstains from idle chatter ... (8) ... is without longing ... (9) ... is of goodwill ... (10) ... holds correct views. He does not creep along by body, speech, and mind. His bodily *kamma* is straight ... His *gati* are straight and his rebirth is straight....

- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

“*Bhikkhus*, beings are the owners of their *kamma*, the heirs of their *kamma*. They have *kamma* as their origin, *kamma* as their relative, *kamma* as their resort; whatever *kamma* they do, good or bad, they are its heirs.

11. Again, it is necessary to understand the posts, “[Kamma, Saṅkhāra, and Abhisāṅkhāra](#)” and “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).”

9.6.1 Paṭicca Samuppāda – Introduction

October 4, 2021; revised August 31, 2022; rewritten March 4, 2023

Resources in the *Tipiṭaka*

1. In the “[WebLink: suttacentral: Saṃyutta Nikāya 12](#)” in the *Sutta Piṭaka*, there are over 100 *suttas* on *Paṭicca Samuppāda*. However, the first 70 are the more critical. The series starts with the “[WebLink: suttacentral: Paṭiccasamuppāda Sutta \(SN 12.1\)](#).” That first *sutta* introduces the terms in *Paṭicca Samuppāda*, and the second one, “[WebLink: suttacentral: Vibhaṅga Sutta \(SN 12.2\)](#)” provides brief descriptions of the terms in *Paṭicca Samuppāda*.

- Of course, many other vital *suttas* and sections spread over the whole *Tipiṭaka* because it is the essence of Buddha Dhamma. For example, “[WebLink: suttacentral: Mahānidāna Sutta \(DN 15\)](#)” is a key *sutta* on *Paṭicca Samuppāda*.
- To get to deeper explanations, one needs to refer to the “[WebLink: suttacentral: Paṭiccasamuppādavibhaṅga \(Abhidhamma Vb 6\)](#)” in “*Vibhaṅga Pakaraṇa*,” one of the three original Commentaries included in the *Tipiṭaka*. As usual, SOME of the English translations there are NOT correct. Of course, the original Pāli versions (in English letters) are accurate.
- The Commentary, *Visuddhimagga*, written (much later, around 450 CE) by Ācariya Buddhaghosa is completely inadequate. It only discusses the *Akusala-mūla Uppatti Paṭicca Samuppāda* and does not even discuss the *Kusala-Mūla Paṭicca Samuppāda*. In brief, the *Akusala-Mūla Uppatti Paṭicca Samuppāda* explains how different types of births arise in the rebirth process and the *Kusala-Mūla Paṭicca Samuppāda* explains the way to stop the rebirth process and attain *Nibbāna*.

A Novel Approach

2. I have discussed *Paṭicca Samuppāda* in the section “[Paṭicca Samuppāda](#).” I want to take a different approach in this series, hopefully providing new insights.

- Almost all explanations of *Paṭicca Samuppāda* follow the standard sequence starting with “*avijjā paccayā saṅkhāra*.” That is because the main cause for the rebirth process is *avijjā*, and its result is suffering (the last step in *Paṭicca Samuppāda*, i.e., “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*”). As we have discussed, the rebirth process and all that

suffering arise due to ignorance of the Four Noble Truths/ *Tilakkhaṇa/ Paṭicca Samuppāda*; see, [“Buddha Dhamma – Noble Truths, Paṭicca Samuppāda, Tilakkhaṇa.”](#)

- However, in real life, we don’t start acting with *avijjā* without reason. Our unwise actions ALWAYS begin based on an *ārammaṇa* that comes through one of the six senses.

Mind “Turns On” With an *Ārammaṇa*

3. Our minds are inactive if we are unconscious or deeply asleep. While in a deep sleep, we are unaware of the “world” around us. But, of course, we are still alive and our bodies are kept alive by *kammic* energy.

- We take action in response to an external stimulus called an *ārammaṇa*. Some actions are “morally bad,” some are “morally good” and others are “neutral.”
- An *ārammaṇa* can come in on its own. For example, while walking we may see and hear various things. Most are “neutral,” and we ignore them.
- But if we see something “eye-catching” we may even stop and look at it. If we hear a loud noise, we may walk away from it. In such cases, we take action based on such an *ārammaṇa*.
- The inputs coming through the five physical senses are easy to recognize. But many *ārammaṇa* come through the mind itself. For example, thoughts about memory a future plan may come to mind. We may act on those too. For example, if thoughts about meeting a friend last week or a planned activity for tomorrow may come to mind while waiting to fall asleep. We may act on those too. For example, if thoughts about an old friend come to mind, one may decide to call that friend.

What Happens When an *Ārammaṇa* Brings a Sensory Input?

4. It is helpful to see how the Buddha described what happens when an *ārammaṇa* comes to mind. That will help our analysis of how a *Paṭicca Samuppāda* process is initiated.

- If we see something while walking, our eyes capture an image of a particular object, say a person (X.) It just happened because that person was also walking on the road. Even though the eyes capture that image, it is not the eyes that “see” that person. It is our mind that “sees.” We don’t need to understand the details, but here is what happens: The image of person X captured by the eyes is processed by the brain and then transmitted to the *cakkhu pasāda rūpa* in the “mental body” or the *gandhabba*.
- At the SAME MOMENT the *cakkhu pasāda rūpa* (abbreviated as “*cakkhu*”) receives such an image from the brain, it passes that image (called “*rūpa*”) to the seat of the mind, *hadaya vatthu*. That is how the mind becomes aware of that person X, i.e., how a “*cakkhu viññāṇa*” arises.
- That interaction between the *cakkhu* and a *rūpa* leading to the “awareness of an external object” is written in Pāli as, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam*.” For details, see the post, [“Phassa \(Contact\) – Contact With Pasāda Rūpa.”](#)
- **Don’t be discouraged by these Pāli words.** Try to get the basic idea. **The main point is that “seeing” does not happen in the physical eye. The mind sees (not the eyes and not the brain)!**

5. The Pāli verse, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam*” is commonly translated as, “eye-consciousness arises dependent on the eye and sights.” But we must remember that the “contact” is NOT between the PHYSICAL EYES and the PHYSICAL OBJECT (a person in our above example.)

- In that verse, “*cakkhu*” refers to the *cakkhu pasāda rūpa* and “*rūpa*” refers to the “image of person X” (formed by the brain based on the image received from the physical eyes.) The “meeting of the *cakkhu* and *rūpa*” is indicated by “*paṭicca*” in the above verse, which leads to the mind “seeing an image of person X” (*cakkhu viññāṇa* or eye-consciousness).
- Therefore, there are a few CRITICAL things to remember: “*cakkhu*” is not physical eyes; “*rūpa*” is not the actual object (a person in this example); “*cakkhu viññāṇa*” does not arise in the eyes or the brain or

even in the *cakkhu pasāda rūpa* (*cakkhu*.) That *cakkhu viññāṇa* (eye-consciousness) arises in one's mind!

- The other processes involving ears, nose, tongue, and the physical body (touch) must be understood similarly.

Two Meanings of *Paṭicca*

6. The Pāli word “*paṭicca*” has TWO possible meanings, depending on the context. The term “*Paṭicca Samuppāda*” means “getting attached willingly” or “*paṭi*” + “*icca*” (“*paṭi*” means to “bind.”) See “[Paṭicca Samuppāda – “Pati+ichcha” + “Sama+uppāda”](#)”

- However, in the above verse, *paṭicca* [*paṭi* + *ca* = bind + and = and bind = in dependence] implies “**two entities (that are compatible) making contact.**” A *rūpa* does not “make contact” with one of the other four *indriya* like “*sota pasāda rūpa*” or “*ghāṇa pasāda rūpa*.” Similarly, a sound (*sadda*) does not “make contact” with “*cakkhu pasāda*” or “*ghāṇa pasāda*.”
- In the “[Samyojana Sutta \(SN 44.9\)](#),” the Buddha explains the second meaning: “*Seyyathāpi, bhikkhave, telaṇca paṭicca vaṭṭiṇca paṭicca telappadīpo jhāyeyya*” OR “*Bhikkhus, an oil lamp burns in dependence on oil and a wick (oil getting soaked in the wick).*” An old-fashioned oil lamp has a wick partially immersed in oil. That oil soaks the wick gets to the burning wick's tip, and sustains the flame. Therefore, oil and wick are compatible and will “*paṭicca*.” If one puts a “wick made out of the plastic” in oil, the oil will not soak the plastic, i.e., they are incompatible and thus would not “get together” or *paṭicca*.
- Now let us return to our example of “seeing a person.”

Cakkhu Viññāṇa Is More Than Just “Seeing”

7. Suppose that person X is a friend. The moment we see person X, we identify him. Think about it. It does not take more than a split second to identify X. How does that happen?

- A complex process happens in mind during the event of “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇam*.” **That process happens in that single *citta* which lives only for less than a billionth of a second.** Only a Buddha can discern something that can happen that fast. We can verify that to be true only by seeing that it is compatible/consistent with nature.
- **The mind needed to compare it with previous experiences to identify X as a friend.** Otherwise, how would it identify person X?
- It is possible because the mind can access our memories “stored” as the five aggregates (*pañcakkhandha*)! To understand that process, one must understand the “[The Five Aggregates \(Pañcakkhandha\)](#)” (see the first six posts there) and “[Where Are Memories “Stored”? – Connection to Pañcakkhandha.](#)”
- As we have discussed, the mind can access our past experiences and future hopes (within an unimaginably short time.) *Rūpakhandha* is of 11 types, including “past *rūpa* we have experienced” and the same is true for the other four aggregates: *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*. The mind can scan our memories/hopes and IDENTIFY the sense object (we have had prior experiences with it). That is how the mind identified person X as “a friend.” **The amazing thing is that it happens so fast.** See, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”
- Further details and examples in “[Pañcupādānakkhandha – Arises With an Ārammana.](#)”

References in the Chart

Ref. 1: “[What Did the Buddha Mean by a “Loka”?](#)”

Ref. 2: Rest of the posts in the subsection: “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).”

- That should be enough to get to at least the *Sotāpanna Anugāmi* stage.

9.6.2 What Did the Buddha Mean by a “Loka”?

October 11, 2021; revised March 4, 2023

By the word “*loka*” the Buddha did not mean only the “physical world” we can experience. He meant various types like *kāma loka*, *rūpa loka*, *arūpa loka*, *manussa loka*, *Deva loka*, etc. [*Loka* means the 31 realms of existence.]

Introduction

1. In the previous post, “[Paṭicca Samuppāda – Introduction](#),” we started a new discussion on *Paṭicca Samuppāda*. In the [WebLink: suttacentral: Sāmyutta Nikāya 12](#) in the *Sutta Piṭaka*, there are over 100 *suttas* on *Paṭicca Samuppāda*.

- Recently I realized that these *suttas* are in a particular order. Even though it is impossible to discuss all those *suttas*, it is beneficial to see the progression of *suttas* there to get some key insights. Furthermore, I will discuss only those *suttas* relevant to our ongoing discussion on the connection between *Paṭicca Samuppāda* and *Tilakkhaṇa* (and the Noble Truths.)
- In the previous post, I pointed out that the first two *suttā* briefly introduce *Paṭicca Samuppāda*. See “[Paṭicca Samuppāda – Introduction](#).”

2. The third *sutta*, “[WebLink: suttacentral: Paṭipadā Sutta \(SN 12.3\)](#)” points out that the steps in the standard *Akusala-mūla Paṭicca Samuppāda* describe unwise actions (starting with “*avijjā paccayā saṅkhāra*”) that lead to future suffering (“*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*”). Therefore, it describes an average human’s ***micchā paṭipadā* (immoral practices/way of living)**. Such future suffering can be stopped by stopping the steps in *Akusala-Mūla Paṭicca Samuppāda*. That is accomplished by cultivating wisdom (knowledge of the Noble Truths) and removing *avijjā*. Once one understands the true nature of this world (*Tilakkhaṇa*) at the *Sotāpanna* stage, one will follow ***sammā paṭipadā* (correct practices/way of living)** or the **Noble Eightfold Path** to get to *Nibbāna*.

- Then there are seven *suttas* (SN 12.4 through 12. 10) that describe how most recent 7 Buddhas discovered how future suffering arises via the *Paṭicca Samuppāda* process, i.e., why an average human follows the ***micchā paṭipadā***. (The teachings of a given Buddha last only a limited time. That is why each Buddha must discover this process independently.) Of course, simultaneously, each Buddha figures out how to stop future suffering in the rebirth process, i.e., ***sammā paṭipadā***.
- The following *sutta* in the series (of interest to the present discussion) clarifies a “*loka*.” In almost all English translations, “*loka*” is translated as “world” and gives the impression that the Buddha meant the “physical world around us” or even “the universe with its stars, planets, galaxies, etc.” **But the Buddha meant something broader, as we see below.**

Kaccānagotta Sutta (SN 12.15) – “*Loka*” Is Not the “Physical World”

3. The “[WebLink: suttacentral: Kaccānagotta Sutta \(SN 12.15\)](#)” provides the first clues. Venerable Kaccānagotta asks the Buddha what is meant by “*sammā diṭṭhi*” and the Buddha explains in the following way: “*Dvayanissito khvāyaṃ, kaccāna, loko yebhuyyena—atthitañceva natthitañca.*”

- The world (*loka*) arises mainly based on two extreme views:
 - (i) the world lasts forever (*atthitañca*), and
 - (ii) the world ends at the death of the present physical body (*natthitañca*.)

- Here the Buddha is NOT talking about the physical world with stars, planets, galaxies, etc. He is referring to the existence of a living being. Just like these days, people mainly had two extreme views: (i) a living being exists forever (i.e., the belief of a “soul” or “*ātman*”), and (ii) “one’s world” (*loka*) ends at the death of the physical body (the materialistic view of today).

4. Then the Buddha explains that both those views are incorrect. A living being will exist (within the 31 realms) as long as the (*Akusala-Mūla*) *Paṭicca Samuppāda* process is in effect and thus exists in a “*loka*.” Of course, most existences are filled with unbearable suffering. And that will not end until that living being starts comprehending the Four Noble Truths (or *Tilakkhaṇa* or *Paṭicca Samuppāda*) and becomes a *Sotāpanna*.

Thus the Buddha almost always used the word “*loka*” to refer to the “world of a living being.” The next verse in this *sutta* also confirms that: “*Taṇhāyaṃ upayupādānaṃ cetaso adhiṭṭhānaṃ abhinivesānusayaṃ na upeti na upādiyati nādhīṭṭhātī: ‘attā me’ti. ‘Dukkhamēva uppajjamānaṃ uppajjati, dukkhaṃ nirujjhamānaṃ nirujjhatī’ti na kaṅkhati na vicikicchati aparapaccayā nāṇamevassa ettha hoti. Ettāvataṃ kho, Kaccāna, sammā diṭṭhi hoti.*”

Translated: “But someone with the right view does not cling to existence. **He does not see any benefit of existence in this world, i.e., anything in this world is of no value (and thus should be considered mine or ‘attā me’ti).** He has no perplexity or doubts that what arises is only suffering; what ceases is only suffering. In this way, Kaccāna, there is CORRECT VIEW.”

5. The verses at the end of the *sutta* provide further confirmation:

“*Sabbam atthī’ti kho, kaccāna, ayameko anto. ‘Sabbam natthī’ti ayam dutiyo anto.*

Ete te, kaccāna, ubho ante anupagamma majjhena tathāgato dhammaṃ deseti:

– ‘*avijjāpaccayā saṅkhārā; saṅkhārapaccayā viññānaṃ ...pe... evametassa kevalassa dukkhakkhandhassa samudayo hoti.*

– *Avijjāya tveva asesavirāgaṇirodhā saṅkhāraṇirodho; saṅkhāraṇirodhā viññāṇaṇirodho ...pe... evametassa kevalassa dukkhakkhandhassa nirodho hotī’ti.*

Translated:

“ ‘**All exists**’: Kaccāna, that is one extreme. ‘**All does not exist**’: that is the second extreme.

Without veering towards either of these extremes, the *Tathāgata* teaches the Dhamma by the middle:

– ‘With *avijjā* as condition, *saṅkhāra* arise; with *saṅkhāra* as condition, *viññāṇa* (and the rest of steps in PS).... Such is the origin of this whole mass of suffering.

– But with the remainderless fading away and cessation of *avijjā* comes the ending of *saṅkhāra*; with the cessation of *saṅkhāra*, cessation of *viññāṇa* (and the rest of steps in PS).... Such is the end of this whole mass of suffering.”

- Also, note that the Buddha has defined “**all (*sabba*)**” as “**all that pertains to a living being**,” i.e., the five aggregates/twelve *āyatana*/six *dhātu*/etc. Thus, by “all,” he did not restrict to the physical world (that is, of course, a part of “all”). The five aggregates/twelve *āyatana*/six *dhātu*/etc. include the physical and mental worlds. See, “[WebLink: suttacentral: 256 results for kiṇca AND sabbam.](#)”
- But in a *sutta* elsewhere in the *Tipiṭaka*, the Buddha did discuss the “physical world” too.

***Rohitassa Sutta* (AN 4.45) – A Sutta That Addresses the “Physical World”**

6. In the “[WebLink: suttacentral: Rohitassa Sutta \(AN 4.45\)](#)” *Rohitassa Deva* comes to the Buddha and asks whether it is possible to “travel to the end of the physical world.” Buddha answers that it is not possible. The *Rohitassa* says he had confirmed that in a previous life where he had developed *abhiññā* powers as a

yogi. With his *manomaya kāya* (*gandhabba*-like), he could travel the distance from one ocean to another in one stride. One day, he decided to see the “end of the world.” He said he traveled for a hundred years and died on the way.

Then the Buddha makes the following deeper point: “*Yattha kho, āvuso, na jāyati na jīyati na mīyati na cavati na upapajjati, nāhaṃ taṃ gamanena lokassa antaṃ ñāteyyaṃ daṭṭheyyaṃ patteyyaṃ’ti vadāmi. Na cāhaṃ, āvuso, appatvāva lokassa antaṃ dukkhassa antakīriyaṃ vadāmi. Api cāhaṃ, āvuso, imasmiṃyeva byāmamatte kaḷevare sasaññimhi samanake lokaṃ paññāpemi loka samudayaṃ loka nirodhaṃ loka nirodhagāminiṃ paṭipadanti.*”

- **The following is the concept described by the Buddha in the above verse:** “Without attaining *Nibbāna*, it is not possible to get to an “end of the world” by traveling. **Until the suffering (associated with the rebirth process) is ended, one cannot reach the “end of this world.”** For it is in this physical body with its *manomaya kāya* with perception and mind (*sasaññimhi samanake*) restricted to moment-to-moment arising (*byāmamatte*) **that I declare the arising and cessation of this world** and the practice that leads to its cessation.”

7. Modern science admits that it cannot find “an edge to the universe.” The size of the universe is genuinely mind-boggling. The furthest a human has traveled in outer space is to the Moon. It is doubtful that humans can travel to even the nearest star system anytime soon or probably ever.

- Distances between stars are too large to be measured in km or miles. Such vast distances are calculated in “light-years.” One light-year is the distance traveled by light in a year. The closest star to us is over four light-years away, **meaning it will take a light beam over four years to travel to that star.**
- **For comparison, the distance to the Moon is only about 1.3 light-seconds!** (Meaning it takes only 1.3 seconds for Moonlight to reach the Earth). Of course, our fastest rockets take about three days to get to the Moon. Such a rocket will take over 80,000 years to get to the vicinity of the nearest star! You can Google that to verify.
- Then there are billions of stars in our galaxy and billions of such galaxies in the universe. There is no way to count all galaxies, and there may not even be a limit!
- That is why the Buddha said there is no point in investigating the physical universe. We will NEVER be able to even fully explore the closest stars and their planets, let alone the whole universe.

“Loka” Is One’s World!

8. Therefore, it is critical to understand that when the Buddha referred to “*loka*,” he meant the existence of a living being.

- That is why the Buddha only talked about various types of *loka* encompassing the 31 realms: In one category, we have *kāma loka*, *rūpa loka*, and *arūpa loka* with 11, 16, and 4 realms, respectively. Within the *kāma loka*, there are various “*lokā*”: *manussa loka* (human world), *peta loka* (loka of hungry ghosts), *Deva loka*, etc. The 20 realms in *rūpa loka* and *arūpa loka* are all inhabited by *Brahmas* and thus are commonly known as *Brahma loka*.
- A living being WILL ALWAYS live in one of those “worlds” until *Parinibbāna* is attained (the death of an *Arahant*.) Thus, the “world” does not cease to exist until then.
- **Thus, we can also see that “cessation of the world” is the same as *Nibbāna*.**

What Are “Loka Samudaya” and “Loka Nirodha”?

9. When the current existence (say, human existence) ends, that is the end of the current “human *bhava*” in the “*manussa loka*.” But all of us (who are not *Arahants*) still have many accumulated *kammic* energies to “power up” different types of “*bhava*” for different kinds of “*loka*.”

- For example, that human may grasp a “*Deva bhava*” and thus be born in a “*Deva loka*.” Someone who has cultivated *jhāna* will grasp a “*Brahma bhava*” and thus be born in a “*Brahma loka*.” Yet another who had killed a parent will grasp a “*niraya bhava*” and be born in a “*niraya*.” For each of them, that will be their “*loka*” until that *kammic* energy runs out.
- However, there will always be many possible *bhava* for any average living being. We all have accumulated many such “seeds” in our past lives and maybe even a few in this life. That is why there is no end to this process until *Arahanthood*. The creation of such a *kammic* energy (to power up a new *bhava*) is the “arising of a “*loka*” or “*loka samudaya*.”
- That “*loka samudaya*” takes place via the *Akusala-Mūla Paṭicca Samuppāda* process. It describes how such *kammic* energies accumulate via acting with *avijjā*. We will continue that discussion in the next post.
- Accumulation of new *bhava* (and grasping such accumulated *bhava*) will stop at the *Arahant* stage. Then no more existences in any realm in the *loka*, and that is “*loka nirodha*” or *Nibbāna*. We will get to that discussion on the *Kusala-mūla Paṭicca Samuppāda* process later.

Paṭicca Samuppāda, Tilakkhaṇa – Details of Four Noble Truths

10. One cannot fully comprehend the Four Noble Truths without understanding *Paṭicca Samuppāda*. *Tilakkhaṇa* provides another way of looking at the same concepts.

- All the posts in this subsection are at “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths.](#)”

9.6.3 Future Suffering (*Loka/Dukkha Samudaya*) Starts With Sensory Input (*Ārammaṇa*)

October 18, 2021; revised March 4, 2023

As pointed out in many *suttas*, future suffering (*Loka/Dukkha Samudaya*) starts with sensory input (*ārammaṇa*). We specifically discuss the *Loka Sutta* and the *Dukkha Sutta* as part of our discussion of the *suttas* in *Saṃyutta Nikāya* 12 on *Paṭicca Samuppāda*.

Previously Unheard Dhamma – Arising of Suffering Same as Arising of the World

1. I have emphasized this before. However, this is so contradictory to our perception of the world that I need to repeat it.

- **An average person has a wrong “*nicca view/perception*”** that one can succeed and be happy by striving to “make money and acquire things of worldly value” such as houses, cars, etc. That is because our time horizon is VERY short.
- Some people believe that there is no afterlife. Most of those who may believe in rebirth are too busy living this life. Both those groups focus on “enjoying life while it lasts.”
- However, the Buddha pointed out that we will be reborn, and MOST of the future existences are guaranteed to be “filled with much suffering.” That is true for even the most moral person living today until understanding the Noble Truths. I have explained this in detail before.
- Until that is understood, people will inevitably have the “*nicca view/perception*,” i.e., everything will work out if we try to be “successful” by getting a good job and acquiring worldly things. **However, the world has the “*anicca characteristic*.”**

“The World” Includes Both Physical and Mental Worlds

2. Modern science is focused on the “physical world.” But the Buddha taught that one’s world includes both the physical and mental worlds. The mental world is more important than the physical world.

- The Buddha defined the “world” (same as “*sabba*” or “all”) in several different ways. All of them encompass the physical world and the mental world.
- For example, the Buddha taught that everything in the world comes under six *dhātu*: *pathavī*, *āpo*, *tejo vāyo*, *ākāsa*, *viññāṇa*. As you can see, the first five include everything in the physical world. Everything in the mental world comes under *viññāṇa dhātu*.
- The Buddha also described everything in the world as *pañcakkhandha* (five aggregates): *rūpakkkhandha*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*. In this categorization, the first five *dhātu* are included in *rūpakkkhandha*. *Viññāṇa dhātu* covers the other four aggregates.

A Sentient Being Has All Six *Dhātu*/Five Aggregates

3. It is evident that the difference between sentient living beings and everything else (rocks, houses, planets, stars, etc., as well as plant life) is that a conscious being has *viññāṇa dhātu*.

- All physical entities (including the physical bodies of living beings) are made of the four great elements (*pathavī*, *āpo*, *tejo vāyo*) and are in **specific locations** in space (*ākāsa*.)
- However, *viññāṇa dhātu* has no such space location. It permeates the whole space and is accessible to any sentient being from anywhere. For example, astronauts can function well on the Moon, just as on Earth. Their memories remain intact, i.e., memory has no spatial locations and is accessible from anywhere.
- Therefore, any living being anywhere in the universe will have all six *dhātu*/ five aggregates.

Loka Sutta (SN 12.44) – Existence in a *Loka* Means Subjected to Suffering

4. The Buddha starts the “[WebLink: suttacentral: Loka Sutta \(SN 12.44\)](#)” by saying, “*Bhikkhus*, I will teach you the **origin** and the **cessation** of the **world**.” (“*Lokassa*, *bhikkhave*, ***samudayañca atthaṅgamañca*** *desessāmi*.”)

- One’s world does not end at the death of the physical body. For example, when a human dies, he will be reborn with a different human body if more kammic energy remains in the human *bhava*. Otherwise, he will grasp a new *bhava*, and the rebirth will be in that appropriate realm (among the 31 realms.) That is “***loka samudaya***” or “**origin of the world**” above.
- As we have discussed, “**cessation of the world**” (stopping the rebirth process) happens at **Arahanthood**, and that *Arahant* will be “totally separated from this world” at *Parinibbana* (death of the physical body.)

5. Next, the Buddha explained how “***loka samudaya***” happens: “*Katamo ca, bhikkhave, lokassa samudayo? Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ. Tiṇṇaṃ saṅgati phasso. Phassa paccayā vedanā; vedanā paccayā taṇhā; taṇhā paccayā upādānaṃ; upādāna paccayā bhavo; bhava paccayā jāti; jāti paccayā jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā sambhavanti. Ayam kho, bhikkhave, lokassa samudayo.*”

Translated: “And what, *bhikkhus*, is the **origin of the world**? When *cakkhu* and *rūpa* “get together” (*paṭicca*), *cakkhu viññāṇa* arises. Then contact with “*saṇ*” (*samphassa* or “*saṇ*” + “*phassa*”) happens due to one’s *saṅgati* (“*saṇ*” + “*gati*”). As a result, “*samphassa-jā-vedanā*” arises; with *samphassa-jā-vedanā* as condition, craving; with craving as condition, clinging; with clinging as condition, existence; with existence as condition, birth; with birth as condition, **aging-and-death, sorrow, lamentation, pain, displeasure, and despair** come to be. That, *bhikkhus*, is the **origin of the world**.”

- I have discussed this in the previous series on “[Origin of Life](#).” You can review the relevant posts under the “Worldview of the Buddha” subsection. I discussed the “*Chachakka Sutta* (MN 148),” which discusses sensory inputs through the six sense faculties. But we will discuss that verse briefly again.
- It is CRITICAL to note that the Buddha equated birth in any realm (*loka samudaya*) the same as the **origin of suffering**!
- The second part of the *sutta* describes how “**cessation of the world**” (or *loka nirodha/atthaṅgama*.) See #8 below.

Seeds for the “Origin of the World” (Rebirths) Initiate With Our Response to Sensory Inputs (*Ārammaṇa*)

6. Then, the verse is repeated for the other five senses. Thus, the “origin of the world” (or the rebirth process) can start with sensory input (i.e., *ārammaṇa*) coming through any of the six senses.

- That is explained (in summary form) in the following part of the verse: “*Phassa paccayā vedanā; vedanā paccayā taṇhā; taṇhā paccayā upādānaṃ; upādāna paccayā bhavo; bhava paccayā jāti; jāti paccayā jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā sambhavanti*.”
- That is how “seeds” for future rebirths accumulate with strong *akusala kamma*. Even though only a tiny fraction of sensory interactions lead to the creation of such “seeds” (or “*kamma bīja*”), we all have accumulated countless such seeds over previous lives. Luckily, they DID NOT inevitably bring future rebirths, and we will discuss that. (Otherwise, no one will be able to attain *Nibbāna*.)
- Now let us discuss the *Dukkha Sutta* (SN 12.43), which comes just before the *Loka Sutta* (SN 12.44).

Dukkha Sutta (SN 12.43) – Origin of Suffering Same as Origin of the World (Rebirth)

7. The Buddha starts the “[WebLink: suttacentral: Dukkha Sutta \(SN 12.43\)](#)” by saying, “*Bhikkhus, I will teach you the **origin** and the **cessation** of suffering.*” (“*Dukkhassa, bhikkhave, **samudayaṇca atthaṅgamaṇca** desessāmi.*”)

- Then the Buddha explained “***dukkha samudaya***”: “*Katamo ca, bhikkhave, **dukkhassa samudayo**? Cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ. Tiṇṇaṃ saṅgati phasso. Phassa paccayā vedanā; vedanā paccayā taṇhā. Ayaṃ kho, bhikkhave, **dukkhassa samudayo**.*”
- Comparing this verse with that in #5 above from the *Loka Sutta* (SN 12.44) makes the following very clear: “***Loka samudaya** is the SAME as **dukkha samudaya**.*”
- In other words, “**arising of a new world in a new birth**” is the SAME as “**arising of another mass of suffering**.”

End of Suffering (*Nibbāna*) Is Cessation of the World (Rebirth Process)

8. In the second part of the *Dukkha Sutta* the Buddha says how that suffering can be stopped from arising: “*Katamo ca, bhikkhave, **dukkhassa atthaṅgamo**? Cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ. Tiṇṇaṃ saṅgati phasso. Phassapaccayā vedanā; vedanāpaccayā taṇhā. Tassāyeva taṇhāya asesavirāganirodhā **upādāna nirodho**; upādānanirodhā **bhava nirodho**; bhava nirodhā **jāti nirodho**; jāti nirodhā **jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā nirujjhanti**. Evametassa kevalassa dukkhakkhandhassa nirodho hoti. Ayaṃ kho, bhikkhave, **dukkhassa atthaṅgamo**.*”

- That is also the same verse as the second part of the *Loka Sutta* (SN 12.44.) In other words, “**Stopping the arising of a new world (new birth)**” is the SAME as “**stopping the arising of another bout of suffering**.”

- The above verse requires a detailed discussion. We will do that in upcoming posts.
- It is a good idea to understand what an *ārammaṇa* is before we get into that discussion. See [“Ārammaṇa Plays a Critical Role in a Sensory Event.”](#)

9. We know that *Nibbāna* is the cessation of suffering. We see clearly from the above two *suttas* that the end of suffering stops the rebirth process (*bhava* and *jāti*).

- Of course, there are many more *suttas* stating the same. These two *suttas* are in the [“*Saṃyutta Nikāya* 12”](#) on *Paṭicca Samuppāda* that we are discussing presently.

Connection to *Paṭicca Samuppāda*

10. The other important point is that the above two *suttā* illustrate the connection of *loka samudaya/dukkha samudaya* to *Paṭicca Samuppāda*.

- As I have pointed out before, the *Paṭicca Samuppāda* process starts with “*saḷāyatana paccayā phasso*,” i.e., with sensory input (*ārammaṇa*) coming to one of the six sensory faculties.
- That is what the verse in #8 above says. As we can see, it has the following steps (in the latter part) of the *Paṭicca Samuppāda* sequence: “*Phassa paccayā vedanā; vedanā paccayā taṇhā. Tassāyeva taṇhāya asesavirāganirodhā upādāna nirodho; upādāna nirodhā bhava nirodho; bhava nirodhā jāti nirodho; jāti nirodhā jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā nirujjhanti. Evametassa kevalassa dukkhakkhandhassa nirodho hoti.*”
- I have discussed this in the previous series on [“*Origin of Life*”](#) as mentioned in #5 above.
- We will look at it from a bit different point of view here, highlighting the steps in *Paṭicca Samuppāda*.

11. The process by which that future suffering arises is (*Akusala-Mūla*) *Paṭicca Samuppāda*.

- In plain English, the following happens. One gets attached to an *ārammaṇa* and starts doing foolish/immoral deeds (“*avijjā paccayā saṅkhāra.*”) Such actions are going to have future consequences, ALWAYS leading to suffering at the end.
- But that process starts only with a strong sensory input or an *ārammaṇa*. See [“*Ārammaṇa Plays a Critical Role in a Sensory Event.*”](#)
- The critical point is that those consequences can also manifest in future lives. Strong immoral deeds lead to future births in “undesired existences,” the four lowest realms.

Future Suffering (*Loka/Dukkha Samudaya*) Starts With Sensory Input (*Ārammaṇa*)

12. As we can see in #5 and #7, the two *suttas* state that *loka samudaya/dukkha samudaya* (origin of the world/origin of suffering) starts with: “*Cakkhuṅca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ..*” The *suttas* repeat that verse for all six senses. That is the same as the “*saḷāyatana paccayā phasso*” step in *Paṭicca Samuppāda*.

- Then, attachment (*taṇhā*) to such a sensory input lead to the subsequent steps leading to suffering at the end: “*phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*”
- It is at the “*upādāna paccayā bhavo*” step that *Paṭicca Samuppāda* goes to the step “*avijjā paccayā saṅkhāra*” and starts accumulating kamma to that could power future existences.
- We will discuss that in the next post.

9.6.4 Sotāpanna – One With the “Wider Worldview” of the Buddha

October 25, 2021; revised #4 on October 27, 2021

Introduction

1. We covered a lot of material in the recent few posts about “original of the world” (*loka samudaya*) and “origin of suffering” (*dukkha samudaya*.) See, [“Paticca Samuppāda, Tilakkhana, Four Noble Truths.”](#)

- As we saw, the Buddha equated the world’s origin (with each new birth in the rebirth process) as the origin of suffering. That is because even if that particular existence (e.g., a *Deva* realm) may not have extreme suffering, the possibility of suffering in the future (in a lower realm) is there.
- We used direct Pāli quotes from relevant *suttas* in those posts.
- Some people (justifiably) stress out just seeing Pāli words. Here, I want to provide a summary in simple English to clarify the key conclusions.
- I want to do that because the concepts discussed in those posts are contrary to the views/perceptions of an average human. Once comprehend the key message, they can go back and review those posts. They may also want to carefully go through the *suttas* to ensure that I have not distorted a single verse.
- I welcome thoughtful discussions based on the *Tipiṭaka*. If my writings are contradictory to anything in the *Tipiṭaka*, please provide references, and discuss them. **Understanding the primary message of the Buddha is ESSENTIAL before trying to follow his path to Nibbāna!**

The Suffering Buddha Referred to – In the Rebirth Process

2. Many people go to meditation retreats to get rid of the daily stresses of life by calming the mind. There is nothing wrong with that. However, Buddha’s teachings are there to tackle a much bigger problem.

- That problem is the unimaginable suffering in the rebirth process that is inevitable for all those who have not understood the “wider world view” of the Buddha.
- The Buddha described a world consisting of 31 realms, out of which an average human is aware of only two: the human and the animal realms. He taught that our lives don’t end with the death of this physical body. We can be reborn anywhere in the 31 realms, but most rebirths are in the four lowest realms (*apāyās*.) where the level of suffering can be much higher than that we can see in the human and animal realms.
- We will address the validity of that “wider worldview” in the next post. Let us finish our summary of recent posts.

Suffering Is Inevitable in the World and Absent in Nibbāna

3. The main two conclusions for the previous two posts are the following:

- i. Both suffering and sensory pleasures are present in the world of 31 realms, i.e., in the rebirth process among the 31 realms. The higher realms have more happiness than suffering, while the suffering in the lowest four realms is unbearable. Since any given living being spends most of the time in the *apāyās*, suffering dominates this world.
- ii. There is no suffering or sensory pleasures in *Nibbāna* (after the death of an *Arahant*.) Nothing of this world exists in *Nibbāna*. In terms of the language of mathematics, “this world and *Nibbāna* are mutually exclusive.” Material objects, feelings and perceptions about them, etc., all belong to this world, and NONE of them exist in *Nibbāna*. Even a Buddha cannot “describe” what is in *Nibbāna* because we don’t have that terminology in this world. The only way to conclusively describe *Nibbāna* is to say that there is no suffering in *Nibbāna*; that is how the Buddha ALWAYS described *Nibbāna*.

- Another critical point is that *Nibbāna* is also, “**rāgakkhaya** dosakkhaya mohakkhaya—*idaṃ vuccati nibbānan*” *ti* OR “the **ending of rāga**, ending of anger/hate, and ending of ignorance/delusion is *Nibbāna*.” See, for example, “[WebLink: suttacentral: Nibbānapaṇhā Sutta \(SN 38.1\)](#).”
- Equating *Nibbāna* to *rāgakkhaya* provides a CRITICAL clue to our current discussion. We will discuss that in #7 below.

4. Only an *Arahant* in *Nirodha Samāpatti* can experience the complete “*Nibbānic* bliss” (total absence of suffering.) An *Arahant* can stay in *Nirodha Samāpatti* only for up to seven days at a time. During this time, the physical body of the *Arahant* appears to be dead (even the heart stops beating), but *kammic* energy maintains the body temperature.

- However, one can experience more and more of the “*Nibbānic* bliss” as one proceeds up the four stages of *magga phala*. That “reduced level of mental stress” has been referred to as “cooling down of the mind” in the *Tipiṭaka*.
- On the other hand, bodily suffering (aches, injuries, sicknesses, etc.) will persist until the death of the physical body of an *Arahant*. That is because even an *Arahant* has to live in this world until the demise of the physical body. With the death of the physical body, an *Arahant* departs from this world. That is *Parinibbāna* or “full *Nibbāna*.” No more rebirths in this world and no more suffering!

The Reality of any Existence in This World

5. We all would like to live a “comfortable and pleasurable life” among our friends and family. But the reality is that no one has been able to sustain that EVER. **Anyone who ever lived had to give up everything at death.** We would not even know where we would be reborn.

- After some years, we may be reborn with a human body if more *kammic* energy remains in this human *bhava*. Until then we will only have the “mental body” or the “*gandhabba kāya*.” Of course, even then, we don’t know exactly where that birth would be.
- If there is no more *kammic* energy left in the human *bhava*, we have no idea where we will be reborn. **That depends not only on how we lived this life but also on what types of *kammic* energies have been accumulated in previous lives.**
- However, those who have attained stages of *Nibbāna* would have eliminated rebirths in lower realms. A *Sotāpanna* would not be reborn in the four lowest realms (*apāyās*.) A *Sakadāgāmi* would be born only among the six *Deva* realms. An *Anāgāmi* would be reborn only in certain *Brahma* realms. They all will attain full *Nibbāna* within a relatively short time.

Importance of Becoming a *Sotāpanna*

6. Most people cannot imagine that there can be suffering in the realms above the human realm. But we all can clearly see the suffering in the human and especially the animal realm. The animal realm is the only *apāya* that we can see. The Buddha has described the suffering in the other three lowest realms, and those descriptions are scary. That is why the main goal of a Buddhist is to attain the *Sotāpanna* stage.

- Most humans cannot even fully understand the suffering we experience in the human realm because their minds are “covered” by anticipated bouts of “future pleasures” that one hopes to achieve. But anyone can see the suffering in the animal realm. Since a *Sotāpanna* would avoid rebirth in all four lowest realms, that should incentivize one to attain the *Sotāpanna* stage.
- Once getting to the *Sotāpanna* stage, one will begin to see the suffering in the human realm. But a *Sotāpanna* may still have the perception that life in a *Deva* or a *Brahma* realm could be good.
- **Therefore, for anyone below the *Sotāpanna* stage, there is no need to comprehend suffering in higher realms.** But the point is that life in that higher realm WILL end, and one WILL end up in the lower realms.

- The only REQUIREMENT to attain the *Sotāpanna* stage is to understand the “wider worldview of the Buddha.” The Buddha said that just that understanding (or getting to the correct worldview) would remove an unimaginable amount of defilements. It is the **removal of defilements by clear vision** (“*dassanā pahātabbā*”) in the “[WebLink: suttacentral: Sabbāsava Sutta \(MN 2\)](#).” We can see that from a different perspective too. Let us discuss that first.

“*Rāgakkhayo Nibbānan*” – Nibbāna Is Ending of *Saṃsāric* Travel

7. Without exception, the current English translation of “*rāga*” is “greed.” However, “greed” is “*lobha*.” Furthermore, have you ever wondered why *Nibbāna* is NOT defined as “*lobhakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan*” *ti*? That would be the logical choice there since the three immoral roots are *lobha*, *dosa*, *moha*.

- The correct “*pada nirutti*” (etymology) of “*rāga*” comes from “*rā*” + “*agga*” where “*rā*” means to “travel (in the *saṃsāric* journey)” and “*agga*” is to “give priority.” Thus, “*rāga*” means to “travel (the *saṃsāric* journey).” Here, one may not even believe in rebirth but would still enjoy the world as long as it lasts. In other words, anyone craving things in this world would have some type of *rāga*. [*agga* : [adj.] the highest; the top-most. (m.), the end; the top.]
- *Rāga* arises because one believes there are pleasures to be had in this world (i.e., one believes the world to be of *nicca* nature.) But one would NOT do highly immoral things with just *rāga*. Specifically, *kāma rāga* needs to escalate to *lobha* for immoral actions to take place.
- The *saṃsāric* journey is among three types of *loka*: *kāma loka*, *rūpa loka*, and *arūpa loka* (with the 31 realms distributed among these three.) As explained in *Paṭicca Samuppāda*, one’s birth will be according to one’s cravings for things in this world. When one has *kāma rāga*, one will be born among the 11 realms in the *kāma loka*. Those who have (at least temporarily) overcome *kāma rāga* (and cultivate *rūpāvacara jhāna*) may still have *rūpa rāga* and thus will be born in the 16 realms in *rūpa loka*. Those who have overcome *kāma rāga* and *rūpa rāga* (and cultivate the *arūpāvacara jhāna*) will be born in one of the four realms in the *arūpāvacara loka*.
- To attain *Nibbāna*, one must permanently overcome all three types of *rāga*, and thus “*rāgakkhayo nibbānan*.”

8. The relevant point to our discussion is the following: If one can understand the material in the previous two posts in this series, one would realize that future suffering is INEVITABLE unless the rebirth process is stopped. “The suffering-filled world” will keep arising at death.

- Please read that again and contemplate on it. The Buddha said that arising of any new birth (anywhere among the 31 realms) means the suffering has not stopped.
- *Saṃsāric* suffering (future suffering in the rebirth process) will not stop until one comprehends this KEY POINT.
- That is the same as understanding the “wider worldview of the Buddha” of the rebirth process among the 31 realms.
- One becomes a *Sotāpanna Anugāmi* when starting to understand that critical point. When that understanding takes root in the mind irreversibly, one would attain the *Sotāpanna* stage at that moment.
- That is the **removal of defilements by clear vision** (“*dassanā pahātabbā*”) mentioned in #6 above per *Sabbāsava Sutta* (MN 2.) That is the Noble *Sammā Diṭṭhi* (“Noble Correct View”) of a *Sotāpanna*.

A *Sotāpanna* Starts on the Noble Eightfold Path with *Sammā Diṭṭhi*

9. **It is at that point one can start on the Noble Eightfold Path as a *Sotāpanna*.** All others below the *Sotāpanna Anugāmi* stage are still on the mundane eightfold path (a *Sotāpanna Anugāmi* WILL become a *Sotāpanna*.) The [WebLink: suttacentral: Mahācattārīsaka Sutta \(MN 117\)](#) discusses the two eightfold paths; see, “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).”

- In the “[WebLink: suttacentral: Dutiyasāriputta Sutta \(SN 55.5\)](#)” the Buddha discussed the *Sotāpanna* stage with Ven. Sariputta. The Buddha asked, “*Sotāpanno, sotāpanno’ti hidam, sārīputta, vuccati. Katamo nu kho, sārīputta, sotāpanno’ti?*” OR “Sārīputta, they speak of ‘a *Sotāpanna*’. Who is a *Sotāpanna*?”
- Venerable Sariputta replied: “*Yo hi, bhante, iminā ariyena aṭṭhaṅgikena maggena samannāgato ayaṃ vuccati sotāpanno, svāyaṃ āyasmā evaṃnāmo evaṅgotto’ti.*” OR “**Bhante, someone who has embarked on the Noble Eightfold Path is a *Sotāpanna*,**” and the Buddha consented.

10. Furthermore, in several *suttas* *Sammā Diṭṭhi* is described as, “understanding the truth about suffering.”

- That “previously unheard truth about suffering” is that “the origin of suffering is the origin of the world (with each rebirth)” as we discussed.
- For example, in the “[WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\)](#)”: “*Katamā cāvuso, sammā diṭṭhi? Yaṃ kho, āvuso, **dukkhe ñāṇaṃ**, dukkhasamudaye ñāṇaṃ, dukkhanirodhe ñāṇaṃ, dukkhanirodhagāminiyā paṭipadāya ñāṇaṃ, ayaṃ vuccatāvuso: ‘sammā diṭṭhi’.*”
- As we saw, “*dukkha samudaya*” is the same as “*loka samudaya*”; “*dukkha nirodha*” is the same as “*loka nirodha*”; “*dukkhanirodhagāminiyā paṭipadā*” is the same as “*lokanirodhagāminiyā paṭipadā*.”
- **That is “*dukkhe ñāṇaṃ*” or the knowledge on the Noble Truth about suffering.**

It Is a *Sotāpanna* Who Can Cultivate the Other Seven Factors on the Noble Path

11. Therefore, one must first see the “wider worldview of the Buddha” to get to *Sammā Diṭṭhi*, or “the correct vision about the world.” **At that point, one has SEEN the unfruitful/dangerous nature (*anicca nature*) of this world.** That is the same as comprehending the First Noble Truth on suffering. That is also the same as comprehending *Tilakkhaṇa* (Characteristics of this world) and *Paṭicca Samuppāda* (how suffering arises due to causes and conditions.)

- A *Sotāpanna* WILL NOT lose that understanding even through future lives. Even if it takes several more births to complete, a *Sotāpanna* WILL cultivate the remaining seven steps on the Noble Path and WILL get to the *Arahanthood*.
- That is why understanding the Four Noble Truths/*Tilakkhaṇa*/*Paṭicca Samuppāda* is ESSENTIAL to becoming a *Sotāpanna Anugāmi* first. Sometimes a *Sotāpanna Anugāmi* is called a *Cula-Sotāpanna*, even though that term is not in the *Tipiṭaka*.
- This turned out to be a long post. But the essence of the Buddha Dhamma is summarized here.

9.6.5 *Sotāpannā* – Just Starting on the Noble Path

November 1, 2021

A *Sotāpanna* is at the beginning stage of the Noble Path, and needs to overcome *kāma rāga*, *rūpa rāga*, and *arūpa rāga*.

Getting to *Nibbāna* Is a Step-by-Step Process

1. In the recent posts, I have outlined the ULTIMATE GOAL of a Buddhist. Those posts may discourage some people. They may think that they will never be able to get to *Nibbāna*. However, I just wanted to emphasize that it is a “previously unknown worldview.” **But getting to that ultimate goal is a step-by-step process.** Even a *Sotāpanna* is far away from losing attachments to “this world.” But many people attribute qualities of an *Arahant* to a *Sotāpanna*.

- Thus, many people waste precious time by trying to suppress sense desires. In some cases, they try to eliminate the innate sense of “me” or “a self.” That is an impossibility! Their goal should be to understand the “worldview of the Buddha” and first become a *Sotāpanna*. It is a good idea to read the post, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)”
- Some others also waste time doing *Ānāpānasati/Satipaṭṭhāna* using “breath meditation.” **Only a *Sotāpanna* knows how to cultivate them properly.** At the beginning of the “[WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#),” Buddha clearly stated that ALL the *Bhikkhus* listening to the discourse had various stages of *magga phala*, i.e., all were at or above the *Sotāpanna* stage.
- You can read this English translation at Sutta Central: “[WebLink: suttacentral: Mindfulness of Breathing \(MN 118\)](#).” Of course, the title is quite misleading, and the latter part of the *sutta* translated incorrectly. But the detailed description of the assembled *bhikkhus* proves my point. That description starts with, “*Bhikkhus*, this assembly is free from prattle, this assembly is free from chatter. It consists purely of heartwood..” close to the beginning of the *sutta*. [*Apalāpāyaṃ, bhikkhave, parisā; nippalāpāyaṃ, bhikkhave, parisā; suddhā sāre paṭiṭṭhitā.*] [*parisā* : [f.] a company; an assembly. *palāpa* : [m.] chaff (of corn); prattle; nonsense; voice of essence. *nippalāpa* : [adj.] free from chaff or prattle. *sāra* : (m.), essence; the pith of a tree; the choicest part. (adj.) essential; excellent; strong. *paṭiṭṭhita* : [pp. of *paṭiṭṭhahati*] was established; stood firmly; found a support.]

2. The same *sutta* also has the following verse: “*Nāhaṃ, bhikkhave, muṭṭhassatiṣṣa asampajānassa ānāpānassatiṃ vadāmi.*” In the above translation: “I do not say that there is the development of mindfulness of breathing for one who is **forgetful**, who is **not fully aware**.”

- But the real meaning of that Pāli verse is more like, “I do not teach *ānāpānassati* to those who do not know where to establish *sati* (*muṭṭhassatiṣṣa*) and not know how to sort out “*saṇ* or defilements” (*asampajānassa*).
- Therefore, the priority is to understand the worldview of the Buddha that we discussed in previous posts and become a *Sotāpanna Anugāmi*. It is also a good idea to dispel some other myths about *Sotāpanna Anugāmi/Sotāpanna*.

***Sotāpanna Anugāmi/Sotāpanna* – Knows the *Anicca* Nature of This World**

3. As I explained in the previous post, one gets to the *Sotāpanna* stage by removing wrong views about the world (worldly things can be fruitful/beneficial.) **That is the wrong view that the world is of “*nicca* nature.”**

- We are bound to “this world” with ten *saṃsāric* bonds (*saṃyojana*.) They are “mental bonds.” At the *Sotāpanna* stage, only three of those ten bonds break and **ALL three are about wrong views only.**
 - (i) First there is *sakkāya diṭṭhi* is the **WRONG VIEW** of a “*nicca* worldview.” Breaking of that bond leads to the simultaneous breaking of the other two bonds.
 - (ii) *Vicikicchā* is to have doubts that Buddha discovered the true nature of this world, his Dhamma is the correct world view, and his Noble disciples can end the *saṃsāric* suffering.
 - (iii) *Sīlabbata parāmāsa* is the wrong view that end of suffering is achievable by just following a set of rituals, without understanding the broader worldview.)

4. A *Sotāpanna* has *Sammā Dīṭṭhi* or “the correct world view” and would be able to follow the Noble Path without further assistance. A *Sotāpanna* also knows and understands the other seven steps to get to *Arahanthood*. That takes place via three more stages: *Sakadāgāmi*, *Anāgāmi*, *Arahant*. The two primary bonds that break at the *Sakadāgāmi* and *Anāgāmi* stages are *kāma rāga* (craving sensory pleasures) and *paṭigha* (tendency to get upset/angry when obstacles come in the way of fulfilling such cravings.).

- The Buddha laid down a systematic way for a *Sotāpanna* to reach those higher goals. He first described them in the *Ānāpānassati Sutta*. He gave more details in the *Mahā Satipaṭṭhāna Sutta* (DN 22.) The *Ānāpānassati Sutta* (MN 118) has the following verse: “*Evam bhāvitā kho, bhikkhave, ānāpānassati evam bahulikatā cattāro satipaṭṭhāne paripūreti*” OR “*Bhikkhus, that is how ānāpānassati, developed and cultivated, fulfills the four foundations of mindfulness (cattāro satipaṭṭhāna).*” Thus, *ānāpānassati* is just a brief version of *satipaṭṭhāna*.

It is Not Easy to Remove *Kāma Rāga* and Get to the *Anāgāmi* Stage

5. The question is: If a *Sotāpanna* KNOWS that craving worldly things hinder getting to *Nibbāna*, why is it hard for a *Sotāpanna* to lose those cravings? Why did the Buddha systematize that process to make it easier? **The short answer is that even though a *Sotāpanna* has removed the wrong views (*dīṭṭhi*) about this world, wrong perceptions (*saññā*) about mind-pleasing things in the world still remain intact.**

- The analogy of an alcoholic can be helpful to understand the difference. To give up alcohol, first, he must come to the right view, i.e., that alcohol is bad for health. But most alcoholics get stuck at the second step of getting rid of the “good *saññā*” associated with drinking. He must persistently be thinking about the bad consequences of drinking. In the same way, even though a *Sotāpanna* KNOWS that sensual pleasures lead to suffering, it is hard to get rid of that “good *saññā*” associated with sense pleasures. **That is where *ānāpānassati* and *satipaṭṭhāna* meditations are required.**
- It is a good idea to read the post, “[Saññā – What It Really Means](#)” and understand the concept of *saññā*. Further details of the difference between *dīṭṭhi* and *saññā* at “[Vipallāsa \(Dīṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”

6. That is where many people get confused. Some people INCORRECTLY believe that a person needs to abstain from sensory pleasures completely to GET TO the *Sotāpanna* stage. Of course, one MUST refrain from extreme immoral actions seeking sensory pleasures to get to the *Sotāpanna* stage. **But as we discussed above, *kāma rāga* can be removed only AFTER the *Sotāpanna* stage. Even then, it will take a considerable effort.**

- A simple analogy is an alcoholic. There is no hope of getting rid of that habit without first “seeing” the harmful consequences of drinking. But even after “getting to the correct view,” it takes considerable effort not to “have a drink” when the urge comes! An alcoholic MUST keep thinking about the adverse consequences of drinking. That is precisely what a *Sotāpanna* would do while engaging in *ānāpānassati/satipaṭṭhāna Bhāvanā*. It is NOT about breathing in and out! Reread #1, #2 above carefully (and read those references) if you have any doubts.
- Now let us discuss some key features of the *Sotāpanna* stage to dispel some more common myths.

The *Sotāpanna* Stage – Per *Tipiṭaka*

7. Valuable information about the *Sotāpanna* Stage is in the “*Sotāpattisaṃyutta*,” where a series of *suttas* from SN 55.1 through SN 55.74 provide a lot of information.

- The first one, “[WebLink: suttacentral: Cakkavattirāja Sutta \(SN 55.1\)](#),” states that a *Sotāpanna* is better off than an Emperor who rules the whole world because that Emperor is not free of rebirth in the *apāyās*. The four realms in the *apāyās* are also named *niraya* (hell), animal, *peta*, and *vinipāta asura*.

Furthermore, a *Sotāpanna* has unbreakable faith (*aveccappasādena*) in the Buddha, Dhamma, *Saṅgha* and has unbreakable moral conduct (*ariyakānta sīla*.)

- One who gets to the *Sotāpanna* stage can figure that out by himself. That is in the “[WebLink: suttacentral: Pathamagiṇṇakāvasatha Sutta \(SN 55.8\)](#).” It specifically states that one would know that one is free from the four *apāyās*. **Furthermore, one is free to declare that attainment if so desired.** Many people believe one should not state such attainments. Even though one should not brag about it, the above *sutta* clearly shows that the Buddha allowed it. There are more such myths.

More Myths About the *Sotāpanna* Stage

8. A *Sotāpanna* has only “seen” what *Nibbāna* is and knows the path but has just started. His new mindset will not allow any *apāyagāmi kamma* (immoral deeds that will lead to rebirth in the *apāyās*).

- Sarakāṇi was an old *Brahmin* who used to drink a lot. At old age, he listened to a discourse by the Buddha and attained the *Sotāpanna* stage. Soon afterward, he died, and the Buddha stated that he was born in a *Deva loka*. Some people laughed at the notion that an alcoholic could be born in a *Deva loka*. Buddha explained that those were ignorant of the Buddha Dhamma. That account is in the “[WebLink: suttacentral: Pathamasaranānisakka Sutta \(SN 55.24\)](#).” We also know that *Āṅgulimāla* killed almost a thousand people and was able to attain *Arahanthood*!

9. Another myth is that a *Sotāpanna* would not crave sensory pleasures. But there were millions of *Sotāpannas* who got married and led normal family lives during the days of the Buddha. For example, *Viśākhā* (or *Viśākā*), who was the leading female lay disciple at the time, attained the *Sotāpanna* stage at age seven and went on to get married and have twenty plus children. She did not abstain from sex. She still had *kāma rāga* since she was not an *Anāgāmi*. Of course, she would not have engaged in sex outside the marriage.

- **There are only six types of strong *kamma* that will not happen by a *Sotāpanna*:** killing mother, father, or an *Arahant*, injuring a Buddha, causing “*saṅghabheda*,” and following a path other than that of the Buddha. These are in the “[WebLink: suttacentral: Bahudhātuka Sutta \(MN 115\)](#).” So, it is a myth to say that a *Sotāpanna* will not break any of the five precepts. It is an *Arahant* who is incapable of breaking them.
- That is not to minimize the status of a *Sotāpanna*. A *Sotāpanna* would NEVER be born in an *apāya*.

A *Sotāpanna* Understands the *Paṭicca Samuppāda* Process

10. In the “[WebLink: suttacentral: Dutiyasāriputta Sutta \(SN 55.5\)](#),” the Buddha discussed the *Sotāpanna* stage with Ven. *Sāriputta*. As we discussed in the previous post, **someone who has embarked on the Noble Eightfold Path is a *Sotāpanna*.** That *sutta* also states how one can get to the *Sotāpanna* stage. Venerable *Sāriputta* says, “*Sappurisasamsevo hi, Bhante, sotāpattiyaṅgaṃ, saddhammassavanam sotāpattiyaṅgaṃ, yoniso manasikāro sotāpattiyaṅgaṃ, dhammānudhammappaṭipatti sotāpattiyaṅgaṃ*” *ti* OR “*Bhante, the necessary conditions are: associating with Noble Persons, listening to the true teaching, yonisomanasikāra, and practicing in line with the teaching.*” Here, the key point is that one cannot be exposed to the correct Dhamma unless taught by someone who has understood it first. Another is the term *yoniso manasikāra* (mundane translation “proper attention”) meaning “to understand how various types of births (*bhava* and *jāti*) arise via *Paṭicca Samuppāda*.”

- The “[WebLink: suttacentral: Pathamabhayaverūpasanta Sutta \(SN 55.28\)](#)” in the same series explains *yonisomanasikāra* as follows: “*Idha, gahapati, ariyasāvako paṭiccasamuppādaññeva sādhukam yoniso manasi karoti—iti imasmim sati idam hoti, imassuppādā idam uppajjati; iti imasmim asati idam na hoti, imassa nirodhā idam nirujjhati; yadidam avijjāpaccayā saṅkhārā, saṅkhārapaccayā viññāṇam ...pe... evametassa kevalassa dukkhakkhandhassa samudayo hoti.*” In other words, one has *yonisomanasikāra* when one understands *Paṭicca Samuppāda*.

- I have only provided a summary of the most essential facts about the *Sotāpanna* stage above. It is good to scan through the available English translations, even though they are not correct in some aspects. Here is the link to the first *sutta* in the series at Sutta Central: “[WebLink: suttacentral: A Wheel-Turning Monarch \(SN 55.1\).](#)”

Summary

11. Living moral life is NECESSARY but NOT ENOUGH to get to the *Sotāpanna* stage. One MUST see the dangers in the rebirth process, just like an alcoholic must first see the dangers (health risks) associated with drinking.

- Many people have wrong ideas about the *Sotāpanna* stage. I have addressed some in this post.
- *Sotāpanna Anugāmi*/*Sotāpanna* stages are the beginning stages of the Noble Path, not the end. A *Sotāpanna* has understood the dangers in remaining in “this world” (rebirth process) but has to overcome *kāma rāga*, *rūpa rāga*, and *arūpa rāga* (that binds one to the *kāma loka*, *rūpa loka*, and *arūpa loka*.) But a *Sotāpanna* has overcome the lowest realms in the *kāma loka* and thus is free from MOST of the suffering in the rebirth process.
- Many people start “meditating” even before understanding “what to meditate on.” Of course, if one is doing “breath meditation,” **there is nothing to learn**. Breath meditation can be used as a “*Samatha Bhāvanā*” to calm the mind. But it WILL NOT get one closer to the “end of suffering.”

9.6.6 Yoniso Manasikāra and Paṭicca Samuppāda

November 9, 2021; revised December 14, 2022

Yoniso manasikāra is to understand *Paṭicca Samuppāda* and thereby have a mindset that this world has the three characteristics of *anicca*, *dukkha*, and *anatta*.

To get to the *Sotāpanna* stage, one must understand the mechanism by which future suffering arises, i.e., *Paṭicca Samuppāda*. One first gets on the Noble Path by understanding the rudimentary aspects of *Paṭicca Samuppāda* as a *Sotāpanna Anugāmi*. When that understanding takes a firm hold in mind, one gets to the *Sotāpanna* stage. That is not stated directly in a single *sutta*, but we will discuss a few *suttas* to clarify it.

Four Conditions Required to Attain the *Sotāpanna* Stage

1. There are four conditions NECESSARY to get to the *Sotāpanna* stage.

In many *suttā*, including [WebLink: suttacentral: Sotāpattiphala Sutta \(SN 55.55\)](#) and [WebLink: suttacentral: Dutiya Sariputta Sutta \(SN 55.5\)](#), the four requirements for someone to attain the *Sotāpanna* stage of *Nibbāna* are stated: “*Cattārome, bhikkhave, dhammā bhāvitā bahulikāṭā sotāpattiphalasacchikiriyāya samvattanti. Katame cattāro? Sappurisasamsevo, saddhammassavanam, yonisomanasikāro, dhammānudhammapaṭipatti.*”

- i. Association with “*sappurisa* (*sath + purisa* or “Noble friend,” i.e., an *Ariya*),” sometimes called a “*kalyāṇa mittā*” (“*kalyāṇa mitrā*” in Sanskrit.)
- ii. Listening to Dhamma discourses (while reading is enough to get to the *Sotāpanna Anugāmi* stage, listening is necessary to attain the *Sotāpanna* stage).
- iii. Understanding *yoniso manasikāra* (how different existences arise and that all existences end with suffering, i.e., *Paṭicca Samuppāda*).
- iv. Start following *Dhammanudhamma patipadā* (after seeing how future suffering can be eliminated; see, “[What is Unique in Buddha Dhamma?](#)”).

A Noble Friend Needed to Fulfill First Two Requirements

2. To get to a destination, we need to get directions from someone who KNOWS how to get to that destination. These days, many people give directions to *Nibbāna* (i.e., facts about the Noble Path.) You cannot get to the correct destination if you follow someone who does not know the “path to *Nibbāna*.” If someone has attained at least the *Sotāpanna* stage, they would know.

- We discussed that in detail in the post “[The Sotāpanna Stage](#).”
- The other two requirements can be fulfilled ONLY through such a Noble friend, i.e., learn *Paṭicca Samuppāda* (Dhamma/Buddha Dhamma) and associated “*anudhamma*” (*Tilakkhaṇa*, *saṃyojana*, etc.) See #13 of “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”
- Now, you may ask: “Why do I need someone to tell me the correct path? Isn’t it described in the *Tipiṭaka*?” The problem is that the translations of *Tipiṭaka* are incorrect in most cases.

Degradation of Buddha Dhamma and the Revival of that “Distorted Version”

3. We are fortunate to have the original Pāli *Tipiṭaka*, as recited in the first four Buddhist Councils by *Arahants*. Those *Arahants* at the Fourth Council wrote down that Pāli *Tipiṭaka*. That was 2000 years ago. See, “[Preservation of the Buddha Dhamma](#).”

- However, the distortion of key concepts started soon after the Fourth Buddhist Council. The main reason for that was the mundane interpretations *Mahāyāna* Buddhism introduced in India about 2000 years ago.
- Even though Buddhism in India faded away and disappeared at least 500 years ago, those *Mahāyāna* concepts took root in many other Buddhist countries, including Sri Lanka. Therefore, even though the Pāli *Tipiṭaka* remained intact, its translations became incorrect. For example, the Sinhala translation of the *Tipiṭaka* (Buddha Jayanti edition) has *anicca* and *anatta* translated incorrectly as impermanence and “no-self.”
- When Europeans discovered Buddhism in Asian countries, those two (and more) misinterpretations were deeply rooted in all those countries. I have given a brief account in the post, “[Misinterpretation of Anicca and Anatta by Early European Scholars](#).”
- By the time Europeans arrived, Buddhism had declined in those countries. Most Buddhist places of worship were in poor condition. Those European scholars and the British government helped restore many of those places. More importantly, they collected and preserved the original Pāli documents, they are still in the British museum today. That is how the Pāli *Tipiṭaka* survived.
- European scholars readily accepted the incorrect interpretations that had taken root in most countries, including Sri Lanka. Even though they were “academic scholars”, they were even less familiar with the deep concepts in Buddha Dhamma. So, those “mundane interpretations” made perfect sense to them. They widely disseminated those incorrect interpretations using the printing press invented around that time. See “[Preservation of the Buddha Dhamma](#).”

“Mundane Interpretations” Are Easy to Grasp

4. There is a reason for the degradation of Buddha Dhamma. Let us consider two examples of *anicca* as impermanence and *Ānāpānasati* as breath meditation.

- It is very easy for anyone to see the “impermanent nature of things.” We can easily see that anything in this world is not permanent. Especially these days, science has shown that even our Sun will be destroyed in several billion years.
- In the same way, it is easy to accept that *Ānāpānasati* is breath meditation. Even though the more profound meaning is to “discard immoral” and “take in morals,” these days it is interpreted as “breathing

in and breathing out.” In addition, “watching the breath” calms the mind, so many people are impressed by that.

- Even though this gradual degradation started with *Mahāyāna*, those concepts gradually got incorporated into *Theravāda* Buddhism. A turning point was Buddhaghosa’s writing, especially his *Visuddhimagga*. For details, see “[Buddhaghosa’s Visuddhimagga – A Focused Analysis](#).”
- The Pāli *Tipiṭaka* was set aside in almost all Buddhist countries, and Buddhaghosa’s *Visuddhimagga* was adopted. The accepted theory was that there was no need to go through the 56 volumes of the *Tipiṭaka*. Buddhaghosa summarized it all in a single commentary!

Concepts in the *Tipiṭaka* Need to be Explained

5. Fortunately, there are three original commentaries prepared by *Arahants* that have survived as part of the *Tipiṭaka*: *Patisambhidamagga*, *Petakopadesa*, and *Nettipakarana*.

- No one had bothered to read them for hundreds of years. Even if read, it is impossible to grasp those deep concepts unless explained by a Noble Person (*Ariyā*). Such Noble Persons are born occasionally and they revive the correct teachings. They are “*jāti Sotāpannas*” who had attained the *Sotāpanna* stage in previous lives.
- Waharaka Thero was such a *jāti Sotāpanna*. In his discourses, he described how the correct meanings naturally came to him. When he grew up he was able to go through the *Tipiṭaka*. With the help of those three original commentaries mentioned above, he was able to revive the correct interpretations. Of course, each person needs to verify that by comparing his interpretations (which I provide on this website) with other interpretations.
- With that background, let us discuss the remaining two requirements for the *Sotāpanna* stage mentioned in #1 above. Hopefully, you can see which version is correct by comparing my analysis with other current versions.

Yoniso Manasikāra – Connection to *Paṭicca Samuppāda* and *Tilakkhaṇa*

6. The third condition for the *Sotāpanna* stage is to have “*yoniso manasikāra*.” Here “*yonī*” means “origin,” “*so*” means “oneself,” and “*manasikāra*” here means “with this in mind.”

- The origin of future existence (*bhava*) and births within them (*jāti*) is explained in *Paṭicca Samuppāda*. As we have discussed, “*avijjā paccayā saṅkhāra*” means to do “unwise actions due to ignorance of the Noble Truths.” That ALWAYS ends with “*bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka, parideva, dukkha, domanassupāyasā sambhavan’ti*” or the “whole mass suffering.”
- To put it another way, one’s future births (and associated suffering or happiness) are according to one’s actions. Births in the “good realms” lead to mostly happiness and births in “bad realms” lead to suffering. However, the problem is that MOST births are in the “bad realms.” At a deeper level, the reason for that is the tendency to act with “*ayoniso manasikāra*” the OPPOSITE of “*yoniso manasikāra*.”

7. The *Vibhangapakarana* (BJ edition Book 2, p. 234) explains *ayoniso manasikāra* as follows: “*Tattha katamo ayoniso manasikāro? Anicce “niccan”ti ayoniso manasikāro, dukkhe “sukhan”ti ayoniso manasikāro, anattani “attā”ti ayoniso manasikāro, asubhe “subhan”ti ayoniso manasikāro, saccavippaṭikulena vā cittassa āvaṭṭanā anāvaṭṭanā ābhogo samannāhāro manasikāro—ayaṃ vuccati “ayoniso manasikāro”.*”

- At Sutta Central, you can find it toward the end of section “3. *Tikaniddesa*” at “[WebLink: suttacentral: Khuddakavattuvibhaṅga \(KN vb 17\)](#)”
- In many English translations, *ayoniso manasikāra* is “**improper attention**.” See, for example, the “[WebLink: suttacentral: English Translation of Mahāli Sutta \(AN 10.47\)](#)” at Sutta Central.

- However, the above verse says: “*ayoniso manasikāra* is to consider *anicca* as *nicca*, *dukkha* as *sukha*, and *anatta* as *atta*.”
- To state that briefly, if one believes that things in this world can provide happiness in the long run, then one acts with *ayoniso manasikāra*. To act with *yoniso manasikāra* is to see the unfruitfulness of these struggles to attain something that is not attainable, and thus to work diligently towards at least the *Sotāpanna* stage because this life is so short.
- As discussed in many posts, this world has *anicca*, *dukkha*, and *anatta* nature. However, an average human (who has not understood Buddha Dhamma) perceives this world as *nicca*, *sukha*, and *atta* nature. See, “[Basic Framework of Buddha Dhamma](#).”
- A different but related description of *ayoniso manasikāra* in terms of *Paṭicca Samuppāda* is in “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”

Critical Inferences

8. The discussion in #6 and #7 points to the following.

Now it is clear that the third requirement is a natural extension of the first two requirements. Without a Noble friend, it is impossible to fulfill the third requirement, i.e., to understand what is meant by *yoniso manasikāra* because that requires an understanding of *anicca*, *dukkha*, and *anatta* (*Tilakkhaṇa*).

- It also confirms the value of the original three commentaries discussed in #5 above. The critical verse from *Vibhangapakarana* in #7 clarifies *yoniso manasikāra*.
- But an understanding of that verse REQUIRES comprehension of the true meanings of *anicca*, *dukkha*, and *anatta*.
- Recently, those meanings have become apparent due to our *kalyāṇa mittā*, Waharaka Thero. He provided a consistent picture based on the *Tiṭṭaka* simply because he was born a *jāti Sotāpanna*.
- The fourth requirement, *dhammānudhammapaṭipatti*, and its connection to *Paṭicca Samuppāda* in “[Dhammānudhamma Paṭipatti – Connection to Paṭicca Samuppāda/Tilakkhaṇa](#).”

Previous posts in this subsection at, “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).”

9.6.7 Dhamma – Different Meanings Depending on the Context

November 16, 2021; rewritten December 23, 2022

Dhamma means teaching, and *anudhamma* means associated concepts. Even though *dhamma* could mean any teaching, it is commonly used to indicate Buddha's teachings or “Buddha Dhamma.”

Introduction

1. In the post “[Yoniso Manasikāra and Paṭicca Samuppāda](#),” we discussed the four requirements for someone to attain the *Sotāpanna* stage. There we discussed the first three requirements. The fourth is *dhammānudhammapaṭipatti*. It means “to follow Buddha Dhamma and associated concepts.”

- The Pāli word *dhammānudhammapaṭipatti* is the combination of three words: *dhamma*, *anudhamma*, and *paṭipatti*. Note that when two Pāli words are combined and have “a”s at the joint, those two “a”s become a long “ā.” Thus, the combination of *dhamma* *anudhamma* leads to “*dhammānudhamma*.”
- Therefore, we need to discuss the words “*dhamma*” and “*anudhamma*.” As we will see, “*dhamma*” can have different meanings based on the context.
- We have many examples in English where the same word gives different meanings based on the context. For example, the term “right” conveys unrelated things in “turn right” and “you are right.”

- That is why it is dangerous to translate Pāli texts word-by-word, as commonly done these days. I have pointed out such issues with specific examples. See “[Distortion of Pāli Keywords in Paṭicca Samuppāda.](#)”

Different Types of Dhamma

2. Some people say, “I am learning Dhamma,” by which they mean, “I am learning Buddha Dhamma” or “Buddhism.”

- But Dhamma is the generic word applicable to any teaching or principle or a “path one follows.”
- If we need to be specific, “*sath Dhamma*” (pronounced “*saddhamma*”) to indicate “good” (“*sath*”) Dhamma. The opposite of that is “*adhamma*.”
- Any teaching other than Buddha Dhamma teaches one how to “succeed in this world,” i.e., how to make money and live a happy life. Other “religious teachings” may teach how to be born in *Deva* or *Brahma* realms. They are “*lokiya dhamma*.”
- But Buddha Dhamma teaches that it is impossible to remove future suffering via any of those ways. No matter how successful one can become, that success will end in death. The same holds for births in any heavenly realm. Any birth in this world ends in death.
- Thus, Buddha Dhamma is *saddhamma*, and all other Dhamma in this world are *adhamma*. Of course, there are different levels of *adhamma*, as we will see below (#11.).

3. We can take an analogy to clarify. The Pāli generic word for “odor” is “*gandha*.” The words “*sugandha*” and “*dugandha*” must be used to indicate a pleasant or foul odor.

- However, it is common to use the word “*gandha*” to mean “*dugandha*” (the exact words are used in the Sinhala language too.)
- Even in English, we say “it smells” to indicate a “bad odor.” However, “smell” means “odor.” To indicate a foul odor, we should say, “it smells bad,” just like when we say, “it smells good” to indicate a pleasing odor.
- Thus, one must be aware of these common usages. **In many cases, Buddha Dhamma is referred to as “Dhamma.”**

Dhammo have rakkhati dhammacārīṃ

4. The verse, “*Dhammo have rakkhati dhammacārīṃ*” means “Dhamma will **guide and protect** those who follow Buddha Dhamma.”

- The result of following a Buddha Dhamma is to be free of future rebirths with suffering. Thus, the goal is to be free of even a trace of suffering.
- If one follows *adhamma*, one will end up in an *apāya* sooner or later. That is explained in *Paṭicca Samuppāda*.

Adhamma and Saddhamma

5. “[WebLink: suttacentral: Dhamma Sutta \(AN 10.182\)](#)” succinctly describes *adhamma* and *saddhamma* (note that the *sutta* uses “*dhamma*” to denote “*saddhamma*.”)

- **Adhamma are the *dasa akusala*:** *Pāṇātipātā, adinnādāna, kāmesumicchācāra, musāvāda, piṣuṇā vācā, pharusā vācā, samphappalāpa, abhijjhā, vyāpāda, micchā diṭṭhi*. They are: “killing, stealing, sexual misconduct, lying, slandering, harsh talk, empty talk, greed, hate, and wrong views.”
- The same *sutta* defines *saddhamma* as the **avoidance of *dasa akusala***.
- There are subtle issues to discuss. But the above *sutta* provides the basic idea.

Anāriyadhamma and Ariyadhamma

6. Sometimes, the words “*anāriya dhamma*” and “*Ariya dhamma*” are used in place of *adhamma* and *saddhamma*.

- See, for example, “[WebLink: suttacentral: Ariyadhamma Sutta \(AN 10.179\).](#)”
- As we can see, they are defined based on *dasa akusala*, the same way as *adhamma* and *saddhamma*.
- Many other religions do not strictly teach avoiding killing animals. Furthermore, all other religions have several of the ten types of wrong views (*micchā diṭṭhi*.) Thus, only **Buddha Dhamma** is strictly *saddhamma* or *Ariya dhamma*.”
- These and related concepts are described in many *suttas*, some of which are discussed in “[Dasa Akusala/Dasa Kusala – Basis of Buddha Dhamma.](#)”

Asappurisa and Sappurisa

7. Those who follow *saddhamma* or *Ariya dhamma* are “*sappurisa*” (“*sath*” + “*purisa*.”) They are the eight types of Noble Persons (*Ariyas*) who are at or above the *Sotapanna Anugāmi* stage.

- That is evident in the “[WebLink: suttacentral: Sappurisadhamma Sutta \(AN 10.192\).](#)” Another synonym for *adhamma* is introduced in that *sutta*, “*asappurisadhamma*,” indicating that an *asappurisa* engages in *dasa akusala*. The opposite, “*sappurisadhamma*,” is the same as “*saddhamma*.”
- As we know, one of the four conditions to attain the *Sotāpanna* stage is to **associate with a sappurisa** or “*Sappurisasamsevo*.” See #3 of “[Four Conditions for Attaining Sotapanna Magga/Phala.](#)”
- **Thus, it is clear that a “sappurisa” is a Noble Person (Ariya), not merely a “good person”** as translated in “[WebLink: suttacentral: Sappurisadhamma Sutta \(AN 10.192\).](#)”

Why Are “Moral People” Not Included in “Sappurisa”?

8. We tend to think that most people are moral. But then there are cases where a person entirely accepted as a “moral person” commits a highly-immoral deed such as rape or taking a large bribe.

- Any person who has not attained at least the *Sotāpanna Anugāmi* stage can be tempted to engage in an immoral deed. Anyone with *sakkāya diṭṭhi* can be triggered to commit an *apāyagāmi* deed (an action that can lead to rebirth in an *apāya*)!
- This can be explained easily with an analysis of a *citta vūthi*. A *citta vūthi* runs based on an *ārammaṇa*. If the *ārammaṇa* is strong enough, the “decision to engage” is made at the *votthapana citta* and carried out with the subsequent *javana citta*. Suppose the person has not overcome the first three *saṃyojana* (including *sakkāya diṭṭhi*). If the *ārammaṇa* is strong enough, the “decision to engage” is made within a split second, even without conscious decision-making.
- I have explained the basic process in “[Avyākata Paticca Samuppāda for Vipāka Viññāna.](#)” I plan to write more about that in the future.

***Paṭicca Samuppāda* Is Buddha Dhamma!**

9. The “[WebLink: suttacentral: Mahāhatthipadopama Sutta \(MN 28\)](#)” ends with the statement, “*Yo Paṭtīcasamuppādam passati, so Dhammam passati; yo Dhammam passati so paṭtīcasamuppādam passatī*”ti.” That means, “One who sees *Paṭicca Samuppāda* sees the **Dhamma**; one who sees the Dhamma sees *Paṭicca Samuppāda*.” **To understand Buddha Dhamma, one needs to know how future suffering arises via the *Paṭicca Samuppāda* process.**

- In the above verse, “Dhamma” refers to Buddha Dhamma or “*saddhamma*.”

- In other words, *Paṭicca Samuppāda* is the same as **Buddha Dhamma**. It describes the **Four Noble Truths**.
- See, for example, “[WebLink: suttacentral: Tithāyatana Sutta \(AN 3.61\)](#).”

Dhamma and Anudhamma

10. *Dhamma* is the “principle/main Dhamma,” and *anudhamma* refers to “minor/related Dhamma.”

- *Paṭicca Samuppāda* is the Dhamma in Buddha Dhamma. See #9 above.
- All other related teachings/concepts, **like *Tilakkhaṇa*, are *anudhamma***.
- There are four *suttā*, starting with the “[WebLink: suttacentral: Anudhamma Sutta \(SN 22.39\)](#)” that describe various “*anudhamma*” like *anicca*, *dukkha*, and *anatta*.

All Other Dhamma Are *Lokiya* Dhamma

11. Regarding *lokiya dhamma* that sustains worldly entities, *dasa akusala* leads to rebirths in the four lowest realms (*apāyā*.) These are also called “*pāpa kamma*.” These are listed in the “[WebLink: suttacentral: Pathamaadhamma Sutta \(AN 10.171\)](#)” as “killing living creatures, stealing, and sexual misconduct; speech that is false, divisive, harsh, or nonsensical; greed, ill will, and wrong view.”

- The same *sutta* lists the **avoidance of the above ten types** as *dhamma*, i.e., “**good dhamma**.”
- Thus we can see that teachings in other religions have many “good *dhamma*” but also have “*adhamma*,” especially in terms of wrong views (e.g., the view of an eternal self/soul/*ātman*.)

12. Then what are the “*anudhamma*” in those cases of “*lokiya dhamma*”? There are three *anudhamma* associated with each (*a*)*dhamma*.

- For example, killing living beings is an *adhamma*. Helping others in killings, encouraging others to kill, and praising killings by others are the *anudhamma* associated with that *adhamma*. While personally making a killing is the worst, helping others to kill, encouraging others to kill, and praising killings by others also count as evil deeds and will have dire *kammic* consequences.
- Avoiding killing living beings is a (good) *dhamma*. Not helping others in killings, not encouraging others to kill, and not praising killings by others are *anudhamma* and also count as “good deeds.”

Lokiya Dhamma and Buddha Dhamma

13. Another way to categorize Dhamma is as “*lokiya dhamma*” and Buddha Dhamma.

- “*Lokiya*” means “belonging to this world of 31 realms. *Dhammā* (with a long “a”) that “bear things in this world” arise via *Akusala-Mūla Paṭicca Samuppāda*. See “[What are Rūpa? – Dhammā are Rūpa too!](#)”
- As we know, that process starts with “*avijjā paccayā saṅkhāra*” and leads to “*upādāna paccayā bhava*” and “*bhava paccayā jāti*.” That is how anything in this world is born (*jāti*.)
- To be precise, *Akusala-Mūla Paṭicca Samuppāda* explains how existences and rebirths arise due to the accumulation of “*lokiya dhamma*.” Some *lokiya dhammas* lead to rebirths in the “good realms;” teachings of other religions belong to this category.
- **However, they also fall under the *Akusala-Mūla Paṭicca Samuppāda***, starting with “*avijjā paccayā saṅkhāra*,” i.e., actions based on *avijjā* or ignorance of the Four Noble Truths. See “[Saṅkhāra – What It Really Means](#).”

14. On the other hand, the *Kusala-Mūla Paṭicca Samuppāda* process starts with “*kusala-mūla paccayā saṅkhāra*” and leads to “*adhimokkha paccayā bhava*” and “*bhava paccayā jāti*.” But here, only “*Ariya jātī*” can arise, i.e., only the eight types of Noble Persons are “born.” Of course, these “births” happen during a lifetime. For example, an average human can become a *Sotāpanna*.

- **Comprehension of both versions** of *Paṭicca Samuppāda* will lead to stopping future rebirths (*bhava uddha* = **Buddha**) and attaining *Nibbāna*. Thus, **Buddha Dhamma** means “**Dhamma** that leads to *bhava uddha* or stopping rebirths.” That is the “*lokuttara dhamma*,” or the deeper version of Dhamma.

Arahanthood Is Not Annihilation

15. Some people are terrified of “losing their existence” with *Nibbāna*. They ask, “Will I be annihilated/eradicated?” That question is asked with the wrong view of an “everlasting soul/*ātman*.”

- Only a person with *sakkāya diṭṭhi* will raise that question. When one removes *sakkāya diṭṭhi*, one knows there is no “me” or “I” traversing the rebirth process. Rebirths are according to existing causes and conditions.
- **In any case, why worry if there is indeed an everlasting “I” or “me”?** If that is the case, there should be no fear of losing something permanent.
- There is nothing everlasting to be annihilated or eradicated! *Anuloma* PS leads to existences, and *Paṭiloma* PS leads to the stopping of that process; see “[Patiloma Paticca Samuppāda – Key to Nibbāna](#).” Also, see “[Yamaka Sutta \(SN 22.85\) – Arahanthood Is Not Annihilation but End of Suffering](#).”

16. However, the description in #15 DOES NOT say we do not exist. **It is wrong to translate “anatta” as “no-self.”** We do exist as long as we have ignorance (*avijjā*) and experience much more suffering than brief spans of happiness in the rebirth process.

- The Buddha pointed out that we commit immoral deeds and are born in suffering-filled realms BECAUSE of the **wrong view and wrong perception** of an everlasting soul/*ātman*. *Avijjā* (ignorance of Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*) is the cause of both.)
- One gets rid of that wrong view (*sakkāya diṭṭhi*) at the *Sotāpanna* stage. But the perception (*saññā*) of an everlasting soul/*ātman* goes away at the *Arahant* stage. Suffering stops entirely at the *Parinibbāna* (passing away) of the *Arahant*. See “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”
- As I emphasized in #15, one should not worry about “being annihilated” if their view of an everlasting soul/*ātman* is correct. But the Buddha proved with *Paṭicca Samuppāda* that such an everlasting entity does not exist. See “[Patiloma Paticca Samuppāda – Key to Nibbāna](#).”
- Reading and understanding all the posts linked above is essential if one has the desire and drive to comprehend Buddha Dhamma.

9.6.8 Dhammānudhamma Paṭipatti – Connection to Paṭicca Samuppāda/Tilakkhaṇa

November 21, 2021

Dhammānudhamma Paṭipatti Leads one to *Nibbāna*.

What Is *Dhammānudhamma Paṭipatti*?

1. The Pāli word *dhammānudhammapaṭipatti* (*dhamma anudhamma paṭipatti*) is the combination of three words: *dhamma*, *anudhamma*, and *paṭipatti*. In the previous post, we did an overview: “[Dhamma – Different Meanings Depending on the Context](#).”

- Dhamma* here is Buddha Dhamma. The “[WebLink: suttacentral: Mahāhatthipadopama Sutta \(MN 28\)](#)” ends with the statement, “*Yo Paṭiccasamuppādam passati, so Dhammam passati; yo Dhammam passati so paṭiccasamuppādam passatī*”ti.” That means, “One who sees *Paṭicca Samuppāda* sees the Dhamma; one who sees the Dhamma sees *Paṭicca Samuppāda*.” **To**

understand Buddha Dhamma, one needs to know how future suffering arises via the *Paṭicca Samuppāda* process.

- ii. We discussed “*anudhamma*” briefly in the previous post. Those are other aspects (one could say, subcategories) that fall under *dhamma*. There are four *suttas* that clarify “*anudhamma*” at a deeper level. They are “[WebLink: suttacentral: Anudhamma Sutta \(SN 22.39\)](#)” through “[WebLink: suttacentral: Catutthaanudhamma Sutta \(SN 22. 42\)](#)” We will discuss them below. **Simply stated, “*anudhamma*” means “according to Dhamma” or “according to *Paṭicca Samuppāda*.”**
- iii. *Paṭipatti* is conduct or practice.

Therefore, the literal translation of *dhammānudhammappaṭipatti* is “to live according to *dhamma* and *anudhamma*.”

Requirements for the *Sotāpanna* Stage

2. We listed the four requirements for someone to attain the *Sotāpanna* stage in a previous post, “[Yoniso Manasikāra and Paṭicca Samuppāda](#).” There we discussed the first three requirements.

- The first two requirements reflect that one must hear the “previously unknown teachings of the Buddha” from a Buddha or a true disciple of a Buddha who has understood those teachings. The framework of Buddha Dhamma can be stated in three inter-related ways: Four Noble Truths, *Paṭicca Samuppāda*, *Tilakkhaṇa*.
- The third condition (*yoniso manasikāra*) is to UNDERSTAND those concepts, i.e., how the suffering-filled rebirth process continues because the true nature of this world is not understood.
- The fourth condition (*dhammānudhammappaṭipatti*) is where that understanding becomes established permanently in mind. That happens when it becomes clear without a doubt that the word of 31 realms has the three characteristics of *anicca*, *dukkha*, *anatta*, and thus it is not possible to stop future suffering until stopping of the rebirth process.

Anudhamma – At Deeper Level

3. As we discussed in the previous post, “*anudhamma*” — at the primary level — means “moral living.” After comprehending the deeper Dhamma, one would realize that just moral living is not enough to stop suffering in future lives.

- **Deeper level *anudhammā* are concepts related to *Paṭicca Samuppāda*. *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*) are those *anudhammā*.**
- It is important to note that “moral living” is based on mundane versions of *alobha*, *adosa*, and *amoha* have “hidden ignorance.” That is ignorance of *Tilakkhaṇa*.

4. *Anudhamma* at the deeper level is discussed in a series of four *suttas*, as mentioned in #1 above. Following is the English translation of the “*Anudhamma Sutta* (SN 22.39)”:

- “A *bhikkhu* lives by the Dhamma (*Dhammānudhammappaṭipadā*), after he understands what is meant by *Dhamma* (i.e., *Paṭicca Samuppāda*). Then **he lives without attaching (*nibbidābahulo*)** to *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*. He fully understands the real nature of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* and thus he is freed from rebirth, aging, and death; he is free from sorrow, lamentation, pain, displeasure, and despair; he is free from all suffering (through future rebirths).”
- The Pāli verse is in [Ref. 1](#) below.
- The next three *suttas* in that series explain why a *bhikkhu* would not attach to (or crave) anything in this world (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*)

Connection to *Tilakkhaṇa*

5. The REASON why someone would not attach to (or crave) *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* is he has understood that they all have *anicca*, *dukkha*, *anatta* nature! That is explicitly stated in the three *suttas* of [Ref. 2](#), [Ref. 3](#), and [Ref. 4](#) below.

- “[WebLink: suttacentral: Dutiya Anudhamma Sutta \(SN 22.41\)](#)” states that such a *bhikkhu* would have seen the **anicca nature** of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* (the five aggregates or *pañcakkhandha*.)
- “[WebLink: suttacentral: Tatiya Anudhamma Sutta \(SN 22.42\)](#)” states that such a *bhikkhu* would have seen the **dukkha nature** of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* (the five aggregates or *pañcakkhandha*.)
- “[WebLink: suttacentral: Catuttha Anudhamma Sutta \(SN 22.43\)](#)” states that such a *bhikkhu* would have seen the **anatta nature** of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* (the five aggregates or *pañcakkhandha*.)

Connection to the First Discourse – *Dhammacakkappavattana Sutta*

6. We note that the Buddha is referring to the five aggregates (*pañcakkhandha*) above.

- **Attaching** to *pañcakkhandha* is *pañcupādānakkhandha* (*pañca upādāna khandha*). That is the root cause of future suffering.
- One would lose the craving for things in this world when he sees the dangers of such desires. As we have discussed, “this world” means *rūpa* in this world and our mental impressions of them (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*.) That is *pañcupādānakkhandha*.
- We have discussed the fact that the Buddha summarized suffering as “*saṅkhittena pañcupādānakkhandhā dukkhā*.” See, “[Essence of Buddhism – In the First Sutta](#).”
- The main task in studying Buddha Dhamma is to understand the truth of the above statement. There are many ways to tackle that.

Different Approaches

7. The [puredhamma.net](#) website is tailored to provide that understanding. I have presented it in several ways. The most recent approach started with the section, “[Basic Framework of Buddha Dhamma](#).” Then we proceeded to the next step: “[Paticca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).” This current post is in the second section.

- In those sections, we discussed *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*) or three characteristics of this world. We can summarize them as follows: *Anicca* means our expectation to get rid of suffering cannot be achieved within this world. *Dukkha* means what we perceive to be desirable in this world leads to suffering. *Anatta* means “therefore, any efforts to get rid of suffering would be in vain.”
- Ignorance of *Tilakkhaṇa* (*avijjā*) leads to unwise actions via *saṅkhāra*. In an 11-step process that leads to future births and, thus, the continuation of suffering. That process is *Paticca Samuppāda*. It describes how our efforts (*saṅkhāra*) based on *avijjā* WILL INEVITABLY lead to rebirth among the 31 realms. While some of those existences are mostly suffering-free, they are only temporary, AND the probability of such “good births” is very low. Most rebirths are in the suffering-filled four lowest realms (*apāyās*.)

Dhammānudhamma Paṭipatti Leads to Nibbāna

8. The “[WebLink: suttacentral: Nalakalāpī Sutta \(SN 12.67\)](#)” has the following verse at the end (see [Ref. 5](#) below): “If a *bhikkhu* is practicing for the purpose of release from aging-and-death via losing attachment (*virāgāya*) and cessation (*nirodhāya*), he can be called a *bhikkhu* who is practicing in accordance with the Dhamma (*dhammānudhammapaṭipanno*). If through such practice a *bhikkhu* has lost attachment

(*virāgāya*) and attained cessation (*nirodhāya*), he can be called a *bhikkhu* who has **attained Nibbāna** in this very life..”

References

1. The “[WebLink: suttacentral: Anudhamma Sutta \(SN 22.39\)](#)” states:

“Dhammānudhammappaṭipannassa, bhikkhave, bhikkhuno ayam **anudhammo hoti** yaṃ rūpe **nibbidābahulo** vihareyya, vedanāya **nibbidābahulo** vihareyya, saññāya **nibbidābahulo** vihareyya, saṅkhāresu **nibbidābahulo** vihareyya, viññāṇe **nibbidābahulo** vihareyya. Yo rūpe **nibbidābahulo** viharanto, **vedanāya ... saññāya ... saṅkhāresu** **nibbidābahulo** viharanto, **viññāṇe nibbidābahulo** viharanto rūpaṃ parijānāti, vedanaṃ ... saññaṃ ... saṅkhāre ... viññāṇaṃ parijānāti, so rūpaṃ parijānaṃ, vedanaṃ ... saññaṃ ... saṅkhāre ... viññāṇaṃ parijānaṃ parimuccati rūpamhā, parimuccati vedanāya, parimuccati saññāya, parimuccati saṅkhārehi, parimuccati viññāṇamhā, parimuccati jātiyā jarāmaraṇena sokehi paridevehi dukkhehi domanassehi upāyāsehi, parimuccati dukkhasmāti vadāmī”ti.

2. The “[WebLink: suttacentral: Dutīya Anudhamma Sutta \(SN 22.40\)](#)” states: “Dhammānudhammappaṭipannassa, bhikkhave, bhikkhuno ayam **anudhammo hoti** yaṃ rūpe **aniccānupassī** vihareyya ...pe (vedanāya ... saññāya ... saṅkhāresu...viññāṇe **aniccānupassī**) ... parimuccati dukkhasmāti vadāmī”ti.

3. The “[WebLink: suttacentral: Tatiya Anudhamma Sutta \(SN 22.41\)](#)” states: “Dhammānudhammappaṭipannassa, bhikkhave, bhikkhuno ayam **anudhammo hoti** yaṃ rūpe **dukkhānupassī** vihareyya ...pe (vedanāya ... saññāya ... saṅkhāresu...viññāṇe **dukkhānupassī**)... parimuccati dukkhasmāti vadāmī”ti.

4. The “[WebLink: suttacentral: Catuttha Anudhamma Sutta \(SN 22.42\)](#)” states (full version as in [Ref. 1](#)): “Dhammānudhammappaṭipannassa, bhikkhave, bhikkhuno ayam **anudhammo hoti** yaṃ rūpe **anattānupassī** vihareyya, vedanāya ... saññāya ... saṅkhāresu ... viññāṇe **anattānupassī** vihareyya. Yo rūpe **anattānupassī** viharanto ...pe... rūpaṃ parijānāti, vedanaṃ ... saññaṃ ... saṅkhāre ... viññāṇaṃ parijānāti, so rūpaṃ parijānaṃ, vedanaṃ ... saññaṃ ... saṅkhāre ... viññāṇaṃ parijānaṃ parimuccati rūpamhā, parimuccati vedanāya, parimuccati saññāya, parimuccati saṅkhārehi, parimuccati viññāṇamhā, parimuccati jātiyā jarāmaraṇena sokehi paridevehi dukkhehi domanassehi upāyāsehi, parimuccati dukkhasmāti vadāmī”ti.

5. The verse from the “[WebLink: suttacentral: Nalakalāpī Sutta \(SN 12.67\)](#)” : “Jarāmaraṇassa ce, āvuso, bhikkhu **nibbidāya virāgāya nirodhāya** dhammaṃ deseti, dhammakathiko bhikkhūti alaṃvacanāya. Jarāmaraṇassa ce, āvuso, bhikkhu **nibbidāya virāgāya nirodhāya paṭipanno hoti**, dhammānudhammappaṭipanno bhikkhūti alaṃvacanāya. Jarāmaraṇassa ce, āvuso, bhikkhu nibbidā virāgā nirodhā **anupādā vimutto hoti, diṭṭhadhammanibbānappatto** bhikkhūti alaṃvacanāya.”

6. I have discussed only a few *suttā* pertaining to this subject. Some other relevant *suttā* are: SN 12.16, 12.67; SN 22.115, 22.116; SN 35.155; SN 51.10; SN 55.25; Ud 6.1; MN 113; AN 4.6, 4.7, 4.97; AN 7.68; AN 8.25, 8.26, 8.62, 8.70, 8.78, 8.82, AN 10.83, DN 16, DN 29.

9.7.1 Distortion of Pāli Keywords in Paṭicca Samuppāda

November 29, 2021; revised October 16, 2022

Distortion of Pāli keywords in *Paṭicca Samuppāda* is quite common in current English translations. I will analyze two critical *suttas* to make that clear.

First Two *Suttas* in *Udāna*

1. The *suttas* in the *Udāna* section are the “joyful utterances” of the Buddha and many of his disciples. Let us look at the first two *suttas* in *Udāna*. They describe how the Buddha comprehended *anuloma* and *paṭiloma* *Paṭicca Samuppāda* during the night of the Enlightenment. First, I will reproduce the English translations of the two *suttas* verbatim. [*paṭiloma* : [adj.] reverse; opposite; contrary.]

The following verse is from the first *sutta*. The Pāli version of the corresponding verses is in [Ref. 1](#) :

“In the first part of the night, he reflected on dependent origination in forwarding order:

When this exists, that is, due to the arising of this, that arises. That is: Ignorance is a condition for choices. Choices are a condition for consciousness. Consciousness is a condition for name and form. Name and form are conditions for the six sense fields. The six sense fields are conditions for contact. Contact is a condition for feeling. The feeling is a condition for craving. Craving is a condition for grasping. Grasping is a condition

for continued existence. Continued existence is a condition for rebirth. Rebirth is a condition for old age and death, sorrow, lamentation, pain, sadness, and distress to come to be. That is how this entire mass of suffering originates.”

- The complete English translation: “[WebLink: suttacentral: Upon Awakening \(1st\) by Sujato \(KN Ud 1.1\).](#)” The second translation is almost the same: “[WebLink: suttacentral: The First Discourse about the Awakening Tree by Anandajoti \(KN Ud 1.1\).](#)”

2. The following verse is from the second *sutta*. The Pāli version of the corresponding verses is in [Ref. 2](#) :

“In the second part of the night, he reflected on dependent origination in reverse order:

When this doesn’t exist, that is not; due to the cessation of this, that ceases. That is: **When ignorance ceases, choices cease. When choices cease, consciousness ceases.** When consciousness ceases, name and form cease. When name and form cease, the six sense fields cease. **When the six sense fields cease, contact ceases. When contact ceases, feeling ceases.** When feeling ceases, craving ceases. When craving ceases, grasping ceases. When grasping ceases, continued existence ceases. When continued existence ceases, rebirth ceases. When rebirth ceases, old age and death, sorrow, lamentation, pain, sadness, and distress cease. That is how this entire mass of suffering ceases.”

The complete English translation: “[WebLink: suttacentral: Upon Awakening \(2nd\) by Sujato \(KN Ud 1.2\).](#)” The second translation there is almost the same: “[WebLink: suttacentral: The Second Discourse about the Awakening Tree by Anandajoti \(KN Ud1.2\).](#)”

Overview of the Two Suttas

3. Those two *suttas* summarize the key findings of the Buddha upon his Enlightenment.

- The first *sutta* describes how future suffering arises via future rebirths. It all starts with the step, “*avijjā paccayā saṅkhārā*.”
- The second *sutta* explains that removing ignorance from a mind prevents **future rebirths**.

4. Both English translations of the second *sutta* are blatantly incorrect. Buddha’s mind became free of ignorance (*avijjā*) upon Enlightenment that night. **Does that mean he stopped all the subsequent steps as stated in the translation of #2 above?**

- If so, he would not have generated any *saṅkhāra* from the moment of attaining Enlightenment (Buddhahood.) *Vedanā* and *saññā* are in ALL types of *saṅkhāra*. Does that mean he would not feel anything or be unable to perceive and identify anything?
- The literal word-by-word translation is blatantly wrong for all the steps in the second *sutta*.
- The cessation of those steps would also hold for any *Arahant* since they have no trace of *avijjā* left in their minds!

Insane Discussions in Discussion Forums

5. There is a recent discussion at Dhamma Wheel: “[WebLink: dhammawheel.com: Do Arhats experience contact with their sixfold sense media? What about vedanā?](#)” It is a clear example of the confusion caused by such translations. The participants are understandably confused by the above translation of the second *sutta* in #2.

- The translation in #2, without a doubt, says that when *avijjā* is not there, choices (*saṅkhāra*), consciousness, name and form, six sense fields, contact (with the sense fields), feeling, craving, grasping (*upādāna*), continued existence (*bhava*), rebirth, and the entire mass of suffering ceases.
- We all agree that the Buddha and *Arahants* do not have even a trace of *avijjā* (ignorance about the Four Noble Truths) left.

- Then, according to the translations in #2 above, they would not generate any more *saṅkhāra*. They do not experience the six sensory facilities (i.e., don't hear, taste, smell, touch, or think) and will not feel anything. That means they would essentially not be living!
- On the contrary, we know that the Buddha lived for 45 years after Enlightenment. He experienced all six sensory faculties, used them optimally, and had the best mind. He could recall any event in the past as far as he desired. But he also felt all types of *vedanā*, including bodily *dukkha vedanā* (he had back problems and once was injured by Devadatta)

6. So, where is the problem? Is that second *sutta* wrong?

- Both *suttas* are perfectly fine. Such problems arise when translators start translating Pāli *suttas* word-by-word without paying attention – or not understanding the basic concepts in Buddha Dhamma.
- As I have repeatedly emphasized, each Pāli word (especially in deep *suttas*) needs to be handled in the context of the discussed issue. We run into similar situations, even in English. The word “**park**” means two different things in the same sentence, “She will **park** the car so we can walk in the **park**.”

Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa

7. The steps in *Paṭicca Samuppāda* (and those in the reverse or the *Paṭiloma Paṭicca Samuppāda*) are in the “utterance (*uddesa*)” form. That is to recite the 11 steps.

- Those steps need explanations in either the *niddesa* (brief descriptions) or the *paṭiniddesa* (detailed explanations.) Details at “[Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa](#).”
- There are many verses like that in the *Tipiṭaka*. Another is “*Ye dhammā hetuppabhavā, Tesam hetum tathāgato āha; Tesañca yo nirodho, Evaṃvādī mahāsamaṇo.*” Upatissa (Ven. Sāriputta before becoming a *bhikkhu*) attained the *Sotāpanna* stage just by hearing the “*uddesa* version.” Of course, he was the chief disciple of the Buddha and had the sharpest mind next to the Buddha.
- For a few other people at the time of the Buddha, the *niddesa* version would have been enough to understand the meaning of that verse.

8. However, for most people, that verse needs to be explained in detail, i.e., the *paṭiniddesa* version is required. **Most current English translations provide word-by-word translations of that “*uddesa* version” without any explanation.** That can have disastrous outcomes, as illustrated by the translation of the second *sutta* in #2 above.

The following chart illustrates the problem I am trying to highlight. The first column shows the “*uddesa* version” of the *sutta* in the *Tipiṭaka*. The Sutta Central “word-by-word translation” of that *uddesa* version is in column 2, which is incorrect.

Download pdf: [“WebLink: PDF Download: Paticca Samuppāda Figure”](#)

Niddesa and Paṭiniddesa Versions of Some Steps in Paṭicca Samuppāda

9. I have explained those 11 steps in *Paṭicca Samuppāda* in many posts. Below I will briefly state the correct interpretations. It is impossible to discuss even a single term with a single essay.

- First, *saṅkhārā* in the step “*avijjā paccayā saṅkhārā*” refers to “*abhisāṅkhārā*.” [“WebLink: suttacentral: Patिकासamuppāda Vibhaṅga \(Abhidhamma Vb 6\)”](#) explains the step “*avijjā paccayā saṅkhārā*” as, “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisāṅkhāro, apuññābhisāṅkhāro, āneñjābhisāṅkhāro.*” **Translated:** “What is meant by ‘*avijjā paccayā saṅkhārā*’? That means *Puññābhisāṅkhāra, apuññābhisāṅkhāra, āneñjābhisāṅkhāra.*” For details, see [“Saṅkhārā – What It Really Means.”](#)
- Abhisāṅkhārā* leads to the cultivation of “*kamma viññāṇa*,” which are different from *cakkhu viññāṇa*, *sota viññāṇa*, etc. The latter are the six sensory fields, which are “*vipāka viññāṇa*.”
- Therefore, an *Arahant* would have the six sensory fields intact (contrary to the translation in #2 above) but would not generate *kamma viññāṇa*. See, [“Viññāṇa – What It Really Means.”](#)
- Nāmarūpa* in the step “*viññāṇa paccayā nāmarūpa*” is a bit harder to explain. See: [“Kamma Viññāṇa and Nāmarūpa Pariccheda Ñāṇa.”](#) I may get to address all these terms again, but let us finish our overview.

10. In the next step, “*salāyatana*” does not refer to the “six sense fields” but only when those sensory fields (*indriya*) are used as “*āyatana*.” For example, an *Arahant* would have “*cakkhu indriya*,” i.e., he can see just like anyone else. But an *Arahant* would not use eyes for pleasure-seeking, and thus it will not become “*cakkhu āyatana*” (or “*cakkhāyatana*.”) See, [“How Do Sense Faculties Become Internal Āyatana?”](#)

The above becomes clear when we look at the next step, “*saḷāyatana paccayā phasso.*” Here, “*phassa*” means “*samphassa.*” The contact between *cakkhu* and *rūpa* is “*phassa,*” and that leads to “seeing” or “*cakkhu viññāṇa.*” Details at “[Indriya Make Phassa and Āyatana Make Samphassa.](#)”

- A special kind of “*phassa*” (*samphassa*) comes into play JUST AFTER that “seeing” or “*cakkhu viññāṇa.*” As I explained in that post, “*samphassa*” means “contact of the mind with *lobha, dosa, moha* (defilements in mind called *anusaya.*)” That will happen ONLY IF one gets attached to that sight. Such “*samphassa*” then leads to “*samphassa-jā-vedanā.*” That is a type of *vedanā* made up by a defiled mind. Therefore, the *niddesa* version of “*phassa paccayā vedanā*” is “*samphassa paccayā samhassa-jā-vedanā.*”
- It is *samphassa-jā-vedanā* that leads to *taṇhā* in the step “*vedanā paccayā taṇhā.*” Therefore, not all *vedanā* lead to *taṇhā*. It is only those *samphassa-jā-vedanā* that lead to *taṇhā*.

Correct Explanation of the Second Sutta

11. Now, one should get at least an idea of the real meaning of the second *sutta*.

- A living *Arahant* would not generate *abhisankhāra* (which involves *lobha, dosa, and moha* to various degrees.) But an *Arahant* can think, speak, and do bodily actions. Those involve *mano, vacī, and kāya sankhāra*. But they will not become *abhisankhāra*!
- Living *Arahants* can see, hear, etc., as anyone else. Thus, they will have all six sensory faculties. But they will not use them seeking sensory pleasures, i.e., they will not become “*āyatana.*”
- Each sensory event will have *vedanā cetasika*. That means an *Arahant* can “feel” just like anyone else. But there will be no “*samphassa-jā-vedanā.*”
- Of course, since there is no *taṇhā*, the rest of the steps will not materialize, i.e., there will be no *upādāna, bhava, or jāti* (future rebirths.)

12. Any rebirth (*jāti*) leads to “old age and death, sorrow, lamentation, pain, sadness, and distress,” as stated in #1. Since an *Arahant* would not be reborn, all such suffering would not arise. That is the “*parinibbāna*” (or “full *Nibbāna*”) reached by an *Arahant* at the death of the physical body.

- However, focusing on “ending rebirths” is not advisable at the beginning of the Path. If a child thinks about getting a Ph D. in nuclear physics, she will be quickly discouraged. She must first go through primary and secondary schools. One’s first goal should be the *Sotāpanna* stage; even then, one must first learn the basic concepts. See, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)” Still, it is a good idea to have the “big picture” laid out by the Buddha (and the ultimate goal of *Nibbāna*) in the back of the mind.

Summary

13. We can reach two critical conclusions.

- i. *Paṭicca Samuppāda* IS Buddha Dhamma. Simply stating the 11 steps is useless. A detailed explanation of each step is necessary.
 - ii. There is danger in translating Pāli verses word-by-word without understanding their meanings which depend on the context.
- It is sad to go through discussions in various “Buddhist discussion forums” to see how many people struggle to figure out the true meanings/concepts in multiple *suttas*. But they run into problems because most translations are wrong, and there are apparent contradictions.
 - This “mindless word-by-word translation process” has been going on for years. Just read old posts at Dhamma Wheel. Many topics have been repeatedly discussed, citing the identical wrong translations! **But those translations are not consistent with other translations (by even the same author)**

because the translators do not understand the meanings of keywords in the context of some *suttas*. Many words have different meanings depending on the context. For example, “*viññāṇa*” DOES NOT mean the same thing everywhere! That is the problem. See my recent post, “[Dhamma – Different Meanings Depending on the Context](#).”

- It is time for those translators to come to their senses and learn the genuine and pure Buddha Dhamma and not continue cranking out meaningless translations of highly-condensed *suttā*!

9.7.1.1 Saṅkhāra – An Introduction

.1

January 26, 2023; rewritten March 26, 2023

It is critically important to understand what is meant by “*saṅkhāra*.” Without getting a basic idea of *saṅkhāra*, one cannot hope to understand *Paṭicca Samuppāda*, i.e., Buddha’s teachings.

Buddhism – In Charts: 7. Saṅkhāra – An Introduction

Download/Print: [“WebLink: PDF Download: 7. Saṅkhāra – An Introduction”](#)

Saṅkhāra – Various Types

1. *Saṅkhārā* arise in mind in response to sensory inputs (*ārammaṇa*.) They are “a mixture of feeling/perception/intention” arising based on the *ārammaṇa* AND one’s *gati*. Those arising automatically (without thinking) are “*citta/mano saṅkhāra*.” Then we may start thinking about the *ārammaṇa* with “*vacī saṅkhāra*” and may speak out with them too. If we start bodily actions, those involve stronger *kāya saṅkhāra*. That is one primary division of *saṅkhāra*. All living beings (including *Arahants*) generate them.

- Our thoughts, speech, and actions can be defiled/corrupted by greed (*lobha*), anger (*dosa*), or ignorance (*moha*); those would fall into **apuñña/akusala (immoral) saṅkhāra**. They can bring **harmful consequences in the future**; thus, the prefix “*abhi*” is attached too, i.e., they are **apuñña/akusala abhisāṅkhāra**.
- The **opposites or the moral types** with generosity, compassion, and wisdom can bring good/beneficial results in the future, and they are **puñña abhisāṅkhāra**.

2. For example, if we hear a brief loud sound, we may be annoyed but not generate anger; that involves only *mano saṅkhāra*. However, if that loud noise persists, we may get angry and start (internally) cursing the person causing the noise; if the sound persists, we may speak out with anger; both those actions involved *vacī abhisāṅkhāra*. If we then confront the “sound maker,” we may hit that person with anger, and that *kamma* is done with *kāya abhisāṅkhāra*.

- Saṅkhārā* without the “*abhi*” prefix do not have **kammic consequences** in the future, i.e., they do not have associated **kammic energies**.

- Therefore, “*avijjā paccayā saṅkhārā*” should be explained as “*avijjā paccayā abhisāṅkhārā*” because *saṅkhārā* can arise in a Buddha or an *Arahant*, yet *abhisāṅkhārā* (due to *avijjā*) do not arise in them.
- In *Paṭicca Samuppāda*, even though the *uddesa* version is “***avijjā paccaya saṅkhāra,*” those due to *avijjā* are ALWAYS *abhisāṅkhāra*.** That is why it is not a good idea to translate verses in the *suttas* mechanically, word by word. That lead to contradictions and confusion; see “[Distortion of Pāli Keywords in Paticca Samuppāda.](#)”
- Many *suttas* (especially discussing deeper concepts) are in the “utterance or *uddesa*” format. Translating them word for word can lead to confusion. They must be explained (*niddesa*.) Sometimes long explanations with examples and analogies (*paṭiniddesa*) are needed. See, “[Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa.](#)”
- Let us first look at the “definitions” of the three main types of *saṅkhāra*.

Three Types of *Saṅkhāra* Responsible for Actions, Speech, and Thoughts

3. There are succinct statements in the “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#)” on the types of *saṅkhāra* generated in mind:

“*Tayome, āvuso visākha, saṅkhārā—kāyasaṅkhāro, vacīsaṅkhāro, cittasaṅkhāro*”*ti.*

– There are three types of *saṅkhāra* – *kāya saṅkhāra*, *vacī saṅkhāra*, *citta saṅkhāra*.

“*Katamo paṇāyye, kāyasaṅkhāro, katamo vacīsaṅkhāro, katamo cittasaṅkhāro*”*ti?*

– What are *kāya saṅkhāra*, What are *vacī saṅkhāra*, What are *citta saṅkhāra* (or *mano saṅkhāra*)?

“*Assāsapassāsā kho, āvuso visākha, kāyasaṅkhāro, vitakkavicārā vacīsaṅkhāro, saññā ca vedanā ca cittasaṅkhāro*”*ti.*

– *Assāsa passāsā* are *kāya saṅkhāra*, ***vitakka vicāra* are *vacī saṅkhāra***, *saññā* and *vedanā* constitute *citta saṅkhāra*.

“*Kasmā paṇāyye, assāsapassāsā kāyasaṅkhāro, kasmā vitakkavicārā vacīsaṅkhāro, kasmā saññā ca vedanā ca cittasaṅkhāro*”*ti?*

– Why are the three types of *saṅkhāra* categorized in that way?

“*Assāsapassāsā kho, āvuso visākha, kāyikā ete dhammā kāyappaṭibaddhā, tasmā assāsapassāsā kāyasaṅkhāro. Pubbe kho, āvuso visākha, vitakketvā vicāretvā pacchā vācam bhindatī, tasmā vitakkavicārā vacīsaṅkhāro. Saññā ca vedanā ca cetasikā ete dhammā cittappaṭibaddhā, tasmā saññā ca vedanā ca cittasaṅkhāro*”*ti.*

– *Assāsa passāsā* (breathing in and out) is associated with the body (movements). Thus, *assāsa passāsā* is *kāya saṅkhāra*.

– ***Vitakka/vicāra* arise before speech “breaks out.” Therefore, *vitakka/vicāra* are *vacī saṅkhāra*.**

– *Saññā* and *vedanā* are associated with any *citta*. Thus, *Saññā/vedanā* are *citta (mano) saṅkhāra*.

Assāsa Passāsā* Are not *Abhisāṅkhāra

4. “*Assāsa passāsā*” in verse “*assāsa passāsā kāya saṅkhārā*” does refer to the type of *saṅkhāra* involved in “breathing in out.”

- Even though we don’t realize it, breathing in and out happens via *citta vīthi*, i.e., “thoughts” if we translate *citta* as “thought.” But these are “weak *citta*” without any *javana* power. Such weak *citta*

vīthis run through our minds even while we are sleeping. Now, breathing involves moving body parts, and **any bodily movement MUST involve *citta* because the mind controls the body.**

- Breathing, walking, running, or any bodily movement that does not arise with greed, anger, or ignorance in mind are *kammically*-neutral *saṅkhāra*. **They are NOT *abhisāṅkhāra*.**

5. **Those definitions in #3 above are for *saṅkhāra* in general.** Whether they become *abhisāṅkhāra* or not will depend on whether or not greed (*lobha*), anger (*dosa*), or ignorance (*moha*) will be involved.

- For example, *saññā* and *vedanā* arise in *cittā* of *Arahants*, too. Thus, *mano saṅkhāra* arising in *Arahants* are not *abhisāṅkhāra*. **However, if *vedanā* turn to *samphassa-jā-vedanā*, then they definitely become *abhisāṅkhāra*.**
- *Vitakka/vicāra* can be simply stated as “deliberations.” When an *ārammaṇa* comes in, one may start internally debating how to proceed. An example is given in #6 below. Those deliberations can be immoral, moral, or neutral and must be handled based on the context. However, when specifically referred to as *savitakka/savicāra*, those are “**good *vacī saṅkhāra***” that, for example, arise in an *Arahant*.
- For details, see “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#),” “[Correct Meaning of Vacī Saṅkhāra](#),” and “[Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra](#).”

Saṅkhāra and Abhisāṅkhāra

6. Understanding how they arise makes it easier to remember the functions/deployment of the three main types of *saṅkhāra* mentioned above. Either good or bad types of *abhisāṅkhāra* come into play when we attach to sensory input (*ārammaṇa*) and greed, anger, or ignorance arise in mind.

- Let us consider an example. Suppose person X is watching TV. X is just watching a “bland program.” But then the program switches to a commercial showing a beautiful half-naked actress in a recently released movie. That automatically leads to lustful thoughts in X, and he starts watching it with interest. Those initial thoughts of lust arise automatically due to his hidden defilements (*kāma rāga anusaya*.) Those are ***citta/mano abhisāṅkhāra*** arising automatically due to his character/habits (*gati*) to be aroused/enticed by such visuals.
- ***Mano abhisāṅkhārā*** arise automatically according to *gati* and are the weakest form of ***abhisāṅkhāra***.
- Now he starts generating lustful thoughts consciously; here, he is “talking to himself,” thinking about how nice it would be to watch the movie; these are the “deliberations” or “*vitakka/vicāra*” mentioned in #5 above. Those are a form of ***vacī abhisāṅkhāra***. He calls out to his friend to come and see the commercial. His speech here is also *vacī abhisāṅkhāra*.
- Both watch the commercial while talking excitedly about the actress and the movie and decide to go to the movie. Then they get dressed and drive to the movie theater. All those bodily actions are *kāya saṅkhāra*. Furthermore, since the root cause of those bodily actions is **lust in mind**, they are ***kāya abhisāṅkhāra***.
- *Vacī* and *kāya abhisāṅkhāra* are more robust since they arise in *javana citta*, with conscious thinking.

7. The types of *abhisāṅkhāra* in #6 above are not strong enough to directly cause a specific rebirth. However, they do generate *kammic* energy that can bring *vipāka* in *kāma loka*.

- But these types of lust-induced *abhisāṅkhāra* can grow and lead to committing rape, for example. That specific *kamma* can lead to an unfortunate rebirth (as an animal, for example.)
- I hope that explains the fundamental difference between *saṅkhāra* and *abhisāṅkhāra*.
- Another way to understand: ***abhisāṅkhāra* involves *javana citta*, which are strong *citta* that arises with greed, anger, or ignorance (about moral implications.)**

Cetanā and Sañcetanā

8. In the “[WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#)“, the Buddha declared, “*cetanāham, bhikkhave, kammaṃ vadāmi.*” Thus, what determines the type of *kammā* is the *cetanā* or the “intention.”

- If the “intention” does not involve *lobha, dosa, or moha (avijjā)*, it is only a *cetanā* or “intention” to get something done. Here, *kamma* done is just an action without *kammic* consequences. For example, if one walks to the kitchen to get a glass of water, that is done with a neutral *cetanā*; the “intention” is to quench the thirst. It is NOT a *sañcetanā*.
- A *cetanā* becomes a *sañcetanā* (*sañ + cetanā*) if it involves “*sañ*” or *lobha, dosa, moha (avijjā)*. See “[San – A Critical Pāli Root](#)” and “[Details of Kamma – Intention, Who Is Affected, Kamma Patha.](#)”

9. There is a detailed analysis (*niddesa* version) of *Paṭicca Samuppāda* in “*Vibhaṅgapararāṇa*” (the *Tipiṭaka* Commentary.) See “[WebLink: suttacentral: Paṭiccasamuppādavibhaṅga \(Abhidhamma Vb 6\).](#)”

- There it is explained what is meant by “*avijjā paccayā saṅkhārā*”: It says, “*Kāya sañcetanā kāyasāṅkhāro, vacī sañcetanā vacīsāṅkhāro, mano sañcetanā citta (mano) saṅkhāro. Ime vuccanti “avijjā paccayā saṅkhārā.”*”
- That means *saṅkhāra* that arise with *avijjā* have “*sañcetanā*” or “defiled *cetanā*” or “defiled intentions.” Those are *abhisāṅkhārā*.
- Therefore, only *abhisāṅkhārā* with *sañcetanā* are included in “*avijjā paccayā saṅkhārā*.”

10. In the “[WebLink: suttacentral: Sañcetanā Sutta \(SN 27.7\)](#)” the Buddha stated, “*rūpa sañcetanāya chandarāgo, cittasseso upakkilesa.*”

- That means “attachment/craving (*chanda rāga*) for *rūpa*” lead to the arising of defiled intentions (*sañcetanā*.) Defiled intentions are those with greed, anger, and ignorance.
- Then that verse is repeated for attachment to sounds, smells, tastes, touches, and *dhammā* (*dhamma sañcetanā*.) Note that *dhammā* are *ārammaṇa* that come directly to the mind; see “[Dhamma and Dhammā – Different but Related.](#)”

Example

11. Let us take an example. If we see someone walking with a knife, we would only know that he is generating *kāya saṅkhāra* because moving the body involves *kāya saṅkhāra*. We would not know whether they are *kāya abhisāṅkhārā* until we see what he does with that knife.

- If he carries the knife intending to hurt/kill someone, then *sañcetanā* come into play, and he is engaged in “*avijjā paccayā saṅkhārā*” where the *saṅkhārā* is an *akusala abhisāṅkhārā* of the specific type of *kāya abhisāṅkhārā*.
- But if he just bought that knife and is taking it home, it is just a *cetanā*, NOT a *sañcetanā*. Thus it is just a *kāya kamma* (bodily action) done with *kāya saṅkhārā* that DOES NOT belong to “*avijjā paccayā saṅkhārā*.”
- Therefore, *saṅkhārā* with neutral *cetanā* lead to neutral *kammā*; they do not have future *kammic* consequences. But *abhisāṅkhārā* with *sañcetanā* are done with “*avijjā paccayā saṅkhārā*,” and they can bring *kamma vipāka* in the future.
- Any *saṅkhāra* (*kāya, vacī, or mano*) can be included in the category of “*avijjā paccayā saṅkhārā*” ONLY IF one’s intention involves *lobha, dosa, moha (avijjā)*.

Saṅkhārā and Kamma – Closely Related

12. *Saṅkhārā* are closely related to *kammā*. “*Kamma*” is typically translated as “action,” but all *kammā* have their origin in mind.

- Just like there are *citta/mano*, *vacī*, and *kāya saṅkhāra*, there are *mano*, *vacī*, and *kāya kamma*. Furthermore, they are closely related. *Mano saṅkhārā* give rise to *mano kammā*, *vacī saṅkhārā* give rise to *vacī kammā*, and *kāya saṅkhārā* give rise to *kāya kammā*.
- Now we can see that there are ***apuñña/akusala kamma*** and ***puñña/kusala kamma***.

13. *Paṭicca Samuppāda* explains how various types of *abhisāṅkhāra* lead to corresponding results (*vipāka*) in the future.

- Such *vipāka* can materialize in the current life or future lives. Strong *kammā* (with strong *abhisāṅkhāra*) lead to good or bad future births via *Uppatti Paṭicca Samuppāda*; see “[Uppatti Paṭicca Samuppāda \(How We Create Our Own Rebirths\)](#).” Other, weaker *kammā* can bring their *vipāka* during a lifetime, either in this or a future life, which is explained in “[Paṭicca Samuppāda During a Lifetime](#).”
- The critical issue is that **some *kammā* (actions)** not merely get the job done at that time but **can lead to consequences in the future**, even in future lives. **Those having a “carry-over” effect are the first two types of moral and immoral *kammā* taking place via *abhisāṅkhāra*.**

Manopubbangamā Dhammā..

14. The Buddha taught that everything arising in this world originates in our thoughts, speech, and actions. It may take a lot of reading to comprehend that fully, but that is the only way to learn Buddha Dhamma.

- That principle is embodied in the Dhamma verse, “[Manopubbangamā Dhammā](#).” Here, “*mano*” represents the mind, and *dhammā* (with a long “a”) means those *kammic* energies that bring *vipāka* (including rebirth). I have discussed that in various ways; for example, “[Kamma and Paṭicca Samuppāda](#).”
- Those born and growing up in the Western world have a “materialistic worldview” from their upbringing. **It is difficult for some to understand how “solid matter” (say, our physical bodies) can have its origins in mind.** However, even though I now live in the United States, I was raised in a practicing Buddhist family in Sri Lanka. **It took a long time, but I have now realized the necessity to explain this “mind-body” connection in detail, especially to a Western audience.**
- Our thoughts (specifically *abhisāṅkhāra*) may not directly lead to the creation of ALL “solid matter.” It is a subtle but quite logical/scientific process. I discussed that in the “[Origin of Life](#)” series, but I now think I must explain some basic concepts in detail.

15. All posts on *saṅkhāra* at “[Saṅkhāra – Many Meanings](#).” Discussing all aspects of *saṅkhāra* in one or two posts is impossible. Please make sure to read them and fully understand *saṅkhāra*. That will go a long way in comprehending *Paṭicca Samuppāda*.

- All the posts in this new “series of review posts with charts” at “[Buddhism – In Charts](#).”

9.7.1.1 Saṅkhāra - Should Not be Translated as a Single Word

December 7, 2021; revised December 10, 2021 (#3); August 27, 2022; January 25, 2023 (#8)

Saṅkhāra is a critical Pāli word with different meanings depending on the context. It should not be translated with a single word, like choices, processes, activity, mental formations, etc., as commonly done these days.

Introduction

1. I referred to English translations of two key *suttas* where “*saṅkhāra*” translated as “choices” and “mental formations.” See “[Distortion of Pāli Keywords in Paṭicca Samuppāda](#).”

- According to those translations, ALL *saṅkhāra* would stop from arising if a mind is devoid of *avijjā*. In the two English translations quoted in the above post, “*avijjā nirodhā saṅkhāra nirodho*” is translated

as “**When ignorance ceases, choices cease**” and “from the cessation of ignorance, there is the **cessation of volitional processes.**”

- We all know that the Buddha's mind became free of *avijjā* upon attaining Buddhahood. But then he lived for 45 years. Did not the Buddha generate any *saṅkhāra* during that whole time?
- As discussed below, one cannot think, speak, or do anything without generating *saṅkhāra*!
- That clearly illustrate the dangers of mindlessly translating Pāli suttas word by word without understanding the meaning of the sutta in the context of the topic.

Several Types of *Saṅkhāra*

2. The “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#)” discusses three types of *saṅkhāra*: *kāya saṅkhāra*, *vacī saṅkhāra*, *citta saṅkhāra*. The last type is (almost) the same as *mano saṅkhāra*.

- In the English translations of this *sutta* at Sutta Central, three translators translate those three types of *saṅkhāra* in three different ways: “Physical, verbal, and mental processes,” “bodily process, the speech process, the mental process,” and “physical activity, verbal activity, and mental activity.”
- However, all three types of *saṅkhāra* are MENTAL; they arise in mind. They are NOT physical processes, but they can control physical processes.
- *Kāya saṅkhāra* arises in mind and controls bodily actions. *Vacī saṅkhāra* also occurs in the mind and may lead to speech. All three types of *saṅkhāra* appear in mind.
- It is NOT POSSIBLE to find a single English word representing the different meanings of *saṅkhāra* in various suttas. We will discuss another way to categorize *saṅkhāra* below, but let us first briefly examine these three types of *saṅkhāra*.

Any Thought Has *Mano Saṅkhāra*

3. In the [WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#), *citta (mano) saṅkhāra* defined as, “*vedanā* and *saññā*.” See [Ref. 1](#) below.

- In most English translations, *vedanā* and *saññā* are feelings and perception (or recognition).
- But *vedanā* is more like “sensing an external sensory input.” *Saññā* is the recognition of the sensory input (but includes one's biases for such a sensory event.)
- For example, tree roots feel *vedanā* (of nutrients in the soil), and the leaves of a tree feel the sunlight. Each can respond to such stimuli. For instance, we know that a plant “turns” towards sunlight over time, and tree roots “pull-in” suitable nutrients.
- Therefore, plants and trees have a basic form of *vedanā* and *saññā*. A plant can “feel” when sunlight falls on it (*vedanā*), and recognize that as sunlight (*saññā*). However, a plant CANNOT generate *saṅkhārā* (in thoughts or *cittā*) about those *vedanā* and *saññā*. See, “[Contact Between Āyatana Leads to Vipāka Viññāna.](#)”
- Only sentient beings (like people and animals) can generate *saṅkhāra*. For example, we know that a dog becomes joyful when seeing its owner but is aggressive towards strangers. A dog can generate *lobha* (affection for the owner) or *dosa* (in this case aversion toward the stranger.)

4. Therefore, only living beings generate *mano saṅkhāra*. In other words, *mano saṅkhāra* are in any *citta* (“thought.”)

- *Abhidhamma* clarifies this issue. Any *citta* (loosely translated as a thought) will ALWAYS arise with seven *cetasika* (mental factors.) Two of those seven are *vedanā* and *saññā*. Therefore, any “thought” is ALWAYS associated with *vedanā* and *saññā*.
- **In other words, it is impossible to think without generating *mano saṅkhāra*!**

Vacī Saṅkhāra That Arise in the Mind Lead to Speech

5. The [WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#) defines *vacī saṅkhāra* as, “*vitakka vicārā vacī saṅkhāro*”; see [Ref. 1](#).

- *Vitakka* and *vicāra* are two cetasika that MAY ARISE in a *citta*. They arise when we consciously start thinking about something. Simply put, *vitakka* means to “turn attention to an *ārammaṇa*,” and *vicāra* is to “stay on that *ārammaṇa* to investigate.”
- When we do that, we either “talk to ourselves” or “speak out.” Both involve *vacī saṅkhāra*. See [“Correct Meaning of Vacī Saṅkhāra.”](#)
- **Since the Buddha spoke to others for 45 years after attaining the Buddhahood, it is clear that he generated a lot of *vacī saṅkhāra*.**

All Bodily Actions Are Based on *Kāya Saṅkhāra* That arise in the Mind

6. *Kāya saṅkhāra* is defined as “*Assāsa passāsā kāya saṅkhāro*” in [Ref. 1](#). Which means, “breathing in and out is due to *kāya saṅkhāra*.”

- All bodily activities are due to *kāya saṅkhāra*. Breathing is just one aspect. The mind controls breathing, but we don't need to breathe consciously. Then why is it called a type of *saṅkhāra*?
- Again, we need to refer to *Abhidhamma*. All mental activities involve *citta vīthi*. A single *citta* does not arise by itself. *Cittas* ALWAYS occur in a series of *citta (citta vīthi)*. **However, we “feel” only those *citta vīthi* that contain *javana citta*.** Those *citta vīthi* that maintain breathing do not have *javana citta*, and they are *atiparittārammaṇa citta vīthi* (i.e., “weak *citta vīthi*”).
- The fact that *citta vīthi* are involved in breathing becomes apparent when you think about asthma patients. They need to breathe willfully, i.e., “make an effort to breathe.”
- That *sutta* is mentioned because it happens all the time, except when unconscious. When unconscious, *citta vīthi* cannot arise, and *kammic* energy keeps the body alive.
- The critical point is that ANY body movement involves *kāya saṅkhāra*. **To write, walk, run, or move any body part, we must do that with *kāya saṅkhāra*.**

Avijjā Is Not Involved in Most *Saṅkhāra*!

7. Therefore, we generate numerous *saṅkhāra* during the day. That was true for the Buddha and Arahants as well. As long as one lives in this world, one will generate *kāya*, *vacī*, and *mano saṅkhāra*.

- That is why it is foolish to translate “*avijjā nirodhā saṅkhāra nirodho*” as “When ignorance ceases, **choices cease**” or “from the cessation of ignorance, there is the **cessation of volitional processes**” in the two translations cited in the post, [“Distortion of Pāli Keywords in Paṭicca Samuppāda.”](#) We can also see that the English words “choices” and “volitional processes” do not apply to some types of *saṅkhāra*. For example, there is no need to make “choices” or “mental formations (consciously)” to breathe, but breathing involves *kāya saṅkhāra*.
- **Those translators don't seem to realize that only *abhisāṅkhāra* will cease to arise in an Arahant.** An Arahant would not have a trace of *avijjā* but obviously would generate all three types of *saṅkhāra* discussed above!
- That type of translation distorts Buddha Dhamma! I have repeatedly pointed out that it leads to much confusion in discussion forums.
- Now, let us discuss another way to categorize *saṅkhāra* that is directly relevant to “*avijjā paccayā saṅkhāra*.” These types of *saṅkhāra* are *abhisāṅkhāra*, some of which (*apuññābhisāṅkhāra*) can lead to “bad *kamma vipāka*” as various forms of suffering. Some kinds of *abhisāṅkhāra*

(*puññābhisaṅkhāra*) can lead to temporary relief from suffering (and even bouts of happiness) **but will NEVER lead to a permanent end of suffering.**

- Let us discuss the special categorization of *abhisaṅkhāra* now.

Akusala-Mūla Paṭicca Samuppāda Involves Abhisaṅkhāra

8. *Saṅkhāra* in the step “*avijjā paccayā saṅkhāra*” refers to “*abhisaṅkhāra*.” “[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga \(Vb 6\)](#)” explains the step “*avijjā paccayā saṅkhāra*” as, “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisaṅkhāro, apuññābhisaṅkhāro, āneñjābhisaṅkhāro.*”

Translated: “What is meant by ‘*avijjā paccayā saṅkhārā*?’ That means *Puññābhisaṅkhāra*, *apuññābhisaṅkhāra*, *āneñjābhisaṅkhāra*.” For details, see “[Saṅkhāra – What It Really Means.](#)”

- Such *abhisaṅkhāra* can be *kāya*, *vacī*, or *mano saṅkhāra* that we discussed above. But only a part of *kāya*, *vacī*, and *mano saṅkhāra* are *abhisaṅkhāra*.
- Also, see “[WebLink: suttacentral: Saṅkhāra Sutta \(AN 3.23\)](#).” The English translation is not that good, but it gives the basic idea. Note that “*sabyābajjhaṃ kāyasaṅkhāraṃ abhisaṅkharoti*” means “engaging in generating *apuññābhisaṅkhāra*. The opposite “*abyābajjhaṃ kāyasaṅkhāraṃ abhisaṅkharoti*” means “engaging in generating *puññābhisaṅkhāra*. Note that *puññābhisaṅkhāra* are “moral deeds done without the comprehension of the Noble Truths”; see #11 and #12 below.
- **In other words, *abhisaṅkhāra* leads to *kamma* done with *lobha*, *dosa*, and *moha*.** They are *dasa akusala* (three with the body, four with speech, and three with the mind). They are *kāya kamma*, *vacī kamma*, and *mano kamma*. See, “[Ten Immoral Actions \(Dasa Akusala\)](#).”

9. Then a question arises: How can *puññābhisaṅkhāra* (*puñña abhisaṅkhāra* or MORAL ACTIONS) be done with *lobha*, *dosa*, *moha*?

- ***Puññābhisaṅkhāra* leads to *puñña kamma* that can bring “good results” in this world.**
- That means such “good *kamma*” leads to “good *kamma vipāka*” (like health and wealth) during such “good existences.” Stronger ones can lead to rebirth in “good realms.”
- However, such benefits are only temporary. Such births in “good realms” are rare. Even if we think we only do good deeds in this life, we may have done many “bad deeds” in past lives, which can still bring rebirths in “bad realms.” *Puñña kamma* becomes *kusala kamma* (that leads to *Nibbāna*) ONLY with the comprehension of *Tilakkhaṇa*; see #11 below.

Examples

10. As we already noted, breathing takes place via *kāya saṅkhāra*. Raising one's hand involves *kāya saṅkhāra*. Eating food involves *kāya saṅkhāra*. All these activities are NECESSARY to live life. We cannot categorize them as “good” or “bad.” Those are *kammically* neutral activities.

- On the other hand, hitting another person with anger involves the *apuññābhisaṅkhāra* version of *kāya saṅkhāra*. So does stealing or sexual misconduct. Telling a lie is done with the *apuññābhisaṅkhāra* version of *vacī saṅkhāra*.
- Preparing a meal and offering that to a *bhikkhu* or a homeless person involves the *puññābhisaṅkhāra* version of *kāya saṅkhāra*. Teaching Buddha Dhamma (or anything valuable) to others involves *kāya* and *vacī saṅkhāra* that belong to the category of *puññābhisaṅkhāra*.
- Having a greedy or angry mindset is a *mano saṅkhāra* belonging to the *apuññābhisaṅkhāra* version. The same is true for having the ten types of wrong views. The opposites of those belong to the *puññābhisaṅkhāra* category.

Doing Good Deeds (Puñña Kamma) Is Not Enough to Stop Future Suffering

11. The point is that while “good deeds (*puñña kamma*)” can lead to periods of happiness in good realms, that would not remove the possibility of future rebirths in the *apāyās*.

- Another way to say this is: “rebirths the *apāyās* will stop only upon understanding the dangers in the rebirth process, i.e., that this world is of *anicca, dukkha, anatta* nature (*Tilakkhaṇa*.) That is when one becomes a *Sotāpanna*. **Attempts to overcome past “bad deeds” by ONLY engaging in “good deeds” or *puñña kamma* will not be successful.** However, it is necessary to engage in *puñña kamma* to gain that insight.
- Instead, (while engaging in *puñña kamma* with *puññābhisaṅkhāra*) one MUST try to understand the three characteristics of this world of 31 realms. **That is the ONLY WAY to avoid severe suffering in the future.**
- Understanding *Tilakkhaṇa* leads to the cultivation of “*Kusala-Mūla Paṭicca Samuppāda*,” which leads to various stages of *Nibbāna*. See, “[Kusala-Mūla Paṭicca Samuppāda](#).”

Difference Between *Puñña Kamma* and *Kusala Kamma*

12. It is essential to understand the difference between *puñña kamma* and *kusala kamma*. ***Puñña kammā* BECOME *kusala kammā* IF one comprehends *Tilakkhaṇa*!**

- *Puññābhisaṅkhāra* lead to *puñña kamma*.
- The same *puñña kamma* done with the comprehension of *Tilakkhaṇa* are NOT *puññābhisaṅkhāra*. They are not *abhisaṅkhāra*. They are no “*Kusala-Mūla saṅkhāra*.”
- That is why the *Kusala-Mūla Paṭicca Samuppāda* process (that leads to *Nibbāna*) starts with “*kusala-mūla paccayā saṅkhāra*.”
- For details, see, “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma](#)” and “[Kusala-Mūla Paṭicca Samuppāda](#).”
- For those unfamiliar with these terms, it may take a repeated reading of relevant posts to understand these concepts. Things will fall into place once one can get a foothold (like in a jigsaw puzzle).

Reference

1. In the “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#)”:

“*Tayome, āvuso visākhā, saṅkhārā—kāya saṅkhāro, vacī saṅkhāro, citta saṅkhāro*”*ti.*

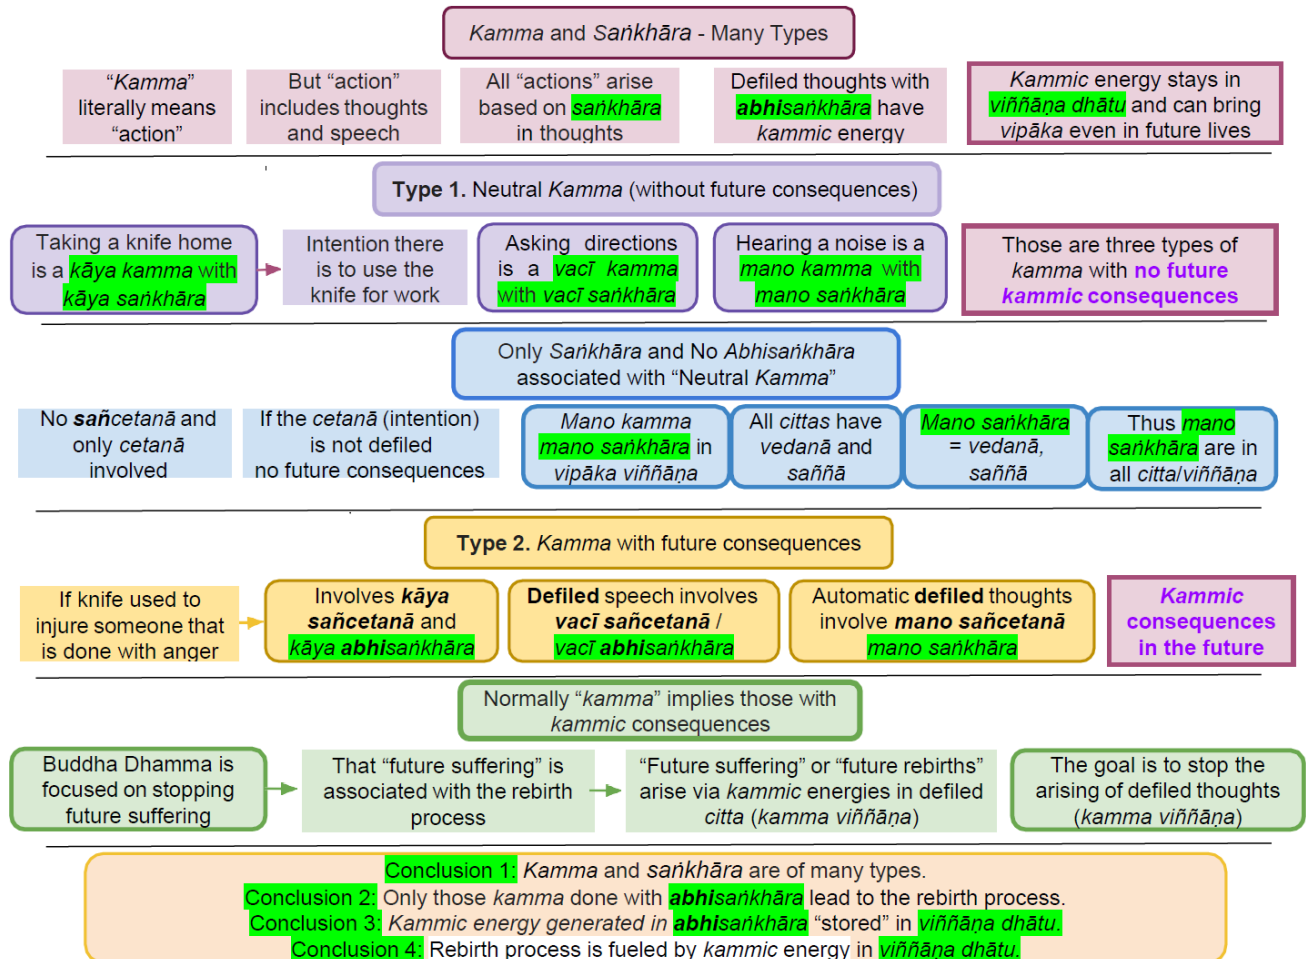

“*Katamo panāyye, kāya saṅkhāro, katamo vacī saṅkhāro, katamo citta saṅkhāro*”*ti?*

“*Assāsapassāsā kho, āvuso visākhā, kāya saṅkhāro, vitakka vicārā vacī saṅkhāro, saññā ca vedanā ca citta saṅkhāro*”*ti.*

9.7.1.1 Kamma and Saṅkhāra, Cetanā and Sañcetanā

December 14, 2021; revised August 27, 2022; November 24, 2022; March 17, 2023; rewritten April 2, 2023

Cetanā expresses the “intention” via a set of *cetasika*. *Saṅkhāra* leads to action with that intention. *Kamma* is the deed done with that intention.

Buddhism – In Charts: 8. Kamma and Saṅkhāra

Download/Print: [“WebLink: suttacentral: 8. Kamma and Saṅkhāra”](#)

Introduction

1. Most people use the word “kamma” to indicate “bad deeds” or even “results of past bad deeds” (which are really “kamma vipāka.”) When something terrible happens, they say, “Oh, this is my kamma.”

- But *kamma* is a generic word that means “action.” That could mean moving the body, speaking, or thinking (*kāya*, *vacī*, and *mano kamma*.) Kamma can be of mainly three types:
 - (i) Neutral *kamma*: like using a knife to cut vegetables or asking directions from someone.
 - (ii) *Akusala* (or *pāpa/apuñña*) *kamma*: e.g., stabbing someone with a knife or telling a lie to make money.
 - (iii) *Puñña kamma*: e.g., using a knife to cut loose a trapped animal or explaining Dhamma to others. A *kusala kamma* is a *puñña kamma* done with the comprehension of the Four Noble Truths, i.e., by a Noble Person. Of course, all *puñña kamma* become *kusala kamma* only for an *Arahant*.
- **All three types are done with a specific intention.** We must engage in various kinds of *kamma* of the first type in our daily lives to get things done. The “intention” in the second type is evil or immoral, while that in the third type is good or moral.

2. **The first type of kamma yields results at that time only; they do not lead to “kammic consequences” in the future.** Those actions do not have morally good or bad intentions.

- **The second/third type can bring “bad/good results” at that time or in the future.** Moral or immoral “intentions” that arise lead to the creation of an unseen “kammic energy” that remains in “*viññāṇa dhātu*” and can bring *vipāka* in the future. See below.

- That “intention” is not in the *cetanā cetasika* (mental factor), *per se*, but is incorporated via a set of other “moral/immoral” *cetasika*, as explained below. [*per se* : [adverb] with respect to its inherent nature.]
- *Cetanā cetasika* only incorporates appropriate *cetasikas* into a *citta*; “*cetanā*” means to “assemble a *citta* (with appropriate) *cetasika*.”
- With intention, one generates three types of *saṅkhāra* to “take action.” *Kamma* is the deed done with *saṅkhāra*. *Kāya*, *vacī*, and *mano saṅkhāra* lead to *kāya*, *vacī*, and *mano kamma*. A *kamma* becomes immoral or moral with the incorporation of immoral or moral (*sobhana/asobhana*) *cetasika*, as explained below.

Cetanā Is In Every Citta!

3. “[Nibbedhika Sutta \(AN 6.63\)](#)” is a vital *sutta* that explains many keywords in Buddha Dhamma. Toward the end, it defines *kamma*: “*Cetanā*, I tell you, is *kamma*. With intention, one does *kamma* through body, speech, and mind.” See [Ref. 1](#).

- Now, *cetanā* is a “universal *cetasika*,” meaning it is in every *citta*. This is a CRITICAL observation. We don’t do good or bad *kamma* at all times. Thus, *kamma* means any bodily activity, speech, or even thoughts. For example, we saw that even breathing happens with *cittās*.
- Therefore, even any action, like lifting an arm, is a *kamma*. One may also speak and think about getting some task done that would NOT have morally good or bad intentions. Those would NOT belong to *akusala*, *pāpa*, *puñña*, or *kusala kamma*. They are just *kamma*. Such “neutral *kamma*” would not have *sobhana* (moral) or *asobhana* (immoral) *cetasika*. However, *cetanā cetasika* is still there since it is a universal *cetasika*.

4. There are seven such “universal *cetasika*” in every *citta*: *Phassa* (contact with an (*ārammaṇa*); *vedanā* (feeling); *saññā* (perception); *cetanā* (putting together all relevant mental factors); *Ekaggatā* (One-pointedness); *jīvitindriya* (life faculty); *manasikāra* (memory.) See [Ref. 2](#).

- *Mano saṅkhāra* are defined as “*vedanā* and *saññā*,” see “[Saṅkhāra – Should Not be Translated as a Single Word](#).” Since *vedanā* and *saññā* are universal *cetasika*, *mano saṅkhāra* arise in every *citta*. Thus, a “neutral *kamma*” is done with only *mano saṅkhāra*.
- A new *citta vūthi* arises when a new *ārammaṇa* comes in. That contact with the new *ārammaṇa* is *phassa*. The mind “feels” that (*vedanā*) and recognizes it (*saññā*) with the help of the *manasikāra cetasika* that can recall similar past events. *Ekaggatā* helps keep the mind focused on that *ārammaṇa*. See “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#).”
- That complex process occurs within a billionth of a second (lifetime of a *citta*.) See “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).” It is critical to read that post to understand this primary process.
- When *cetanā* starts incorporating “defiled intentions,” it becomes *sañcetanā*, and *saṅkhāra* becomes *abhisaṅkhāra*.

Cetanā Becomes Sañcetanā

5. The word “*sañcetanā*” comes from “*saṇ*” + “*cetanā*.” Thus, it means *cetanā cetasika* has incorporated “*saṇ*” that can contribute to generating *kammic* energy for future rebirths. I have discussed the importance of “*saṇ*” in many posts. See “[Saṇ – A Critical Pāli Root](#).”

- Therefore, *saṅkhāra* are associated with *cetanā*, and *abhisaṅkhāra* (those that contribute to the rebirth process) involve *sañcetanā*.
- The intention becomes “defiled” when certain types of *cetasika* arise. For example, an “angry state of mind” is expressed by incorporating *dosa* and *moha cetasika* into the *citta*. When becoming greedy, *lobha*, *moha*, and even jealousy (*issā*) *cetasika* may arise in *citta*.

- When *cetanā* incorporates types of *cetasika* responsible for future *vipāka*, it becomes **sañcetanā**. Then *saṅkhāra* become **abhisāṅkhāra**.

6. Only **abhisāṅkhāra** with **sañcetanā** are responsible for the rebirth process or **saṁsāra**.

- The word “**saṁsāra**” comes from “*saṇ*” + “*sāra*” where “*sāra*” means “good” or “beneficial.” Thus, one is trapped in the rebirth process because of the wrong view that “living in this world is beneficial.”
- This is why the types of *saṅkhāra* that arise due to the ignorance of the Four Noble Truths (i.e., “*avijjā paccayā saṅkhārā*”) are *kāya saṅkhāra*, *vacī saṅkhāra*, and *citta (mano) saṅkhāra* that involve *kāya sañcetanā*, *vacī sañcetanā*, and *mano (or citta) sañcetanā*.
- “[WebLink: suttacentral: Patīccasamuppāda Vibhaṅga \(Abhidhamma Vb 6\)](#)” states: “*Kāyasañcetanā kāya saṅkhāro, vacīsañcetanā vacī saṅkhāro, manosañcetanā citta saṅkhāro. Ime vuccanti ‘avijjā paccayā saṅkhārā’*”. Therefore, *saṅkhāra* in *Uppatti Paṭicca Samuppāda* always involve **abhisāṅkhāra** with **sañcetanā**.
- However, only *kāya abhisāṅkhāra* and *vacī abhisāṅkhāra* directly lead to the rebirth process. *Mano (or citta) sañcetanā* do not become **abhisāṅkhāra**. That is a subtle point we will address in the future.
- A Buddha or an *Arahant* would not generate **abhisāṅkhāra** or **sañcetanā**, but they do generate **saṅkhāra with cetanā** until *Parinibbāna*. Their actions, speech, or thoughts would have *kammically-neutral kāya, vacī, and mano saṅkhāra* associated with them.

“Intention” Comes from *Cetasikas* Added Based on the *Ārammaṇa* and One’s *Gatī*

7. If the *ārammaṇa* is mind-pleasing, *lobha* (greed) can arise in the mind. When the *lobha cetasika* is incorporated into the *citta*, it becomes a “*lobha citta*.” On the other hand, seeing an enemy would generate *dosa* (anger), and the corresponding *citta* would be angry because *cetanā* would incorporate the *dosa cetasika* into it. Thus, *cetanā* is like a supervisor/administrator who adds other relevant *cetasika* (good or bad) based on the “state of mind.”

- Returning to the types of *kamma* in #1 above, we can now make sense of the role of the *cetanā cetasika*. The “intention” comes from the types of *cetasika* that arise in the mind based on the *ārammaṇa* and one’s *gatī*. For example, someone with “angry *gatī*” is more likely to be angered by even a mild accusation. For an introduction to *gatī*: “[The Law of Attraction, Habits, Character \(Gatī\), and Cravings \(Āsava\)](#).”
- The *cetanā cetasika* “constructs” a *citta* by incorporating appropriate *cetasika* based on one’s *gatī* and the type of *ārammaṇa*. Thus, *gatī* and the *ārammaṇa* will dictate the “intention.” This is a CRITICAL point to understand.

8. If one does a task with *lobha*, *dosa*, *moha*, then it is an *akusala* (or *pāpa*) *kamma*. Another subtle way to say that is any action done with *chandarāga* (with a mindset that says worldly pleasures are worthwhile pursuing) has at least a trace of *akusala* nature.

- A particular activity involving generosity, compassion, etc., is a *puñña kamma*. Here, *alobha* and *adosa cetasika* are incorporated into *cittā*. *Cetanā* here is still “**sañcetanā**” IF one has not comprehended the dangers of the rebirth process, i.e., since one still has *avijjā* (not comprehending the Noble Truths.)
- That is because those “good *kamma*” are done with the expectation of “better rebirths/good *vipāka*” in the higher realms of the *kāma loka* (human and *Deva* realms.)
- A *kusala kamma* is a “better version” of a *puñña kamma* done with an understanding of the Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*.
- If the same *puñña kamma* is done by someone who comprehends the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*, it would automatically be a *kusala kamma*. Such *kusala*

kammā are done WITHOUT expectations for worldly benefits, but ONLY with the expectation of attaining *Nibbāna* and, thus, stopping the suffering-filled rebirth process.

- Details in “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#)” and “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma.](#)”

Kammic Energy Arises In the Mind

9. The three types of *kamma* are *kāya*, *vacī*, and *mano kamma*. They are done based on *kāya*, *vacī*, and *mano saṅkhāra*.

- When a “neutral *kamma*” is done with *saṅkhāra* (that are not *abhisāṅkhāra*), the *kammic* energy generated is only enough to get the task done. There is no “residual *kammic* energy” deposited in the *viññāṇa dhātu* that can bring *vipāka* in the future.
- However, when a *kamma* is done with *abhisāṅkhāra* (with *sañcetanā*), part of the *kammic* energy generated is deposited in the *viññāṇa dhātu*. Those can bring *vipāka* in the future, including rebirths.

Kammic Energy Remains in Viññāṇa Dhātu to Bring Vipāka

10. It is difficult for those in the Western world to wrap their minds around the concepts relating to *kamma*. That is mainly because the focus is primarily on the material world. Ancient Greeks tried to describe the world only in terms of matter, a tradition that has continued with modern science. Modern science investigates material phenomena involving material objects located in space. With the terminology of Buddha Dhamma, that description restricts the “world” to just five “*dhātus*”: *pathavi*, *āpo*, *tejo*, *vāyo*, and *ākāsa*. All material objects are made of *pathavi*, *āpo*, *tejo*, and *vāyo* and located in *ākāsa dhātu*.

- However, in Buddha Dhamma, there is a sixth *dhātu*, *viññāṇa dhātu*, and that is the most important. ***Viññāṇa – arising in mind (mano) – is the precursor to the material world.*** See “[Manōpubbangamā Dhammā.](#)”
- *Kammic* energies generated in defiled *cittas* (as well as all memories or *namagotta*) are “stored” in the *viññāṇa dhātu*. See “[Where Are Memories Stored? – Viññāṇa Dhātu.](#)”
- It may not be easy to understand that post without understanding *Paṭicca Samuppāda* (PS). I plan to direct this series of posts to clarify all the terms in PS to complete that picture.

All posts in the new series: “[Buddhism – In Charts](#)”

References

1. From [WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#): “*Kammaṃ, bhikkhave, veditabbaṃ ... pe... kammanirodhagāminī paṭipadā veditabbāti, iti kho panetaṃ vuttaṃ. Variant: kammanirodhagāminī → sabbatthapi evamevaKiñcetaṃ paṭicca vuttaṃ? Cetanāhaṃ, bhikkhave, kammaṃ vadāmi. Cetayitvā kammaṃ karoti—kāyena vācāya manasā.*”
2. The “[WebLink: suttacentral: Sammāditthi Sutta \(MN 9\)](#)” defines *nāma* (mentality) as, “*Vedanā, saññā, cetanā, phasso, manasikāro—idaṃ vuccatāvuso, nāmaṃ.*” In *Abhidhamma*, two more *cetasika* of *jīvitindriya* and *ekaggatā* are listed together with the above five *cetasika*. Thus, there are seven *cetasika* in every *citta*. The point is that “intention” is not a good translation for *cetanā*. One’s “intention” comes through the types of other good or bad *cetasika* (such as *lobha* or *alobha*) included in the *citta*. The *cetanā cetasika* “puts together appropriate *cetasikā* and builds the *citta*.” See “[What is a Thought?](#)”

9.7.1.1 **Kusala-Mūla Saṅkhāra Are Needed to Attain Nibbāna**
.4

December 20, 2021; revised August 31, 2022

“*Kusala-mūla saṅkhārā*” lead to *Nibbāna*. This category of *saṅkhārā* is generated via wisdom or *paññā*, the opposite of *avijjā*.

We Live Life with *Saṅkhārā*

1. As discussed in recent posts, everyone (including *Arahants*) generates *saṅkhārā* while living in this world.
 - *Saṅkhārā* are, in simple terms, THOUGHTS.
 - Everything we do involves thoughts. Thoughts can vary: compassionate, loving, greedy, angry, jealous, etc. Then we speak and do things with such thoughts with an intention.
 - *Mano saṅkhārā* are thoughts that arise in the mind automatically according to one’s *gati* (character/habits). If the sensory input (an *ārammaṇa*) is interesting, one starts thinking about it and *vacī saṅkhārā* arise; such *vacī saṅkhārā* also lead to speech. If then one decides to take action, corresponding body movements happen via *kāya saṅkhārā*.
 - For example, you automatically start looking at an item in a shop if your *gati* matches it. Then if you think it is worthwhile to investigate it further, you keep looking at it, debating whether to buy it. If you lean toward buying it, you may decide to pick it up and look at it more carefully. Those involve *mano*, *vacī*, and *kāya saṅkhārā*, respectively. **Such THOUGHTS related to attachment to worldly things (i.e., with *chandarāga*) are *Abhisāṅkhārā*.** *Arahants* generate *saṅkhārā*, but not *abhisāṅkhārā*.

Chandarāga Lead to *Abhisāṅkhārā*

2. The easiest way to see the difference between *saṅkhārā* and *abhisāṅkhārā* is as follows. *Saṅkhārā* with *chandarāga* are *abhisāṅkhārā*.
 - The correct “*pada nirutti*” (etymology) of “*rāga*” comes from “*rā*” + “*agga*” where “*rā*” means to “travel (in the *saṃsāric* journey)” and “*agga*” is to “give priority.” Thus, “*rāga*” means to “willingly engage (in the *saṃsāric* journey.)”
 - “*Chanda*” (“*ca*” + “*anda*”) means “blinded mind.” **Therefore, one with “*chandarāga*” has not comprehended the dangers of remaining in the rebirth process.** See, “[Lobha, Rāga and Kāma chanda, Kāma rāga.](#)”
 - *Chandarāga* is of three types: *Kāma rāga* (attachment to *kāma loka*), *rūpa rāga* (attachment to *rūpa loka*, the 16 *rūpāvacara Brahma* realms), and *arūpa rāga* (attachment to the four *arūpāvacara Brahma* realms.)
 - Note that *kāma rāga*, *rūpa rāga*, and *arūpa rāga* are three *saṃyojana* (*saṃsāric* bonds) that bind one to the rebirth process — *Kāma rāga* broken at the *Anāgāmi* stage and the other two bonds broken at the *Arahant* stage.
 - Thus, the removal of *chandarāga* leads to *Nibbāna*; see [Ref. 1](#).

Three Main Types of *Saṅkhārā*

3. The following categorization could be helpful:
 - i. Our thoughts, speech, and actions involved in daily activities are “*kammically* neutral.” Thus they involve “***kammically-neutral saṅkhārā***.”
 - ii. ***Abhisāṅkhārā*** keeps one on the rebirth process. These are *saṅkhārā* arising due to *avijjā*, i.e., “*avijjā paccayā saṅkhārā*” in the *Akusala-mūla Paṭicca Samuppāda* process; see, “[Akusala-Mūla Uppatti Paṭicca Samuppāda.](#)”
 - iii. Then there are “***kusala-mūla saṅkhārā***” cultivated by those on the Noble Path (Noble Persons above the *Sotāpanna Anugāmi* stage.) Those *saṅkhārā* arise with the comprehension of the Noble

Truths. Those are the “*kusala-mūla paccayā saṅkhāra*” in the *Kusala-mūla Paṭicca Samuppāda* process; see, “[Kusala-Mūla Paṭicca Samuppāda.](#)”

We Have to Attain *Nibbāna* While in This World

4. We cannot do ANYTHING in this world without generating *saṅkhāra*. Thus, working toward *Nibbāna* also involves *saṅkhāra*.

- To work towards attaining *Nibbāna*, one needs to engage in physical activities (with *kāya saṅkhāra*), and discuss Dhamma concepts (with *vacī saṅkhāra*.) Furthermore, when the mind is in an appropriate state (*samādhi*), certain Dhamma concepts automatically come to mind as *mano saṅkhāra*.
- Those are “*kusala-mūla saṅkhāra*.” One would start cultivating *kusala-mūla saṅkhāra* from the *Sotāpanna Anugāmi* stage. However, until the *Arahant* stage, some *abhisāṅkhāra* can arise via the *Akusala-mūla Paṭicca Samuppāda* process.
- Once attaining the *Arahanthood*, *abhisāṅkhāra* would not arise at all. However, *Arahants* would still generate *saṅkhāra* after attaining *Nibbāna*, until *Parinibbāna*. See, “[Saṅkhāra – Should Not be Translated as a Single Word.](#)”

Three Types of *Abhisāṅkhāra*

5. In the post, “[Saṅkhāra – Should Not be Translated as a Single Word.](#)” we discussed **three types of *abhisāṅkhāra* that can come into play in “*avijjā paccayā saṅkhāra*.”** See #8 there.

- First, there are *apuññābhisāṅkhāra* (“bad *saṅkhāra*”) involving *lobha*, *dosa*, *moha* (and other related *cetasika* like jealousy. They are “*apuñña abhisāṅkhāra*” that can lead to rebirths in lower realms (*apāyās*.) Such *apuññābhisāṅkhāra* will move one away from *Nibbāna*. That is easy to see.
 - However, we saw that two other types of “good *saṅkhāra*” can move one away from *Nibbāna*. Those “relatively good” *abhisāṅkhāra* that can lead to rebirths in the “good realms” at or above the human realm. Those are *puññābhisāṅkhāra* and *āneñjābhisāṅkhāra*.
6. *Puñña kamma* with *puññābhisāṅkhāra* can bring “good results” in this world, including rebirths at or above the human realm. Giving, moral living, and meditation come under *puñña kamma*; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā.](#)” *Puññābhisāṅkhāra* also includes the cultivation of *rūpāvacara jhāna* (first four *jhāna*) that lead to rebirths in the 16 *rūpāvacara Brahma* realms.
- *Āneñjābhisāṅkhāra* comes into play in the cultivation of the four higher (*arūpāvacara*) *jhānas* that lead to rebirths in the four *arūpāvacara Brahma* realms.

Per #2 above, all three types of *abhisāṅkhāra* arise due to *chandarāga*.

How Can *Puññābhisāṅkhāra* and *Āneñjābhisāṅkhāra* Arise Due to *Avijjā*?

7. For those who do not have a solid background in the basics, it will be difficult to see why *puññābhisāṅkhāra* and *āneñjābhisāṅkhāra* also arise due to *avijjā*. The simple explanation is that one MAY act with *avijjā* until one understands the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. When one starts comprehending the Noble Truths, one would see why striving for future rebirths even in the higher realms can be dangerous in the long run.

- That is related to the fact that one would understand many deep *suttas* ONLY after one gets that critical understanding.
- That is also why it is dangerous to translate deep *suttas* word by word without understanding the deeper concepts in Buddha Dhamma.
- I hope to discuss those in detail soon. Let us now discuss another related issue.

All Religions Encourage Doing Good Deeds to Achieve Happiness

8. Before the Buddha, people believed in morally good, morally wrong, and neutral deeds. All religions (to some extent) taught that one must abstain from evil deeds and engage in good deeds. In Pāli terms, that means one should avoid *apuññābhisaṅkhāra* and need to cultivate *puññābhisaṅkhāra*.

- The principle behind that rationale is that doing good will lead to good results, and the opposite will happen to those engaged in evil deeds. That is the “BASE LEVEL of understanding of laws of *kamma*.”

Difference Between Buddha Dhamma and Major Religions

9. Buddha also advised people to live moral lives and to cultivate *puññābhisaṅkhāra*.

- But there is a DEEPER LEVEL of understanding in Buddha Dhamma. That involves understanding the “real nature” of this world of 31 realms embedded in the Three Characteristics of Nature or *Tilakkhaṇa*. That understanding goes hand-in-hand with understanding *Paṭicca Samuppāda* and the First Noble Truth on Suffering. That DEEPER teaching says that suffering will NEVER come to an end until the true nature of this world is understood. That truth says it is foolish (*avijjā*) to assume that one can stop future suffering by just doing “good deeds” and by abstaining from “bad deeds.”
- The deeper point (that may be initially hard to understand) is the following: The Buddha saw the real suffering in this world at his Enlightenment. There is a broader world with 31 realms among which rebirths occur. Living beings commit “bad deeds” pursuing worldly pleasures and end up in the four lowest realms (*apāyās*.) He explained the process (*Paṭicca Samuppāda*) by which future rebirths occur.
- Until that process is understood (and thus one can comprehend *Tilakkhaṇa*), one would still have that “subtle wrong view” of our world. That is the deeper level *micchā diṭṭhi* removed at the *Sotāpanna* stage! That is the DEEPER LEVEL of understanding mentioned above.

Doing Good Deeds Is Not Enough to End Suffering

10. The CRITICAL point is that “good results” from “good deeds” do not last forever. Since we all have done “bad deeds” in past lives, their results can bring “bad births.”

- Suppose person X avoids doing ANY evil deeds in this life. When this life ends within 100 years or so, there will be two possibilities:
 - (i) Kammic energy for this human bhava has not been exhausted, and thus X will be reborn human again. Suppose X can avoid doing any evil deeds in that life and possibly a few more human lives. Eventually, X has to face option (ii) below.
 - (ii) X will be reborn in a new existence (bhava,) and it will be determined not only by the “good kamma” that X has accumulated in the current human bhava but also by any “bad kamma” accumulated in previous lives extending to billions of years to the past.
- That danger is evident in some accounts in the *Tiṇṇakā*. Even after stating the *Arahanthood*, Ven. Moggallāna was beaten to death. That was due to a trace of *kamma vipāka* leftover from killing his parents in a previous life. Aṅgulimāla killed almost a thousand people and would have been born in an *apāya* if he could not attain the *Arahanthood*. **If such highly-regarded Arahants had committed such heinous crimes in the past, how can we say that we have not?**

11. That is why Buddha Dhamma needs to be understood in the context of the rebirth process. Of course, it is up to each individual to decide the validity of the rebirth process.

- Not believing in rebirth is one of the ten types of wrong views (*micchā diṭṭhi*) in Buddha Dhamma. Thus, it would be impossible to make ANY progress with that wrong view. One gets to mundane *Sammā Diṭṭhi* by getting rid of such wrong views. Only then would one be able to comprehend more profound

concepts like *Paṭicca Samuppāda* and *Tilakkhaṇa* and get to the *lokuttara Sammā Dīṭṭhi* and start on the Noble Path.

- **It is a good idea to contemplate the above. It is a waste of time to discuss deep *suttas* without understanding these basic concepts.**

Difference Between *Kusala Kamma* and *Puñña Kamma*

12. Any “good deed” done with the BASE LEVEL of understanding is a *puñña kamma*. The same deed done with the DEEPER LEVEL of understanding is a *kusala kamma*. Let us discuss that briefly next.

Let us start with ten types of *akusala kamma* (*dasa akusala*.) Three by actions: *pāṇātipātā* (killing), *adinnādānā* (taking what is not given), *kāmesu micchācārā* (not just sexual misconduct, but also excessive of sensory pleasures.) Four by speech: *musāvāda* (Lying), *pisuṇā vācā* (slandering), *pharusā vācā* (harsh speech), and *sampappalāpā* (frivolous talk). Then there are three directly by the mind: *Abhijjhā* (covetousness; greed for other's belongings), *Vyāpāda* (ill-will, hatred), and *Micchā Dīṭṭhi* (wrong views.) [See [Ten Immoral Actions - Dasa Akusala](#).]

- Those ten become stronger IF THEY ARE DONE WITH *micchā dīṭṭhi*. Such strong versions of *akusala kamma* are *pāpa kamma*. They involve *apuññābhisaṅkhāra* that can DIRECTLY lead to rebirths in the *apāyās*. In *Abhidhamma*, such “*apāyagāmi* deeds” are done with “*dīṭṭhi sampayutta citta*” or “*citta* that arise with wrong views.” **We can also say that they involve *apuññābhisaṅkhāra*.** Yet another way to say that a stronger version of *avijjā* (or *moha*) is in play when one has one or more of the ten types of *micchā dīṭṭhi* or wrong views.
- The ten types of wrong views are discussed in “[Micchā Dīṭṭhi, Gandhabba, and Sotāpanna Stage](#).”
- Again, if one has any of the ten types of *micchā dīṭṭhi*, one can act with *moha* (under high temptations) and do “*apāyagāmi pāpa kamma*.” Note that it DOES NOT mean one with *micchā dīṭṭhi* will always act with wrong views and will inevitably do *pāpa kamma*. But the possibility is there.

Akusala Kamma May Be Done by Anyone Except a *Arahant*

13. The critical point is that even if one does not have the ten types of *micchā dīṭṭhi*, one could act with *avijjā* and still do *pāpa kamma* and be reborn in an *apāya*. **But the possibility of that is much less than that for someone with the ten types of *micchā dīṭṭhi*.**

- That is why only those above the *Sotāpanna Anugāmi* stage are genuinely free from rebirths in the *apāyās*. In addition to losing the ten types of wrong views, they have understood the following: **The possibility of Future suffering in the *apāyās* will be there as long as one believes that one can achieve permanent happiness within the rebirth process.**
- (However, even a Noble Person below the *Arahant* stage can do “mild *akusala kamma*” that can lead to rebirths in the human or higher realms.)
- What if one does not believe that there is a rebirth process?
- Then there is no need to read deep *suttas* about *Nibbāna*. One WOULD NOT be able to understand them. But even more importantly, why bother reading about *Nibbāna* if one does not believe in the concept of *Nibbāna*?
- That is why not believing in the rebirth process is one of the ten wrong views.

Wasting Time Discussing (Incorrectly Translated) Deep *Suttas*

14. Many people can save time by carefully reading and understanding what I discussed above. Of course, word-by-word translations of such deep *suttas* make it worse. The problem is that even the translators do not understand the concepts I discussed above. If they did, they would not do such nonsensical translations.

- I see many people have engaged in the same discussion in discussion forums over many years. They have wasted a lot of valuable time. Of course, some people do not even take these discussions seriously. It is like discussing philosophy for them.
- But if one even starts to understand the key message of the Buddha, one would not waste any time. We have a limited time of fewer than 100 years to use this rare opportunity.

Summary

15. The “[Kusala-Mūla Paṭicca Samuppāda](#)” process leads to *Nibbāna*. That process starts with “*kusala-mūla paccayā saṅkhāra*.”

- On the other hand, the rebirth process continues with “[Akusala-Mūla Paṭicca Samuppāda](#).” That process starts with, “*avijjā paccayā saṅkhāra*.” Good, moral deeds done without comprehending the Noble Truths (i.e., *puñña kamma*) also fall under this category.
- The same kind of moral deeds done with the comprehension of Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa* are *kusala kamma*.
- But many people believe moral, good deeds by anyone belong to the *kusala kamma* category. That is not correct. *Kusala kamma* can be done only with the comprehension of the Noble Truths.

Reference

1. “[WebLink: suttacentral: Chandarāga Sutta \(SN 22.25\)](#).” English translation there: “[WebLink: suttacentral: Desire and Lust \(SN 22.25\)](#).” Note that “*chandarāga*” is translated as “desire and lust.” That is not correct, as I explained in #2 above.

9.7.1.1 Rebirths Take Place According to Abhisāṅkhāra

December 27, 2021; revised December 28, 2021; June 15, 2022; July 2, 2022

Rebirths take place according to *abhisāṅkhāra* cultivated. That mechanism is explained in *Akusala-mūla Paṭicca Samuppāda*.

Three Types of Abhisāṅkhāra Leading to Rebirth in the 31 Realms

1. As we have discussed, the 31 realms in this world (*loka*) are distributed among three levels: *kāma loka*, *rūpa loka*, and *arūpa loka*.

- *Kāma loka* has 11 realms: the four lowest realms (*apāyās*), the human realm, and the six *Deva* realms.
- *Rūpa loka* consists of the sixteen *rūpāvacara Brahma* realms.
- *Arūpa loka* has four *arūpāvacara Brahma* realms.

- In previous posts, we saw that three types of *abhisāṅkhāra* are generated with the *Akusala-mūla Paṭicca Samuppāda* process that leads to rebirths among the 31 realms. See, #8 of “[Saṅkhāra – Should Not be Translated as a Single Word](#).”

2. Those three types of *abhisāṅkhāra* lead to rebirths among the 31 realms as follows:

- The worst type, *apuññābhisāṅkhāra*, lead to rebirths in the four lowest realms.
- The next higher level of *puññābhisāṅkhāra* leads to rebirths in the higher seven realms in the *kāma loka* and the 16 realms in the *rūpa loka*.
- The best type of *āneñjābhisāṅkhāra* lead to rebirths in the highest four realms of this world belonging to the *arūpa loka*.

Akusala-Mūla Paṭicca Samuppāda Dictates the Rebirth Process

3. The *Akusala-Mūla Paṭicca Samuppāda* describes how rebirths (*jāti*) take place in this world starting with “*avijjā paccayā (abhi)saṅkhāra*” step.

As we discussed, *saṅkhāra* in the step “*avijjā paccayā saṅkhāra*” refers to “*abhisāṅkhāra*.” [WebLink: suttacentral: Pattecasamuppāda Vibhaṅga \(Vb 6\)](#)” explains the step “*avijjā paccayā saṅkhāra*” as, “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisāṅkhāro, apuññābhisāṅkhāro, āneñjābhisāṅkhāro.*”

Translated: “**What is meant by ‘*avijjā paccayā saṅkhārā*’?** That means *puññābhisāṅkhāra*, *apuññābhisāṅkhāra*, *āneñjābhisāṅkhāra*.” For details, see “[Saṅkhāra – What It Really Means.](#)”

- Such *abhisāṅkhāra* can be *kāya*, *vacī*, or *mano saṅkhāra* that we discussed above. But only a part of *kāya*, *vacī*, and *mano saṅkhāra* are *abhisāṅkhāra*.
- In other words, ***abhisāṅkhāra*** leads to *kamma* done with ***lobha*, *dosa*, *moha***, and **mundane versions of *alobha*, *adosa*, *amoha***.
- They are *akusala kamma* or *dasa akusala* (three with the body, four with speech, and three with the mind). They can be *kāya kamma*, *vacī kamma*, and *mano kamma*. See, “[Ten Immoral Actions \(Dasa Akusala\)](#)”

Apuññābhisāṅkhāra – Connection to Lobha, Dosa, Moha

4. ***Apuññābhisāṅkhāra*** (“worst *abhisāṅkhāra*”) can lead to rebirths in the four lower realms (*apāyās*.) Such “bad *abhisāṅkhāra*” arise due to *lobha*, *dosa*, *moha* (and other related *cetasika* like jealousy.)

- Such ***apuññābhisāṅkhāra*** (“*apuñña abhisāṅkhāra*”) lead to *apuñña kamma* (or “*pāpa kamma*.”) That is the worst form of *akusala kamma* based on *lobha* (greed), *dosa* (hate/anger), *moha* (worst than *avijjā*).
- 5. “[WebLink: suttacentral: Pattecasamuppāda Vibhaṅga \(Vb 6\)](#)” explains ***apuññābhisāṅkhāra*** as follows: “*Tattha katamo apuññābhisāṅkhāro? Akusalā cetanā kāmāvacarā—ayaṃ vuccati ‘apuññābhisāṅkhāro’* OR “***apuññābhisāṅkhāra*** are *akusala cetanā* associated with the *kāma loka*.”
- *Akusala cetanā* (or intention of doing an *akusala kamma*) is in “*akusala citta*” or “defiled thoughts.”

Puññābhisāṅkhāra and Āneñjābhisāṅkhāra – Connection to (Mundane) Alobha, Adosa, Amoha

6. Then there are two types of “good *saṅkhāra*” that lead to rebirths in the higher 27 realms. Those “relatively good” *abhisāṅkhāra* lead to rebirths in the “good realms” at or above the human realm. Those are ***puññābhisāṅkhāra*** and ***āneñjābhisāṅkhāra***. Those two categories arise based on **the mundane versions of *alobha*, *adosa*, and *moha*** (i.e., without comprehension of the Four Noble Truths/*Tilakkhaṇa*/*Paṭicca Samuppāda*.)

- *Puñña kamma* with ***puññābhisāṅkhāra*** can bring “good results” in this world, including rebirths in the human realm and the six *Deva* realms. Giving, moral living, and meditation come under *puñña kamma*; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā.](#)” ***Puññābhisāṅkhāra*** also includes the cultivation of *rūpāvacara jhāna* that lead to rebirths in the 16 *rūpāvacara Brahma* realms.
- ***Āneñjābhisāṅkhāra*** comes into play in the cultivation of the four *arūpāvacara samāpatti* that lead to rebirths in the four *arūpāvacara Brahma* realms: *ākāsānañcāyatana*, *viññānañcāyatana*, *ākīñcaññāyatana*, and *nevasaññānāsaññāyatana*.
- ***Akusala kamma* is any *kamma* that keeps one in the rebirth process.** Thus, *puñña kamma* done without comprehension of the Four Noble Truths/*Tilakkhaṇa*/*Paṭicca Samuppāda* belong to *akusala kamma*. That is why *puññābhisāṅkhāra* and *āneñjābhisāṅkhāra* also arise due to *avijjā*.

Three Levels of Abhisañkhāra

7. Therefore, now we have an easy way to remember what types of *abhisañkhāra* lead to rebirths among the 31 realms in this world. To summarize:

- Worst form of *akusala kamma* are *apuñña kamma* or *pāpa kamma*. They are done with *apuñña abhisañkhāra* (***apuññābhisāṅkhāra***) and lead to the rebirths in the lowest four realms. Those four realms are collectively called *apāyās* and deliver the worst forms of suffering.
- The next (higher) level of *abhisañkhāra* are *puñña abhisañkhāra* (*puññābhisāṅkhāra*.) *Puñña kamma* (like giving to charity, taking care of parents/elders/*bhikkhus*, etc) lead to rebirths in the human realm and the six *Deva* realms. There is a higher level of *puññābhisāṅkhāra* that leads to rebirths in the 16 *rūpāvacara Brahma* realms; those involve the cultivation of *rūpāvacara jhāna*. Thus, ***puññābhisāṅkhāra*** lead to rebirths in 23 realms.
- The highest level of *abhisañkhāra* is *āneñja abhisañkhāra* (***āneñjābhisāṅkhāra***.) Those involve the cultivation of the four *arūpāvacara samāpatti*. They, of course, lead to rebirths in the four *arūpāvacara Brahma* realms.

Thus we can now clearly see how the rebirth process takes place among the 31 realms according to the types of *abhisañkhāra* cultivated via “*avijjā paccayā saṅkhāra*.”

All Types of Abhisañkhāra Arise Due to Avijjā!

8. As explained in #1 above, all types of *abhisañkhāra* within the three categories arise due to *avijjā*. What is *avijjā*?

- “[WebLink: suttacentral: Pattecasamuppāda Vibhaṅga \(Vb 6\)](#)” explains *avijjā* as follows: “*Tattha katamā avijjā? Dukkhe aññāṇam, dukkhasamudaye aññāṇam, dukkhanirodhe aññāṇam, dukkhanirodhagāminiyā paṭipadāya aññāṇam—ayaṃ vuccati “avijjā”.*”

Translated: “What is *avijjā*? It is the ignorance of the Four Noble Truths or **the absence of four types of knowledge** (*ñāṇa*): knowledge about the Truths on suffering (*Dukkhe aññāṇam*), the origin of suffering (*dukkha samudaye aññāṇam*), cessation of suffering (*dukkha nirodhe aññāṇam*), and the way to reach the cessation of suffering (*dukkha nirodha gāminiyā paṭipadāya aññāṇam*.)

- As we saw above, starting with the “*avijjā paccayā saṅkhāra*” step in *Akusala-mūla* PS different types of existences (*bhava*) and corresponding rebirths (*jāti*) arise among the 31 realms.

Connection to Tilakkhaṇa and Paṭicca Samuppāda

9. The key here is to understand the First Noble Truth. In other words, instead of “*dukkhe aññāṇam*” (not comprehending the Noble Truth on Suffering) get to “*dukkhe ñāṇam*” (knowledge of the Noble Truth on Suffering.)

- What is *dukkha* (suffering)? It is not the relatively minor sufferings that we experience in this life. Most people are happy with their lives.
- To understand the REAL suffering, one must understand the “wider worldview” seen by the Buddha upon his Enlightenment. **He saw that most living beings are trapped in the four lowest realms for very long times.** That is the suffering referred to by the Buddha!
- Even though relatively reduced levels of suffering manifest in the higher realms at or above the human realm, ANY given “sentient being” spends most time in the *apāyās*.
- More details at, “[Pattecca Samuppāda, Tilakkhaṇa, Four Noble Truths.](#)”

Apuññābhisāṅkhāra Done With Moha or Avijjā

10. The worst form of *apuññābhisaṅkhāra* is done with the **worst form *avijjā* of *moha***. One may FREQUENTLY act with *moha* if one still has one or more of the ten types of *micchā diṭṭhi*.

- With the removal of the ten types of *micchā diṭṭhi* the tendency to act with *moha* and generate *apuññābhisaṅkhāra* will be reduced.
- **But as long as one has not comprehended the Four Noble Truths/*Tilakkhaṇa*/*Paṭicca Samuppāda*, one may act with *avijjā* and may generate *abhisaṅkhāra* of all three types.**
- As we saw above, *Paṭicca Samuppāda* clearly explains how different types of rebirths arise due to *avijjā*. That is why it is critical to understand that process.

Cultivation of *Anāriya Jhāna* Done With *Avijjā*

11. We can clearly see now that the cultivation of all types of *anāriya jhāna* is done with *avijjā* (“*anāriya*” means “non-Buddhist”). Such *anāriya jhāna* are cultivated using *anāriya* meditation techniques such as *kasiṇa* mediation (using *kasiṇa* objects) and breath meditation (which is NOT *Ānāpānasati* meditation.) The sole purpose of such efforts is to attain such *jhānās*, and NOT *Nibbāna*. Cultivation of such *jhāna* leads to rebirths in the *Brahma* realms, as we saw above.

- **Any effort to seek a rebirth anywhere in the 31 realms is done with *avijjā*** because ANY such existence will have a finite lifetime.
- When that existence in such *Brahma* realm comes to an end, rebirths in lower realms will take place, inevitably ending up in the *apāyās*. That is why such efforts will NOT lead to the ending of *samsāric* suffering.
- The only way to stop future suffering is to stop the rebirth process.
- Thus, we can see that another way to describe *avijjā* is as follows: As long as one has the mindset that “existence ANYWHERE among the 31 realms is beneficial,” one would have *avijjā*. That is why the cultivation of (*anāriya*) *jhāna* is done with *avijjā*!

12. Note that *Ariya jhāna* is NOT cultivated with the goal of getting a rebirth in a *Brahma* realm. *Ariya jhānās* are realized automatically by some people with *magga phala* (if one has cultivated *anāriya jhānās* in recent past lives.)

- But some *Arahants* have cultivated *Ariya jhāna* deliberately and the Buddha had recommended that too. A good example is Ven. Moggallāna. After the cultivation of such *jhānās*, he developed *abhiññā* powers. Then he frequently visited *Deva* and *Brahma* realms to teach Dhamma to those *Devas* and *Brahmas*.
- By the way, there is a series of *suttas* that describe how Ven. Moggallāna attained all *jhānās* in sequence. That series starts with the “[WebLink: suttacentral: *Pathamajhānapaṇhā Sutta* \(SN 40.1\).](#)” Those who have questions about the terms *vitakka/vicāra*, *avitakka/avicāra*, and *savitakka/savicāra* should read that series of *suttas*.

9.7.1.2 Viññāṇa – Two Critical Meanings

[Abhisankhāra Lead to Kamma Viññāṇa](#)

[Two Types of Kamma Viññāṇa](#)

[Summary of Key Concepts About Viññāṇa and Saṅkhāra](#)

[Anidassana, Appatigha Rūpa Due to Anidassana Viññāṇa](#)

9.7.1.2 Abhisankhāra Lead to Kamma Viññāṇa .1

January 3, 2022; revised August 31, 2022

All *viññāṇa* belong to either six types OR two types: *vipāka viññāṇa* and *kamma viññāṇa*.

Two Categories of *Viññāṇa*

1. *Viññāṇa* needs to be understood based on the context. All *viññāṇa* belong to either six types OR two types:

- i. The **six types of *viññāṇa*** [sensory experience] are: *cakkhu viññāṇa*, *sota viññāṇa*, *jivhā viññāṇa*, *ghāṇa viññāṇa*, *kāya viññāṇa*, and *mano viññāṇa*.
- ii. The **two types of *viññāṇa*** [resultant and action] are: ***vipāka viññāṇa*** and ***kamma viññāṇa***.
 - Five types of *viññāṇa* in the first category are ALWAYS *vipāka viññāṇa*. *Mano viññāṇa* can be either *vipāka viññāṇa* or *kamma viññāṇa*.
 - *Kamma viññāṇa* are ALWAYS *mano viññāṇa*.

Sensory Experience (*Vipāka Viññāṇa*) Versus *Abhisankhāra* Generation (*Kamma Viññāṇa*)

2. An easy way to remember those categories is as follows.

- **The six types of *viññāṇa* arise when sensory inputs come in through the six senses:** *cakkhu*, *sota*, *jivhā*, *ghāṇa*, *kāya*, and *mano*. I have discussed them in “[Chachakka Sutta – Six Types of *Vipāka Viññāṇa*](#).” They are just **sensory experiences** and no *kammic* energy is produced. **These are all *vipāka viññāṇa*.**
- ***Kamma viññāṇa* are strictly *mano viññāṇa*. These are the *viññāṇa* that arise in *Paṭicca Samuppāda*.** They **generate *kammic* energies** that can lead to future *vipāka* and even “power up” future rebirths. They arise in “[Akusala-Mūla Uppatti Paṭicca Samuppāda](#),” and “[Idappaccayatā Paṭicca Samuppāda](#).”
- Therefore, the five types of **sensory experiences involving the five physical senses (*cakkhu viññāṇa*, *sota viññāṇa*, *jivhā viññāṇa*, *ghāṇa viññāṇa*, *kāya viññāṇa*)** are ALWAYS *vipāka viññāṇa*.
- On the other hand, *mano viññāṇa* can be either ***vipāka viññāṇa*** or ***kamma viññāṇa***.

All *Viññāṇa* Arise in the Mind

3. The six types of *viññāṇa* ALL arise in mind. The six types indicate the “sense doors” through which they come in. For example, a sensory input coming through the eyes is a *cakkhu viññāṇa*, one coming through the ears is a *sota viññāṇa*, ..one comes through the mind is a *mano viññāṇa* (six types.)

- Such six types of *viññāṇa* only give rise to an experience. We see something with *cakkhu viññāṇa*, hear with *sota viññāṇa*, .. and recall something with *mano viññāṇa* (six types.)
- **Note:** *Vipāka viññāṇa* DOES NOT mean that each sensory event has a one-to-one correspondence with a past *kamma*. When born with a human body due to past *kamma*, that body will be subjected to all kinds of sensory experiences associated with the human *bhava*. That is a result (*vipāka*) of being born human.
- Based on *vipāka viññāṇa*, we may start accumulating “new *kamma*” with *kamma viññāṇa*.

Kamma Viññāṇa – More Than Experience

4. BASED ON *vipāka viññāṇa* (i.e., sensory input,) we may start thinking, speaking, and doing things thereby accumulating new *kamma* (mainly leading to *vacī* and *kāya kamma* based on *vacī* and *kāya abhisankhāra*, as we have discussed.)

- All those initiate with *mano viññāṇa* that arise via “*avijjā paccayā abhisankhāra*” followed by “*abhisankhāra paccayā kamma viññāṇa*” **in *Paṭicca Samuppāda*.**
- **In the course of that process, the mind generates *kammic* energy.** That is why it will be easy to remember that by calling those “*kamma viññāṇa*.”

Kamma/Vipāka Viññāṇa Categorization – Not in the *Tipiṭaka*

5. The categorization of *vipāka* and *kamma viññāṇa* is not mentioned explicitly in the *Tipiṭaka*. But it helps separate the two types.

- Otherwise, it can lead to much confusion even for the translators as I pointed out in the post, “[Distortion of Pāli Keywords in *Paṭicca Samuppāda*](#)” among many others.
- *Kamma viññāṇa* is the type of *viññāṇa* that *bhikkhu* Sāti said would “travel from *bhava* to *bhava*” (presumably from his *Vedic* background) in the “[WebLink: *suttacentral: Mahātanhāsaṅkhaya Sutta* \(MN 38\)](#).” But we know that various types of *kamma viññāṇa* are cultivated by us, and only one of them can give rise to existence at a time.
- Just like *bhikkhu* Sāti was confused, present-day translators are also confused (or may be not even aware of) that *viññāṇa* CAN BE many types. When they translate *viññāṇa* as “consciousness” that would only include *vipāka viññāṇa*. That leave out *viññāṇa* arising via, “*abhisankhāra paccayā kamma viññāṇa*” in *Paṭicca Samuppāda*.

Vipāka Viññāṇa Do Not Involve *Abhisankhāra*

6. Any mental EVENT (involving *vipāka* or *kamma viññāṇa*) will have associated *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

- *Vedanā* “detects” the sensory event and *saññā* identifies what it is. *Saṅkhāra* means to “prepare” that *citta* (loosely called “thought”), and that is done with the *cetanā cetasika*, as we have discussed. See, “[Kamma and Saṅkhāra, Cetanā and Sañcetanā](#).”
- That is why *vedanā*, *saññā*, and *cetanā* are three of seven “universal *cetasika*” that arise in ANY *citta*. In other words, ANY mental event (involving *vipāka* or *kamma viññāṇa*) will have *vedanā*, *saññā*, and *saṅkhāra*. The totality of that experience is *viññāṇa*.
- That is also why *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* are the principle “mental aggregates.”
- **Now, when the *cetanā cetasika* “prepares the *citta*,” that is *saṅkhāra*.** Thus, we can now see that *mano saṅkhāra* are in EVERY *citta* because *vedanā* and *saññā* are in every *citta*! Now, if we consciously think (with *vacī saṅkhāra*) about doing something and then do it (with *kāya saṅkhāra*) that could lead to new *kamma*. See [Ref. 1](#).
- **Note:** Breathing is via *kāya saṅkhāra* (so is raising a hand) but those do not lead to new *kamma*.

Mano Saṅkhāra Cannot be *Abhisankhāra* Leading to Rebirth

7. The critical point here is that *mano saṅkhāra* are in *vipāka viññāṇa* as well as in *kamma viññāṇa*, i.e., in any type of *viññāṇa*. In fact, they are also in “pure *citta*” or “*pabhassara citta*” of an *Arahant* in *Arahant-phala samādhi*.

- *Mano saṅkhāra* can NEVER become *abhisankhāra* that can lead to rebirth.

- To generate *kammic* power (in *javana citta*), we need to generate defiled thoughts CONSCIOUSLY. Those involve *vacī* and *kāya saṅkhāra*. *Kamma viññāṇa* (in *javana citta* with *kammic* energy) arises only in *Paṭicca Samuppāda*.
- It is not necessary to fully understand the above in #7. It is there for completeness.

First Two Steps in *Paṭicca Samuppāda* in the *Niddesa* Version

8. I have pointed out that “*avijjā paccayā saṅkhāra*” is the *uddesa* version (or the brief version) frequently used in the *suttas*. The *niddesa* (or a bit more descriptive) version is “*avijjā paccayā abhisāṅkhāra*.”

- In the same way, we can now see that the next step of “*saṅkhāra paccayā viññāṇa*” would be a bit more explanatory (*niddesa* version) in “*abhisāṅkhāra paccayā kamma viññāṇa*.” In fact, we used that terminology in #4 above. The three different ways of explaining concepts discussed in, “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#).”
- As discussed above, our conscious thoughts (with *vacī* and *kāya saṅkhāra*) in the *Paṭicca Samuppāda* processes create *kammic* energy. Some *kammic* energies may result in *kamma vipāka* during life, but some can lead to future rebirths.
- On the other hand, no *kamma viññāṇa* can arise when an *ārammaṇa* comes in via one of the six sense faculties. Those are *vipāka viññāṇa* (just seeing, hearing, etc.)

Difference Between *Kammic* Energy and “Food-Produced” Energy

9. Some people get confused when I say *kāya saṅkhāra* are needed to take bodily actions, i.e., to move body parts. They may be asking, “how can thoughts move body parts?”

- That is a valid question from a mundane perspective. I have seen many materialistic scientists and philosophers ask the same question.
- **The key is to understand that the mind only INITIATES the movement of body parts.** That body movement is carried by the brain. The energy needed to move body parts comes from the food we eat.
- The brain is made of inert matter and is like a computer. All body movements are coordinated by the brain. The food we eat provides energy not only to move body parts but also, to keep the brain working. Since the brain is the interface between the mind and the body, it consumes a lot of energy by itself, about 25% of all the energy from the food we eat.
- Consider the following analogy of a soldier (mind/mental body or the *gandhabba*) driving a fully-enclosed military tank (physical body.) The soldier can see the outside only with the video cameras (eyes.) To drive the tank, to see outside, and fire artillery, the soldier depends on the on-board computer (brain.) The amount of work by the soldier (mind/mental body or the *gandhabba*) is minuscule compared to that generated by oil powering the vehicle and the guns (food powering body movements.)
- See “[Gandhabba in a Human Body – an Analogy](#)” for further details. **It is critical to understand that analogy.**

Connection Between *Kamma* and *Saṅkhāra*

10. In other words, *kāya kamma* (like offering food) involves moving body parts; one has to prepare and offer the food. **Those are bodily actions.** Those activities are powered by the food we eat.

- The mind only makes the decision to make the offering. It directs the body to do certain tasks with *kāya saṅkhāra*. Since they involve *alobha/adosa/amoha*, those are *kāya abhisāṅkhāra*.
- This is why *cetanā* determines *kamma*. Bodily movements are BASED ON *cetanā* (*saṅkhāra*.) If we see a man carrying a big knife we don’t know what his intention is. It could be cut loose a trapped animal (good deed) or to kill someone (bad deed.)

- The same holds for speech. One intends to utter certain words with **vacī saṅkhāra**. Then the brain gets the words out by moving the tongue and lips with **vacī kamma**. Now, if one generates such **vacī saṅkhāra** with an angry mindset, they would be **apuññābhi vacī saṅkhāra** (i.e., **vacī abhisāṅkhāra**.) Just asking someone for directions would involve just **vacī saṅkhāra** (no **abhisāṅkhāra**.)

Only *Kamma Viññāṇa* via *Abhisāṅkhāra* Generate *Kammic* Energy

11. As we have discussed, a *vipāka viññāṇa* can only “bring in a sensory input” and we just experience it. Our minds do not generate any *abhisāṅkhāra* or *kammic* energy.

- But, based on such a sensory input, we may get attached to it and start generating ***abhisāṅkhāra*** and accumulate ***kamma*** (or more correctly *kammic* energies). **Such *kammic* energies are unimaginably TINY compared to the energy required to move a hand, for example.**
- Then such *kammic* energies can bring in future *kamma vipāka*, some of which can lead to rebirth.

Mental Aspects Are with the Mental Body (*Gandhabba*)

12. The fact that the brain is NOT the mind is quite apparent from numerous rebirth accounts and Near-Death-Experience (NDE) studies.

- With more rebirth accounts published worldwide, it is becoming impossible to avoid their validity. The same is true for NDE studies.
- Furthermore, scientists have been trying hard to come up with an explanation of how consciousness can arise in the brain. Despite many studies and proposals, they have not been able to make ANY progress. A popular approach is to say consciousness arises in neurons.
- But they seem to ignore the following basic question: “How can joy or sorrow arise in inert atoms/molecules? Anything in the brain is made of atoms/molecules!
- **No one will ever be able to prove that consciousness can arise in the brain.** Some philosophers are beginning to see the truth of that; see [Ref. 2](#).

References

1. In the “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#)”:

“*Tayome, āvuso visākha, saṅkhārā—kāya saṅkhāro, vacī saṅkhāro, citta saṅkhāro*”ti.

“*Katamo paṇāyye, kāya saṅkhāro, katamo vacī saṅkhāro, katamo citta saṅkhāro*”ti?

“*Assāsapassāsā kho, āvuso visākha, kāya saṅkhāro, vitakka vicārā vacī saṅkhāro, saññā ca vedanā ca citta saṅkhāro*”ti.

The last verse says: “breathing involves *kāya saṅkhāra*, *vitakka/vicāra* are *vacī saṅkhāra*, and *vedanā/saññā* are *mano saṅkhāra*.”

[All machine and no ghost- McGinn-2012](#)

A recent book by Nagel shows that he leans further toward the possibility that mind is primary: “Mind & Cosmos: Why the Materialist Neo-Darwinian Conception of Nature Is Almost Certainly False” by Thomas Nagel (Oxford University Press, 2012).

9.7.1.2 Two Types of Kamma Viññāṇa

January 9, 2022

There are two types of *kamma viññāṇa*. One brings *vipāka* at that time [[Idappaccayatā Paṭicca Samuppāda](#)] and the other in the future [[Akusala-Mūla Uppatti Paṭicca Samuppāda](#)].

Overview of Types of Viññāṇa

1. As we have discussed in recent posts, *kamma viññāṇa* is different from *vipāka viññāṇa*. *Kammic* energy created via *kamma viññāṇa* can bring *vipāka* in this life or future lives. ***Vipāka viññāṇa* are just sensory experiences (consciousness.)**

- ***Kamma viññāṇa* are strictly *mano viññāṇa*. These are the *viññāṇa* that arise in *Paṭicca Samuppāda*.** They generate **kammic energies** that can lead to *vipāka* and even “power up” future rebirths.
- “[Idappaccayatā Paṭicca Samuppāda](#)” describes how *kamma viññāṇa* can bring *vipāka* in the present life itself at that time. “*Ida*” (or “*idha*”) means “here” or “at that time.” “*Ida paccayā*” (based on the conditions at this time) rhymes as “*idappaccayā*.” [*idappaccayatā* : [f.] having its foundation based on the conditions at this time, i.e., causally connected.]
- On the other hand, arising of future rebirths via *kamma viññāṇa* is described in “[Akusala-Mūla Uppatti Paṭicca Samuppāda](#).”
- In *Abhdhammic* language, those two types of *kammic* energies (*kammic* potential) are *nānākkhaṇikā* (for rebirth) and *sahajātā* (in the present life); see [Ref. 1](#). No need to go into such details for our discussion.
- To refresh memory on *kamma viññāṇa*, see, “[Abhisāṅkhāra Lead to Kamma Viññāṇa](#).”

Simple Example 1

2. A strong *kamma* (say hitting a human) originates with *abhisāṅkhāra* arising in mind (say in person X.) Of course, X does such a deed without knowing (or forgetting about) the harmful consequences. Due to either reason, *avijjā* had arisen in mind leading to “*avijjā paccayā abhisāṅkhāra*” and “*abhisāṅkhāra paccayā kamma viññāṇa*.” *Kamma viññāṇa* is the mindset to achieve a particular goal (in this case, to hurt the other person.)

- He may hurt that person based on that intention (by becoming a violent person.)
- “[Idappaccayatā Paṭicca Samuppāda](#)” describes that process. However, his INTENTION to hurt the other person will generate *kammic* power that will bring back *vipāka* to HIMSELF in the future, well into future lives. “[Akusala-Mūla Uppatti Paṭicca Samuppāda](#)” explains that second process.
- Let us see how X is “born” a violent person in this life via “[Idappaccayatā Paṭicca Samuppāda](#).”

Idappaccayatā Paṭicca Samuppāda Example

3. First, hateful thoughts (with *dosa*) arise in X’s mind, and those are *vacī abhisāṅkhāra*. That gives rise to a defiled mindset (*kamma viññāṇa*). As one keeps generating *vacī abhisāṅkhāra*, anger grows and that *kamma viññāṇa* will become strong.

- Those defiled thoughts create *javana* power (*kammic* energy) in *javana citta*. This energy accumulates in the “*kamma bhava*” (we will discuss that in the future.) Part of that energy leads to *vipāka* in the present life by turning him into a violent person at that moment. The rest of that *kammic* energy can bring *vipāka* in the future.

- Now, as X keeps getting angrier, part of that *kammic* energy brings *vipāka* by transforming him into a temporary *bhava* (state of a violent person in this case). His face becomes dark, and he will be visibly agitated. “[Idappaccayatā Paticca Samuppāda](#)” describes that process.
- If he gets “worked up,” he may get into physical violence with *kāya abhisāṅkhāra*, and that could lead to even killing of the other person. *Kāya abhisāṅkhāra* are even more potent. The accumulated *kammic* energies can bring a future rebirth in a lower realm. “[Akusala-Mūla Uppatti Paticca Samuppāda](#)” explains that process.

Birth Within Birth – Innocent Teenager to a Drunkard

4. “[Idappaccayatā Paticca Samuppāda](#)” can also explain the transformation of an innocent teenager to a drunkard over a longer time (still within the present life.) Suppose X is a teenager growing up in a nice family. At school, he starts hanging out with bad friends and starts drinking. In the beginning, he is reluctant even to taste the alcohol but cannot resist the “peer pressure.”

- Once getting started, he develops a new “*gati*” (habit) to like drinking and related activities. The more he wants to get drunk, the more he starts thinking about it (i.e., frequently generating *vacī abhisāṅkhāra*.) Here he starts building a new *kamma bhava* that can make him born a “drunkard” again in this life. On the other hand, future *vipāka* will contribute to a rebirth in a lower realm.
- A *kamma viññāṇa* is the desire to get something done or work toward a specific goal. X is cultivating a “*viññāṇa* of a drunkard” or the “mindset of a drunkard.” **The more X thinks about getting together with friends and drinking, the more “drunkard *viññāṇa*” grows and contributes *kammic* energy to the corresponding *kamma bhava*.**
- **That is a CRITICAL point that differentiates *kamma viññāṇa* from a *vipāka viññāṇa*.** It is discussed (as usual in the summary or “*uddesa*” form) in the *Cetanā Sutta* (SN 12.38); see below.

Establishment and Growth of a *Kamma Viññāṇa*

5. As we have discussed, *kamma* accumulation does not start until the following two conditions are satisfied:

- (i) A sensory input (*ārammaṇa*) comes in, which could be through any of the six senses.
- (ii) Mind gets attached to that sensory input. It could be seeing an attractive person, hearing a pleasing sound, etc.
 - **Note that step (i) involves a *vipāka viññāṇa*.** There is no *kamma* accumulation. It is just seeing, hearing, etc.
 - **Step (ii) would not occur unless the mind gets attached to that *ārammaṇa*.** Once getting attached, the mind starts generating *citta* (thoughts) about that sensory input (how to enjoy it more/get possession of it, etc.). Such *citta* develop (within a billionth of a second) **into a *kamma viññāṇa*.** That ***kamma viññāṇa* (expectation) can grow with more *abhisāṅkhāra*.**

Correct Translation of *Cetanā Sutta* (SN 12.38)

6. Let us see how the “[WebLink: suttacentral: Cetanā Sutta \(SN 12.38\)](#)” explains the above process. The link at Sutta Central provides both the English translation by *Bhikkhu Sujato* and the Pāli version side-by-side.

- The third verse there is: “*Ārammaṇe sati patiṭṭhā viññāṇassa hoti.*” That means a ***kamma viññāṇa*** establishes upon the mind getting attached to an *ārammaṇa*. Note that it is a ***vipāka viññāṇa*** that had started the process. “*Ārammaṇe sati*” means focusing the mind on that *ārammaṇa*.
- Next verse, “*Tasmim patiṭṭhite viññāṇe virūḷhe āyatim punabbhavābhiniḍḍatti hoti*” means **“when that *kamma viññāṇa* is established and grows, it will produce *kammic* energy for future**

renewed existence” (*punabbhava* means repeated existence.) Of course, *bhava* would be according to the type of *kamma*.

- Note that the English translation at Sutta Central says: “When **consciousness is established and grows**, there is rebirth into a new state of existence in the future.” **How can consciousness grow? Consciousness means awareness. Most translators translate it the exact wrong way without distinguishing between the initial *vipāka viññāṇa* and the subsequent *kamma viññāṇa*. Only *vipāka viññāṇa* fall into the category of “consciousness.”**
- (By the way, I was not trying to pick on *Bhikkhu* Sujato above. *Bhikkhu* Bodhi also has a translation (about the same as *Bhikkhu* Sujato), but it does not have the Pāli text side-by-side.

Simple Example 2

7. Let us take a simple example to illustrate the sequence of events when person X sees his arch-enemy Y.

- “Seeing Y” is a *vipāka viññāṇa* and Y becomes the *ārammaṇa* (thought object) for X.
- X starts generating angry thoughts (*vacī abhisāṅkhāra*) about Y, resulting in the establishment of a *kamma viññāṇa* (an expectation.) Because of that mindset, X says something terrible to Y; that is an escalation of *vacī abhisāṅkhāra*, and the *kamma viññāṇa* grows. X has now started accumulating *kammic* energy that brings him to an “angry *bhava*.” His face becomes dark, and he is visibly getting upset.
- If Y also says something hostile in return, the situation can escalate. X may become angrier, generating more *vacī abhisāṅkhāra*, and the *kamma viññāṇa* grows to the extent that X may decide to attack Y physically. Such an attack involves *kāya abhisāṅkhāra* and even more *kammic* energy generated. Of course, part of that energy would also bring *vipāka* in the future.

Summary

8. Understanding Buddha Dhamma means understanding *Paṭicca Samuppāda*. That requires knowing what is meant by each term in *Paṭicca Samuppāda*. Most translators don’t seem to understand what is meant by basic terms like *saṅkhāra* and *viññāṇa*, let alone more complex *nāmarūpa*, *bhava*, etc.

- In previous posts, I pointed out that “*saṅkhāra*” is a generic term, and in some instances, it is necessary to use *abhisāṅkhāra* even though the “*uddesa* version” just says “*saṅkhāra*.”
- In the same way, *viññāṇa* is a generic term. One needs to know the difference between *vipāka viññāṇa* (consciousness or awareness) and the *kamma viññāṇa* (mindset to achieve a goal/expectation.)
- Translating deep *suttas* word by word without understanding those differences has hindered many, particularly those in the Western world who rely on English translations. Also, see, “[Distortion of Pāli Keywords in Paṭicca Samuppāda](#).”
- Up to now, such incorrect translations could have been justified because correct interpretations had not been available. But I, and a few others, have been trying to point these issues over the past few years. We are not saying to accept our explanations blindly. But if our descriptions are not correct, those errors need to be pointed out. Such comments can be made at the discussion forum.

9.7.1.2 Summary of Key Concepts About Viññāṇa and Saṅkhāra .3

January 16, 2022; revised August 31, 2022

We have discussed several key concepts about *viññāṇa* and *saṅkhāra* in the recent series of posts. It could be beneficial to summarize them in one post.

Difference Between a *Vipāka Viññāṇa* and a *Kamma Viññāṇa*

1. It is CRITICAL to distinguish between **recognizing a sensory input** and **thinking about it to achieve a particular goal**.

- **The first is just a sensory experience called consciousness or awareness.** One becomes aware of sight, sound, taste, smell, touch, i.e., “eye-consciousness through body-consciousness (touch sensation).”
- **The second is MORE THAN consciousness/awareness. The mind wants to accomplish something** based on that **sensory input**. The second type occurs ONLY IF the mind is attracted/attached to that sensory experience.
- It is essential to see the connection between the two cases and the time sequence. A *kamma viññāṇa* may arise only after a *vipāka viññāṇa*.

Vipāka Viññāṇa – Initial Sensory Experience

2. The first type is a *vipāka viññāṇa*. Any person living in the human world (whether it is an average human or a Buddha) will experience this type of *viññāṇa*.

- For example, imagine our Buddha Gotama living in *Jetavanārāma* (a luxurious residence offered to the Buddha and the *bhikkhus* by the wealthy merchant Anāthapiṇḍika.) He would see and hear the same things as anyone else there. If someone offered a good meal, they all would agree that it was tasty.

Kamma Viññāṇa – Expectation (Goal) Based on the *Vipāka Viññāṇa*

3. The second type, *kamma viññāṇa*, will take place ONLY IF one got attracted/attached to the sensory experience of the first type, a *vipāka viññāṇa*.

- The mind MUST first be made aware of “something attractive thing,” whether it is a sight, sound, taste, smell, or a touch to get attached. Of course, it could also be a MEMORY of a previous sensory experience. For example, the memory of a tasty food eaten last week may come to the mind as a *vipāka viññāṇa* too. **That is why a *vipāka viññāṇa* can be *cakkhu*, *sota*, *jivhā*, *ghāṇa*, *kāya*, or *mano viññāṇa*.**
- However, we don’t get attached to all we see, hear, etc. We get enticed by only a fraction of such sensory inputs (*ārammaṇa*.) But if we do attach, we start building expectations along with that. We do that by thinking about acting on that *ārammaṇa* (how to enjoy it more if it is enjoyable.) **All that happens at the mind-door (*manodvāra*), and thus *kamma viññāṇa* is always a *mano viññāṇa*.**

Saṅkhāra and *Abhisāṅkhāra* – Critical Difference

4. Thus, the cultivation of a *kamma viññāṇa* starts with *vitakka/vicāra*. In simple terms, *vitakka* is to “focus on that *ārammaṇa*” and *vicāra* is to “think along that *ārammaṇa*.” For example, if we see an appealing person, we may **think about** approaching that person.

- Thus the initiation/cultivation of a *kamma viññāṇa* starts with “*vitakka/vicāra*.” Such *vitakka/vicāra* are *vacī saṅkhāra*. **If such thoughts involve *lobha*, *dosa*, and *moha*, they become *vacī abhisāṅkhāra*.**

- If that *kamma viññāṇa* becomes more assertive, we may take physical action to fulfill that *kamma viññāṇa* (expectation.) In the above example, we may walk to that person and start talking to the person. Such activities involve *kāya saṅkhāra*. Again, **if such thoughts also involve lobha, dosa, and moha, they become kāya abhisāṅkhāra.**
- Thus, we can see that *abhisāṅkhāra* are associated only with *kamma viññāṇa* and NOT with *vipāka viññāṇa*.

It Is Necessary to Understand Those Key Concepts

5. I hope the above summary on *saṅkhāra/abhisāṅkhāra* and their relationships to *vipāka viññāṇa/kamma viññāṇa* is clear. If you go back and read the previous posts, that may solidify your understanding.

- It is essential to understand those critical concepts before being able to comprehend *Paṭicca Samuppāda* or *Tilakkhaṇa* or the Four Noble Truths.
- **The English words “consciousness” or “thoughts” do not convey the meaning of *viññāṇa*, especially *kamma viññāṇa*.** Learning about the relationship between *citta* and *viññāṇa* could be helpful.

A Citta Evolves to a Viññāṇa

6. Why did the Buddha analyze our world with five entities (five aggregates) of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*?

- The world offers sensory inputs with six types of *rūpa*: *rūpa rūpa* (sights), *sadda rūpa* (sounds), *rasa rūpa* (tastes), *gandha rūpa* (smells), *phoṭṭhabba rūpa* (touches), and *dhamma rūpa* or *dhammā* (*kammically-produced fine rūpa*).
- That last category of *dhammā* includes *rūpa* below the *suddhaṭṭhaka* stage. A *suddhaṭṭhaka* is the smallest *rūpa* belonging to the other five types of *rūpa*. In other words, modern science can detect the first five types of *rūpa* with their instruments but will never detect *dhammā*.
- For details, see “[Chachakka Sutta – Six Types of Vipāka Viññāṇa](#)” and “[What are Rūpa? – Dhammā are Rūpa too!](#)”
- The *suttas* refer to *dhammā* as “*anidassana appaṭigha rūpa*” (which cannot be seen or detected with the physical instruments). I will discuss how *dhammā* are related to *kamma viññāṇa* in the next post. An intro to the next post is in #10 below.

7. **When any of those six types of *rūpa* makes contact with the mental body (*gandhabba*), then *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* arise as *vipāka viññāṇa*.** That is how we experience such a *rūpa*. The brain plays a crucial role in the above process; see, “[Brain – Interface between Mind and Body](#).”

- All four of those mental aggregates rise in *citta*. A *citta* arises with a certain number of *cetasika* (mental factors.) At least seven *cetasika* arise with a *citta*, and *vedanā* and *saññā* are two of those “universal *cetasika*.”
- The inclusion of more *cetasika* in a *citta* comes under “*saṅkhāra*.” If any *sobhana* (good or “mundane *alobha*, *adosa*, *amoha*”) or *asobhana* (bad or *lobha*, *dosa*, *moha*) *cetasika* arise, then those become *abhisāṅkhāra*. That is a simple way to remember the difference between *saṅkhāra* and *abhisāṅkhāra*.
- The overall sensory experience is *viññāṇa*. Any *citta* starts with the seven universal *cetasika* and will incorporate more *cetasika* (*saṅkhāra* generation) and ends up as *viññāṇa*. That happens very fast (within a billionth of a second), and only a Buddha can “see” such a rapid process.

- That is a bit of very basic *Abhidhamma* that everyone needs to know. It is not necessary to learn the details at the beginning.

8. I hope now you can see the inter-relationships among the five aggregates.

- The six types of *rūpa* bring sensory experiences via *vipāka viññāṇa*.
- The four aggregates of *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* help describe such a sensory experience.
- **If we attach to such sensory experiences**, the mind will generate **kammic energies (*dhammā*) via *kamma viññāṇa***.
- Such *dhammā* can lead to future rebirths of a sentient being AND more of the six types of *rūpa*. That is all explained by *Paṭicca Samuppāda*.

***Paṭicca Samuppāda* Can Be Deep and Explain Everything in This World**

9. That is also the critical meaning of the first two verses in *Dhammapada*: “[Manopubbangamā Dhammā..](#)” It is the mind that creates the future lives and the physical world. That is a profound subject, and we are at the beginning of such a discussion.

- Of course, it is NOT necessary to learn such processes in detail.
- But it is good to realize that **Buddha Dhamma (*Paṭicca Samuppāda*) should not be taken lightly, as the Buddha admonished Ven. Ananda** in the “[WebLink: suttacentral: Mahānidāna Sutta \(DN 15\)](#).” The first few verses in the English translation recount that exchange between the Buddha and Ven. Ananda.

***Anidassana Viññāṇa* – What Does That Mean?**

10. As we discussed above, it is a *kamma viññāṇa* that creates ***dhamma rūpa* or *dhammā*** – the sixth type of *rūpa* in Buddha Dhamma addressed in #6 above.

- The phrase “*viññāṇaṃ anidassanaṃ*” has invoked many discussions; see, for example, “[WebLink: suttacentral: Viññāṇa anidassana: the state of boundless consciousness](#).”
- However, it has a simple meaning, “*viññāṇa* is not visible.” Yet, for those who assume *viññāṇa* can only mean “consciousness” it is intriguing. They think, “of course, consciousness is invisible. So, why did the Buddha say that?” **The answer is that a *kamma viññāṇa* is much more than just consciousness.**
- That phrase “*viññāṇaṃ anidassanaṃ*” appears in the [WebLink: suttacentral: Brahmanimantanika Sutta \(MN 49\)](#) and the [WebLink: suttacentral: Kevatta Sutta \(DN 11\)](#) and **refers explicitly to *kamma viññāṇa***. The CRITICAL POINT to understand is that a *kamma viññāṇa* can generate “*anidassana rūpa*” (*dhammā*).
- That discussion in “[Anidassana, Appatigha Rūpa Due to Anidassana Viññāṇa](#).”

Summary

10. A sensory experience starts with a *vipāka viññāṇa*. If the mind gets attached to it, then it may begin to generate *abhisāṅkhāra* and thereby generate *kammic* energies via *kamma viññāṇa*. Such *kammic* powers bring future *vipāka*, and thus the *samsāric* process drags on.

- Any type of *viññāṇa* starts as a *citta*, “the primary unit of cognition” in Buddha Dhamma. A set of *cetasika* arises with a *citta* that defines the *citta* as good, bad, or neutral.
- That *citta* evolves into a complex entity called *viññāṇa* (by incorporating various *cetasika*) within a billionth of a second. During that astonishingly short time, the original *citta* gets contaminated depending

on two factors: (i) the sensory input and (ii) the *gati* (character/habits) of the person. See “[Gati \(Habits/Character\) Determine Births – Saṃsappanīya Sutta.](#)”

- Comprehending Buddha Dhamma requires studying various interconnected aspects. It is like working on a jigsaw puzzle. With time and effort, a clear picture will emerge.

9.7.1.2 Anidassana, Appaṭigha Rūpa Due to Anidassana Viññāṇa

.4

January 23, 2022; revised December 23, 2022; January 29, 2024

The famous verse, “*viññāṇam anidassanam anantaṃ sabbato pabham*” in *Kevaṭṭa Sutta* (DN 11) and *Brahmanimantanika Sutta* (MN 49) refers to the creation of *anidassana appaṭigha rūpa (dhammā)* by *kamma viññāṇa*.

Viññāṇam anidassanam anantaṃ sabbato pabham – Correct Translation

1. The phrase, “*anidassana viññāṇa*” needs to be analyzed within the longer verse, “*viññāṇam anidassanam anantaṃ sabbato pabham*.”

- That extended verse appears in two *suttas*, “[WebLink: suttacentral: Brahmanimantanika Sutta \(MN 49\)](#)” and “[WebLink: suttacentral: Kevaṭṭa Sutta \(DN 11\)](#)”; see [Ref. 1](#) and [Ref. 2](#).
- That verse means: “***Viññāṇa*** is unseen, infinite, and is **the origin of all existence (*bhava*)**.” Here, it refers specifically to ***kamma viññāṇa*** that arises via “*avijjā paccayā saṅkhāra*,” “*saṅkhāra paccayā viññāṇa*” in *Paṭicca Samuppāda*. As we know, that leads to “*upādāna paccayā bhava*.”
- The “[WebLink: suttacentral: Dutiyabodhi Sutta \(Ud 1.2\)](#)” and many other *suttas* confirm that. It states that *avijjā nirodhā* (cessation of *avijjā*) leads to the **cessation of *kamma viññāṇa*** that, in turn, leads to the **cessation of *bhava* and future suffering**.
- See, “[Distortion of Pāli Keywords in Paṭicca Samuppāda](#)” where I pointed out the problem with translating “*viññāṇa*” as just “consciousness.” The six types of *vipāka viññāṇa* do not cease with the cessation of *avijjā* and will exist until *Parinibbāna*.
- Now, let us see how most translators have incorrectly translated that verse, “*viññāṇam anidassanam anantaṃ sabbato pabham*,” in both those *suttas*.

Viññāṇam anidassanam anantaṃ sabbato pabham – Incorrect Translations

2. *Bhikkhu* Sujato translates, “*viññāṇam anidassanam anantaṃ sabbato pabham*” as “consciousness that is invisible, infinite, **entirely given up**,” “[WebLink: suttacentral: On the Invitation of Brahmā \(MN 49\)](#).” I have no idea how he translated “*pabham*” as “given up.”

- *Bhikkhu* Bodhi translates the same verse as, “consciousness non-manifesting, boundless, **luminous all-around**,” see [Ref. 3](#).
- I have seen others translate “*pabha*” as “luminous,” too. That confusion comes from equating “*pabha*” to “*pabhā*” (with a “long a.”) Those two words have very different meanings; see #3 below.
- All of us agree that the first part means, “*viññāṇa* is unseen, infinite.” **As I show below, those are general characteristics of *viññāṇa dhātu*.**

Pabha Is Different from *Pabhā*

3. The “[WebLink: budsas.org: Concise Pāli-English Dictionary](#)” by Buddhadasa Mahathera defines “*pabhava*” as “origin, source” and “*pabhā*” (with a long “a”) as “light, radiance.”

- Both those are correct. It is also good to know that the word “*pabhava*,” “*pa*” means again and again, and “*bha*” is related to” *bhava*.” Thus *pabhava* means “repeated existence” that arises via *Paṭicca Samuppāda*, as pointed out in #1 above.
- The word “*pabha*” appears in another critical verse, “*Ye dhammā hetuppabhavā*,” see [Ref. 4](#), [Ref. 5](#), and [Ref. 6](#).
- The meaning of “*pabhā*” (with a long “a”) as “light” is easily seen in the short “[WebLink: suttacentral: Pabhā Sutta \(AN 4.142\)](#).”
- To get a good idea of how bad the translations of #2 are, we need to look at the background of the two *suttas* where the verse “*viññāṇaṃ anidassanaṃ anantaṃ sabbaṃ pabhaṃ*” appears.

Brahmanimantanika Sutta (MN 49)

4. This *sutta* describes an account of a “debate” between the Buddha and Baka *Brahma*, the “leader” of the *Mahā Brahma* realm. Baka *Brahma* thought that his existence was eternal and superior to the Buddha. See “[WebLink: suttacentral: Brahmanimantanika Sutta \(MN 49\)](#).”

- During that discussion, the Buddha explained to the *Brahma* that Baka *Brahma* was not even aware that there are realms above the *Mahā Brahma* realm.
- Then they discussed how attachment to worldly things made of *pathavi*, *āpo*, *tejo*, and *vāyo* would lead to various existences. The Buddha pointed out to *Brahma* that he did not understand the fundamental nature of the four primary elements (*pathavi*, *āpo*, *tejo*, and *vāyo*) present in all the realms.

5. That is when the Buddha made the general statement in [Ref. 1](#) to point out that it is (*kamma*) *viññāṇa* that leads to the continuation of the rebirth process among all those realms where the four primary elements are present.

- **Translation of the first part of the verse in [Ref. 1](#):** “*Viññāṇa* is unseen, infinite, and leads to the rebirth process for all. With *viññāṇa* one cannot comprehend the real nature of *pathavi*, *āpo*, *tejo*, *vāyo*, *bhūtā*, *deva*, *pajāpati brahma*, *abhassara brahma*, *subhakinha brahma*, *vehapphala brahma*, etc. (in any realm) in this world (*sabba*)”.
- The last part of the verse in [Ref. 1](#), “*sabbassa sabbattena ananubhūtaṃ*” means the following. Without comprehending *kamma viññāṇa* (that it is invisible, infinite, and gives rise to existences based on the four primary elements), one would not be able to comprehend the fundamental nature of this world.
- The verse in [Ref. 1](#) is critical to this relatively long *sutta*. **Even though the rest of the *sutta* could be translated word by word, that verse requires a detailed explanation.**
- Next, the *Kevaṭṭa Sutta* directly states that cessation of (*kamma*) *viññāṇa* leads to the stopping of the rebirth process.

Kevaṭṭa Sutta (DN 11)

6. *Kevaṭṭa Sutta* is even longer; “[WebLink: suttacentral: Kevatta Sutta \(DN 11\)](#).” But most of this *sutta* **can also be** translated word by word. The Buddha explains to *Kevaṭṭa* that trying to convert people of other faiths by performing miracles/supernatural deeds like flying through the air is not good. When people understand the deeper aspects of the Buddha Dhamma, they will not give any value to such miracles.

- Section 4 of the *sutta* is where the background story starts leading to the verse in [Ref. 2](#). The following question arose in the mind of a certain *bhikkhu*: “Where do these four primary elements (*pathavi*, *āpo*, *tejo*, *vāyo*) cease to exist?”

- Then the Buddha explains to *Kevaṭṭa* how that *bhikkhu* (who had *abhiññā* powers) went to higher realms looking for the answer to his question. No one knew the answer, so he returned to ask the Buddha. That account takes most of Section 4.
- The verse that is important to us comes at the end of the *sutta* in Section 4.1. There, the Buddha explains that the question needs to be re-phrased, as we discuss next.

Nibbāna Reached with the Cessation of *Kamma Viññāṇa*

7. The point is that one cannot find any existence where those four primary elements are absent. Instead, one should re-phrase the question as, “How would those four primary elements (*pathavi, āpo, tejo, vāyo*) not find a footing anywhere (among the 31 realms)?” That is the same as asking, “How can one stop the rebirth process?”

- The answer is at the end of the verse: “*Viññāṇassa nirodhenā etthetaṃ uparujjhatī’ti.*” “They (the four primary elements) will cease to exist with the cessation of *viññāṇa*.” Of course, it refers only to *kamma viññāṇa*, which is responsible for the creation of “*nāmarūpa*.” See “[Nāmarūpa Formation](#),”
- The four primary elements will cease to exist in *Parinibbāna* or “full *Nibbāna*” (realized after the death of an *Arahant*.) Once the *Arahant* dies, they will not be reborn in this world made of the four primary elements.

8. As we have discussed, *kamma viññāṇa* ceased to exist for the Buddha upon his Enlightenment. But he lived in this world for another 45 years until *Parinibbāna* and experienced *vipāka viññāṇa* during that whole time! Thus, the “cessation of the four primary elements” was realized only after the *Parinibbāna*. See “[Distortion of Pāli Keywords in Paticca Samuppāda](#).”

- I hope now you can see why the English translations in #2 above of the verse “*viññāṇaṃ anidassanaṃ anantaṃ sabbaṭo pabhaṃ*” are wrong. Of course, there are several more wrong translations of the same verse. We will discuss one more next.

Anidassana Viññāṇa Is the Second *Arūpāvacara Jhāna*?

9. In the previous post, I mentioned the fact that there have been many discussions at discussion forums on *anidassana viññāṇa*. See, for example, “[WebLink: discourse.suttacentral.net: Viññāṇa anidassana: the state of boundless consciousness](#).” The author points out a reference that equates *anidassana viññāṇa* to *Nibbāna*!

- The author of the above essay does not go that far, but says, “I show here that *viññāṇa anidassana* is not *nibbāna*, but a poetic description of the **state of boundless consciousness, the second “formless” meditation state.**”
- So, the author attempts to prove that *anidassana viññāṇa* is a state of higher consciousness, the second *arūpāvacara jhāna* or the “*viññāṇaṇcāyatana*.”
- It is also interesting to read the comments following that essay. *Bhikkhu* Sujāto agrees with the essay’s author, saying, “It makes a lot of sense, especially the idea of *anidassana* being equivalent to *arūpa*.” *Bhikkhu* Brahmāli states, “Excellent essay! It is clear, and I think the conclusion you arrive at is solid.”

10. That is why I have been emphasizing that most translators of the *Tipiṭaka* do not even understand basic concepts like *viññāṇa* and *saṅkhāra*. I hope those *Bhikkhus* and other translators will review the FACTS presented here.

- One can get a good idea of the sad state of Buddha Dhamma in the present day by reading the above essay and the series of comments following it. It was a depressing experience for me.

Ananta Viññāṇa – Characteristic of *Viññāṇa Dhātu*

11. The author of the essay cited in #9 above extracted “boundless consciousness” from the next word, *anantaṃ*, in verse: “*viññāṇāṃ anidassanaṃ anantaṃ sabbato pabhaṃ..*” The Pāli word “*ananta*” does mean “infinite.”

- However, *viññāṇa dhātu* itself is boundless and that characteristic is NOT limited to the second *arūpāvacara jhāna*. In the transition from *ākāsāṇaṇcāyatana* (the first *arūpāvacara jhāna*) to the *viññāṇaṇcāyatana*, *viññāṇa dhātu* separates from the *ākāsa dhātu*. At that point, the mind separates from any *rūpa* and perceives ONLY the “*ananta* (infinite) *viññāṇa*.”
- Note that everything in this world is represented by the five aggregates (*pañcakkhandha*), twelve *āyatana*, or six types of *dhātu*. Those six types of *dhātu* are *pathavi*, *āpo*, *tejo*, *vāyo*, *ākāsa*, *viññāṇa*. **Both *ākāsa* and *viññāṇa dhātu* are infinite.**

12. **Any type of *viññāṇa* is “spread out” without bounds. A mind has access to its *viññāṇa dhātu* from anywhere.** That is why whether we are on Earth, go to the Moon, or even to another planetary system at the other end of the universe, we will be able to recall memories and think just like while on Earth. On the other hand, **the five physical senses detect only localized, dense *rūpa*.**

- The astronauts who went to the Moon could not see, hear, smell, taste, or touch anything that was not on the Moon. But they could recall their memories as if they were on Earth. That is because *viññāṇa* is infinite.
- In other words, dense *rūpa* (experienced by the five physical senses) is localized, but the *nāma* category (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) is NOT localized. In between such **dense (*sappaṭigha*) *rūpa*** and ***anidassana/appaṭigha nāma***, there are ***anidassana/appaṭigha rūpa (dhammā)***.
- Both ***nāma*** and ***dhammā*** are not localized and **are included in *viññāṇa dhātu***. See, “[What are *Rūpa*? – Dhammā are *Rūpa* too!](#)”

Sappaṭigha Rūpa* and *Appaṭigha Rūpa (Dhammā)

13. In modern terms, ***sappaṭigha rūpa*** can be detected with five physical senses AND scientific instruments. On the other hand, ***appaṭigha rūpa (dhammā)*** and ***appaṭigha nāma*** cannot be detected with scientific instruments and can be detected only by the mind.

- Note that out of the five types of ***sappaṭigha rūpa***, only *rūpa rūpa* (visual objects) can be seen (*dassana*) because sounds (*sadda rūpa*), tastes (*rasa rūpa*), odors (*gandha rūpa*), and touches (*phoṭṭhabba rūpa*) cannot be seen (*anidassana*).

***Anidassana Viññāṇa* Means “*Viññāṇa* Cannot Be Seen”**

14. The phrase, “*viññāṇāṃ anidassanaṃ*” means, “*viññāṇa* is invisible.”

- If any *viññāṇa* is purely mental and belongs to the *nāma* category (i.e., just consciousness or awareness), then what is the point of saying, “*viññāṇa* is invisible”?
- As I have explained in previous posts, it is only the *vipāka viññāṇa* that pertains to just consciousness (strictly within the *nāma* category.) In contrast, ***kamma viññāṇa* is more than consciousness and has energy.** *Kamma viññāṇa* gives rise to **subtle *rūpa (dhammā)*, the sixth type of *rūpa* in Buddha Dhamma.**
- See “[Anidassana Viññāṇa – What It Really Means.](#)”

15. There are *nāma*, *rūpa*, and *nāmarūpa* (living beings have *nāmarūpa* represented by the five aggregates). All three words have different meanings **depending on the context.**

- The verse in question, “*viññāṇāṃ anidassanaṃ anantaṃ sabbato pabhaṃ..*” refers to the unique property of a ***kamma viññāṇa***. It is “in the middle between the category of pure *nāma* (*vedanā*,

saññā, saṅkhāra, **vipāka viññāṇa**) and **dense (sappaṭigha) rūpa** (rūpa rūpa, sadda rūpa, gandha rūpa, rasa rūpa, and phoṭṭhabba rūpa.)

- In Buddha Dhamma, there is a sixth type of **fine (appaṭigha) rūpa** called “**dhammā**,” as we have discussed, for example, in “[What are Rūpa? – Dhammā are Rūpa too!](#)” **Dhammā** are invisible and arise due to **kamma viññāṇa**. That is why there is a need to emphasize that **kamma viññāṇa** is also invisible.

Kamma Viññāṇa = Paṭisandhi Viññāṇa = Gandhabba (Mental Body)

16. Thus, a *kamma viññāṇa* that comes into play in *Paṭicca Samuppāda* is MORE THAN consciousness. It CREATES *kammic* energies (*dhammā* or *kamma bīja*) to power future rebirths. That *kammic* energy creates the “seed” of a future human at the *cuti-paṭisandhi* moment. That “seed” is the “mental body” or “*gandhabba*.” That *gandhabba* is so tiny that it is invisible to the naked eye or even to powerful scientific instruments.

- Note that *gandhabba* is not a *kamma viññāṇa*, but the RESULT of a *kamma viññāṇa*. At the *cuti-paṭisandhi* moment (grasping a new existence or *bhava*, that *kammic* energy creates the “seed” of the sentient beings in the new existence. In many cases, like a *Deva* or *Brahma*, that seed itself is the new living being, i.e., a *Deva* or a *Brahma*. We would not be able to see them.
- In the case of humans and animals, that seed (*gandhabba*) needs to get into a womb to grow into a human with a dense physical body. See “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”
- That *gandhabba* is “*anidassana*” too, i.e., invisible. Even though some *suttas* refer to a *gandhabba* descending to a womb (e.g., [WebLink: suttacentral: Mahā Tanhāsankhaya Sutta \(MN 38\)](#), other *suttas* (e.g., [WebLink: suttacentral: Mahā Nidāna Sutta \(DN 15\)](#)) refer to a “*paṭisandhi viññāṇa*” descending to a womb. Thus, both refer to the “seed” of a human, which grows inside a womb taking food from the mother.

Summary

17. “*Anidassana viññāṇa*” in the verse, “*viññāṇaṃ anidassanaṃ anantaṃ sabbato pabhaṃ*” refers explicitly to *kamma viññāṇa* that creates *kammic* energy (or *dhammā* or *kamma bīja*.)

- We may have created numerous such *kamma viññāṇa* (or *kamma bīja*) that can “power up” births in various realms in the future. When it is time to grasp a new existence (at the end of the current *bhava*) one *kamma bīja* comes to mind as an *ārammaṇa*.
- If that *ārammaṇa* is grasped, that creates the mental body/*gandhabba*/*paṭisandhi viññāṇa*. Thus, *paṭisandhi viññāṇa* is actually not a *viññāṇa*, but the result of a *kamma viññāṇa*.
- More details at, “[Anidassana Viññāṇa – What It Really Means](#).”

1. In the “[WebLink: suttacentral: Brahmanimantanika Sutta \(MN 49\)](#)”: “*Viññāṇaṃ anidassanaṃ anantaṃ sabbato pabhaṃ, taṃ pathaviyā pathavattena ananubhūtaṃ, āpassa āpattena ananubhūtaṃ, tejassa tejattena ananubhūtaṃ, vāyassa vāyattena ananubhūtaṃ, bhūtānaṃ bhūtattena ananubhūtaṃ, devānaṃ devattena ananubhūtaṃ, pajāpatissa pajāpatittena ananubhūtaṃ, brahmānaṃ brahmattena ananubhūtaṃ, ābhassarānaṃ ābhassarattena ananubhūtaṃ, subhakiṇhānaṃ subhakiṇhattena ananubhūtaṃ, vehapphalānaṃ vehapphalattena ananubhūtaṃ, abhibhussa abhibhuttena ananubhūtaṃ, sabbassa sabbattena ananubhūtaṃ.*”
2. In the “[WebLink: suttacentral: Kevatta Sutta \(DN 11\)](#)”: “*Viññāṇaṃ anidassanaṃ, anantaṃ sabbatopabhaṃ—Ettha āpo ca pathavī, tejo vāyo na gādhati. Ettha dīghaṇṇa rassaṇṇa, aṇuṃ thūlaṃ*

subhāsubham; Ettha nāmañca rūpañca, asesam uparujjhati; Viññāṇassa nirodhena, etthetam uparujjhatī'ti."

3. Bhikkhu Bodhi, "The Middle Length Discourses of the Buddha" Wisdom Publication (2009), p. 428. A lengthy footnote on p. 1249 (footnote 513) describes how he has agonized over choosing from three different explanations for this verse.

4. "Ye dhammā hetuppabhavā,

Tesaṃ hetum tathāgato āha;

Tesañca yo nirodho,

Evamvādī mahāsamaṇo." (See [Ref. 5](#) below)

- Upon hearing this verse uttered by Ven. Assaji, Upatissa (later Ven. Sāriputta) became a *Sotāpanna*. That is the fundamental concept of Buddha Dhamma and is explained in detail in the *Paṭicca Samuppāda*.
- The correct translation is the following. "Buddha declared that all *dhammā* (some of which are *kamma bīja*) **that give rise to everything** (including the rebirth process,) are caused by "three *saṃ*" (*lobha, dosa, moha*); he has also explained how we can stop those causes from arising (and thus end the rebirth process)."
- That is essentially the translation of the above verse given in many English texts; see, for example, the following from [Ref. 6](#) below: "Of all those things that from a cause arise, Tathagata the cause thereof has told; And how they cease to be, that too he tells, This is the doctrine of the Great Recluse."

5. From "[WebLink: suttacentral: Petakopadesa \(KN Pe I\)](#)" (around the midway in the link):

"Tattha katamāni *cattāri ariyasaccāni*? "Ye dhammā **hetuppabhavā**, Tesaṃ hetum tathāgato āha; Tesañca yo nirodho, Evamvādī mahāsamaṇo"ti. Hetuppabhavā dhammā dukkham, hetusamudayo, yaṃ bhagavato vacanam."

[Where Are Memories Stored? – Viññāṇa Dhātu](#)

9.7.1.3 Critical Influence of Wrong Views on Akusala Citta

.1

February 1, 2022; revised May 15, 2023 (#6)

Wrong views (*micchā diṭṭhi*) play the dominant role in *akusala citta*. The same *akusala kamma* done by someone with wrong views leads to a much stronger *kamma vipāka* than the same *kamma* done by another person without wrong views.

Critical Role of Wrong Views

1. Wrong views in Buddha Dhamma refer to wrong views about the nature of our world.

- The Buddha taught that our world operates on a set of natural laws based on the laws of *kamma*.
- **The first level of wrong views** is not believing in the laws of *kamma*. They include not believing that immoral deeds (*akusala kamma*) will bring dire consequences (bad *kamma vipāka*) and that good

kamma will bring good *kamma vipāka*. Another is not believing in the rebirth process. They fall under the ten types of *micchā diṭṭhi*. See, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”

- Someone who does not have the ten types of *micchā diṭṭhi* can learn the correct version of Buddha Dhamma and get rid of the **second and deeper layer of *micchā diṭṭhi***. An average human thinks that the world is of *nicca*, *sukha*, and *atta* nature, i.e., it is possible to have a happy future. However, the “future” in Buddha Dhamma is not restricted to this life but also to future lives. Realizing the true *anicca*, *dukkha*, and *anatta* nature will remove that deeper layer of wrong views.

Akusala Kamma Based on Akusala Citta

2. There are ten types of *akusala kamma*, three by the mind, four by speech, and three by bodily actions. However, *akusala kamma* by speech and bodily actions also originate in the mind. In other words, 12 types of *cittā* (loosely called “thoughts”) are responsible for all *akusala kamma*.

- Thus, all ten *akusala kamma* are done with these 12 *akusala cittā*.** There are eight greed-rooted, two hatred-rooted, and two delusion-rooted *cittā*. Of course, *cittā* (pronounced “chiththā”) are thoughts; any speech or bodily action starts with a thought.
- As we know, all *akusala cittā* arise in mind due to *lobha* (greed), *dosa* (anger), and *moha* (delusion). Out of 12 *akusala cittā*, eight arise due to greed, 2 with anger, and 2 with delusion (a worse form of *avijjā*.)

Lobha (Greedy) Citta (Also has the *moha* root)

- Citta* connected **with wrong views**, accompanied by pleasure, and done with the habit (*gati*).
- Citta* connected **with wrong views**, accompanied by pleasure, and done reluctantly (with encouragement by others.)
- Citta* **without wrong views**, accompanied by pleasure and done with habit.
- Citta* **without wrong views**, accompanied by pleasure and done reluctantly.
- Citta* connected **with wrong views**, accompanied by a neutral feeling, and done with habit.
- Citta* connected **with wrong views**, accompanied by a neutral feeling, and done reluctantly.
- Citta* **without wrong views**, accompanied by neutral feeling and done with habit.
- Citta* **without wrong views**, accompanied by neutral feeling and done reluctantly.

Dosa (Angry/Hateful) Citta (Also has the *moha* root)

- Citta* associated with hate, accompanied by displeasure, done with habit.
- Citta* associated with hate, accompanied by displeasure, done reluctantly.

Moha Citta (only with the *moha* root, i.e., without greed or anger)

- Citta* accompanied by a neutral feeling and associated **with *vicikicchā*** (not aware of bad consequences)
- Citta* accompanied by a neutral feeling and associated with *uddhacca* (excited/scattered mind).

The Strong Influence of Wrong Views

3. One starts on the Noble Eightfold Path as a *Sotāpanna* (or *Sotāpanna Anugāmi*) by getting rid of both layers of wrong views discussed in #1 above.

- At the *Sotāpanna* stage, three of the ten *saṃyojana* (fetters) are removed, and thereby *akusala cittā* #1, 2, 5, 6, and 11 stop arising. **Furthermore, *apāyagāmi* strength in the other types of *cittā* goes away.**
- Thus, a *Sotāpanna* does not need to control the arising of such *cittā* consciously. Such *cittā* WILL NOT arise for any reason.

- Therefore, only the remaining seven types of *cittā* can arise in the mind of a *Sotāpanna*.

Effect of Attaining Higher Stages of *Nibbāna*

4. The remaining *akusala cittā* are progressively removed as one gets to the higher stages of *Nibbāna*.
 - The potency of the two *paṭigha*-rooted *cittā*, and the remaining four greed-based *citta*, i.e., *kāma rāga*, are reduced at the *Sakadāgāmi* stage.
 - The two *paṭigha*-rooted *cittā* (#9, #10) stop from arising at the *Anāgāmi* stage. Also, the potency of the remaining four greed-based *citta*, i.e., *kāma rāga*, is reduced to just *kāma* level.
 - Finally, the remaining four greed-based *citta* (#3, #4, #7, #8) and the *uddhacca citta* (#12) stop from arising at the *Arahant* stage. Thus an *Arahant* will never experience any *akusala cittā*.

Key Observations

5. Generally, the *kammic* strength of *cittā* in each category decreases in descending order. Thus *citta* #1 is stronger than any other in that category. *citta* #9 is stronger than #10. *Citta* #11 is stronger than #12.
 - With higher *magga phala*, the strengths of ALL *cittā* are reduced, and some cease arising altogether.
 - As we can see, a *Sotāpanna* mainly removes wrong views. **But that will also reduce the strength of other types of *cittā*.** Thus *kāma rāga* is reduced too for a *Sotāpanna*; it is further reduced for a *Sakadāgāmi* and stops at the *Anāgāmi* stage.

Role of *Gati/Anusaya* and Association with *Asappurisa* (“Bad People”) with Wrong Views

6. As we can see, the strongest *lobha citta* (#1) arises due to one's bad *gati* (character/habits.) Such *cittā* arise automatically.
 - A common question is: “Where are *anusaya* or defilements stored?”
 - They stay with the *hadaya vatthu*. Of course, at the *cuti-paṭisandhi* moment, existing *anusaya* are transferred to the new *hadaya vatthu* created by *kammic* energy. Thus, *anusaya* keep changing during each lifetime, but are eliminated in stages with each stage of *magga phala*. See [“Conditions for the Four Stages of Nibbāna.”](#)
 - Records of all memories (*nāmagotta*) remain intact in the *nāma loka* or *viññāṇa dhātu*.
 - For details, see [“Nāma Loka and Rūpa Loka – Two Parts of Our World,”](#) [“What are Rūpa? – Dhammā are Rūpa too!”](#) and [“Where Are Memories Stored? – Viññāṇa Dhātu.”](#)
7. In some cases, one may engage in evil deeds due to the influence of immoral friends (*asappurisa*), and *cittā* of type #2 can arise. Such *citta* have weaker strength. However, if one continues associating with such friends, one may cultivate such bad *gati* and thus start generating the worse type (#1) of *akusala cittā*.
 - On the other hand, if one associate with “good/Noble friends” (*sappurisa*) one will get rid of bad *gati* and cultivate good *gati*.
 - Several *suttas* point out the importance of choosing one's associates/friends. See, for example, [“WebLink: suttacentral: Dutiyaasappurisa Sutta \(SN 45.26\).”](#) More at, [“WebLink: suttacentral: 30 results for asappurisa.”](#)

Value of *Abhidhamma*

8. The above analysis of *akusala citta* is in basic *Abhidhamma*.

- *Abhidhamma* can become very useful in resolving “knotty issues.” Once the basics are understood, it is possible to avoid lengthy explanations of certain concepts.
- See p. 32 of [Ref. 1](#) for further details. Also, see “[Akusala Citta and Akusala Vipāka Citta](#)” and “[Conditions for the Four Stages of Nibbāna](#).”

9.7.1.3 Near-Death Experiences (NDE): Brain Is Not the Mind .2

February 7, 2022; August 31, 2022

Recent studies show that near-death experiences (NDE) are common occurrences while the brain is inactive. That means consciousness does not arise in the brain.

Materialistic View – A Dangerous Wrong View in Buddha Dhamma

1. In the prevalent materialistic view (especially in the western world,) consciousness arises in the brain. Thus, when a person dies, the brain dies with it, the END. **That means a materialist only needs to worry about any suffering we experience in this life (of course. That is a wrong conclusion based on an incorrect view.**

The Buddha taught that life continues after the death of this physical body. The following birth is according to the causes and conditions prevailing at the moment of death and is according to *Paṭicca Samuppāda*. **Most future existences/births are in the four lowest realms (*apayās*), where suffering dominates.**

- That “future suffering” associated with rebirth stops only after attaining *Nibbāna*.
 - **The materialistic view is a STRONG wrong view (*micchā diṭṭhi*) in Buddha Dhamma and will lead to rebirth in the *apayās*.** How can one even start learning about “how to stop future suffering” if one does not believe in future lives?
 - Therefore, evaluating the evidence for and against the rebirth process is a good idea.
2. If the materialist view of consciousness arising in the brain is correct, that assumption leads to the following inferences: (i) ALL rebirth accounts and NDE accounts are fake, and (ii) ALL our memories are stored in the brain.
- Therefore, it is critical to look at the following two related issues.
 - (i) How strong is the evidence for past lives? How reliable are the NDE accounts where brain activity is confirmed to have ceased?
 - (ii) Is it possible for a brain to store ALL our memories?

One White Crow Is Enough to Disprove the Hypothesis, “All Crows Are Black”

3. If even a SINGLE rebirth account or an NDE is valid, then the hypothesis “consciousness arises in the brain” is false. American philosopher William James stated the following that is widely quoted today ([Ref. 1](#)):

In order to disprove the assertion that all crows are black, one white crow is sufficient.

- That is a logical statement. It is unnecessary to prove that all or even many rebirth accounts/NDE accounts are true. Even if just one account is valid, that is enough to conclude that the brain is not the “seat of the mind.”
- We have thousands of rebirth/NDE accounts scrutinized by scientists/physicians.

In rebirth accounts: Since a brain can store only the memories from this life, there is no way to recall memories from a previous life. Instead, the brain helps in recalling memories (from *viññāṇa dhātu*) while the *gandhabba* is inside the body. I will discuss that in future posts.

In NDE accounts: Since the patient's brain activity had ceased (and even pronounced dead for a short time), the subject could not have “seen” and “heard” what was happening with the inactive brain. Furthermore, many saw their physical bodies “from the above (close to the ceiling).”

- Therefore, even if just ONE rebirth/NDE account is accurate, the hypothesis “consciousness arises in the brain” is wrong!

Recent Developments

4. Several scientific findings within the past 50 years have converged to THREE types of investigations that point to the fact that the brain is not the “seat of consciousness.” These findings indicate that while the brain plays a crucial role in consciousness, it is NOT where our thoughts arise, i.e., **the brain is not the mind!**

ONE: Rebirths accounts by children have been common knowledge in many Asian countries for ages. Most people in those countries were Buddhists who accepted those accounts without question. Only recently, Western countries became interested after two significant developments: Systematic studies conducted by Professor Ian Stevenson ([Ref. 2](#)) and easy access to rebirth accounts via the internet. Also, see “[Evidence for Rebirth.](#)”

TWO: Accounts of Near-Death Experiences (NDE) in the absence of any brain activity. Some NDE accounts are by those declared dead for periods ranging from a few minutes to many minutes. They say that “they were outside of the physical body.” They were looking down at their bodies from the ceiling!

THREE: Reports of “extraordinary memory recall” by several people. They can recall the past several years in great detail, and it is unlikely that the brain could have “stored” such minute details as a video recorder.

- We will discuss the second category in this post and the third in the next post.

What Are Near-Death Experiences (NDE)?

5. Near-death experiences (NDE) occur when someone “almost dies” under a medical condition. For example, it may happen during a coma induced by cardiac arrest or someone badly injured in an accident.

- Of course, only a tiny fraction of such patients experience NDE. **However, “..estimates put the number of people who have had one in the past fifty years at more than 25 million worldwide.”** ([Ref. 3](#), p. 9)
- In such cases, the “mental body” (*gandhabba*) comes out of the physical body, and the patients **can watch their physical bodies from above! Furthermore, they correctly reproduced the conversations among the doctors and nurses while their brains were not functioning.**

Accounts of NDE

6. Physicians have conducted several systematic studies on NDE within the past 20-30 years.

[WebLink: youtube: A Cardiologist and Life after Death | An interview with Pim van Lomme!](#)

[WebLink: youtube: The Joy of Dying: Understanding Near Death Experience](#)

- In the second video, make sure to watch the following segments:

@ 36.30 mins: addressing the objections by skeptics of NDE. In particular, he talks about his patients looking at their bodies from above while the body is “lifeless.”

@ 40 mins: Most compelling evidence for Dr. Long is the account of one of his patients born blind but was able to see for the first time in her life.

@ 41.15 mins: The patient’s vision was not restricted to the forward direction. **She had 360° vision, i.e., she could see all around.** That is consistent with a *gandhabba* (mental body) seeing all around, not just the forward direction. See #8 below.

@43 mins: Based on the accounts of NDE, Dr. Long believes in the afterlife and thinks that the afterlife will be wonderful. I will also discuss this in #8 below.

Seeing for the First Time in Life!

7. I am unsure whether the following video is from the woman Dr. Long referred to in the above video. But she was born blind and could see for the first time in her life during an NDE.

[WebLink: youtube: Near Death Experience - Blind woman 'sees' while out of body](#)

Seeing and Hearing Is Better During an NDE

8. The mental body (*gandhabba*) is trapped inside the physical body. The brain processes the visuals captured by the eyes and passes them to the mental body trapped inside. I have discussed that complex process in “[Brain – Interface between Mind and Body](#).”

- Humans are born with dense physical bodies because such a body is required to sense smells, tastes, and body touches, including sex. The mental body (*gandhabba*) is almost devoid of matter and cannot be seen by an average human. However, once outside the physical body, the capability for seeing and hearing is vastly enhanced. Furthermore, the woman in the above video verified that her “weightless” mental body could go through the ceiling. Thousands of people have experienced those phenomena. See [Ref. 4](#).
- We don’t realize the burden of “bearing a dense physical body.” But those who experience NDEs were especially experiencing bodily pains. Thus, it is an indescribable relief to be outside that “suffering-filled physical body.” That is why some even say they visited heaven!
- But they were not in heaven but in “*paraloka*” that world of the *gandhabbas*. They have been in that state only for a brief time, several minutes. If they stay there for long times, they will “miss” the ability to smell, taste, and touch bodily, including sex. That is why even *Brahmas* are “itching to come back to *kāma loka*” at the beginning of a “new Earth”; see.” [Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”
- There are many youtube videos and books on the subject. See [Ref. 5](#) for a sample.

9.7.1.3 Gandhabba (Mental Body) Separating from Physical Body in Jhāna

February 14, 2022

The "mental body" (*gandhabba*) may automatically come out of the physical body during near-death experiences (NDE.) A meditator (*yogi*) can willfully do that in the fourth *jhāna*.

Materialistic View of the Mind

1. The "brain is the mind" materialistic hypothesis CAN explain the fact that we can recall memories even when we are on the Moon; we carry the brain with us everywhere.
 - i. Of course, that hypothesis cannot explain memories of past lives, because the brain could not have stored memories from past lives.
 - ii. It cannot explain NDEs experienced while the brain was inactive.
 - iii. It also cannot explain memory recall with such precision by some people. We will postpone that discussion to the next post.
 - We discussed the above framework in the previous post "[Near-Death Experiences \(NDE\): Brain Is Not the Mind.](#)"
 - However, all those observations can be explained in Buddha Dhamma.

Explanation in Buddha Dhamma

2. There are THREE key points:

- (i) Consciousness arises in the "mental body" (*manomaya kāya* or *gandhabba*), not in the brain. "Human life" is in the "mental body" and not in the "physical body." The physical body is just a shell, energized by the mental body.
- (ii) Memory records (*nāmagotta*) of ALL our past experiences are in *viññāṇa dhātu*. We can recall them from anywhere.
- (iii) While the mental body (*gandhabba*) is inside the physical body, memories come to the *gandhabba* via the brain. While outside the physical body, *gandhabba* can directly recall memories.

- **“Mental body,” “*manomaya kāya*,” “*gandhabba*,” “*gandhabba kāya*” all mean the same.** I will use them interchangeably.

3. Our *nāma loka* (*viññāṇa dhātu*) is VERY DIFFERENT from our *rūpa loka*. Our *manomaya kāya* can access the memory records from anywhere. It is as if we are “carrying” all those records with us.

- **If the *gandhabba* is outside the physical body (as in NDE)** memories can be directly accessed and are much clear. This is why many NDE subjects say “their life events flashed vividly in their minds.”
- **If the *gandhabba* is inside the physical body**, then the brain plays a critical role in extracting memory records (*nāmagotta*) from the *viññāṇa dhātu*. When certain parts of the brain are damaged, the ability to recall memories — even from this life — stops.
- In the case of NDEs, the *gandhabba* comes out of the physical body accidentally. It happens only on occasion.
- However, there is a way to come out of the physical body with the mental body (*gandhabba*) willfully. Those who can cultivate (*Ariya* or *anāriya*) *jhāna* can come out with the *gandhabba kāya* while in the *jhāna*.

Just Like a Sword Is Pulled Out of a Scabbard (or Sheath)

4. There are several *suttas* that describe pulling the *gandhabba kāya* out of the physical body at any time.

- One must cultivate the fourth *jhāna* to the highest level to be able to do that. The “[WebLink: suttacentral: Sāmaññaphala Sutta \(DN 2\)](#)” (among a few other *suttas*) describes the process step-by-step. One starts with abstaining from immoral deeds, abstain from excessive sensual pleasures, and starts cultivating *jhāna* one by one until getting to the fourth *jhāna* and then being able to get into that *jhāna* instantly.
- The English translation gives enough details: Section “4.3.3.2. Mind-Made Body” has the following description (I am slightly revising the translation in the above link):

“When their mind has become immersed in *samādhi* like this—purified, bright, flawless, rid of defilements, pliable, workable, steady, and imperturbable—they extend it and project it toward the “mental body” (*manomayaṃ kāyaṃ*). From this physical body, they (come out with) that **“mental body”, complete in all its various faculties, not deficient in any faculty.**”

- **Then three analogies are provided to get an idea of how that *manomaya kāya* or *gandhabba kāya* comes out of the physical body:** (i) a person was pulling out a reed from its sheath or (ii) drawing a sword out from its scabbard, and (iii) a snake shedding its skin. The following youtube video makes the third process clear.

[WebLink: suttacentral: How a Snake Sheds its Skin](#)

- Of course, you can easily visualize a sword being pulled out of its sheath/scabbard. I am not sure how many people have seen the first analogy.

“Miracles” Performed With the *Gandhabba Kāya*

5. Once coming out with the *manomaya kāya* or *gandhabba kāya* the *yogi* can perform many types of “miracles.”

- One of those “miracles” of course is to be able to see and hear without physical eyes and ears **over long distances**. They can see and hear much better than with the physical body. That is what is meant by “From this physical body, they (come out with) that **“mental body”, complete in all its various faculties, not deficient in any faculty**” in the quoted verse in #4 above.
- Another is the ability to go through solid objects like ceilings and walls. Some NDE accounts verify that too.

6. The critical point associated with that last ability is that the *manomaya kāya* or *gandhabba kāya* has only a trace of matter. **It is a “body that cannot be seen.”** It can go through walls, mountains, water, etc., as confirmed by some NDE accounts.

- For example, when a heart patient is having an NDE, they are floating above their physical body and no one in the room can see him/her.
- Another special aspect of such a *manomaya kāya* is the ability to travel anywhere just by thinking. Several NDE accounts say they were able to get to distant places “instantly.”
- For details on what other “miracles” are possible with a *manomaya kāya*, see “[Pāṭihāriya \(Supernormal Abilities\) of a Buddha – Part I](#)”

Kammic Energy Creates the Manomaya Kāya

6. **The most important thing to remember is that the *manomaya kāya* (*gandhabba*) is the essence of a human.** It is created by *kammic* energy at the moment of grasping the human *bhava*.

- That *gandhabba* consists of just six *suddhaṭṭhaka* (*hadaya vatthu* and five *pasāda rūpa*). But they are very special *suddhaṭṭhaka* WITH LIFE. **That is the essence of a living being and it CAN NOT be created anyway other than by *kammic* energy. That is why Artificial Intelligence (AI) is NEVER going to be a reality.**
- Human *bhava* can last many thousands of years. As we know, these days a physical human body can last only around 100 years or less. The initiation of a physical body is the *manomaya kāya* being pulled into a suitable womb. It merges with the zygote cell in the womb and grows into a baby by taking in food from the mother. Once born, the baby grows by eating food. Thus, the physical body grows due to food intake, just like a seed growing to a tree.

Gandhabba/Para Loka Concept Is Critical to Understand!

7. That *manomaya kāya* or *gandhabba* will last for thousands of years until that *kammic* energy is exhausted. During that time, the *gandhabba* can be born in “this world” (i.e., with a physical body) many times. When in a physical body, it is in “this world” or “*ayaṃ loka*.” In between two consecutive lives with physical bodies, *gandhabba* is in the “other/nether world” or “*para loka*” and is invisible to us.

- Note that not believing in “*ayaṃ loka*” and “*para loka*” are two of the ten types of *micchā diṭṭhi* that can lead to rebirths in the *apāyās*. See, “[WebLink: suttacentral: Pathamanirayasagga Sutta \(AN 10.211\)](#)”
- The following is the translation of the relevant verse: “They have the wrong view. Their perspective is distorted: “There’s no meaning in giving, sacrifice, or offerings. There’s no fruit or result of good and bad deeds. **This world is not real. There’s no afterlife (*para loka*).** There’s no obligation to mother and father. No beings are reborn spontaneously. And there’s no ascetic or *brahmin* who is well attained and practiced, and who describes **this world and afterlife (*para loka*)** after realizing it with their own insight. Someone with these ten qualities is cast down to hell. (Pāli verse in [Ref. 1.](#))”
- Thus, it is critical to understand that our physical bodies are secondary and the *manomaya kāya* or *gandhabba* is primary. Also see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)”

Mental Body (Gandhabba) Is Primary!

8. Human existence (*bhava*) is NOT limited to one life with a physical human body.

- Some children die very early, even within weeks. **Are their human existences limited to a few weeks or even just a day?**
- Human existence can last thousands of years. **Within that time, there is a single human *gandhabba*.** When one physical human body dies (in a few days to 100 or so years) that *gandhabba* comes out of

the dead body. It will be pulled into another womb by *kammic* energy. While waiting for another womb, that *gandhabba* is not in “this world” but in “*para loka*.”

- Thus, there can be many births (*jāti*) with a human body within a single human existence (*bhava*.) That is the “*bhava paccayā jāti*” step in *Paṭicca Samuppāda*.
- At the end of the human *bhava*, that human *gandhabba* dies and that is the *cuti-paṭisandhi* moment, where a new existence (*bhava*) is grasped. It is very important to understand this relationship between *bhava* and *jāti*. See, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

Experiences of Yogis Are Superior to those With NDE

9. People with NDE are average humans with many defilements. Thus, even when they come out of the physical body with the *gandhabba kāya* their abilities are much less. They just experience the unbelievable “relief/lightness” of being outside the heavy and pain-ridden physical body. That is why many of them say they were “in heaven” during the NDE.

- Those *yogis* who can come out of the physical body can stay in that state for long times. That is an optimum “*jhānic sukha*” discussed in *suttas*. But they need to successfully cultivate the fourth *jhāna* with SUPPRESSION of defilements (*anariya yogis*) or REMOVAL of defilements (at least at the *Anāgāmi* stage.)
- Therefore, only those *yogis* will be able to perform other types of “miracles” discussed in “[Pāṭihāriya \(Supernormal Abilities\) of a Buddha – Part I.](#)”
- One such miracle is to recall past lives.

10. Depending on how well the fourth *jhāna* is cultivated, they can recall many previous lives. The Buddha was able to look as far back as he wanted, and also could access the *nāmagotta* of other people. He provided accounts of the lives of many previous Buddhas in the “[WebLink: suttacentral: Mahāpadāna Sutta \(DN 14\).](#)”

- That is another indication that memories from past lives could not be in the brain of the current physical body.
- During the time of the Buddha, people did not know much about the brain. So, the *Tipiṭaka* does not have an explanation of memory recall with the aid of the brain. However, we can put together a reasonable explanation; see “[Patient H.M. – Different Roles of Brain in Memory.](#)”

9.7.1.3 Where Are Memories Stored? – Viññāṇa Dhātu

February 21, 2022; revised February 28, 2023; April 6, 2023

Viññāṇa dhātu represents the *nāma loka*. It has no spatial location. That is why we can recall memories from anywhere.

Nāma Loka (Viññāṇa Dhātu) Is Different Compared to Rūpa Loka!

1. A question that comes up frequently is: “Where are our memories stored?” Are they stored in the brain?

- The Buddha could recall memories of previous births trillions of years past. See, for example, “[WebLink: suttacentral: Mahāpadāna Sutta \(DN 14\)](#).” Those memories of his birth in the distant past could not have been in his brain!
- Below, we will discuss scientific evidence that the brain cannot hold our memories.
- Then we will discuss the Buddha’s explanation of “memory storage/recall.” The brain plays a crucial role in recalling memories, but the memories are in our *nāma loka* (*viññāṇa dhātu*.)
- We are used to thinking in terms of the *rūpa loka* represented by the other five types of *dhātu* (*pathavi, āpo, tejo, vāyo, ākāsa*) where objects remain in specific locations. But *viññāṇa dhātu* has no specific location in space. We will discuss some unique properties of our *nāma loka* or *viññāṇa dhātu*.

Recent Evidence Against the “Brain as the Mind” Hypothesis

2. As discussed in several posts, scientific findings within the past 50 years have converged into THREE investigations that point to the fact that the brain is not the “seat of consciousness.” These findings indicate that while the brain plays a crucial role in consciousness, it is NOT where our thoughts arise, i.e., **the brain is not the mind!** In addition, our memories are not “stored” in the brain either.

ONE: Rebirth accounts by children have been common knowledge in many Asian countries for ages. Most people in those countries were Buddhists who accepted those accounts without question. Only recently, Western countries became interested after two significant developments: Systematic studies conducted by Professor Ian Stevenson ([Ref. 1](#)) and easy access to rebirth accounts via the internet. Also, see “[Evidence for Rebirth](#).”

TWO: Accounts of Near-Death Experiences (NDE) which happen without brain activity. Some NDE accounts are by those declared dead for periods ranging from a few minutes to many minutes. They say that “they were outside of the physical body.” They were looking down at their bodies from the ceiling! **That means they saw without a brain** (while in their *manomaya kāya* or *gandhabba kāya*.)

- We discussed the second category in recent posts; see “[Near-Death Experiences \(NDE\): Brain Is Not the Mind](#)” and “[Gandhabba \(Mental Body\) Separating from Physical Body in Jhāna](#).”

THREE: Reports of “extraordinary memory recall” by several people. They can recall the past several years in great detail, and it is unlikely that the brain could have “stored” such minute details as a video recorder.

- Let us discuss briefly the third now.

Extraordinary Memories – Impossible to be Stored in the Brain!

3. Strong evidence has emerged recently that a “complete record” of one’s past exists somewhere, just like a complete record of an event is in a videotape. These studies started with Jill Price, who contacted a team of scientists in the early 2000s about her ability to recall anything from 1974 onwards. Here is a video of her interview with Diane Sawyer on an ABC program:

[WebLink: suttacentral: The woman that never forgets - Jill Price First Interview!](#)

- She says she can “see” what happened on any day in the past. She does not merely recall a “summary” or the gist of what happened. She can recount the whole episode in detail. **Even the date and time come out effortlessly. That is amazing!**
- **@2:50 minutes:** Diane Sawyer tests Jill’s ability to recall past events. She passes all tests.

4. Since then, several such individuals have been studied in detail. More details in “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#),” “[Autobiographical Memory – Preserved in Nāma Loka](#),” and “[Where Are Memories “Stored”? – Connection to Pañcakkhandha](#).”

- **The brain cannot “store” that much information in such detail.** Scientists are unable to explain these fantastic accounts.
- The point is that even one such account of “detailed memory recall” (as by Jill Price above) is enough to negate the “memories in the brain” hypothesis. The American philosopher William James said, “If you wish to upset the law that all crows are black. it is enough if you prove ONE crow to be white.”

Viññāṇa Dhātu is Accessible from Anywhere in Ākāsa Dhātu

5. **A mind has access to viññāṇa dhātu from anywhere.**

- That is why whether we are on Earth, go to the Moon, or even to another planetary system at the other end of the universe, we will be able to recall memories and think just like while we are on Earth.
- The brain helps to extract memories from the *nāma loka (viññāṇa dhātu)* and pass them to *hadaya vatthu*, the seat of the mind.
- On the other hand, **the five physical senses help detect** localized, dense *rūpa*. Again, the brain plays a critical role in that process; see, “[Brain – Interface between Mind and Body](#).” **However, it is the mind that experiences all rūpā and memories.**

Our World – Rūpa Loka and Nāma Loka

6. Our world consists of *rūpa loka* and *nāma loka*. *Rūpa loka* consists of physical *rūpa* that we can see, hear, smell, taste, or touch. Other humans and animals are included in one’s *rūpa loka*. They are at specific locations in *ākāsa dhātu* (space.)

- The *nāma loka* includes the “mental aspects” or *nāma*, specifically *vedanā*, *saññā*, *saṅkhāra*, and *vipāka viññāṇa*.
- **Kamma viññāṇa** (associated with *dhammā*) do not strictly fall into the *nāma* category but are also in *nāma loka (viññāṇa dhātu)*.
- **We all share the same rūpa loka. However, each person has their own nāma loka, because vedanā, saññā, saṅkhāra, viññāṇa are one’s own.**
- Unlike *rūpa* (located in specific places in space), *nāma* in *nāma loka (viññāṇa dhātu)* can be recalled from anywhere in space (*ākāsa dhātu*).

Nāma and Two Types of Rūpa

7. The astronauts who went to the Moon could not see, hear, smell, taste, or touch anything that was not on the Moon. But they could recall their memories as if they were on Earth. That is because we can access *viññāṇa dhātu* from anywhere.

- Put another way, **dense (sappaṭigha) rūpa** (experienced by the five physical senses) are localized, but the **nāma** category (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) is NOT localized.
- In addition to the dense **rūpā** and **nāma**, another category combine “pure *nāma*” (without energy) and *rūpa*. Those are the **dhammā** in “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇam*” in the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#).”
- *Vedanā*, *saññā*, *saṅkhāra*, and “*vipāka viññāṇa*” belong to the **nāma** category. “**Kamma viññāṇa**” are *dhammā* (*anidassana/appaṭigha rūpa*).
- In between such **dense (sappaṭigha) rūpa** and **nāma**, there is **anidassana/appaṭigha rūpa (dhammā)**. These **dhammā** are below the *suddhaṭṭhaka* stage and are *kammic* energies created by *kamma viññāṇa*; see, “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections](#).”
- Both **nāma** and **dhammā** are not localized and **are in viññāṇa dhātu**. See, “[What are Rūpa? – Dhammā are Rūpa too!](#)”

The Sixth Type of *Rūpa* in Buddha Dhamma

8. As discussed below, *nāma* (or “thoughts with *nāma*”) arise when an external *rūpa* comes into contact with an internal *rūpa*.

- Our thinking process always starts with an *ārammaṇa* that comes to a “sense door.” We discussed the five physical sense doors above.
- The sixth sense door is the mind itself. It can become active upon receiving a “*dhammā*” as we have discussed previously; see, for example, #6 in “[Summary of Key Concepts About Viññāṇa and Saṅkhāra](#)” and the two posts referred to there.
- ***Dhammā*** (with a “long a”) are memory records (*nāmagotta*) with embedded *kammic* energies. They are *kamma bīja* (*kammic* energies) that bring *vipāka*. The contact of such *dhammā* directly with the *hadaya vatthu* is described in the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” as “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.” Also, see “[Chachakka Sutta – Six Types of Vipāka Viññāṇa](#).”
- Where are such ***dhammā*** or *kamma bīja* “stored”?

Dhammā Are in *Viññāṇa Dhātu* (or *Nāma Loka*)

9. Our world consists of six types of *dhātus*: *pathavi*, *āpo*, *tejo*, *vāyo*, *ākāsa*, and *viññāṇa*.

- We are familiar with the *rūpa loka* associated with the first five types of *dhātus*. “Things” made of *pathavi*, *āpo*, *tejo*, and *vāyo* are in specific places in *ākāsa dhātu* or “space.”
- The Buddha described a *nāma loka* associated with the *viññāṇa dhātu*. *Nāmagotta* and *dhammā* in the *nāma loka* do not have spatial locations. They can make contact with the *hadaya vatthu* from anywhere in space. We discussed that starting with #11 in the recent post “[Summary of Key Concepts About Viññāṇa and Saṅkhāra](#).”
- Let us think about that because it can provide more insights.

Difference Between “Dense *Rūpa*” in *Ākāsa Dhātu* and “*Nāmagotta/Dhammā*” in *Viññāṇa Dhātu*

10. To experience any of the five types of “dense *rūpa*” DIRECTLY with the five corresponding physical senses, we need to “bring them together” at the appropriate location.

- **However, we can recall any of the above experiences from anywhere.** Even if you go to the Moon, you can remember past experiences (*nāmagotta*). **Does that mean you took all those memories with you to the Moon?**
- Some scientists believe that all memories are in the brain. But despite intense effort within the past several decades, they cannot provide any evidence.
- Furthermore, there is an ever-increasing collection of evidence from the accounts of past lives and near-death experiences (see #2.) **Even if just one of those accounts is confirmed, we can rule out the “memory storage in the brain” hypothesis.**

Internal (*Ajjhatta*) and External (*Bahiddha*) *Rūpa*

11. There are five types of *rūpa* in the external world (*bahiddha rūpa*): *rūpa rūpa* or *vaṇṇa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, and *phoṭṭhabba rūpa*.

- Five types of subtle internal *rūpā* (*ajjhatta rūpa*) are associated with a living being for making contact with the five types of *rūpa* located in *ākāsa dhātu*. They are the five *pasāda rūpa* of *cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya*.

- In addition, as we discussed in #7, *dhammās* are *rūpa* below the *suddhaṭṭhaka* stage with only *kammic* energy. They are detected directly by the seat of the mind (*hadaya vatthu*.)
- *Hadaya vatthu* and a set of *pasāda rūpa* arise at the beginning of a new *bhava* (existence.)
- Note that the external *vaṇṇa rūpā* are experienced (or sensed) with the internal *cakkhu pasāda rūpa*; external *sadda rūpa* experienced with internal *sota pasāda rūpa*, etc.
- Both internal and external *rūpā* are made of the four fundamental elements (*pathavi, āpo, tejo, vāyo*.)

The uniqueness of the Set of Internal *Rūpa*

12. Internal *rūpā* are very special. They can be created only by *kammic* energy.

- Materialists think thoughts (*nāma*) arise in the brain. But they have not found ANY evidence of that despite intensive research over the past 60 plus years.
- **How can feelings of joy or sorrow arise in inert molecules, no matter how complex they become?**
- As I discussed in the first few posts in the “[Origin of Life](#)” series, even the first cells are created by *kammic* energy!

13. Note that *pasāda rūpā* are in the mental body or *gandhabba*. They cannot be seen even with the most powerful microscopes. They are each made of a single *suddhaṭṭhaka* (elementary unit of matter in Buddha Dhamma.) A *suddhaṭṭhaka* is a billionth times smaller than an atom in modern science.

- The eyes, ears, nose, tongue, and physical body only capture the external sensory inputs. Those signals get processed by the brain and transmitted to the mental body with the *hadaya vatthu* and a set of *pasāda rūpa*.
- *Nāma* (*vedanā, saññā, saṅkhāra, viññāṇa*) arise at *hadaya vatthu* in the mental body (*gandhabba*.) See “[Brain – Interface between Mind and Body](#).” It is not necessary to learn such details. But it is necessary to understand the difference between the sensory system in the physical body (eyes, ears, nose, tongue, body, and brain) and that in the mental body (*hadaya vatthu* and five *pasāda rūpa*.) **Thoughts (*nāma*) arise in the mental body.**

Contact Between External and Internal *Rūpa* Give Rise to *Nāma* (Mental Attributes)

14. ***Nāma* arises when an external *rūpa* comes in contact with an internal *rūpa*.** For example, when an external *rūpa* is seen with the *cakkhu pasāda rūpa*, *cakkhu viññāṇa* arises. That “seeing sensation” is felt with *vedanā, saññā, saṅkhāra*, and the overall experience is *cakkhu viññāṇa*. All five “physical senses” work the same way.

- By the way, those five types of sensory experiences (*cakkhu, sota, ghāṇa, jivhā, and kāya viññāṇa*) are *vipāka viññāṇa*.

[Not included from here to before the References.]

What Are *Nāmarūpa*?

Nāma loka includes two types of “*nāmarūpa*”:

- The primary type of *nāmarūpa* is “in-between *nāma* and *rūpa*” and arises in *Uppatti Paṭicca Samuppāda*. **This is the “mental body” or “*gandhabba*” produced by *kammic* energy!**
- The second type belongs to the “*nāma*” category and arises in the *Idappaccayatā* PS.
 - In this post, we will discuss only to the first type of *nāmarūpa*.

15. **The set of *ajjhata rūpa* defines a living being. It is also the primary type of *nāmarūpa* because it can generate *nāma*!**

- “*Nāma*” arises at the “seat of the mind” (*hadaya vatthu*) with the help of the five *pasāda rūpa*. Each *pasāda rūpa* is a “doorway” to the *hadaya vatthu*. For example, *vaṇṇa rūpa* makes contact with the *cakkhu pasāda rūpa*, and that contact is transferred to the *hadaya vatthu*.
- We can see that this primary type of *nāmarūpa* has the remarkable ability to generate *nāma* or “mental attributes”: *vedanā*, *saññā*, *saṅkhāra*, and *vipāka viññāṇa*.
- **The *hadaya vatthu* and the five *pasāda rūpa* go by “mental body” or *gandhabba*.** It has the unique ability to generate *nāma* upon interactions with the five types of external *rūpa*.

16. Some living beings, particularly the *Brahmas* in the highest 20 realms, have only such a “mental body.” They do not have dense physical bodies like humans or animals.

- *Rūpāvacara Brahmas* in the first 16 *Brahma* realms have *hadaya vatthu* and two *pasāda rūpa* (*cakkhu* and *sota*.) Thus they can only see and hear.
- *Arūpāvacara Brahmas* in the four *arūpāvacara Brahma* realms have only the *hadaya vatthu*. They cannot see or hear either. But they can think! That brings up another type of *rūpa* that we discuss now.
- The *hadaya vatthu* of any *Brahma* (or any living being) is unique; it is formed by the specific *kammic* energy that gave rise to its existence.

External *Rūpa* are Inert; Internal *Rūpa* Are Not Inert

17. The critical observation is that the set of internal *rūpa* (*hadaya vatthu* and the set of *pasāda rūpa*) are not inert. That set is the “mental body” or “*manomaya kāya*” or “*gandhabba*.”

- Those are the ONLY *rūpa* that can give rise to *nāma* (*vedanā*, *saññā*, *saṅkhāra*, *vipāka viññāṇa*.)
- The Pāli word “*nāma*” can mean “to bend/adjust” (in Sinhala, නමැනීම.) The internal *rūpā* generated by *kammic* energy is compatible with that existence.
- Our dense physical bodies (just like plants) are made of inert matter. “Consciousness” arises in the “mental body.”

18. For each human, *kammic* energy creates a *manomaya kāya* with a *hadaya vatthu* and five *pasāda rūpa*. Until it is pulled into a suitable womb, that *gandhabba* or *manomaya kāya* lives in the “*para loka*.” That means those of us in “this *loka*” (*ayaṃ loka*) cannot see them; they are in a “different *loka*” (*para loka*) that is unseen.

- While in *para loka*, a *gandhabba* can see and hear just like a *rūpāvacara Brahma*. Even though a human *gandhabba* has *ghāṇa*, *jivhā*, and *kāya pasāda rūpa*, those cannot make contact with *gandha*, *rasa*, and *phoṭṭhabba* until getting a physical body.
- A physical body starts when the *gandhabba* enters a womb and merges with a zygote. Then it grows inside the womb getting food from the mother. Once that baby leaves the womb, it grows into an adult eating food.
- Thus, our physical bodies are inert matter, like plants or rocks. They are all made of *pathavi*, *āpo*, *tejo*, and *vāyo*. **That is why it becomes inert as soon as the *gandhabba* leaves.**
- It is CRITICAL to have this basic understanding; see “[Micchā Dīṭṭhi, Gandhabba, and Sotāpanna Stage](#).”

9.7.2 Citta Vīthi – Fundamental Sensory Unit

January 6, 2021; revised January 10, 2021 (#9)

Citta vīthi is the smallest sensory unit that is experienced by the mind. It is a series of *citta* with 17 *citta* for a *pañcadvāra citta vīthi*. A *manodvāra citta vīthi* can have a variable number of *citta*.

Introduction

1. This subsection is a continuation of the series of posts in [“Buddha Dhamma – A Scientific Approach.”](#)
 - In this bottom-up analysis, we will get to the fundamentals of Buddha Dhamma. That involves tackling some basic features of *Abhidhamma*. Thus it will require some effort.
 - But it will be a rewarding experience for those who make an effort.
- Buddha Dhamma can be understood via the Four Noble Truths or *Tilakkhaṇa* or *Paṭicca Samuppāda*. **If one understands any one of those three, one would understand all three.**
- Our approach here is to look at the fundamental processes involved in a sensory event. That will provide invaluable insights to *Paṭicca Samuppāda*.

A Citta Lasts Only a Billionth of a Second

2. What we call a “thought” is the cumulative effect of billions of *citta* flowing through a mind. The mind — which processes *cittā* — is the fastest entity in the world ([Ref. 1](#))
 - Furthermore, a single *citta* does not arise in isolation. A *citta* ALWAYS arise in a ***citta vīthi* (series of *cittā*)**, some with 17 *cittā*; see below. Billions of such *citta vīthi* can flow through a mind in a second. What we “feel” is the cumulative effect of billions of such *citta vīthi*.
 - When exposed to a new *ārammaṇa* (new sensory input), the first series of *citta vīthi* arises without even being aware. We will start experiencing them within a short time, and when we do, we CAN have control over the SUBSEQUENT *citta vīthi* related to those that arose first.
 - But if we don’t pay attention, such *citta vīthi* can progress on their own and induce us to speak badly or even do bad things.
 - **That is why the need to be “mindful.”**
 - For example, when someone says something nasty, we may automatically respond with bad speech or even bodily actions. Some people are prone to do that more than others. But ANYONE can cultivate mindfulness and be able to have control over one’s speech or actions. Of course, it will take time to cultivate mindfulness. Our analysis here will help understand that process too.

Roles of *Ārammaṇa* and *Gatī* in a Sensory Event

3. To emphasize, we DO NOT have control over how *citta vīthi* first arise due to new sensory input. They arise AUTOMATICALLY based on two things: The particular *ārammaṇa* (sense object) and one’s habits/character (*gatī*.) Note that “*gatī*” is pronounced “*gathi*” as in “**Th**ailand.” That is easier to explain with a few simple examples.

- Consider a husband who likes alcohol and his wife, who dislikes alcohol. A friend visits them and brings a bottle of alcohol.
- That bottle of alcohol is the *ārammaṇa*. When the husband sees it, he feels happy. His wife sees the bottle at the same moment and becomes unhappy. Therefore, that same *ārammaṇa* induced different types of *citta vīthi* in the husband and the wife's minds! That means different types of *cetasika* (mental factors) arise in the *citta* in those two types of *citta vīthi*.
- Prior experiences of the husband with alcohol are "happy occasions" for the husband. He has a *gati* to be attracted to alcoholic drinks. On the other hand, his wife cannot even stand the smell of alcohol, and she believes alcohol is bad to drink.
- **However, *gati* can change.** At a later time, the husband may give up alcoholic drinks after seeing the bad consequences of drinking. It is also possible that the wife may start associating with a group of friends who drink alcohol and gradually begin to form a liking for alcohol taste.
- See [Ref. 2](#) for details on the critical roles of *ārammaṇa* and *gati*.

One Sensory Unit (*Citta Vīthi*) At a Time – But They Flow Incredibly Fast

4. Let us consider that sensory event of "seeing a bottle of alcohol" when a friend brings that bottle. Let us consider the thoughts that flow through the husband's mind at that time of the visit.

- At the time of seeing the bottle, he is likely to be talking to that friend. It appears that talking, hearing the friend's words, and seeing the bottle in the friend's hands all happen simultaneously.
- They may happen at ABOUT the same time. But even just two sensory events CANNOT happen simultaneously (say, hearing the friend say "hello" and seeing the bottle in his hands).
Hearing his friend say "hello" happens with a *citta vīthi* of 17 *cittā*. That auditory sensory input **comes through the ears**. It is a "***sotadvāra citta vīthi***." The sensation of "hearing" or *sota viññāṇa* arises in such a *sotadvāra citta vīthi*.
- Seeing the friend with the bottle happens with a TOTALLY DIFFERENT *citta vīthi* triggered by the visual event **coming through the eyes**. It is a "***cakkhudvāra citta vīthi***." The sensation of "seeing" or *cakkhu viññāṇa* arises in such a *cakkhudvāra citta vīthi*.

Mind Can Process Numerous *Citta Vīthi* Very Fast

5. A given *citta vīthi* is based on ONE *ārammaṇa*. Until that series of *citta* run its course, another *citta vīthi* WILL NOT start.

- In the above example, hearing the sound "hello" was based on one *citta vīthi*. The sight of the friend was with another *citta vīthi*. But since they happened so fast that one would think they happened simultaneously.
- **Countless *citta-vīthi* involving ALL SIX senses can flow alternatively in a split-second!**
- The mind is capable of "sorting out" different types of *ārammaṇa* (sights, sounds, smells, etc.) That is why the Buddha said that the mind is the fastest entity in the whole world.
- Because these *citta-vīthi*s flow VERY FAST, and the mind can keep up with fast processing, **we feel as if they all happen simultaneously!** For details, see [Ref. 3](#).

Each "Data Packet" From a Sense Door Analyzed by a *Citta Vīthi*

6. As discussed in [Ref. 3](#), the following sequence of events happens before we experience a sensory input. Consider seeing the bottle of alcohol in the above example. (1) Eyes capture the scene of the friend holding the bottle. That captured frame is of about 10-millisecond duration. (2) That signal is sent to the brain via the optic nerve. (3) Brain processes that "data packet" and transfers to the *gandhabba*'s "invisible body." (4)

That signal is transferred to the “*cakkhu pasāda rūpa*.” (5) The *cakkhu pasāda rūpa* transfers the signal to the *hadaya vatthu* (seat of the mind.)

- We also discussed the above aspects briefly in #7 and #8 of [Ref. 4](#). Now, let us see in a bit more detail what happens when the *cakkhu pasāda rūpa* hits *hadaya vatthu* and transfers the signal to *hadaya vatthu*.
- The best way to understand this process is to visualize the *hadaya vatthu* surrounded by five *pasāda rūpa*. Only one *pasāda rūpa* can “hit” (or make contact) with the *hadaya vatthu* at any given time.
- Of course, those entities (*pasāda rūpa* and *hadaya vatthu*) can never be seen, even by the most sensitive instruments. **Thus, the following is just an analogy to visualize the process easier.**

The “Bell Analogy”

7. Imagine a big metal ball (*hadaya vatthu*) surrounded by five smaller balls (five *pasāda rūpa*.) When one smaller metal ball hits the big metal ball, that big metal ball will “ring” (vibrate) a certain number of times. For a *pañcadvāra citta vīthi*, that number is ALWAYS 17.

- This is similar to the “ringing” of an old fashioned bell (like the Liberty Bell in Philadelphia) when hit by a metal object.
- **In fact, Buddhist temples have bells that were originally designed to convey this idea of a *citta vīthi*:** One pulls a rope tied to a small metallic ball inside a metal dome so that the metal ball hits the dome, and that emits a “ringing sound.”
- **At the very fundamental level, such a “contact” of a *pasāda rūpa* with *hadaya vatthu* is the only brief moment of sensory experience! (see [Ref. 5](#).)**
- The Pāli word “*phassa*” represents that “contact.”

Phassa – Contact Between a *Pasāda Rūpa* and *Hadaya Vatthu*

8. Therefore, that “contact” (*phassa*) DOES NOT happen, for example, between the physical eyes and a physical object (*rūpa*.) First, the brain processes that picture captured by the eyes and transfers it to the *cakkhu pasāda*; See [Ref. 4](#). It is only then the *cakkhu pasāda* transfers that signal to *hadaya vatthu* by “hitting” the *hadaya vatthu* (just like the dome of a bell getting hit by the mental ball.)

- **This is what is meant by the Pāli term “*phassa*.”** For example, in the Pāli verses, “*saḷāyatana paccayā phasso*” and “*phassa paccayā vedanā*” refer to the “contact of an external sensory input with the mind (*hadaya vatthu*)” and “that contact leading to experiencing the sensory input.”

Contact (*Phassa*) by a *Pasāda Rūpa* Makes *Hadaya Vatthu* Vibrate 17 Times

9. When the *hadaya vatthu* is “hit” by a given *pasāda rūpa* (i.e., when it transfers the sensory signal to *hadaya vatthu*), that leads to 17 vibrations of *hadaya vatthu*; no more and no less. That is a ***citta niyāma*** or a universal law. **With each “vibration,” the *hadaya vatthu* generates a *citta*.**

- That is the source of a *citta vīthi* with 17 *cittā* (“thought moments”) in a sensory event involving *pañcadvāra* or the five physical doors (eyes, ears, nose, tongue, body.)
- **The duration of those 17 thought-moments is how long that sensory experience lasts in reality (see [Ref. 5](#)).** It is a billionth of a second! Of course, billions of such *citta vīthi* flow through the mind it appears to us as if we are continuously experiencing it. But the mind falls to the *bhavaṅga* state numerous times in between those *citta vīthi*.
- Note that a *pasāda rūpa* plays a role ONLY in signals coming through the *pañcadvāra* (five physical senses), i.e., the rule of 17 *cittā* per *citta vīthi* holds ONLY for *pañcadvāra citta vīthi*.

Manodvāra Citta Vīthi Do Not Have the 17-Citta Limit

10. When a *dhammā* comes to the mind or *hadaya vatthu* (via the *mana indriya* in the brain,) there is no *pasāda rūpa* involvement. That signal goes directly to *hadaya vatthu*. Furthermore, the “17-citta rule” does not apply to *manodvāra citta vīthi*. They can have ANY number of *citta*, usually more than 10 *citta*.

- For example, in *jhāna samāpatti*, *manodvāra citta vīthi* can run for many hours continuously (as long as one is in that *samāpatti*.)
- But when in a “regular *jhāna*,” there could be *pañcadvāra citta vīthi* running between *manodvāra (jhānic) citta vīthi*. That means one could hear external sounds, for example, while in a regular *jhāna*.
- But when in a *jhāna samāpatti*, that *jhānic citta vīthi* runs continuously. *Pañcadvāra citta vīthi* do not get a chance to “interfere.” Thus, when one is in a *jhāna samāpatti*, one is totally oblivious to what happens around him/her.

Citta Vīthi – Building Block of Thoughts

11. It is a good idea to get some familiarity with *citta vīthi*. That will make it easier to understand future discussions and get a deeper insight into *Paṭicca Samuppāda*. Further details on *citta vīthi* in the post, “[Citta Vīthi – Processing of Sense Inputs](#).”

- Of course, the descriptions of *citta vīthi* is not in the *Sutta Piṭaka* but the *Abhidhamma Piṭaka*. The easiest way to review my description above is to consult *Bhikkhu Bodhi*’s “A Comprehensive Manual of Abhidhamma” ([Ref. 6](#).)
- However, the explanation in #6 - #8 is not in *Bhikkhu Bodhi*’s book. That explanation was based on *Waharaka Thero*’s discourses and my own incorporation of current scientific knowledge. I have explained that approach in “[Interpretation of the Tipitaka – Gandhabba Example](#).”

References

1. Buddha said it is hard to find any phenomena in this world that change faster than the mind: “[WebLink: suttacentral: Aṅguttara Nikāya \(1.48\)](#).”
The short sutta says: “*Nāhaṃ, bhikkhave, aññaṃ ekadhammampi samanupassāmi yaṃ evaṃ lahuparivattaṃ yathayidaṃ cittaṃ. Yāvañcidaṃ, bhikkhave, upamāpi na sukarā yāva lahuparivattaṃ cittaṃ*”ti.”
Translated: “I consider, *bhikkhus*, that **there is no phenomenon that comes and goes so quickly as *citta***. It is not easy to find an analogy (a simile) to show how quickly *citta* can change.”
2. “[Arammana Plays a Critical Role in a Sensory Event](#).”
3. “[Vision Is a Series of “Snapshots” – Movie Analogy](#).”
4. “[How Do We See? – Role of the Gandhabba](#).”
5. This is the very brief sensory experience that the Buddha explained to *Bāhiya Dārucīriya* with the verse, “*diṭṭhe diṭṭha mattaṃ bhavissati*.” It means, “**what is seen is seen only for a brief moment**.” *Mattaṃ* is “*mātra*” in Sinhala or Sanskrit or a “trace of something.” What we feel is the cumulative effect of such a large number of contacts that take place in a short time. **Yet, the “real experience” lasts only a billionth of a second!** See “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#)”
6. *Bhikkhu Bodhi*, “[A Comprehensive Manual of Abhidhamma](#).” This downloadable version is from <https://www.pariyatti.org>. The above material is discussed in detail in Chapter IV (p. 149.)

9.7.3 Does any Object (Rūpa) Last only 17 Thought Moments?

Revised October 29, 2015; April 5, 2016; August 18, 2019; February 18, 2020; December 19, 2020; re-written January 10, 2021; revised November 30, 2022

It is a *hadaya rūpa* (a series of vibrations of *hadaya vatthu*) that lasts only 17 thought moments. In contrast, some *rūpa* (like a star) can last billions of years.

Does Any Object Live Only For 17 Thought-Moments?

1. I have seen the following statement by many when discussing *Abhidhamma*: “Anything in this world lasts only a brief moment. Then it is re-formed, and the process continues ceaselessly.”

- Here is a direct quote from a couple of sources, one of which is a popular book on *Abhidhamma*: “..a *rūpa* is very short-lived – it endures only for 17 conscious moments. **Whatever object formed is almost instantly gone**”. Thus it is a widespread misconception.
- I Googled the following: “*Abhidhamma* ..a *rūpa* is very short-lived – it endures only for 17 conscious moments.” Here is the search result: [WebLink: google search: Abhidhamma ..a rūpa is very short-lived – it endures only for 17 conscious moments – Google Search](#). As you can see, several links make that statement.

The origin of Confusion

2. “Anything in this world” has a common name in Buddha Dhamma: a *saṅkhata*.

- A *saṅkhata* arises due to causes and lasts until those causes are there. Therefore, a *saṅkhata* has a finite lifetime. **That lifetime can range from a split-second (for thought) to billions of years (for a star like our Sun.)** Everything in this world is *saṅkhata*.
- The arising of a *saṅkhata* is due to *Paṭicca Samuppāda*. That is the “*udaya*” (or “arise”) part described in *udayavaya ñāṇa*.
- A *saṅkhata* can be STOPPED from arising IF the causes and conditions are removed, i.e., by stopping the *Paṭicca Samuppāda* process. That is “*vaya*.”

Stopping of *Paṭicca Samuppāda* with *Paṭiloma Paṭicca Samuppāda*

3. *Paṭiloma Paṭicca Samuppāda* is the “reverse” of the standard *Akusala-Mūla Paṭicca Samuppāda* process. Which means it is the way to *Nibbāna*. See, “[Patiloma Paticca Samuppāda – Key to Nibbāna](#).”

- In other words, the standard *Akusala-Mūla Paṭicca Samuppāda* process leads to the continuation of the rebirth process. It is also known as the *Anuloma Paṭicca Samuppāda*. The opposite (or the stopping of the rebirth process via eliminating *avijjā*) is *Paṭiloma Paṭicca Samuppāda*. **That is the “destruction” or “vaya” of the process** that leads to the arising of all *saṅkhata* (including our future births.) [*paṭiloma* : [adj.] reverse; opposite; contrary.]
- Therefore, *udayavaya ñāṇa* is a deeper concept. It describes, in yet another way, how the rebirth process can be stopped. It is a bit more complicated and is discussed in the section “[Udayavaya Ñāṇa](#).”
- So, why do some people say that any *rūpa* (*saṅkhata*) has a lifetime of only 17 thought-moments (lasting only a split-second)?

4. It seems that this misinterpretation comes from taking the life of a “*hadaya rūpa*” and applying that to ANY *rūpa*!

- As we discussed in “[Citta Vīthi – Fundamental Sensory Unit](#),” the lifetime of “vibration” of the *hadaya vatthu* (seat of the mind) is 17 thought moments. In *Abhidhamma*, that vibration is called a *hadaya rūpa*.

- First, let us clarify that a *saṅkhata* (ANY *rūpa* in the external world) may have a lifetime of billions of years! An example is any star.

Some *Saṅkhata* May Have Lifetimes of Billions of Years!

5. Different *saṅkhata* have different lifetimes. A fly may live for a few days, a human for about 100 years; a building may last hundreds of years, the Earth will last about 4-5 billion more years, etc. However, a *saṅkhata* will decay gradually over time.

- An inert object, like a building, will start slowly decaying. If a building lasts 1000 years, then each day, it will “decay” by a little bit, though decay will accelerate towards the end.
- From the present time to the final destruction (or until death in the case of a living being), any given *saṅkhata* will change. If we consider a baby born today, it will first grow to become a young person. Then it will gradually weaken while becoming an older adult and eventually die one day. Therefore, the critical aspect is not destruction but change. While the baby is growing, the cells in the body will multiply; but more cells will die in an older person's body.

A *Saṅkhata* Keeps Changing – Not “Appear and Disappear”

6. This constant change is not discernible to us on a real-time basis. A person does not age while we are watching him/her. But we can see the change over several years, especially if they are very young or over middle age.

- Mayflies have a lifetime of the order of a day (after the larval stage), and some live only several hours; here is a short video by the National Geographic channel:

[WebLink: youtube: The 24-Hour Life of the Mayfly | Nat Geo Wild](https://www.youtube.com/watch?v=Kd8j8j8j8j8)

- Thus there is a HUGE difference between saying that a given material object CHANGES moment-to-moment versus saying that the object is “RECREATED” every 17 thought moments.
- During an *Abhidhamma* discourse that I listened to, the presenter showed a pen and said that the pen was “destroyed and recreated” after 17 thought moments! Extending that logic, one could say that any entity (say, the Earth) vanished and is “recreated” within 17 thought moments! A complete misunderstanding of the *Udayavaya* process of a *saṅkhata*.
- The 17 thought moments' origin is explained in the post “[Citta Vīthi – Fundamental Sensory Unit](#).”
- As explained there, those 17 thought moments (or 17 *cittā*) arise when the **seat of the mind (*hadaya vatthu*)** vibrates 17 times when one of the five *pasāda rūpa* transfers a sensory input. Those 17 vibrations make up a “*hadaya rūpa*” in the *Abhidhamma* language. Note that a “*hadaya rūpa*” is different from “*hadaya vatthu*.” A *hadaya rūpa* arises every time the *hadaya vatthu* gets hit by a *pasāda rūpa* while transferring a sensory signal. See “[Citta Vīthi – Fundamental Sensory Unit](#).”

A *Hadaya Rūpa* Has a Life of 17 Thought-Moments

7. So, where does this incorrect statement come from? “.. *rūpa* is very short-lived – it endures only for 17 conscious moments. Whatever object formed is almost instantly gone.”

- Confusion arises when one does not understand the concept of a *hadaya rūpa*. A *hadaya rūpa* is generated in the *hadaya vatthu* by a sensory event through one of the five physical senses. **The lifetime of a *hadaya rūpa* is the time taken to experience that external sense event, which lasts 17 thought moments corresponding to 17 vibrations of *hadaya vatthu*.** During that time, an impression of the external *rūpa* is made in mind by a *citta vīthi*).
- See “[Citta Vīthi – Fundamental Sensory Unit](#)” and “[What is Mind? How do we Experience the Outside World?](#)”

- It is **WRONG** to take this time to be the lifetime of an external object (a *saṅkhata*).

Huge Difference Between a *Rūpa* (a *Saṅkhata*) and a *Hadaya Rūpa*

8. Therefore, It is critical to understand the difference between ANY *rūpa* (*saṅkhata*) and a *hadaya rūpa* that lasts only for a blink of an eye. Also, a *hadaya rūpa* is different from a *hadaya vatthu*. A *hadaya rūpa* is 17 vibrations of a *hadaya vatthu*.

- **The lifetime of a *hadaya rūpa* is just the time it takes for the mind to be AWARE of any *saṅkhata*.** We experience outside material things (*saṅkhata*) in our world through our five physical senses. We see with our eyes, hear with our ears, smell with our noses, taste with our tongues, and touch with our bodies.
- During the lifetime of a *hadaya rūpa*, our minds only catch a brief (a thought moments worth) of the seeing, hearing, etc., experience at a time. It is not that the object lives a short time; it is just that we sense it only for a brief moment at a time!
- It is unnecessary to spend time on the concept of a *hadaya rūpa* unless one is deep into *Abhidhamma*. However, it is good to know about it because one may come across it and may confuse it with a *hadaya vatthu*.
- The main point is that any object in the world (conventionally called a *rūpa*) is a *saṅkhata*. Some *saṅkhata* (like the Earth or a star) have lifetimes of billions of years. That is not to be confused with the *hadaya rūpa* (or a *citta vīthi*) that lasts only 17 thought-moments!

Other posts in this subsection are at “[Understanding the Terms in Paṭicca Samuppāda](#).”

9.7.4 Phassa (Contact) – Contact With Pasāda Rūpa

January 15, 2021; revised January 16, 2021

Phassa (Contact) comes in the middle of the *Paṭicca Samuppāda* (PS) process. However, PS processes start with “*saḷāyatana paccayā phasso*” or “an *āyatana* making contact.” That contact is between a *rūpa* and one of the six *āyatana* (*cakkhu*, *sota*, *gandha*, *jivhā*, *kāya*, *mano*.) At the fundamental level, **a *rūpa* makes contact with the mind** via one of the five *pasāda rūpa* or directly with the mind (*hadaya vatthu*).

Importance of *Phassa* (Contact) in *Paṭicca Samuppāda*

1. The standard PS cycle starts with “*avijjā paccayā saṅkhārā*.” However, we do not just start generating *saṅkhāra*. Furthermore, *avijjā* is not there in a mind all the time. Only when we see, hear, taste, smell, touch, or think about an enticing “thought object” (*ārammaṇa*) that we start generating *saṅkhāra* due to *avijjā*.

- For example, if we **eat something tasty**, we may generate greedy thoughts (*saṅkhāra*) of eating more even if we are not hungry. If we **see an enemy X**, we may generate angry thoughts (*saṅkhāra*) about that person.
- Do those two “contacts” occur between the **food and the tongue/eyes and person X**?
- In other words, does the *vedanā* (feeling) of “good taste” arise in the tongue? Does “seeing of X” happen in the eyes? No.
- Some say those *vedanā* arise in the brain. But the brain is also made of inert atoms/molecules. Those cannot SENSE anything!
- Only a Buddha can accurately describe the actual sensing process. **That “experience” takes place in the mental body (*gandhabba*.)**

Contact (*Phassa*) Is Between a *Rūpa* and an *Āyatana* (*Pasāda Rūpa*)

2. When we see person X, for example, that is contact (*phassa*) between our internal *āyatana* (eyes or more correctly, *cakkhu pasāda rūpa*) and external *āyatana* (an image of person X in this case). That is the process stated in verse, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*.” The word “*paṭicca*” here refers to that **contact (*phassa*)**.

- Due to that contact, a series of *cittā* flow in mind. That is a *citta vūthi*. We discussed that in detail in “[Citta Vūthi – Fundamental Sensory Unit](#).” Also, see [Ref. 1](#).
- That leads to a mental phenomenon that we call consciousness (in this case, *cakkhu viññāṇa*). When we look at person X, we can instantly identify that person. **This is amazing because the image that falls in the back of the eye is tiny.** See [Ref. 1](#).
- Humans and animals generate such “awareness” or consciousness when seeing, hearing, smelling, tasting, touching, or thinking about an external *rūpā*.

Cakkhāyatana Is Cakkhu Pasāda Rūpa

3. *Cakkhāyatana* is not the eyes. The “seeing” takes place in the mind, and the “seat of the mind” is the *hadaya vatthu*. The image captured by the eyes gets transmitted to the *cakkhu pasāda rūpa*, which transfers the image to the *hadaya vatthu*. See the previous post, “[Citta Vūthi – Fundamental Sensory Unit](#).” It is a good idea to review that post.

- All five physical senses (*cakkhu, sota, ghāṇa, jivhā, kāya*) work that way. See [Ref. 2](#) for a *Tiṭṭaka* reference.
- Memories and other concepts come to the mind via *mana indriya* in the brain. Those signals get directly transferred to the *hadaya vatthu*. We may get to those details in future posts.

What Is Meant by “*Cakkhu, bhikkhave, aniccaṃ*”?

4. Many *suttas* state, “*Cakkhu, bhikkhave, aniccaṃ*.” (and similarly for *sota, ghāṇa*, etc.) It should be clear that “*cakkhu*” does not refer to the physical eyes. The *cakkhu pasāda rūpa* in the *gandhabba* can last many thousands of years.

- After the human *bhava*, we get another *cakkhu pasāda rūpa* (with another mental body corresponding to the new *bhava*).
- However, what kind of *bhava* we get will NOT be due to our liking/expectations. **It will be due to our past *kamma* and will be dictated by the *upapatti* PS process; see [Ref. 3](#).** That is what is meant by “*anicca*.”

Vedanā and Saññā Can Arise Without a Mind

5. There are a couple of “mental factors” (or *cetasika*) that may arise without a “mind.” Crude versions of *vedanā* and *saññā* can arise even without a mind in “living things” (like plants) in the absence of a mind.

- *Vedanā* comes from (“*ve*” + “*danā*”) which means “විඳ දැනවීම” in Sinhala. That means to “become aware of something.” **When we make contact with an “external *āyatana*” via our six senses, we become aware of that external *rūpā*; that is *vedanā*.** See, “[Vedanā \(Feelings\)](#).”
- At the fundamental level, *Saññā* means “recognition” of an object or a person, or a concept, for example. In general, it is the recognition of an “external *āyatana*” or “external *rūpā*.” See, “[Saññā – What It Really Means](#).”
- Therefore, plants and trees have a crude basic form of *vedanā* and *saññā*. **A plant can “feel” when sunlight falls on it (*vedanā*), and “recognize” (*saññā*) that as useful for its survival.**

Awareness in Living Things (Plants) and in Living Beings

6. Therefore, plants and trees also seem to be aware of the external world and can even respond in some cases. For example, a plant or a tree can “turn” towards sunlight. Their roots grow towards water sources and away from dry soil. One may ask: “Then how does a plant turn towards sunlight?”

- Plants are like robots. A moving robot may have sensors that can detect obstacles in the way. That involves *vedanā* and *saññā* in the elementary sense.
- A robot has a built-in computer that can instruct how to go around an obstacle, for example.
- The working of a plant is very similar. A plant seed has necessary “programs” installed in its cells to deal with the external environment. We discussed this in the section on “[Origin of Life](#).”

Plants Do Not Generate *Saṅkhāra* and *Viññāṇa*

7. Therefore, some “live things” like plants can generate rudimentary versions of *vedanā* and *saññā*. However, a plant CANNOT generate *saṅkhārā* (thoughts) about those *vedanā* and *saññā*.

- *Saṅkhārā* arises via “*avijjā paccayā saṅkhārā*.” Based on *avijjā*, a mind generates defiled thoughts. Plants do not generate *saṅkhārā* and *viññāṇa* via “*avijjā paccayā saṅkhārā*” and “*saṅkhārā paccayā viññāṇa*.”
- Of course, totally inert things like rocks do not have *vedanā* and *saññā* either.

Living Beings Have All Four *Nāma Dhammā* (*Vedanā, Saññā, Saṅkhāra, Viññāṇa*)

8. Now, let us go back to the discussion in #1 above. A sensory contact (*phassa*) leads to some mental activity in a living being. We are happy to encounter “pleasing sights, sounds, etc.” and dislike the opposites.

- As we discussed in #1, if we **eat something tasty**, we may generate greedy thoughts of eating more even if we are not hungry. If we **see an enemy X**, we may generate angry thoughts about that person.
- First, in both cases, an idea about enjoying/disliking that contact comes to mind. That is the *mano saṅkhāra* stage.
- Then we start thinking about enjoying/getting rid of that sensory input. This is the *vacī saṅkhāra* stage, EVEN IF we are not saying anything out loud. Talking oneself — as well as talking — involves *vacī saṅkhāra*. In this case, two types of *cetasika* (*vitakka* and *vicāra*) are involved.
- If one really gets “attached” (via like or dislike) to that *ārammaṇa*, one may take physical actions. Such physical actions are done with *kāya saṅkhāra* that arise in mind.

Two Types of *Viññāṇa*

9. **In the beginning of a *cakkhudvāra citta vīthi***, we “see” the image. This is the *cakkhu viññāṇa*. It is a visual **sensing experience**, and it is a ***vipāka viññāṇa***. These *citta* DO NOT have *javana* power to create new *kamma*. They experience the presence of a *rūpa* (sight, sound, taste, etc.). Thus *cakkhu*, *sota*, *ghāna*, *jivhā*, and *kāya viññāṇa* are ALWAYS ***vipāka viññāṇa***.

- If we “attach” to what we saw/ate, etc., we start **generating *vaci* and *kāya saṅkhāra***. That is when we start acting with *avijjā* and generate ***kamma viññāṇa*** via “*avijjā paccayā saṅkhārā*” and “*saṅkhārā paccayā viññāṇa*.” Such *kamma viññāṇa* are EXCLUSIVELY *mano viññāṇa*. The unique aspect here is the presence of *javana citta*.
- That ***kamma generation*** happens with *javana citta* **in the second stage of a *citta vīthi***, as we will discuss. However, *mano viññāṇa* can be *vipāka viññāṇa* too (for example, when we recall memories).

- Such *javana citta* (generating new *kamma* via ***kamma viññāṇa***) are absent in the *citta vīthi* of *Arahants*. However, *Arahants* do experience the ***vipāka viññāṇa***. That is another way to see the difference between ***kamma viññāṇa*** and ***vipāka viññāṇa***.
- We will be able to clearly see that there are two types of *viññāṇa* when we analyze a *citta vīthi* in upcoming posts.

References

1. “[How Do We See? – Role of the Gandhabba](#),”
2. “[WebLink: suttacentral: Āyatanavibhaṅga](#)” explains a *āyatana* as follows:
Dvādasāyatanāni— cakkhāyatanam, sotāyatanam, ghāṇāyatanam, jivhāyatanam, kāyāyatanam, manāyatanam, rūpāyatanam, saddāyatanam, gandhāyatanam, rasāyatanam, phoṭṭhabbāyatanam, dhammāyatanam.
Tattha katamaṃ cakkhāyatanam? Yaṃ cakkhu catunnaṃ mahābhūtānaṃ upādāya pasādo attabhāva-pariyāpanno anidassano sappaṭigho, yena cakkhunā anidassanena sappaṭighena rūpaṃ sanidassanaṃ sappaṭighaṃ passi vā passati vā passissati vā passe vā, cakkhumpetam cakkhāyatanampetaṃ cakkhudhātupesā cakkhundriyampetaṃ lokopeso dvārāpesā samuddopeso paṇḍarampetam khetampetaṃ vatthumpetaṃ nettampetaṃ nayanampetaṃ orimaṃ tīrampetaṃ suñño gāmapeso. Idam vuccati “cakkhāyatanam”.
 - The others are explained similarly.
 - In the above verse, “*anidassano*” means “cannot be seen.” Thus, ***cakkhāyatana*** is not the physical eye. It refers to ***cakkhu pasāda rūpa*** in the mental body (*gandhabba*) that cannot be seen. As we know, in Out-of-Body Experiences, that *gandhabba* comes out of the physical body and can see without physical eyes. Details at “[How Do We See? – Role of the Gandhabba](#).”
3. “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”

9.7.5 Pañcupādānakkhandha – Arises With an Ārammaṇa

January 20, 2021; revised January 21, 2021 (#2, #6, #8, #9); October 3, 2021; November 5, 2023

New Title November 05, 2023: **Pañcupādānakkhandha – Arises With an Ārammaṇa** [Old Title since January 20, 2021: **Arising of the Five Aggregates With an Ārammaṇa**]

Pañcupādānakkhandha (PUK) arises when a sensory object (*ārammaṇa*) comes to mind via any of the six senses.

***Pañcakkhandha* Arises Only for an Arahant**

1. For anyone below the *Arahant* stage, it is the *pañcupādānakkhandha* (PUK) that arises with sensory input (*ārammaṇa*.) The uncontaminated Five Aggregates (*pañcakkhandha*) arise only in an *Arahant*.
 - Arising of the PUK happens with the creation of a “mental image” of a thought-object (“*ārammaṇa*.”) **When we see an object, the mind re-creates its own version of that object from the very beginning**; see “[Does “Anatta” Refer to a “Self”?](#)”
 - When we taste food, the mind prepares its own version of that taste. That taste is based on the initial “*kāma saññā*.”
 - All six sensory inputs work that way. In other words, PUK is one’s own. **This is why different people respond differently to the same sensory event.** [*ārammaṇa* (where the mind dwells) is also called

ālambana (to hang [hold] on to). *ālambana* :[nt.] 1. a sense-object; 2. hanging down from; 3. support.]

- This is a critical post to understand. Also see: “[Understanding the Terms in Paṭicca Samuppāda](#)” and the references provided here.

Paṭicca Samuppāda (PS) Cycles Start with an Ārammaṇa (Focus of Thoughts)

2. The standard PS cycle starts with “*avijjā paccayā saṅkhārā*.” However, we do not spontaneously start generating *saṅkhārā*. **We start generating *saṅkhārā* based on an *ārammaṇa* (thought object) that we like or dislike.**

- ***Cakkhu viññāṇa***, for example, arises when *cakkhu* (*cakkhu pasāda rūpa*) makes contact (*phassa*) with the *rūpa* (an image of the object seen). In the *suttas*, that is stated as, “*cakkuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇam*.” See the previous post, “[Phassa \(Contact\) – Contact With Pasāda Rūpa](#).”
- Different people respond differently to the same sensory input. **Furthermore, that response is swift.** We have discussed several examples in [Ref. 1](#).
- A new series of thoughts (*citta vīthi*) starts with a new *ārammaṇa*.

Figuring Out Which Sense Faculty (*Pañcadvārāvajjana Citta*)

3. For example, suppose person X is relaxing at his desk during his lunch break. His mind is not focused on any specific task. It is said to be in the “*bhavaṅga*” state. I have discussed the “*bhavaṅga*” state in “[State of Mind in the Absence of Citta Vīthi – Bhavaṅga](#).”

- Now, an unfriendly co-worker walks into the office. Person X looks up from the desk and sees the unfriendly co-worker. **There are two *cittās* involved in that action.** One is the ***pañcadvārāvajjana citta*** to investigate “which of the five senses causes the disturbance.” Then X realized that it is coming through the eye *indriya*, i.e., it is a ***cakkhudvāra citta*** giving rise to ***cakkhu viññāṇa***.
- We discussed the basic aspects of a *citta vīthi* in the previous post; see [Ref. 2](#). **Up to now, the *citta vīthi* has gone through 5 *cittā* in a *citta vīthi* with 17 *cittā*.** “Releasing the mind from the *bhavaṅga* state” takes 3 *cittā*. **I will discuss that later.**
- So, the series of events start with “seeing the unfriendly co-worker.” That is a *cakkhu viññāṇa*. That happened without X taking the initiative. Any event that happens without taking the initiative is a *kamma vipāka*. Therefore, that *cakkhu viññāṇa* is a *vipāka viññāṇa*. His focus of attention was shifted due to the sight of the co-worker.
- That sight led to the arising of “bad thoughts with anger” in his mind instantaneously. He may then possibly react by saying something bad to the co-worker. That development (response to the *cakkhu viññāṇa*) **happens at the later stage of the same *citta vīthi*!**
- First, we discuss what happens with a single *citta* bringing a new sensory input, i.e., the ***cakkhudvāra citta*** giving rise to ***cakkhu viññāṇa***.

Initiation of a Sensory Event Can be at One of Six Senses

4. In the above example, seeing the co-worker started with “*cakkuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*.”

- Our attention abruptly changes when we encounter a new sensory input. That could come via any of the six senses, including the mind by itself. For example, we may be doing something, and all of a sudden,

thoughts about an old friend may come to mind. That happens via “*manañca paṭicca dhamme ca uppajjati manoviññāṇam.*”

- Of course, switching among several different *ārammaṇa* can happen in rapid succession. When we watch a movie, we see the movie screen and hear the dialogue. They switch so rapidly that we feel that watching and hearing happen simultaneously! We discussed a simple example in #4 of [Ref. 2](#).

Two Possible Meanings of “*Paṭicca*”

5. Going back to our example, seeing the co-worker starts with “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam.*” Therefore, a *cakkhu viññāṇa* arises when a *rūpa* (the figure of the co-worker) makes contact (*paṭicca*) with *cakkhu pasāda rūpā*.

- That *cakkhu viññāṇa* arises with a single *citta*, which is one of the 17 *cittā* in a *citta vūthi*.
- By the way, “*paticca*” has TWO possible meanings, depending on the context. The term “***Paṭicca Samuppāda***,” it means “getting attached willingly” or “***pati***” + “***icca***” (“*pati*” means to “bind.”) See [Ref. 3](#).
- However, in the above verse, *paticca* implies “**two entities (that are compatible) making contact.**” A *rūpa* does not “make contact” with one of the other four *indriya* like ears or nose. Similarly, a sound does not “make contact” with the eyes or the nose. The Buddha explained that a wick would soak up oil because wick and oil are compatible and will “*paṭicca*” ([Ref. 4](#).)

The Role of Universal *Cetasika*

6. A complex process happens in mind during the event of “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam.*” **That process happens in that single *citta* which lives only for less than a billionth of a second.** Only a Buddha can discern something that can happen that fast. We can verify that to be true only by seeing that it is compatible/consistent with nature.

- That “contact” between “the image of a *rūpa*” and “*cakkhu pasāda rūpā*” is made by the “*phassa*” *cetasika* that arises with that *citta*.
- Then that “event” is registered in the mind as a *sukha*, *dukkha*, or *adukkhamasukha vedanā* (pleasant, unpleasant, or neutral feeling.) The “*vedanā*” *cetasika* is responsible for that.
- Then the mind recognizes the object with the “*saññā*” *cetasika*.
- During the SAME *citta* (where *cakkhu viññāṇa* arises,) a bit more complex process happens that involves the “*cetanā*” *cetasika*.

How Does Cognition/Recognition (*Saññā*) Happen In a Single *Citta*?

7. An unimaginably complex process occurs during that SAME *cakkhudvāra citta*, which lasts only a billionth of a second.

- The mind needs to compare it with previous experiences to identify that object. For example, recognizing the co-worker in the example discussed in #2 above requires comparing the image just received with one’s previous experiences. Otherwise, how does the mind recognize the person who walked in to be a co-worker and that one has had bad experiences with him in the past?
- That ultra-fast recognition (*saññā*) happens with the aid of the *manasikāra cetasika*. To get an idea of what happens when we recognize an object, see the video below (especially starting at 3:30 minutes):

[WebLink: youtube: What is a Thought? How the Brain Creates New Ideas | Henning Beck | TEDxHHL](#)

8. At 3:30 minutes, we see a “face” made up of fruits and vegetables. Even though it is not a real human face, it takes us a split second to realize that it represents a face.

- Mr. Beck points out that a computer will never recognize the human face's representation depicted there. However, AI systems like Chat GPT (launched in 2023) can do that. But it requires training a "billion-parameter neural net" that costs billions of dollars.
- At 9:00 minutes, he starts a discussion on identifying a chair. Again, a computer runs into a problem identifying "less obvious" structures that can serve as chairs.
- In both these instances, what the computer is missing is *saññā* (loosely translated to English as "perception"). Even animals can recognize objects relevant to their survival. For example, a dog can instantly recognize its owners and any other pets living in the house. It can recognize foods that it likes, etc. See "[Saññā – What It Really Means](#)." Also, see [Ref. 5](#).
- During **that same *citta***, more processes happen to make that recognition possible.

Creation of an Image of the External Object in the Mind by the *Cetanā Cetasika*

9. For that recognition to occur, another important *cetasika* of "*cetana*" comes into play. **It CREATES a "*cittaja rūpa*" (a *rūpa* created by the mind) according to one's *gati/anusaya*.** This is a CRITICAL point that we will discuss in more detail. The "*saṅkhārā*" aggregate represents this process. For those familiar with *Abhidhamma*, this is where "*mano saṅkhārā*" arises AUTOMATICALLY.

- It is the *manasikāra cetasika* that helps incorporate one's past experiences, future hopes, etc. (represented by *gati/anusaya*) and helps the *cetana* make that "*cittaja rūpa*" or the "mental picture." **It is that "mental picture" that we "see" or "experience."**
- There are two more *cetasika* that ALWAYS arise with any *citta*: *ekaggatā* and *jīvitindriya*. The *jīvitindriya cetasika* keeps the *hadaya vatthu* alive (with *kammic* energy). *Ekaggatā cetasika* keeps the mind on that particular *ārammaṇa* (in this case, a *rūpa rūpa* or a sight.)
- **The above description is at the heart of all mental phenomena**, i.e., creating a "mind-made image." In the recent post, "[How Do We See? – Role of the Gandhabba](#)," we asked the question, "How do we see?" **The answer is in the above description.** Please re-read that post, and things will become more clear.

Connection to *Pañcupādānakkhandha* (PUK)

10. The above description also explains how the five aggregates arise in that single *cakkhudvāra citta* representing the first instance of "experiencing a visual sensory input."

- The "***rūpa* aggregate**" is represented by the "***phassa***" *cetasika*.
- *Vedanā* and *saññā cetasika* generate the "***vedanā* aggregate**" and the "***saññā* aggregate**."
- The *cetanā cetasika* plays a key role in generating "***saṅkhāra* aggregate**" with the help of the other six *cetasika*. This is where the mind CREATES its own version of the sense object, a visual *rūpa* in this case.
- **We experience only a "mind-made image" of the external *rūpa* that is out there in the physical world.** Thus, the *viññāṇa* aggregate arises from the above processes' overall effect.
- That is how the Five Aggregates arise with ANY sensory input via one of the six senses.

Arising of *Pañcupādānakkhandha* in a Single *Citta*!

11. That is how the five aggregates arise within that single *cakkhudvāra citta*. **The same process takes place for any *ārammaṇa* coming through any of the six senses.**

- The five aggregates arise due to the *cetasika* of *phassa*, *vedanā*, *saññā*, and *cetanā*. However, all SEVEN *cetasika* (*phassa*, *vedanā*, *saññā*, *cetanā*, *manasikāra*, *ekaggatā*, and *jīvitindriya*) are essential ingredients of ANY *citta*.
- Those 7 *cetasika* arise with all *citta* and thus are universal (*sabba citta sādhāraṇa*) *cetasika*.
- The above process takes place in all types of sensory experiences. The sound we hear is not the “real sound,” but it is “modified” according to one’s *gati/anusaya*. The same is true for all 6 sensory experiences, including smells, tastes, touches, and concepts (*dhammā*).

The Same Person Could be Perceived as Likeable or Unlikeable

12. Suppose two strangers (with opposite political views) watch TV in a bar while having their drinks. A famous politician comes on TV.

- At that moment, one person’s face gets darkened, and angry thoughts arise in him. Simultaneously, the other person’s face brightens up, and pleasant thoughts arise in him.
- How is that possible? It was the same picture that they were looking at.
- The reason is what we discussed above. The “mental image” formed in one person’s mind depicts a “bad person.” On the other hand, the other person’s mind had created a “bad picture” that gave rise to bad thoughts.
- We can think of many examples. I have discussed another example in [Ref. 1](#).

Viññāṇa Is a Magician!

13. The above description explains why the Buddha called *viññāṇa* a “magician” ([Ref. 6](#)). What we experience as *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano viññāṇa* DO NOT represent reality. It is like looking at the world with tinted glasses. Depending on the level of defilements in the mind (i.e., *gati/anusaya*), the sensory experience is biased.

- This was explained with examples in the posts, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” (especially see #4 to #6) and “[The Amazing Mind – Critical Role of Nāmagotta \(Memories\)](#).” It is essential to read all relevant posts and understand these fundamental ideas.
- I will continue the discussion in the next post. Please make sure to read all the relevant posts. Otherwise, future posts will not make sense.
- The mind is an amazing entity. It is unbelievably fast. That is why we are fooled into thinking that there are fruitful things that will please us. However, the reality is different. There is unimaginable suffering hidden in enticing “sense pleasures” or *kāma rāga*.
- **That can be seen not with eyes but with wisdom.** That is the *yathābhūta ñāṇa*, the wisdom to “see” the real nature with wisdom. As we discuss further, that real picture will become clear.

In the “[WebLink: suttacentral: Saṃyojana Sutta \(SN 44.9\)](#),” the Buddha explains, “*Seyyathāpi, bhikkhave, telaṇca paṭicca vaṭṭiṇca paṭicca telappadīpo jhāyeyya*” OR “*Bhikkhus, an oil lamp burns in dependence on oil and a wick.*” An old fashioned oil lamp has a wick partially immersed in oil. That oil soaks the wick, gets to the tip of the burning wick, and sustains the flame. Therefore, oil and wick are

compatible and will “*paṭicca*.” If one puts a metal rod in oil, the oil will not soak the metal, i.e., they are not compatible and thus would not *paṭicca*.

9.8 How Are Paṭicca Samuppāda Cycles Initiated?

November 6, 2015; Major revision October 13, 2017; #12 added November 3, 2017; January 8, 2021; March 29, 2023

Paṭicca Samuppāda (PS) cycles have many varieties and can be analyzed in great detail reveal subtle aspects and clarify our understanding of the world we live in.

Two Categories of PS Cycles

1. There are two broad categories of PS cycles.

- i. The standard *Paṭicca Samuppāda* describes how our actions (*saṅkhāra*) lead to the generation of new *kammā*. Thus they could be called “*kammā generating*” PS cycles.
- ii. The other category of PS cycles is responsible for bringing in *kammā vipāka*, and thus could be called “*vipāka generating*” PS; this type of a PS cycle is labeled in the *Tipiṭaka* as an *avyākata* PS; *avyākata* means “*kammicaly neutral*”; not generating new *kammā*. The Pāli word is *avyākata*, and the Sinhala word is *avyākruta*. But in many places, it is written as *abyākata*.

Sensory Experience Starts With *Avyākata* PS

2. Everything that we INITIALLY EXPERIENCE is due to a *kammā vipāka* and is brought in by an *avyākata* PS. That PS process makes us see, hear, smell, taste, experience bodily sensations, and bring new thoughts to mind.

- However, the feelings (*vedanā*) that we experience due to such sensory inputs are not the same for different persons, except in the case of bodily sensations. Everyone feels the same if getting hit (pain), or getting a good massage (pleasure).
- The other five sensory inputs initially bring “neutral *vedanā*” as *vipāka*. However, mind-made *samphassa-jā-vedanā* are generated depending on the person. For example, a teenager may like a heavy metal song, but his grandfather may not. See “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”
- In all cases, each person RESPONDS to the sensory input in one’s own way. This response may lead to new *kammā* and is described by the “*kammā generating*” PS cycles.

We Don’t Have Control Over *Avyākata* PS

3. We do not have control over the *avyākata* PS — which brings *kammā vipāka* by initiating new sense events; once started, they cannot be stopped. Even *Arahants* cannot avoid *kammā vipāka*.

- But the “*kammā generating*” PS cycles that arise as our response to such sense events can be controlled by us based on our *gati* (*saṃsāric* habits). This is the basis of *Satipaṭṭhāna/Ānāpāna* meditations.
- *Avyākata* PS bring *kammā vipāka* when suitable conditions are available; see, “[Anantara Samanantara Paccaya.](#)”

Avyākata PS May Lead to New *Kamma*

4. Now, depending on what we see, hear, etc due to a *kammā vipāka*, we MAY start making *saṅkhāra*, and a new “*kammā generating*” PS cycle may be initiated; then we make more *kammā vipāka*.

- For example, **when we see** an appealing object, we may generate *lobha* (greedy) thoughts (*apuññābhi saṅkhāra*); **when we see** a distasteful object, we may generate hateful thoughts (*apuññābhi saṅkhāra*). **If we see** a beggar on the street, we may generate *alobha* thoughts (*puññābhi saṅkhāra*), which may lead to a meritorious act (giving some money to that person).

- All those “seeing events” arose due to *avyākata* PS cycles. But those different responses, generating *saṅkhāra*, were done by “*kammā* generating” PS cycles, that operate based on one’s *gati* (*samsāric* habits), as will discuss below.

Not All *Avyākata* PS Lead to New *Kamma*

5. **ALL** our actions are initiated by *avyākata* PS cycles; but not all *avyākata* PS cycles lead to “*kammā* generating” PS cycles generating new *kammā*. You may want to think about this and see if it is true.

- Thousands of people see an item on display in a shop. Many glances at it and don’t give it another thought. Some will stop and take another look since they like it. There could also be someone who really wanted it, but may not have money, and even think about stealing it!
- There is no “fixed person with *avijjā*.” *Avijjā* can arise in any normal human (without *magga phala*), if the sensory input is strong enough! You may also want to read the post [“Self and no-self: A Simple Analysis – Do We Always Act with Avijjā?”](#)
- Whether *avijjā* arises depends on the particular sense input and the person (more correctly, the person’s *gati*).

6. We do not even notice most of these sense events. When we travel in a car, we see a million things, but only a few “catch our attention.” Only those few events lead to the initiation of “*kammā* generating” PS cycles.

- But even one initiation of a “*kammā* generating” PS cycle can, in turn, initiate many “follow-up” PS cycles. For example, while walking, we may see a house by the road we like (due to a *kammā vipāka*). We may get attached to it (form *taṇhā*), and then start thinking about building a house like that. Then we may remember a nice house that belongs to a friend, and then start thinking about that friend, which could lead to thinking about a common enemy. Suddenly, we have started a stronger “*kammā* generating” PS cycle that could lead to a worse *kammā vipāka*.
- This is the “wheeling process” that we discussed in the post [“Nibbāna – Is it Difficult to Understand?”](#) and many other posts; enter the keywords “wheeling process” in the Search box at the top right, and you will get many posts. Our *samsāric* journey is fueled by uncountable “*kammā* generating” PS cycles.

Kamma to *Vipāka* to *Kamma* – *Samsāric* Journey

7. This vicious cycle of “*vipāka*” leading to “*kammā*” leading to more “*vipāka*” is the process that binds us to the *samsāra* of endless rebirths, or perpetuates our “world” of suffering.

- The Buddha describes this as, “*kammā vipākā vaddanti, vipāko kamma sambhavo, tasmā punabbhavo hoti, evan loko pavattati.*”
- That means, “*kammā* lead to *vipāka*, *vipāka*, in turn, lead to *kammā* and thus to rebirth (*punabbhavo*), and that is how the world (existence) is maintained.”
- There “*sambhava*” is “*saṅ*” + “*bhava*,” or “adding more existences.” Also, “*loka*” is the world, and “*pavatta*” means “maintain.”

“Moral” Is Relative – Any Pothujjana Can Act Morally or Immorally

8. We usually call a person “moral” when he/she acts morally in most cases.

However, that does not mean that a “moral person” will not generate immoral thoughts at times. If a “tempting sense input comes in” via any of the six senses, he/she may act with *avijjā* and start an *Akusala-Mūla* PS.

- Similarly, one labeled as a criminal (because of his prior acts) may see someone in danger and act with kindness, initiating a meritorious deed.
- This is why the Buddha said there is no “unchanging self,” but there is no “self” either. What happens at a given moment depends on what kind of PS cycle is “triggered,” and the level of *avijjā* triggered. *avijjā* can range from *moha* (morally blind) to just not knowing the *anicca* nature.
- Any “average human (*pothujjana*) is considered to be “moral” might act with *moha* and commit a severely immoral act if the trigger was tempting enough.

Stopping the *Saṃsāric* Journey

9. The key point is that unless one has at least attained the *Sotāpanna* stage, one COULD act with *avijjā* at the level of *moha*, and generate *kammā* (*saṅkhāra*) that COULD generate *kammā bhava* corresponding to possible birth in the four lowest realms (*apāyā*).

- In other words, depending on the trigger, it is possible for the *pañcanīvaraṇa* to “cover the mind” and initiate strong *Akusala-Mūla* PS cycles for any human being not yet attained the *Sotāpanna* stage.
- For example, we have heard stories about people with “good moral backgrounds” committing rape, under conditions that led to *kāmacchanda nīvaraṇa* taking over their minds. *Kāmacchanda* comes from “*kāma + iccha + andha*,” where *iccha* is liking, and *andha* is blind; thus, *kāmacchanda* means “blinded by *kāma* or sense pleasures.”
- We have also heard stories about murders that were committed by “moral people” who were enraged by the sight of their spouse in bed with another person. Here the second *nīvaraṇa*, *vyāpāda*, covered their minds.
- Those two are the strongest *nīvaraṇa*, but we can think about cases when the other three also could lead to immoral acts: *thina middha* (frozen or lazy mind), *uddhacca kukkucca* (tendency to do lowly things with high-mindedness), and *vicikicchā* (tendency to do unwise things due to not knowing the *anicca* nature).

10. When one attains the *Sotāpanna* stage, the COARSE level of *pañcanīvaraṇa* (that can lead to rebirths in *apāyā*) is permanently removed.

- That is why **potent *Akusala-Mūla* PS cycles** — which could lead to rebirths in the *apāyā* — are not triggered for a *Sotāpanna*; see “[Key to Calming the Mind – The Five Hindrances](#).”
- One’s *gati* permanently changes with *magga phala*. More changes happen at higher *magga phala*.

More Information

11. Different types of PS cycles are discussed in: “[Paṭicca Samuppāda Cycles](#).”

- The *avyākata* PS is discussed in the post, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna](#).”
- The “*kammā* generating” PS processes can be divided into two broad categories again: those generating “bad *kammā*” and “good *kammā*”: “[Akusala-Mūla Paṭicca Samuppāda](#)” and “[Kusala-mūla Paṭicca Samuppāda](#).”
- Those “*kammā* generating” PS processes where one can see the consequences during this life itself are discussed in “[Idappaccayatā Paṭicca Samuppāda](#).”
- There can be many other types too. But one can get a good idea of how PS works in different situations and can be grasped by understanding those key processes.
- A bottom-up approach to PS processes is discussed in “[Understanding the Terms in Paṭicca Samuppāda](#).”

12. Finally, there is another important way that we start generating new *kamma*. This is when we “get random thoughts coming to our minds that get us started on a pleasurable activity.”

- For example, we may be doing something, and all of a sudden, we get a thought about watching a movie or even start thinking about an enemy and what can be done to him/her. These are initiated by “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*,” where *dhammā* coming to our minds; see, “[What are rūpa? – Dhamma are rūpa too!](#).”
- These are also *kamma vipāka*. These are more common than *vipāka* coming through the other five senses; for example, just seeing an enemy by chance, hearing something one likes, etc.
- In either case, we must always be mindful and catch such “new *kamma* generations.” This is the key to *Ānāpāna/Satipaṭṭhāna Bhāvanā*.

9.9.1 Avyākata Paṭicca Samuppāda for Vipāka Viññāna

October 17, 2017; revised September 15, 2020; December 22, 2023; January 11, 2024

1. First, a word about the nomenclature: The Pāli word is *avyākata* (or *abyākata*) and the Sinhala word is *avyākruta*. It means “not designated as *kusala* or *akusala* kamma that can bring vipāka in the future, i.e., *kammically neutral*”; no *javana citta* are involved. See “[Purāna and Nava Kamma – Sequence of Kamma Generation](#).”

- *Kamma vipāka* are *kammically neutral*. But based on *kamma vipāka*, we initiate new *kamma*; see, “[How Are Paticca Samuppāda Cycles Initiated?](#).” I recommend reading that first, before continuing to this post.
- Both categories — *kamma vipāka* and *kamma* generation — can be described by *Paṭicca Samuppāda* (PS).
- Another key point I want to point out is that *avyākata* PS cycles NEVER start with a *pabhassara citta* [pure uncontaminated *citta*]; see below.

2. Our physical body arose due to a past *kamma vipāka*. It can bring sensory inputs via the six senses, and IF we get attached — *taṇhā* — to those sensory inputs, THEN that leads to new *kamma* by us. That is why it is a never-ending process, until one attains *Nibbāna*. After the *Arahanthood*, one will still experience such *kamma vipāka* (until the death of the physical body) but WILL NOT get attached to them, i.e., no new *kamma* will be generated.

This cyclic process can be described in three steps:

- i. One sees, hears, smells, tastes, makes body contacts, or a “*dhammā*” comes to one’s mind. These do not “just happen”; they happen due to reasons (causes). They come about due to *kamma vipāka*, and those thoughts that arise from them are called *vipāka citta* OR *avyākata citta*, since they are *kammically neutral*.
 - ii. Then, based on one’s *gati* (pronounced “gathi”), *āsava*, *anusaya*, one’s mind may automatically get interested in a sensory input (called an *ārammaṇa*), and may get attached to that sensory input. This happens within a billionth of a second, and we DO NOT have control over that initial response either; *mano saṅkhāra* are generated AUTOMATICALLY in one’s mind. These are also part of the *avyākata citta* since they arise AUTOMATICALLY within the same *citta vīthi* (at the beginning of the *citta vīthi*, as explained below.)
 - iii. IF one gets attached, then one starts generating new *kamma* by thinking CONSCIOUSLY about that sense input (generating *vacī saṅkhāra*), i.e., one starts “wheeling around” accumulating “*saṇ*” that contributes to new *kamma*; see, “[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka](#).” That new *kamma* can get stronger if we may also start doing *kāya saṅkhāra* via speech and bodily actions.
3. All those three steps start even before our minds register that we have started accumulating new *kamma*. This is because a *citta vīthi* are very fast; see below. But if we are mindful, we can “catch” such “wheeling around” within a few seconds and stop just the *apuññābhi saṅkhāra* (we should not stop *puññābhi saṅkhāra* or moral thoughts).

- But that requires careful monitoring of our “automatic responses” to such sense inputs, i.e., “being mindful.” With practice, one can “catch” them quickly and stop immoral thoughts/speech/actions.
- If we keep doing that, then OVER TIME, our *gati* will change for the better, and our attachments to “bad things” will fade away; see, “[Difference Between Tanhā and Upādāna](#).” What is described in that post is the basis of *Satipaṭṭhāna/Ānāpānasati Bhāvanā*. If one can grasp this concept, and implement it diligently over a few months, one will be able to see for oneself the benefits!
- Also see, “[Gati, Bhava, and Jāti](#)” to read about the critical concept of *gati*. **It is incorrect to say we have a “self” or “no-self”; we only have *gati* that can be changed.**
- One can try it with “bad habits” (smoking, drugs, over-eating, etc.) first to see the power of it, and then extend to other *dasa akusala*. This guides the way to the *Sotāpanna* stage because that will make it easier to grasp *Tilakkhaṇa*.

4. It is very important to understand the above steps, and the post “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#)” is a necessary first read too. What happens is explained in a bit more detail in “[Vedanā \(Feelings\) Arise in Two Ways](#),” “[Kāma Assāda Start with Phassa Paccayā Vedanā or Samphassa Jā vedanā](#),” and has been discussed more fundamentally in the subsection: [Living Dhamma – Fundamentals](#).”

- Grasping this cyclic process of traversing this suffering-filled rebirth process can be very helpful but one must be willing to spend some time on those posts.

5. All PS processes can be broadly divided into three categories:

- i. What we will discuss in this post is how past *kamma vipāka* bring in sense inputs via the *avyākata* (Sinhala: *avyākruta*) PS process, and also automatically generate *mano saṅkhāra*.
- ii. Then *Akusala-Mūla* PS processes may contribute to generating new *kamma* that extends the rebirth process. These also start within seconds, but as mentioned above, we can catch and stop them if we are mindful (*Satipaṭṭhāna/Ānāpānasati*).
- iii. A *kusala kamma* cannot be described by a PS process. A *kusala kamma* is a *puñña kamma* done with the comprehension of Noble Truths/*Paṭicca samuppāda/Tilakkhaṇa*. That will eventually help us attain *Nibbāna* by following the Noble Path. That is also part of *Satipaṭṭhāna/Ānāpānasati*. See “[Sotāpanna Stage via Understanding Perception \(Saññā\)](#)” for details.

The *Akusala-Mūla* PS process is discussed in: “[Paṭicca Samuppāda Cycles](#).” So, this post on *avyākata* (*avyākruta* in Sanskrit) PS process will complete that subsection. As noted below in #15, a *citta vūthi* contains both the *Avyākata* and *Akusala-Mūla* PS processes.

6. Now, we can make the connection between the categories in #2 and the categories in #5.

- The sensory inputs initiation #2 (i), and the initial response to it #2(ii), are generated by the *avyākata* PS process of #5(i).
- Our CONSCIOUS response to those sensory inputs in creating new *kamma* (*apuññābhisaṅkhāra* or *puññābhisaṅkhāra*) in #2(iii), is carried out by the two kinds of PS processes in #5(ii) and #5(iii).

7. This *avyākata* PS process is not discussed in current *Theravāda* texts including *Visuddhimagga*. It is, of course, in the *Tiṭṭaka*, and only the Pāli version is available at: “[WebLink: suttacentral: Paṭicca Samuppāda Vibhaṅga \(Vb 6\)](#)” (Section 2.11 on *Abyākata Niddesa* is about three-quarters of the way down from the top).

- I have not seen any current texts or internet sites in English that describe the *avyākata* PS process. But it is needed to complete the picture of how *kamma vipāka* brings in sensory inputs to us AND initiate new *kamma*.

8. Here is the initiation of the *avyākata* PS process per *Tiṭṭaka* reference in #7 above: “..*vipākam cakkhuvīññāṇam* uppannam hoti *upekkhā sahaḡatam rūpārammaṇam*, tasmim samaye *saṅkhāra paccayā viññāṇam*, *viññāṇa paccayā nāmaṁ*, *nāma paccayā chaṭṭhāyatanaṁ*, *chaṭṭhāyatana*

paccayā phasso, phassa paccayā vedanā, vedanā paccayā bhavo, bhava paccayā jāti, jāti paccayā jarāmaraṇaṃ. Evametassa kevalassa dukkhakkhandhassa samudayo hoti.” [Weblink: [suttacentral: 2.11. Abyākataniddesa 2.11 Ahetukakusalavipākacitta 2.11.1.1 Ahetukakusalavipākacitta 2.11.1.1.1. Cakkhuviññānacitta](#)]

- We can translate the initial part of this verse as, “..when a *rūpārammaṇa* (seeing an object) gives rise to a *vipāka cakkhu viññāṇa* with **neutral feelings** (i.e., just seeing)...”
- Thus, the “seeing” event is a neutral *vedanā*, as are all *vipāka* that come through all senses except the body: Only *kāya viññāṇa* — coming through the physical body — can directly generate *sukha* or *dukkha vedanā* due to *kamma vipāka* (as in getting hit by something or getting a massage).
- The other five types of sensory inputs generate only neutral feelings at the moment of receiving (*adukkhamasukha vedanā*). This is an important point to grasp. All these, like seeing, and hearing, could generate “good or bad feelings” based on our *gati*, and those secondary feelings arise moments later (even though we cannot perceive that because it is so quick).
- But we can see that, for example, some may generate “good feelings” and others may generate “bad feelings” upon hearing the same song. Seeing the same politician may cause “good feelings” in his supporters, “bad feelings” in those in the opposite party, and neutral feelings in others.

9. Unless it is pre-planned, a seeing event (any sense event) is initiated by a *kamma vipāka*. (However, deciding to see a movie is a deliberate action, in which case the natural starting point is an idea or a *dhamma* coming to the mind as a *kamma vipāka*; think about it!)

- Again, it is essential to grasp that a seeing event itself is a neutral event (*upekkhāsahagatam rūpārammaṇaṃ*) EVEN IF it is the seeing of a suitable object or an undesired object. “Good or bad” is a relative thing depending not on the object but only on one’s *gati*, as explained in #8 above.
- One way to think about it is that this initial *cakkhu viññāṇa* is just “seeing,” i.e., like taking a picture with a camera.

10. In the same way, *sota viññāṇa* is just the “hearing,” *ghāṇa viññāṇa* is just the “smelling,” etc. Whether they are “good or bad *vedanā*” depends on the individual.

- When that image is presented to the mind, it instantly matches the image with one’s cravings, likes, and dislikes (i.e., *gati*), and *mano saṅkhāra* are generated AUTOMATICALLY, leading to *viññāṇa*.
- Now, this second *viññāṇa* is the *viññāṇa* which has incorporated one’s *gati*, not the *cakkhu viññāṇa* captured by the eyes; of course, *cakkhu viññāṇa* is also **registered** in the mind.

11. This is explained in the next step in #8 above, “*tasmim samaye* (at that time) *saṅkhāra paccayā viññāṇaṃ, viññāṇa paccayā nāmaṃ, nāma paccayā chaṭṭhāyatanaṃ, chaṭṭhāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā bhavo, bhava paccayā jāti, jāti paccayā jarāmaraṇaṃ. Evametassa kevalassa dukkhakkhandhassa samudayo hoti.*”

This is the *avyākata* PS due to the *kamma vipāka*.

- Note that this PS process differs from an *Akusala-Mūla* PS process; see the highlighted part of the *avyākata* PS above.
- First, it does not start with “*avijjā paccayā saṅkhāra.*” There will be no *kamma* done with *avijjā*. This is just a *kamma vipāka*. However, the mind is contaminated from the beginning. That statement requires a detailed discussion: “[Sotāpanna Stage via Understanding Perception \(Saññā\)](#).”

12. Without going into this complex process, only the person’s mindset is changed based on the contact (*phassa*) of the *ārammaṇa* with the *gati* of the individual.

- We note here that there are no “*nāmarūpa*” involved up to this point, but just “*nāma.*” This is a deeper point, but the generation of “*nāmarūpa*” involves *javana citta* which performs *kamma*. In this *vipāka*

cycle, no *kamma* is done by the mind; the mind matches the “picture” received according to one’s *gati*, and automatically recognizes if it is an object that one likes/dislikes.

- For example, if an alcoholic sees a bottle of his favorite alcohol, he will be temporarily “born” (*jāti*) as an alcoholic at that instant. But if it were a person who has no such *gati*, this process would end right there (just seeing).
- But if it did lead to the person being born in the “alcoholic state”, then a new *Akusala-Mūla* PS process will run inside that *avyākata* PS process starting at the “*bhava paccayā jāti*” step.

13. Therefore, after that *avyākata* PS, new *Akusala-Mūla* PS processes may start. That is the “new *kamma* generation.”

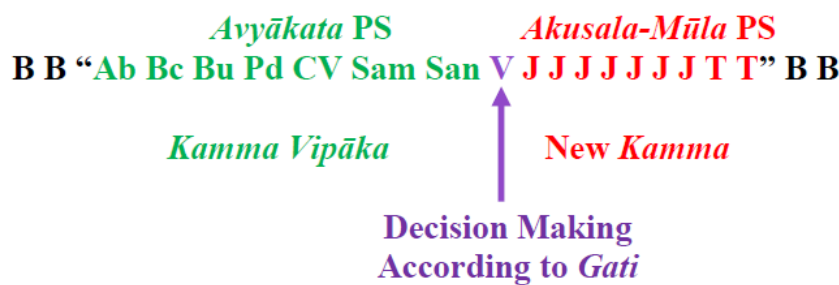

- An *Akusala-Mūla* PS process MAY NOT be initiated even in an average human if he/she did not have *gati* to be attached to that sense input (*ārammaṇa*).
- But that does NOT mean that the *avyākata* PS in that case involved “*pabhassara citta*” or “pure uncontaminated *citta*.” It just means the person did not have *gati* to be interested in that particular sensory input.

14. Both the initial *avyākata* PS and the subsequent *Akusala-Mūla* PS process will take place within the same *citta vīthi* (in the above example a *cakkhudvāra citta vīthi* with 17 *citta*), which lasts only a billionth of a second!

- Such fast processes are not discernible to any human other than a Buddha. But we can study it and realize that it must be correct. In that sense, we must not focus on just this process, but realize that it fits in nicely with any phenomenon that we experience.
- As one learns deeper concepts, it will be difficult not to be amazed by the capabilities of a Buddha. This is how one builds one’s faith (*saddhā*).
- The following discussion will illustrate how the processes that we discussed above fit in nicely with the concept of a *citta vīthi*.

15. The following may not be fully graspable by someone unfamiliar with the details of *citta vīthi*. But read on and try to get the basic idea without worrying about the details.

- The following figure shows a typical thought process (*citta vīthi*) that is started when eyes capture a “seeing event” (*rūpa ārammaṇa* or *rūpārammaṇa*).

B = *bhavaṅga* state, **Ab** = *atīta bhavaṅga*, **Bc** = *bhavaṅga calana*,
Bu = *bhavaṅga upaccheda*, **Pd** = *pañcadvāra vajjana*, **CV** = *cakkhu viññāṇa*,
Sam = *sampaṭicchana*, **San** = *santīraṇa*, **V** = *votthapana*, **J** = *javana*, **T** = *tadārammaṇa*.

B = Life-Continuum, **Ab** = Past *bhavaṅga*, **Bc** = Vibrational *bhavaṅga*,
Bu = Arresting *bhavaṅga*, **Pd** = Five-Door Adverting, **CV** = Eye-Consciousness,
Sam = Receiving, **San** = Investigating, **V** = Determining, **J** = Swift Run (*javana*),
T = Registration.

Click the following link to magnify and download: [WebLink: PDF File: Avyākata Paṭicca Samuppāda](#)

- For a discussion on *citta vīthi*, see, “[Citta vīthi – Processing of Sense Inputs](#).”

16. In between *citta vīthi*, the mind is in the “*bhavaṅga* state”; see, “[Pabhassara Citta, Radiant Mind, and Bhavaṅga](#).” That post is also a bit advanced, and I will try to make a new section on “simple *Abhidhamma*” in the future.

- If you see someone not active and just staring into space (not thinking or concentrating on an idea), then that person's mind is likely to be in the *bhavaṅga* state (**B** in the figure). This is also explained in the post, “[Citta vīthi – Processing of Sense Inputs](#).”
- When the mind switches from this *bhavaṅga* state to a picture that is brought to its attention, it takes three thought moments to “break away” from that *bhavaṅga* state and focus the attention on the new sensory input.
- With the **PD** *citta*, the mind sees it coming through the “eye door” (*cakkhu dvāra*) and in the next *citta* captures that picture. This is the initiation of the *avyākata* PS process: “..*vipākariṃ cakkhuvīññāṇaṃ uppannaṃ hoti*” in #8 above.

17. Then, during the next two *citta* (“**Sam**” for *sampaṭiccana*, and “**Saṇ**” for *santīraṇa*), the mind matches that picture (sense input) with its *gati* and may get attached to it. This is what is described in “*tasmim samaye saṅkhāra paccayā viññāṇaṃ, viññāṇa paccayā nāmaṃ, nāma paccayā chaṭṭhāyatanaṃ, chaṭṭhāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā bhavo, bhava paccayā jāti*.”

- Then the person is “temporarily born” in a different state (a person with “alcoholic *gati*” will be born instantly as an alcoholic upon seeing his/her favorite drink), and may start a new *Akusala-Mūla* PS process, as discussed below.
- That decision to act with *avijjā* based on that “matching” happens at the **all-important** *votthapana* (**V**) *citta*.

18. Then a new *Akusala-Mūla* (or *Kusala-Mūla*) PS process starts and one starts generating *kamma* with *javana citta* (**J**), as shown in the above figure. So, this new PS process starts with the standard, “*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa, viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana,...*”

- Note that now the PS process starts with “*avijjā paccayā saṅkhāra*” and goes through the standard PS process with *saḷāyatana*, etc.
- When this initial *citta vīthi* ends, more such *Akusala-Mūla* PS cycles will follow if one gets “attached.” Even within a second, thousands of such *Akusala-Mūla* PS cycles could run (each becoming stronger due to the past ones), even before one is fully consciously aware of it.
- But as humans (with the neocortex that slows down this fast processing; see, “[True Brain: How the Mind Rewires the Brain via Meditation/Habits](#),” we have the ability to stop those *Akusala-Mūla* PS cycles from building up to doing bad speech and bad actions.
- This is the key to *Satipaṭṭhāna/Ānāpānasati Bhāvanā*: to be mindful and catch any “impulsive wrong actions” before they get out of hand. With practice, one can “catch oneself” very early in this process.

19. This is also why *Satipaṭṭhāna/Ānāpānasati Bhāvanā* cannot just be limited to a “sitting meditation session.” One needs to be engaged and mindful during all waking hours. **Then, with time, our *gati* will improve, and we will stop doing “foolish and damaging things.”**

- Then, our minds will become pure, and we will be able to grasp more of Buddha Dhamma. It is a gradual process, especially initially.

- It should also be clear that one will NOT have a “*pabhassara citta*” [pure uncontaminated *citta*] at any time unless one is an *Arahant*. It should be clear that one can never stop that initial *avyākata citta vīthi*. It is gone within a billionth of a second.
- However, we need to stop those *Akusala-Mūla* PS processes, as soon as we become aware of them. Terminology does not matter if one is doing the correct procedure.

20. Don't be discouraged if you find this post too technical. *Paṭicca Samuppāda* can go to very deep levels. Just get the overall idea; things will become clear.

9.9.2 Akusala-Mūla Upapatti Paṭicca Samuppāda

This is an early post; revised May 10, 2018; March 13, 2021; May 10, 2021; May 13, 2021; re-written May 21, 2021; revised August 18, 2021

Akusala-mūla upapatti Paṭicca Samuppāda describes how our present actions dictate the rebirth process among the 31 realms. [*upapatti* : [f.] birth; rebirth; approach.]

Six Root Causes That Determine Future Births

1. One is born in this world due to the **six root causes**.

- One is born in the *apāyā* or *dugati* (and also subjected to suffering even when born in good realms) due to bad *gati* arising mainly due to ***lobha, dosa, moha***. The two main version of *Akusala-Mūla* PS operate when actions, speech, and thoughts occur with these three root causes; see #2.
- One is born in the remaining “good realms” or *sugati* (and experience mundane sense pleasures) due to good *gati* due to ***alobha, adosa, amoha***. The *kusala-mūla* PS operates when actions, speech, and thoughts occur with these three root causes with the comprehension of the Noble Truths; see “[Kusala-Mūla Paticca Samuppāda](#).” In particular, that post explains why *puññābhisāṅkhāra* (moral deeds) become *kusala* (i.e., truly *alobha, adosa, amoha*) only with an understanding of the Four Noble Truths/*Paṭicca Samuppāda*/Tilakkhaṇa.
- Also, see “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

Two Types of PS Processes Based on *Lobha, Dosa, Moha*

2. *Akusala-mūla* PS describes the PS process when one acts with *lobha, dosa, moha*, the three root causes that bring “bad outcomes.” It is also two-fold:

- The ***upapatti*** PS describes how a “lifestream” or a being makes the *samsāric* journey via repeated births in the 31 realms.
- The ***Idappaccayatā*** PS describes the moment-to-moment progression of a “lifestream” or a being. This is discussed at “[Idappaccayatā Paṭicca Samuppāda](#).”
- It is important to note that Buddhaghosa (in *Visuddhimagga*) described only the *upapatti* PS. In recent times, Waharaka Thero has discussed the *Idappaccayatā* PS in detail.

Upapatti Paṭicca Samuppāda Process

3. Let us now discuss the *upapatti* PS, which describes how the PS cycle goes through a new birth at the end of current life. The steps in this cycle are:

“*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana, saḷāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa,*

soka-parideva-dukkha-domanassupāyāsā sambhavan'ti" [[Weblink: suttacentral: Majjhima Nikāya 115 Bahudhātukasutta](#)]

And that is how this whole mass of suffering arises: “*Evametassa kevalassa dukkhakkhandhassa samudayo hoti*”

Let us briefly discuss those steps.

Saṅkhāra – Thoughts, Speech, Actions Due to Avijjā

4. With ignorance of the Four Noble Truths as a condition, one thinks, speaks, and acts with those “bad root causes” of *lobha*, *dosa*, *moha*. Such thoughts, speech, and actions arise due to *mano*, *vacī*, and *kāya* *saṅkhāra*. We must note that these are really *abhisāṅkhāra*, i.e., they are strong *saṅkhāra*; “*abhi*” means “strong.” See, “[Saṅkhāra – What It Really Means](#).”

- We are born without ANYTHING material other than our tiny baby body, which actually started as a **single cell** in the mother’s womb. We grow up and start acquiring “stuff” both material and non-material: knowledge, material things, friends, spouse, children, fame, etc.
- While we acquire these “things” we also acquire new habits (*gati*) or strengthen ones that we brought from previous lives; these take place according to the *Idappaccayatā* PS at every moment: “*pati + ichcha sama uppāda*,” i.e., **we do things that we like and get similar kind of results**.
- When we die, we take with us only the *kamma* seeds (both good and bad) from our actions; the habits (*gati*) and cravings (*āsavā*) are embedded in them. **These are in the *manomaya kāya*, and the *manomaya kāya* (or *gandhabba*) leaves the dead physical body with those “updated” *kamma* seeds.** This is basically the “net result” of our life here.
- One of the existing *kamma* seeds (from this life or previous lives) gives rise to the next life, where we acquire more of them BASED ON the *gati* and *āsavas*. So the cycle perpetuates.

Viññāṇa in Upapatti PS Is Paṭisandhi Viññāṇa

5. With *saṅkhāra* as a condition, energy for a new *bhava* or a *paṭisandhi viññāṇa* arises.

- This *viññāṇa* of the new life arises according to the nature of the *kamma* seed that gave rise to it. If that *kamma* seed was due to some hateful act(s), then the *viññāṇa* will be matching: “*pati + ichcha sama uppāda*.” If it is a seed due to an act of generosity done with loving kindness, it could be the *viññāṇa* of a Brahma.
- Thus the “base level of *viññāṇa*” for animal life is VERY DIFFERENT from that of human life, even for the same “lifestream,” i.e., when a human is reborn as an animal the “base level of *viññāṇa*” makes a huge downward transition. This is why it is NOT correct to say that “*viññāṇa* is transferred from life to life.” See, “[What Reincarnates? – Concept of a Lifestream](#).”

What Are Nāmarūpa?

6. With *viññāṇa* as condition, *nāmarūpa* arise.

- *Nāmarūpa* in the *upapatti* PS is different from those come to play in the *Idappaccayatā* PS.
- For clarification of *nāmarūpa*, see “[Viññāṇa Paccayā Nāmarūpa](#).”
- A deeper discussion at “[Kamma Viññāṇa and Nāmarūpa Paricceda Nāna](#).”

Salāyatana Means To Use the Sensory Faculties With a “Unpurified Mind”

7. With *nāmarūpa* as a condition, *saḷāyatana* arises.

- In *upapatti* PS, *saḷāyatana* (six sense doors) refers to those that arise for the new existence. For example, six sense doors arise for an animal while just three sense doors (eye, ear, and mind) arise for a *Brahma*.
- See, “[Nāmarūpa Paccayā Saḷāyatana](#)” for details.

Phassa, in This Case, Is “Defiled Contact” or Samphassa

8. With *saḷāyatana* as a condition, *phassa* arises.

- The meaning of the root word “*phassa*” is “contact.” Any living being sees with eyes, hears with ears, etc.
- **However, in *Akusala-Mūla* PS, *phassa* is really “*samphassa*” or “*saṇ phassa*.”** See #9.
- This is why this *Akusala-mūla Paṭicca Samuppāda* is not applicable for an *Arahant* (and also for other *Ariyā* too at most times). An *Arahant* does not generate “*samphassa*” but just “*phassa*” without “*saṇ*.”
- Many posts on the website on this important concept; see, “[Search Results for samphassa](#).”

Vedanā Is Samphassa-Jā-Vedanā

9. With (*saṇ*) *phassa* as condition, *vedanā* arise.

- The root level of *vedanā* arises due to *phassa* for living beings, including *Arahants*.
- It is important to realize that NOT all *vedanā* play a role in *Akusala-Mūla* PS. Only those *vedanā* that arise due to *samphassa* (“*samphassa jā vedanā*”) play a role here.
- **When greed, anger, or ignorance take over, a mind generates *samphassa-jā-vedanā*.**
- Such “*samphassa jā vedanā*” depend on the *gati* and *āsava*s: see, “[Vedanā \(Feelings\) Arise in Two Ways](#).” Also, see step #3 in “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”
- We discussed this recently in the post, “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#).”

“Attaching” or *Tanhā*

10. With *samphassa-jā-vedanā* as a condition, *tanhā* arise.

- *Tanhā* arise when one gets “attached,” or “fused” into a thing or situation: with *sukha vedanā*, one attaches with greed; with displeasure, one attaches with hate; one also attaches with not knowing what to do (with a highly agitated mind); see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

The Key Step of *Upādāna*

11. With *tanhā* as condition, *upādāna* arise.

- **At the moment of death**, in the last *citta vīthi*, the dying person gets a *kamma nimitta*. This is normally a vision or a sound that depicts the nature of the strong *kamma* seed that came to the forefront of the mind.
- For example, if the *kamma* seed that is about to give the next birth was due to killing, then the person may see a gun or hear the sound of it, or even see himself as getting ready to shoot; thus, the person will have the same hateful thoughts arise and just like at the time of the crime, the person embraces that situation automatically (*upādāna*) because one has such “*gati*” or habits.
- I highly recommend the subsection on “[Concepts of Upādāna and Upādānakkhandha](#)” that will also clarify the previous steps.

Kammic Energy Accumulation in the Step “Upādāna Paccayā Bhavo”

12. With *upādāna* as condition, a new existence (*bhava*) is grasped at the *cuti-paṭisandhi* moment.

- The next *citta vūthi* starts with the new existence or “*bhava*” matching that state of mind: “*pati + ichcha sama uppāda*.” Depending on the *kamma nimitta* that was grasped, a matching existence, a human, animal, *deva*, etc. arise; see, “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”
- More details in “[Concepts of Upādāna and Upādānakkhandha](#).” A deeper analysis of “[Difference Between Tanhā and Upādāna](#).”

Bhava Paccayā Jāti – Kammic Energy Giving Rise to Rebirth in a New Realm

13. With *bhava* as a condition, *jāti* (new birth) arises. **Note that except for human and animal realms, *bhava* and *jāti* are essentially the same.** See, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- At this step, a birth matching the *bhava* starts for the human and animal realms. The selected “human/animal *bhava*” will last until the *kammic* energy associated with that *kamma* seed is exhausted, as explained in the above post.
- Thus, if the *kamma* seed has the potential for thousands of years of life, the next birth will still be in the human realm when the current life ends.

Each Birth Ends Up With “Various Types of Suffering”

14. With *jāti* as condition, “*jarā, maraṇa, soka-parideva-dukkha-domanassupayasa sambhavan’ti*”.

- *Jāti* inevitably results in decay and eventual death. Therefore, this process describes how *dukkha* arises in the rebirth process.
- No matter where one is born in the 31 realms, one grows old and eventually dies. During that time, one goes through all kinds of suffering, particularly in the human realm and below. Aging and death are certainties.
- And at death, the whole cycle re-starts unless the Arahant hood had not been realized. One WILL BE born somewhere in the 31 realms, and the whole process will continue.

15. The above steps describe the *upapatti* PS. The other aspect, i.e., what happens during a given lifetime, is described in “[Idappaccayatā Paticca Samuppāda](#).”

- **Of course, ALL *kamma* accumulation happens in the *Idappaccayatā* PS.** The *upapatti* PS explains how rebirths take place according to such accumulated *kammic* energies.
- All the steps in the *Akusala-Mūla Paticca Samuppāda* are described in detail in the series: “[Paticca Samuppāda in Plain English](#).”
- Also, see the new subsection, “[Paticca Samuppāda – Essential Concepts](#).”

9.9.3 Uppatti Paticca Samuppāda (How We Create Our Own Rebirths)

July 6, 2019; revised October 4, 2021; November 3, 2022

Rebirths Arise Due to Our Actions

1. *Uppatti Paticca Samuppāda* describes how we create our rebirths. *Idappaccayatā Paticca Samuppāda* explains how we make our *kamma vipāka*. The post, “[Bhava paccayā Jāti....Jarā, Marana....](#)” discusses the differences between *kamma bhava* and *upatti bhava*. [*upapatti* : [f.] birth; rebirth; approach.][*upatti* :[f.] rebirth; coming forth; origin.]

- Both types of *bhava* or existences arise due to the generation of (*abhi*)*saṅkhāra* due to *avijjā*. We remember that we do all kinds of *kamma* (*kāya kamma*, *vacī kamma*, *mano kamma*) with *saṅkhāra* (*kāya*, *vacī*, and *mano saṅkhāra*) or “how we think and then act on such thinking.”
- **ALL *saṅkhārā* arise in the MIND.** As we know, *saṅkhārā* make *kammā* that lead to future rebirths with physical bodies. That is why the Buddha said: “*Mano pubbangamā dhammā..*” or “**ALL *dhammā* arise with the mind as precursor..**”
- When we generate (*abhi*)*saṅkhāra* that creates a “future expectation” or a *viññāṇa*; see, “[Viññāṇa Aggregate](#).” That ALWAYS leads to a *kamma bhava*, which is a “seed” to bring about a future existence in this life or future life.
- A *kamma bhava* can become a *uppati bhava* if it becomes strong enough to give rise to rebirth. For example, killing a parent WILL generate a *uppati bhava* that WILL bring in birth in an *apāya* in the very next rebirth.

2. That is the crucial difference between *Idappaccayatā Paṭicca Samuppāda* and *Uppatti Paṭicca Samuppāda*; see, “[Paṭicca Samuppāda Cycles](#).”

- *Idappaccayatā Paṭicca Samuppāda* generates *kamma* seeds or *kamma bhava* moment-to-moment.
- Those *bhava* (or *kamma* seeds or *kamma bīja*) that bring *kamma vipāka* during a lifetime (whether in this life or WITHIN a future life) are called “***kamma bhava***.”
- Some *bhava* are strong enough to bring in a new future existence (whether in a bad realm or a good realm) and are called “***uppati bhava***.”
- Regardless of whether it is a *kamma bhava* or a *uppati bhava*, **we generate them** every time we act with *avijjā* and make *viññāṇa* via the steps, “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.”
- Then subsequent *Paṭicca Samuppāda* steps invariably lead to “*bhava paccayā jātī*” and “*jāti paccayā jarā, maraṇa, soka, perideva, dukkha, domanassa, upasaya sambhavanti. Evametassa kevalassa dukkhakkhandhassa samudayo hoti*.” or “the whole mass of suffering.”

Grasping a *Bhava* Happens Automatically

3. We do not have any control over which “*uppati bhava*” comes at the end of a *bhava* (*cuti*, not *marāṇa*). The strongest with the most “*upādāna*” associated with it gets to the front automatically. The Buddha gave a simile to explain how this selection of a “*uppati bhava*” or a potent *kamma* seed happens at the *cuti-paṭisandhi* transition at death.

- Imagine a barn that keeps the cows in for the night. In the morning, all the cows are anxious to get out and roam around. When the gate opens, the strongest cow comes to the front and is out of the gate first. The weaker cows don’t even make an effort to go to the gate.
- Just like that, it is the most potent “*kamma* seed” or a “*paṭisandhi bhava*” that wins at the *cuti-paṭisandhi* transition.
- We discussed the case of a teenager in the previous post, “[Bhava paccayā Jāti....Jarā , Marāṇa...](#)”. Suppose he created a potent *kamma* seed with an action depicting “animal-like” behavior. In that case, it will bring about an animal’s existence at the *cuti-paṭisandhi* transition.

4. A Buddha could analyze such a *paṭisandhi Paṭicca Samuppāda* cycle in detail to pinpoint even the type of animal. That is because a Buddha can see not only a person’s whole history in the present life but going back many eons. Thus, he could see which *kamma* seed will bring the following existence and exactly which kind of “*gati*” are associated with that *kamma* seed. We can only discuss the general trends, and here we have discussed only the main ideas of how these *Paṭicca Samuppāda* cycles operate.

- Going back to the teenager, In this case, it is the *paṭisandhi Paṭicca Samuppāda* cycle that operates, and “*bhava paccayā jātī*” here leads to the birth in a new existence as an animal using that *uppati bhava*.

Difference Between *Bhava* and *Jāti*

5. It is essential to realize that the *cuti-paṭisandhi* transition DOES NOT necessarily happen when a human dies. They can be reborn many times as humans within a given “human *bhava*”; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- Once born (*jāti*) in such an animal existence (*bhava*), that animal will grow and then start the old age (“*jarā*”) and eventually die (“*maraṇa*”).
- Since most violent animals have shorter lifetimes, only a fraction of that *kammic* energy is likely to have been spent. That animal will keep going through many similar births (“*jātī*”) until the power of that *kamma* seed is consumed. Many animals keep coming back to the same life many hundreds of times.

6. That is the difference between “*bhava*” and “*jāti*.” Once one gets a new existence or “*bhava*,” one could have many births (“*jātī*”) in that existence until the energy in the *kamma* seed runs out. I keep repeating this because it is essential to understand the difference between “*bhava*” and “*jāti*.”

- Thus, we can see that the last step of “*jāti paccayā jarā, maraṇa, soka, parideva, dukkha, domanassa, upasaya sambhavanti. Evametassa kevalassa dukkhakkhandhassa samudayo hoti.*” will be with that “teenager” for a long time to come. It is not just one birth but many that will correspond to that existence as that animal.
- In general, while in the human “*bhava*” one could be reborn many times before the energy of that “good *kamma* seed” is depleted. That is why some people can recall memories from recent past lives. A human *bhava* can last thousands of years, but each human birth (*jāti*) lasts only about 100 years.
- **However, getting another “human *bhava*” is difficult;** see “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).”

How Are Certain Rebirths Stopped?

7. We mentioned earlier that anyone would have accumulated numerous good and bad *kamma* seeds strong enough to give rise to good and bad rebirths. Then the following question arises. Does a person attain the *Sotāpanna* stage by eliminating all those corresponding bad *kamma* seeds?

- While it is possible to reduce the potency of *kamma* seeds and maybe even eliminate some, it may not be possible to remove all. The *Ariya Mettā Bhāvanā* – discussed in the “[Bhāvanā \(Meditation\)](#)” section – can lessen the potency of some *kamma* seeds. Even the Buddha had 11 instances of bad *kamma vipāka*, including a back problem.
- Therefore, it is very likely that we all have many good and bad *kamma* seeds strong enough to energize many good and bad rebirths.

8. What happens at the *cuti-paṭisandhi* moment involves the “*upādāna paccayā bhava*” step in the *uppati Paṭicca Samuppāda* cycle.

- Suppose a person dies, and that was the last possible human birth for them. Then at the dying moment, that potent *kamma* seed will generate a corresponding *nimitta* (or sign of that *kamma*).
- Whether they will willingly grasp that *nimitta* will depend on whether they still have such “*gati*.”

9. Let us again consider the case of the violent teenager discussed in #3 in the previous post, “[Bhava paccayā Jāti....Jarā , Maraṇa....](#)” Suppose he continued his violent acts and built up a “*uppati bhava*” suitable for a fierce animal. Then, at the dying moment, he could see in his mind (like in a dream), a rival gang member trying to “steal a drug deal”; he would also see a gun close-by. **That is the *nimitta*.**

- If that person still has the same *gati*, he will get angry, grab the gun, and shoot that person by his instincts.
- That is the “*upādāna paccayā bhava*” step for the new existence. That person has willingly grasped the mindset of an animal, and he will be born as an animal.
- This process is explained from beginning to end in detail in the series of posts, “[Paṭicca Samuppāda in Plain English](#).”

How Does a Sotāpanna Avoid Bad Rebirths?

10. Let us now go back to the question of how a *Sotāpanna* avoids such bad rebirths even if they have many bad *kamma* seeds. Suppose that *Sotāpanna* has the same kind of strong (and bad) *kamma* seed as that teenager (could be from a previous life).

- What happens is that a *Sotāpanna* will not grab the gun and shoot that person even if it is their worst enemy. **His mindset or “*gati*” has permanently changed.** Thus “*upādāna paccayā bhava*” step will not be executed for that *kamma* seed.
- In that case, now the next potent *uppatti bhava* will come to the forefront. If that is also a bad one suitable for rebirth in the lowest four realms, *Sotāpanna*’s mind will reject that too. Eventually, he will grasp a rebirth compatible with his “*gati*” at that dying moment. A *Sotāpanna* has removed the “*gati*” of a being in one of the four lowest realms.
- **All that happens automatically and very quickly. We do not have any conscious control over it.**

11. How one lives this life AND how one lived previous lives can contribute to future rebirths. One would generate “*kamma* seeds” or “*uppatti bhava*” for possible future existences according to how one lives a life.

- **However, bad *bhava* will not result if one has changed one’s *gati* PERMANENTLY (via attaining at least the *Sotāpanna* stage).** EVEN IF one had committed bad *kamma* suitable to bring in a “bad *bhava*,” one’s mind would not grasp a “bad *bhava*” at the *cuti-paṭisandhi* moment.
- That is why *Paṭicca Samuppāda* means “*pati + ichcha*” leading to “*sama*” + “*uppāda*.” What one grasps willingly and habitually is what one that will operate automatically at the dying moment; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”
- It is better to use *Paṭicca Samuppāda* even in English rather than “dependent origination.” Most Pāli words have “built-in” explanations (*pada nirutti*). One needs to understand what those Pāli words mean and use them. [*pada* :[nt.] foot; foot-step; a word; position; place; reason; cause; a line of stanza; the final rest. *nirutti* : (f.) [Sk. nirukti, nis+vac] one of the Vedāṅgas (see *chāṅga*), expln of words, grammatical analysis, etymological interpretation; pronunciation, dialect, way of speaking, expression.]
- I have explained this with *saññā*, *saṅkhāra*, and *viññāṇa* as well; see, “[Mental Aggregates](#).” Those DO NOT have corresponding SINGLE English words. **In particular, it is WRONG to translate *viññāṇa* as just “consciousness”;** see, “[Viññāṇa Aggregate](#).”

Relevance to “Origin of Life” Issue

12. I hope it is clear how we create our future births by doing strong *kamma*. Good *kamma* lead to good *vipāka* and good births. Bad *kamma* leads to bad *vipāka* and bad births.

- We can also avoid bad births (in the lower four realms) by removing our “bad *gati* that could lead to such births.” Attainment of *Sotāpanna* stage ensures this.
- In the same way, we can stop births in the human and *deva* realms (remaining realms in *kāma loka*). Removal of “*kāma gati*” or cravings for sense pleasures gets one there. The need to take this step may not become apparent until one attains the *Sotāpanna* stage.

- Even the higher *Brahma* realms have some form of suffering (especially at the moment of death). Removal of “all *gati*,” including craving for *jhānic* pleasures in *Brahma* realms, leads to the cessation of all future suffering. That happens of course at the *Arahant* stage.

13. It should also be clear that “new lives” do not randomly come into existence. A new *jāti* based on a new *bhava* arises ONLY as a continuation of an existing lifestream; see, “[What Reincarnates? – Concept of a Lifestream.](#)”

- A living being automatically grasps a new *bhava* when the current *bhava* ends (except for an *Arahant*.)
- That is how the rebirth process continues. And that is also why there is no “traceable beginning to life.”
- A detailed discussion in a new series of posts on “[Origin of Life.](#)”

14. A deeper description is at “[WebLink: suttacentral: Gatikathā \(KN Ps 1.6\)](#)” of the *Tipiṭaka* Commentary *Paṭisambhidāmagga*. [4.1 *Paṭisandhikkhaṇe pañcakkhandhā saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, vippayuttapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), the **five aggregates** (*pañcakkhandhā*) arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *vippayuttapaccayā* (dissociation conditions). 4.2 *Paṭisandhikkhaṇe cattāro mahābhūtā saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), the **four great elements** (*cattāro mahābhūtā*) arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), and *nissayapaccayā* (support conditions). 4.3 *Paṭisandhikkhaṇe tayo jīvitasāṅkhārā saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, vippayuttapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), the **three life biological intention** (*tayo jīvitasāṅkhārā*) arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *vippayuttapaccayā* (dissociation conditions). 4.4 *Paṭisandhikkhaṇe nāmaṇca rūpaṇca saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, vippayuttapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), **this (second) fourteen dhammā (ime cuddasa dhammā)** arise (*honti*) with *sahajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *sampayuttapaccayā* (association conditions). **4.11 Paṭisandhikkhaṇe ime aṭṭhavīsati dhammā sahajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, vippayuttapaccayā honti.** On the moment of rebirth linking (*paṭisandhikkhaṇe*), **this twenty-eight dhammā (ime aṭṭhavīsati dhammā)** arise (*honti*) with *sahajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *vippayuttapaccayā* (dissociation conditions).]

Notes:

First Fourteen *dhammā* are [5] the five aggregates (*pañcakkhandhā*), [4] the four great elements (*cattāro mahābhūta*), [3] the three life biological intention (*tayo jīvitasaṅkhārā*), [2] the *nāma* and *rūpa*.

Second Fourteen *dhammā* are [4] the four aggregates of *arūpino* (*cattāro khandhā arūpino*), [5] the five faculties (*pañcīndriyaṇi*), [3] the three causes/conditions/reasons (*tayo hetū*), [2] the *nāma* and *viññāṇa* (*nāmaṇca viññāṇaṇca*).

Twenty-eight *dhammā* are First Fourteen *dhammā* and Second Fourteen *dhammā*.

9.9.4 Kusala-Mūla Paṭicca Samuppāda

This is an early post; revised May 10, 2018; re-written February 6, 2021; #2 revised February 10, 2021; May 28, 2022; August 27, 2022; May 4, 2023 (#5); May 5, 2023 (#6 added)

What Is Kusala-Mūla Paṭicca Samuppāda?

1. **Kusala-Mūla version of Paṭicca Samuppāda (PS) describes the way to Nibbāna.** It is not described in even the current *Theravāda* texts, even though it is in the *Tipiṭaka*. Since the time Buddhaghosa wrote *Visuddhimagga*, all *Theravāda* texts followed his books instead of *Tipiṭaka*.

- That means the PS process for attaining *Nibbāna* has NOT been described for over 1500 years. No wonder the *Nibbāna* has been hidden for all these years.
- *Kusala-Mūla* (pronounced “moola”) PS describes the PS process for acting with *alobha*, *adosa*, and *amoha* with an understanding of the Four Noble Truths. **That goes beyond the mundane versions of *alobha*, *adosa*, and *amoha*.** We will discuss that below.
- Of course, the *Kusala-Mūla* PS process is unknown to the world without Buddha’s true teachings.
- By the way, the word “*kusala*” comes from “*ku*” (defilements)+ “*sala*” (abandon.) Thus *kusala kammā* leads to the removal/abandonment of defilements (*akusala*.)

Regular Version of Alobha, Adosa, Amoha Keeps One in the Rebirth Process

2. One is born in this world due to the **six root causes**.

- One is born in the *apāyā* or *dugati* (and also subjected to suffering even when born in good realms) due to bad *gati* arising MAINLY due to ***lobha*, *dosa*, and *moha***. The *Akusala-Mūla* PS operates when actions, speech, and thoughts occur with these three root causes; see, “[Akusala-Mūla Paticca Samuppāda](#).”
- One is born in the “good realms” or *sugati* (and also experiences mundane sense pleasures) due to “good *gati*” developed by acting with conventional or mundane ***alobha*, *adosa*, and *amoha***. For

example, one can engage in “good deeds” like giving, helping out others, etc., or cultivate *jhāna*. Those are done with mundane versions of *alobha*, *adosa*, and *amoha* and can lead to rebirths in human, *Deva*, and *Brahma* realms. However, they WILL NOT lead to *Nibbāna*, i.e., stopping the rebirth process.

- It is ONLY when one is acting with ***alobha*, *adosa*, and *amoha* (and comprehension of Four Noble Truths/*Tilakkhaṇa*/*Paṭicca Samuppāda*)** that those actions lead to *Nibbāna* via “Kusala-Mūla *Paṭicca Samuppāda*” that we are discussing now.
- The above points are also discussed in detail in “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

There Are Two Tiers of *Alobha*, *Adosa*, *Amoha*

3. The uniqueness in Buddha Dhamma reveals two tiers (or levels) of *alobha*, *adosa*, and *amoha*.

- All religions teach that it is good to act with *alobha*, *adosa*, and *amoha*. Of course, the Buddha advised that too.
- **However, if one is to stop future suffering in the rebirth process, one MUST see the dangers of remaining in the rebirth process.** This can be stated in three different ways of understanding: Four Noble Truths, *Paṭicca Samuppāda*, and *Tilakkhaṇa*.
- With that understanding, *alobha*, *adosa*, and *amoha* elevate to a new level. One is now engaged in “good deeds,” not seeking “good rebirths” but to be released from the rebirth process. In other words, now, one’s goal is to attain *Nibbāna*.
- Good deeds done without a deeper understanding of the Four Noble Truths are *puñña kammā*. One gets “good rebirths” with *puñña kammā*. When one starts understanding the Four Noble Truths, such actions AUTOMATICALLY become *kusala kammā* and help attain *Nibbāna*.
- This is discussed in detail in “[Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?](#).”

Kusala-Mūla Paṭicca Samuppāda Involves *Kusala Kamma*

4. It is the ***Kusala-Mūla Paṭicca Samuppāda*** process that leads to *Nibbāna*. That is why this PS process starts with “*Kusala-Mūla paccayā saṅkhāra*.”

- As we know, the ***Akusala-Mūla Paṭicca Samuppāda*** process maintains the rebirth process. *Puñña kamma* done with mundane versions of *alobha*, *adosa*, *amoha* are ALSO included in “*avijjā paccayā saṅkhāra*” in the ***Akusala-Mūla Paṭicca Samuppāda*** process. See “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#).”
- **It is critical to understand this distinction.** The mundane versions of *alobha*, *adosa*, and *amoha* still lead to *Akusala-Mūla* PS cycles that keep one in the rebirth process. It is ONLY AFTER one starts comprehending the Four Noble Truths (or the working of the *Paṭicca Samuppāda* processes or *Tilakkhaṇa*) that one will start operating under the *Kusala-Mūla* PS process leading to *Nibbāna*.
- Now we can look at the steps in the *Kusala-Mūla* PS process.

Steps in the *Kusala-Mūla Paṭicca Samuppāda* Process

5. The steps in this *Kusala-Mūla* cycle are ([WebLink: suttacentral: Pattecasamuppāda Vibhaṅga](#)):

“*kusalamūla paccayā saṅkhāro, saṅkhāra paccayā viññāṇaṃ, viññāṇa paccayā nāmarūpaṃ, nāmarūpa paccayā saḷāyatanāṃ, saḷāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā pasādo, pasāda paccayā adhimokkha, adhimokkha paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā maraṇaṃ. Evametesāṃ dhammānaṃ samudayo hoti.*”

Here I have marked in orange-red the terms different from those in the *Akusala-Mūla* PS. Let us briefly translate the terms. **Here I am describing both *pavutti* and *upapatti* PS together.** [*pavutti* : [fr. pa+vr̥t, cp. Class. Sk. *pravṛtti*] happening, proceeding, fate, event.] **and *upapatti*** [also written as *upapatti* which means rebirth]

- With *Kusala-Mūla* as a condition, one accumulates *puññābhi saṅkhāra* WITH the comprehension of the Four Noble Truths. Those may be called *Kusala-Mūla saṅkhāra*.
- Such *Kusala-Mūla saṅkhāra* arises in the mind when doing deeds with *lokuttara alobha, adosa, and amoha*. THEREFORE, one does not wish for anything other than *Nibbāna* because one's mind automatically rejects anything within the 31 realms.

6. In the above verse, “*dhammānaṃ samudayo hoti*” refers to four types of “special *dhammā*” that arise due to the *Kusala-Mūla* PS process.

- As we discussed in the post, “[What are Rūpa? – Dhammā are Rūpa too!](#)” *dhammā* means “to bear things in this world.” When one cultivates the Noble Path as an Ariya (Noble Person), one attains four stages *magga phala*: *Sotāpanna, Sakadāgāmi, Anāgāmi, and Arahant*.
- *Dhammā* referred to in the above verse are those that “bear” those four *magga phala*.

Kusala-Mūla Saṅkhāra Lead to Kusala-Mūla Viññāṇa

7. With *Kusala-Mūla saṅkhāra* as condition, a *Kusala-Mūla viññāṇa* arises.

- Because the *saṅkhāra* was generated with a *Kusala-Mūla* deed, **only a *Kusala-Mūla viññāṇa* arises:** “*paṭi +ichcha sama uppāda*.” The characteristic of this *Kusala-Mūla viññāṇa* is the desire (*chanda*, not *kāmacchanda*) for *Nibbāna*.
- The only expectation in one's mind is to attain *Nibbāna* and be free of all future suffering.

Kusala-Mūla Viññāṇa Lead to Corresponding Nāmarūpa

8. Such *Kusala-Mūla viññāṇa* lead to corresponding “good” or “*Kusala-Mūla*” *nāmarūpa* in *pavutti Paṭicca Samuppāda* or in *upapatti Paṭicca Samuppāda*.

- Those “*Kusala-Mūla nāmarūpa*” are the “mental pictures” that arise in mind and are associated with people and deeds relevant to one's efforts in attaining *Nibbāna*. For example, one may think about talking to a Noble friend, and he/she comes to mind. Or, one could be planning an alms-giving, etc.
- At death, the *paṭisandhi viññāṇa* is again according to the *Kusala-Mūla viññāṇa*. Thus a birth in the lower four realms is avoided for a *Sotāpanna*, and a birth in the lower 11 realms (*kāma loka*) is avoided for an *Anāgāmi*, for example.

Kusala-Mūla Nāmarūpa Lead to Kusala-Mūla Saḷāyatana

9. With such *nāmarūpa* as a condition, the corresponding *saḷāyatana* arises.

- They are attuned to only meritorious deeds tailored towards *Nibbāna* in *pavutti Paṭicca Samuppāda*.
- In the case of new (*Ariya*) birth, the new existence's sense faculties arise accordingly. They can never be sense faculties for a realm in the *apāyās*.

Subsequent Steps Arise in the Same Way

10. With a *saḷāyatana* as a condition, *phassa* (contact with that sense faculty) arises.

- Note that this is just “*phassa*” and NOT “*saṇ phassa*” or “*samphassa*” as in “[Akusala-Mūla Paṭicca Samuppāda](#).”

- Contacts with the outside world are attuned to seeking *Nibbāna*. To learn *dhamma* and to practice *dhamma*.
11. With *phassa* as a condition, *vedanā* arises.
- Through such interactions, one enjoys contact with *dhamma*, true knowledge, and understanding.

Such Contacts Lead to *Citta Pasāda* Followed by *Adhimokkha* (Instead of *Taṇhā* and *Upādāna*)

12. With such a *vedanā* as a condition, *citta pasāda* arises.
- The “tranquility of consciousness” is the standard translation for *citta pasāda*. It is of joyous feeling, lightness of heart.
13. With increasing *citta pasāda* *adhimokkha* results.
- *Adhimokkha* is normally translated as “decision” or “resolve” where *saddhā* peaks. Here it means the mind is decisively attracted to *Nibbāna*. The mind cools down.

Ariya Bhava and *Ariya Jāti*

14. With *adhimokkha* as a condition, (*Ariya*) *bhava* arises. **Note that an *Ariya bhava* arises via ELIMINATING an *uppatti bhava*.** For example, one is “born” an *Anāgāmi* by eliminating the possibility of rebirths in the 11 realms of *kāma loka*.
- The resulting existence (or “*bhava*”) matches that state of mind: “*paṭi+ichcha sama uppāda*”; one “lives” that experience. In the above example, an *Anāgāmi* does not have the mindset to be reborn in *kāma loka*.
 - If it is a rebirth at *paṭisandhi*, an appropriate “*bhava*” is selected according to the *kamma nimitta*. Here any “*apāyagāmi*” *kamma* seeds acquired in the distant past do not get a chance to come to the forefront, and thus a rebirth in the lower four realms is prevented.
 - **Of course, at *Arahant*’s death, the *Kusala-Mūla* PS process stops (forever) without grasping a new *bhava*.**
15. With *bhava* as a condition, *jāti* arises.
- The appropriate *jāti* (*Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*) will result in an appropriate realm.
16. With *jāti* as condition, “*jāti paccayā jarā maraṇaṃ. Evametesam dhammānaṃ samudayo hoti.*”
- Any *Ariya* is also subject to decay and death as long as he/she is in one of the 31 realms.
 - But here, the connection to *dukkha* is not shown because one is destined to attain *Nibbāna*. Thus, instead of “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*” in the *Akusala-Mūla* PS process, here it ends with “*Evametesam dhammānaṃ samudayo hoti.*”
 - Instead of future suffering, conditions for attaining *Nibbāna* result in the *Kusala-Mūla* PS process.

Difference Between *Adhimokkha* and *Upādāna*

17. In the *Akusala-Mūla* PS that feeds the rebirth process, the critical step of “*upādāna paccayā bhavo*” leads to the creation of the *kamma bhava* (energy to feed future rebirths.)
- That *upādāna* forces the mind to act with *avijjā* repeatedly and to strengthen that *kamma bhava*. That is explained in detail in “[Difference Between *Taṇhā* and *Upādāna*](#).”
 - In contrast, in the *Kusala-Mūla* PS, that step is replaced by “*adhimokkha paccayā bhavo*.” That *bhava* is an *Ariya bhava* (existence as a Noble Person) that makes any existing *kamma bhava* (created via *Akusala-Mūla* PS processes) ineffective.

9.9.5 Idappaccayatā Paṭicca Samuppāda

Re-written with a new title May 18, 2019; revised May 20, 2019; March 13, 2021; re-written May 10, 2021; added #16 on April 30, 2022; revised April 15, 2023

Akusala-mūla upapatti Paṭicca Samuppāda (that describes future rebirths) is the only version of *Paṭicca Samuppāda* (PS) described in even the current *Theravāda* texts, even though the other versions are in the *Tipiṭaka*. *Idappaccayatā Paṭicca Samuppāda* is a critically important one that describes kamma accumulation in real-time. [*upapatti* : [f.] birth; rebirth; approach.]

Idappaccayatā – At a Given Moment

1. *Idappaccayatā Paṭicca Samuppāda* is another crucial teaching that has been hidden for hundreds of years. The word “*Idappaccayatā*” comes from “*ida*” for “here” and the closest English word for “*paccayā*” is “condition.” **Thus *Idappaccayatā* implies “based on this condition at this moment.”** [*idappaccayā* : From an assignable cause, from an ascertained cause.]

- Therefore, *Idappaccayatā Paṭicca Samuppāda* describes how “*pati icca*” leads to “*sama uppāda*” moment by moment based on the conditions present at that moment; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda”.](#)”
- The additional “p” in “*idappaccayatā*” comes from the combination of “*ida*” and “*paccayā*.” This is similar to “*dammacakka*” and “*pavattana*” combined to yield “*dhammacakkappavattana*” in the *Dhammacakkappavattana Sutta*.
- Another crucial point is that “The first point of ignorance, *bhikkhus*, cannot be seen. **Ignorance can arise at any time when the conditions are right**” or “*Purimā, bhikkhave, koṭi na paññāyati avijjāya: ‘ito pubbe avijjā nāhosi, atha pacchā samabhavī’ti. Evañcetaṃ, bhikkhave, vuccati, atha ca pana paññāyati: ‘idappaccayā avijjā’ti.*”
- See “[WebLink: suttacentral: Avijjā Sutta \(AN 10.61\)](#)” for details.

Idappaccayatā Versus Upapatti Paṭicca Samuppāda

2. As mentioned in earlier posts (see, “[Paṭicca Samuppāda](#)”), *Paṭicca Samuppāda* (PS) or “cause and effect” can describe various stages of life in multiple ways. At a deeper level, 16 PS cycles operate **inside a thought-moment**.

- The Buddha said that the PS is deep as a deep ocean and can apply it to any situation because everything “in this world” obeys the basic principle of cause and effect. It is no wonder that only one PS has been studied for over a thousand years while the true Dhamma remains hidden.
- In the previous post, we discussed the *upapatti* PS, which describes that latter process, i.e., how the PS cycle operates between lives; see, “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”
- The other extreme of a swift PS process involved within a thought moment (*citta*) is very complex, and we do not need to examine it right now. We can learn it, but it can be “seen” only by a Buddha.
- This post will discuss the *idappaccayatā* PS cycle, which describes phenomena in real-time without getting into what happens within a *citta* (within a thought moment). This process — just like the PS cycle operates between lives — can also be easily understood by anyone.

Paṭi+icca Leading to Sama+uppāda

3. As mentioned in the introduction to PS, whenever we willingly grasp something, whatever results from that action has a corresponding nature. Because one got attached willingly, similar *bhava* will result: i.e., *pati+icca* leading to *sama+uppāda* or *Paṭicca Samuppāda* (PS). Here, “*icca*” is pronounced “*ichcha*.”

- In the most fundamental sense, a “greedy state of mind” will result when we attach via greed, i.e., one develops a **habit or gati or bhava** corresponding to that state of mind; a “hateful state” (habit/*gati/bhava*) results via hateful attachment; acts of greed and/or hate are always done with ignorance.
- Three examples of *upapatti bhava* for those three cases illustrate the principle: An excessively greedy person is likely to get a “*peta bhava*” and be born as a *peta* (hungry ghost); a person who is often engaged in hateful actions towards other beings is likely to develop a “hateful *bhava*” and is likely to be born in the *niraya* (hell) where there is a lot of hate due to extreme suffering; animal *bhava* has developed with both greed and hate. Since ignorance is always there, animal *bhava* are cultivated with all three “*sans*”; this is the root of the word “*tirisan* = three *sans*” for an animal in Sinhala.

An Example of *Idappaccayatā* PS

4. Now, let us look at the *Idappaccayatā* PS, which describes how we develop certain habits or *gati* during a given lifetime and make “*kamma bhava*.” That “*kamma bhava*” can become a “*upapatti bhava*” at the *cuti-paṭisandhi* moment of grasping new *bhava*. It is often easier to use an example to illustrate these PS cycles. Let us examine how a teenager becomes an alcoholic.

- The teenager becomes friendly with other teenagers who are into drinking. Initially, he may be reluctant to join in, but due to ignorance, he joins them and starts drinking.
- If a good friend or a family member came to know about the situation, they could have prevented the teenager from associating with such bad company, i.e., ignorance could have been dispelled by explaining to him the adverse effects of drinking but also of associating with such a group.

5. The PS cycle thus starts with “*avijjā paccayā saṅkhāra*” (of course triggered in a party setting). Due to ignorance of the adverse results, the teenager starts drinking with that group (*saṅkhāra* = “*saṇ* + *khāra*” or actions of accumulating, in this case, bad *kamma*).

- The more he is involved with such drinking activities, the more he thinks about it and develops a “mindset” or *viññāṇa* for that activity. This is “*saṅkhāra paccayā viññāṇa*”; see, “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).”

6. When he really begins to like drinking, he starts thinking about it even while doing other things. This is “*viññāṇa paccayā nāmarūpa*.”

- In this case, *nāmarūpa* are the mental images associated with that *viññāṇa*, i.e., the names and shapes of particular alcohol bottles, the places where he usually drinks, the friends who drink with him, etc.
- He thinks about the next “event” and visualizes the scene; **all these are associated with *nāmarūpa*. Thus, here *nāmarūpa* are the mental images of “things” and “concepts” that one would like to enjoy.**

7. Now, his six senses become “involved” to provide reality to such *nāmarūpa*, to provide the desired sensory pleasures.

- In Pāli, the six *indriya* (senses) become “*āyatana*.” For lack of a single English word, I will call an “*āyatana*” an “import/export facility” and get involved in the actions associated with drinking events.
- His mind is often thinking about the next “event” (where, when, with whom, etc), and he makes necessary preparations for the “event” using all six senses (now *āyatanas*.) That happens per the *nāmarūpa* in the previous step, i.e., “*nāmarūpa paccayā saḷāyatana*,” where ***saḷāyatana* means the six *āyatana***: the eye is now not merely for seeing; it has become an assistant in the lookout for a “good drink” or a “good friend to chat with,” etc.

8. Thus, we have “*saḷāyatana paccayā phassa*,” i.e., all six *āyatana* become actively engaged in making contact with relevant sense objects. His eyes are on the lookout for a favorite drink or person to chat with, etc.

- However, “*saḷāyatana paccayā phassa*” is just the “uddesa” or short version given in the standard PS steps. It needs to be explained in detail; see “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#).”
- Here instead of *phassa*, it is called “*samphassa*” (= “*saṇ*” + “*phassa*”), where “*saṇ*” implies it not just contacting, but a “*saṇ*” contact; see, “[What is “Saṇ”? Meaning of Sansāra \(or Saṁsāra\)](#).”

9. Such “*samphassa*” lead to *vedanā*, i.e., “(*saṇ*)*phassa paccayā vedanā*.” He experiences “good (but immoral) feelings” with all those sense contacts.

- Because of such “good feelings,” he gets further attached: “*vedanā paccayā taṇhā*”; see, “[Taṇhā – How We Attach via Greed, Hate, and Ignorance](#).”

10. Now comes, “*taṇhā paccayā upādāna*.” *Upādāna* means “grabbing or pulling it close,” like an octopus grabbing its prey with all its eight legs.

- In the present case, the teenager wants to relive this experience. He gets immersed in it; when he is experiencing the event, his mind is fully absorbed; he does not think and does not have the mindset to think about any adverse consequences.
- This is the critical “habit-forming” or “*bhava* forming” step.
- If this habit becomes very strong, it could lead to new *bhava* as an animal via the *upapatti Paṭicca Samuppāda* process; see, “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”

11. So, the next inevitable step is “*upādāna paccayā bhavo*”; this particular state of getting drunk becomes increasingly ingrained in his mind. It becomes “a *bhava*” or “existence” or habit that is important to him. He very much wants to re-live that experience.

- And that is exactly what he gets: “*bhava paccayā jāti*.” This “*bhava*” or the *kamma* seed is now well established, and he can be born in that “drunken state” quite easily. All he needs is an invitation from a friend, or even a sight of a bar while traveling, for example.
- It is natural to get into that state or be “born” in that state. So, he gets drunk at every opportunity. See “[Bhava and Jāti – States of Existence and Births Therein](#)” for more details.

12. However, like everything else, any birth is subjected to decay and suffering: “*jāti paccayā jarā, maraṇa, ... dukkhakkhanda samudhaya hoti*.” This happens in many stages, as we describe below.

- But in the case of a single drinking event, that state of intoxication finally ends, possibly with a big headache and a massive hangover. That episode ends with nothing to show for it but a hangover.
- Even worse, now he is “hooked.” He has formed a bad habit, strengthening even more if he does it repeatedly. Because each time the PS runs, the *viññāṇa* for that habit gets more fuel, and the *bhava* get stronger.

Uncountable *Idappaccayatā* PS Cycles During a Lifetime

13. It is essential to realize that the above PS cycle does not run to its conclusion when the drinking “event” is over. Instead, the cycle can repeatedly occur unless it is stopped willfully or deliberately.

- And the way to do that is to learn Dhamma and develop good habits and become a “*sampajanno*”; see “[Kāyānupassanā – The Section on Habits \(Sampajanapabba\)](#).”
- However, if the teenager keeps his bad habit, he gets trapped in that *bhava*, the more *jāti* that occurs, i.e., he will be drunk more frequently. When one gets drunk, one tends to behave like an animal without any sense of decency, and the long-term consequences could be rebirth as an animal; see below.
- Furthermore, such *Idappaccayatā* PS cycles run numerous times, even during the day, whenever we act with *avijjā*.

Memories Can trigger *Idappaccayatā* PS Cycles.

14. And it is not even necessary to participate in a “drinking event” to run another PS cycle. He may be sitting at a desk trying to study and start going through the PS cycle just by recalling a past event or a scheduled future event.

- He would start with *mano saṅkhāra* and *vacī saṅkhāra* (*vitakka/vicāra* or planning), thus generating (and strengthening) the *viññāṇa* for drinking, generating *nāmarūpa* (visuals of places, friends, alcohol bottles, etc.), and thus going through the rest of the cycle: *saḷāyatana*, *samphassa*, *vedanā*, *taṇhā*, *upādāna*, *bhava*, *jāti* (“living it”), repeatedly.
- Thus numerous such PS cycles can run at any time, probably increasing their frequency as the *bhava* or the habit builds up.
- The stronger the *bhava* or habit is, it will be harder to break it. This is why meditation, together with another good habit to work on, should be undertaken to replace a bad habit. While in meditation, one can contemplate the adverse consequences of the bad habit. Developing a good habit will keep the mind away from the bad habit. See “[Habits and Goals](#)” and also “[Bhāvanā \(Meditation\)](#).”

Connection to *Upapatti* PS Cycles

15. If the teenager keeps his bad habit, that “*viññāṇa* of a drunkard” will only grow with time. If it stays strong at the *cuti-paṭisandhi* moment (at the end of his human *bhava*), it could lead to a new *upapatti bhava* via the *upapatti Paṭicca Samuppāda* process mentioned in #1 above “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”

- Such a *viññāṇa* is likely to give rise to rebirth in the animal realm, as mentioned in #13.

16. Details on *Idappaccayatā Paṭicca Samuppāda* in a new subsection, “[Paṭicca Samuppāda During a Lifetime](#).”

Note: This post was re-written to replace an early post, “Akusala-Mūla Pavutti (or Pravurthi) Paṭicca Samuppāda.” I had not realized at that time that what the Waharaka *Thero* had described in Sinhala as “Pavutti (or Pravurthi) Paṭicca Samuppāda” is really the *Idappaccayatā Paṭicca Samuppāda* in the *Tipiṭaka*.

9.10.1 Introduction – What is Suffering?

Revised June 6, 2021; re-written June 14, 2021; revised November 8, 2022

“*Dukkha Sacca*” Means “The Truth About Suffering”

1. “*Dukkha sacca*” (the latter pronounced “sachcha”) refers not only to suffering hidden in the rebirth process but also to the elimination of it.

- Buddha never denied that there are “pleasures to be had” in this world. He pointed out that *Deva* and *Brahma* realms have enhanced sensual (*kāma*) and *jhānic* pleasures compared to the “pleasures” available in the human world.
- But the problem is that ANY given sentient living being spends much more time in the four lowest realms (*apāyās*) than in the human, *Deva*, and *Brahma* realms (in the rebirth process.) See, “[Rebirth – Connection to Suffering in the First Noble Truth.](#)”
- Therefore, there is NET suffering in the rebirth process by a HUGE margin.

Misconceptions About *Dukkha Sacca* (First Noble Truth)

2. Many people are addicted to the temporary “peace of mind” achieved by breath meditation or similar “meditation techniques.” But that deals with only “superficial suffering.” The Buddha pointed out that there is much harsher suffering in the rebirth process.

- Buddha Dhamma is all about ending that harsher and longer-term suffering AND getting to a state with ABSOLUTELY NO suffering. “*Nibbānic bliss*” or “*happiness in Nibbāna*” refers to the bliss of not having to experience even a trace of suffering.
- A crude analogy is someone who has had a migraine headache all his life and finally getting rid of it. However, it is only an analogy, because *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* are all ABSENT in *Nibbāna* (after the death of an *Arahant*.)
- The three ultimate realities of *citta*, *cetasika*, and *rūpa* that describes “this world” are absent in *Nibbāna*. So while *Nibbāna* exists, we cannot describe it in terms of our terminology.

- See #4 of the post, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

Nibbānic Bliss Is About Total Absence of Suffering

3. This is also explained, for example, in the “[WebLink: suttacentral: Nibbānasukha Sutta \(AN 9.34\)](#).” The verse “*Nibbānaṃ paramaṃ sukhaṃ*” DOES NOT refer to a “*sukha vedanā*” in the sense of a feeling because there are no *vedanā* in *Nibbāna*. See, “[Nibbāna “Exists,” but Not in This World](#).”

- Many people equate “*jhānic* experiences” with *Nibbāna*. *Jhāna* are the mental states of *Brahma* worlds, and thus, *jhānic* experiences belong to “this world of 31 realms.” Any sentient being, including any animal, had attained *jhāna* and had been born in *Brahma* worlds many times in their deep past!
- ***Nibbāna* is simply the total absence of ANY suffering. That is the “*Nibbānic bliss*.”** We cannot compare that to any “*sukha vedanā*” experienced by any person, *Deva* or *Brahma*. That is why Prince Siddhattha and many kings and wealthy people gave up those “princely lives” to seek *Nibbāna*.
- So, how bad is this suffering in the rebirth process?

Understanding “True Suffering” – It Is in the Rebirth Process

4. In the post “[Rebirth – Connection to Suffering in the First Noble Truth](#),” we discussed references in the *Tipiṭaka* that MOST rebirths are in the four lowest realms (*apāyās*.) We can only see the suffering in one of them, the animal realm.

- The Buddha has discussed, in detail, the types of suffering in the other three *apāyās*. For example, in the “[WebLink: suttacentral: Bālāpandita Sutta \(MN 129\)](#)” and “[WebLink: suttacentral: Devadūta Sutta \(MN 130\)](#)” the Buddha explains, in detail, suffering encountered in various lower realms.
- English translation of the first one: “[WebLink: suttacentral: The Foolish and the Astute \(MN 129\)](#).” That *sutta* explains that a person who engages in immoral activities (“*bālo*” or a “fool”) can expect the consequences (*kamma vipāka*) both in this life and in future existences in the *apāyās*. **The account of the experiences in the *niraya* (lowest realm) is terrifying.**
- A related *sutta* is the “[WebLink: suttacentral: Pāyāsi Sutta \(DN 23\)](#).” It is about the wrong views that there is no rebirth process, etc. See the English translation there: “[WebLink: suttacentral: With Pāyāsi \(DN 23\)](#).” For those who have doubts about the validity of the rebirth process or the existence of *apāyās*, it is a good idea to read the above *suttās*.

Luckily We Don’t Remember Our Previous “*Bhava*”

5. As we discussed in the post “[Rebirth – Connection to Suffering in the First Noble Truth](#),” we are reborn with human bodies many times during a “human *bhava*” that can last many thousands of years is why some children can recall their past HUMAN lives. Those rebirths took place during the SAME human *bhava*.

- Some *yogis* with *abhiññā* powers can see their RECENT *bhava* just before the current *bhava*. Almost all of them are likely to have had *Brahma bhava* just before the current human *bhava*. As we have discussed, it is unimaginably hard to get a human *bhava* FROM a human or lower *bhava* (ie., from the *apāyās*.) Furthermore, those who can easily cultivate *jhāna* are VERY likely to have had a *Brahma bhava* just before this human *bhava*. Therefore, such *yogis* may be able to see their previous *Brahma bhava*. But there are no accounts of anyone recalling an animal or other existences in the *apāyās*.
- **Thus, different *bhava* are isolated**, and it is difficult to “look back,” especially past existences in the lower realms.
- That is fortunate because it would give nightmares to recall such levels of suffering in the *apāyās* described in #4 above. However, we can also get an idea about the level of suffering in the *apāyās* from the following *sutta*.

Sattisata Sutta (SN 56.35) – Take That Deal!

6. In the “[WebLink: suttacentral: Sattisata Sutta \(SN 56.35\)](#),” the Buddha advised *bhikkhus* to commit all their waking time to strive for *Nibbāna*. To drive the point home, the Buddha gave an analogy. It is a short *sutta*, and I will translate it below. Good English translation at Sutta Central: “[WebLink: suttacentral: A Hundred Spears \(SN 56.35\)](#).”

“*Bhikkhus*, suppose there was a man with a remaining life span of a hundred years. Someone would say to him: ‘Come, good man, in the morning they will strike you with a hundred spears; at noon they will strike you with a hundred spears; in the evening they will strike you with a hundred spears. And you, good man, being struck day after day by three hundred spears, will live a hundred years. Then, after a hundred years have passed, you will make the breakthrough to the Four Noble Truths and *Nibbāna*. That is guaranteed if you agree to bear that suffering.’”

“It is a wise decision, *bhikkhus*, for that man to accept the offer. For what reason? Because this *samsāra* is without a discoverable beginning. You have suffered mightily by uncountable blows by spears, swords, axes, etc. (and will do so in the future too unless you attain *Nibbāna*.)

However, *bhikkhus*, I do not say that the path to *Nibbāna* is accompanied by suffering or displeasure. Instead, the path to *Nibbāna* is accompanied only by happiness and joy.

“Therefore, *bhikkhus*, you should strive to understand: ‘This is suffering. These are the causes of that suffering. The removal of those causes will lead to the cessation of suffering. This is the way to the cessation of suffering.’”

Mistranslations of Some *Suttās* and Suppression of Selected *Suttās*

7. As you all would have seen, many people ignore those *suttās*. They say those *suttās* are “later additions” or “have been distorted after the Buddha.” Then they pick and choose a few *suttās* and mistranslate them to prove their point! For example, in his first discourse, Buddha stated, “*..ayamantimā jāti, natthi dāni punabbhavo’ti.*” OR “..this is the last birth. There is no more gasping of a repeated *bhava*.” Is “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)” a later addition?

- I am willing to discuss ANY *sutta* in *Tipiṭaka*. But please refrain from just expressing OPINIONS or quoting other mistranslations. We are discussing Buddha’s teachings. You may disagree, and that is fine, but don’t distort his teachings. Buddha’s teachings ARE contrary to the “accepted norms” and that is exactly why we all have been trapped in this suffering-filled rebirth process for SO LONG! The verse, “*pubbe ananussutesu dhammesu cakkhum udapādi, ñāṇam udapādi, paññā udapādi, vijjā udapādi, āloko udapādi...*” (“such was the vision, knowledge, wisdom, penetrating vision, and the way to separate from the world, that arose in me regarding **these teachings not heard before..**”) appears eight times in that first discourse of the Buddha for this reason.
- The Buddha explained what kind of suffering to be expected and explained HOW such horrible suffering arises (*dukkha samudaya*) and HOW we can stop it from arising (*dukkha nirodhaya*.) Of course, the way to achieve that is the Noble Eightfold Path. To follow that Path, one MUST first understand the first 3 Noble truths.
- By the way, Buddha also explained that suffering is not caused by one’s soul (or *ātman* in Hinduism.) There is no such thing, to begin with. *Paṭicca Samuppāda* starts with “*avijjā paccayā saṅkhāra.*” That process will proceed irrespective of a specific “soul.” There is only a “*satta (satva)*” engaged in generating *saṅkhāra* due to *avijjā*. See #3 of “[Five Aggregates and Tilakkhaṇa – Introduction](#).” **This is a deeper point that I will discuss in detail in upcoming posts.**

Dukkha Samudaya – Explained by Akusala-Mūla Paṭicca Samuppāda

8. The two main *Akusala-Mūla Paṭicca Samuppāda* schemes describe the mechanisms whereby suffering in this world arises (*dukkha samudaya*.)

- The “[Idappaccayatā Paṭicca Samuppāda](#)” describes how we accumulate *kammic* energies during our lives. Such *kammic* energies “pile-up” and lead to future existences, mainly in the *apāyās*, and that is described in “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”
- As we have seen, any birth “in this world” WILL lead to suffering: Starting with “*avijjā paccaya saṅkhāra*” those cycles ALWAYS end up with “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*” and the “**whole mass of suffering**.”

Dukkha Nirodhaya – Explained by Kusala-Mūla Paṭicca Samuppāda

9. The “[Kusala-Mūla Paṭicca Samuppāda](#)” describes the process of eliminating suffering.

- “*Kusalamūla paccayā saṅkhāra*” WILL lead to births of *Ariyās* (*Sotāpanna* through *Arahant*.) But, since they are also reborn into this world, the cycle still ends with old age and death: “*jāti paccayā jarā maraṇaṇi. Evametesani dhammānaṇi samudayo hoti.*”
- But upon the death of an *Arahant*, there is a total absence of suffering. **Thus, it will lead to the end of suffering.**

Two Types of Saṅkhāra in Dukkha Samudaya and Dukkha Nirodhaya

10. Those *saṅkhārā* generated with *avijjā* (we can call them “*akusala saṅkhāra*”) will perpetuate the rebirth process and will lead to more suffering.

- On the other hand, “*kusala saṅkhāra*” generated with *paññā* (comprehension of the Noble Truths) will lead to *Arahanthood* and the stopping of the rebirth process. **That is Nibbāna, the total absence of suffering!**

Connection to the Root Causes

11. As we saw in the previous post, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#)” “*akusala saṅkhāra*” arise due to *lobha*, *dosa*, *moha*, and the mundane versions of *alobha*, *adosa*, and *amoha*.

- To generate “*kusala saṅkhāra*” one must cultivate the *lokuttara* (deeper) versions of *alobha*, *adosa*, and *amoha* with comprehension of the Noble truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. Note that those three (Noble truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*) are equivalent, and I may refer to just one of them in most cases.
- To complete the discussion on suffering, we need to discuss the three categories of suffering.

Three Categories of Suffering

12. The three categories of suffering are stated in the [WebLink: suttacentral: Dukkhatā Sutta \(SN 45.165\)](#): “...*Dukkha dukkhatā, saṅkhāra dukkhatā, vipariṇāma dukkhatā*—*imā kho, bhikkhave, tisso dukkhatā.*”

- It does not make sense to try to translate the names of the three categories: *Dukkha dukkhatā*, *saṅkhāra dukkhatā*, and *vipariṇāma dukkhatā*. Instead, it is better to understand the meanings of those three types of suffering. Here, *dukkhatā* means “type of *dukkha*.”
- Thus, we can say that the 3 categories of suffering are *dukkha-dukkha*, *saṅkhāra-dukkha*, and *vipariṇāma-dukkha*.

Worst Is the Dukkha-Dukkha

13. As the name implies, **the strongest suffering is the *dukkha-dukkha*** that arises DIRECTLY due to *kamma vipāka*. That category is associated with significant suffering (serious injuries, diseases like cancer, etc.) that we face DURING a lifetime. Of course, **when born in an *apāya*, most of that existence is filled with *dukkha-dukkha*.**

- Therefore, most of the suffering that we discussed above comes under *dukkha-dukkha*.
- The next post will discuss all three categories in more detail: “[Introduction -2 – The Three Categories of Suffering](#).”

9.10.2 Introduction - 2 – The Three Categories of Suffering

June 20, 2021; revised June 10, 2022; October 12, 2002 ; April 21, 2023

The three categories of suffering are *dukkha dukkhatā*, *saṅkhāra dukkhatā*, and *vipariṇāma dukkhatā*.

Three Categories of Suffering

1. In the previous post, “[Introduction – What is Suffering?](#)” we discussed what suffering means in Buddha Dhamma. Here we continue that discussion. The three categories of suffering are stated in the [WebLink: suttacentral: *Dukkhatā Sutta* \(SN 45.165\)](#): “...*Dukkha dukkhatā, saṅkhāra dukkhatā, vipariṇāma dukkhatā—imā kho, bhikkhave, tisso dukkhatā.*”

- It does not make sense to try to translate the names of the three categories: *Dukkha dukkhatā*, *saṅkhāra dukkhatā*, *vipariṇāma dukkhatā*. Instead, it is better to understand the meanings of those three types of suffering. Here, *dukkhatā* means “type of *dukkha*.”
- Thus, we can say that the three categories of suffering are ***dukkha-dukkha*, *saṅkhāra-dukkha*, and *vipariṇāma-dukkha*.**

2. The three types of suffering are associated with the characteristics of a *saṅkhata*, as pointed out in the *Tipitaka* Commentary *Peṭakopadesa*, “[5. Hāravibhaṅgapañcamabhūmi](#):”

“*Tattha tīṇi saṅkhatalakkhaṇāni tisso dukkhatā: uppādo saṅkhatalakkhaṇam saṅkhāradukkhatāya dukkhatā ca, vayo saṅkhatalakkhaṇam vipariṇāmadukkhatā ca, aññathattaṃ saṅkhatalakkhaṇam dukkhadukkhatāya dukkhatā ca, imesaṃ tiṇṇaṃ saṅkhatalakkhaṇānaṃ..*”

Translation:

“Three *saṅkhata lakkhaṇa* correspond to three types of suffering (*tisso dukkhatā*):

- (i) ***uppāda*** is a *saṅkhata lakkhaṇa* that corresponds to *saṅkhāra dukkhatā*. A *saṅkhata* arises due to (*avijja paccaya*) *saṅkhāra*. That itself takes effort (suffering). Furthermore, it will also lead to future suffering.
 - (ii) ***vayo*** is a *saṅkhata lakkhaṇa* corresponding to *vipariṇāma dukkhatā*. Any *saṅkhata* is destroyed (*vaya*), and that leads to *vipariṇāma dukkhatā*.
 - (iii) ***aññathatta*** is a *saṅkhata lakkhaṇa* corresponding to *dukkha dukkhatā*. Any *saṅkhata* undergoes unexpected changes (*aññathatta*) during existence, and that is *dukkha dukkhatā*.
- **All three types of *dukkha* WILL NOT stop until *saṅkhāra*-generation via “*avijjā paccayā saṅkhāra*” stops.**

What Is Suffering Based on?

3. What is our whole world? We sense external *rūpa* through our five physical senses (internal *rūpa*) and then think about them. Thus we can sum up our world as what we experience through our INTERNAL six senses (eyes, ears, nose, tongue, body, mind). If our six internal senses stop working or weaken, we suffer.

- Using those sensory faculties, we experience six types of *rūpa* in the external world: visuals, sounds, smells, tastes, touches, and *dhammā*. If those are not to our liking, we suffer. On the sixth type of *rūpa*, see “[What are Rūpa? – Dhammā are Rūpa too!](#)”
- Those twelve (six INTERNAL and six EXTERNAL) make up “our world.” Everything is included in those twelve—all 12 lead to suffering, not only in this life but also in future lives.
- First, let us discuss the three types of *dukkha* we experience during a lifetime.

Three Types of *Dukkha* During Lifetime

4. Any *rūpa* changes (sometimes unexpected), leading to suffering. First, let us consider whether we can keep our physical bodies (internal *rūpa*) and their associated sensory faculties to our satisfaction.

- We may be able to maintain our five physical senses to our satisfaction for many years. And this is why people do not even take the time to think about these concepts.
- We start feeling this hidden suffering when we pass middle age. For example, eyesight, hearing, and taste will get weaker. Our bodies start sagging and the brain becomes weaker too. That is *vipariṇāma-dukkha*.
- So, what do most of us do? We start looking for ways to “prop them up”: We can take temporary measures by wearing glasses and hearing aids, adding more spices/food, and doing cosmetic procedures to maintain the body’s appearance. There is absolutely nothing wrong with some of these “fixes”; for example, we need to see, so we must take precautions to protect our eyes and start wearing glasses. Ditto for hearing aids and even for adding spices to food. Some people resort to cosmetic procedures (coloring their hair, for example) to maintain self-confidence.
- These “remedies” require effort and are part of *saṅkhāra-dukkha*.

5. Note that those two types of *dukkha* can also arise due to external *rūpa*.

- For example, our houses, cars, or other “valuable things” are also *saṅkhata*, just like our physical bodies. They also undergo (both expected and unexpected) change and will cease to exist in the future. That also contributes to our *vipariṇāma-dukkha*.
- We also need to work to repair them and try to maintain them to our satisfaction. That is also part of *saṅkhāra-dukkha*.
- During both types of *saṅkhāra* generation, we will generate *kamma* that will lead to *kamma vipāka*. Those manifest as *dukkha-dukkha*. For example, if a woman gets a “facelift,” she must go to a surgeon and pay. If we need to repair a car, we must take it to a mechanic and pay him. All these activities involve *dukkha-dukkha*.

Mental Stress – Big Part of *Saṅkhāra-Dukkha*

6. The leading cause of suffering is in our MINDS. For example, a wealthy person may suffer due to losing something he owns, and a poor person may suffer due to the inability to get what he wants. Either person becomes distraught due to his/her mind activities: attachment to what one has or craving for what one desire. This is another aspect of the Pāli term *anicca*. It is primarily mental and is called “*saṅkhāra dukkha*.” It arises through the struggles we engage in, to maintain things to our satisfaction.

- For example, when we buy a lovely house, endless things need to be done to “maintain it to our satisfaction”; this is also part of *saṅkhāra dukkha*. Sometimes we don’t even realize this suffering. Think about how much work we do to prepare a nice meal; then we enjoy it in 10-15 minutes, and then we need to spend more time cleaning up. We slaved through hours to get a brief sensory pleasure.

We Engage in *Saṅkhāra* Due to *Avijjā*

7. The suffering that we discussed so far arises from one aspect of *anicca*: Anything in this world is subjected to decay, and destruction, nothing in this world is exempt from that. That is part of “*vipariṇāma dukkha*,” suffering that arises due to changes and decay (both expected and unexpected.)

- *Saṅkhāra-dukkha* is associated with maintaining our internal *rūpa* and acquiring and maintaining external *rūpa*. All such efforts require thinking, speaking, and bodily actions; they involve *mano*, *vacī*, and *kāya saṅkhāra*. See, “[Saṅkhāra – What It Really Means](#).”
- *Dukkha-dukkha* arises even without us realizing it, while we seek remedies for *vipariṇāma dukkha* with various activities involving *mano*, *vacī*, and *kāya saṅkhāra*. That leads to the *kamma* generation. Part of such *kammā* will bring *vipāka* into this life, primarily as physical work.
- As we will discuss, if they involve *abhisāṅkhāra*, those will lead to *kamma vipāka* in future lives.

Three Types of *Dukkha* in the Rebirth Process

8. “*Saṅkhāra*” means “*saṇ*” + “*khāra*” or our efforts to accumulate/maintain things in this world (both internal and external) to our satisfaction. Any *saṅkhata* (both internal and external) arises due to such efforts. See, “[Saṅkhāra – What It Really Means](#).”

- (Note that any action to live in this world involves *saṅkhāra*. For example, breathing is a *kāya saṅkhāra* that does not have *kammic* consequences. **Those that involve *lobha*, *dosa*, and *moha* are a particular type of *saṅkhāra*; they are *abhisāṅkhāra***. But this distinction is not always emphasized (like in “*avijjā paccayā saṅkhāra*,” but one needs to be able to figure that out.)
- In the end, all such efforts are in vain. No matter how much effort we make, our bodies will fall apart at old age (or even earlier), and when we die, we will have to leave behind all those external “valuables” that we accumulated with much effort. That is why we say *saṅkhāra* arise due *avijjā*, i.e., “*avijjā paccayā saṅkhāra*.” **All our efforts (based on “*saṇ*” (greed, anger, and ignorance) are due to *avijjā*!**
- “*Abhisāṅkhāra*” generation is the root cause for the generation of all types of *saṅkhata*, internal and external. That takes place via *Akusala-mūla Paticca Samuppāda*.

9. In that broad sense, the three types of *dukkha* can be attributed to the three stages of a *saṅkhata*: *uppāda* (arising,) *vaya* (destruction,) and existence (*ṭhiti*.) The three stages are stated in the “[WebLink: suttacentral: Saṅkhatalakkhana Sutta \(AN 3.47\)](#).”

- The three types of *dukkhatā* correspond to the three *lakkhaṇa* of a *saṅkhata*.
 - A *saṅkhata* arises due to *Paticca Samuppāda* starting with “*avijjā paccayā saṅkhāra*.” Thus the “*uppāda lakkhaṇa*” of a *saṅkhata* is associated with *saṅkhāra dukkhatā*.
 - Any *saṅkhata* will eventually be destroyed and has the “*vaya lakkhaṇa*.” That is the *vipariṇāma dukkhatā*.
 - In between birth and death, a *saṅkhata* exists (*ṭhiti*). However, it undergoes unexpected change (*aññathā*), and that gives rise to *Dukkha dukkhatā*. That is expressed by, “*titthassa saṅkhata lakkhaṇam, dukkha dukkhata*.”
- Note that such unexpected changes (*aññathā*) take place due to *vipāka* of *kamma* done previously with (*abhi*)*saṅkhāra* via “*avijjā paccayā saṅkhāra*.” Thus, *Dukkha dukkhatā* manifests as *kamma vipāka*.

10. The *Petakopadesa* — a Commentary in the *Tipiṭaka* — explains how the three types of *dukkhatā* correspond to the three *lakkhaṇa* of a *saṅkhata*. See “[WebLink: suttacentral: 5. Hāravibhaṅgapañcamabhūmi](#)” in the first paragraph. It is hidden!

“*Tattha tīṇi saṅkhatalakkhaṇāni tisso dukkhatā uppādo saṅkhatalakkhaṇaṃ, saṅkhāradukkhatāya dukkhatā ca saṅkhatalakkhaṇaṃ, vipariṇāmadukkhatāya dukkhatāti aññathattaṃ ca saṅkhatalakkhaṇaṃ, dukkhadukkhatāya ca dukkhatā,*”

Dukkha-Dukkha

11. The worst category of suffering in the rebirth process arises as *kamma vipāka* giving rise to rebirth in the *apāyā*. Beings in the *apāyā* encounter harsher suffering; in the *niraya* (lowest realm), that is all one feels.

- A person who made money by killing another or stealing from another may live well in this life (at least outwardly) but will be subjected to much suffering in the upcoming births. This is the worst category of **dukkha-dukkha**, which arises due to past immoral actions. Until the death of the physical body, even an *Arahant* is subjected to *dukkha-dukkha*.
- Therefore, the third category of suffering, *dukkha-dukkha*, arises from immoral acts (*pāpa kamma/akusala kamma*.) The severity of suffering depends on the severity of the violation. *Paṭicca samuppāda* (“*pati+ichcha*” leading to “*sama*”+“*uppāda*”) describes the underlying mechanism; see, “[Paṭicca Samuppāda – “Pati+ichcha” + “Sama+uppāda”](#),” where it is briefly discussed how one’s actions lead to effects that are similar “in-kind.”
- The results of our actions will not be according to our wishes. Instead, they will be according to root causes (*lobha, dosa, moha*) and prevailing conditions at any time. *Paṭicca samuppāda* is Nature’s law-enforcing mechanism.

Dukkha-Dukkha in Rebirth Process Is Delayed Results of “Bad Saṅkhāra”

12. All our actions (including speech and thoughts) are initiated by *saṅkhāra*. Thus, *dukkha-dukkha* arises from the worst forms of *saṅkhāra* (involving *lobha, dosa, and moha*.) which we call immoral actions (*pāpa kamma/akusala kamma*.) This *dukkha-dukkha* is the main form of suffering discussed in the previous post, “[Introduction – What is Suffering?](#)”

- Everything happens due to a reason (causes). Doing a good deed will lead to good results, and evil deeds will lead to bad results. This is the basis of science and also how nature works. “Every action has a reaction.” It is guaranteed, sooner or later.
- This is why rebirth is a reality of nature. Some people live lavishly with money earned by immoral deeds. They WILL suffer the consequences in future rebirths.
- It also explains why different people are born with different levels of health, wealth, beauty, etc., and why there are innumerable varieties of animals with different levels of suffering. Those are all results of evil deeds done in previous lives.

Saṅkhāra-Dukkha Gives Rise to All Dukkha

13. The “[WebLink: suttacentral: Vicayahāravibhaṅga \(Ne 5\)](#)” in the *Petakopadesa* states the following: “*Saṅkhāradukkhatāya pana loko anupādisesāya nibbānadhātuyā muccati, tasmā saṅkhāradukkhatā dukkhaṃ lokassāti katvā dukkhamassa mahabbhayanti.*”

- The meaning is “If *saṅkhāra-dukkha* can be overcome, one will get to *Nibbāna*. Therefore, *saṅkhāra-dukkha* is the one with great danger (*mahabbhaya* or *mahā + bhaya*.)”
- An average human perceives the cultivation of (*abhi*)*saṅkhāra* as “pleasure.” An extreme example is raping a woman seeking sensory gratification. That involves *vacī* (planning/thinking) and *kāya* (implementing) *abhisāṅkhāra*. It could be enjoyable at that time. However, he will pay for that brief gratification for millions of years. Unimaginable but true!

- Thus, any such “pleasure” is short-lived (*vipariṇāma dukkha*) and will bring unimaginable *dukkha-dukkha* in the future. **One must “see” the “hidden suffering in sensory pleasures” before getting to the *Sotapanna* stage.**
- Until then, humans see the cultivation of (*abhi*)*saṅkhāra* as “pleasure.”

9.10.3 Avijjā Paccayā Saṅkhārā

Revised April 26, 2019; August 29, 2019

“Avijjā paccayā saṅkhārā” (Ignorance as root cause for immoral/unfruitful actions and thoughts). That is the same as saying “avijjā nirodha” leads to “saṅkhārā nirodha.” All following terms in the *Akusala-Mūla paṭicca samuppāda* cycle will stop arising and **thus all suffering stop arising with the complete removal of avijjā.**

1. *Avijjā* (loosely translated as ignorance), is defined in many ways: not knowing the Four Noble Truths, not understanding the Noble Eightfold Path, not understanding the Three Characteristics of nature, not understanding *dukkha*, etc.

- All these are correct, but just reading about them is not going to help. The mind needs sees how suffering arises due to immoral and unwise actions (and thoughts).
- The *Paṭicca Samuppāda* cycle clarifies how the three kinds of suffering arise. One does not comprehend the true nature of the world, and think (and do) immoral/unfruitful things.

2. You may be wondering whether I was untruthful when I said this series will be in “plain English.” Especially If you have not read the first two posts. I did describe these three terms in plain English, and there is no easy way to get the same meaning across without using Pāli words.

- So, once I clarify them, I have to use these Pāli terms in order to keep a post to a reasonable length. One can always go back and read previous introductory posts to refresh memory.

3. The standard interpretation of “*avijjā paccayā saṅkhārā*” reads “ignorance leads to mental formations.” That does not get the underlying ideas across and also misleading. I believe that “ignorance as root cause and condition for immoral/unfruitful actions” is a better translation, and I will explain why.

First let us look at the difference between immoral acts and unfruitful acts.

- We saw that *dukkha dukkha* in the four lower realms is the worst form of suffering. And we saw the cause of that as the immoral acts done with the ten defilement or *dasa akusala*. Thus worst types of *saṅkhārā* are responsible for *dukkha dukkha* in the lower four realms.
- Why do we do any of such potent immoral acts that give rise to *dukkha dukkha* of the worst kinds in the lower four realms? Because to a very high degree of ignorance of the consequences of such acts. For example, if one does not believe in rebirth, then it is hard to see how such immoral acts can have consequences. After all, there are many people engaged in unethical behavior who seem to be enjoying life.
- Such high level of ignorance is called *moha* (which means totally covered, totally blind mind), and the closest English word is “delusion.”

- A murderer who PLANS and kills another human is a good example. He thinks that if he can plan it well, he can avoid “getting caught” by the justice system and then will not have to pay for his actions. There are MUCH WORSE consequences waiting for him, regardless of whether the police catch him or not. He does not know that he is likely to get killed a thousand times in return in future births.

4. Thus **immoral actions** like killing, stealing, etc are responsible for the worst outcomes, the worst kinds of future suffering; these are the worst forms of *saṅkhārā*.

- On the other side of the spectrum for *saṅkhārā* are the **unfruitful actions** that lead to lower levels of *saṅkhārā dukkha* in this very life. For example, when we get attached to things/people via strong attachments or dislikes, that can lead to mental suffering in this life.
- However, such unfruitful actions can also form bad habits that can grow into more significant problems with time. Someone acting with greed or dislikes habitually can tend to make those stronger and eventually grow into stronger forms of excess greed and hate, leading to immoral acts. We will discuss how this happens via the *Paṭicca Samuppāda* steps.
- Of course the severity of the consequences will be according to the severity and nature of the act: “*pati+ichcha*” leading to “*sama*” + “*uppada*”, as we will discuss in detail later. See, “[Paṭicca Samuppāda – “Pati + ichcha” + “Sama + uppāda”](#)” for the meaning of *Paṭicca Samuppāda*. When one is even willing to do immoral acts to get what one wants, the consequences will also be stronger and “in-kind.” Then there are “unfruitful acts” that can lead to comparatively minor forms of suffering in the near term but can also add up to more significant effects in the long run.
- Thus one has to think beyond the five precepts to understand the origin of *saṅkhārā dukkha*. I know I am repeating some statements, but I want to make sure to get these essential ideas across.

I hope it is clear now why “immoral/unfruitful actions, speech and thoughts” is a better translation for *saṅkhārā* than “mental formations.” *Saṅkhārā* are all mental; *kāya* and *vacī saṅkhārā* are those thoughts that LEAD TO actions and speech.

5. Now let us discuss the other erroneous aspect of the translation of “*avijjā paccayā saṅkhārā*” as “ignorance leads to mental formations.” For further details, see, “[What Does “Paccaya” Mean in Paṭicca Samuppāda?](#).”

- Ignorance (*avijjā*) is not there all the time. Even the worst criminal does not do immoral acts or even unfruitful acts ALL THE TIME. **But when he does**, such actions are done with ignorance as a root cause.
- It applies to all of us: **The more we learn Dhamma, the more we get rid of ignorance. Then will we not think or do either immoral or unfruitful things, i.e., any type of (*abhi*)saṅkhārā.**

6. **A closely related issue to think about is what kind of control we have over *saṅkhārā*.** There are three types of *saṅkhārā*: *kāya saṅkhārā* (those that lead to physical acts), *vacī saṅkhārā* (those that lead to speech), and *mano saṅkhārā* (those that automatically arise due to our *gati*).

- If we know right from wrong, we can control MOST of our **physical actions and speech**. We may even start saying something terrible and stop ourselves in the middle of the sentence.
- Depending on the emotional state of the mind, it may be not possible to control our actions under extreme stressful situations. Even a normally calm person may get into a rage if he catches his wife engaging in sex with another man. He may even kill that man in the heat of the moment.
- We also know “good people” who were tempted to do immoral things. That is especially true if the “payout or the perceived pleasure” was big enough. That is the danger of “not being free of the four lower realms.”
- More information at: “[Saṅkhārā – What It Really Means.](#)”

7. The third category, *mano saṅkhārā*, are also hard to control by will power instantly. I think we all can think about situations where it was hard to control greedy/hateful thoughts. We may start thinking about

something, and the mind takes us all over the place. Such thoughts normally involve “what we could have,” and also fantasize about all kinds of sense pleasures. **One needs to stop such thoughts and think about their consequences willfully.**

- These can only be lessened and ultimately stopped by changing one’s habits (“*gathi*”) and cravings (“*āsavas*”). That applies to *kāya* and *vacī saṅkhāra* done on “impulse” or “temptations” discussed above.
- And that comes about by realizing the unfruitfulness of any *saṅkhāra*. That is strongly related to comprehending the Three Characteristics. We will be analyzing this in the upcoming steps of *Paṭicca Samuppāda*.

8. Thus the key is to change one’s bad habits over time. Then, gradually, even such *mano saṅkhāra* will STOP FROM ARISING.

- It may be hard to believe, but a significant part of this change of habits and cravings comes from comprehending the Three Characteristics of this world. One would realize that it does not MAKE SENSE to hurt others (including animals) to get sense pleasure for oneself. That makes a BIG DIFFERENCE in one’s outlook about what a “good life is.”
- Contrary to what most people believe, a life filled with sense pleasures is not a “good, peaceful, life.” An extravagant life can eventually become a “burdened life” because our body’s ability to accommodate sense pleasures goes down as we age. This realization itself leads to “cooling down” of the mind. Anyway, as we discuss further, and if one contemplates more along with these ideas, these concepts will slowly become apparent.

9. In summary, all three kinds of suffering arise due to *saṅkhāra* that range from highly immoral acts to seemingly innocent unfruitful actions. All *saṅkhāra* arise due to *avijjā*.

- That is why “*avijjā paccayā saṅkhārā*” is the first step in the *Paṭicca Samuppāda* cycle, which ends with “*jara, maraṇa, soka, parideva, dukkha,*” all kinds of suffering.
- At the *Arahant* stage, one has removed *avijjā* (i.e., optimized *paññā*), and thus *abhisāṅkhāra* that lead to rebirth cannot arise; that is *Saupadisesa Nibbāna*. At the death of the physical body, the *Arahant* is not reborn and thus, at that time, all *saṅkhāra* cease to arise (*Anupadisesa Nibbāna* or *Parinibbāna* or “complete *Nibbāna*”).
- **That is how “*avijjā nirodha*” leads to “*saṅkhāra nirodha*.”**

Thus we can see in a simple way how suffering arises with immoral/unfruitful actions as causes. One engages in such activities due to ignorance of the true nature of the world: *anicca, dukkha, anatta*. Here we discussed how ignorance gives rise to *saṅkhāra*. In the next post, we will discuss how *saṅkhārā* leads to *viññāṇa* (or defiled consciousness). That is the next step leading to *dukkha* (suffering).

Next, “[“*Saṅkhāra paccayā Viññāṇa – 1*”](#),

9.10.4 Saṅkhāra Paccayā Viññāṇa – 1

1. “*Saṅkhāra paccayā Viññāṇa*” is normally translated something like, “with mental formations as condition, consciousness arises.” But I will show that a more accurate translation is, “Immoral/unfruitful actions and thoughts as root condition for **defiled consciousness**.”

- I will just keep the word *viññāṇa* without translating as “defiled/unfruitful consciousness” (which could become cumbersome to repeat also), because the word “consciousness” cannot fully embody the meaning of *viññāṇa*. Furthermore, *vipāka viññāṇa* (those that arise outside of “*saṅkhāra paccayā viññāṇa*”) are “just consciousness”; see #4 below.

- *Viññāṇa* is a step in the *Paṭicca Samuppāda* that describes how suffering arises; thus *viññāṇa* is NOT neutral or innocuous as the word “consciousness” or “awareness” implies; it is **DEFILED** consciousness, contaminated with immoral mental factors such as greed and hate.
- In contrast, an *Arahant* has undefiled, pure consciousness; thus an *Arahant* experiences the world without any defilements. He/she can see, hear, etc without making any type of judgement, attachment, or repulsion to what is seen, heard, etc.

Thus we need to realize that *viññāṇa* is DIFFERENT from “knowing” or “being aware”, which is what “consciousness” implies. This is very important.

2. For example, two people with opposing political views (A and B) may encounter a politician C on the street who has views compatible with those of A. Person A will be happy to meet C and may go up to C, shake his hand and talk to him enthusiastically. On the other hand, Person B will automatically have irritable thoughts about C and is likely to avoid C. In this case, A and B generated two very different kinds of *viññāṇa* upon seeing the same person.

- On the other hand, suppose there is a fourth person, D, who also knows the politician C AND suppose D is an *Arahant*. Now, person D will recognize C as that politician but will not generate any likes or dislikes about C. That is what “consciousness” is, just recognizing who or what it is without generating any biases.

3. The other main point is that *viññāṇa* is multi-faceted. **It has embedded in it one's memories as well as one's future hopes and plans**, and those lie under the surface. This is what Sigmund Freud called the subconscious. But there is no separate “subconscious”; there is only one *citta* at a time.

- The mind does this with the help of several mental factors (*cetasika*) like memory (*manasikara*) and perception (*saññā*). We will discuss that in the future.

4. For example, when I am looking at a picture I have what is called *cakkhu viññāṇa*, i.e., “visual consciousness.” This is a *vipāka viññāṇa* and is “just consciousness.”

However, if I have been planning a trip overseas that is still in the “back of my mind”; if I have been thinking about calling an old friend about whom I just thought of recently, that is also in the “back of my mind.” Thus at a given time there may be several or even many *viññāṇa* waiting to come to the surface.

- And some of those “subconscious” *viññāṇa* may disappear, if the reason for it to be there goes away for some reason. For example, if civil war breaks out in the country that I was planning to visit, I will abandon that trip and my “*viññāṇa*” for that will go away. If I stop thinking about my old friend, that *viññāṇa* for calling him up may also go away with time. Thus if a given *viññāṇa* stops getting “its food” it will die off gradually.
- The difference between *kamma viññāṇa* (those that arise due to “*saṅkhāra paccayā viññāṇa*”) and *vipāka viññāṇa* is discussed in [“Viññāṇa – Consciousness Together With Future Expectations.”](#)

5. **Now we can see how “*saṅkhāra paccayā viññāṇa*” works.** The more I think about my old friend, the more *saṅkhāra* I am generating; thus I keep “feeding that *viññāṇa*” and that *viññāṇa* for calling him gets stronger.

- The breaking out of the civil war in that country basically deprived the “*viññāṇa* for making a trip to that country” of any food (i.e., now it is not possible to visit that country), and thus the news effectively killed that *viññāṇa*.
- As always, it is best to think about your own situations and see how “*saṅkhāra paccayā viññāṇa*” works, and also how one can have many types of *viññāṇa* at the same time, even though only one is at the forefront at any given time.

6. **There is another way that *viññāṇa* can be divided into two main categories.** One is the “base level” of *viññāṇa* for an existence or *bhava*. For example, if a deer is reborn as a human, then that lifestream will now have a “higher base level of *viññāṇa*” suitable for a human. Whereas a deer cannot sort out right from

wrong, a human can. Thus at the end of a given “*bhava*” (say as a deer), that lifestream gets new, higher “base level” of *viññāṇa*.

- The other main category of *viññāṇa* is the numerous types of *viññāṇa* that arise in a given existence that we discussed above. What we perceive through the six senses (eye, ear, nose, tongue, body, and mind) gives rise to six types of consciousness: vision, hearing, smell, taste, touch, and concepts. Based on those, we can have infinite types of *viññāṇa* as we discussed above. These types of *viññāṇa* are now in accordance with the type of existence or “*bhava*.” For example, a deer does not perceive what is seen at the same level of consciousness as a human, even if both are looking at the same thing. Sometimes there may be differences in sense faculties too: a bat cannot see but uses sonar to find its way around. Furthermore, as we discussed above, there are many types of “subconscious” *viññāṇa* as well.
- There are many new concepts introduced in these introductory posts that are critical. One may need to go back to previous posts and re-read in order to grasp these important concepts.

7. Based on those two categories, there are two main *Paṭicca Samuppāda* cycles that describe life “in this world of 31 realms”:

- One describes how the “base level” of *viññāṇa* changes at the end of a “*bhava*”, say when a deer is reborn as a human. Here a given lifestream can make a transition from a lower base level of *viññāṇa* to a higher (e.g., deer reborn as a human) or vice versa (e.g., human reborn as a deer). This is the “*paṭisandhi Paṭicca Samuppāda*” cycle.
- The other *Paṭicca Samuppāda* cycle describes how a given lifestream accumulates conditions for suffering during a given “*bhava*.” This is where we experience *viññāṇa* through our daily activities. This is the “*idappaccayatā Paṭicca Samuppāda*” cycle; see, “[Idappaccayatā Paṭicca Samuppāda](#).”

Let us discuss the *viññāṇa* associated with this latter one first.

1. *Saṅkhāra paccayā Idappaccayatā Viññāṇa*

Let us first look at how our consciousness changes basically every moment in an active day. We are being bombarded with pictures, sounds, smells, tastes, body touches, and we think about all sorts of things throughout the day. In each single case, we experience a different *viññāṇa*. This is why *viññāṇa* is very complex and multi-faceted.

1. If we take a simple example of looking at a person, there are multiple events that happens in the mind: the physical eye captures an image of the mind which is processed by the brain and sent to the mind (details of this will be discussed in the *Abhidhamma* section later). The mind instantly compares that image with previous experiences and recognizes that it is a close friend. Happy feelings may arise instantly too. If we had not seen him for a while, some old memories associated with him may also instantly pop into our mind. The sum total of all mental factors (feelings, perception, joy, etc) associated with that “seeing event” is the “eye consciousness” or “*cakkhu viññāṇa*” at that moment.

- And this is an example of a “*vipāka viññāṇa*.” We did not plan to see him, but just bumped into him.

2. But now based on this *vipāka viññāṇa*, we may decide to take some actions. We may run to meet him, give him a hug, and follow-up with even more actions. Most of these could be harmless *saṅkhāra* and our experience, consciousness, or *viññāṇa* is mostly harmless.

- However, if we instead ran into a person with whom we recently had a serious argument, that *vipāka viññāṇa* may lead to a series of “bad *saṅkhāra*” in our minds and thus lead to a totally different *viññāṇa* BASED ON those bad *saṅkhāra*. we may decide to say something bad to that person. Now we are doing *vacī saṅkhāra* that may have adverse consequences. Now our *viññāṇa* is different and we feel differently from the above case. We have an agitated state of mind, and with the slightest provocation from him, we may say or do even more harmful things.

3. When a thought arises in the mind, it has associated with it many mental factors (*cetasika*) which characterize how we feel: joy, sadness, greed, generosity, hate, kindness, etc. *Viññāṇa* encompasses all such relevant mental factors.

- In the previous example of persons A and B meeting the politician C, person A's thoughts embody happiness while person B's thoughts embody dislike.
- For a *viññāṇa* to arise, there must be some interest in the sense object. For example, we are bombarded with millions of sense inputs in a day, but we "pay attention to" only a fraction of those. Each mind has a set of "preferred items" in the background or "in the subconscious" based on the person's habits and cravings.

4. Then, the more we "feed a given *viññāṇa*" by thinking, speaking, doing things related to that, the more strong it gets. Thus we can see how "habit building" is tightly associated with *saṅkhāra*. In the same way, we can "remove a habit" by depriving that associated *viññāṇa* of its food, i.e., by stopping thinking or doing things related to it.

- And that can be done only realizing the benefits of a good habit or adverse consequences of a bad habit, which was the first step in the *Paṭicca Samuppāda*, "*avijjā paccayā saṅkhāra*." A bit of thought should make this clear. **Comprehending Buddha Dhamma takes time to think deeply about how all these things fit together. Just being able to recite the *Paṭicca Samuppāda* cycle does not bring any benefits.**

5. A simple example is "building a *viññāṇa* for getting drunk": A teenager may not like the taste of his first drink, but if he keeps doing it due to "peer pressure", he is likely to build a new *viññāṇa* for it. As he builds this *viññāṇa*, he will keep accumulating *saṅkhāra* to "feed that *viññāṇa*." He will be thinking about it, talking about it, and of course whenever has the chance he will be drinking. The more he does any of those *saṅkhāra*, that *viññāṇa* will grow. AND even when he is doing something else, that *viññāṇa* will be at close to top of the subconscious waiting for an opportunity to come up and induce him to get drunk.

- And it works the same way for any type of activity. A teenager studying for an exam, will have a *viññāṇa* for it. If he is serious about it, he will be thinking about it more, talking about it, and studying hard; all those are *saṅkhāra* too, in this case for his benefit.

The idea is to first not to do any *abhisāṅkhāra* (strong immoral *saṅkhāra*) that could lead to birth in the four lower realms. These kinds of *saṅkhāra* are the immoral acts, speech, and thoughts. We will discuss this in the next post.

9.10.5 Saṅkhāra Paccayā Viññāṇa – 2

If you are reading this without reading the earlier posts, you may be wondering whether I was being untruthful when I said this series will be in "plain English." I did describe any of the terms used here in plain English in the previous posts. There is no easy way to get the same meaning across without using such key Pāli words.

- So, once I clarify them, I have to use these Pāli terms in order to keep a post to a reasonable length, AND readable. One can always go back and read previous posts to refresh memory.

In the previous post, we discussed how *saṅkhāra* can feed and build different types of *viññāṇa* during our lifetime. The *Paṭicca Samuppāda* cycle which describes that process is the *Idappaccayatā Paṭicca Samuppāda* and we discussed the step "*saṅkhāra paccayā idappaccayatā viññāṇa*" for that *Paṭicca Samuppāda*.

- Now we will discuss how such *idappaccayatā viññāṇa* can become strong and be "carried over" to the future lives; not only that, one of such strong *viññāṇa* can even determine the next birth. That is why such strong *viññāṇa* can become "*paṭisandhi viññāṇa*" by providing the "link" to the next next life (that is what "*paṭisandhi*" means: "*sandhi*" is connection and "*pati*" is bond or making the connection).

2. Saṅkhāra paccayā Patisandhi Viññāṇa

1. When we build *idappaccayatā viññāṇa* during our lifetime as described in the previous post, such *viññāṇa* can get very strong and even get carry over to the next lives.

- In fact, some of the *viññāṇa* that we easily get “attached to” very well could be coming from previous lives.

2. For example, different people have “natural tendencies” for certain tasks (music, art, science, business, basically any type of activity). Similarly, some people are attracted to gambling, drinking, sports, etc more than others. All these are *sansāric* habits, that have been cultivated by “feeding that *viññāṇa*” over many lives.

- Unless one reduces and eventually gets rid of one’s bad habits, they can lead to bad births in the lower four realms where one can get trapped for long times. Similarly, developing good habits can lead to good births, in case one is unable to attain at least the *Sotāpanna* stage in this life.
- This is why it is very important to get rid of “bad habits” and to cultivate “good habits.” There are many posts at the site on this important topic. I cannot emphasize enough the importance of this need to change habits.

3. Following the Noble Eightfold Path is all about changing to a “good person” first; doing “*ānāpānasati bhāvanā*” does the same thing. When one does this, one **develops wisdom** to see through the Three Characteristics: *anicca*, *dukkha*, *anatta*. And that also leads to the *Sotāpanna* stage, where one is guaranteed to be free of rebirths in the lower four realms.

- By the way, many people are introduced to the wrong concept of “there is no self” (incorrect translation of the term *anatta*). Thus they get stuck, saying the term, “good person”, does not make sense (because there is no “self”); that could become a huge obstacle to any progress. While the Buddha rejected the concept of “self”, he also rejected the concept of “no-self”, because there is definitely some key personal characteristics that “flow” from one life to the next; see, “[What Reincarnates? – Concept of a Lifestream.](#)”

4. Once one is free of the four lower realms (i.e., attains the *Sotāpanna* stage of *Nibbāna*), only then one will truly realize that it is unfruitful even to wish for or work to seek rebirths in higher realms.

- But, until one attains the *Sotāpanna* stage, one MUST avoid immoral *abhisankhāra* (strong immoral actions) to avoid immoral *viññāṇa* and also engage in moral *abhisankhāra* in order to cultivate moral *viññāṇa*; this will keep one firmly on the Path and to avoid rebirth in the lower four realms until the *Sotāpanna* stage is attained.

5. If we think deeply about the suffering that we encounter in this life, *dukkha dukkha* has arisen due to whatever immoral *saṅkhāra* done in a previous life. An animal suffers more than a human, because the cause for an animal birth was a stronger immoral action done previously.

- *Dukkha dukkha* associated with higher realms (*deva*, *brahma*) is less than the *dukkha dukkha* for a human life, because the *saṅkhāra* that led to the *deva/brahma* births were merely unfruitful, they were not immoral.

6. Any birth anywhere in the 31 realms is due to a *abhisankhāra*. If it is due to a worst form of *abhisankhāra* (immoral actions) then that leads to a birth in the lowest four realms via a strong and bad *paṭisandhi viññāṇa*. Lesser *abhisankhāra* (unfruitful actions) lead to births in higher realms via “moral” *abhisankhāra viññāṇa*.

- Thus cultivating “immoral” *abhisankhāra viññāṇa* must be avoided by not engaging in immoral activities. Otherwise, “*saṅkhāra paccayā paṭisandhi viññāṇa*” could lead to “bad births”, where *dukkha dukkha* is very intense.

7. *Viparinama dukkha* associated with the current life is also mainly determined by previous action (*abhisankhāra*) that led to this life, and can be analyzed the same way as for *dukkha dukkha*.

- But the *saṅkhāra dukkha* associated with this life is due to actions (*saṅkhāra*) that we do in this life. Also, the same *saṅkhāra* that could cause future *dukkha dukkha* or *viparinama dukkha* can also give rise to *saṅkhāra dukkha* in this life as well. This is an important point to be realized; if not clear, you may want to go back and review the previous posts.
- Therefore, we CAN get rid of part of the *dukkha* (the *saṅkhāra dukkha*) in THIS LIFE by understanding Dhamma and acting and thinking accordingly. We can also stop or reduce ALL types of *dukkha* in FUTURE LIVES by this process.

If you have forgotten what these terms mean, it is a good idea to go back and refresh memory, because otherwise it will be difficult to comprehend the upcoming posts in this series as well. And these terms are critically important for grasping the message of the Buddha. *Avijjā*, *saṅkhāra*, and *viññāṇa* are key terms that must be comprehended; they do not have corresponding English words.

More on *viññāṇa* can be found at, “[3. Viññāṇa, Thoughts, and the Subconscious.](#)”

9.10.6 Viññāṇa Paccayā Nāmarūpa

Revised May 19, 2019; May 13, 2021; May 19, 2021 (#10-#12); September 9, 2022

Introduction

1. *Nāmarūpa* can have different but related meanings in different contexts. *Nāmarūpa* in the standard *upapatti Paṭicca Samuppāda* is different from the “*nāmarūpa*” involved in *idappaccayā Paṭicca Samuppāda* which takes place moment-to-moment.

- *Idappaccayā* means “what happens at this moment depending on the conditions at this moment.” Thus, it describes “events in real-time” that bring *vipāka* in real-time, in addition to *vipāka* in the future. See, “[Idappaccayatā Paṭicca Samuppāda.](#)”
- The *upapatti Paṭicca Samuppāda* process describes how *viññāṇa* energies created up to and within this life lead to future births (i.e., *vipāka* in future lives via future births). Here “*upatti*” means “birth.” See, “[Akusala-Mūla Upapatti Paṭicca Samuppāda.](#)”

Nāmarūpa in *Idappaccayatā Paṭicca Samuppāda*

2. Let us first discuss *nāmarūpa* involved in *Idappaccayatā Paṭicca Samuppāda*, i.e., how a *jāti* can arise in the current life based on one's *avijjā* (ignorance) and *saṅkhāra* (thoughts, speech, and actions).

- *Jāti* is not restricted to “births as a human, a deva, an animal.” Many different *jāti* (births) arise during the current life itself; see “[WebLink: suttacentral: Jātidhammādi Sutta Dasaka \(SN 35.33\).](#)”
- We will discuss two examples below which explain how a “thief” and a “drunkard” are “born” during the current life itself.

“*Viññāṇa Paccayā Nāmarūpa*” During a Lifetime

3. “*Nāmarūpa*” involved in *Idappaccayatā Paṭicca Samuppāda* mainly refer to those “visual images” created by the person when making an “expectation” (*viññāṇa*) to achieve/maintain a certain goal.

- Here, “*nāma*” refers to whatever the “name” given to the subject involved in the *Paṭicca Samuppāda* process, and “*rūpa*” are the associated objects themselves. **Thus, the corresponding “*nāmarūpa*” are the mental images of the subjects in question.**

4. Let us take an example. When a thief plans to steal something (say a watch from a store), the process starts with the step “*saḷāyatana paccayā phasso*,” see, “[Generating Kammic Energy in the ‘Upādāna](#)

Paccayā Bhava’ Step.” That corresponds to him seeing the watch on display and realizing that he could take it without anyone seeing it.

- That is when he starts acting with *avijjā* initiating a PS cycle at “*avijjā paccayā saṅkhāra*”; he starts thinking about the plan because of his ignorance of the consequences.
- Here “*nāma*” or the name is “watch,” and “*rūpa*” is the watch itself. **But “*nāmarūpa*” is the mental image of that watch: That is formed in HIS MIND.** In addition, various other types of *nāmarūpa* related to the plan will go through his mind.
- For example, he may also make visuals of how he will be doing the stealing: “*nāmarūpa*” are the visuals he has in his mind to get the job done.
- He starts doing *vacī saṅkhāra* first: thinking to himself about how to go about stealing the watch. This is “*saṅkhāra paccayā viññāṇa*” and that gives rise to *viññāṇa* for stealing the watch.

5. The more he thinks and makes plans (i.e., makes more and more *nāmarūpa* in his mind, that future expectation for stealing that object (i.e., the *viññāṇa* for it) will get stronger.

- Here the *Paṭicca Samuppāda* process runs backward, “*nāmarūpa paccayā viññāṇa*.” This is called an “*aññamañña Paṭicca Samuppāda*.” [*aññamañña* : (adj.), mutual.]
- These forward and backward steps may run back and forth while he is planning the robbery, and the Buddha said that both *viññāṇa* and *nāmarūpa* get stronger due to this feedback. **They depend on each other and feed on each other.**
- The more he thinks about it, the stronger those *viññāṇa* and *nāmarūpa*.
- Ven. Sariputta provided a simile for this inter-dependence between *viññāṇa* and *nāmarūpa* saying it is like two bundles of hay leaning against each other and supporting each other without any other support.

A Second Example

6. Let us take another case of a teenager whose peers influence him to drink alcohol. Because of his ignorance about the consequences, he engages in such activities and also in planning activities: “*avijjā paccayā saṅkhāra*.”

- Here *saṅkhārā* includes not only drinking activities but also planning. Therefore, all three types of *saṅkhāra* are involved: *mano*, *vacī*, and *kāya saṅkhāra*.
- While he is participating in drinking he is doing *kāya saṅkhāra*; he will constantly talking about having such parties and those are *vacī saṅkhāra*; it is also in the subconscious and many times a day they come back to his mind as *mano saṅkhāra*. All these are included in “*saṅkhāra paccayā viññāṇa*.”

7. Most people do not realize it, but that process of “thinking and talking to oneself” (*vacī saṅkhāra*) can make a big impact on the formation of *nāmarūpa* and the cultivation of *viññāṇa*. Many people spend hours and hours doing that assuming it does not contribute to “*viññāṇa* (or *kamma*) formation”; see, “[Correct Meaning of Vacī Saṅkhāra](#).”

- In the above example, even when he is not drinking, such *mano saṅkhāra* comes to the mind automatically, and he starts consciously thinking about drinking activities: he visualizes pictures of “party scenes,” including friends, bottles of his favorite drink, any food that goes with it, etc.
- That conscious thinking is also *vacī saṅkhāra*, and those also strengthen the *viññāṇa* via “*saṅkhāra paccayā viññāṇa*.”
- Now those mental pictures that arise during that process are *nāmarūpa* that arise due to “*viññāṇa paccayā nāmarūpa*.” Therefore, *Paṭicca Samuppāda* steps do not just flow in one way. They can run forward and backward.

8. If the teenager keeps his bad habit of drinking, he gets trapped in that *bhava* (state of mind of a drunkard), the more “drunken *jāti*” will result, i.e., more frequently he will be drunk. When one gets excessively drunk, one tends to behave like an animal without any sense of decency. The long-term consequences could be rebirth as an animal.

- Suppose that “*viññāṇa* of a drunkard” stays strong to the time of death (the *cuti-paṭisandhi* moment at the end of his human *bhava*). In that case, it could lead to a new *uppatti bhava* via the *uppatti Paṭicca Samuppāda* process mentioned in #1 above. We will discuss this second type of *Paṭicca Samuppāda*
- The important point is that such a *paṭisandhi viññāṇa* is likely to give rise to rebirth in the animal realm, as mentioned above.

9. In both these examples, it is clear that those reverse steps also occur: “*nāmarūpa paccayā viññāṇa*” can happen, and does happen, together with “*viññāṇa paccayā nāmarūpa*.” The more one visualizes related *nāmarūpa*, the stronger that *viññāṇa* gets.

- As we saw above, this happens in other steps too (for example, “*saṅkhāra paccayā viññāṇa*” and “*viññāṇa paccayā saṅkhāra*”) and such is referred to as an “*aññamañña Paṭicca Samuppāda* step.” Here “*aññamañña*” means “inter-dependent.”
- This is especially true also for the “*saṅkhāra paccayā viññāṇa*.” The stronger the *viññāṇa* gets, one is more likely to engage in the same kind of acts, i.e., *saṅkhāra*, i.e., “*viññāṇa paccayā saṅkhāra*.” They feed on each other. This often happens in habit formation; see, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).](#)”

Viññāṇa Paccayā Nāmarūpa at Paṭisandhi (in Upapatti PS)

10. At the end of existence (*bhava*), a given lifestream jumps from one kind of existence to another. The easiest to visualize is the case of a Brahma to a Deva transition. The “*nāma*” part changes from a *Brahma* to a *Deva*, and the “*rūpa*” part changes from 2 *pasāda rūpa* for the *Brahma* to 5 for the *Deva*.

- That transition happens in the latter part of the last *citta vūthi* of the life of *Brahma*. At that *cuti-paṭisandhi* moment, the “*Brahma nāmarūpa*” dies and a “*Deva nāmarūpa*” is created by *kammic* energy. This is discussed in a bit more detail in the post “[Cuti-Paṭisandhi – An Abhidhamma Description.](#)”

11. For humans (and animals,) the situation is a bit more complex because the first type of “human *nāmarūpa*” created is a human/animal *gandhabba*.

- In the cases of a human or an animal, the second type of *nāmarūpa* forms when that *gandhabba* merges with a zygote in a womb. That *nāmarūpa* is the basis for the physical human body. So, it depends on the particular case at hand.
- Let us consider the case of a human dying and born into a deer. A *gandhabba* is involved in both lives.

Example of a Human to Deer Transition

12. In general, as soon as the *viññāṇa* for the next existence was determined at the last *citta vūthi* by the step “*saṅkhāra paccayā viññāṇa*,” the next step of “*viññāṇa paccayā nāmarūpa*” gives rise to the *nāmarūpa* for the next life.

- When human life ends, that “human *gandhabba*” will die, and at that *cuti-paṭisandhi* moment a “deer *gandhabba*” will arise.
- Thus here, “*nāma*” includes the basic level of *viññāṇa* for the new deer’s existence, which is much different from the “*nāma*” of a human. The “*rūpa*” is that of a deer and not of a human. Thus “*nāmarūpa*” makes a huge transition at the end of the “*bhava*” from human to a deer.

- Of course, now that “deer *gandhabba*” needs to be pulled into the womb of a female deer (i.e., doe) to be born a deer.

13. I have discussed previously how a “deer *gandhabba*” could be reborn many times as a deer until the *kammic* energy of the “deer *bhava*” is exhausted; see, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

- In such instances, at the death of the deer, a “deer *gandhabba*” emerges from the dead body and waits for a suitable womb for the “deer mother” to become available. Here the new “*nāmarūpa*” may be somewhat different, but still, that of a deer so any change would be minor.
- Therefore, the “*viññāṇa paccayā nāmarūpa*” gives rise to a new set of “*nāmarūpa*” only at the *paṭisandhi* to a new existence.

Viññāṇa is a key concept in Buddha Dhamma. We can analyze it at various levels, and a deeper analysis is at “[Viññāṇa Aggregate.](#)”

Next, “[Nāmarūpa Paccayā Saḷāyatana](#)”,

9.10.7 Nāmarūpa Paccayā Saḷāyatana

Revised May 25, 2019; August 31, 2019; major revision May 20, 2021; September 9, 2022

“*Nāmarūpa Paccayā Saḷāyatana*” step involves different types of *nāmarūpa* and *saḷāyatana* depending on whether it is an *Idappaccayatā* or a *upapatti Paṭicca Samuppāda*.

Āyatana and Indriya

1. First, let us discuss the difference between a *āyatana* and an *indriya*.

- We have six sense faculties: eyes (*cakkhu*), ears (*sota*), nose (*ghāṇa*), tongue (*jivhā*), body (*kāya*), and the mind (*mano*). These are the *indriya*.
- Our initial sensory inputs (what we see, hear, etc.) are due to *kamma vipāka* based on this life with a solid, physical body. Unlike *Brahma*’s “energy body,” our “solid body” can be exposed to various ailments. At the moment of experience, these sensory faculties act as *indriya*. For example, when we see an attractive person on the road, that is just “seeing the event” with the *cakkhu indriya*.
- However, based on those initial sensory experiences, we may INTENTIONALLY use those *indriya* to “enjoy that *ārammaṇa*.” Then those *indriya* become *āyatana*. In the above example, if we get attached to that attractive person and keep looking at that person, then we use our eyes as *cakkhāyatana*. In the same way, *sota indriya* becomes *sotāyatana*, and so on for all six.
- They are called *saḷāyatana* since there are six of them.

2. There is no equivalent English word for *āyatana*, so we will keep using *indriya* and *āyatana* from now on.

- **By the way, *pañca indriya* (*saddhā, satī, viriya, samādhi, paññā*) are an entirely different set compared to this set of 6 *indriya*.**
- In general, “*indriya*” means a “dominant faculty.” Those that are dominant in the interactions with the external world are the six *indriya* in #1; those dominant in spiritual advancement are the five *indriya* in *pañca indriya*.

Examples of Indriya Becoming Āyatana

3. For example, I am walking on the road and see a nice house. I just happened to see it, and my eyes (*cakkhu indriya*) were working as *indriya*; they just presented a picture of that house to my mind. It is a neutral event.

- However, if I form an attachment to the house, I start looking at it for a while (with *cakkhāyatana*). I am thinking about how nice that house is and even about building one like that. At that point, I am also using my mind as a *āyatana* (*mana indriya* now becomes *manāyatana*).
- I have formed greedy thoughts about the house and now I am accumulating new *kamma* by generating *vacī saṅkhāra* (talking to myself with *vitakka/vicāra*). I use my eyes and mind as *āyatana* (*cakkhāyatana* and *manāyatana*): I keep seeing the house and thinking greedy thoughts.

Indriya Become Āyatana With Abhisāṅkhāra

4. In many cases, when we experience a sensory event through one *indriya*, we may start using some or all of the *indriya* as *āyatana*. In another example, someone offers us a piece of a tasty cake (a *kamma vipāka*). We get the cake's taste with the tongue (*jivhā*) and like it so much we may use all six *āyatanas* to accumulate more *kamma* (smell and touch it and then ask for the recipe and think about how to make it or where to buy it).

- Those “extra activities” that we do with *āyatana* COULD BE *abhisāṅkhāra* (depending on whether greed was involved.) But just eating a cake is not *abhisāṅkhāra*; see [“Kāma Rāga Dominates Rūpa Rāga and Arūpa Rāga.”](#)
- Most of the time, we use our sense faculties as *indriya*: we see, hear, etc., many things in a day but ignore most of them. But when we experience something that we have a craving for, we start using our sense faculties as *āyatana*.
- Both types of *Akusala-Mūla Paṭicca Samuppāda* cycles operate only when we use our sense faculties as *āyatana*.
- An *Arahant* ALWAYS uses his/her sensory faculties as an *indriya*. He/she will see, hear, etc just like us, but will not get “attached to” anything.

5. However, we DO NOT use our *indriya* as *āyatana* in most situations. For example, I may become thirsty. Then I need to think about getting a glass of water or asking someone for a glass of water. Both involve *vacī saṅkhāra*. Then I drink water that involves *kāya saṅkhāra* (moving body parts.) Those are *kammically* neutral and NOT *abhisāṅkhāra*.

- In another example, suppose a robber attacks you with a knife in an isolated place. If possible, you would want to disarm him without killing or hurting him too much in the process. If that is not possible, you may want to try to run away. All those activities involve *kāya saṅkhāra*. But they are NOT *abhisāṅkhāra* that involve greed, anger, or ignorance (*lobha, dosa, moha*.) The INTENTION (*cetanā*) there is to avoid injury to both.

Saḷāyatana Means Different Things in The Two Types of PS

6. *Saḷāyatana* has somewhat different meanings in the *idappaccayatā* and *paṭisandhi Paṭicca Samuppāda* cycles. That is very much like for *nāmarūpa* that we described in the previous post.

- At birth (especially in a new *bhava* or existence), we get a “new set of sense faculties” or *indriya*. For example, if a human is reborn as a *Brahma*. A *Brahma* will have only eyes, ears, and mind. There will be only three *indriya* (or *āyatana*) instead of six for human. But we keep the term “*saḷāyatana*” in the *Paṭicca Samuppāda* as a generic term.
- Thus in *Upapatti Paṭicca Samuppāda*, we are concerned with forming a brand new set of *āyatana* for a new existence (*bhava*).

- However, when we consider the *Idappaccayatā Paṭicca Samuppāda* series, we are concerned with how the six *āyatana*s for a human change from even moment to moment. In particular, the issue is whether they are being used as *āyatana* or *indriya*.

“*Nāmarūpa paccayā Saḷāyatana*” at *Paṭisandhi* (*Upapatti* PS)

7. At the end of existence (*bhava*), a given lifestream makes a “big jump” from one kind of existence to another. At that time, the base level of *viññāṇa* for the lifestream makes a jump, and this is the “*nāma*” of the *nāmarūpa*. The *nāmarūpa* for the new existence also has a different blueprint for the new physical body, the “*rūpa*” part.

- As we did in the previous post, let us consider the case of a lifestream transitioning from a human to a deer. The basic level of *viññāṇa* changes from a human to a much lower level of a deer. This new level of *viññāṇa* together with the blueprint for the deer is in the new *nāmarūpa* of the “deer *gandhabba*” that comes out of the body of the dead human, as we saw before.
- Now when this *gandhabba* descends to the womb of a female deer, that baby deer starts to grow. Six sense faculties (*indriya*) suitable for a deer grow in that womb, which may become *saḷāyatana* at times in the future after the birth.

8. In another example, consider a human who exhausted his *kammic* energy for the human *bhava* at death, and became a *Deva* in one of the *Deva* realms. At the *cuti-paṭisandhi* transition in the last *citta vīthi* of that human, the human *gandhabba* dies. In the next moment, a *Deva gandhabba* is born.

- All *devas* are born fully formed. There is no need for a mother’s womb. That is an *opapātika* birth.
- When that human dies, his body becomes inert like a log. At that very instant, a fully-formed *Deva* appears in the appropriate *Deva* world.
- That *Deva* will have sense faculties appropriate for a *Deva*. Those are the *indriya* for the new existence. Those *indriya* can sometimes become *āyatana* depending on *Deva*’s activities.

“*Nāmarūpa paccayā Saḷāyatana*” During a Lifetime (*Idappaccayatā* PS)

9. During a given lifetime of a deer, human, or a *Brahma*, that lifestream will have a basic set of *indriya* (that become *āyatana* at times) appropriate for that existence: the sense faculties for a human are different from that of a deer or a *Brahma*.

- But during that lifetime, those *āyatana* will have minor changes (compared to the drastic changes at *paṭisandhi*) depending on the activity. *Idappaccayatā Paṭicca Samuppāda* cycle describes such changes.

An Example in *Idappaccayatā* PS

10. In the previous post, we discussed the case of a thief who is planning a theft; see #4 of “*Viññāṇa Paccayā Nāmarūpa*.” His *viññāṇa* about the theft led him to generate appropriate *nāmarūpa* (the visuals in his mind of how the theft is to be carried out).

- When he plans the theft, he will use his sense faculties as *āyatana* to do the “preparatory work.” He will read about the place to be robbed, ask for relevant information, etc. Each time he does a specific act (whether thinking, seeing, hearing, etc.), the *Idappaccayatā Paṭicca Samuppāda* cycles operate.
- Now when he is about to steal, his *indriya* becomes *āyatana*. All his sense faculties will be on high alert. He watches and listens carefully for anything unexpected, and his whole body becomes tense, pumped with adrenaline.
- All his *āyatana* will be employed to carry out the task. He will be using his body, eyes, and ears as *āyatana*. The act of stealing the watch is done with *kāyāyatana* (*kāya āyatana*) and involves *kāya abhisāṅkhāra*. It is an *abhisāṅkhāra* because it involves greed.

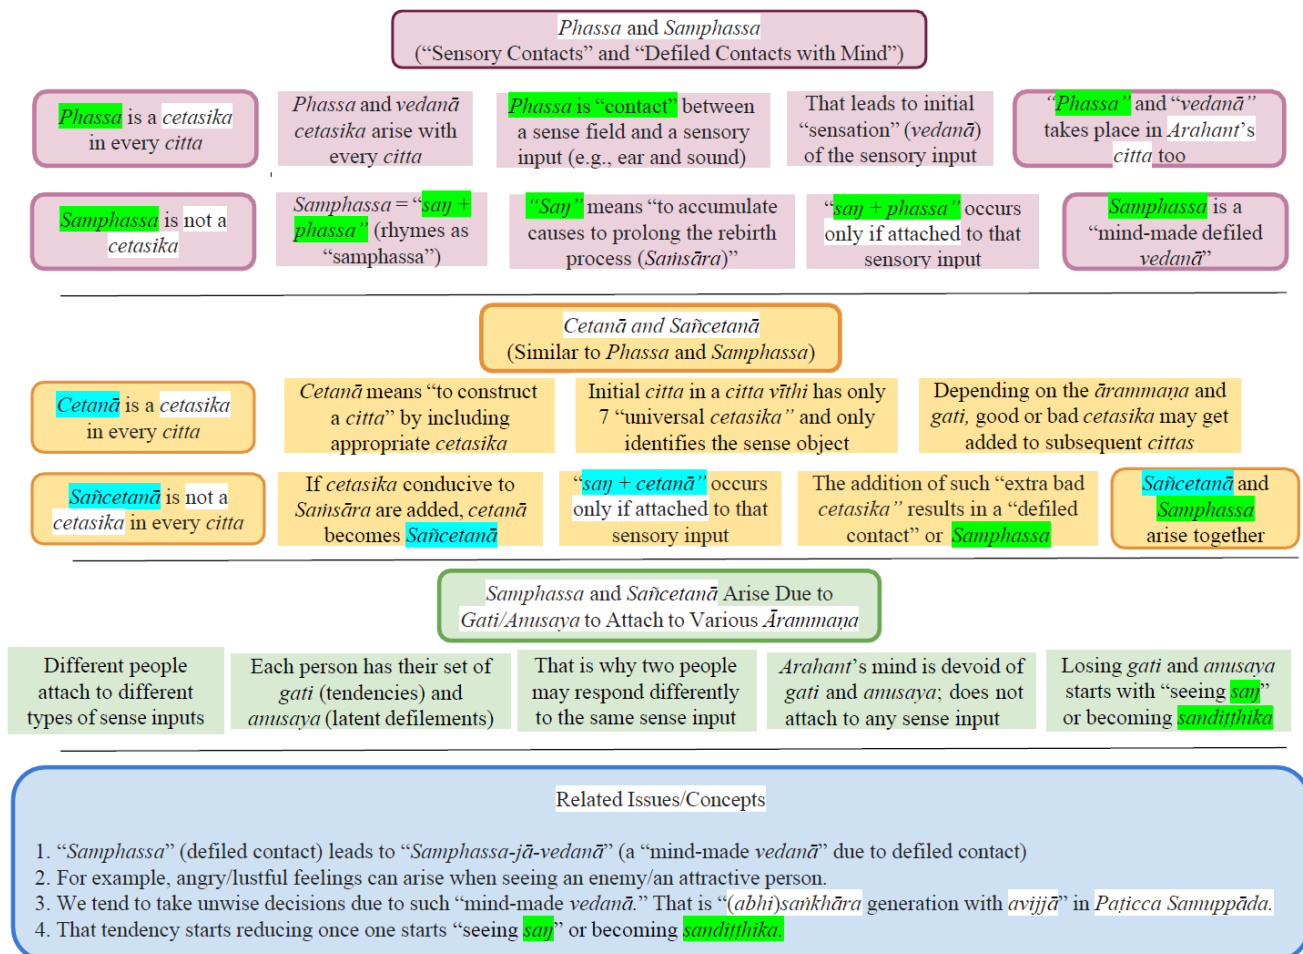

- In comparison, getting the same watch by paying for it is a *kāya saṅkhāra* where the body is used as an *indriya*. Both times he used his hand to hold the watch. It is the INTENTION (*cetanā*) that determines whether the body was used as an *āyatana* (with *kāya abhisāṅkhāra*) or an *indriya* (*kāya saṅkhāra*.)

9.10.8 Difference between Phassa and Samphassa

Revised November 6, 2018; June 2, 2019; re-written April 14, 2021; re-written May 7, 2021

“*Samphassa*” must be used for “*phassa*” in “*phassa paccayā vedanā*” in *Akusala-Mūla Paṭicca Samuppāda*.

Buddhism – In Charts: 12. Phassa and Samphassa

Download/Print: “[WebLink: PDF Download 12. Phassa and Samphassa](#)”

Phassa and Samphassa – Incorrect Translations

1. No differentiation is made between “*phassa*” and “*samphassa*” in most English translations of *Paṭicca samuppāda*. **Both words are translated as “contact” in English translations without making the distinction.**

- For example, the “[WebLink: suttacentral: Paṭiccasamuppāda Sutta \(SN 12.1\)](#)” provides the *uddesa* (utterance) version in *Paṭicca samuppāda* as “*saḷāyatanapaccayā phasso*.” The *niddesa* version of that (brief description) appears in the following “[WebLink: suttacentral: Vibhaṅga Sutta \(SN 12.2\)](#)” as “*cakkhusamphasso, sotasamphasso, ghānasamphasso, jivhāsamphasso, kāyasamphasso, manosamphasso*.”
- However, no distinction is made in the translations of the above links. Both are translated as “contact.”

- As we will see below, “*samphassa*” has a very different meaning than “*phassa*” and makes the connection of how our instinctive reactions to external sense experiences arise based on our “*saṃsāric* habits” or “*gati*.”

Phassa Is in All Citta

2. When we see, hear, etc. a *citta* arises that recognize the sensory input. Seven *cetasika* (mental factors) arise with ANY *citta*, and *phassa* and *vedanā* are two. We will have no sensory experience without the *phassa* (contact) *cetasika*.

- When the mind contacts that image of the external object, a series of *citta* arises. We experience only the overall effect of millions of such *cittā* due to that contact.
- Some of the seven universal mental factors that arise with the *citta* instantaneously identify the object. These include *vedanā* and *saññā*. Both are universal *cetasika*.
- **If *samphassa* takes place, there will be an additional, mind-made *vedanā* called “*samphassa-jā-vedanā*” as discussed below.**

Samphassa – How Does It Arise?

3. An average human will form a like or a dislike for some of the sense inputs (but not for all).

- If a like or dislike is formed, then that sensory contact is “*saṇ phassa*” (“*saṇ*” + “*phassa*,” where “*saṇ*” are defilements (greed, anger, ignorance); see, “[What is “Saṇ”? Meaning of Saṇsāra \(or Saṃsāra\)](#)”). It rhymes as “*samphassa*.”
- This “combination effect” or “Pāli *sandhi*” leads to the pronunciation of many “*saṇ*” words with an “m” sound: “*saṇ*” + “*mā*” to “*sammā*.” In the same way, “*saṇ*” “*yutta*” to “*saṃyutta*,” “*saṇ*” “*bhava*” to “*sambhava*,” and “*saṇ*” “*sāra*” to “*saṃsāra*”; see, “[List of “Saṇ” Words and Other Pāli Roots](#).” In English texts, “*Saṇ*” in combined words may be written as *Saṇ/San/Saṇ/Saṇ/Saṇ/Saṇ/Saṇ/Saṇ*. [See “[What is “Saṇ”? Meaning of Saṇsāra \(or Saṃsāra\)](#)”]
- Thus, when one sees, hears, smells, tastes, touches something, whether there will be any likes or dislikes towards that sensory experience depends on that person, or more specifically, the “*gati*” (habits/character) of that person.

Examples of Samphassa

4. Let us discuss some examples to illustrate how “*samphassa*” arises. First, let us look at the connection with those people/things in the world that we have special relationships with or what we “*upādāna*,” i.e., like to either keep close or stay away from.

- Think about the worst “enemy” you have. When you even think about that person X, you generate unpleasant feelings. But X’s family will have loving thoughts about X. Here, you and X’s child (for example) would have generated very different “*samphassa*” when thinking, seeing, and hearing about X.
- When you travel by car or bus and look out the window, you may see zillion things, but those are just “seeing”; you don’t pay much attention to them. They are “*phassa*.” But now, if you happen to see a beautiful house, it piques your interest, and you may even turn back and take another good look at it and even think about how nice it would be to live in a house like that. That is “*samphassa*.”

5. A critical point is that one’s perception of what is “valuable” can lead to “*samphassa*.” Suppose someone inherits a valuable gem from his father. Every time he sees it or even thinks about it, he becomes happy. But his mind is also burdened by it since he is worried that he may lose it; he is keeping it in a safe and has put burglar alarms in the house to protect that gem.

- Suppose one day he asks a professional to evaluate the gem and finds out that it is not a gem but a fake. He may not even believe that initially, but once confirmed, he will become “detached” from it. He will no longer keep it in the safe and may even throw it away in disgust.
- Now he may be generating neutral or hateful thoughts about the SAME OBJECT he once loved. Nothing changed about the “gem”; it is still the same object as before. What has changed is his PERCEPTION of the value of that object. Whereas he generated “*samphassa*” on thinking or seeing that object before, now he may generate just “*phassa*” (neutral feelings) or “*samphassa*” with quite the opposite feelings of disgust.

Phassa/Samphassa and Cetanā/Sañcetanā

6. *Phassa* and *cetanā* are both universal *cetasika* that arise with every *citta*. A *citta vīthi* starts with an “undominated *citta*” but gets contaminated if the mind gets attached to the *ārammaṇa*. We do not experience individual *cittās* but only the cumulative effect of millions of *cittās* that arise in a second. As *cittās* get contaminated, *asobhana* (defiled) *cetasika* are incorporated by *cetanā cetasika* it turns into *sañcetanā*. That happens simultaneously with *phassa* leading to *samphassa*.

- If the “intention” does not involve *lobha*, *dosa*, or *moha* (*avijjā*), it is only a *cetanā* or “intention” to get something done. Here, *kamma* done is just an action without *kammic* consequences. For example, if one walks to the kitchen to get a glass of water, that is done with a neutral *cetanā*; the “intention” is to quench the thirst. It is NOT a *sañcetanā*. There is no “defiled contact” or “*samphassa*” either.
- However, almost all current English translations do not make that critical distinction. For example, *sañcetanā* in the “[WebLink: suttacentral: Sañcetanā Sutta \(SN 27.7\)](#)” is translated as “intention,” and *samphassa* in the “[WebLink: suttacentral: Samphassa Sutta \(SN 18.4\)](#)” is translated as “contact.” The translators do not understand the difference between *Phassa/Samphassa* and *Cetanā/Sañcetanā*.
- A *cetanā* becomes a *sañcetanā* (*sañ* + *cetanā*) — and *phassa* becomes *samphassa* — if it involves “*sañ*” or *lobha*, *dosa*, *moha* (*avijjā*.) See “[San – A Critical Pāli Root](#)” and “[Details of Kamma – Intention, Who Is Affected, Kamma Patha.](#)”

Phassa Can Turn to Samphassa in an Instant

7. Let us take another example that Waharaka Thero gave. This one clearly shows how the transition from “*phassa*” to “*samphassa*” can happen very quickly.

The following happened a long time ago in Sri Lanka. A mother had to go overseas when her son was less than a year old. She had been overseas for many years and returned to see her son. She had not even seen any pictures of the boy, who was now a teenager. When she gets home, she is told that the boy is visiting a neighbor, and she starts walking there. On the way, she bumps into a teenager; she admonishes the teenager for not paying attention and resumes walking. But then another person on the street says, “Don’t you recognize your son? Well. How can you? You have been away all this time”. Hearing that, she says, “Oh, is that my son?” and immediately runs back and hugs him.

- She saw the boy when he bumped into her and even got upset with him. But at that time, he was just a teenager to her. That “seeing” event involved “*phassa*.”
- But when someone pointed out that it was her son, her perception of the boy took a giant leap instantly. Now she looks at the same boy with a new set of “mental baggage.” Now it is not just a teenager, but her son; attachment is involved. Now when she looks at him, “*samphassa*” is involved.

8. We can also see how “*samphassa*” leads to an **intensified** *vedanā* or feelings. This is called “*samphassa-jā-vedanā*” or “*vedanā* arising due to *samphassa*.” This “**mind-made defiled *vedanā***” is different from the universal *vedanā* as we discussed in #7 above.

- She had neutral thoughts (may be even some annoyance) when the boy bumped into her and apologized. But when she learned it was her son, her feelings instantly turned to joy.
- To take it a bit further, if that teenager got hit by a car after several minutes, that joy would turn instantly to sorrow.
- These different types of “*vedanā*” arise based on the type and level of “attachment” to a given object, in this case, the boy.

Samphassa/Sañcetanā – Connection to Gati

9. “*Samphassa*” is intimately connected to one’s “*gati*” or habits, most of which come from our past lives, even though some may be strengthened or weakened by what we do in this life. We may even start forming new “*gati*” in this life. Note that “*gati*” is pronounced “*gathi*,” like in “**Thief**.”

- For example, a young lady looking at a dress may form a liking for it. Another person seeing his enemy will form a dislike. Upon hearing a song, a teenager may form a liking/craving for it, etc.
- This “contact with *saṅ*” (or *samphassa*) happens instantaneously. That initial *samphassa* arises automatically purely based on our “*gati*.” But since our actions based on that initial reaction take some time, we still have time to control our speech or bodily actions. Even if bad thoughts come to our minds, we can stop speech or bodily actions. That is *Kāyānupassanā* in *Satipaṭṭhāna* meditation or *Ānāpānasati*.
- Many posts on this site discuss “*gati*,” and at the fundamental level, both *Ānāpāna* and *Satipaṭṭhāna* meditations are all about removing bad “*gati*” and cultivating good “*gati*”; see, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#)”.

An Arahant Has Phassa but Not Samphassa

10. Now, let us consider what happens when an *Arahant* sees or hears similar things (*phassa* or “contact” occurs.) He/she will see or hear the same thing as any other person.

- But an *Arahant* will not be attracted to it or repelled by it. There will be no *samphassa*. Thus, there will be no “*samphassa jā vedanā*” either.
- Put another way, an *Arahant* sees, hears, etc., without bias or *samphassa*. He/she will also generate *vedanā*, but not “*vedanā* due to *samphassa*.”
- An *Arahant* has removed all such defiled “*gati*,” closely related to cravings or “*āsava*.” An *Arahant* has removed all “*āsava*”; this is what is meant by “*āsavakkhaya*” at the *Arahanthood*. This is a technical detail that may not be clear to some; don’t worry about it if it unclear yet.
- ***Samphassa cannot be removed with willpower. It gradually fades away as one attains higher stages of magga phala*** (starting with comprehending “*saṅ*” by becoming “*Sandiṭṭhika*”; see below.)

Samphassa Leads to Samphassa-jā-Vedanā

11. Therefore, now we can see that the step “*phassa paccayā vedanā*” in *Akusala-Mūla Paṭicca Samuppāda* is the “*uddesa* version” and “*samphassa paccayā samphassa-jā-vedanā*” is the “*niddesa* version;” see “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#).”

- However, in most English translations, “*phassa paccayā vedanā*” in *Akusala-Mūla Paṭicca Samuppāda* is translated as “Contact is a condition for feeling” (“[WebLink: suttacentral: Paṭiccasamuppāda Sutta \(SN 12.1\)](#)”) and just below that (at the marker 3.6) “*phassa nirodha vedanā nirodho*” is translated “When contact ceases, feeling ceases.” after one attains *Arahanthood*. That INCORRECTLY implies an *Arahant* would not have feelings! However, an *Arahant* would have “*vedanā*” but NOT “*samphassa-jā-vedanā*.”

- For an *Arahant*, there is only “*phassa*” or mere contact with the external sensory input. An *Arahant* will thus “see,” “hear,” “smell,” “taste,” or “feel” the same things as any other person. But an *Arahant* will not be attached or repulsed by that sensory experience.
- I have discussed many problems with translators directly translating the “*uddesa* versions” of key verses; see “[Word-for-Word Translation of the Tipitaka](#).”
- More details on how “*samphassa*” leads to *samphassa-jā-vedanā* at: “[Vedanā \(Feelings\) Arise in Two Ways](#),” “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#),” and “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#).”

***Samphassa-jā-Vedanā* Starts to Fade Away When One Becomes “*Sandiṭṭhika*”**

12. The defiled contacts (“*samphassa*”) (and also defiled intentions or *sañcetanā*) start fading away when one becomes a *Sotāpanna Anugāmi*.

- That happens when one starts comprehending the Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa* or “seeing *saṇ*” or “*sandiṭṭhika*” (*saṇ diṭṭhi*.)
- All posts in the new section on “[Buddhism – In Charts](#).”

9.10.9 Phassa paccayā Vēdanā....to Tanhā

Rewritten May 25, 2021; rewritten with new title June 3, 2023

“*Phassa paccayā vedanā*” in *Akusala-Mūla Paṭicca Samuppāda* processes is really “*samphassa paccayā samphassa-jā-vedanā*.” That automatically leads to attachment or *taṇhā*.

Samphassa Is a “Defiled Contact”

1. In a previous post, we discussed the difference between “*phassa*” and “*samphassa*.” See “[Difference between Phassa and Samphassa](#).” To summarize:

- “*Phassa*” is pure mental contact. It is just seeing, hearing, smelling, tasting, touching, or just an arbitrary thought that comes to the mind without one’s own likes/dislikes. *Phassa* is a universal *cetasika* and is present in ALL *cittā*. Whether it is an average person or an *Arahant*, sensory contact is made with “*phassa*.”
- However, that sensory contact can turn into a “defiled contact” (*samphassa*) for an average person. For example, one may walk down the street and see an expensive ring on the road. That initial “seeing” is due to a *kamma vipāka*; that involves only “*phassa*.” But now, greedy thoughts arise, and he picks it up and quickly puts it in his pocket. He did that action with “*samphassa*” (“greedy contact.”)
- Thus, the *Akusala-Mūla Paṭicca samuppāda* involves “*salāyatana paccayā samphassa*,” even though it is usually written as “*salāyatana paccayā phassa*” in the “*uddesa*” or “brief” statement.
- Only an *Arahant* will always have just “*phassa*” and at no time “*samphassa*.”

2. Because of that “defiled contact,” a “mind-made *vedanā*” (*samphassa-jā-vedanā*) can arise in an average person but not in an *Arahant*.

- If that “mind-made *vedanā*” is a joyful/pleasant one, then one would instantly attach to that sensory contact with greed.
- If it is an unpleasant *vedanā*, one will attach with anger/displeasure, for example, when seeing a person disliked.

- One may also attach to a “neutral *vedanā*” if one is unsure about the nature of that sensory input; that can happen due to *avijjā* or ignorance.

Attachment to a Sensory Input (*Taṇhā*) Is Instantaneous

3. In all the above cases, attachment is instantaneous, and it is called *taṇhā*.

- *Taṇhā* means “getting attached.” The word *taṇhā* comes from “*thán*” meaning “place” + “*hā*” meaning getting fused/welded or attached (ආවේශ්ම in Sinhala). Note that “*tan*” in *taṇhā* pronounced like in “thunder.” See “[Pāli Words – Writing and Pronunciation](#).”
- What do we attach to? We attach to sensory inputs or *ārammaṇa*.
- Sensory inputs (*ārammaṇa*) come in through the six sense faculties, possibly leading attachment via *rūpa taṇhā*, *sadda taṇhā* through *dhamma taṇhā*: “[WebLink: suttacentral: Tanhā Sutta \(SN 27.8\)](#).” Of course, we don’t attach to every sensory input.

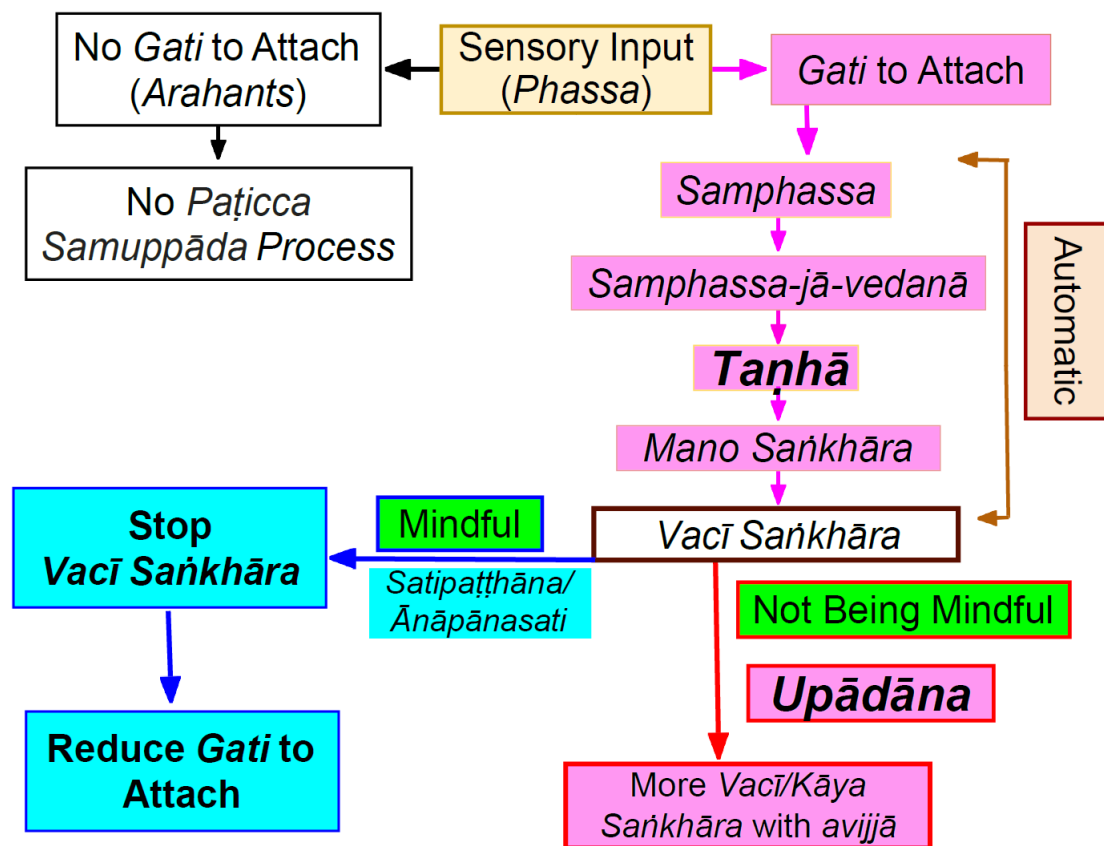

4. We attach to specific sensory inputs based on the view/perception that those can provide us happiness (*sukha*), and thus, they are fruitful (*atta*) and worthwhile pursuing. We like (*icca*) to acquire things that can make us happy and want to get rid of those things we dislike; that gives rise to a sense of “*nicca* nature” about the world.

- But the things we like are based on our *gati*. If one has a matching *gati* to attach to a type of *ārammaṇa*, the attachment happens instantaneously with exposure. **It is like a matchstick making contact with the rough surface of a matchbox; the matchstick catches fire instantly.**
- That attachment is automatic based on one’s *anusaya/gati*.
- *Taṇhā* cannot be removed directly by sheer willpower. The key to eliminating *taṇhā* is gradually reducing our *gati* to attach to certain types of *ārammaṇa*.

Reducing *Taṇhā* Can Only be Done in the *Upādāna* Stage

5. How do we gradually reduce our *gati* to attach to such *ārammaṇa*? The key to reducing such *gati* lies in the next step of *upādāna*, which starts with “*taṇhā paccayā upādāna*.”

- Once attached, “knowingly staying attached” to that *ārammaṇa* is *upādāna*. This is where we start accumulating *abhisāṅkhāra* with *mano*, *vacī*, and *kāya saṅkhāra* in that sequence. We become conscious of “being attached” in the early stage of *vacī saṅkhāra*, where we start “talking to ourselves” without speaking out. See “[Correct Meaning of Vacī Saṅkhāra](#).”
- If we get interested, we may start speaking about it; that also involves *vacī saṅkhāra*. If that interest builds up, we may take action with *kāya saṅkhāra*. In other words, we may engage in *vacī* and *kāya saṅkhāra* even for hours.
- **Unlike the instantaneous step of *taṇhā*, the mind stays in the “*upādāna*” stage for a relatively long time.**
- By being mindful, we can break that *upādāna*, which is the key to *Ānāpānasati/Satipaṭṭhāna*, as outlined in the chart below.

Tanha is Automatic

Print/Download: [“WebLink: PDF Download: Taṇhā is Automatic”](#)

“Unwise Gati” Are Cultivated

6. As discussed above, it is an immoral or unwise *gati* that triggers a sequence of events in rapid succession leading to *taṇhā*.

- Understanding how various types of *gati* are formed is critical to understanding *Paṭicca samuppāda*.
- **Even though *anusaya* moves from birth to birth, various types of *gati* are cultivated during a lifetime.**
- Without the presence of a “*gati* to attach,” *taṇhā* cannot arise!
- However, until *anusaya* are eradicated, the possibility of developing *gati* for various sensory inputs remains. Once such a *gati* is cultivated, attachment (*taṇhā*) to corresponding *ārammaṇa* is inevitable.

Removal of Gati (By Being Mindful) is the Key to the Eradication of Anusaya/Taṇhā

7. Each time we attach (*taṇhā*) to *ārammaṇa*, we strengthen the corresponding *gati* and associated *anusaya*. The reverse is true, too: Each time we stop attaching to an *ārammaṇa* at the upādāna stage, the corresponding *gati* and *anusaya* reduce too.

- That is why the cultivation of the Noble Path involves *Ānāpānasati/Satipaṭṭhāna*.

A Newborn Baby Has Anusaya, but Not Gati

8. A newborn baby does not have any *gati*. Of course, all types of *anusaya* are hidden in that baby’s mind; different types of *anusaya* keep changing but remain with a given lifestream.

- As the baby grows and the brain develops, various types of *gati* are acquired. The types of *gati* acquired will depend a lot on the environment.
- For example, a child growing up has no interest in drinking alcohol, taking drugs, or getting into fights. However, “*gati*” to engage in such activities can be acquired within a few months. Let us consider an example.

Cultivation of *Gati* to *Taṇhā*

9. Suppose there is a teenager who comes to associate with friends that belong to a street gang. They tell him that one needs to enjoy life and has to do “whatever it takes” to make money to enjoy life. If the parents do not have close contact with the teenager, there is no one to explain the perils of such a way of life, and he embraces this wrong vision or “*micchā diṭṭhi*.”

- Thus due to ignorance (*avijjā*), the teenager starts doing things, speaking, and thinking like those gang members: “*avijjā paccayā saṅkhāra*.”
- Then what occupies his mind most of the time are defiled thoughts (*abhisāṅkhāra*) and expectations (*kamma viññāṇa*) related to gang activities and seeking pleasures by using drugs and alcohol: “*saṅkhāra paccayā viññāṇa*.” Thus, a corresponding “defiled mindset” (*viññāṇa*) occupies his mind at those times. During gang activities, his thoughts are focused on them, and what is in his subconscious during other times is also related to such activities.
- Now the teenager has acquired a new *gati*.

10. **The cultivation of various types of *kamma viññāṇa* is directly related to the cultivation of corresponding *gati*.** As that *kamma viññāṇa* grows, the corresponding *gati* grows too.

- That, in turn, leads to “*viññāṇa paccayā nāmarūpa*“. He thinks about and visualizes various gang activities: How to sell drugs to make money and how he will enjoy the rest of the time hanging out with the gang.
- Thus all his six sense faculties become “*āyatana*”: they all are used to find ways to optimize the gang activities and to think about ways to “have fun”: “*nāmarūpa paccayā salāyatana*.” Now the *gati* has matured and is ready to be triggered instantaneously.
- Now, any sensory contact (*ārammaṇa*) related to a gang activity belongs to “*salāyatana paccayā phassa*” or, more explicitly, “*salāyatana paccayā samphassa*.” **As discussed above, that leads to *samphassa-jā-vedanā* and *taṇhā* automatically.**
- Further details in “[Difference Between *Taṇhā* and *Upādāna*](#).”

Gati Can be Broken Only at the *Upādāna* Stage

11. As further discussed in the post, “[Difference Between *Taṇhā* and *Upādāna*](#),” the “*taṇhā paccaya upādāna*” is a critical step in *Paṭicca Samuppāda*.

- *Upādāna* (“*upa*” + “*ādāna*,” where “*upa*” means “close (to mind)” and “*ādāna*” means “pull.” Here, it means to “stay on that *ārammaṇa*” by engaging in more *vacī* and *kāya saṅkhāra*.
- That, of course, will lead to further strengthening of the corresponding *kamma viññāṇa* and *gati*!

12. That vicious cycle can be broken only if the teenager understands the dangers of staying on that downward path.

- Someone must explain to him the dire consequences (*ādīnava*) of continuing such activities.
- It will take a considerable effort to “be mindful” and break such habits (*gati*.) But that is the only way.

Note: This post replaces the post “Phassa paccayā Vedanā....to **Bhava**.” Don’t forget to read the related post, “[Difference Between *Taṇhā* and *Upādāna*](#).”

9.10.10 Difference Between Taṇhā and Upādāna

October 25, 2018; revised November 4, 2019; December 5, 2019; March 30, 2021; September 8, 2022; May 27, 2023

Taṇhā happens automatically due to “bad *gati*.” We have control over “*upādāna*” because that is when we become aware of the “attachment.”

Introduction

1. The difference between *taṇhā* and *upādāna* is subtle, and it is critical to understand that difference. It is the key to understanding how to eliminate bad *gati* and cultivate good *gati*. That is the way to *Nibbāna*.

- That understanding is also critically important to get the basic idea behind the *Satipaṭṭhāna* (and *Ānāpānasati*) *Bhāvanā*.

2. *Satipaṭṭhāna* (and *Ānāpānasati*) *Bhāvanā* are about being mindful and catching new immoral/unwise thoughts that arise in one's mind. One should stop such thoughts immediately. If the thought is good (say about a Dhamma concept), one should stay on it.

- The English word “thought” is too simplified. It includes *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*, each of which is complex; see “[Mental Aggregates](#)” and “[Viññāṇa – What It Really Means](#).”
- *Saṅkhāra* is especially crucial since *kammic* energy for future *vipāka* is created by the three types of *saṅkhāra*: *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra*; see, “[Saṅkhāra – What It Really Means](#).”
- Therefore, we will stay with those Pāli words.

Mano saṅkhāra Arise Automatically Due to *Gati*

3. If we get interested in a sensory input (*ārammaṇa*), *mano saṅkhāra* **automatically** arises in our minds due to sensory input, **based on our *gati***.

- **We don't experience those initial *mano saṅkhāra*, and we only experience them when it comes to the next stage called *vacī saṅkhāra* (“talking to oneself”).**
- That is an important point. Even if a single word is not spoken, *vacī saṅkhārā* accumulate if one is “thinking to oneself” about that object. If one gets more interested, one may speak out, and that is still a *vacī saṅkhāra*; see “[Correct Meaning of Vacī Saṅkhāra](#).” Both types of *vacī saṅkhāra* involve *vitakka* and *vicāra cetasika*.
- If the interest builds up, one may take bodily action. Such bodily actions are initiated by *kāya saṅkhāra*.
- All three types of *saṅkhāra* arise in mind.
- The strength of *kammic* energy created increases in the following order: *mano*, *vacī*, *kāya saṅkhāra*.

4. We get “attached” to various *ārammaṇa* AUTOMATICALLY based on our *gati*. Then *mano saṅkhāra* arises automatically according to *gati*. That will happen as long as we have *taṇhā* (either via *kāma rāga* or *paṭigha*; *avijjā* is present in both cases). We automatically get attracted; see “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

- As pointed out in that post, the term “*taṇhā*” means getting attached (“*thán*” meaning “place” + “*hā*” meaning getting welded or attached (නැඹිලි in Sinhala).
- That initial attachment arises AUTOMATICALLY based on our *gati*. We don't have direct control over it.

- To stop such *mano saṅkhāra* from arising, we need to change our *gati* over time.

Importance of *Vacī Saṅkhāra*

5. If the attachment is strong enough, the mind will now start thinking about the *ārammaṇa* consciously, i.e., *vacī saṅkhāra* arise, and we become aware of these *vacī saṅkhāra*.

- As soon as we become aware of this “attachment” to something, we CAN BE mindful, think about its consequences, and move away from it. Therefore, we can stop such thoughts at the *vacī saṅkhāra* stage; see “[Correct Meaning of Vacī Saṅkhāra](#).”
- However, our minds like to enjoy such *vacī saṅkhāra*. It is easy to do and is very tempting. Many people get their sexual satisfaction from just “daydreaming” about an event in the past or sexual encounters that might occur in the future.

6. In the “[WebLink: suttacentral: Na Santi Sutta \(SN 1.34\)](#),” the Buddha defined “*kāma*” to be this “daydreaming” or “generating more and more thoughts about it”: “*Na te kāmā yāni citrāni loke, Saṅkapparāgo purisassa kāmo...*”

Translated: “World’s pretty things are not *kāma*, **a person creates his/her *kāma* by thinking about those pretty things (*rāga saṅkappa*)...**”

- That is a critical point.
- Furthermore, we “daydream” about not just sex, but other sensory pleasures too. See, “[What is “Kāma”? It is not Just Sex.](#)”
- Even if one did not physically do anything, one could accumulate a lot of bad *kamma* merely by generating such *vacī (abhi)saṅkhāra*. See “[Correct Meaning of Vacī Saṅkhāra](#).”
- The world is full of beautiful things, tasteful foods, sweet smells, etc. Seeing, tasting, and smelling them is not NECESSARILY *kāma*. For example, the Buddha accepted delicious foods but never generated *mano/vacī saṅkhāra* about them. He had removed all *gati*.

Vacī Saṅkhāra Responsible for *Upādāna*

7. Anyone who is not yet an *Ānāgāmi* is likely to generate such defiled *mano saṅkhāra* automatically. Then that leads to generating *vacī saṅkhāra* or “*kāma saṅkappa*” at some level.

- If we “go with the flow” and go along enjoying this “daydreaming” or generating *vacī saṅkhāra*, that is what is called “*upādāna*.”
- *Upādāna* means “pulling it closer (in one’s mind)” (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”). [*ādāna* : (nt.), taking up; grasping.]

8. Therefore, we cannot control the “*taṇhā*” or “initial attachment” step. It happens with *mano saṅkhāra* that arise automatically due to our *gati*.

- And those *gati* cannot be removed just by abstaining from experiencing such sensory events.
- First, we need to reduce our *gati* to attach to that type of sensory input. Stopping *vacī saṅkhāra* as soon as we become aware of them is the way to reduce bad *gati*. *Vacī saṅkhāra* are really “nutrients” or “food/water” for cultivating those *gati*.
- If we keep the bad habit of generating *vacī saṅkhāra*, that *gati* will only get stronger with time. It is essential to stop giving such “mental food” to those bad *gati*.

Killing Bad Habits by Stopping *Vacī Saṅkhāra*

9. The Buddha explained it this way: Humans cannot live more than seven days without food AND water. We will die.

- But if We stop taking solid food but only water, We can live for several weeks.
- However, one may be tempted to take in a little food. That will break the process and the clock re-starts.

10. That is the analogy for killing a habit. One can kill the habit (or the addiction) relatively quickly by doing the following. Stop *kāya saṅkhāra* (actual act, which is like solid food) and *vacī saṅkhāra* (thinking/talking about it, which is like water).

- But if we stop doing the activities (*kāya saṅkhāra*), but keep generating *vacī saṅkhāra*, then it may NEVER be removed entirely.
- So, the analogy is not that good. ***Vacī saṅkhāra* are almost as bad as *kāya saṅkhāra***, i.e., *vacī saṅkhāra* are like “snacks” (more than just water in that analogy).
- The more times we break that discipline, the longer it takes to break that habit or *gati*. That is why we must always be mindful of our thoughts, speech, and actions. That is the key to *Ānāpānasati* and *Satipaṭṭhāna Bhāvanā*.

Key to *Ānāpānasati*

11. For example, one can break the drug addiction in a shorter time (say a month) if he has the discipline to stop taking it and think about it.

- If he stops taking the drug but enjoys thinking about it (*vacī saṅkhāra*), it will not work. He may go on without using drugs for months and months, but he may lose the resolve and return to drugs one day.
- That happens to many people who are addicted to different things like alcohol, smoking, or even over-eating. They may temporarily stop those activities, but months later they break them. **That is because they had not stopped generating *vacī saṅkhāra* or engaging in *upādāna* for that activity.**
- That is the basis of *Ānāpānasati Bhāvanā*; see “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).](#)”

Paṭicca Samuppāda Process Starts With a Sensory Input

12. Most *Paṭicca Samuppāda* processes start with a sensory input making one's mind attached to an *ārammaṇa*. The following chart illustrates the processes involved.

Chart of Taṇhā and Upādāna

For a pdf file for printing: “[WebLink: PDF File: Taṇhā and Upādāna.](#)”

- As we can see, the key is to stop generating *vacī saṅkhāra*. As soon as we become aware of “bad thoughts,” we must stop them. Then, over time, that “bad gati” will reduce in strength and eventually disappear.
- Therefore, by being mindful and acting with *paññā* (wisdom, which is *vijjā* or the opposite of *avijjā*), one can reduce *upādāna* and gradually get rid of bad *gati*.
- In addition to contributing to bad *gati*, *vacī saṅkhāra* make one grasp a new “bad *bhava*” at the *cuti-paṭisandhi* moment.

Basis of *Satipaṭṭhāna* and *Ānāpānasati Bhāvanā*

13. That is the basis of the *Satipaṭṭhāna* (and *Ānāpānasati*) *Bhāvanā*; see, “[7. What is Ānāpāna?](#)” and “[Mahā Satipaṭṭhāna Sutta.](#)”

- If we are mindful, we can immediately become aware of a “bad thought” at the *vacī saṅkhāra* stage. Thereby, we CAN stop the *upādāna* step, i.e., we can decide not to “pull it closer.”
- For example, if we see an attractive person, we may automatically start looking at him/her. But once we become aware, we can look away and start thinking about something else.
- In another extreme example, we may get angry with someone and may start saying something harsh. But as soon as we realize that we are going back to our “bad old habit,” we can even stop in the mid-sentence. If we realize our mistake even after saying something terrible, we NEED TO apologize for our harsh speech. That may be difficult initially, but that is the only way to eliminate such bad habits.

14. When we start controlling the CRITICAL *upādāna* step, our *gati* will slowly change. Then, with time, the first step of “*taṇhā*” will gradually disappear.

- That is the basis of *Ānāpānasati* and *Satipaṭṭhāna* meditations.

Taṇhā to Upādāna to Bad Gati

15. A bottle of poison on a table will not harm us. It can kill someone only if he/she takes it and drinks the contents.

- It is the same with *upādāna*. There could be many “pleasing things” out there in the world. But if we understand the *anicca* nature (that those things will only lead to suffering in the end), our minds will not crave them. That will stop *upādāna*.
- For example, we know that some flies attracted to light get burned. They don’t know that even if the shiny light looks attractive, it can kill them. In the same way, a fish sees only the bait. It does not see the hook.
- We don’t touch a hot stove that is glowing red because we know that it can burn us.
- But most don’t realize that sensory pleasures only lead to suffering. Of course, one must take care of the extreme sensory pleasures first. As I always say, it is a step-by-step process; see, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#).”

16. Gradually controlling *upādāna* is the way to reduce bad *gati*, cultivate good *gati*, and eventually get rid of *taṇhā*.

- Removal of *taṇhā* is the same as removing *anusaya*.
- To be more effective, one must also reduce *avijjā* by learning Dhamma and comprehending *Tilakkhaṇa* (*anicca, dukkha, anatta* nature).

Cultivating Good *Gati* via *Vacī Saṅkhāra*

17. Of course, it works in reverse too. We can cultivate “good *gati*” by continually thinking about related things.

- For example, if a Dhamma concept comes to mind, we should cultivate it. **Then it will become a habit to think about Dhamma concepts.**
- Nowadays, when I get up, the first thing that comes to my mind is a Dhamma concept or a problem that I had been thinking about the previous day.

Summary

18. Finally, there are two things one must do to make progress on the Path.

- One is to **reduce *avijjā* by learning Dhamma.**
- The other is to **reduce *upādāna* by controlling *vacī saṅkhāra*,** as we discussed above.
- If we do both, the progress will be much faster.

9.10.11 Upādāna Paccayā Bhava – Two Types of Bhava

June 10, 2023; revised January 22, 2024 (#1, #3, #15, #16)

The “*upādāna paccayā bhava*” step in *Paticca Samuppāda* plays a critical role when accumulating *kamma* and also at the moment of grasping a new rebirth. By being mindful, we can break that *upādāna* and avoid bad rebirths. It is also the basis of *Ānāpānasati/Satipaṭṭhāna*.

Upādāna – Critical Step

1. *Taṇhā* means “attachment to an *ārammaṇa*.” It is automatic based on one’s *anusaya/gati*. Once attached, “knowingly staying attached” to that *ārammaṇa* is *upādāna*.

- As long as one has hidden defilements (*anusaya*) and the tendency to attach to specific sensory inputs (*gati*), **attachment to a particular ārammaṇa (*taṇhā*) is automatic** and instantaneous. **We don't have CONSCIOUS control over that.** It happens in the “*purāṇa kamma*” stage and must be stopped via the deeper version of *Satipaṭṭhāna*, i.e., via understanding “distorted *saññā*”; see “[Purāṇa and Nava Kamma – Sequence of Kamma Generation](#).”
 - On the other hand, ***upādāna* means “staying attached and responding to that ārammaṇa actively.”** Within a few seconds, we become aware of that attachment. The initial attachment leads to *mano saṅkhāra* (automatic), but then we start consciously generating *vacī saṅkhāra*, which is when we become aware of the attachment. **At that point, we have control over it.**
2. If we understand the harmful consequences of “staying attached,” we can willfully stop generating *abhisāṅkhāra*, i.e., stop generating immoral thoughts and actions. **That means we can stop the *upādāna* process while in the middle of it.** See “[Difference Between Tanhā and Upādāna](#).”
- If we keep breaking the “*upādāna paccayā bhava*” step, that will gradually decrease *taṇhā* via the reduction of the corresponding *gati*.
 - In addition, if we start comprehending the Noble Truths (*Paṭicca Samuppāda*), then we can start removing *anusaya* leading to the removal of *taṇhā*. See “[Phassa paccayā Vedanā...to Tanhā](#)” and #8 in “[Loka Sutta – Origin and Cessation of the World](#) (with chart #6).”

***Taṇhā* Leads to Kamma Accumulation (*Kamma Bhava*) and Grasping Rebirth (*Uppatti Bhava*)**

3. The “*upādāna paccayā bhava*” step plays a critical role in two cases:

***Idappaccayatā* PS during life:** This is where “*kamma bhava*” (“*kammic* energy”) accumulation happens in the “*upādāna paccayā bhava*” step. At this step, the mind starts cultivating more *abhisāṅkhāra* with “*avijjā paccayā saṅkhāra*.” See “[Difference Between Tanhā and Upādāna](#).”

***Idappaccayatā* PS at the moment of grasping a birth in a new realm:** This is where the mind grasps a new existence (a “*upapatti bhava*”) at the *cuti-paṭisandhi* moment. Here the step “*upādāna paccayā bhava*” happens within a *javana citta* grasping a new existence. That happens when the existing *hadaya vatthu* is dying. With the grasping of a new existence, *kammic* energy creates a new *hadaya vatthu* appropriate for the new *bhava*.

- Both involve “grasping new *bhava*.” **The first is a “temporary *bhava*” that may last only minutes to hours.** This leads to the generation of *kammic* energy that can bring future *vipāka*, including rebirth. It is called “*kamma bhava*.”
- **The second is a new existence (*bhava*) in a different realm.** This is where that “stored/accumulated *kammic* energy” is grasped to give rise to a new existence. This is “*upatti bhava*.”

Ārammaṇa* – Initiates *Taṇhā* and *Upādāna

4. All *kamma* accumulation — as well as grasping a new existence (*bhava*) — starts with an *ārammaṇa* or a sensory input.

- If the sensory input (*ārammaṇa*) is mind-pleasing, we attach to it with *kāma rāga*. If it is repulsive, we attach to it with *paṭigha*.
- Both involve *avijjā*, and sometimes *avijjā*, by itself, can lead to attachment without *kāma rāga* or *paṭigha*. For example, one may conclude that cultivating (the *anāriya* versions of) *jhāna* or *samāpatti* can be beneficial; those are based on *rūpa rāga* and *arūpa rāga*, craving existences in *rūpa* and *arūpa Brahma* realms, respectively.
- All those processes start at the “*purāṇa kamma*” stage; see #1 above.

Kamma Accumulation – Kamma Bhava

5. Kammic energies generated with *abhisāṅkhāra* are “deposited” in the *viññāṇa dhātu*. They are in three main categories: *Kāma bhava*, *rūpa bhava*, and *arūpa bhava*.

- *Āneñjābhisāṅkhāra* (generated via the cultivation of *anāriya arūpāvacara samāpatti*) accumulates energies in the *arūpa bhava*.
- *Puññābhisāṅkhāra* (generated via the cultivation of *anāriya rūpāvacara jhāna* and *puñña kamma*) accumulate energies in the *rūpa bhava* and higher realms of *kāma bhava*, respectively.
- *Apuññābhisāṅkhāra* (generated via the cultivation of *apuñña kamma*) accumulates energies in the lower realms of the *kāma bhava*.
- See “[Rebirths Take Place According to Abhisāṅkhāra](#)” for details.

6. These “*kamma bhava*” are the *kamma bīja* or “*dhammā*” that we have discussed in “[Rūpa, Dhammā \(Appatigha Rūpa\) and Nāmagotta \(Memories\)](#) (with chart #14)” and “[Where Are Memories Stored? – Viññāṇa Dhātu](#).”

- Such *kamma bīja* or “*dhammā*” automatically are sorted out into the three categories of *kāma bhava*, *rūpa bhava*, and *arūpa bhava* (and with sub-selections to specific realms) in *viññāṇa dhātu*.

Temporary “Births” in the “Kamma Bhava” Stage

7. While doing such *kamma*, one is “temporarily born” in an existence (*bhava*) corresponding to the kind of *kamma*.

- For example, during rape, one would have the mindset of an animal; during that time, one acts more like an animal than a human. Only afterward may they realize the enormity of what was done. Kammic energy corresponding to that action is also likely to contribute toward a future birth in the animal realm, i.e., that energy can lead to rebirth as an animal in a future life.
- On the other extreme, while cultivating a *jhāna*, one would have the mindset of a *Brahma*. Furthermore, the kammic energy generated will be deposited in *viññāṇa dhātu* and will definitely lead to rebirth in a *Brahma* realm at the moment of death since it is an “*ānantarika kamma*,” see below.

Appropriate Kamma Bhava Becomes Upapatti Bhava at Cuti-Paṭisandhi

8. At the *cuti-paṭisandhi* moment, an appropriate *bhava* selection happens automatically per the following rules.

- i. Kammic energies accumulated in the *arūpa bhava* and *rūpa bhava* are due to good “*ānantarika kamma*,” i.e., cultivation of *arūpa samāpatti* and *rūpāvacara jhāna*. Thus if a person had cultivated *rūpāvacara jhāna*, he would be born in a *rūpāvacara Brahma* realm. If he had also cultivated *arūpāvacara samāpatti*, he would have been born in an *arūpāvacara Brahma* realm.
- ii. *Puñña kamma* (not *jhāna* or *samāpatti*) can lead to rebirths in the higher realms of *kāma loka* (the human realm and the six *Deva* realms).
- iii. *Apuñña kamma* (with *apuññābhisāṅkhāra*) accumulate kammic energies in the *kāma bhava* also, but they lead to rebirths in the four lowest realms. There are several *ānantarika kamma*.

9. The first category belongs to “good *ānantarika kamma*,” and they lead to rebirths in the appropriate *Brahma* realm without exception.

- In category (iii), the strongest would be cultivating a “bad *ānantarika kamma*,” leading to rebirth in an *apāya* in the following life.

- The BAD *ānantarika kamma* are five: killing one's mother, killing one's father, killing an *Arahant*, shedding the blood of a Buddha, and creating *Saṅgha bhēda*. These are listed in the following link in the *Tipiṭaka*: "[WebLink: suttacentral: Nānakathā \(KN Kv 20.6\).](#)"
- Details can be found in "[Rebirths Take Place According to Abhisāṅkhāra](#)" and "[Ānantarika Kamma – Connection to Gandhabba.](#)"
- The mind is turned to a new sensory event with an *ārammaṇa*. In contrast, it is customary to say that a "sign of the pending rebirth realm" is brought to mind with a nimitta close to the *cuti-paṭisandhi* moment. Let us discuss that next.

Ārammaṇa Brings a Sensory Event During Life

10. During life, our mind shifts from one *ārammaṇa* to another rapidly.

- We have discussed *ārammaṇa*. See, for example, "[Change of Mindset Due to an Ārammaṇa](#)" and "[Ārammaṇa Plays a Critical Role in a Sensory Event.](#)"
- Some of such *ārammaṇa* are brought as *kamma vipāka*.

Nimitta of a New Existence in the Rebirth Process

11. Strong *kamma bīja* or "*dhammā*" bring rebirth in a new existence/realm at the *cuti-paṭisandhi* moment (with a *nimitta*.)

- A *nimitta* means a "sign" of the place of rebirth or a "re-enactment of a *kamma* done, or a prominent *gati*). For example, those about to grasp a rebirth in the *niraya* may see raging fires in the corresponding *niraya*. If it was a killing of a human, that past scene may come to his mind as a "*kamma nimitta*." Finally, a "*gati nimitta*" is a scene of activity one habitually cultivated. For example, an alcoholic may see "getting drunk and being unable to walk." That is a sign of an animal birth (animals walk on four legs.)

12. Some details of how *kamma bīja* (*dhammā*) brings *vipāka* (during life or while grasping a new rebirth) are discussed in "[Anantara and Samanantara Paccayā](#)." In particular, when one attains the *Sotāpanna* stage, the "*samanantara*" to bring rebirth in an *apāya* will not be there. That is why Ven. Aṅgulimāla was not reborn in an *apāya* even though he killed almost a thousand people.

- In some cases, suitable conditions to bring "good *vipāka*" may be effective. In Asian countries, recordings of *paritta* (*sutta* recital) or Dhamma discourses are played. [*paritta* : [adj.] 1. small; insignificant; little; 2. **protection**; protective charm.]

Grasping a Nimitta at Cuti-Paṭisandhi Is Automatic

13. Grasping a new rebirth happens in the last *citta vūthi* of the current life. It happens extremely fast, and we don't have any control over it. We can summarize what happens as follows.

- The strongest *kamma vipāka* (from those accumulated in *viññāṇa dhātu*) comes to mind. Suppose one committed an *ānantarika kamma* during the present life; that comes first and will be grasped without exception.
- In other cases, the strongest of all existing *kamma* waiting to bear fruit comes to mind even before the last *citta vūthi*. This process may start even a few days before the impending death. Let us consider an example to illustrate why this happens. Suppose a person has done many highly-immoral *kammās*, some even during this life. However, he has attained the *Sotāpanna* stage in this life. So, all those *kamma vipāka* potent enough to bring rebirth in an *apāya* will be automatically rejected by the mind, one by one. If a *kamma bīja* that can bring rebirth in a *Deva* realm comes next, that will be grasped; in this case, a "sign" of the *Deva* realm will come to mind, called a "*kamma nimitta*." That *kamma nimitta* may keep coming to his mind until the moment of death.

14. In the above example, suppose he did not have a strong enough *kamma bīja* to bring rebirth in a *Deva* realm (the highest realm possible for a *Sotāpanna*.) Then he will be reborn as a human again. In that last case, it is a ***gati nimitta*** because the rebirth is according to his “*Sotāpanna gati*.” He could not be reborn in a lower realm.

- The third type of *nimitta* is a “***kamma***,” meaning a specific *kamma* will re-create the scene of the past *kamma* in the mind of the dying person. For example, if he had killed someone during an argument, that complete scene would be re-created in his mind, like in a dream. If his mindset has not changed, his mind will go through the same actions as before (i.e., “*upādāna*” will occur); he will then grasp the corresponding rebirth in an *apāya*.
- Thus, the three types of *nimitta* are: ***gati nimitta***, ***kamma nimitta***, and ***kamma***.

Sequence of Removal of *Upādāna*

15. The correct order is *diṭṭhi upādāna*, *kāma upādāna*, *sīlabbata upādāna*, *attavāda upādāna*.

- One enters the Noble Path by getting rid of *diṭṭhi upādāna* via comprehending the worldview of the Buddha. This can be done only via learning the correct Dhamma.
- Then one contemplates the dangers of *kāma assāda* and gets rid of *kāma upādāna* at the *Anāgāmi* stage.
- An *Anāgāmi* has not removed “*rūpa rāga*” and “*arūpa rāga*.” Another way to say this is, “They still crave *jhāna/samāpatti*” OR “They still engage in “ways of *anāriya* practices,” and that is called “*sīlabbata upādāna*.”
- Even after removing “*rūpa rāga*” and “*arūpa rāga*,” there are three more *saṃyojana* (*māna*, *uddhacca*, *avijjā*) left in the mind of an *Anāgāmi*. Those are removed when *avijjā* is fully removed by fully comprehending “***Attato Samanupassati***” – **To View Something to be of Value**.” That means the removal of *attavāda upādāna*.
- All types start decreasing in strength at the *Sotāpanna Anugāmi* stage.

Technical Point about the Nomenclature

16. There are four types of *upādāna* as stated in the “[WebLink: Upādāna Sutta \(SN 45.173\)](#)”: *Diṭṭhi upādāna*, *kāma upādāna*, *sīlabbata upādāna*, *attavāda upādāna*.

- However, the *Tipiṭaka* Commentary “[WebLink: suttacentral: Petakopadesa \(KN Pe 5\)](#)” names the four types of *upādāna* as: “*Kāmāsavo kāmupādānaṃ*, *bhavāsavo bhavupādānaṃ*, *diṭṭhāsavo diṭṭhupādānaṃ*, *avijjāsavo attavādupādānaṃ*, *imehi catūhi upādānehi pañcakkhandhā*.”
- The other *Tipiṭaka* Commentary “[WebLink: suttacentral: Nettipakarana \(KN Ne 36\)](#)” provides a similar description: “*Tattha kabalīkāre āhāre “asubhe subhan”ti vipallāso, phasse āhāre “dukkhe sukhan”ti vipallāso, viññāṇe āhāre “anicce niccan”ti vipallāso, manosañcetanāya āhāre “anattani attā”ti vipallāso. Paṭhame vipallāse ṭhito kāme upādiyati, idaṃ vuccati kāmupādānaṃ; dutiye vipallāse ṭhito anāgataṃ bhavaṃ upādiyati, idaṃ vuccati bhavupādānaṃ; tatiye vipallāse ṭhito saṃsārābhinandinim diṭṭhiṃ upādiyati, idaṃ vuccati diṭṭhupādānaṃ; catutthe vipallāse ṭhito attānaṃ kappiyaṃ upādiyati, idaṃ vuccati attavādupādānaṃ.*”
- Thus, instead of the *sīlabbata upādāna*, both Commentaries have *bhava upādāna* listed. They mean the same thing because, as explained in #15, it refers to the craving for existence in *rūpa bhava* or *arūpa bhava*. Those who cultivate *anāriya jhāna* or *anāriya samāpatti* do that because of their desire to be born in a *Brahma* realm; they follow certain moral conduct (*sīla*) with *sīlabbata upādāna* because they have the desire to be reborn with *bhava upādāna*.

- The main goal is to understand how different types of *kammic* energies (giving rise to rebirths in various realms) are created by different types of one's own actions, i.e., *abhisāṅkhāra*.
- **That helps eliminate the wrong view (*sakkāya diṭṭhi*) that there is an “unchanging self/soul/ātman.”**

Creation of *Kammic* Energies in the Mind

3. **All the steps in the *Idappaccayatā Paṭicca Samuppāda* (PS) involve ONLY the mind and energies created by the mind.** See “[Idappaccayatā Paṭicca Samuppāda – Bhava and Jāti Within a Lifetime.](#)”

- That is why **NONE** of its steps arise for a living *Arahant*. It is critical to contemplate this point.
- However, as we have discussed many times, one must not use the *uddesa* version but the *niddesa* version of PS. Otherwise, many seeming contradictions can arise leading to confusion. See “[‘Elephant in the Room’ – Direct Translation of the Tipitaka.](#)”
- Thus, for example, “*saṅkhāra*” and “*viññāṇa*” refer to “*abhisāṅkhāra*” and “*kamma viññāṇa*.” Therefore, a living *Arahant* is fully conscious (has *viññāṇa*) and experiences *vedanā* and *saññā* (*saṅkhāra*.) Furthermore, an *Arahant* does not have *āyatana* but has sense faculties (*indriya*.)

Idappaccayatā and *Upapatti* PS

4. It is the *Idappaccayatā* PS that operates at ANY given time.

- *Kammic* energies generated in *Idappaccayatā* PS processes are “*dhammā*.” They are “*anidassana/appaṭigha rūpa*” lying below the *suddhaṭṭhaka* level, i.e., they do not belong to the 28 types of *rūpa* in the “*rūpa loka*”; see “[Nāma Loka and Rūpa Loka – Two Parts of Our World.](#)”
- **It is only at the moment of grasping a new existence (*bhava*) that a set of *rūpa* belonging to the “*rūpa loka*” (i.e., above the *suddhaṭṭhaka* level arises) via the *Upapatti* PS.** That also occurs in an *Idappaccayatā* PS cycle at the moment of grasping a new existence/rebirth. Even those *rūpas* are invisible to us: the *hadaya vatthu* and a set of *pasāda rūpa*.
- **The *Upapatti* PS only describes the overall process** (cumulative effect of uncountable *Idappaccayatā* PS cycles spanning even eons.)
- That is a critical point to understand, and we can discuss it at the forum if there are any questions.

Critical Steps Where the Mind Creates *Kammic* Energy

5. Accumulation of *kammic* energy starts with the mind attaching to sensory input (*ārammaṇa*) because one has the wrong view/perception that it can bring future happiness. That initial attachment is automatic and is based on one's *gati*: “[Change of Mindset Due to an Ārammaṇa.](#)”

- Once attached, the mind starts engaging in various types of *vacī* and *kāya abhisāṅkhāra*, and of course, that is due to the ignorance (*avijjā*) of the Noble Truths/PS, i.e., “*avijjā paccayā saṅkhāra*.” See the above chart.
- Thus, now the PS cycle jumps to the “*avijjā paccayā saṅkhāra*” step. Simultaneously, a “*kamma viññāṇa*” arises in the mind, which is an expectation based on *lobha*, *dosa*, and *moha*. “*Kamma viññāṇa*” is more than consciousness (*viññāṇa*); it has *kammic* energy! Some of these “*kamma viññāṇa*” can lead to rebirth and are specifically called “*paṭisandhi viññāṇa*.”

Nāmarūpa Formation – A Critical Step

6. With a specific expectation (*kamma viññāṇa*), the mind starts combining “*nāma*” and “*rūpa*”, i.e., generating “*nāmarūpa*.” **The mind visualizes various scenarios in *javana citta*s generating *kammic***

energy. This is the origin of “future *hadaya vatthu/pasāda rūpa*,” capable of generating *cittās*! **Nothing else in the universe can produce *cittās*.** However, since created by the mind, such a set of *suddhaṭṭhaka* has a temporary/transient existence and thus has no value; it is a mirage/ghost. **Thus the name *bhūta* (ghost)** for a *manomaya kāya* is made with a set of *hadaya vatthu/pasāda rūpa*. See “[Bhūta and Yathābhūta – What Do They Really Mean](#)” and “[The Origin of Matter – Suddhatthaka](#).”

- Both “*kamma viññāṇa*” and *nāmarūpa* are directly connected to *kammic* energy/*kamma bīja* that remains in *viññāṇa dhātu* to bring *vipāka* in the future. See “[Nāma Loka and Rūpa Loka – Two Parts of Our World](#)” and “[Where Are Memories Stored? – Viññāṇa Dhātu](#).”
- Those are critical steps that one will understand at successively deeper levels as one starts comprehending PS.
- Now the mind may go back and forth between “*viññāṇa paccayā nāmarūpa*” and “*nāmarūpa paccayā viññāṇa*” many times before proceeding to the next step of “*nāmarūpa paccayā saḷāyatana*.” This allows *nāmarūpa* to get firmly established in “*kamma viññāṇa*.” See “[WebLink: suttacentral: Nāmarūpa Sutta \(SN 12.58\)](#).”
- All steps in PS are discussed in detail at “[Paṭicca Samuppāda in Plain English](#).”
- It is a good idea to read the above links and to understand “*nāmarūpa*.”

Kamma Bhava Depends on the Ārammaṇa

7. *Kammic* energies can remain in *viññāṇa dhātu* for a long time. They are categorized into three main categories: *kāma bhava*, *rūpa bhava*, and *arūpa bhava*. That categorization can be easily seen with the type of *ārammaṇa* initiating the *kamma* accumulation.

- Any immoral deed is done with an *ārammaṇa* in *kāma loka* and thus belongs in the *kāma bhava*. Engaging in meritorious deeds may lead to rebirth in a *Deva* realm, which also is within the *kāma bhava*.
- On the other hand, one may focus on a *kaṣiṇa* object or breath and attain an *anāriya jhāna*. That is a *kamma* belonging to “*rūpa bhava*” since it leads to rebirth in a *rūpāvacara Brahma* realm.
- The third type is “*arūpa bhava*,” and *kammic* energies accumulating in this category lead to rebirths in an *arūpāvacara Brahma* realm. One must cultivate *arūpāvacara samāpatti* to accrue *kammic* energies in this category.
- All 31 realms belong to one of those three main categories of *bhava*.

8. Each main category has sub-categories according to the realm of possible rebirth. For example, the four realms in the *apāyās*, the human realm, and the six *Deva* realms belong to “*kāma bhava*.” The 16 *rūpāvacara Brahma* realms belong to the “*rūpa bhava*,” and the four *arūpāvacara Brahma* realms belong to the “*arūpa bhava*.”

- I have indicated the three main categories in the above chart.
- Also, note that a given *ārammaṇa* will initiate the accumulation of *kammic* energy in one of the three main *bhava*. See, for example, “[WebLink: suttacentral: Pathamabhava Sutta \(AN 3.76\)](#).”

Ārammaṇa to Abhisankhāra to Kamma Bhava/Dhammā

9. Most of the *ārammaṇa* we encounter belong to *kāma bhava*. They lead to *apuññābhisankhāra* (immoral deeds) or *puññābhisankhāra* (moral deeds.)

- A few humans cultivate *anāriya jhāna* by focusing the mind on a *kaṣiṇa* object or breath. Those deeds (*kamma*) also belong to the *puññābhisankhāra*. But this type of *puññābhisankhāra* leads to *kammic* energies in the “*rūpa bhava*.”

- An even smaller number of humans proceed beyond that and cultivate *arūpāvacara samāpatti*. Those involve *āneñjābhisaṅkhāra*, and accumulate *kammic* energies in the “*arūpa bhava*.”
- These are discussed in detail in “[Rebirths Take Place According to Abhisāṅkhāra](#).”

10. The critical point is that **dhammās** (with *kammic* energy) are created in *Paṭicca Samuppāda* processes that start with “*avijjā paccayā (abhi)saṅkhāra*.”

- However, we start accumulating new *kamma* (via *abhisāṅkhāra*) when we get attached to an *ārammaṇa* (sensory event.) Thus, the **initiation of PS cycles is not at the “*avijjā paccayā saṅkhāra*” step but the “(sam)phassa paccayā vedanā” step.**
- Attaching to sensory input (*ārammaṇa*) with liking (*icchā*) happens first; see the chart above. Also, see “[Icchā \(Cravings\) Lead to Upādāna and to Eventual Suffering](#).”

The Meaning of “Dhammā”

11. “*Dhammā*” means “to bear.” They bear the *kammic* consequences of one’s actions and play a critical role in rebirth.

- “**Vipāka-bearing kammic energy**” of a *kamma* stays in *viññāṇa dhātu* (or *kamma bhava*) as “*kamma bīja*” or “*dhammā*.”
- Just like a *rūpa* can bring in a sensory input via the five physical senses, *dhammā* can directly bring a sensory input (memory of a previous *kamma*) to the mind.
- While the five types of *rūpa* (*vaṇṇa, sadda, gandha, rasa, phoṭṭhabba*) belong to the “material world” made of *suddhaṭṭhaka*, “*dhammā*” are below the *suddhaṭṭhaka* stage.
- As we know, a *suddhaṭṭhaka* is the smallest unit of matter in Buddha Dhamma belonging to the 28 types of *rūpa* made with the four elements of *pathavi, āpo, tejo, vāyo*. In contrast, *dhammā* are “*upādāya rūpa*.”

Dhammā Are Energies Below the Suddhaṭṭhaka Stage

12. Unlike the other five types of *rūpa*, *dhammā* cannot be seen (*anidassana*) or touched/detected even with most sensitive instruments (*appaṭigha*) and is detectable only with the mind (*dhammāyatana pariyāpannam*). Again, they do not belong to the 28 types of *rūpa* in *Abhidhamma*.

- That is explained in the last verse of “[WebLink: suttacentral: Tikanikkhepa \(Abhidhamma Ds 2.3.1\)](#)” in *Dhammasaṅgaṇī* as, “*yañca rūpaṃ anidassanaṃ appaṭighaṃ dhammāyatanapariyāpannam; asaṅkhatā ca dhātu—ime dhammā anidassana appaṭighā*.”
- Also see “[Anidassana, Appaṭigha Rūpa Due to Anidassana Viññāna](#).”
- Therefore, **dhammās bear the fruits of kamma!** They can bring *vipāka* in the future.
- See “[What are Rūpa? – Dhammā are Rūpa too!](#)” for details.

13. All such *dhammā* generally appear in two forms: **dhammā** and **adhammā**.

- The word **dhammā** generally refers to “**good dhammā**.” Those that arise due to “**bad kamma**” are “**adhammā**.”
- “[WebLink: suttacentral: Dhamma Sutta \(AN 10.182\)](#)” provides a direct explanation. “Killing, stealing, sexual misconduct, lying, divisive, harsh, or idle speech, greed, ill will, and wrong view. Those ten are **adhammā**. Abstaining from such actions (and having the mindset of generating “good *javana* power”) leads to **dhammā**.”
- However, both **dhammā** and **adhammā** belong to the **dhammā** category. It is just that **adhammā** “bear the fruits of bad *kamma*” and **dhammā** “bear the fruits of good *kamma*.”

- The word “smell” indicates all types of odors, but if someone says “it smells,” that means it is a “bad odor.” That is the accepted usage. In the same way, *dhammā* may sometimes mean the “good type” but generally includes both. For example, *dhammā* in “*mañña paṭicca dhamme ca uppajjati mano viññāṇaṃ*” includes both types.

What Is Buddha Dhamma?

14. Dhamma (with the upper case “D” and short “a”) refers to Buddha’s teachings. In contrast, “*dhammā*” with lowercase “d” and long “a”) refers to *kammic* energies that can bring *vipāka* in the future.

- Furthermore, Buddha Dhamma makes accumulated *dhammā* ineffective, thus leading to *Nibbāna*. For example, Aṅgulimāla killed almost a thousand people and was heading to rebirth in an *apāya*, but he avoided that because he attained *Arahanthood*.
- The word Buddha comes from “*bhava*” + “*uddha*”; here, “*bhava*” means “existence (in the 31 realms),” and “*uddha*” means “removal” or “making ineffective.” Therefore, a Buddha figures out how to stop the rebirth process and thus end future suffering.
- **Thus, “Buddha Dhamma” is “*bhava uddha dhamma*.”** It mainly refers to the **teachings of the Buddha** that lead to *Nibbāna*, i.e., to the “stopping of future existence/rebirths.”
- Also, see “[Dhamma and Dhammā – Different but Related](#).”

“*Sabbe Dhammā Anattā*”

15. I have seen in discussion forums people state, “*sabbe dhammā anattā*” means Buddha Dhamma is also *anattā*!

- As we discussed above, *dhammā* is different from Buddha Dhamma.
- “*Sabbe dhammā anattā*” applies only to *dhammā* (accrued *kammic* energies) and not to Buddha Dhamma.
- Even though “good *dhammās*” lead to rebirth in human, *Deva*, and *Brahma* realms, they are ultimately useless because those existences are only temporary. At the end of such “temporary lives,” rebirth in lower realms (*apāyās*) is inevitable unless one starts on the Noble Path by attaining at least the *Sotāpanna Anugāmi* stage.

9.10.13 Bhava Paccayā Jāti....Jarā, Maraṇa,...

Revised June 16, 2019; re-written May 24, 2021; May 29, 2021; revised June 6, 2023

An existence (*bhava*) can result in this life (*kamma bhava*) or future lives (*upapatti bhava*). Both types lead to more suffering in the end. Repetition of *kamma bhava* (i.e., engaging in similar activities) adds to *kammic* energies (*kamma bīja*) that can fuel future *upapatti bhava*.

Kamma Bhava and Upapatti Bhava

1. In a previous post (“[Nāmarūpa Paccayā Salāyatana](#)”), we discussed how repeated immoral actions of a teenager could bring about a specific type of existence (*bhava*) during the current life. That is a “temporary existence” (in that example as a drunkard/alcoholic). Still, it **creates *kammic* energy that will remain as *kamma bhava***.

- We also discussed how such *kamma bhava* could get stronger with time and become strong enough to lead to a new existence at death. **This is called a *upapatti bhava***.
- Therefore, there are two types of “*bhava*”: those that can bring about “experiences” during the current life (*kamma bhava*) and those that become strong enough to power a whole new existence (*upapatti bhava*).

- This is explained in the “[WebLink: suttacentral: Pattecasamuppāda Vibhaṅga](#)”: “*Tattha katamo upādāna paccayā bhavo? Bhavo duvidhena—atthi kamma bhavo, atthi upapatti bhavo,*” i.e., “What is upādāna paccayā bhavo? Two types of bhava – kamma bhava and upapatti bhava.”
- This is why the Buddha emphasized the importance of the *Idappaccayatā Paṭicca Samuppāda*. *Avijjā* is NOT there all the time. Any unwise action done at a given time is due to *avijjā* present AT THAT TIME. See, “[WebLink: suttacentral: Avijjā Sutta \(AN 10.61\)](#)”: “*Purimā, bhikkhave, koṭi na paññāyati avijjāya: ‘ito pubbe avijjā nāhosi, atha pacchā samabhavī’ti. Evañcetaṃ, bhikkhave, vuccati, atha ca pana paññāyati: ‘idappaccayā avijjā’ti.*” Thus, ***avijjā* may arise based on the conditions at a given time**, mainly depending on the *ārammaṇa* (sensory input.)
- One’s actions (*kamma*) DURING a lifetime lead to the accumulation/growth of different types of “*kammic* energies;” strong ones will lead to rebirths. Of course, in some cases, a single immoral action (like killing a human) can lead to a bad rebirth.

Bhava as a “Seed”

2. Another way to look at the “*bhava*” concept is to treat it as a seed. As we discussed in the previous post, when we act with ignorance (and greed or hate), that helps the **growth of a *kamma* seed (*kamma bhava*.)** With more related *kamma* done, that seed can grow and bring **a new birth (*jāti*) in the future (with *upapatti bhava*.)** This concept of a *kamma* seed is easier to comprehend.

- Just like an ordinary seed **has the potential** to give rise to a plant, a ***kamma* seed (or a “*bhava*”) has the potential to bring about a “*jāti*” or a “birth,”** either during this life or in preparing a new life.
- Of course, once the *Arahanthood* is attained, an *Arahant* will not grasp another *bhava* (since there is no *upādāna*.) Thus even if there could be many *kamma* seeds, they don’t get to “germinate.” Ven. Aṅgulimāla’s account is a good example. See, “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma](#).”
- I write it as *jāti* (the conventional “*Tipiṭaka* English”), but it is pronounced “*jāthi*.” See, “[Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)”

An Example from the Previous Post – Bhava and Jāti During a Life

3. Let us take the example of the teenager we discussed in the previous post, “[hassa Paccayā Vedanā...to Tanhā](#).” Because of the influence of his friends, the teenager starts dealing and using drugs and gradually gets drawn into the gang to become a gang member, and eventually starts doing violent acts of beating and killing people.

- When he did the first beating, his friends probably encouraged or even forced him to do it. Let us suppose he did not have a *samsāric* habit of doing that violent act. So, when he did the first act, that engendered a small *kamma* seed (or a “*bhava*.”)

4. The next time he did something similar, this initial *kamma* seed made it easier for him to do the second act. Once he did that, the seed got bigger, and the next time he may not need much encouragement, and so on. The more he does it, the more easily he can get into that “*bhava*,” i.e., the stronger the *kamma* seed becomes.

This is none other than many *Idappaccayatā* PS cycles running that start with “*avijjā paccayā saṅkhāra*” (doing immoral deeds due to *avijjā*) and lead to “*upādāna paccayā bhava*,” making the corresponding *bhava* (or *kamma* seed) strong.

- This is another way of expressing “habit (*gati*; pronounced “*gathi*”) formation” that I have discussed in many other posts. The more one does actions suitable for a specific “*bhava*,” the *viññāṇa* for similar behavior grows, and it is easier for one to be “born” in a corresponding state; this is “*pati+ichcha*” leading to “*sama+uppāda*” as pointed out in the introductory post, “[Paticca Samuppāda – “Pati+ichcha”+” Sama+uppāda](#).”

- Thus, the more the teenager acts violently, the easier it becomes for him to be “born in that state,” i.e., easier/habitual for him to do similar acts.
- In other words, repeated *saṅkhāra* leads to strengthening the corresponding mindset or *viññāṇa*, and it propagates down the *Paṭicca samuppāda* series to make “*kamma bhava*.”

5. Now let us consider when that *kamma* seed or “*kamma bhava*” gives rise to a “*jāti*” in *Idappaccayatā Paṭicca samuppāda*. One day, his drug deal is sabotaged by a rival gang member, and he gets angry. He is easily “born” in that “animal-like violent state.” He starts beating up that guy. This is a “*jāti*” or “birth” in a violent existence.

- When the beating is almost done, that “*jāti*” is almost over with; it is at the “*jarā*” (decay) stage, and when it is done, that is the end or death (“*maraṇa*”) of that “*jāti*.”
- Thus when that episode is over, that temporary “*jāti*” of “a violent existence” is over.
- The rest of it, “*soka, parideva, dukkha, domanassa*” or many forms of suffering, comes later in that life or even in future births. The *kamma* seed that helped him do that act itself got even stronger.

6. That violent action now gives rise to another *kamma* seed.

- Now, if during that confrontation with the other rival gang member, he gets beaten up, then that is due to a *kamma vipāka* of that new *kamma*.
- In either case, that “birth” or “*jāti*” (the confrontation with the rival gang member) would give him only misery at the end: “*soka, parideva, dukkha, domanassa*.”
- Many such *Idappaccayatā samuppāda* cycles can operate during even a day, and he may be “born” repeatedly in that confrontational state. Some may be minor, like getting mad at his friends, but some could be violent. He has prepared the “*bhava*,” and he can get into “*jāti*” or be “born in that *bhava*” easily.
- Just like when a seed is made, it is easy to get that seed to germinate. Once we prepare a “*bhava*,” it is easy to be born in that type of existence.

7. Now, we can see that a “*bhava*” or a “*kamma* seed” is the potentiality for a particular kind of existence or a “state of mind” during the current life itself.

- He can easily transition to that “state of mind” (or *bhava*). For example, he may have a good time with his family and be in a “normal state of mind.” Then he gets a phone call from a fellow gang member asking for his help with the gang-related activity.
- He will instantly be transitioned to the “gang mentality” and be born a gang member. Then he will engage in whatever gang activity.
- But any birth (or *jāti*) will come to an end. When that activity is over, he may come home and be part of the typical family life.
- However, that “bad *jāti*” will ALWAYS lead to “*jarā, maraṇa, soka, parideva, dukkha domanassa*.” Even if that particular was successful and left there happily, that ACTIVITY will lead to suffering in the future. He had accumulated more *kammic* energy for that “bad *bhava*.”

8. But the important thing to remember is that “*bhava paccayā jāti*” **does not mean he is guaranteed to be born in that state**. He will likely be born in that state under suitable conditions, for example, upon urged by friends.

- But if he comes to his senses and realizes the perils of such actions, he can make an effort and slowly degrade the potency of that *kamma* seed. The first thing is to stop doing those more violent acts. If the teenager has enough determination and moral support from his family, he may get into the moral path.
- If he determines to change, it will be challenging in the beginning. It is like trying to stop a moving car. If the car has a lot of speed, it takes a considerable effort to stop. It is easier to stop a slowly moving car

before it gains speed. In the same way, it is easier to revert if one realizes that one is on the wrong path early.

Same Example – Future *Bhava* and *Jāti* (via *Upapatti* PS)

9. If the teenager does not change his ways but only gets involved more and more with violent activities, then that *kamma* seed (or *kamma bhava*) will grow bigger and can become strong enough to energize a whole new existence (rebirth) or “*upapatti bhava*.” Or he can even make a single huge *kamma* seed by killing someone.

- We all likely have acquired several or even many such large bad *kamma* seeds (i.e., many bad “*upapatti bhava*”) suitable to yield rebirths in the lowest four realms; we have no way of finding out.
- Of course, we are also likely to have many good *kamma* seeds (i.e., many good “*upapatti bhava*”) suitable to yield rebirths in the higher realms.

No Control Over the Next *Bhava* (in *Upapatti* PS)

10. And we do not have any control over which “*upapatti bhava*” is selected at the end of the current *bhava*. The strongest with the most “*upādāna*” associated gets to the front automatically. The Buddha gave a simile to explain how this selection of a “*upapatti bhava*” or a strong *kamma* seed happens at the *cuti-paṭisandhi* transition at death.

- Imagine a barn that keeps the cows in for the night. All the cows are anxious to get out and roam around in the morning. But when the gate opens, it is the most muscular cow that has come to the front and is out of the gate when it is opened. The weaker ones don’t even try to be at the front.
- Just like that, it is the most potent “*kamma* seed” or a “*paṭisandhi bhava*” that wins at the *cuti-paṭisandhi* transition.
- Let us get back to the teenager that we discussed above. Suppose the *kamma* seed he nourished during this life as a violent person with “animal-like” behavior is the strongest one of all his accumulated *kamma* seeds. In that case, it will bring about an animal existence at the *cuti-paṭisandhi* transition.

11. A Buddha could analyze such a *upapatti Paṭicca Samuppāda* cycle in finer detail to pinpoint exactly what type of animal it would be. This is because a Buddha can see not only a person’s whole history in the present life but going back to many eons; thus, he can see which *kamma* seed will bring the following existence and exactly which kind of “*gati*” are embedded in that *kamma* seed. We can only discuss the general trends, and here we have discussed only the main ideas of how these *Paṭicca samuppāda* cycles operate.

- Going back to the teenager, In this case, it is the *upapatti Paṭicca Samuppāda* cycle that operates, and “*bhava paccayā jāti*” here leads to the birth in a new existence as an animal using that *upapatti bhava*.

Many Births Within a *Upapatti Bhava* – For Humans and Animals

12. Once born in such an animal existence, that animal will grow and then start old age (“*jarā*”) and eventually die (“*maraṇa*”).

- The *kammic* energy of that *kamma* seed may not deplete in just one birth (this applies only to humans and animals.)
- Since most animals have shorter lifetimes, only a fraction of that *kammic* energy is likely to have been spent. That animal will keep going through many similar births (“*jāti*”) until the energy of that *kamma* seed is spent. It is said that many animals keep coming back to the same life many hundreds of times.

13. This is the difference between “*bhava*” and “*jāti*.” Once one gets a new existence or “*bhava*,” one could have many births (“*jāti*”) in that existence until the energy of the *kamma* seed is spent. See, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

- Thus we can see that the last step of “*jāti paccayā jarā, maraṇa, soka, parideva, dukkha, domanassa*” will be with “him” for a long time to come. It is not just one birth but many that will correspond to that existence as that animal.
- In general, within the human “*bhava*,” one could be reborn many times before the energy of that “good *kamma* seed” is depleted. This is why some children can recall previous recent lives. However, it is tough to get another “human *bhava*”; see, “[Rebirth – Connection to Suffering in the First Noble Truth.](#)”
- However, especially in *Deva* and *Brahma* realms, there is only one birth during that existence as a *Deva* or a *Brahma*.

***Kamma* Seeds Removed for Those With *Magga Phala*? – No**

14. Before closing this section, let us discuss another critical point. We mentioned earlier that everyone had accumulated numerous good and bad *kamma* seeds strong enough to give rise to good and bad rebirths. Then the question arises: Does a person attain the *Sotāpanna* stage (i.e., make bad rebirths in the lowest four realms void) by eliminating all those bad *kamma* seeds?

- While it is possible to reduce the potency of *kamma* seeds and maybe even eliminate some, it may not be possible to remove all. The *Ariya Mettā Bhāvanā* may remove many *kamma* seeds, as discussed in the “*Bhāvanā* (Meditation)” section, but there could be leftovers. It is said that the Buddha had 11 instances of bad *kamma vipāka*, including a back problem.
- Therefore, it is very likely that we all have many good and bad *kamma* seeds strong enough to energize many good and bad rebirths.
- What happens at the *cuti-paṭisandhi* moment involves the “*upādāna paccayā bhava*” step in the *upapatti Paṭicca Samuppāda* cycle. As we recall, this is the step responsible for energizing “*upapatti bhava*” to bring in a new existence.”
- But this same step is involved in grasping the strongest “*upapatti bhava*” at the end of the current “*bhava*.” Suppose a person dies, and that was the last possible human birth for him/her. Then at the dying moment, he/she will willingly grasp something they crave, i.e., matching the dominant “*gati*” of him/her.

15. Let us consider the case of the violent teenager again. Suppose he continued his violent acts and built up a “*upapatti bhava*” suitable for a violent animal. Then at the dying moment, he could see in his mind (like in a dream) a rival gang member trying to “steal a drug deal”; he would also see a gun close by. By his instincts, he will get angry, grab the gun, and shoot that person. This is an example of a “*gati nimitta*.”

- That is the “*upādāna paccayā bhava*” step for the new existence. He has willingly grasped the mindset of an animal, and he will be born as an animal. His next thought-moment is in that animal that comes out of the dead body of the teenager as a “*gandhabba*” with an invisible fine body.
- This is described in detail in other posts; it needs more background material in “*manomaya kāya*” to understand the technical details, which is not critical here. However, now we can understand how a new existence is grasped at the end of a “*bhava*” in the *upapatti Paṭicca Samuppāda* cycle.

16. Let us go back to how a *Sotāpanna* avoids such bad rebirths even if he/she has many bad *kamma* seeds. Suppose that *Sotāpanna* has the same kind of *kamma* seed as that teenager (it could be from a previous life) and that it is strong enough to come to the forefront of his/her mind at the dying moment.

- What happens is that a *Sotāpanna* will not grab the gun and shoot that person even if it is his/her worst enemy doing something that could make him/her mad. His/her mindset or “*gati*” has been permanently changed. Thus “*upādāna paccayā bhava*” step will not be executed for that *kamma* seed.

- In that case, now the next potent *upapatti bhava* will come to the forefront. That will also be rejected if that is also a bad one suitable for rebirth in the lowest four realms (*apāyā*.) Eventually, he/she will grasp a rebirth compatible with his/her “*gati*” at that dying moment, which for a *Sotāpanna* will never be the “*gati*” to be born in an *apāyā*.
- That process happens automatically and very quickly. We do not have conscious control over it.
- Thus one's rebirth will be determined by how one lives (and had lived previous lives). If one lived like an animal, one would be born an animal no matter how much one wishes for a “good birth.” As discussed above, the real danger is that we do not know how we lived our previous lives.
- This is why *Paṭicca samuppāda* means “*pati + ichcha*” leading to “*sama*” + “*uppāda*” or what one grasps willingly and habitually is what one that will operate automatically at the dying moment; see, [“Paṭicca Samuppāda – ‘Pati+ichcha’+’ Sama+uppāda.’”](#)
- Also, see [“Bhava and Jāti Within a Lifetime – Example.”](#)

9.11 Imasmim Sati Idam Hoti – What Does It Really Mean?

August 5, 2018; revised January 26, 2019; May 2, 2019; July 4, 2022

A Zen Riddle?

1. “*Imasmim sati idam hoti, imassa uppādā idam uppajjati; imasmim asati idam na hoti, imassa nirodhā idam nirujjhatī ti.*” This is a famous phrase that appears in most *suttā* that describe *Paṭicca Samuppāda* (Dependent Origination).

- It is usually translated as, “When there is this that is, with arising of this that arises; when there is not this that is not, with the cessation of this that ceases.” *That sounds like a Zen riddle!*
- But the Buddha never made his *Dhamma* into riddles. He always presented it in the simplest possible way. Some verses have become riddles because people have incorrectly translated them; they did not understand the true meanings or the significance of key Pāli words.
- Another example is, “[Anidassana Viññāna – What It Really Means.](#)”

Sati – Mundane Meaning in the Verse

2. The keyword in the verse that we are interested is “*sati*.” All English translations that I have seen have left out this keyword!

- There are two meanings to the word “*sati*.” One is mundane, meaning “attention.”
- It is actually that mundane meaning that should be used in this verse.
- If one set the mind on an immoral task (planning a robbery, assembling a bomb to kill people, etc.) one will start doing immoral deeds with “*apuñña abhisankhāra (or apuññābhisankhāra)*” and initiate *Akusala-Mūla Paṭicca Samuppāda*. That will lead to rebirth in the *apāyā*.
- At the opposite end, a Noble Person above the *Sotāpanna Anugāmi* stage will try to set the mind on cultivating “*kusala-mūla sankhāra*” and initiate *kusala-mūla Paṭicca Samuppāda*. Here, they will have *Sammā Sati* (mindset focusing on *Nibbāna*). That “*sati*” is the one with deeper meaning.

Sammā Sati – Deeper Meaning of Sati

3. The deeper meaning of “*sati*” should be used in the context of *Satipaṭṭhāna bhāvanā*, for example.

- That “*sati*” is a *sobhana cetasika*, i.e., a good mental factor. The *sati cetasika* is cultivated by learning *dhamma* and eventually comprehending *Tilakkhaṇa*.
- *However, that cetasika sati does not have a counterpart in asobhana cetasika, i.e., there is no “asati” cetasika.*
- In verse, both “*sati*” and “*asati*” are mentioned. Therefore, “*sati*” in the context of the verse in question does not refer to the *sati cetasika*.

Mundane Sati – Examples

4. The word “*sati*” in “*Imasmim sati idam hoti,..*” is, however, still closely related to the mind. It just refers to keeping the mind focused on the task at hand, whether it is a “good” or “bad” task.

- Suppose a suicide bomber is assembling a bomb that he intends to use to kill many people. He must be paying careful **attention** (or “being mindful”) to what he is doing, otherwise, he will blow himself up. That is the **mundane meaning of sati** there.

- Thus, the term “mindful” can apply to the mindset of the suicide bomber while assembling the bomb. He must be mindful of his task. If he makes even a slight mistake, he may trigger the bomb right there.
- Obviously, he is not engaged in *Satipaṭṭhāna*. In fact, someone being mindful of morality/*Nibbāna* would not engage in such an act.

Attention Needed to Do Good or Bad

5. That mundane meaning of “attention” is the meaning that should be used in analyzing the verse in question here: “*Imasmim sati idaṃ hoti...*”

- **What it means in this context is “to focus the mind on something (X).”** Then that “something” leads to the **creation of “another thing (Y).”** Even though X is ALWAYS mental, Y could be mental (*nāma*) or material (*rūpa*) or a combination of the two (*nāmarūpa*).
- When the mind is set on getting something done, one makes *vacī* and *kāya saṅkhāra* accordingly, i.e., one thinks about getting it done and acts accordingly; that is the “*sati*” that is referred to in that verse.
- When the mind does not focus on something (and does not make plans in mind via *vacī saṅkhāra*, and carries out such plans), that is called “*asati*.” In that case, there is no reason that Y would arise.

Good or Bad Deeds Done With Different Types of *Saṅkhāra*

6. As we will see below, making *saṅkhāra* is just the first step in a series of steps.

- We can make the mindset to do good or bad things. Keeping the attention on “good things” will lead to good outcomes (via good *dhamma*). Keeping the attention on “bad things” will lead to bad outcomes (via bad *dhamma*).
- Therefore, both cases (good or bad attention) will lead to a corresponding (good or bad) outcome. That is what is meant by “*Imasmim sati idaṃ hoti*” or “keeping the attention on this will lead to that.”
- What *Paṭicca Samuppāda* describes the eventual outcome (“that” is a “*jāti*,” the outcome or the result): “*saṅkhāra paccayā viññāṇa*,”...ending up in “*bhava paccayā jāti*.”

7. Of course, if one does not keep the attention on something, one will not be generating (good or bad) *saṅkhāra* about it. Thus, one will not initiate *Paṭicca Samuppāda* cycles: “*saṅkhāra paccayā viññāṇa*,”...ending up in “*bhava paccayā jāti*.”

- Therefore, if there is “*asati*” or “no attention on some task,” then there will be **no reason** for there to be an **outcome**: “*Imasmim asati idaṃ na hoti*.”
- In other words, the mind will have no reason to generate new *saṅkhāra* to initiate *Paṭicca Samuppāda* processes.

8. Now we can understand half of the verse: “*Imasmim sati idaṃ hoti*, “*Imasmim asati idaṃ na hoti*.” That means “when the mind is focused on X that will give rise to Y when the mind is **not focused** on X that **will not give rise** to Y.”

- We have already figured out what is meant by “*imassa uppādā idaṃ uppajjati*” and “*imassa nirodhā idaṃ nirujjhati*.”
- This part states that what has **ultimately come to being (*uppajjati*) or the *jāti*** is due to **what first arose in mind (*uppādā*) which are *saṅkhāra***.
- Similarly, for something **not to come to being (*nirujjhati*)**, the corresponding cause **should not arise in mind (*nirodhā*)**. If there is “*asati*” or “no attention,” then nothing will be realized: “no *jāti*” (because no *saṅkhāra* is generated to trigger *Paṭicca Samuppāda* processes.)

Correct Interpretation of the Verse

9. So, now we can translate the whole verse: “when the mind is focused on this it will give rise to that, when the mind is **not focused** on this it **will not give rise** to that; **this arising in mind (uppāda)** will give rise to that (*uppajjati*), **this not arising in mind (nirodhā)** will stop that from coming to being (*nirujjhati*). ”

- In straightforward terms, this describes the Buddha’s key message: if one does not generate any defilements in mind, then one will not be reborn into this suffering-filled world.
- Furthermore, one **MUST** understand the anicca/dukkha/anatta nature of this world and set the mind on attaining Nibbāna to stop the rebirth process. That understanding will stop *apuñña abhisankhāra* from arising via “*avijjā paccayā saṅkhāra*” in *Akusala-Mūla Paṭicca Samuppāda*.

10. How anything and everything in this world arises with **the mind as the “creator”** is explained in the doctrine of the cause or effect of *Paṭicca Samuppāda*.

- Even though the process starts with generating *saṅkhāra* (“*avijjā paccayā saṅkhāra*”), it involves many other steps (“*saṅkhāra paccayā viññāṇa*,” etc.) before the final thing manifests.
- That is why this verse comes in many *suttā* just before introducing the *Paṭicca Samuppāda* cycle starting with “*avijjā paccayā saṅkhāra*.”

Ariyasāvaka Sutta (SN 12.49)

11. What we discussed above becomes clear in the “[WebLink: suttacentral: Ariyasāvaka Sutta \(SN 12.49\)](#).” It starts with the statement: “*Na, bhikkhave, sutavato ariyasāvakassa evaṃ hoti: ‘kim nu kho—kismiṃ sati kim hoti, kissuppādā kim uppajjati? Kismiṃ sati saṅkhārā honti, kismiṃ sati viññāṇaṃ hoti, kismiṃ sati nāmarūpaṃ hoti, kismiṃ sati saḷāyatanāṃ hoti, kismiṃ sati phasso hoti, kismiṃ sati vedanā hoti, kismiṃ sati taṇhā hoti, kismiṃ sati upādānaṃ hoti, kismiṃ sati bhavo hoti, kismiṃ sati jāti hoti, kismiṃ sati jarāmaraṇaṃ hoti’ ti?*.”

Translated: “*Bhikkhus*, a noble disciple, is not confused by the question: ‘[What gives you indeed— (*kim nu kho*—)] What **in mind** becomes a cause? With the existence of what **in mind** does what come to being? What **in mind** becomes a cause for *saṅkhāra*? What **in mind** becomes a cause for *viññāṇa*? What **in mind** becomes a cause for *nāmarūpa*?... What **in mind** becomes a cause for *jarāmaraṇa*?’ .”

12. The next verse: “*Atha kho, bhikkhave, sutavato ariyasāvakassa aparappaccayā ñāṇamevettha hoti: ‘imasmiṃ sati idaṃ hoti, imassuppādā idaṃ uppajjati. Avijjāya sati saṅkhārā honti; saṅkhāresu sati viññāṇaṃ hoti; viññāṇe sati nāmarūpaṃ hoti; nāmarūpe sati saḷāyatanāṃ hoti; saḷāyatane sati phasso hoti; phasse sati vedanā hoti; vedanāya sati taṇhā hoti; taṇhāya sati upādānaṃ hoti; upādāne sati bhavo hoti; bhave sati jāti hoti; jātiyā sati jarāmaraṇaṃ hoti’ ti. So evaṃ pajānāti: ‘evamayaṃ loko samudaya’ ti.*”

Translated: “*Bhikkhus*, the noble disciple knows that what arises is **dependent on what is cultivated in mind**: ‘When this exists **in mind**, that comes to be; with the arising of this **in mind**, that arises. When the mind is ignorant (*avijjāya sati*), *saṅkhāra* arise/come to be (*saṅkhārā honti*). When there are *saṅkhāra* **in mind** (*saṅkhāresu sati*), *viññāṇa* comes to be (*viññāṇaṃ hoti*). When there is *viññāṇa* **in mind** (*viññāṇe sati*), *nāmarūpa* arise/come to be (*nāmarūpaṃ honti*),When the mindset takes that of a certain existence (*bhave sati*), *jāti* comes to be (*jāti hoti*). When there is *jāti* **in mind** (*jātiyā sati*), *jarāmaraṇa* comes to be (*jarāmaraṇaṃ hoti*). **He understands thus: ‘In such a way the world arises (samudaya).**’ ”

13. Next verse is: “*Na, bhikkhave, sutavato ariyasāvakassa evaṃ hoti: ‘kim nu kho—kismiṃ asati kim na hoti, kissa nirodhā kim nirujjhati? Kismiṃ asati saṅkhārā na honti, kismiṃ asati viññāṇaṃ na hoti, kismiṃ asati nāmarūpaṃ na hoti, kismiṃ asati saḷāyatanāṃ na hoti, kismiṃ asati phasso na hoti, kismiṃ asati vedanā na hoti, kismiṃ asati taṇhā na hoti, kismiṃ asati upādānaṃ na hoti, kismiṃ asati bhavo na hoti, kismiṃ asati jāti na hoti, kismiṃ asati jarāmaraṇaṃ na hoti’ ti?*.”

Translated: “*Bhikkhus*, a noble disciple is not confused by the question: ‘[What gives you indeed— (*kim nu kho*—)] Absence of what **in mind** would not be a cause? With the cessation of what **in mind** what would

be stopped from arising? Absence of what **in mind** (*kisimim asati*) *saṅkhāra* would not result (*na honti*)? Absence of what **in the mind** *viññāṇa* (an expectation of a worldly thing) would not result? ..Absence of what **in the mind** *nāmarūpa* would not result?... Absence of what **in the mind** *jarāmarāṇa* would not result?' ”

14. And then: “*Atha kho, bhikkhave, sutavato ariyasāvakassa aparappaccayā ñāṇamevettha hoti: ‘imasmim asati idaṃ na hoti, imassa nirodhā idaṃ nirujjhati. Avijjāya asati saṅkhārā na honti; saṅkhāresu asati viññāṇaṃ na hoti; viññāṇe asati nāmarūpaṃ na hoti; nāmarūpe asati saḷāyatanam na hoti ... pe ... bhava na hoti ... jāti na hoti ... jātiyā asati jarāmarāṇam na hoti’*ti. So *evam pajānāti: ‘evamayaṃ loko nirujjhatī’*ti.

Translated: “*Bhikkhus*, the noble disciple knows that what arises is dependent on what is cultivated in mind: ‘When this does not exist **in mind**, that will not come to be; with the cessation of this **in mind**, that is stopped from arising. When there is no ignorance **in mind** (*avijjāya asati*), *saṅkhāra* do not come to be (*saṅkhārā na honti*). When *saṅkhāra* cease to exist **in mind** (*saṅkhāresu asati*), *viññāṇa* do not come to be (*viññāṇam na hoti*). With the cessation of *viññāṇa* **in mind** (*viññāṇe asati*), *nāmarūpa* do not come to be (*nāmarūpaṃ na honti*),When there is *bhava* absent **in mind** (*bhave asati*), *jāti* will not come to be (*jāti na hoti*). When there is no *jāti* **in mind** (*jātiyā asati*), *jarāmarāṇa* do not come to be (*jarāmarāṇam na hoti*). **He understands thus: ‘In such a way the world ceases to exist (*nirujjhatī*)**, and thus the *saṃsāric* suffering ends.’ ”

15. Finally, “*Yato kho, bhikkhave, ariyasāvako evaṃ lokassa samudayañca atthaṅgamañca yathābhūtaṃ pajānāti, ayaṃ vuccati, bhikkhave, ariyasāvako diṭṭhisampanno itipi ... pe ... amatadvāraṃ āhacca tiṭṭhati itipī’*ti.

Translated: “*Bhikkhus*, a noble disciple thus understands the origin and the ending of the world. He is knowledgeable about the true nature of this world, has the correct vision, and comes to attain *Nibbāna*.”

16. That is the complete *sutta*. It provides the basic reasoning behind *Paṭicca Samuppāda*.

- It is important to realize that all the steps in *Paṭicca Samuppāda* involve the mind up to the *jāti* stage. When the *jāti* stage arrives, the process is complete. That *jāti* that came into being has to evolve naturally to its end.

9.12 Paṭiloma Paṭicca Samuppāda – Key to Nibbāna

March 15, 2019; revised January 10, 2021; December 23, 2022

January 10, 2021: Renamed from “Anuloma Paṭiloma Paṭicca Samuppāda – Key to Sotāpanna Stage” to “Paṭiloma Paṭicca Samuppāda – Key to Nibbāna”

Paṭiloma Paṭicca Samuppāda is the “reverse of the standard *Akusala-Mūla Paṭicca Samuppāda* process. That means it is the way to *Nibbāna*.”

Introduction

1. Just before his Enlightenment, the Buddha figured out how beings are born endlessly due to their own way of thinking. That knowledge is embedded in *Paṭicca Samuppāda*, translated as, “Dependent Origination.”

- It describes the origins of different types of living beings, according to their thought processes (*saṅkhāra*) based on the level of *avijjā* (ignorance of the fundamental nature).
- *Anuloma Paṭicca Samuppāda* describes the forward progression of events leading to eventual suffering. *Paṭiloma Paṭicca Samuppāda* describes the backward progression to see that indeed *avijjā* must be removed (by cultivating wisdom or *paññā*) to stop future suffering from arising.

Anuloma Paṭicca Samuppāda and Paṭiloma Paṭicca Samuppāda

2. “[WebLink: suttacentral: Pathama Bodhi Sutta \(Udāna 1.1\)](#)” and “[WebLink: suttacentral: Dutiya Bodhi Sutta \(Udāna 1.2\)](#)” state how the Buddha comprehended *anuloma* and *paṭiloma Paṭicca Samuppāda* during the night of the Enlightenment.

- Most people are familiar with how suffering originates with the *saṅkhāra* generation due to the ignorance of the Four Noble Truths (*avijjā*), and then go through the familiar steps: “*avijjāpaccayā saṅkhārā, saṅkhārapaccayā viññāṇam, ..and ends with “.. Evametassa kevalassa dukkhakkhandhassa samudaya hotī”ti* OR “the whole mass of suffering.”

Paṭiloma Paṭicca Samuppāda

3. It is also important to trace the steps backwards and see how future suffering can be stopped by cultivating *paññā*: “*avijjānirodhā saṅkhāranirodho, saṅkhāranirodhā viññāṇanirodho, viññāṇanirodhā nāmarūpanirodho, nāmarūpanirodhā saḷāyatanirodho, saḷāyatanirodhā phassanirodho, phassanirodhā vedanānirodho, vedanānirodhā taṇhānirodho, taṇhānirodhā upādānanirodho, upādānanirodhā bhavanirodho, bhavanirodhā jātinirodho, jātinirodhā jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā nirujjhanti. Evametassa kevalassa dukkhakkhandhassa nirodho hotī”ti.*”

- By stopping *jāti*, it is possible to **stop suffering from arising** (at the end). Now we go backward: *Jāti* (births) stopped by stopping *bhava*, which is stopped by stopping *upādāna*, *taṇhā*, *vedanā*, *phassa*, *saḷāyatana*, *nāmarūpa*, *viññāṇa*, and *saṅkhāra*. When one gets to the first step: *saṅkhāra* cannot be stopped from arising without eliminating *avijjā* (and thus getting rid of ALL *gati*).
- If one contemplates this process, one can get some profound insights.

Nirodha Means “Stop From Arising” – Not Destruction of an Existing Entity

4. It is clear that to stop “the whole mass of suffering”, one MUST stop each of those ten factors (*jāti*, *bhava*, *upādāna*, *taṇhā*, *vedanā*, *phassa*, *saḷāyatana*, *nāmarūpa*, *viññāṇa*, and *saṅkhāra*) from arising.

- Thus one can see that *nirodha* means “stop from arising.”
- One can also see that can be done ONLY by removing *avijjā*, which is the same as cultivating *paññā*.
- The removal of *avijjā* (and cultivation of *paññā*) is done by following the Eightfold path, which has two components; see, for example, “[What is Unique in Buddha Dhamma?](#).” There are no shortcuts!

5. We concluded in #4 above that to stop future suffering from arising we must stop those ten terms from arising. This appears not to make sense with some of those terms when we try to reconcile that with the fact that an *Arahant* has stopped those from arising.

- In particular, one could object that *vedanā*, *phassa*, *viññāṇa*, and *saṅkhāra* still arise in a LIVING *Arahant*.
- As I have explained in many posts scattered throughout the website (especially in the “[Paṭicca Samuppāda](#)” section), those terms are in the “*uddesa*” version. This is explained in detail in the post, “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa.](#)”
- Let us briefly discuss a few of those terms.

Need for Detailed Explanations

6. Basically all current English translations just provide word-by-word translations of that “*uddesa* version” without any explanation. For example, the English translation of the first sutta in #1 above states, “..because of **consciousness**: mind and body, because of mind and body: the six sense spheres, because of the **six sense spheres**: contact, because of **contact**: feeling, because of **feeling**... because of **continuation**: birth, because of **birth**: old age, death, grief, lamentation, pain, sorrow, and despair all arise, and so there is an origination of this whole mass of suffering.”; see, “[WebLink: suttacentral: The First Discourse about the Awakening Tree \(UD 1.1\).](#)”

- According to the second *sutta*, all those terms (consciousness, six senses, contact, feeling) should not arise in an *Arahant*!
- Furthermore, it is not clear what is meant by “continuation” (for *bhava*), which leads to *jāti* (births), and thus “this whole mass of suffering.”

Detailed Explanations of Terms in *Paṭicca Samuppāda*

7. For example, the step, “*avijjā paccayā saṅkhāra*” really should be “*avijjā paccayā abhisāṅkhāra*.”

- As is explained in the post, “[Saṅkhāra – What It Really Means](#),” an *Arahant* generates *saṅkhāra*, but NOT *abhisāṅkhāra*.
- It is such *abhisāṅkhāra* that leads to future births and thus future suffering!

8. The next step is written in *suttā* as “*saṅkhāra paccayā viññāṇa*” and that is the *uddesa* version.

- It needs to be explained as “*abhisāṅkhāra paccayā viññāṇa*,” where *viññāṇa* means “defiled consciousness.”
- An *Arahant* would have “purified *viññāṇa*” and NOT “defiled *viññāṇa*.” This is explained in “[Viññāṇa Aggregate.](#)”

9. Another confusing step could be “*nāmarūpa paccayā saḷāyatana*,” where “*saḷāyatana*” or “*six āyatana*” are typically translated as “six sense faculties.” Of course, a living *Arahant* has perfectly good sense faculties (*indriya*).

- Those six *indriya* (or sense faculties) become *saḷāyatana* when one acts with *avijjā* and uses them to accumulate “*saṇ*”; see, “[Nāmarūpa paccayā Saḷāyatana.](#)”

10. In the next step of “*saḷāyatana paccayā phassa*,” it is really “*saḷāyatana paccayā samphassa*.” When those *indriya* are used as *āyatana*, one “makes contact with a defiled mind,” and that defiled contact is “*samphassa*” (“*saṇ*” + “*phassa*”).

- This is discussed in, “[Difference between Phassa and Samphassa](#).”
- Therefore, an *Arahant* would have only “*phassa*” and NOT “*samphassa*.”

11. Now, when those sensory inputs are evaluated with a defiled mind, one generates “mind-made *vedanā*” or “*samphassa ja vedanā*.” These are greedy, angry, and jealous, types of *vedanā* generated due to the defilements in mind.

- Such “defiled and mind-made *vedanā*” is absent in an *Arahant*. An *Arahant* will, however, generate *vedanā* due to the contacts with the six *indriya*.
- For example, if someone hits an *Arahant*, he/she will feel pain. Spoiled milk would taste bitter and a piece of cake would taste sweet, etc. But an *Arahant* would not generate angry thoughts about someone offering spoiled milk and would not generate cravings for the cake.
- This is explained in detail in the post, “[Vedanā \(Feelings\) Arise in Two Ways](#).”

12. The subsequent confusion is at the step, “*bhava paccayā jāti*,” which is translated in #5 as, “because of continuation: birth.” I am not sure what is meant by “continuation” there.

- The correct interpretation is given in “[Bhava and Jāti – States of Existence and Births Therein](#).”

Stopping *Abhisāṅkhāra* Is the Key to *Nibbāna*

13. If one can spend some time reading those posts and the links given in them, one should be able to get a good idea of how different types of *jāti* originate via *abhisāṅkhāra* (one’s thoughts).

- The Sotāpanna stage of *Nibbāna* is attained by getting rid of the wrong way of looking at one’s body (and actions) are due to an unchanging “soul.”
- However, one’s *bhava* and *jāti* arise due to one’s own *abhisāṅkhāra*. We are humans in this life because of good *abhisāṅkhāra* cultivated in a previous life.
- If we do evil (or *apuñña*) *abhisāṅkhāra* in this life, we may be born as animals or worse. If we do good (or *puñña*) *abhisāṅkhāra* in this life, we may be born as *devas*, *Brahmā*, or humans again.

No Birth Among the 31 Realms Will Stop Suffering

14. However, no birth in the 31 realms can bring a permanent state of happiness. Any *Deva* or *Brahma* existence will end, and one could be subsequently born in the *apāyā*.

- A permanent state of happiness (which means the absence of ANY suffering) is attained by stopping this never-ending rebirth process. **That is the key message of the Buddha.**
- When one truly understands that, one has the “vision” of a *Sotāpanna*, i.e., one would have gotten rid of *sakkāya diṭṭhi* (and *vicikicchā* and *sīlabbata parāmāsa* all at the same time).

Further Information

15. More details can be found in the “[Paṭicca Samuppāda](#)” section. The “[Living Dhamma](#)” section attempts to provide a systematic approach to learning and practicing Buddha Dhamma (of course, with more details in other sections).

- A systematic approach to Buddha Dhamma at “[Buddha Dhamma – A Scientific Approach](#),” which continues in “[Understanding the Terms in Paṭicca Samuppāda](#).”

[Āsevana and Aññamañña Paccaya](#)

9.13.1 Paṭṭhāna Dhamma – Connection to Cause and Effect (Hetu Phala)

October 22, 2016; revised October 25, 2016; June 15, 2018; April 11, 2021; June 28, 2022

1. *Paṭṭhāna dhammā* is also cited as *pattāna dhammā* in English.

- The word “*paṭṭhāna*” comes from “*paṭṭha*” + “*āna*.” I have previously mentioned that “*āna*” means “bringing in” as in “*ānāpāna*” in *Ānāpānasati Bhāvanā*. “*Paṭṭha*” in Pāli or Sinhala means the layer of a tree trunk underneath the outermost layer of bark — *consisting of phloem cells* — which carry food between roots and leaves.
- So, the word “*paṭṭhāna*” here conveys the idea that while the roots (*mūlika hetu*) are critical for the tree’s survival, “*paṭṭha*” also plays an important role in the tree’s growth. In the case of *Paṭṭhāna Dhamma*, they play an important role in describing the conditions under which *hetu* or causes can bring in effects, as we will see below.
- By the way, “*paṭṭha*” are essential for the tree’s survival, just as the tree’s roots are. One could kill a tree simply by a process called “girdling” where those phloem cells are removed; see the Wikipedia article: [“WebLink: WIKI: Girdling.”](#)
- The Buddha frequently used analogies with the workings of a tree. We also need to remember that “*mūla*” is a root in Pāli or Sinhala, so “*mūlika hetu*” means “root causes.” So, the tree’s survival depends on its roots and its “*Paṭṭha*” containing those critical phloem cells.
- This is the same as saying *Paṭṭhāna Dhamma* describes CONDITIONS are as important as ROOT CAUSES, which are *lobha*, *dosa*, and, *moha* (for *akusala kamma*), and *alobha*, *adosa*, and *amoha* (for *kusala kamma*).

2. It is also to be noted that “*paṭṭhāna*” in “*Satipaṭṭhāna*” can be interpreted to mean “providing food” or “*paṭṭha*” + “*āna*” to cultivate *sati* or mindfulness.

- The word “*Paṭṭhāna Dhammā*” has not been discussed that much in English. Therefore, it is good to get started the right way. Buddhaghosa did not discuss it because he did not comprehend *Paticca Samuppāda*, and as a result even many people who follow even Theravāda Buddhism are not familiar with *Paṭṭhāna Dhammā*. Ven. Ledi Sayadaw in Burma and Ven. Rerukane Chandawimala in Sri Lanka are clear exceptions. They have discussed *Paṭṭhāna Dhammā*; see the references below.
- However, their interpretations of *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*) are incorrect.

3. In the **workings of living things (including plants) — and in mental processes in particular** — the mechanism of how causes lead to effects is much more complex than material phenomena involving inert objects.

- In these cases, many conditions need to be satisfied, in addition to having sufficient causes.
- In many cases, such critical conditions are not satisfied even if the causes are there, so there is normally a TIME DELAY between causes and effects, i.e., between *kamma* and *kamma vipāka*.

- This is why it is hard for people to see the validity of cause and effect (*hetu phala*) involving living things, especially the mind.
- This is what is explained in *Paṭicca Samuppāda*, with the help of *Paṭṭhāna Dhammā*. There are 24 conditions or *paccayā* discussed in the “*Paṭṭhānapakaraṇa*” in the *Abhidhamma Piṭaka*: “[WebLink: suttacentral: 1.1. Nikkhepavāra](#).” Of course, the English translation will likely have many errors, but one can get the basic idea.
- Let us discuss some examples to understand the role of a few of such conditions or *paccayā*.

4. All necessary causes to bring about a tree are embedded in a seed. A seed is a CAUSE for the subsequent appearance of a tree. **Yet, a seed cannot germinate unless suitable conditions are present.** If one keeps a seed in a cool, dry place, it will just sit there for thousands of years without giving rise to a tree.

- However, if one plants the seed in the ground where sunlight is available and provides water and nutrients, it will germinate and grow into a tree.
- The root condition to bring into existence a tree is embedded in a seed. That is in the *anantara paccaya*. But suitable conditions for that seed to germinate are in fertile soil with adequate sunlight and water; this is called *samanantara paccaya*. Therefore, both *anantara* AND *samanantara paccaya* MUST be satisfied to bring a tree into existence; see “[Anantara and Samanantara Paccaya](#)” for details.
- So, AT WHAT TIME the seed will germinate will depend on when the *samanantara* condition (fertile soil) is satisfied. *Anantara* condition (presence of a seed) is not enough.

5. Another important condition of *paccayā* comes into play for the germinated seed to grow into a tree: The *āhāra paccayā* (food condition) must be satisfied. If water, sunlight, and nutrients are unavailable after the seed germination, it cannot grow into a tree.

- An essential type of *āhāra* is the “food for *viññāṇa*.” When one has bad thoughts about another person, that *viññāṇa* grows as long as one keeps thinking about that person and how bad he/she is. *Viññāṇa āhāra* are *mano sañcetanā*.

6. Another example of such a condition or *paccayā* is “*āsevana paccayā*.” *Āsevana* means to “associate with.”

- An important example is an association with bad friends. Whether it is a child or an adult, one’s behavior will be influenced by who one associates with; see, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#).”
- I have discussed several important conditions or *paccayā* in the post, “[Micchā Dīṭṭhi – Connection to Hethu Phala \(Cause and Effect\)](#).” Here is that discourse:

[WebLink: Audio Desana: Episode 6 - Micchā Dīṭṭhi Connection to Hetu Phala Cause and Effect](#)

There are 24 such conditions in *Paṭṭhāna Dhammā*. I will discuss them in detail in this subsection on “[Paṭṭhāna Dhammā](#)” in a series of posts.

- This is why mental phenomena are so complex. In many cases, several such conditions need to be satisfied for a cause (*hetu*) to lead to a corresponding effect (*phala*).

7. Similarly, the *kammic* energies created by our actions do not disappear. A given action creates a *kamma* seed with energy to bring in its fruits. It is like a seed waiting for the right conditions to germinate and bring a tree into existence.

- Those *kamma* seeds or *kamma bīja* are out there waiting for suitable conditions to bring in their effect.
- Whether they will bring *vipāka*, AND at what strength, AND when, will depend on the conditions or *paccayā*. This is what is described by *Paṭicca Samuppāda* with the help of *Paṭṭhāna Dhammā*.

- See, “[What Does “Paccaya” Mean in Paticca Samuppāda?](#)”, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#)” and “[Nāmagotta, Bhava, Kamma Bīja, and Mano Loka \(Mind Plane\)](#)” for more details.

8. But some strong *kamma* will bring in *vipāka* without exceptions. Those include *ānantariya pāpa kamma*. They are so strong that they do not require conditions to be just right. They bring *vipāka* mostly at the dying moment, i.e., death of the physical body, and will not be delayed until the *cuti-paṭisandhi* moment. Hence, the delay is only until death.

- Some people inherit wealth unexpectedly and some people die of accidents. These are also strong *kamma vipāka*, though as not strong as *ānantariya pāpa kamma*.
- But in most cases, conditions or *paccayā* play major roles; sometimes, many conditions must be satisfied for *vipāka* to bear fruit.

9. This knowledge — or rather this understanding of — how *kamma* and *kamma vipāka* work — is called *kammasakata sammā diṭṭhi*, and is a REQUIREMENT to attain **mundane sammā samādhi**. When one fully understands this, it will be easier to see that the rebirth process has a logical foundation.

- This is because one can now clearly see that most of *kamma* or one's actions will have corresponding *vipāka* or results when suitable CONDITIONS appear.
- So, if one does actions suitable to be born in the *apāyā*, one COULD BE born in the *apāyā*, until one REMOVES the ability to for such CONDITIONS to appear.
- When one attains the *Sotāpanna* stage, one will never realize the conditions suitable for a birth in the *apāyā*. This requires another step BEYOND *kammasakata sammā diṭṭhi*, which is the comprehension of *Tilakkhaṇa*.
- Therefore, getting to the *Sotāpanna* stage is a two-step process: first to get to *kammasakata sammā diṭṭhi* and then the comprehension of *Tilakkhaṇa*.
- This is discussed in detail in the *desanā* in #6 above.

10. We see people doing immoral things without being subjected to corresponding punishments, but that does not mean they are getting away with it. Those actions can bring their fruits in future lives if they are not realized in this life.

- There are two ways to overcome *kamma vipāka*. First, such *kamma* seeds will lose their energy with time; they can last at most 91 eons. They are like regular seeds, which lose their power over time.
- The other way is to attain all four stages of *Nibbāna*. That will remove the possibility of making conditions for ANY *kamma* seed from germinating.

11. These conditions or *paccayā* play a critical role in *Paticca Samuppāda*. When we say “*avijjā paccayā saṅkhāra*,” it means, “we do *saṅkhāra* with ignorance when necessary CONDITIONS are present.”

- For example, we do not do immoral acts or *apuññābhi saṅkhāra* all the time. When we are attracted to or repulsed by something that we see (this is an example of *ārammaṇa paccaya*), we may generate craving or dislike, and then it can lead to an immoral action or *apuññābhi saṅkhāra*; see, “[What Does “Paccaya” Mean in Paticca Samuppāda?](#).”
- This is the reason why *kamma* itself is not deterministic. Just because one has *avijjā* does not mean one will necessarily do an immoral thing, generating (*apuññābhi*) *saṅkhāra*. If we cultivate *Satipaṭṭhāna*, even if we get the urge to do something immoral, we can contemplate the bad consequences and stop that action, speech, or thoughts.
- When one keeps doing *Satipaṭṭhāna* — and avoiding immoral acts — one's *gati* will change for the better, and then even the automatic urge to do something immoral will gradually fade. In other words, one's *avijjā* will reduce. This is why *Satipaṭṭhāna* is so important.

9.13.2 What Does “Paccayā” Mean in Paṭicca Samuppāda?

Revised April 27, 2016; August 25, 2019; December 14, 2023 (#3, #8)

Before we start discussing the various forms of *Paṭicca Samuppāda* (PS), it is essential to be clear about what is meant by “*paccayā*” (pronounced “pachchayā”). *Paṭṭhāna Dhamma* provides a complete description. We will introduce the concept here.

Introduction

1. The PS cycle starts as: “*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa, viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana,.....*”

- And since PS describes the “cause and effect” in Buddha Dhamma, most people think “*avijjā paccayā saṅkhāra*” means “*avijjā* causes *saṅkhāra*” or “ignorance causes one to acts that generate bad *kamma*.”
- Even an ordinary person has *avijjā*, he/she will not ALWAYS act accordingly; most of the time, people act appropriately or morally. However, as long as *avijjā* is there, at times one WILL likely act with *avijjā* and do inappropriate or immoral things.
- Similarly, many people think that “*saṅkhāra paccayā viññāṇa*” means “*saṅkhāra* causes *viññāṇa*” or “bad *kamma* leads to corresponding consciousness”, and so on down the whole PS cycle.
- As we discuss below, the steps should be translated as, “with *avijjā* (ignorance) as **condition**, *saṅkhāra* arise”, “with *saṅkhāra* as **condition** *viññāṇa*, etc.

Key Role Of Conditions

2. It will clarify many things if one understands that PS does not refer to a “direct link” between causes and effects. Just because we have done good/bad *kamma* (generated via *saṅkhāra*) DOES NOT mean they ALL lead to *kamma vipāka*.

- That was pointed out in item #5 in the post, “[Paṭicca Samuppāda – Overview](#).” But in case the point was missed, I wanted to emphasize it in this post.
- Any effect **must have** a cause. But there can be possible causes without leading to any results. Otherwise, *Nibbāna* would not be possible. That needs some contemplation, and I will give some examples below.
- However, without suitable CONDITIONS, causes (*kamma*) cannot automatically bring results (*vipāka*).

3. The easiest way is to consider the following example: A seed contains the necessary causes (ingredients) for bringing up a new tree. But just because a seed is there, a tree will not come into existence. If the seed is in a cool, dry place, one could keep it that way for a long time. Or one could burn or crush it, and it will not bring up a tree.

- SUIABLE CONDITIONS must be present for causes to bring about corresponding effects. That is what *paccayā* means.

- When such suitable conditions are present, causes WILL bring about corresponding effects. Thus when some result is brought about, it is called “*paccuppanna*”, i.e., born (“*uppanna*”) via suitable conditions (“*paccayā*”); of course, if the root causes must be there, to begin with).
- In the above example, the seed could germinate and grow into a tree if one plants that seed (**cause**) in the ground and provides water, nutrients, and sunlight (**suitable conditions**).

Not All *Kamma* Lead to *Kamma Vipāka*

4. When causes are there, corresponding effects (results) are **LIKELY** if suitable conditions for the effects of taking place. **That is why *kamma* is not deterministic**; see, “[What is Kamma? – Is Everything Determined by Kamma?](#).”

- However, the critical point in PS is that the effect – IF AND WHEN IT HAPPENS – is in accordance with the cause, and also the **CONDITIONS** was one’s choosing: “*Pati ichcha*” leads to “*sama uppāda*” or simply: “when one gets attached, that leads to a new birth of similar characteristics.” **If and when the causes bring forth the consequences, they will be of a similar nature.**

5. It is not necessary to get into further details unless one is interested in “digging deeper”, but there are 24 “*paccayā*” or “conditions” that can cause the effect to materialize; these are “*Paṭṭhāna Dhamma*”).

- Let us briefly discuss three such *paccayā*, “*hetu paccayā*”, “*anantara samanantara paccayā*”, and “*aññamañña paccayā*” to see what happens.

Three Important Conditions (*Paccayā*)

6. Nothing happens without a root cause or a *hetu* (pronounced “*hethu*”; see the pronunciation key in “[Pāli Glossary \(A-K\)](#)” and [Pāli Glossary \(L-Z\)](#)”).

- For example, a bomb causes damage because of the explosives contained, but someone has to trigger it to go off. If the bomb sits somewhere long, its propellants may degrade, and then the “cause” may disappear; most *kamma* seeds are like that too.
- Thus, without the root cause, there will not be an explosion. **That is “*hetu paccayā*.”**

7. My favorite example of the “*anantara samanantara paccayā*” is the seed germination I discussed above in #3. Just because there is an apple seed, it will not cause an apple tree to appear.

- An apple seed will stay in a cool, dry place without germinating for many years. But if planted in the ground with water and sunlight, it will sprout and give rise to an apple tree; see, “[Anantara and Samanantara Paccaya](#)” for details.
- Of course, just like with the bomb, if the apple seed sits there for too long, it may lose its potency and may not yield an apple tree at all. Thus the *hetu paccayā* must always be satisfied.

8. The third one, “*aññamañña paccayā*,” means dependent on each other: For example, *viññāṇa* and *nāmarūpa* depend on each other:

- It usually is stated that “*viññāṇa paccayā nāmarūpa*” or “depending on the *viññāṇa*, *nāmarūpa* arise.” For example, *viññāṇa* of the *cuti citta* at the moment of death causes a matching *nāmarūpa* to rise in the next birth: a hateful thought could lead to birth in the *niraya* or the animal realm.
- However, *viññāṇa* in turn, depends on the type of *nāmarūpa*: with the *nāmarūpa* of an animal, it is not possible to get into *jhāna*. Only certain types of *nāmarūpa* can “support” certain types of *viññāṇa*. See “[Āsevana and Aññamañña Paccaya](#).”
- Depending on the situation, one or more of the 24 *paccayā* (or conditions) can simultaneously come into play. Some are discussed in the section on “[Paṭṭhāna Dhamma](#).”

Paṭṭhāna Dhamma

9. I just wanted to give a brief introduction to the complex “*Paṭṭhāna Dhamma*” which describes 24 such “*paccayā*” involved in *Paṭicca Samuppāda*. In other words, cause(s) and effect(s) have complicated relationships. We can only discern significant relationships. Only a Buddha can sort out all such complexities.

- But there is no need to analyze everything in great detail to understand the message of the Buddha. One can become a *Sotāpanna* by comprehending the *Tilakkhaṇa*: *anicca*, *dukkha*, and *anatta*.

10. So why am I also providing information on these complex topics? It is for three reasons:

- First, it helps build *saddhā* (faith) in Buddha Dhamma. Anyone who takes time to examine these concepts can see that they provide a COMPLETE explanation for everything we experience and more.
- Second, it is intellectually satisfying to see how all pieces nicely fit into the “big picture”: I hope I have been able to give the sense of joy that I have experienced in “seeing how these pieces fall into place.”
- Finally, this “self-consistency” is critical in sorting out which version of Buddha Dhamma is correct. As the Buddha pointed out, any version that is not self-consistent should be discarded; see “[Saddharma Pundarika Sutra \(Lotus Sutra\) – A Focused Analysis](#).”

Next in the series, “[Anantara and Samanantara Paccaya](#)”, ..

9.13.3 Anantara and Samanantara Paccayā

Revised February 12, 2020; August 7, 2022

Critical Roles of Causes (*Hetu*) and Conditions (*Paccayā*)

1. An action or a deed is a *kamma*. That *kamma* was done with an intention and led to creating *kammic* energy that COULD bring *vipāka* in the future. Such *kammic* energies act as causes to bring *vipāka*. But such *vipāka* is not guaranteed.

- There must be suitable conditions (*paccayā*) that must be there for such *vipāka* to materialize.

2. The easiest way is to consider the following example: A seed contains the necessary ingredients (causes) for bringing up a new tree. But just because a seed is there, a tree will not come into existence. If the seed is in a cool, dry place, one could keep it that way for a long time. Or one could burn or crush it, and it will never bring up a tree.

- SUITABLE CONDITIONS must be present for causes to bring about corresponding effects. That is what *paccayā* means.
- If a seed is planted in fertile soil and water and sunlight are provided, it will germinate and give rise to a tree.
- When such suitable conditions are present, causes WILL bring about corresponding effects. Thus when an event takes place under the right conditions, it is called “*paccuppanna*,” i.e., born (“*uppanna*”) via suitable conditions (“*paccayā*.”) Of course, root causes must be there, to begin with.

All *Kamma* Do Not Lead to *Vipāka*

3. That is the reason why *kamma vipāka* is not deterministic. In the post, “[What is Kamma? – Is Everything Determined by Kamma?](#)” I mentioned it, and here we will discuss it in detail.

- When we commit a good or an evil deed, the *kammic* potential or energy associated with that deed remains as a *kamma bīja* or a *kamma* seed. We will eventually get to the question of “where it is stored,” but we just need to remember that a *kamma* seed is not a physical seed but energy or potential. This concept is described in the post, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).”

- The germination of a *kamma* seed, though, has some similarities to the germination of a physical seed, for example, an apple seed. The apple seed has the potential to bring about an apple tree. Still, the seed will not germinate until suitable conditions for germination are present. The seed needs to be in the soil, and water and sunlight must be provided for germination.
- In the same way, *kamma vipāka* (the result of a past *kamma*) can come to fruition only with the conditions for the corresponding *kamma* seed to germinate.

Anantara and Samanantara Relations

4. Let us look at the *anantara* and *samanantara* relations as discussed in the *Paṭṭhāna* Dhamma (book on “Conditional Relations” in Abhidhamma): [*anantara* : [adj.] next; adjoining; immediately following. *samanantara* : [adj.] immediate; nearest.]

- “*An*” means food or in this case the *kamma* seed; “*antara*” means storage, waiting to bear fruit. Thus, *anantara* (“*an*” + “*antara*”) means basically a *kamma* seed waiting to germinate. [*antara* : [nt.] difference. [adj.] inner; inter. *anto* : [ind.] inside; within; inner.]
- “*Sama*” means equal or similar. Thus *samanantara* (“*sama*” + “*anantara*”) means “matching conditions” with the *antara*.
- Therefore, for a *kamma vipāka* to materialize, both *anantara* and *samanantara* must be there.
- By the way, *ānantara* with a long “*ā*” (as in *ānantara* *kamma*) means something entirely different; see, “[Ānantara Kamma – Connection to Gandhabba](#).”

Some Analogies/Examples

5. Here is one analogy the Buddha gave. If one prepares a plot by preparing the soil, providing water, and if sunlight is also available, the *samanantara* for a seed to germinate is there. However, unless one starts with an apple seed (i.e., if *anantara* is not there), an apple tree cannot grow.

- On the other hand, if one keeps the apple seed in a cool, dry place, it will not germinate since the *samanantara* condition is not met.
- Results appear when both *anantara* and *samanantara* conditions are met. Thus, when one plants an apple seed in a suitable plot, it will germinate and become an apple tree.
- Furthermore, a mango tree will not result from an apple seed. Thus *samanantara* will give rise to a result matching the “seed” in the *anantara*.

6. More examples can be given these days that are related to modern technology. If a radio station is broadcasting a radio program, that is the *anantara*. The seed energy is available anywhere within a specific range. But one cannot listen to the program without a radio. Even if someone has a radio, one cannot listen to the broadcast unless the receiver is tuned to the correct frequency. When those conditions are met, one could hear the program.

- *Kamma vipāka* can bring results via “instant communication” when the conditions become right. All kammic potentials are in “instant contact” with us via a concept similar to that described in quantum entanglement: see, “[Quantum Entanglement – We Are All Connected](#).” **Thus all potential kamma seeds are waiting in *anantara* and can bring about instant results when the right conditions (*samanantara*) appear.**

Many Bad Vipāka Can be Avoided by Being Mindful

7. **By being mindful, we can avoid many past bad *kamma* seeds from coming to fruition.** We make sure that *samanantara* conditions are not present. If one goes out at night in a bad neighborhood that provides fertile ground for a past bad *kamma* seed to germinate and the *kamma vipāka* to take place.

- In the same way, we can force “good” *kamma* seeds to germinate by providing the right conditions. For example, even if we have enough merits (i.e., a good *kamma* seed) that could make us pass a test or get a job, unless we make the right conditions (i.e., prepare in advance), we may not get the results.
- But sometimes, one gets an unexpected promotion or better results than anticipated in a test if the *kamma* seeds are potent.

8. From our past innumerable lives, we have accumulated countless *kamma* seeds, both good and bad. Some of the stronger ones bear fruit no matter what we do, especially the *ānantariya kamma vipāka*.

- But in general, by being mindful (i.e., by NOT providing appropriate conditions), we can avoid many bad *kamma vipāka*. By making the right preparations (i.e., by optimizing *samanantara* conditions), we can exploit those good *kamma* seeds.
- A particularly important case is bringing up a child. The parents and teachers have considerable responsibility for providing the right conditions for that young mind to develop. In particular, association with bad friends can direct a young life in the wrong direction; in the same way, association with good friends and a nurturing environment can bring about a productive, responsible adult.

Importance of Cultivating Good *Gati* (Habits/Character)

9. One important cross-connection is matching “*gati*” with similar “*gati*” that we have discussed before; see [“Habits and Goals”](#) and [“Sansāric Habits and Āsavas.”](#)

- For example, when a *gandhabba* is waiting for a suitable womb, the *anantara-samanantara paccayā* comes into play. A *gandhabba*, who in previous lives had developed a particular habit, say heavy drinking, is attracted to a womb of a woman with similar habits, possibly an alcoholic or a drug user. The concept of a *gandhabba* is in, [“Manomaya Kāya \(Gandhabba\) and the Physical Body,”](#) and [“Manomaya Kāya and Out-of-Body Experience \(OBE\).”](#)
- Similarly, a *gandhabba*, who in previous lives led moral lives, is bound to be attracted to a mother’s womb in a “good” family. Like in the above case, the *samanantara* for the *gandhabba* (where it can establish itself) is an environment that matches its own “*gati*.”
- However, no matter how one is born, one can still change one’s destiny by making conditions for other good *kamma vipāka* to come to fruition and by making sure not to create conditions for bad *kamma vipāka* to come to fruition.

In other posts, we will discuss further applications of *anantara-samanantara* relations. One important discussed in [“Transfer of Merits \(Pattidana\)- How does it Happen?”](#)

Next in the series, [“Āsevana and Aññamañña Paccayā.”](#)

9.13.4 Āsevana and Aññamañña Paccayā

November 20, 2016; revised July 1, 2019 (comment added at the end); March 4, 2021; September 9, 2022; March 28, 2023

Introduction

1. As mentioned in the [“Paṭṭhāna Dhamma – Connection to Cause and Effect \(Hetu Phala\),”](#) there are 24 *paccayā* or conditions that contribute to various steps in the *Paṭicca Samuppāda* (PS) cycles.

- As discussed in the post [“What Does “Paccayā” Mean in Paticca Samuppāda?”](#), and in the post mentioned above, a given step in a PS cycle **cannot proceed** until one or more conditions are satisfied. **And we have control over most of these conditions.** Therein lies *Paṭṭhāna Dhamma*’s value; **we can see how to stop *Akusala-Mūla* PS cycles from proceeding and maintain *Kusala-Mūla* PS cycles.**

- This post will discuss two of those 24 *paccayā* or conditions. They are somewhat related to each other and thus are suitable to discuss.

Āsevana Paccayā

2. *Āsevana paccayā* — which can be loosely translated as the “condition of association” — is an important condition that fuels various PS steps at different times.

- In most cases, *āsevana paccayā* has been translated as a “condition of repetition.” Even though repetition is relevant, repetition comes via close associations, so the association is primary.
- The word “*āsevana*” comes from “*ā*” and “*sevana*” or “came to the shade”; when one is staying close to a tree in the hot sun, one is “hanging around” the tree and is benefited from its cool shade.
- Of course, as we will see below, one can be influenced in the wrong direction when associating with bad friends. Therefore, *āsevana paccayā* comes into play in both *Kusala-Mūla* and *Akusala-Mūla* PS.
- When one likes the experience, one tends to keep that association. Sometimes, that eventually leads to harmful consequences, but one still tends to keep bad associations because of the ignorance of such bad outcomes.

3. An important role of *āsevana paccayā* is played in the “*viññāṇa paccayā nāmarūpa*” step in PS, whether it is *Kusala-Mūla* PS or *Akusala-Mūla* PS.

- For example, a teenager who is (unknowingly) cultivating a *viññāṇa* for drinking is heavily influenced by the association with bad friends. He likes to “hang out” with such bad friends and tends to generate a lot of *saṅkappa* or *vacī saṅkhāra* (conscious thinking about how he/she will be having a good time with those friends at parties with a lot of alcohol). The *nāmarūpa* generated in his mind are such “party scenes,” visualizing those friends and various favorite drinks.
- On the other hand, when one is on the right path, one constantly thinks about Dhamma Concepts, has Dhamma discussions with good friends, and visualizes such gatherings. Or one could be visualizing some meritorious deeds, like giving or helping out at an orphanage; these are good *nāmarūpa* generated with such a good *viññāṇa*.
- These *nāmarūpa* are different from the *nāmarūpa* that descends to a womb at the *okkanti* moment, i.e., when a *gandhabba* enters a womb. We will discuss that later. **So, *nāmarūpa* comes in two main categories.**

Āsevana Paccayā – Examples

4. *Āsevana paccayā* can play a role in different types of situations. Let us consider two such examples.

- One such situation is the teenager mentioned above, who cultivates bad *nāmarūpa* by associating with bad friends. The more he/she associates with such bad friends, the more he/she will generate bad *nāmarūpa* of party scenes with a lot of alcohol and/or drugs. Also, there will be other associated *nāmarūpa*: He/she will constantly be visualizing favorite friends, gathering places, appropriate music, etc.
- In such an environment, it is also easy to cultivate other types of “bad *nāmarūpa*” such as gambling, illicit sex, stealing (to sustain those activities), violence, and even killings.
- The teenager could cultivate such *nāmarūpa* and more over time.

5. On the other hand, when one is on either mundane or *lokuttara* Eightfold Path, one will be cultivating “good *viññāṇa*,” and one tends to visualize exactly opposite types of *nāmarūpa*.

- One could be planning a Dhamma discussion and thinking and visualizing who will be there and what topics will be discussed. One could be organizing a charity event and making arrangements.

- One could plan to attend a meditation retreat and visualize what activities one may engage in. One could even be thinking about and trying to visualize the suffering endured by poor children in a situation one is familiar with and generating compassion-filled thoughts and *nāmarūpa*.

6. In either case, the “*nāmarūpa paccayā saḷāyatana*” step will then point one’s all six *āyatana* or *saḷāyatana* (five physical senses and the mind) towards such thoughts, visuals, and actions.

- Then those associations will become even stronger. When one gets absorbed in relevant activities, when one’s mind is occupied with such thoughts and constantly visualizes related activities, people, and objects, those *nāmarūpa* will “grow” in one’s mind. Those *nāmarūpa* will be closely associated with one’s *gati*.
- This is also discussed in the post: [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavās\).”](#)

Āsevana Paccayā – In a Citta Vīthi

7. Another critical application of the *āsevana paccayā* occurs in a *citta vīthi*. When we are generating *saṅkappa* (or *sankalapanā*), we are generating an enormous number of *citta vīthi* in a short time. Each *citta vīthi* will make the next *citta vīthi* stronger (actually make the *javana citta* in the subsequent *citta vīthi* stronger) by association.

- The best example is one we have discussed several times in the [“Living Dhamma”](#) section. When we start thinking about an enemy, we start visualizing more and more bad situations that we encountered with that person; we tend to pull out all “past associations” from memory and conjure up “many possible future scenarios” in our minds.
- All these “bad *saṅkappa*” or “conscious bad thoughts” will strengthen the PS steps.
- Our minds can run wild if not controlled with *Satipaṭṭhāna* or *Ānāpāna*; see, [“Satipaṭṭhāna Sutta – Relevance to Suffering in This Life.”](#)

8. Even in a given *citta vīthi*, each *javana citta* is strengthened by the previous *javana citta* via *āsevana paccayā*. This happens in the time scale of a billionth of a second and is driven by our *gati*.

- The first *javana citta* is weak. But the second *javana citta* gets fuel from the first one and is inevitably generating strength via association. One meaning of the name *javana* is “to run with.” The series of 7 *javanās* “run with the object in mind,” initially getting stronger until the fifth *javana*. Then the fuel runs out, and the sixth and seventh *javana* become weaker and weaker.
- *Kamma* generated by the first *javana citta* can only bring *vipāka* into this life. But *kamma* done by the second through the sixth *javana citta* (which get stronger by association) are potent enough to bring *kamma vipāka* in many future lives. The seventh *javana* is weak. Thus, it can bring *vipāka* only in the next life and become null if it does not bring *vipāka* in the next life.
- It is unnecessary to learn the complexities of *citta vīthi*, but it is good to have some idea.

9. The association then moves to the next *citta vīthi*. Thus the subsequent *citta vīthi* (and thus the *javana citta* in that *citta vīthi*) will be stronger. And thus, it propagates, which is why one can get “really worked up” even thinking about a hated person.

- This is why *Satipaṭṭhāna* (and being mindful of evil thoughts) is so important. The start of such a hateful mindset is AUTOMATIC (due to our *gati*), as discussed in the [“Living Dhamma”](#) section. But we can stop those initial thoughts BEFORE they get strong and become out of control if we are mindful.
- This can be compared to a seed giving rise to a mighty tree unless one destroys it when it is just a little bud. When a seed germinates and becomes visible as a little plant, that little bud can be easily broken. But if one waits and allows it to grow, it COULD grow into a strong tree that is hard to take down.

10. As we see, *Paṭṭhāna Dhamma* can go into finer details. This is why *Paṭicca Samuppāda* has been compared to an ocean. It is vast and can explain the arising of ANY *saṅkhata* (alive or inert) in this world.

- However, if we start digging deeper, that could become a waste of time since there is no ending regarding how much finer detail one wants to examine.
- Still, it is good to see the depth of Buddha Dhamma. It gives one confidence in following the Path. Unshakable faith comes from realizing that Buddha Dhamma describes our world as it is.

Aññamañña Paccayā

11. Now let us briefly discuss the *aññamañña paccayā*, usually translated as “mutuality condition.” This is not a bad translation but could also be translated as “forward and backward condition.”

- Many of the PS cycle's steps go backward and forward. For example, the step we have discussed, “*viññāṇa paccayā nāmarūpa*,” runs backward (in the same PS cycle) too.
- Therefore, while *nāmarūpa* are generated AND get stronger by a given *viññāṇa*, the *viññāṇa* itself gets stronger by the cultivation of *nāmarūpa*, i.e., “*nāmarūpa paccayā viññāṇa*” step runs simultaneously too. This is “mutual strengthening.”
- In the example of the teenager, the cultivation of “bad” *nāmarūpa* (visuals of party scenes, bad friends, etc.) leads to the strengthening of that bad *viññāṇa* (desire to drink or take drugs), even though the bad *viññāṇa* first leads to the corresponding *nāmarūpa*.

12. The *aññamañña paccayā* — just like the *āsevana paccayā* — is highly effective in the first several steps in PS. While the “*avijjā paccayā saṅkhāra*” step initiates bad actions (or *saṅkhāra*), the continued actions in the same direction then lead to strengthening *avijjā* (or ignorance of the consequences of such actions), i.e., “*saṅkhāra paccayā avijjā*.”

- This is why it is essential to stop such conscious *saṅkhāra* (especially *saṅkappa* or the first part of *vacī saṅkhāra*) when one realizes that one is getting on the wrong track. Otherwise, one's *avijjā* will grow, and one's bad *gati* will only grow.
- Such immoral *saṅkhāra* — in the form of *vacī saṅkhāra* — appear to provide us with a sense of satisfaction at that time. For example, when one gets “really worked up” thinking about a bad deed done by an enemy, it gives one pleasure to say bad things about that person to others, or even retaliate directly to that person.

13. However, such actions lead to a “heat” or “*tāpa*” in us in the longer term. Long after that “initial satisfaction” of putting down that person, one will be “burning inside” for a long time, even if one does not realize that. One will be prone to frequent outbursts even with other people.

- Removal of this *tāpa* or “fire” in us is what is meant by the phrase “*ātāpi sampajano*” in the *Satipaṭṭhāna Sutta*. That will help reduce our tendency to get “worked up” at the slightest provocation, i.e., to change our *gati* in the right direction; see “[Satipaṭṭhāna Sutta – Structure](#).”
- This is the first type of suffering that many of us don't even realize; see, “[Suffering in This Life – Role of Mental Impurities](#)” and other posts in “[Living Dhamma](#).”

14. Finally, the *aññamañña paccayā* is not operative starting at the “*saḷāyatana paccayā phassa*” step in the *Paṭicca Samuppāda*.

- We can see that “*phassa* cannot lead to *saḷāyatana*,” “*vedanā* cannot lead to *phassa*,” etc.

Āsevana and Asevana – Different meanings

July 1, 2019: Regarding #2 above, it is essential to note that *āsevana* differs from *asevana*.

- *Sevana* is association. *Āsevana* (*Ā* + *sevana*) is “came to associate with” (as discussed in #2 above).

- *Asevana* (*A* with a short *A* + *sevana*) is “not to associate with,” the negation; see #5 of “[Associations \(Sevana\) – A Root Cause of Wrong Views..](#)”

It is imperative to see the difference, which illustrates how Pāli words combine (*sandhi*) to produce other words with very different meanings. Thanks to Tobias Große for bringing this distinction to our attention at today’s discussion forum.

X Is There a 'Self'?

Conclusion: **"Origin of Life – One Creates One's Own Future Lives"**

– That only leads to more suffering. Creating new lives stops with attaining *Nibbāna/Arahanthood*.

10.1 Does “Anatta” Refer to a “Self”?

October 2, 2023

Anatta in *Tilakkhaṇa* (three characteristics of nature) is not about a “self” but about the non-beneficial nature of the world. Understanding the “*anicca, dukkha, anatta* nature” of the world is critical to attaining *Nibbāna*, the end of suffering.

It is critically important to understand the concept of a “*pabhassara citta*” or a “pure mind” to comprehend the posts in this section.

- Please read the following subsection first: [“Recovering the Suffering-Free Pure Mind.”](#)

10.1.1 Cognition Modes – Sañjānāti, Vijānāti, Pajānāti, Abhijānāti

September 9, 2023

Cognition takes place at four levels: *sañjānāti*, *vijānāti*, *pajānāti*, and *abhijānāti*. [*jānāti* : [ñā + nā] knows; finds out; to be aware; understanding. *sañjānāti* = *saññā* + *jānāti*; *vijānāti* = *viññāṇa* + *jānāti*; *pajānāti* = *paññā* + *jānāti*; *abhijānāti* = *abhiññā* + *jānāti*.]

Introduction

1. The five aggregates are listed in **the order they arise in sensing a sensory input (*ārammaṇa*)**: *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

- Here “*rūpa*” includes both the “internal *rūpa*” that helps with sensing (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, *mano*) and the “mental imprints” of the external *rūpa* (*rūpa*, *sadda*, *gandha*, *rasa*, *phoṭṭhabba*, *dhammā*) that arises in mind.
- The contact of the internal *rūpa* with the “mental imprint” of the external *rūpa* gives rise to *vedanā*, registering that contact as a *sukha*, *dukkha*, or neutral (*adukkhamasukha*) *vedanā*.
- Based on that *vedanā* (but simultaneously), “recognition or perception” of that object arises, which is *saññā*.
- Based on both *vedanā* and *saññā* (but simultaneously), certain mental factors (*cetasika*) arise in the mind, for example, greed, joy, etc. Those are collectively called “*saṅkhāra*.”
- The totality of all those mental impressions is *viññāṇa*, loosely translated as “consciousness.” However, *viññāṇa* is more than consciousness; it also includes “an understanding of the sensory input.” **This understanding is wrong if based solely on *saññā***, which is *sañjānāti*. If an attempt is made to understand it better, an improved understanding could emerge (*vijānāti*.) The first level of a “better

understanding” comes at the *Sotāpanna Anugāmi* stage, which is *pajānāti*. The complete understanding, or *abhijānāti*, comes at the *Arahant* stage.

Sañjānāti, Vijānāti, Pajānāti, Abhijānāti

2. In the following, we will discuss those terms using mainly the *Mahāvedalla Sutta*. I will quote verses from different places in the *sutta* to provide insights as needed. Also, remember that numerous *cittas* arise based on an *ārammaṇa*, and they progressively get further contaminated within seconds. The “thoughts” have already been defiled by the time we realize it.

- For example, we can consider a *citta* that arises when a visual object is seen; it is called *cakkhu viññāṇa*, arising within a billionth of a second. But it arises already contaminated to some extent. Within seconds, it can become further contaminated and lead to immoral deeds.
- Thus, that *cakkhu viññāṇa* evolves further in subsequent *cittas* as the mind gets a better idea about the object and decides how to respond to that visual input.
- The mind starts generating *kamma* later in the process, but “later” is relative. Committing *kamma* can happen within seconds or even hours after first encountering that *ārammaṇa*.
- But let us start with what happens **in the INITIAL sensory contact, i.e., when *cakkhu viññāṇa* arises upon seeing the object.** The *Mahāvedalla Sutta* does not discuss the time sequence, so I will refer to verses from random places in the *sutta* as needed.

First Step: *Vedanā*

3. The contact of the “mental imprint of the external object” (*rūpa*) with the internal *cakkhu pasāda rūpa* (*cakkhu*) leads to the arising of the *vedanā cetasika*.

- That *vedanā* can be *sukha* (pleasant contact like when lying on a soft bed), *dukkha* (painful like in an injury), or *adukkhamasukha* (neutral like the feel of a slight wind). Those three types arise only with bodily contact, involving *kāya* and *phoṭṭhabba*. All other sensory contacts only lead to neutral *vedanā* in the INITIAL CONTACT, for example, when *cakkhu viññāṇa* arises.
- The “[WebLink: suttacentral: Mahāvedalla Sutta \(MN 43\)](#)” describes *vedanā* as follows: “*Vedanā vedanā’ti, āvuso, vuccatī. Kittāvatā nu kho, āvuso, vedanāti vuccatī’ti? ‘Vedeti vedetī’ti kho, āvuso, tasmā vedanāti vuccatī. Kiñca vedeti? Sukhampi vedeti, dukkhampi vedeti, adukkhamasukhampi vedeti.’* OR “Venerable, why is it called ‘feeling’? ‘One feels’ – therefore, Venerable, it is called ‘feeling.’ And what does one feel? One feels pleasure, pain, and ‘neither pleasure nor pain.’
- This *sutta* does not explicitly state that *sukha* and *dukkha vedanā* arise only due to bodily contact, but that is the case. All other sensory contacts (like vision or taste) only lead to neutral *vedanā* with ‘neither pleasure nor pain.’

Second Step: *Saññā* and *Sañjānāti*

4. Almost simultaneously, recognition of the object (in the case of a visual object, recognition of a person as attractive, for example) happens.

The “[WebLink: suttacentral: Mahāvedalla Sutta \(MN 43\)](#)” describes *saññā* as follows: “*Saññā saññā’ti, āvuso, vuccatī. Kittāvatā nu kho, āvuso, ‘saññāti vuccatī’ti? ‘Sañjānāti sañjānātī’ti kho, āvuso, tasmā saññāti vuccatī. Kiñca sañjānāti? Nīlakampi sañjānāti, pītakampi sañjānāti, lohita-kampi sañjānāti, odātampi sañjānāti. ‘Sañjānāti sañjānātī’ti kho, āvuso, tasmā saññāti vuccatī’ti.’* OR “Venerable, it is said ‘recognition/perception.’ Venerable, **why is it called ‘recognition’?** “**One recognizes**’ – therefore, Venerable, it is called ‘recognition.’ And what does one recognize? One recognizes

blue, yellow, red, and white. ‘One recognizes, one recognizes’ – therefore, Venerable, it is called ‘recognition.’”

- Even though this *sutta* does not go into detail, this is a very critical step in cognition. ***Sañjānāti*** means much more than recognition. The mind generates certain qualities (like attractiveness, tastiness, pleasing sounds or smells, etc.) This automatic response is based on one’s “natural *bhavaṅga* state” and may make unwise decisions by attaching to those “mind-generated *saññā*” or “*saññā vipallāsa*.” Thus, that attachment is based on “understanding (*jānāti*) with *saññā*” or “*sañjānāti*” (and not wisdom, as we see below).
- We discussed that in “[Contamination of the Human Mind Based on a Sensory Input](#)” and “[Contamination of a Human Mind – Detailed Analysis](#).”

Third Step: Mind Creates Its Version of the External *Rūpa* Based on *Saññā Vipallāsa*

5. Within a split second, the “attached mind” starts creating **its own version of the external *rūpa*** (*rūpāyatana*) based on this “distorted *saññā*” or that happens with an expectation, and thus, the *cakkhu pasāda* becomes “*cakkhu āyatana*” or “*cakkhāyatana*.”

- However, *kamma* accumulation has not started yet. **That will happen soon after the mind starts to attach to this “mind-made *rūpa*” with *kāma guṇa*.**
- We will discuss that step in the next post. [See “[Anicca Nature – Chasing Worldly Pleasures Is Pointless](#).”] Again, it is critical to note that all these events occur before we become aware that we are attached to the *ārammaṇa*. Such a detailed description (taking place in a split-second) can be seen only with the mind of a Buddha.

Root Cause of *Sañjānāti* With “Distorted *Saññā*”

6. The “[WebLink: suttacentral: Mūlapariyāya Sutta \(MN 1\)](#)” (the first *sutta* in *Majjhima Nikāya*) highlights the root of this “distorted *saññā*” or “*saññā vipallāsa*” of a *puthujjana* (average human) would have for ANYTHING in this world. As mentioned in #4 above and in the two posts referred to there, **the sweetness of sugar or attractiveness of a person is NOT an inherent property of the corresponding sensory object (sugar or the person.)** Instead, those are “mind-made distorted *saññā*” that arise automatically based on the “natural *bhavaṅga* state” that one is born with. That is why even an *Arahant* will see a person as attractive/unattractive or a meal as tasty/distasteful.

- **To get attached to the *ārammaṇa* with that *saññā* is *sañjānāti*.**
- Even though the same *saññā* can arise in an *Arahant*, that will not lead to *sañjānāti*. Depending on the situation, that can happen to a *puthujjana* (or anyone below the *Arahant* stage).
- The *Mūlapariyāya Sutta* explains the root cause for that attachment.

The Buddha says: “*Idha, bhikkhave, assutavā puthujjano ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaṃ adassāvī sappurisadhammassa akovido sappurisadhamme avinīto—pathaviṃ pathavito sañjānāti; pathaviṃ pathavito saññatvā pathaviṃ maññati, pathaviyā maññati, pathavito maññati, pathaviṃ meti maññati, pathaviṃ abhinandati. Tam kissa hetu? ‘Apariññātāṃ tassā’ti vadāmi*”

- **Translation:** “Take an **unlearned ordinary person** who has not understood the teaching of the noble ones—They **perceive (with *saññā*) *pathavi*** to be *pathavi* (meaning they perceive “solid objects made of *pathavi dhātu* to be solid as they appear to be.) Having perceived *pathavi* as solid (*saññatvā*), one conceives things made of *pathavi* (such as one’s physical body) to be “valuable for me” and would consider to be “mine.” For what reason? Because they haven’t completely understood *pathavi*.” (This verse requires a long explanation, but that is the basic idea.)

Abhijānāti – The Opposite of Sañjānāti

7. Later in the “[WebLink: suttacentral: Mūlapariyāya Sutta \(MN 1\)](#)” the Buddha states: “Yopi so, bhikkhave, bhikkhu araham khīṇāsavo vusitavā katakaraṇīyo ohitabhāro anuppattasadattho parikkhīṇabhavasamyojano sammadaññāvimutto, sopi pathaviṃ pathavito **abhijānāti**; pathaviṃ pathavito abhiññāya pathaviṃ na maññati, pathaviyā na maññati, pathavito na maññati, pathaviṃ meti na maññati, pathaviṃ nābhinandati. Tam kissa hetu? ‘Pariññātāṃ tassā’ti vadāmi.”

- **Translation:** “An Arahant has completed the spiritual journey and **knows the real nature** of pathavi; they do not conceive things made of pathavi (such as one’s physical body) to be “valuable for me” and would consider to be “mine.” For what reason? Because they have completely understood pathavi.” They can “see beyond the automatic recognition/perception” because they have understood the real nature of pathavi (and āpo, tejo, and vāyo.)

8. Then the Buddha goes through a long list of worldly things made of the four great elements of pathavi, āpo, tejo, and vāyo (mainly beings in all the realms in the world.) They have no “solid/permanent existence” because they have their origins in mind (i.e., created via javana cittās.) I have discussed the basics in the post “[The Origin of Matter – Suddhatthaka](#)” and details in the series “[Origin of Life](#).” The last post on that series is “[Origin of Life – One Creates One’s Own Future Lives](#).”

- I am starting another series of posts (an extension of the recent series “[Recovering the Suffering-Free Pure Mind](#).”) This series will address some finer points not discussed in the “[Origin of Life](#)” series.
- Let us briefly discuss the other two terms, **vijānāti**, and **pajānāti**, that are related to **sañjānāti** and **abhijānāti** (discussed above.)

Vijānāti – Related to Sañjānāti

9. Going back to the “[WebLink: suttacentral: Mahāvedalla Sutta \(MN 43\)](#)” it addresses what happens after the arising of vedanā and saññā in the initial cakkhu viññāṇa (in our example taken in #2 above): “Yam hāvuso, vedeti tam sañjānāti, **yam sañjānāti tam vijānāti**” or “you recognize/perceive (with saññā, i.e., **sañjānāti**) what you feel (vedeti), and you cognize (with viññāṇa, i.e., **vijānāti**) what you recognize/perceive (i.e., **sañjānāti**.)”

- In other words, the time sequence (within a split-second) is vedeti, **sañjānāti**, **vijānāti**.
- Here, **vijānāti** can be an improvement over **sañjānāti**. Let us discuss that briefly.

10. For most puthujjanās, **vijānāti** is essentially the same as **sañjānāti**. But someone actively learning Buddha Dhamma could be spending time thinking about the “real nature” of the world (i.e., cultivating the yathābhūta ñāṇa) made of the four great elements of pathavi, āpo, tejo, and vāyo. See “[Bhūta and Yathābhūta – What Do They Really Mean](#).”

- Thus, their mental status would be better, and thus, **vijānāti** could be an improvement on **sañjānāti**.

Transition from Vijānāti to Pajānāti (Understanding with Wisdom)

11. When someone starts comprehending the “real nature” **vijānāti** transitions to **pajānāti** (understanding with paññā; thus “pa jānāti.”) By the way, **sañjānāti** comes from “sañ jānāti” and **vijānāti** comes from (understanding with viññāṇa; thus “vi jānāti.”) Furthermore, **abhijānāti** (discussed above) is when **pajānāti** optimizes at the Arahant stage. **This is an easy way to remember the terms.**

The “[WebLink: suttacentral: Mahāvedalla Sutta \(MN 43\)](#)” describes **pajānāti** as follows: “Neyyam panāvuso, dhammaṃ kena **pajānāti**”ti? “Neyyam kho, āvuso, dhammaṃ **paññā cakkhunā pajānāti**”ti. OR “How do you understand the term **pajānāti**? It means to “see with wisdom (**paññā cakkhunā**)”

Then: “*Paññā panāvuso, kimatthiyā’ti? Paññā kho, āvuso, abhiññatthā pariññatthā pahānatthā’ti.*” OR “What is the purpose of wisdom? The purpose of wisdom is complete understanding leading to ending the rebirth process (by giving up this world.)”

- Sutta Central translation does not provide the correct ideas involved in the above verses because it is a word-by-word translation. But in the subsequent verses, the translation is good enough to get the idea (I made a couple of improvements): “How many conditions are there for the arising of right view with wisdom? There are two conditions for the arising of right view: learning from a Noble Person (“the words of another [*parato ca ghoso*]”) and *yoniso manasikāra* (“rational application of mind.”)”
- As we know, those two conditions are essential in the four conditions needed to attain the *Sotāpanna* stage: “[Four Conditions for Attaining Sotāpanna Magga/Phala.](#)”
- Thus, when a *puthujjana* becomes a *Sotāpanna Anugāmi*, *vijānāti* turns to *pajānāti*. When that *Sotāpanna Anugāmi* cultivates the Noble Path and becomes an *Arahant*, *pajānāti* turns into *abhiñānāti*.

Summary

12. An average person (*puthujjana*) makes decisions based on *sañjānāti* or *vijānāti*.

- The understanding of the fundamental nature of any *ārammaṇa* (or the world in general) elevates to the *pajānāti* level at the *Sotāpanna Anugāmi*. That happens when a *puthujjana* learns Buddha Dhamma from a Noble Person.
- The *pajānāti* level of understanding grows with higher stages of *magga phala* and becomes complete (*abhiñānāti*) at the *Arahant* stage.

10.1.2 Anicca Nature – Chasing Worldly Pleasures Is Pointless

September 16, 2023

Anicca is incorrectly translated as mere impermanence. But the primary meaning of *anicca* is that seeking long-lasting happiness in worldly/sensual pleasures is a waste of time. Understanding that is the key to the *Sotāpanna* stage of *Nibbāna*.

An Average Human’s Response to Unpleasurable Situations

1. When encountering an “unpleasurable situation/sensory input,” an average human (*puthujjana*) knows only two responses: (i) to try to avoid it or (ii) to compensate for it by seeking a “pleasurable sensory input.”

- However, no sensory pleasure can satisfy a mind for long. After a while, one gets bored with even the most luxurious vacation; a drug addict gets “saturated” and would want increasingly higher doses with time.
- Furthermore, one’s efforts seeking such “pleasurable situations” often involve “immoral deeds” (*akusala/pāpa kamma*). That leads to future rebirths in lower realms (*apāyās*), where there is much more suffering. **This incorrect way of understanding the world is *sañjānāti***; see “[Cognition Modes – Sañjānāti, Vijānāti, Pajānāti, Abhiñānāti.](#)”
- Of course, sometimes people also engage in moral deeds (*kusala/puñña kamma*) out of compassion, and *kamma vipāka* of such “good/moral deeds” lead to rebirth in human, *Deva*, and *Brahma* realms. This category of people (even if they are not exposed to Buddha Dhamma) examine things with an open mind (*vijānāti*), which is a better understanding than *sañjānāti*.
- That is essentially the basis of the “*samsāric* suffering” or the “cycle of rebirths,” mostly filled with suffering. Even though lives in the *Deva* and *Brahma* realms are mostly “pleasurable,” such “better rebirths” are rare. Most humans are reborn in the *apāyās* because of the tendency to engage in immoral

deeds when seeking pleasurable sensory experiences. See “[WebLink: suttacentral: Manussacutininiraya Sutta \(SN 56.102\).](#)”

Previously Unheard Teachings of a Buddha

2. The **astonishing truth** discovered by the Buddha can be stated as follows: (i) A “suffering-free” state (*pabhassara citta*) lies deep within a mind; (ii) it is covered by layers of defilements accumulated over an unimaginable time span; (iii) those defilements can be removed and the suffering-free pure mind can be recovered by following the Noble Path; (iv) our actions seeking worldly pleasures only lead to generating more defilements and getting further away from *Nibbāna* (the “suffering-free” pure mind.)

- I discussed those basic ideas in the subsection “[Recovering the Suffering-Free Pure Mind.](#)”
- In other words, until a Buddha comes to the world and teaches about the “hidden pure mind” (*pabhassara citta*), **humans know of only one way to minimize suffering/depression. That is to seek more sensory pleasures.** But that only causes more future suffering.
- Thus, humans are trapped in the rebirth process filled with mostly suffering until they comprehend the above facts and start seeing the “dangers of sensory pleasures.”
- One begins to understand that when becoming a *Sotāpanna Anugāmi* and elevating the understanding to the *pajānāti* level. That is when one starts comprehending (or “seeing with wisdom”) the “*anicca* nature” of worldly or sensual pleasures. However, as discussed below, even a *Sotāpanna* has not lost the desire to enjoy sensory pleasures. **Note:** *Anicca* is pronounced “anichcha.” See “[Pāli Glossary – \(A-K\).](#)”
- Thus, “*anicca* nature” applies to anywhere in the 31 realms of this world: **It is futile (pointless/unproductive) to seek long-lasting happiness in worldly pleasures.**

Analogy for the “Hidden Pure Mind”

3. We work hard most of our lives to get a good job, build a business, etc., and “build wealth.” All our efforts are focused on maximizing happiness via “collecting pleasure-generating stuff” like houses, cars, etc.

- But even if one becomes a billionaire and has access to any sensory experience one would like, one’s physical body will start decaying in old age. Then, one will leave all that “material wealth” behind at death. Even worse, one could have done many immoral deeds in that process of “building wealth” that could lead to rebirths in the *apāyās*. In other words, there is suffering “hidden in pleasure seeking.”
- **All this time, the suffering-free pure mind stayed hidden.** All one needed to do was to start cleansing the mind and recover that pure mind.
- Instead of seeking “pleasure for the moment” (with hidden suffering), one should seek a **suffering-free permanent state** by avoiding excessive sensory pleasure. That is the advice of all the Buddhas.

4. Let us consider an analogy. Suppose a poor farmer only has a small plot of land. He makes a living by growing vegetables there. Unknown to him, there is a deposit of precious gems several hundred feet under his land. Because he is unaware of that, his only option is to work hard in the field to make a living.

- Suppose a person with a “ground-penetrating radar” or a similar gadget surveys the ground in that area and sees a mine of gems under that farmer’s vegetable plot. He tells the farmer about his findings. Now, all that farmer has to do is start digging to find those gems.
- Even with that knowledge, sometimes the farmer could be skeptical: What if that mine is not there? If I start digging, I need to take time away from working on the field and also sacrifice a good portion of the land to do the digging.
- The situation with Buddha’s teachings is similar. The Buddha says (and shows evidence) that the suffering-free mind stays hidden in all of us. All we have to do is to (i) learn the correct teachings to verify

that the idea of a “hidden pure mind” makes sense and (ii) start “digging,” i.e., practicing the Noble Eightfold Path to get to the “hidden gem.”

5. Many people say, “I am busy with my job. I will start looking into it (let alone “digging”) when I retire.” But sadly, by the time most people retire, their brains do not work as efficiently (or they die soon after retiring.) It is sad to witness this situation. Some of my friends have already passed away without even looking into it. **They were too busy “accumulating wealth”** (starting a new business, trying to get a promotion, etc.)

- Just like the “uninterested farmer” in the above analogy, they focused on making more money. In their mindset, acquiring more material wealth was the only way to happiness.
- Most people can start seeing the truth about the “hidden pure mind” or the “*pabhassara citta*” if they spend a reasonable amount of time learning the teachings of the Buddha.

Anicca – To Realize the Futility of an Effort

6. Children like to build sandcastles. That activity gives them much pleasure. They believe such activities are of a “**nicca nature**,” i.e., fruitful. **Note:** *Nicca* is pronounced “nichcha.”

- However, growing up, they lose interest in such activities because they can see that they are suitable only for children without a broader understanding of the world. Instead, they now focus on studying and getting a good job. It is evident to any adult that spending time building sandcastles is an unproductive/useless activity. Any sandcastle they build will be washed away or broken by those walking on the beach.
- Thus, we can say that building sandcastles — even though pleasurable at the time — has no long-term benefit. **Sandcastles are of “*anicca* nature.”** They cannot be kept in that likable form for too long.
- The Buddha describes that analogy in the “[WebLink: suttacentral: Satta Sutta \(SN 23.2\)](#).” **In that sutta, the Buddha defined a “*satta*” (sentient being) as one who craves worldly pleasures; they are like little children building sandcastles.**

7. The “***anicca* nature**” of this world discovered by the Buddha is the basis of the uniqueness of his teachings. Even highly intelligent people can never realize that on their own.

- Of course, it is necessary to study to get a decent job and live comfortably to lessen the stresses of life. **However, better happiness can be attained by stopping all future suffering that extends beyond this life.**
- The “***anicca* nature**” of this world and the way to overcome it is not known to humans until a Buddha discovers it.

8. Thus, one must make wise decisions based on one’s current status. If one does not have enough resources to live a relatively worry-free, simple life, one must try to learn the necessary skills and get a decent job.

- However, once one has enough to sustain a simple lifestyle, is it wise to try to make millions of dollars instead of uncovering the freely available pure mind (*pabhassara citta*)?
- The pure mind that provides the “ultimate happiness” is there to be uncovered. Any activity related to “trying to build material wealth” is of “*anicca* nature,” just like building sandcastles is of “*anicca* nature.”
- **That is the basis of Buddha Dhamma:** to realize the “***anicca* nature**” of worldly things or sensory pleasures, including “*jhānic* pleasures.”

Seeing the Dangers of Worldly Pleasures

9. Many people say, “What is wrong with enjoying sensual pleasures as long as I don’t harm others?” If one understood the above discussion, one would not ask that question.

- Of course, “living a moral life with sensual pleasures without harming others” is the starting point. One MUST live a moral life to be able to understand Buddha Dhamma. One can do that while being married and sustaining a family well past the *Sotāpanna* stage and up to the *Anāgāmi* stage of *Nibbāna*. ”
- See “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)”
- The beginning of the Noble Path is to see the “*anicca* nature” of any worldly pleasures. That is the *pajānāti* level of understanding (i.e., same as *Sammā Diṭṭhi* or getting rid of *sakkāya diṭṭhi*.) With *Sammā Diṭṭhi*, a *Sotāpanna* has removed wrong views (*micchā diṭṭhi*) that can lead to committing highly immoral deeds suitable for rebirth in the *apāyās*. We will discuss the connection to *sakkāya diṭṭhi* in the next post.
- Please feel free to ask questions in the forum. These basic ideas form the foundation of Buddha Dhamma.

10.1.3 *Aniccaṃ Vipariṇāmi Aññathābhāvi* – A Critical Verse

September 22, 2023; revised #1 March 14, 2024

“*Aniccaṃ vipariṇāmi aññathābhāvi*” is a verse that succinctly states the unfruitfulness of pursuing sensory pleasures. Understanding its true meaning can get one to the *Sotāpanna* stage of *Nibbāna*.

Anicca Nature – Connection to the Five Aggregates

1. In the previous post, “[Anicca Nature – Chasing Worldly Pleasures Is Pointless](#),” we discussed that average humans who have not understood Buddha’s teachings have only one option to overcome disliked sensory experiences or depressing situations: They seek more sensory pleasures.

- However, as pointed out there, the Buddha has explained a previously unknown option. There is a “suffering-free pure mind” hidden underneath our defiled minds. When we seek worldly/sensory pleasures, our actions tend to conceal the “pure mind” further.
- Thus, we concluded that seeking sensory pleasures, like building sandcastles, is unproductive. Even though children enjoy building sandcastles, growing up, they realize it is unproductive. So, they voluntarily give up that and focus on productive activities like studying or learning a specific trade. **Building sandcastles is of “*anicca* nature,” meaning it is unproductive.** The Buddha discussed this analogy in the “[WebLink: suttacentral: Satta Sutta \(SN 23.2\)](#).” In the same way, chasing sensory pleasures is an unproductive (and also dangerous) activity, as we will discuss in this series of posts.
- The Buddha described how we move away from the “pure mind” when we seek sensory pleasures. Let us discuss that now. The Buddha described sensory experiences in terms of five aggregates (*pañcakkhandha*.) He explained that attaching to sensory experiences is the same as craving/*upādāna* for *pañcakkhandha*, i.e., craving sensory pleasures is the same as *pañcupādānakkhandha*.

Each Sensory Contact Adds to the “Five Aggregates” (*Pañcakkhandha*)

2. Each sensory experience involves two types of *rūpa*: an external *rūpa* (like a visual or a “*vaṇṇa rūpa*”) and an internal *rūpa* (like “*cakkhu pasāda rūpa*”; it is not physical eyes that actually “see.”) There are six such pairs.

- In a sensory event, an external *rūpa* comes into contact with an internal *rūpa* at *hadaya vatthu* (seat of the mind.) That leads to the rise of a number of mental phenomena: *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. Briefly, *vedanā* is the *sukha*, *dukkha*, or neutral “feeling;” *saññā* is the recognition of the sense object; *saṅkhāra* includes a variety of mental factors (*cetasika*) that arise in the mind; *viññāṇa* is the totality of all those mental phenomena and also a possible expectation regarding the sensory input (whether to seek more or to avoid it.)
- Those five entities — *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* — are traditionally called the five aggregates (*pañcakkhandha*.) Here, they are called “aggregates” or “collections” (*khandha*) because

the mind is not only aware of those entities arising at a given moment but also 11 types of them, including past experiences of them. Thus, *pañcakkhandha* (more correctly, *pañcupādānakkhandha*) provides a measure of our attachment to sensory inputs.

- We can also look at it in a slightly different way as follows.

3. We experience pleasure/joy or displeasure/pain with thoughts, and thoughts arise with sensory input (*ārammaṇa*.) Thoughts arise when an internal *rūpa* comes into contact with an external *rūpa*. The “*rūpa* aggregate” encompasses those two kinds of *rūpa* ever experienced (in the sense that even though we don’t recall all of them, our current state of mind is influenced by them.) Thoughts encompass how we understand the external world, i.e., our sensory experiences.

- The “mental factors” (*cetasika*) that arise with our thoughts embed multiple facets of each experience. We feel a sensory input (*vedanā*), recognize and form our perceptions about it (*saññā*), and then “mind-made *vedanā*” (*samphassa-jā-vedanā*) arise based on those initial *vedanā* and *saññā*. That is the basis of the *vedanā* and *saññā* aggregates (*vedanākkhandha* and *saññākkhandha*.)
- Various other mental factors (like greed, joy, anger, etc.) arise based on *vedanā* and *saññā*, and the *saṅkhāra* aggregate (*saṅkhārakkhandha*) represents those.
- The total sensory experience is *viññāṇa*; it also includes our expectations regarding what we experience. That is the fifth aggregate of *viññāṇakkhandha*.

Each Sensory Experience Helps Hide the “Pure Mind” or “*Pabhassara Citta*”

4. If we attach to any sensory input (*ārammaṇa*), we start accumulating *saṅkhāra* (or *abhisāṅkhāra*.) That means “*kamma* accumulation.”

- That strengthens our *saṃsāric* bonds (*saṃyojana*) and hidden defilements (*anusaya*.)
- Even if they don’t accumulate significant *kamma* or add to *saṃyojana* or *anusaya*, an average person (*puthujjana*) can NEVER start “cleansing existing defilements.”
- **To put it another way:** A *puthujjana* ALWAYS moves in one direction, away from the “pure mind” or *Nibbāna*, sometimes slowly and other times faster, depending on the level of attachment to sensory inputs. **In Pāli, this is called “*ācayagāmi*”** (pronounced “aachayagaami”) or “moving away from *Nibbāna*.”
- One can go the other way (*apacayagāmi*; pronounced “apachayagaami”; see [Ref. 1](#)) only when one becomes a Noble Person (*Ariya*) and starts following the Noble Path.
- **The Buddha gave an analogy in several *suttās*:** A flood (“*ogha*” in Pāli) will carry a person away from refuge. A *puthujjana* (an average human) is like that helpless person, getting carried away by the “flood” or the *saṃsāric* journey. **When one becomes at least a *Sotāpanna Anugāmi*, one can start seeing how to go against the flood and reach safety.** See, for example, “[WebLink: suttacentral: Oghapañhā Sutta \(SN 38.11\)](#).”

Adding to the *Pañcakkhandha* Is of “*Anicca* Nature”

5. Therefore, it should be clear by now the following fact: Each time one attaches to a sensory input (*ārammaṇa*), that only helps one move AWAY from the suffering-free “pure mind” or the “*pabhassara citta*.” **Any action or anything that causes one to move away from the ultimate release from suffering is unfruitful, i.e., of “*anicca* nature,” just as building sand castles is!**

- If one can understand that, one would have made significant progress in reaching the *Sotāpanna Anugāmi* stage.

- In numerous *suttās*, you have probably seen the Buddha asking a *bhikkhu* the following question: “*cakkhuṃ niccaṃ vā aniccaṃ vā*” *ti?*” The correct translation of that verse is: “**Is the eye (*cakkhu*) of *nicca* or *anicca* nature?**” Then, the question is repeated for the other five sense elements: ear (*sota*), nose (*ghāna*), tongue (*jivhā*), body (*kāya*), and mind (*mano*.) See, for example, “[WebLink: suttacentral: Cakkhu Sutta \(SN 18.1\)](#).” (Note: The English translation in the link is incorrect, as is the case with many critical translations at Sutta Central and generally with most English translations.)
- Depending on the *sutta*, the same question may be asked of the corresponding external *rūpa* (*rūpa*, *sadda*, *gandha*, *rasa*, *phoṭṭhabba*, *dhammā*); see, for example, “[WebLink: suttacentral: Rūpa Sutta \(SN 18.2\)](#).”
- In other *suttās*, the question is asked of the five aggregates (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*); see, for example, “[WebLink: suttacentral: Anicca Sutta \(SN 22.12\)](#).” Here, all six types of *rūpa* are bundled under “*rūpa*” (i.e., the *rūpa* aggregate or *rūpakkhandha*), and the same is true for the other four aggregates.
- The point here is that every time we attach to a sensory input not only the internal and external *rūpa* come into play, but the *pañcupādānakkhandha* grows too — in the “*ācayagāmi*” or the “wrong direction” away from *Nibbāna*.

Aniccaṃ Vipariṇāmi Aññathābhāvi – Correct Meaning

6. The “[WebLink: suttacentral: Cakkhu Sutta \(SN 25.1\)](#)” explains how understanding the above leads to the *Sotāpanna* stage. It is a short *sutta*; we can cover its key points.

The Buddha says: “*Cakkhum, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvi*” which is INCORRECTLY translated in the above link as “Mendicants, the eye is **impermanent, decaying, and perishing**.” Then, the verse is repeated for *sota*, *ghāna*, *jivhā*, *kāya*, and *mano*, the other types of sense faculties or “internal *rūpa*.”

- The correct interpretation can be understood by seeing that any time *cakkhu* (eye) is used to enjoy sensory pleasures (as a *puthujjana*), one moves away from *Nibbāna* or is carried by the “flood” away from the refuge, as explained in #4.
- Using eyes to enjoy sensory pleasures is like building sandcastles for a “fleeting momentary pleasure,” i.e., it is an unproductive activity. That is the meaning of “*aniccaṃ*” in that verse.
- *Vipariṇāma* is the opposite of *pariṇāma*. Let us understand the meanings of those two words. In English, evolution (*pariṇāma*) means the time progression of something where it gets better with time. For example, Darwin’s “theory of evolution” (“*pariṇāma vāda*” in Pāli/Sinhala) says monkeys progressed with time to become humans. *Vipariṇāma* is the opposite of evolution (devolution), where things move in the wrong/opposite direction with time. When one uses the eyes to enjoy sensory pleasures, one moves away from *Nibbāna*.
- *Aññathābhāvi* means “to move away from its natural/preferred state,” whereas “*aññatha*” means “deviate for the worse” and is the opposite of “*ittha*” or the “stable state of *Nibbāna*.” In many *suttās*, the following verse indicates attaining the *Arahanthood*: “*Khīṇā jāti, vusitaṃ brahmacariyaṃ, kataṃ karaṇīyaṃ, nāparaṃ itthattāyā*” *ti abbhaññāsi*.” See, for example, “[WebLink: suttacentral: Dutiyāmuruddha Sutta \(AN 3.130\)](#).” Thus, *aññathābhāvi* is the opposite of “*itthattāyā*” and has a very similar meaning to “*vipariṇāmi*.”
- Therefore, the correct meaning of that verse, stated very briefly, is: “*Bhikkhus*, using *cakkhu* to achieve sensory pleasures is like building sand castles; thus *cakkhu* is of *anicca* nature; it will take you away from *Nibbāna* (the pure mind) and toward more suffering (on a downward path).”
- We must never forget that if we don’t start “moving TOWARD *Nibbāna*” or become *apacayagāmi* (see #4), future rebirth in an *apāya* remains open.

7. The *suttās* SN 25.2 through SN 25.9 repeat the same verse for various entities that arise in a sensory contact: each of the following entities that arise in such sensory contacts: *rūpa*, *viññāṇa*, *phassa* (*samphassa*), *vedanā*, *saññā*, *cetanā*, *taṇhā*, and *dhātu*. The last *sutta* in the series (SN 25.10) makes a summary by repeating the verse for the **five aggregates**: *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

- That critical error in translating the key verse in #6 appears in almost all conventional English translations. **Unless explained by a Noble Person, that interpretation makes sense for the average human (*puthujjana*) who has not heard the correct explanation.**
- It is essential to realize that **most terms discussed in the *suttās* refer to mental phenomena**. When the Buddha discusses “*cakkhu*,” it is not about the physical eyes but about using the eyes as an “*āyatana*” (i.e., *cakkhāyatana*) for enjoying sensory pleasures; same with the other five “internal *āyatana*.” When referring to the six types of “*rūpa*,” it is not about external *rūpa*, but the ‘mind-made versions’ of them created by the mind, i.e., *rūpāyatana*, *saddāyatana*, *gandhāyatana*, *rasāyatana*, *phoṭṭhabbāyatana*, and *manāyatana*.
- That should be clear from the above series of *suttās*, which apply the verse in question to strictly mental entities (*viññāṇa*, *phassa* (*samphassa*), *vedanā*, *saññā*, *cetanā*, etc.) as well as for the internal and external *rūpa*.

Incorrect Interpretation of “*Aniccaṃ Vipariṇāmi Aññathābhāvī*”

8. In most English translations, the above verse refers to the physical eye or a physical *rūpa*. Thus, many people think it is about the physical body getting old and dying. For example, the English translation of “[WebLink: suttacentral: Cakkhu Sutta \(SN 25.1\)](#)” discussed in #6 above translates “*Cakkhum, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvī*” as “Mendicants, **the eye** is impermanent, decaying, and perishing.”

- Most translators mechanically translate the verse for mental attributes such as *viññāṇa* the same way. For example, in the “[WebLink: suttacentral: Viññāṇa Sutta \(SN 25.3\)](#),” the verse “*Cakkhuvīññāṇaṃ, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvī*” is translated as “Mendicants, **eye-consciousness** is impermanent, decaying, and perishing.”
- However, any *viññāṇa* rises and perishes (or a physical body is born and dies). Does a Buddha need to explain such an obvious fact?

Those Who Begin to Understand the Above are, at Minimum, *Sotāpanna Anugāmis*

9. Continuing with the “[WebLink: suttacentral: Cakkhu Sutta \(SN 25.1\)](#)” the Buddha says: “*Yo, bhikkhave, ime dhamme evaṃ saddahati adhimuccati—ayaṃ vuccati saddhānusārī*..” That means, “If someone understands the meaning of that verse (in #6) with faith (based on understanding), then that person is a *saddhānusārī*.” (Note: Again, the English translation is not entirely clear). **Then the Buddha further clarifies:** “A *saddhānusārī* is incapable of any deed which would make them be reborn in hell, the animal realm, or the ghost realm. Also, they will not die without becoming *Sotāpannās*.”

- In the next verse (at marker 2.1), the Buddha says: “*Yassa kho, bhikkhave, ime dhammā evaṃ paññāya mattaso nijjhānaṃ khamanti, ayaṃ vuccati: ‘dhammānusārī’*..” meaning, “If someone understands the meaning of that verse (in #6) after contemplating with a degree of wisdom, then that person is a *dhammānusārī*.” Then, the Buddha further clarifies that a *dhammānusārī* will also become a *Sotāpanna* before death.
- In the final verse (at marker 2.4), the Buddha states: “*Yo, bhikkhave, ime dhamme evaṃ pajānāti evaṃ passati, ayaṃ vuccati: ‘sotāpanno avinipātadhammo niyato sambodhiparāyano’*” ti OR “A *Sotāpanna* who has fully comprehended the meaning of the above verse is guaranteed to be released from rebirth in the *apāyās*, and is destined to attain the *Arahanthood*.”

- I have discussed *saddhānusārī* and *dhammānusārī* in the post “[Sotāpanna Anugāmi – No More Births in the Apāyā.](#)”

Understanding the Above Verse Is One Way to Remove *Sakkāya Diṭṭhi*

10. If one has started comprehending the verse “*Cakkhum, bhikkhave, **aniccam** vipariṇāmi aññathābhāvi*” then one has seen (with wisdom) that chasing sensory pleasures is an activity of “*anicca* nature” and will never be able to embark on the Noble Path to go “against the flood” and towards the pure mind. That understanding is the same as the removal of *sakkāya diṭṭhi* and also the other two *saṃyojana* of *vicikicchā* and *sīlabbata parāmāsa*.

- There are many ways of getting to the *Sotāpanna* stage or getting rid of *sakkāya diṭṭhi*. So, there is no need to worry if you had previously not thought about stating the “*anicca* nature” as described above. But once explained, it should be understandable if one had already been a *Sotāpanna/Sotāpanna Anugāmi*.

1. Those who are unaware of the unique “*Tipiṭaka* English” writing format adopted many years ago, see “[“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1.](#)” The English version of the *Tipiṭaka* was written in this format in the early 1900s, and that is the version used today in most English websites, including Sutta Central. It is essential to understand how to pronounce Pāli words correctly.

10.1.4 Dukkha – Previously Unknown Truth About Suffering

September 30, 2023

Dukkha in Buddhism is not only about the *dukkha vedanā* or the feeling of pain/depression felt at any given moment. It is about the root causes of future suffering. Even the pleasurable experiences of an average person perpetuate future suffering. That is the “previously unheard” teachings of a Buddha.

Dukha and Dukkha – Buddha Dhamma Is About Dukkha

1. In a previous post, “[Anicca Nature – Chasing Worldly Pleasures Is Pointless](#),” we discussed the fact that average humans (*puthujjana*) who have not understood Buddha’s teachings have only one option to overcome disliked sensory experiences or depressing situations: They seek more sensory pleasures.

- However, as pointed out there, the Buddha has explained a previously unknown option. A “suffering-free pure mind” (*pabhassara citta*) is hidden underneath our defiled minds. When we seek worldly/sensory pleasures, our actions tend to conceal the “pure mind” further.
- If one attaches with *rāga* (liking the sense input based on “*sukha vedanā*”), one may engage in immoral deeds to get “more of it,” leading to future “bad outcomes” or “future suffering.” Even without immoral deeds, just the attachment itself keeps one bound to “*kāma loka*.”
- Attachment due to *dosa* (dislike for the sense input “*dukkha vedanā*”) definitely leads to immoral deeds.
- Even in the absence of *rāga* and *dosa*, one’s mind is ALWAYS contaminated with *moha* (ignorance of the “real nature of the world.”) Thus, even in the vast majority of cases where “neutral” or “*adukkhamasukha*” *vedanā* arises, there is a subtle attachment based on one’s distorted views/perceptions (*diṭṭhi* and *saññā vipallāsa*) about the world. This is harder to see at first.

2. Therefore, each sensory event leads one away from the “hidden pure mind” or the *pabhassara citta*. Please read the above-mentioned post to ensure you understand that critical point.

- Another way to say the above is as follows: An average person (*puthujjana*) who has not comprehended Buddha’s teachings is ALWAYS on a downward path, away from *Nibbāna* (suffering-

free pure mind.) In Pāli, this is called “*ācayagāmi*” (pronounced “aachayagaamī”) or “moving away from *Nibbāna*.” That is the tendency to go in the direction of the “*samsāric* flood” (“*ogha*” in Pāli.)

- When one starts understanding the world’s *anicca*, *dukkha*, and *anatta* nature, one will start losing attachment to sensory inputs. That cannot happen with only willpower. One’s wrong views and perceptions (*diṭṭhi* and *saññā vipallāsa*) about the world start to wear away AUTOMATICALLY when one starts comprehending the *anicca*, *dukkha*, and *anatta* nature with wisdom (*paññā*.) When that happens, one starts going “against the flood.” See #4 of “[Aniccari Viparināmi Aññathābhāvi – A Critical Verse](#).”
- Here, it is critical to note that Buddha’s teachings are not about getting rid of painful feelings felt in the present life (*dukkha*) but about **ending** unimaginable suffering in the rebirth process (*Dukkha Sacca*); see “[Does the First Noble Truth Describe only Suffering?](#)”

Origin of Suffering – *Dukkha Sutta*

3. The [WebLink: suttacentral: *Dukkha Sutta* \(SN 12.43\)](#) states ([Ref. 1](#) gives the Pāli verse), “*Bhikkhus*, what is the origin of suffering? Depending on *cakkhu* and *rūpa*, eye-consciousness arises. **That *rūpa* may trigger “defiled *gati*” (*saṅgati* or *saṇ gati*) in mind. That generates “mind-made *vedanā*.” Based on that “mind-made *vedanā*” the mind attaches (*taṇhā*) to that sensory input. *Bhikkhus*, that is the origin of suffering.**”

- That verse is repeated for the other five senses. **Thus, the Buddha says that the origin of suffering is attachment (*taṇhā*) to sensory inputs.**
- Here is to state that in another way: **Causes for future suffering start with a sensory input coming through one of the six senses: eyes, ears, tongue, nose, body, and mind!**
- It will become clear why I have translated the verse differently than conventional translations. See the two translations at Sutta Central in the above link. As I have explained, some *suttās* need detailed explanations, not word-for-word translations done without understanding the context.

Ending of Suffering – *Dukkha Sutta*

4. Then, in the second part of the *sutta* ([Ref. 2](#) gives the Pāli verse): “*Bhikkhus*, how can this **suffering be ended?** With the contact between *cakkhu* and *rūpa*, eye-consciousness arises. That sensory experience may trigger “defiled *gati*” (*saṅgati* or *saṇ gati*) in mind, i.e., it can generate “mind-made *vedanā*.” Based on that “mind-made *vedanā*” the mind may attach (*taṇhā*) to that sensory input. But with the remainder-less fading away and **cessation of that craving (*taṇhā*) comes the cessation of *upādāna* (pursuing such experiences); with the cessation of *upādāna*, cessation of *bhava*; with the cessation of *bhava*, cessation of rebirth (*jāti*); with the cessation of *jāti*, aging-and-death, sorrow, lamentation, pain, displeasure, and despair cease. **That is the cessation of the whole mass of suffering.**”**

- That craving (*taṇhā*) is the ORIGIN of suffering in #3 above. The **CESSATION of craving (*taṇhā*) leads to the cessation of suffering.**
- **Does that mean only the three steps of *upādāna*, *bhava*, and *jāti* play crucial roles out of the 11 steps (*avijjā*, *saṅkhāra*, *viññāṇa*, *nāmarūpa*, *salāyatana*, *phassa*, *vedanā*, *taṇhā*, *upādāna*, *bhava*, and *jāti*) in *Paṭicca Samuppāda*?**
- Discussion of that will provide us with valuable insight that most people are unaware of. **The answer lies in understanding the meaning of *upādāna*.**
- The involvement of those other terms in *Paṭicca Samuppāda* based on *taṇhā* and *upādāna* is explained in “[Tanhā Paccayā Upādāna – Critical Step in Paticca Samuppāda](#).”

The Difference Between Conventional Worldview and Buddha Dhamma

5. As discussed in #1 above, any human not exposed to Buddha Dhamma can think of only one way to overcome the loss of a mind-pleasing thing or a distressful situation. **That is to seek more sensory pleasures.** One may be able to get temporary satisfaction that way, **but it never leads to the end of suffering!**

- The above description is one aspect of the *anicca* nature: “[Anicca – The Incessant Distress \(“Pīlana”\).](#)” No matter how hard we try, it is impossible to maintain a “fully satisfactory mindset” regardless of how much wealth one has.
- Even if we engage in the most satisfying activity, after a while, it becomes unsatisfactory. Even the most delicious meal, we can eat so much. If we eat that same meal day after day, we get fed up and would like to eat something else. There is a sense of “unfulfillment” or “unsatisfactoriness” (“*pīlana*” in Pāli) in our minds.
- The Buddha understood that the root of that issue is *raga*, *dosa*, and *moha*, which have been with us for a time that cannot be traced back. They have remained with us as *anusaya* or ‘hidden defilements.’ The permanent solution to overcome that is to **get rid of our cravings** for sensory pleasures.
- **That is precisely the opposite approach to that of an average human (*puthujjana*) who has the mindset that sensory pleasures are of the “*nicca* nature.”** (The “*anicca* nature” has other meanings than this “*pīlana* nature;” see “[Anicca – True Meaning.](#)” They all emphasize the futility of seeking sensory pleasures to overcome inevitable suffering inherent in this world.
- That wrong view/perception of a *nicca* nature manifests as *taṇhā* (craving/attachment) for the sensory inputs coming through the six senses.

Six Types of *Taṇhā*

6. The “[WebLink: suttacentral: Vibhaṅga Sutta \(SN 12.2\)](#)” defines *taṇhā* as follows. “*Katamā ca, bhikkhave, taṇhā? Chayime, bhikkhave, taṇhākāyā—rūpataṇhā, saddataṇhā, gandhataṇhā, rasataṇhā, phoṭṭhabbataṇhā, dhammataṇhā.*”

Translated: “*Bhikkhus, what is taṇhā? There are these six classes of taṇhā – rūpa taṇhā, sadda taṇhā, gandha taṇhā, rasa taṇhā, phoṭṭhabba taṇhā, dhamma taṇhā.*”

- Note that the translation in the above translates “*taṇhā*” as “craving.” However, “*taṇhā*” CANNOT be translated to English as one word. “*Taṇhā*” means “to get attached to an *ārammaṇa*.”
- An *ārammaṇa* is a “*rūpa*” that comes through one of the six senses. There are six types of *rūpa*: “*rūpa rūpa*” (visuals), *sadda rūpa* (sounds), *gandha rūpa* (smell), *rasa rūpa* (taste), *phoṭṭhabba rūpa* (touch), and *dhamma* (memories) *rūpa*.
- If it comes through the eyes, it is a sight (“*rūpa rūpa.*”) Each person attaches to the visuals they crave. That “attachment” can arise because of liking or craving, but one can also via “anger/hate.” Therefore, “*rūpa taṇhā*” can arise when one sees an attractive person/thing or a disliked person/thing. **The key point is that sight will trap one’s mind, and one will start thinking about it. Then we say “*rūpa taṇhā*” has arisen due to that *rūpa ārammaṇa* (i.e., *rūpārammaṇa*.)** Same for *saddārammaṇa*, *gandhārammaṇa*, etc.

Kammic Energy Created in *Javana Citta*

7. *Kammic* energy is created in a particular type of *citta* called “*javana citta.*” Note that “*citta*” is pronounced as “chiththa.” See [Ref. 3](#) on the writing/pronunciation of Pāli words.

- It is easy to see that not all *cittās* (loosely translated as ‘thoughts’) are the same. If we are not interested in something, our *cittās* on it are weak. On the other hand, if we are passionate about something, we have “strong feelings” that show up even in our tone of voice. That indicates an increase in *javana* power in *cittās*.

- For example, a child being awakened in the morning to go to school on a rainy day may not be enthusiastic about getting up and going to school. Thus, his *cittās* at that time were weak.
 - The same child getting ready to play with his friends will be enthusiastic about it. His *cittās* at that time will have strong “*javana* power.”
 - However, in Buddha Dhamma, we focus only on *javana cittās* generated with *rāga*, *dosa*, and *moha*.
8. The idea of “thoughts generating energy” is a novel concept, especially for those in Western countries.
- **However, it is the basis of Buddha Dhamma.** Mind is the precursor to everything in this world: “[Manopubbangamā Dhammā.](#)”
 - That is also why the Buddha said, “My teachings have never been known to this world.” As emphasized in #1 above, humans who have not understood Buddha’s teachings have only one option to overcome disliked sensory experiences or depressing situations: They seek more sensory pleasures.
 - The critical point to understand is that the tendency to attach to worldly things cannot be blamed on worldly things. In the absence of a Buddha, people can figure out that avoiding such “mind-pleasing things” can lead to a peaceful mind and even *anāriya jhāna*. Ancient *yogis* went deep into jungles, away from sensory pleasures, and cultivated *jhāna*. However, avoiding attractive external *rūpa* is only a temporary solution. Just the sight of an attractive woman can make them lose the ability to get into *jhāna*.
 - **The permanent way to lose the tendency to attach to worldly things is to cleanse one’s mind of such *gati* or tendencies with *rāga*, *dosa*, and *moha*.** That can happen only after hearing (*jānato*) about the true fundamental nature of this world from a Noble Person and comprehending it with wisdom (*passato*).

Critical Implications of *Dukkha Sutta* (SN 12.43)

9. As you can see, in #3 above (the first part of the *Dukkha Sutta*), the Buddha says that all future suffering can be stopped by stopping attachment to the sensory inputs that come through the six senses. Those six senses are the eyes, ears, nose, tongue, body, and mind. I alluded to this point in the post, “[Paṭicca Samuppāda – Introduction.](#)”

- Then, in the second part, there is more information on that point. With the verse in #4 above, the Buddha briefly explains how future suffering ceases by the cessation of *taṇhā*, craving for sensory pleasures. He says that cessation of *taṇhā* leads to the cessation of *upādāna*, *bhava*, and *jāti*, and thus, to the cessation of all future suffering.
- As we can also see, the verse is referring to the *Paṭicca Samuppāda* sequence starting with “*salāyatana paccayā phasso*” and proceeding via “*phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyasā sambhavan’ti.*” Sensory inputs come through the six sense faculties or *salāyatana*.
- In the next post, We will continue this discussion by focusing on *anatta* — the logical next step in how the *anicca* and *dukkha* nature leads to the “*anatta nature*.” Thus, *anatta* is not about a “self.”

10.1.5 ‘Etam Mama, Esohamasmi, Eso Me Attā’ti – What Does It Mean?

October 7, 2023; revised January 19, 2024 (#10)

*‘Etaṃ mama, esohamasmi, eso me attā’*ti is a verse that appears in many *suttās*. It summarizes the wrong views of an average person who has not comprehended the teachings of the Buddha.

***Attā* Does Not Mean “Soul” or “an Unchanging Self”**

1. The absence of an “everlasting soul” or “an unchanging self” is built into the foundation of Buddha Dhamma. **Thus, the translation of “*attā*” as “self” in the verse in question is a grave error.**

- If there is such an entity as a “soul,” then attaining *Parinibbāna* (stopping rebirth) would not be possible. If there were to be an everlasting soul, it must exist forever. As we know, an *Arahant* is not reborn in this world after death. Thus, **the absence** of a “soul” (or an *ātman* in Hinduism) **is built into Buddha Dhamma**. There is no need to argue about whether such a “self” exists.
- But then the Buddha talked about “his” previous births. Is there a contradiction? No. Because the Buddha taught that there is a “lifestream” that evolves from life to life and that “lifestream” stops evolving at the death of an *Arahant*.
- The above issue confuses many. Once, a *Deva* asked the Buddha, “Why do *Arahants* say things like ‘I speak’ or ‘they speak to me’? Isn’t that a contradiction?” The Buddha explained that it is impossible to live among others without using such terminology. See “[WebLink: suttacentral: Arahanta Sutta \(SN 1.25\)](#).”
- Even though the idea of an “unchanging/everlasting me” is a contradiction in Buddha Dhamma, it is perfectly fine to use “I,” “me,” or “myself” in the conventional/conversational way.

Critical Facts/Conventional Terminologies

2. First, let us sort out some facts/terminologies.

- The Pāli words for I, me, and mine are *ahaṃ*, *me*, and *mama*. Even though there is no everlasting “I,” we cannot live in this world without using the words I, me, and mine. Even the Buddha used those words in the conventional (*vohāra*) sense.
- However, there is no “everlasting ‘me’” like a soul in Christianity or an *ātman* in Hinduism.
- Instead, an everchanging “lifestream” evolves according to the Buddhist principle of causes and effects, i.e., *Paṭicca Samuppāda*. That “lifestream” experiences happiness and suffering, but **suffering dominates over the long run**. See “[What Reincarnates? – Concept of a Lifestream.](#)”
- For example, a human may be reborn in the future as a *Deva* or an animal, depending on the causes/conditions at that time.
- That suffering ends only at the death of an *Arahant*.

The Conventional and Deeper Meanings of *Attā*

3. Even though an “unchanging/everlasting self” does not exist (as pointed out in #1 above), the Buddha talked about a “person” in a conventional way. The Pāli word for indicating “a person,” “myself,” etc., in a conventional way, is “*attā*” (with a long “a.”)

- The deeper meaning of “*attā*” (and also “*atta*” without the long “a”) is “beneficial,” “fruitful,” etc. The opposite of that is “*anatta/anattā*” or “unfruitful.”
- Both usages are discussed in “[Atta Hi Attano Natho.](#)” A longer discussion in “[Anatta – the Opposite of Which Atta?](#)”
- The deeper meaning comes into play in *Tilakkhaṇa* (*anicca, dukkha, anatta*), where *anatta* is related to *anicca* and *dukkha*. All three indicate **undesirable characteristics of the world of 31 realms**.
- **Note:** *atta* and *attā* are pronounced “aththa” and “aththā.” See [Ref. 1](#).

4. Certain words can have “double meanings” in any language. A number of English words are spelled the same way and pronounced the same way but have different meanings depending on the context; see, for example, “[WebLink: englishwithnab.com: Why Words Have Different Meanings in Different Contexts.](#)”

- One needs to have a good understanding of both languages AND the context to be able to make translations correctly. Most translators of the *Tipiṭaka* into English have neither proficiency in Pāli (the language of the *Tipiṭaka*) nor a sufficient understanding of the deep foundational concepts of Buddha Dhamma.
- This has led to a severe problem. See “[Word-for-Word Translation of the Tipiṭaka.](#)”

The worldview of a *Puthujjana*– World Is of “*Atta* (Valuable) Nature”

5. Those who have not heard/comprehended the worldview of the Buddha (*puthujjana*) want to enjoy as much sensory pleasure as possible. **They see sensory pleasures as valuable or fruitful. They are not aware of any other mechanism that can provide relief from suffering.** When faced with distressful situations, they seek refuge in sensory pleasures.

- Thus, human society, in general, is built around that mindset. The goal of an average human (*puthujjana*) is to get a good job or create a business so that one can afford sensory pleasures to the maximum level possible.
- Similarly, business models are built around providing ways for people to enjoy sensory pleasures. Novel technologies are sought to provide new ways of enjoying sensory pleasures.
- This view that seeking sensory pleasures can bring lasting happiness is “*sakkāya diṭṭhi*.”
- That model seems to work, at least on the surface. That is why this mindset prevails over generation after generation for thousands of years. Only a Buddha can figure out why sensory pleasures do not provide lasting happiness, i.e., *sakkāya diṭṭhi* is a wrong view.

Drawbacks/Inconsistencies of the Conventional Worldview

6. If the above model is correct, those who have made millions/billions of dollars must live without suffering because they can afford any sensory experience they desire. But we know that is not true.

- First, we are all aware of the suicides by wealthy people. If sensory pleasures provide lasting happiness AND can overcome any suffering, those people had enough money to “buy happiness.” The problem there is that sensory pleasures cannot overcome some suffering (due to illnesses or mental depression).
- Second, our ability to experience sensory pleasures goes down as we age. The food will not taste the same, the response to smells will decrease, and the ability to enjoy sex will decrease. Our ability to see and hear will also decrease with age, and most importantly, brain functions will also deteriorate with old

age. No amount of money or the inventions of “new ways of enjoying sensory pleasures” will be able to compensate for those inevitable decreases in bodily functions.

- When one is young, it may seem that any suffering can be overcome by seeking sensory pleasures. If a fire destroys one's house, one can build another if one has enough money. If one gets into disputes with the spouse, one can get a divorce and marry another. Of course, not everyone would have enough money to do those things. Even those who can afford those things will not be able to enjoy the “new set of possessions” as they get old. If the food-tasting ability decreases, even the most delicious food will taste bland. Even if one is married to the most beautiful person, one cannot even engage in sex past a certain age.

Anicca, Dukkha, Anatta – Drawbacks [Ādīnava] of Craving Worldly Pleasures

6. In the three recent posts, “[Anicca Nature – Chasing Worldly Pleasures Is Pointless.](#)” “[Aniccari Viparināmi Aññathābhāvi – A Critical Verse.](#)” and “[Dukkha – Previously Unknown Truth About Suffering](#)” we discussed how the pursuit of worldly pleasures lead to eventual suffering, even though it may provide temporary happiness. Those posts discussed two aspects of nature (*anicca* and *dukkha*.) We now discuss the related third aspect of *anatta* nature, i.e., the unfruitfulness of pursuing worldly pleasures and how one becomes helpless and subjected to much suffering in the end.

- **As pointed out in the above posts, an average person (*puthujjana*) knows only one method for becoming happy. That is to seek sensory pleasures available via the five physical senses: mind-pleasing sights, sounds, tastes, smells, and bodily contacts.**
- Even when they encounter distressful or painful experiences, the only way they know of to overcome suffering (or compensate for it) is to seek more sensory pleasures.
- This reliance on sensory pleasures leads to the **wrong view/perception** that mind-pleasing sights, sounds, tastes, smells, and bodily contacts are available **in the external world**, and those can be relied on for delivering happiness.
- The Buddha called that **wrong view** *sakkāya diṭṭhi* (the wrong view that sensory pleasures can bring happiness and overcome suffering); he called that **wrong perception** *saññā vipallāsa* (distorted perception that sensory pleasures can bring happiness and overcome suffering.)
- One becomes a *Sotāpanna Anugāmi* by getting rid of *sakkāya diṭṭhi*. The removal of *saññā vipallāsa* happens in stages and is complete only at the *Arahant* stage. Thus, let us first focus on *sakkāya diṭṭhi*.

Do Sensory Pleasures Provide Lasting Happiness?

7. Children “live in the moment” and thus enjoy building sandcastles. As adults, they realize that building sandcastles does not provide lasting happiness; therefore, they focus on acquiring worldly things (houses, cars, etc.) that can bring happiness on a long-term basis.

- Therefore, a *puthujjana* becomes joyful when acquiring assets like houses and cars or engaging in pleasure-generating activities like eating, watching movies, having sex, etc. However, they become distraught when such belongings are damaged or destroyed. Also, any “pleasure-generating activity” does not last long. For example, one can eat only so much of the best food on the planet; watching more than one movie at a time can cause headaches, and sexual activity does not last long.
- Therefore, a *puthujjana* is always looking for different types of sensual pleasures. However, no activity can provide long-lasting happiness. Many people eventually end up taking drugs since that is the easiest way to forget about other problems, and one can get “high” quickly. But then one needs to keep increasing the dose to get the “same pleasure outcome,” and in a short time, they get overdosed and even die. **There is a sense of “unfulfillment/unsatisfactoriness,” and that is one aspect of the “anatta nature.”**

- Therefore, even those adults (average humans or *puthujjana* who have not comprehended Buddha’s teachings) don’t see that their actions also do not provide lasting happiness.
- Another deeper aspect is that seeking sensory pleasures moves one further away from the “suffering-free pure mind” (*pabhassara citta*), and thus, such activities are of an “*anicca* nature.” The world with “mind-pleasing sights, sounds, tastes, smells, and touches” is of “*anatta* nature,” meaning one can never find long-lasting happiness. **Nothing of “*atta* nature” (where one can be free of any suffering) exists in the world of 31 realms**, even among the *Deva* or *Brahma* realms, let alone in the human world.

‘*Etam Mama, Esohamasmi, Eso Me Attā*’ti

8. As we have discussed (see the posts in #6 above), sensory pleasures involve external *rūpa* in the world and lead to the arising of a set of mental phenomena. The Buddha summarized the mental aspects into four categories: *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

- A *puthujjana* seeks external *rūpa* that can provide *sukha vedanā* via the physical body and *somanassa vedanā* to the mind.
- Any external *rūpa* (providing mind-pleasing sights, sounds, tastes, smells, and touches) is highly valued by a *puthujjana*. Of course, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* arising from such experiences are highly valued as well. Those five entities are the five aggregates or *pañcakkhandha*. **Since we tend to crave them and try to keep them close to our minds (i.e., have *upādāna* for them), they become “*pañca upādāna khandha*” or “*pañcupādānakkhandha*.”**

9. Therefore, It is natural to view such *rūpa* and the accompanying *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* as one’s own. For example, one likes to own a luxury car and enjoys driving it or even thinking about that car.

- That is essentially the meaning of the verse, “*etam mama, esohamasmi, eso me attā*’ti,” regarding any one of the “*pañcupādānakkhandha*.”

10. The Buddha explained that in the “[WebLink: suttacentral: Etammama Sutta \(SN 22.151\)](#)” among many other *suttās*. You can see the original Pāli version and the Sutta Central translation of the *sutta* in the link. **In the following, I revised that translation to correct the errors.**

“*Bhikkhus*, what causes (an average) person to regard something (a *rūpa*) like this: ‘This is mine (*etam mama*), this is “me” (*esohamasmi* or *eso ahaṃ asmi*), this is for my benefit (*eso me attā*)’?” Note that the second part of *esohamasmi* applies to one’s body/body parts only. **All three apply to any *rūpa* that one is attached to.** The words “*asmī*” and “*asmi māna*” refer to the idea of “me”; that is, “*māna anusaya*,” or “*māna saṃyojana*,” which goes away only at the *Arahant* stage. See “[WebLink: suttacentral: Seyyohamasmi Sutta \(SN 35.108\)](#).”

- The next verse (@ marker 1.5) in the above link is incomplete. **The full verse is:** “*rūpe kho, bhikkhave, satī, rūpaṃ upādāya, rūpaṃ abhinivissa ‘etam mama, esohamasmi, eso me attā*’ti samanupassati.”

“Upon experiencing a mind-pleasing *rūpa*, the person would generate *upādāna* for it and start generating *abhisāṅkhāra* (*abhinivissa*) with the view: ‘This is mine, **I am lucky to have this, this will be for my benefit.**’”

- Then, the Buddha explains that any *rūpa* (internal or external) is of an *anicca* nature, and generating *abhisāṅkhāra* with attachment to them will lead to suffering.
- **That verse is repeated for *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.**

The verses starting @ marker 1.18 state that someone who has comprehended *Tilakkhaṇa* (or the Four Noble Truths/*Paṭicca Samuppāda*) can see that such attachments lead to future suffering.

11. I hope this clarification makes the meaning of the verse “*etaṃ mama, esohamasmi, eso me attā’ti*” clear.

- In the next post, we will discuss another similar verse related to *anatta* and *sakkāya diṭṭhi*.

10.1.6 “Attā” as “Self” – Wrong Translation in Many Suttās

October 13, 2023

Attā can mean either a “person”/“oneself” (mundane meaning) or “of benefit/value” (deeper meaning as the opposite of “*anatta*” in *Tilakkhaṇa*), depending on the context. In many English translations, it is always used with the mundane meaning. That leads to much confusion.

Ātman/Anātman Are Not the Same as Attā/Anattā

1. *Ātman* and *anātman* are Sanskrit words meaning “self” and “no-self” in Hinduism. Here, a “self” means the same as a “soul” in Christianity, a permanent entity. See “[WebLink: encyclopedia.com: Anatman/Atman \(No-Self/Self\).](#)”

- **That article starts with the following:** “The Vedic Sanskrit term *ātman* (Pāli, *attā*), literally meaning breath or spirit, is often translated into English as self, soul, or ego. Etymologically, ***anātman* (Pāli, *anattā*)** consists of the negative prefix *an*, plus, *ātman* (i.e., without *ātman*) and is translated as no-self, no-soul, or no-ego.” That is completely wrong!
- That sentence explains the problem. The Vedic “***anātman***” was adopted to explain the meaning of the Buddhist “***anattā***” (in Pāli) in *Mahāyāna* Buddhism that took root in India a mere 500 years after the passing away of the Buddha. It then got incorporated into *Theravāda* Buddhism during the time *Mahāyāna* Buddhism flourished in India. By the time the British Empire took over most of Asia, that interpretation had spread to other Asian countries as well. See “[Misinterpretation of Anicca and Anatta by Early European Scholars.](#)”
- Unfortunately, now that incorrect interpretation is everywhere: “[WebLink: en.wikipedia.org: Ātman \(Buddhism\).](#)”
- This has done immense damage to *Theravāda* Buddhism and has blocked the path for many over the past thousands of years.
- In the following, I will point out how that incorrect interpretation leads to inconsistencies in *Sutta* translations.

2. In the previous post, “[Etaṃ Mama, Esohamasmi, Eso Me Attā’ti – What Does It Mean?](#)” I discussed that “*attā*” has two meanings, and the correct meaning must be used depending on the context. Furthermore, I pointed out that **the absence** of an “everlasting soul” or “an unchanging self” is built into the foundation of Buddha Dhamma.

- Even though an “unchanging/everlasting self” does not exist, the Buddha talked about a “person” in a conventional way. The Pāli word for indicating “a person,” “myself,” etc., in a conventional way, is “*attā*” (with a long “a.”)

- The deeper meaning of “*attā*” (and also “*atta*” without the long “a”) is “beneficial,” “fruitful,” “meaningful,” etc. The opposite of that is “*anatta/anattā*” or “unfruitful.”
- The deeper meaning comes into play in *Tilakkhaṇa* (*anicca, dukkha, anatta*), where *anatta* is related to *anicca* and *dukkha*. **All three indicate undesirable characteristics of the world of 31 realms.**
- Both usages are discussed in “[Atta Hi Attano Natho](#).” A longer discussion in “[Anatta – the Opposite of Which Atta?](#)”
- The deeper meaning must be used in the context of the *suttās* SN 22.33 AND SN 35.101 discussed below.

Natumhāka Sutta

3. I will focus on one *sutta* to point out the absurdity of translating *atta/anatta* (or *attā/anattā*) as “self/no-self” without paying attention to the context. Here is the Pāli version: “[WebLink: suttacentral: Natumhāka Sutta \(SN 22.33\)](#)”

The following is my translation with a few clarifications. You should try to follow it since it is not a long or complex *sutta*. I used the following meanings: *tumha* = you, *tumhākaṃ* = yours, *pajahatha* = to give up (in mind, *pajahatha* does not mean donate.)

At Sāvattṭhi.

“*Bhikkhus*, give up what’s not yours.”

- “Giving up (the attachment to) such things will be for your welfare and happiness.”

“And what is not yours?”

- *Rūpās* (whether internal or external) are not yours: give them up (meaning don’t generate *taṇhā/upādāna* for them.)
- Giving up attachment to them will be for your welfare and happiness (here, *pahīna* means to “lose attachment”).

“In the same way, *vedanā, saññā, saṅkhāra*, and *viññāṇa* are not yours: give them up (meaning don’t generate *taṇhā/upādāna* for them.)

- Giving up attachment to them will be for your welfare and happiness.”

“Suppose a person comes to this temple (*jetavane*) and carries off the grass, sticks, branches, and leaves on the temple grounds, burns them or does whatever they want with those grass, sticks, branches, and leaves.

Would you think: This person is carrying off something of value to us, burning something of value to us (*amhe*)?”

- “There is no reason to say so, *Bhante*.”

“Why is that?”

- **@ marker 2.6:** “Because those things (grass, sticks, branches, and leaves on the temple grounds) are **not useful/beneficial (*attā*) or can provide to anything of value (*attaniyam*)**.”

“In the same way *Bhikkhus*, *rūpās* (whether internal or external) are not yours: give them up (meaning don’t generate *taṇhā/upādāna* for them.)

- Giving up attachment to them will be for your welfare and happiness.”

“In the same way, *vedanā, saññā, saṅkhāra*, and *viññāṇa* are not yours: give them up (meaning don’t generate *taṇhā/upādāna* for them.)

- Giving up attachment to them will be for your welfare and happiness.”

That is the complete *sutta*.

Absurd Translation of *Natumhāka Sutta*

4. Here is the Sutta Central link with both Pāli and their English translations: “[WebLink: suttacentral: Natumhāka Sutta \(SN 22.33\)](#)”

- You can read the English translation at Sutta Central in the above link.

5. The critical verse is @marker 2.6: “*Na hi no etaṃ, bhante, attā vā attaniyaṃ vā*”*ti*.

The Sutta Central English translation is: “**Because to us that’s neither self nor belonging to self,**” meaning “Because to us that (grass, sticks, branches, and leaves on the temple grounds) is neither self nor belonging to self.”

- Does it make sense to say, “Grass is neither self nor belonging to self”?
- Here, “*Na hi no etaṃ*” means “those things (grass, sticks, branches, and leaves on the temple grounds) are **not**.”
- The translation of “*attā vā attaniyaṃ vā*” at Sutta Central is “**neither self nor belonging to self.**”
- **This is an excellent example of the tragic outcome of translating “attā” as “self.”** What does it mean to say, “Grass is neither self nor belonging to self”?

6. Thus, the point is that “*attā*” in the context of the *sutta* refers to whether the grass, sticks, branches, and leaves on the temple grounds are **of any value/substance/benefit**.

- A second translation at Sutta Central has the same problem: “[WebLink: suttacentral: 22.33. Not Yours \(1\)](#).”
- There is a longer version in the “[WebLink: suttacentral: Paṭhamanatumhāka Sutta \(SN 35.101\)](#)” at Sutta Central with exactly the same verse translated the same wrong way.
- Here is the translation of that latter *sutta* at another website: “[WebLink: accesstoinight.org: Na Tumhaka Sutta: Not Yours](#).” Translation of the critical verses there are as follows:

“Suppose a person were to gather or burn or do as he likes with the grass, twigs, branches, & leaves here in Jeta’s Grove. Would the thought occur to you, **‘It’s us that this person is gathering, burning, or doing with as he likes’?**”

“No, lord. Why is that? **Because those things are not our self nor do they pertain to our self.**”

- It appears that they mechanically translate words without even trying to see whether what comes out makes any sense!

Why Shouldn’t One Take Things Not “Belonging to Oneself”?

7. The deeper explanation is that nothing in this world (including one’s own physical body) truly belongs to “oneself,” and thus, one will not have control over such things. Even one’s own physical body (and, in general, the five aggregates) arises due to causes and conditions (*Paṭicca Samuppāda*.) Can we stop our bodies from aging, for example? No. A *puthujjana* (average human) tends to think of the physical body as “their own,” but that is only an illusion.

- That aspect is described in another version of *Natumhāka Sutta*: “[WebLink: suttacentral: Natumhāka Sutta \(SN 12.37\)](#).”
- The English translation there is not as bad as in the previous case. However, it does not explain the concepts involved.

8. Further explanations are in other versions of *Natumhāka Sutta*: “[WebLink: suttacentral: Pathamanatumhāka Sutta \(SN 35.101\)](#)” and “[WebLink: suttacentral: Dutīyanatumhāka Sutta \(SN 35.102\)](#).”

Those two *suttās* go into even more detail and point out that **it is not wise** to take anything internal (normally taken as one’s own, like one’s eyes, ears, different types of *viññāṇa*, etc.) as “one’s own.”

- **I have started discussing those issues in the current series of posts (see the recent update):**
“[Does “Anatta” Refer to a “Self”?](#)”

Absurdities When Translating “Attā” as “Self” Under All Situations

7. In “[WebLink: suttacentral: Attavagga](#),” “Attā hi attano nātho” is translated as “Self is indeed the lord of self!” **What does that mean?**

- The title “Attavagga” is translated there as “The Self.” This does not make sense since there is no “everlasting self” in Buddha Dhamma; see #2 above. The English title should indicate something like “What is Beneficial.” What is beneficial is *Nibbāna*, not anything in this world.
- That section of the *Dhammapada* is about what is “beneficial” (of the “atta” nature; the deeper meaning) for oneself (“attā” with the mundane meaning.)
- Therefore, throughout those verses, both meanings must be used correctly. I have explained the meaning of verse 160 in the post “[Attā Hi Attano Natho](#).”

8. There are four translations in that Sutta Central post; the other three translations are better but still do not provide the full meaning. See, for example, [WebLink: suttacentral: Dhp 157–166: Attavagga—Bhante Suddhāso \(suttacentral.net\)](#)

- The main issue is that it is not possible to translate certain verses in the *Tipitaka* word-by-word. **There are two main reasons for that:** (i) Some Pāli words cannot be translated as a single word to any language. One must understand the meaning of such a word and use the Pāli word. (ii) When a certain word has a “double meaning,” the translator must know the usage of both meanings.
- I have discussed that in a separate section since this problem is a common occurrence, especially in current English translations: “[Elephant in the Room 1 – Direct Translation of the Tipitaka](#).”

9. While “attā” has the mundane meaning of a “person” or “self,” **that meaning is never associated with “atta” (with a short “a.”)**

- Furthermore, the negation of “attā” as “no-self” **is never used** in the *suttās* as “anattā” (“na” + “attā”)
- That negation usage is there only as “anatta” or “anattā” in relation to *anicca* and *dukkha* in *Tilakkhaṇa*. There, *anicca*, *dukkha*, and *anatta* describe the **unsatisfactory/dangerous nature of worldly existences**. Let us discuss that now.

Attā/Anatta and Attā/Anattā are About Tilakkhaṇa

10. There is a series of *suttās* “[WebLink: suttacentral: Anicca Sutta \(SN 22.12\)](#),” “[WebLink: suttacentral: Dukkha Sutta \(SN 22.13\)](#),” “[WebLink: suttacentral: Anatta Sutta \(SN 22.14\)](#),” and “[WebLink: suttacentral: Yadanicca Sutta \(SN 22.15\)](#),” that clearly show the deeper meaning of *anatta* in relation to the *anicca* and *dukkha* nature of the world. There are more *suttās* in that series that go into further detail.

- The first *sutta* (SN 22.12) says, “*rūpaṃ, bhikkhave, aniccaṃ, vedanā aniccā, saññā aniccā, saṅkhārā aniccā, viññāṇaṃ aniccaṃ*” meaning “*Bhikkhus, rūpa, vedanā, saññā, saṅkhārā, viññāṇa* are all of *anicca* nature. Attachment to them will not lead to permanent happiness (i.e., absence of suffering).” The next verse says, “*Evam passam, bhikkhave, sutavā ariyasāvako rūpasmiṃpi*

nibbindati, vedanāyapi nibbindati, saññāyapi nibbindati, saṅkhāresupi nibbindati, viññāṇasmimpi nibbindati” or “Seeing this, a learned noble disciple will start losing cravings for them.”

- The second *sutta* (SN 22.13) repeats the same verses, saying, *rūpa, vedanā, saññā, saṅkhārā, viññāṇa* are all of *dukkha* nature (i.e., they lead to suffering), and thus, a learned noble disciple will start losing cravings for them.
- The third *sutta* (SN 22.14) repeats the same verses, saying, *rūpa, vedanā, saññā, saṅkhārā, viññāṇa* are all of *anatta* (worthless/unfruitful) nature, and thus, a learned noble disciple will start losing cravings for them. Both “*atta*” and “*attā*” are used in the context of *Tilakkhaṇa* to discuss whether this world of 31 realms can be of benefit or for the permanent removal of suffering. In those cases, “*anatta*” (“*na*” + “*atta*”) and “*anattā*” (“*na*” + “*attā*”) indicate the negation of the two terms respectively.

11. Then, the fourth *sutta* (SN 22.15) points to the relationship among them: “*Rūpa* is of *anicca* nature. Attachment to them leads to suffering. Therefore, they are of *anatta* (worthless/unfruitful) nature.” Then, it is repeated for the other four aggregates:

“*Vedanā* is of *anicca* nature. Attachment to them leads to suffering. Therefore, they are of *anatta* (worthless/unfruitful) nature.”

“*Saññā* is of *anicca* nature. Attachment to them leads to suffering. Therefore, they are of *anatta* (worthless/unfruitful) nature.”

“*Saṅkhārā* is of *anicca* nature. Attachment to them leads to suffering. Therefore, they are of *anatta* (worthless/unfruitful) nature.”

“*Viññāṇa* is of *anicca* nature. Attachment to them leads to suffering. Therefore, they are of *anatta* (worthless/unfruitful) nature.”

Absurdity of the Wrong Translations of *Anicca* and *Anatta*

12. The English translation in the “[WebLink: suttacentral: Yadanicca Sutta \(SN 22.15\)](#)” states (describing the relationship among *anicca, dukkha, and anatta*): “Form is impermanent. What’s impermanent is suffering. What’s suffering is not-self.” Then, it is repeated for the other four aggregates:

“Feeling is impermanent. What’s impermanent is suffering. What’s suffering is not-self.”

“Perception is impermanent. What’s impermanent is suffering. What’s suffering is not-self.”

“Choices are impermanent. What’s impermanent is suffering. What’s suffering is not-self.”

“Consciousness is impermanent. What’s impermanent is suffering. What’s suffering is not-self.”

- Of course, all those five entities are impermanent; anyone can see that, **but only a Buddha can discover the *anicca* nature.**
- The next part, “What’s impermanent is suffering,” is **not even true in the mundane sense** (e.g., a headache leads to more suffering if it becomes permanent!)
- Finally, **does it make any sense** to say, “What’s suffering is not-self”?

Further details at “[Anatta – A Systematic Analysis](#)”

10.1.7 “Attato Samanupassati” - To View Something to be of Value

October 20, 2023; revised February 28, 2024

“*Attato samanupassati*” means “to view something to be of value.” Therefore, “*atta*” indicates something of value, and “*anatta*” means the opposite. *Anatta* is a natural extension of *anicca* and *dukkha* regarding worldly things. It means any effort to seek refuge in worldly things is futile, leads to suffering, and is thus “not beneficial” or “useless.”

Sakkāya Diṭṭhi – Wrong View that Worldly Pleasures Deliver Lasting Happiness

1. The Buddha summarized the attachment of a *puthujjana* (an average human) to sensory pleasures using five entities: *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. These are the five aggregates (*pañcakkhandhā*.) However, we do not attach to all the *rūpa* we experience. Thus, we will focus on *pañcupādānakkhandhā*; see below.

- The internal and external *rūpa* make it possible to experience sensory events. The mental phenomena arising from such sensory interactions can be summarized with four entities: *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.
- With the wrong view that sensory pleasures are worthwhile pursuing (*sakkāya diṭṭhi*), a *puthujjana* craves external *rūpa* that can bring such experiences and also craves *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* that arise. For example, one highly values not only one’s possessions (spouse, houses, cars, etc.) but also *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* that arise when thinking about them.
- That wrong view of *sakkāya diṭṭhi* leads to the idea that all those five entities are worthwhile to be considered “fruitful” or of the “*atta* (fruitful) nature.” **When one starts seeing the opposite, one becomes a *Sotāpanna Anugāmi*.**

Four Levels of Attachment (Based on *Sakkāya Diṭṭhi*)

2. In the “[WebLink: suttacentral: Samanupassanā Sutta \(SN 22.47\)](#)” the Buddha described the wrong way of contemplation of a *puthujjana* regarding worldly things: “*Idha, bhikkhave, assutavā puthujjano ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaṃ adassāvī sappurisadhammassa akovido sappurisadhamme avinīto rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ; attani vā rūpaṃ, rūpasmiṃ vā attānaṃ.*”

- The first part of the verse means: “An **ordinary person who has not heard/understood** the Noble teachings from a Noble Person thinks about *rūpa* (both internal and external) in four ways.
- Those four ways are at four levels, starting with the strongest (*rūpaṃ attato samanupassati*.) The fourth (*rūpasmiṃ vā attānaṃ*) indicates the least attachment. Those four levels also depend on the person (some have strong wrong views compared to others) and also the type of sensory input (*ārammaṇa*.)
- **Then, the verse is repeated for the four mental aggregates:** *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. For example, “*viññāṇaṃ attato samanupassati, viññāṇavantaṃ vā attānaṃ; attani vā viññāṇaṃ, viññāṇasmiṃ vā attānaṃ.*”
- Thus, we could summarize by stating, “*pañcupādānakkhandhā attato samanupassati, etc.*” The reason for using *pañcupādānakkhandhā* instead of *pañcakkhandhā* is discussed below.

3. It is worthwhile noting the meaning of the words “*Samanupassanā*” and “*samanupassati*.” It comes from “*sama*” (similar) and “*passa*,” meaning “see.” Thus, “*samanupassanā*” is to “see according to some specific criterion (here one’s wrong views).”

- Therefore, “*samanupassati*” means “someone seeing the world according to one’s views.” The four ways of attachment are rooted in *sakkāya diṭṭhi* (the view that worldly things can provide one with long-lasting happiness.)
- As we discussed in the previous post, “[“Attā” as “Self” – Wrong Translation in Many Suttās](#),” the meaning of the word “*atta/attā*” in this context is the wrong view that worldly things can be “useful/beneficial.”

4. The four levels of attachment can be briefly stated as follows:

- (i.) The “value/benefit” of a given *rūpa* (and the “mind-made *rūpa*” arising based on that *rūpa*) cannot be expected from another; the perceived value is intrinsically associated with that *rūpa* or a mental entity based on that *rūpa* (*rūpaṃ attato samanupassati,..*)
- (ii.) some (external) *rūpa* can be substituted for those in (i) in some cases (*rūpavantaṃ vā attānaṃ, ..*),
- (iii.) some *rūpa* that are in a specific category (*attani vā rūpaṃ, ..*), and
- (iv.) any *rūpa* that seems to provide happiness, i.e., even with a way one had not contemplated before (*rūpasmiṃ vā attānaṃ, ..*).
 - As you can see, the emphasis on a particular *rūpa* decreases from (i) to (iv) above.
 - Note that the English translation in the link (and in most other translations) provides a very different interpretation. **Those translators blindly use the mundane meaning of “attā” explained in “Attā” as “Self” – Wrong Translation in Many Suttās.**

Simple Analogies to Grasp the Meanings

5. The following are simple examples to help get an idea about the four categories:

- (i.) Suppose person A falls in love with B. The attachment is so strong that A says, “I would rather die if I don’t get to marry B.” In A’s mind, B’s *rūpa* is the same as future happiness. Any *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* arising based on B cannot be separated from future happiness. This is an example of “*rūpaṃ attato samanupassati*” through “*viññāṇaṃ attato samanupassati*.”
- (ii.) Another person, C, falls in love with D but finds out that D is married. Now, C is actively looking for someone who looks like D. This is an example of “*rūpavantaṃ vā attānaṃ*,” i.e., C believes someone who looks like D can bring happiness.
- (iii.) In another case, person E believes if a suitable partner can be found and married to such a person, that will lead to happiness. Thus, E is looking for someone but does not have a specific type of person in mind. This is “*attani vā rūpaṃ*,” i.e., there could be a *rūpa* that can be of value.
- (iv.) Finally, person F is not thinking about marriage but runs into G and starts thinking, “Marrying G could bring happiness.” This is “*rūpasmiṃ vā attānaṃ*” or seeing possible value in this particular *rūpa*. Here, F may get into the mindset of A in case (i) above if the attraction to G becomes strong.

Attato Samanupassati and Ucceda Diṭṭhi [*ucceda* : (m.) cutting off; perishing; annihilation.]

6. The strongest attachment for most people is associated with one’s physical body as “*rūpaṃ attato samanupassati*.” That person would also have the view that any mental phenomenon arising from that physical body is also “mine” and is firmly associated with “me” (*vedanāṃ, saññāṃ, saṅkhāre, viññāṇaṃ attato samanupassati*.)

- Usually, **this view** is the extreme view of *ucceda diṭṭhi*; it is not possible to separate the physical body from “me.” When the physical body dies, that is the end of “me.”
- Inherent in this view is another view that “life” ends when the physical body dies, which is a “materialistic view.” They believe that mental phenomena arise in the brain, and thus, all five aggregates “end” with the death of the physical body.
- Those five wrong views (i.e., *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* are all of “*attato samanupassati*” nature) represent five out of twenty wrong views associated with *Sakkāya Diṭṭhi*.

Other Three Cases Associated with *Sassata Diṭṭhi* [*sassata* : (adj.) eternal.]

7. Those who believe in a “permanent soul” or “an *ātaman*” (in Hinduism) realize that life does not end with the death of the physical body. They believe in a soul-type permanent entity that goes from life to life. For

Christians, that endpoint is either heaven or hell, i.e., one will forever live in happiness in heaven or forever live in agony in hell. In Hinduism, the permanent state (*ātman*) is realized when born in the *Mahā Brahma* realm.

- Therefore, They do not consider the present physical body to be the same as “ultimate happiness” as those with *uccheda diṭṭhi*.
- They only believe that a “soul-type entity” is associated with the physical body, but it will survive the death of the physical body. Thus, they see a value in the physical body only to a certain level: **“*rūpavantam vā attānam; attani vā rūpam, rūpasmiṃ vā attānam.*”**
- For them, the same is true for the mental entities (*vedanā, saññā, saṅkhāra*, and *viññāṇa*.) Those are beneficial only to cultivating the path to heaven or the *Mahā Brahma* realm. That leads to fifteen types of wrong views associated with *Sakkāya Diṭṭhi*.
- In other words, they believe that the five aggregates are not the “ultimate refuge,” but one cannot get there without them.

Twenty Types of *Sakkāya Diṭṭhi* versus the Analogies Discussed in #5

8. The twenty types of wrong views associated with *sakkāya diṭṭhi* discussed in #6 and #7 above are the extreme cases based on *uccheda diṭṭhi* and *sassata diṭṭhi*. See [“*Sakkāya Diṭṭhi* – Getting Rid of Deeper Wrong Views](#)” for a detailed discussion on the twenty types.

- However, even the simpler types of wrong views discussed in #5 above (that apply to external *rūpa* and mental phenomena arising based on external *rūpa*) also belong to *sakkāya diṭṭhi*.
- As discussed under #5(i) above, under certain circumstances, one may value an external *rūpa* even more than one’s own.
- ***Sakkāya diṭṭhi* can manifest in different ways if one does not comprehend that nothing in this world can provide relief from suffering.** If one digs deeper, that means (i) anything in this world arises due to causes and conditions, and (ii) thus, anything in this world CAN BE stopped from arising. The first is understood via comprehending *Paṭicca Samuppāda*. The second shows that nothing in this world is permanent in the sense of a soul/*ātman*; anything that comes into existence has a temporary existence. [*Ātman* means Soul in Śanskrit.]

No Need to Memorize Any Categories

9. While analyses such as those discussed above can help explain the concept of *sakkāya diṭṭhi*, **memorizing such descriptions, categories, etc., is unnecessary.**

- A *Sotāpanna* may not even know about such categories. Different *Sotāpannas* describe how they understand the concept of *sakkāya diṭṭhi* in different ways. One time, a *bhikkhu* went around asking other *bhikkhus* (who had declared attaining the *Sotāpanna* stage) how to describe it. Each one gave different descriptions of the *Sotāpanna* stage.
- That *bhikkhu* got confused and complained to the Buddha. The Buddha gave an analogy of asking someone to describe a tree that had a unique trunk (black), unique flowers (bright red looking like pieces of red meat), and unique leaves (specific unique shape). Some people would identify the tree as having that unique trunk, while others described it with flowers or leaves. But they all had seen the tree! See [“WebLink: *suttacentral: Kimsukopama Sutta* \(SN 35.245\).”](#)
- The critical point is to understand the “*anicca* nature” of this world, i.e., that it will not be possible to stop suffering by chasing worldly pleasures. See [“*Aniccaṃ Viparināmi Aññathābhāvi* – A Critical Verse.”](#) Understanding the *anicca* nature leads to comprehending *dukkha* and *anatta* nature; see #10 of [“Attā” as “Self” – Wrong Translation in Many Suttās.](#)

Difference Between *Sakkāya Diṭṭhi* and *Asmi Māna*

10. It is also essential to see the difference between *sakkāya diṭṭhi* (a wrong view that things in this world can stop suffering, i.e., one can find refuge somewhere in this world) and *asmi māna* (perception of “me.”)

- Any average human (*puthujjana*) has both the wrong view of *sakkāya diṭṭhi* (a *diṭṭhi vipallāsa*; distorted view) and the wrong perception (*saññā vipallāsa*; distorted perception) that it is fruitful to perceive (with *saññā*) somethings in this world as “mine” or “me.”
- That *diṭṭhi vipallāsa* goes away at the *Sotāpanna* stage. Even though a *Sotāpanna* has **seen (with wisdom)** the dangers of sensual/worldly pleasures, the distorted perception of worldly pleasures remains.
- Therefore, *saññā vipallāsa* is much harder to remove and goes away completely only at the *Arahant* stage. Even an *Anāgāmi* knows that it is unfruitful to **view** the physical body as “me,” but that *saññā* of a “me” or “I” is still there.
- The first glimpse of the *anicca*, *dukkha*, and *anatta* nature helps remove *diṭṭhi vipallāsa* at the *Sotāpanna* stage. Complete comprehension of the *anicca*, *dukkha*, and *anatta* nature gets one to the *Arahant* stage.
- If one immerses in a lavish lifestyle, even removing *diṭṭhi vipallāsa* will be difficult. **A mind enthralled by sensual pleasures is an agitated mind; an agitated mind cannot comprehend Buddha Dhamma.** One may not see it that way until one can experience the “relief” when living a simple life.

An “Evolving Self” Exists Until the *Arahant* Stage

11. The Buddha never denied the existence of a “person” if that is what is meant by a “self.” It is totally fine to say “me,” “my car,” “my body,” etc. But one must also understand the “deeper truth” that “I” will not be in this form (even the human form) for too long. Our lifestreams had been in the forms of animals and hell-beings as well as *Devās* and *Brahmās* in the past. See [“What Reincarnates? – Concept of a Lifestream.”](#)

- The Buddha explained that the idea of a “permanent self” (that can live forever in heaven or a *Brahma* realm) is wrong.
- Any “lifestream” evolves according to the same principles dictated by *Paṭicca Samuppāda*: “*avijjā paccayā saṅkhāra*” through “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyasā sambhavan’t.*” **Those are all generic terms. Your lifestream will evolve dictated by those same steps as that of another person, an animal, or a Deva.** Understanding that, without a doubt, gets rid of *sakkāya diṭṭhi*.
- However, getting rid of *sakkāya diṭṭhi* is the first step. That only gets rid of the **wrong views**. But the “**perception of a me**” will be until the *Arahant* stage. Yet, getting rid of *sakkāya diṭṭhi* will make one free of future rebirths in the *apāyās*.

12. However, even an *Arahant* (who has removed the perception of “me,” “I,” etc.) would still speak using words like, “**I** am eating,” or “**I** scraped **my** arm,” etc.

- See [“WebLink: suttacentral: Arahanta Sutta \(SN 1.25\).”](#) An *Arahant* cannot live in this world and communicate with others without using such words.
- Of course, *Arahant* will not be reborn at the death of the physical body (*Parinibbāna*); there was no “soul/ātman” associated with the *Arahant*.
- Therefore, instead of getting hung up on words, one must try to understand the meanings of the Pāli words depending on the context.

Attachment Is to *Pañca Upādānakkhandhā* and Not to *Pañcakkhandhā*

13. Also, note that in #2 above, I did not state, “*pañcakkhandhā attato samanupassati, etc.*” but “*pañcupādānakkhandhā attato samanupassati, etc.*” above. We do not attach to everything in this world; we attach to only those things we crave, i.e., *pañcupādānakkhandhā*.

- Since the mind never attaches to something that is not of interest, *pañcakkhandhā* NEVER comes into play in *Paṭicca Samuppāda*. Even from the first step of making a sensory contact, it is *pañcupādānakkhandhā* that comes into play.
- **Based on an ārammaṇa, cittās arise already contaminated (i.e., as *pañcupādānakkhandha*), and possible attachment is to *pañcupādānakkhandha*.** I will discuss that in a later post.

Summary

14. The words “*atta/attā*” (and *anatta/anattā*) in the context of *anicca*, *dukkha*, and *anatta* refer ONLY to indicate the fruitful (and unfruitful) nature.

- The mundane usage of the meaning “person” or “me” applies **only to *attā*** in some cases; the words *atta*, *anatta*, or *anattā* **cannot be used** with that meaning. An example is discussed in “[“Attā” as “Self” – Wrong Translation in Many Suttās.](#)”
- **An alternative way to describe the *anicca*, *dukkha*, and *anatta* nature is “*aniccam vipariṇāmi aññathābhāvi*.”** I believe that provides a more intuitive idea; see “[“Aniccam Vipariṇāmi Aññathābhāvi – A Critical Verse.](#)”
- All posts in this subsection: “[Does “Anatta” Refer to a “Self”?](#)”

10.1.8 Saññā Vipallāsa – Distorted Perception

October 27, 2023

Saññā vipallāsa means “distorted perception.” Our perceptions about this world are distorted and wrong. Modern science has come to the same conclusion 2600 years after the Buddha.

[WebLink: youtube: You are Made Up of Nothingness](#)

Our Bodies Are Not “Solid” – Wrong Perception (*Saññā Vipallāsa*) [That It is Solid]

1. We perceive worldly things as made of “solid, concrete matter.” Our physical bodies appear to be “solid,” and the houses and cars we value, as well as mountains, trees, etc., appear to be “solid.”

- One of the startling discoveries science has made is the following: What we **perceive with our senses (*saññā*)** can be astonishingly deceiving. Even though our bodies seem to be “solid,” in reality, they are mostly “empty space,” as illustrated in the above video. Diamond is the hardest known substance on Earth, and diamond atoms are virtually empty, too.
- Initially, in the 1800s, scientists came to the conclusion that matter is made of atoms. But then, in the early 1900s, they found that atoms are “mostly empty” (with a tiny nucleus in the middle with most of the mass and an “electron cloud” surrounding it. The astonishing fact is that if the nucleus is compared to a peanut, the whole atom would be the size of a stadium, as pointed out in the above video. Try to make that picture in your mind. It is mind-boggling!
- However, that was just the beginning. More progress was made with the advent of quantum physics in the 1920s.

2. **In the middle of the 1900s, scientists found that even the nucleus is not “solid”; it is made of a variety of “fundamental particles.”** They had to build enormous particle accelerators trying to understand the nature of those elementary particles.

- The astonishing conclusion was that the “ultimate particle” that keeps everything together (“Higgs boson”) is not really a “particle” but more like a “packet of energy” (confirmed within the past ten years.) The following video, “The Surprising Truth About the Higgs Boson “Discovery” at CERN,” explains that.

[WebLink: youtube: The Surprising Truth About the Higgs Boson "Discovery" at CERN](#)

- That leads to two conclusions: (i) our perceptions based on the data from the five physical senses can be misleading (i.e., they lead to distorted perceptions or *saññā vipallāsa*), and (ii) at the very fundamental level, there is nothing that can be called “solid matter;” everything is just “energy.”
- The Buddha taught all that 2600 Years Ago! He called such distorted perceptions about the world (e.g., “solidity” of matter) “*sañjānātī*” or “*saññā vipallāsa*.”

Science Has Embraced Several of Buddha's Worldviews

3. While quantum physics led to the above understanding of the microscopic nature, astronomical studies over the past five centuries also verified Buddha's views about the **large-scale universe**.

- Western science (as well as religions) believed in a “geo-centric world” for thousands of years until the time of Galileo. Even a few hundred years ago, most people believed our Earth was at the center of the universe: “[WebLink: wikipedia.org: Geocentric model](#).”
- However, the Buddha taught 2600 years ago that our solar system is just one of an uncountable number of such systems in the universe. The universe consists of an uncountable number of star/planetary systems (*cakkavāla*) like our solar system. See, for example, “[WebLink: suttacentral: Cūlanikā Sutta \(AN 3.80\)](#).”
- Buddha's view was confirmed by science using powerful telescopes to look at the sky (following the initial reports by Galileo). That approach of “extending the capabilities of our crude sensory faculties” revealed that, indeed, there are an uncountable number of “star systems” (just like our Solar system) in the universe. The following is a high-resolution picture of just our Milky Way galaxy. There are uncountable galaxies in the universe! See “[Dhamma and Science – Introduction](#)” for details.

4. Therefore, the “wrong perception” (or “*sañjānāti*” or “*saññā vipallāsa*” in Buddha’s terminology) about the Earth being at the center of the universe was another wrong conclusion humans came to based on our crude sensory faculties.

- The scientific investigations using telescopes vastly extended the capabilities of our sense faculties, and we were able to get a much better picture of what is really in the skies above us. The Buddha called such “mundane logic/investigation” or “*vijānāti*.”; these terms are discussed in #7 and #8 below.
- (However, there is more to be discovered by science. The current scientific theory is that the universe came into being only about 15 billion years ago and that there was “nothing” before that. **This “Big Bang Theory” will be proven wrong, too.** The Buddha described a different scenario where only a cluster of “star systems” (*cakkavāla*) get destroyed at a time but will be re-formed over time. The universe has existed “forever,” and there is no “discernible beginning” to life. See “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”)

Elusive Nature of Matter

5. The Buddha taught that our bodies, as well as anything else in this world, are made of *bhūta* that are hard to pinpoint. As scientists probed smaller and smaller particles, they noticed that it is not possible to measure the speed of a particle if its location is pinned down; if they tried to pinpoint the speed, they found that its location becomes unspecified. It is not possible to “pin down” or “specify everything” about a microscopic particle. That is called the “Heisenberg uncertainty principle.”

- Because of that, the Buddha used the word *bhūta* (ghost) to describe the elusive nature of matter at the microscopic scale, a “ghost” in the sense that it is “hard to pin down.”

- Furthermore, such “elementary particles” arise out of “mental energy” (created in *javana citta*). Understanding that requires a good knowledge of *Abhidhamma*.
- However, a basic explanation is in “[Bhūta and Yathābhūta – What Do They Really Mean.](#)” *Yathābhūta* means the true nature of matter (or the true nature of *bhūta*), which arises via the MIND.

6. **To summarize: Everything in this world is made of pure energy at the fundamental level.** The perception of “solidity” is an elusion, i.e., the fundamental nature of “matter” is elusive. Note that I did not use the word “illusory,” which would mean it is an illusion or unreal. **Even though the real nature is hidden, the existence of “things in this world” (as well as suffering) is authentic, i.e., not an illusion.** [Elusion is the act of successfully hiding or escaping from someone. Your cat's elusion makes it hard to find her when it's time to take her to the vet. When you avoid being found or caught, that's elusion.]

- However, this wrong perception of “solidity” (distorted *saññā* or “*saññā vipallāsa*”) is one reason that we tend to place “value” on worldly things, i.e., “*rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ; attāni vā rūpaṃ, rūpasmiṃ vā attānaṃ*” or “*rūpās* are of value.” That distorted perception also leads to placing value (*atta/attā*) on mental entities arising when thinking about some of those *rūpās*: *vedanā, saññā, saṅkhāra*, and *viññāṇa*. See “[“Attato Samanupassati” – To View Something to be of Value.](#)”
- These are deep insights built into Buddha Dhamma. **However, just getting the basic idea is enough. There is no need to study particle physics.**

Mundane Approaches versus Buddha's Approach – Exactly Opposite

7. According to the Buddha, there are two **mundane ways** of understanding the world, i.e., those based on (i) **human perception** or “*saññā*” and (ii) **logical mundane investigations** (*vitakka* and *vicāra*).

- The Buddha called the way of coming to conclusions based solely on perception, i.e., “*sañjānāti*.” This is how people have come to conclusions about the external world solely based on our crude five physical senses (based on essentially a “hunch.”)
- On the other hand, scientists used investigations using scientific instruments and logical reasoning, which the Buddha called “*vijānāti*.”
- Both are based **solely on materialism**, assuming we can understand the world by looking at its material properties.

8. **However, Buddha's teachings are based on an entirely different approach.** It is entirely a **mind-based approach** to discovering the truth about nature; he did not have to do any “experiments” with fancy instruments or billion-dollar particle accelerators. Furthermore, his investigations revealed that it is the mind that leads to the existence of matter (in a much “subtle form” than anyone had ever imagined until the discoveries discussed in the two videos above.)

- He taught that one cannot understand the fundamental nature of this world by either trying to perceive with our five senses or by using scientific instruments to study the composition/interactions of material entities that make up the “visible world.”
- **The problem is two-fold:** (i) We cannot “see” (with eyes or even scientific instruments) everything in the external world (that is why science does not realize the existence of the other 29 realms; their instruments cannot probe the “*suddhaṭṭhaka*” stage of matter), and (ii) everything in the external world arises due to collective “mind power” or “*javana* power” that can arise only in minds. One starts understanding the Buddha's worldview at the *pajānāti* stage as a *Sotāpanna*, and that understanding becomes complete (*abhijānāti* or *pajānāti*) at the *Arahant* stage.
- I briefly discussed the terms *sañjānāti*, *vijānāti*, *pajānāti*, and *abhijānāti* in “[Cognition Modes – Sañjānāti, Vijānāti, Pajānāti, Abhijānāti.](#)”

Buddha Dhamma Is All About the Mind

9. The Buddha taught there is no point in investigating external objects in the world. Such investigations can never lead to the “ultimate truth” about life. He said one must focus only on one’s own mind. **All the terms in *Paṭicca Samuppāda* (the basis of Buddha Dhamma) are mental entities.**

- All the terms in *Paṭicca Samuppāda* are “mental entities,” and NONE refers to anything **material and visible** in the outside world. For example, “*āyatana*” (in *salāyatana*) does not refer to physical sensory faculties (like the eyes or ears) but to the use of such sensory faculties to “collect more information” once attached. An *Arahant* does not have *āyatana* but can see or hear; they would not use their eyes and ears to enjoy sensory pleasures.
- Several terms in *Paṭicca Samuppāda* (*viññāṇa*, *nāmarūpa*, *bhava*, and *jāti*) have “energy” associated with them. Only “*jāti*” has anything that can be called “subtle matter” (invisible) because it leads to the arising of a subtle “*manomaya kāya*” with a few *suddhaṭṭhaka* (the “elementary particle” in Buddha Dhamma.) People usually think about the birth of a baby as “*jāti*,” but that is not correct. In *Paṭicca Samuppāda*, the “*bhava paccayā jāti*” step leads to the “birth of a human *gandhabba*.” Then, that human *gandhabba* can be reborn many times with a physical human body during its existence for many thousands of years; see “[Bhava and Jāti – States of Existence and Births Therein](#).”
- **That is why ALL the terms in *Paṭicca samuppāda* cease to arise once the *Arahant* stage of *Nibbāna* is reached.** The *Paṭicca samuppāda* process does not operate for a living *Arahant*.

Summary

10. We have discussed the true meaning of *atta/attā/anatta* (in relation to *anicca* and *dukkha*) in the subsection “[Does “Anatta” Refer to a “Self”?](#)”

- Those posts are based on a series of earlier posts (as outlined in the above link) on the “hidden pure mind” or “*pabhassara citta*.” One needs to make sure to understand those fundamental concepts.
- In the next post, we will discuss the *Mūlapariyāya Sutta*. “*Mūlapariyāya*” means something like “the fundamentals” of the world according to the Buddha.

10.1.9 Saññā – All Our Thoughts Arise With “Distorted Saññā”

November 4, 2023

Saññā is a critical mental entity in Buddha Dhamma. All our thoughts arise with “distorted *saññā*,” and that helps hide the suffering-free “pure mind” or *pabhassara citta*.

Basic Definition of *Saññā* – To Identify/Recognize

1. The basic idea of “*saññā*” is in the following verse from the “[WebLink: suttacentral: Mahāvedalla Sutta \(MN 43\)](#)”: “*Sañjānāti sañjānātī’ti kho, āvuso, tasmā saññāti vuccati. Kiñca sañjānāti? Nīlakampi sañjānāti, pītakampi sañjānāti, lohita-kampi sañjānāti, odātampi sañjānāti,*” which is translated there as “It’s called perception because it perceives. And what does it perceive? It perceives blue, yellow, red, and white.”

- That is the basic definition of “*saññā*,” and the translation there is correct in that context.
- That definition also includes not only color but also familiarity with an object to recognize the meanings of words such as a fire, house, or a person associated with a name like John.
- These basic ideas are discussed in “[Saññā – What It Really Means](#).” It is a good idea to read this post.
- *Arahants* have this type of “pure, uncontaminated *saññā*” when they are in *Arahant-phala samādhi*.

Deeper Meanings Appearing in Most *Suttās*

2. However, *saññā* of a living being below the *Arahant* stage may arise with **“defiled *saññā*”** due to **“*saññā vipallāsa*”** rooted in *anusaya/saṃyojana* (or ingrained defilements.) **Thus, many *cittās* (loosely translated as thoughts) arise with “defiled *saññā*.”**

- Another way to say is: For anyone below the *Arahant* stage, *ārammaṇa* (sensory inputs) are comprehended with “*sañjānāti*” (“recognize with defiled *saññā*”) and corresponding *vijānāti* (“defiled consciousness”).)
- However, as one proceeds on the Noble path with *magga phala*, more and more *ārammaṇa* are grasped with “*pajānāti* or *abhijānāti*” (with refined awareness) instead of “*sañjānāti* and *vijānāti*.” That is because some of the *anusaya/saṃyojana* are either weakened or eliminated with *magga phala*.
- Now, before we discuss such “defilements,” we need to address another critical aspect: the arising of a **“distorted *saññā*”** due to being born in the *kāma loka*. This arises also in *Arahants*; **it is not defiled but only distorted.**

Distorted *Saññā*

3. Furthermore, a **“distorted *saññā*”** arises automatically in all those who are born in *kāma loka*; thus, it arises in *Arahants* experiencing sensory inputs via the five sense faculties (i.e., unless they are in a *samāpatti*.)

- All of us are born with an “*uppatti bhavaṅga*.” That is the “mindset” grasped at the beginning of this human *bhava*. **That never changes, even after *Arahanthood*.**
- If the mind is dormant (i.e., not actively pursuing an *ārammaṇa*, as while sleeping), it falls back to that “*uppatti bhavaṅga*.” When an *ārammaṇa* comes to mind, a series of *cittās* (*citta vīthi*) arises based on that “*uppatti bhavaṅga*.”
- That is the reason that the mind sees an *ārammaṇa* with a **“distorted *saññā*”** automatically.
- I will discuss this further in upcoming posts, but it is good to review the post [“*Bhava* and *Bhavaṅga* – Simply Explained!”](#)

Defiled *Saññā*

4. The problem is that as soon as we see, hear, taste, smell, touch, or think about something (upon getting a sensory input or an *ārammaṇa*), we may attach to it — instantaneously — if the mind recognizes it as “something of interest.”

- **That attachment is based on the “distorted *saññā*” that we discussed in #3 above.** Even though *Arahants* also generate that “distorted *saññā*” their minds will not be attached to it since they have removed all *anusaya/saṃyojana* from their minds. Depending on the particular sensory input, for anyone below the *Arahant* stage, that **“distorted *saññā*” may automatically lead to “defiled *saññā*.”**
- The verses we discussed recently in the posts [“*Etam Mama, Esohamasmi, Eso Me Attā*’ti – What Does It Mean?”](#) and [“*Attato Samanupassati*” – To View Something to be of Value”](#) discuss why the mind attaches to worldly things instantaneously. The main reason is the ingrained **wrong views** and **“distorted *saññā*”** that those things can be beneficial to us. Such view/*saññā* leads to giving priority to keeping engaged in the rebirth process, hoping to overcome suffering by seeking “things that provide enjoyment.” **That is the origin of “*rāga*.”**

Wrong Views and Defiled *Saññā* Lead to *Rāga*

5. Because of that idea ingrained in our minds (that worldly things can bring us happiness and overcome suffering), our minds generate “*chandarāga*” (“*chanda*” means “liking”) or simply “*rāga*,” which can be of

three main types: *kāma rāga*, *rūpa rāga*, *arūpa rāga*. Other words can also be used to describe such attachments. See “[Lobha, Rāga and Kāmacchanda, Kāmarāga](#).”

- As pointed out in #3 of that post, the correct “*pada niruttī*” (etymology) of “*rāga*” comes from “*rā*” + “*agga*” where “*rā*” means to “travel (in the *saṃsāric* journey)” and “*agga*” is to “give priority.” Thus, “*rāga*” means to “willingly engage (in the *saṃsāric* journey.)” That is why the Buddha divided the world into *kāma loka*, *rūpa loka*, and *arūpa loka*, where *kāma rāga*, *rūpa rāga*, and *arūpa rāga* dominate respectively.
- All three types of *rāga* can lead to “[Saññā Vipallāsa – Distorted Perception](#).”

6. “[WebLink: suttacentral: Saññā Sutta \(SN 27.6\)](#)” states, “*Yo, bhikkhave, rūpasaññāya chandarāgo, cittaseso upakkilesa*” or “**desire and greed for perception of rūpa is a defilement that arises in a citta.**”

- Such **chandarāga** can also arise for sounds, smells, tastes, touch (*phoṭṭhabba*), or *dhammā* (that comes directly to mind.)
- Based on such attachments (via **chandarāga**), “defiled *cetanā*” (*sañcetanā*) arises in the mind as stated in the “[WebLink: suttacentral: Sañcetanā Sutta \(SN 26.7\)](#).” The English translation there translates “*Yo kho, bhikkhave, rūpasañcetanāya uppādo*” as “Mendicants, the arising of **intentions regarding sights**.” This is another example of mechanically inserting a mundane meaning everywhere.
- That short verse should be translated as “*bhikkhus*, the arising of **defiled intentions regarding sights**.”
- There, *rūpasañcetanā* (*rūpa sañ cetanā*) does not merely indicate *cetanā* but “**sañ cetanā**” or “**defiled cetanā**.” As we know, “**sañ**” indicates defilements; see “[What is “Saṇ”? Meaning of Saṇsāra \(or Saṃsāra\)](#).”

“**Sañ**” Maybe Spelled Differently [See “[What is “Saṇ”? Meaning of Saṇsāra \(or Saṃsāra\)](#)”]

7. It is to be noted that the Pāli word **saṇ** may be written with the Latin alphabet as “**san**” or “**sañ**” in various word combinations.

- In the “[WebLink: suttacentral: Bhikkhaka Sutta \(SN 7.20\)](#),” the phrase “*Sañkhāya loke caratī*” means “(a *bhikkhu*) lives in the world engaged in wearing out defilements.” Here, “**sañ khāya**” means to “wear our defilements.” The English translation in the link **incorrectly** translates that verse as “and wanders having appraised the world.” Also, it is disrespectful to translate “*bhikkhu*” as a “mendicant” because “mendicant” usually means “a beggar.” **The actual meaning is explained in this sutta!** It is true that “*bhikkhati*” can mean “to beg,” but the *sutta* explains why a *bhikkhu* should not be called a beggar even though he gets food from others. These are examples of instances where inappropriate meaning could lead to confusion.
- “*Khaya*” may mean “to end or to wear out,” as can be seen in the last part of the opening verse “.. *āsavānaṃ khayāṃ pāpentī*” in the “[WebLink: suttacentral: Dutiyakāla Sutta \(AN 4.147\)](#).” That verse is **correctly** translated there as “..they **gradually lead to the ending** of defilements.; there, “*pāpentī*” means “lead to.”
- Therefore, “**sañ khāya**” means to “wear our defilements.”

Ārammaṇa – Start of a Sensory Event

8. To examine in detail the critical role of *saññā* in a sensory event, we must start at the beginning of the process. It all starts when the mind attaches to a sensory input (*ārammaṇa*) via one of the six sense doors.

- Starting with this post, I will elaborate on some critical issues related to *saññā* in the new subsection “Does “Anatta” Refer to a “Self”?” within the main section “Is There a “Self”?” I have also re-arranged the subsections in “Is There a “Self”?” as follows.
- Two subsections precede the subsection “Does “Anatta” Refer to a “Self”?”
- First is “Does “Anatta” Refer to a “Self”?” It provides the background on the “hidden pure mind” (*pabhassara citta*).
- The second new subsection is “Sensory Experience – Basis of Buddha’s Worldview.” It is a series of old posts on the events occurring in the mind upon receiving a sensory input (*ārammaṇa*.) This subsection was taken from another section (“Worldview of the Buddha” in the “Origin of Life” section) to provide the necessary background for a new subsection.

Response to an *Ārammaṇa* – Arahant, *Sekha*, and a *Puthujjana*

9. There is a HUGE difference between what happens in the mind of an *Arahant* versus an average human (*puthujjana*) when a sensory input (*ārammaṇa*) comes to mind. We will discuss this in detail in upcoming posts, but the following *sutta* provides the basic idea.

- The “WebLink: [suttacentral: Upavānasanditthika Sutta \(SN 35.70\)](#)” states, “*Idha pana, upavāṇa, bhikkhu cakkhunā rūpaṃ disvā rūpappaṭisaṃvedī ca hoti rūparāgappaṭisaṃvedī ca*” OR “Upavāṇa, take the case when a *bhikkhu* sees a sight with their eyes and also generates the **desire** for the sight.” [As one develops good habits and gets rid of bad ones, one becomes more and more “sensitized” and catch even minor mistakes. This is what is meant by “*paṭisaṃvedī*” (“*paṭi*” + “*saṃ*” “*vedī*”), i.e., becoming aware of “getting attached to a wrong mindset”. See “[Kāyānupassanā – The Section on Habits \(Sampajānapabba\)](#)”. *Paṭisaṃvedī* means “becoming acutely aware/sensitive” of one’s mistakes. See “[How Habits are Formed and Broken – A Scientific View](#)”]
- Here, the Buddha refers to the case of a *bhikkhu* (who is above the *Sotāpanna* stage but not an *Arahant*, i.e., a *Sekha*) and is attached to a specific sensory input. That *bhikkhu* knows that he saw the sight, but he also KNOWS that he has attached to it (generated *rāga*.) The subsequent verse states: “*Santaṇha ajjhataṃ rūpesu rāgaṃ ‘atthi me ajjhataṃ rūpesu rāgo’ti pajānāti*” OR “They realize that desire for that sight has arisen in them (“*atthi me ajjhataṃ rūpesu rāgo’ti pajānāti*”). Here, “*atthi me ajjhataṃ*” means “has (arisen) in me.”

10. A *puthujjana* will not even know that there is a difference; they will only experience *rūparāgappaṭisaṃvedī*, i.e., **when they see the sight, they are already attached (if it is something of interest.)**

- In the verse “*rūpappaṭisaṃvedī*” means “*rūpa paṭisaṃvedī*” and “*rūparāgappaṭisaṃvedī*” means “*rūpa rāga paṭisaṃvedī*.” Just seeing (without attachment) happens with “*rūpa paṭisaṃvedī*,” and the attachment happens with “*rūpa rāga paṭisaṃvedī*.”
- Thus, an *Arahant* will only go through the “*rūpa paṭisaṃvedī*” but NOT the “*rūpa rāga paṭisaṃvedī*” step.
- Depending on what types of *anusaya/saṃyojana* left in a *Sekha* (a Noble Person below the *Arahant* stage,) they may go through the “*rūpa rāga paṭisaṃvedī*” step, but they would know afterward that they did. By being mindful, they try to stop it from happening again.

Rāga Paṭisaṃvedī – Happens Automatically

11. The critical point here is that when the “second step” of *rāga paṭisaṃvedī* takes place, it happens within a split-second after the first step of *paṭisaṃvedī*. **That second step is dictated by one’s “defiled *gati*” evident at that moment (NOT *anusaya* or *saṃyojana*).**

- Let us try to understand that with the following example. Take the case of a *puthujjana* (X) who is in a “calm state of mind.” Suppose X accidentally does something that aggravates another person Y, and Y yells at X. Hearing the angry words from Y does not cause anger in X since he was in a calm state of mind; he tries to explain that it was an accident. However, Y (who was in a bad mood anyway) keeps verbally abusing X and then pushes X.
- During that time, X’s mindset changed. His “state of mind” gradually gets worse, and at some point, he gets to the “*rāga paṭisaṁvedī*” step. In this particular case, it is not “*rāga*” but “*dosa*” or “*paṭigha*.”
- However, if X were an *Arahant*, his mindset would not change no matter how much Y yells, pushes, or even hits him.
- If it is a *Sekha*, the response would be somewhere between the response of X and the *Arahant*.

12. I have discussed this sequence of events in the subsection “[Sensory Experience – Basis of Buddha’s Worldview](#)” (especially the posts numbers two to four there) but not discussed the initial steps (“*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso.*”) in finer detail.

- Essentially, “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” is the “*rūpa paṭisaṁvedī*” step and “*tiṇṇaṃ saṅgati phasso*” is the “*rūpa rāga paṭisaṁvedī*” step. See “[Difference between Phassa and Samphassa](#).”
- To fully understand how “*saññā vipallāsa*” arises, we need to examine even the first “*rūpa paṭisaṁvedī*” step in detail in the upcoming few posts. We have never discussed that before.
- It will be good to review the sections and posts mentioned above to keep up with the upcoming posts. Please don’t hesitate to ask questions in the forum since it is critically important to grasp that background material. No question is a wrong question!

10.1.10 Upaya and Upādāna – Two Stages of Attachment

November 11, 2023; revised February 26, 2024 (#5)

Upaya is the first stage of attachment of a mind to a sensory input. If the initial attachment is strong, it will keep attaching with the subsequent “*upādāna*” step. A *nimitta* (sensory input) becomes an *ārammaṇa* (attached sensory input) when getting to the *upādāna* step. [See “[Upaya Sutta \(SN22.53\)](#)”. *upaya* : [m.] attachment. *nimitta* : [nt.] sign; omen; portent; cause. *ārammaṇa* : [nt.] a sense-object.]

Upaya and Upādāna

Print/Download: [“WebLink: PDF Download: Upaya and Upādāna.”](#)

Difference Between Kāma Dhātu and Kāma Bhava

1. The Buddha described this difference in the “[WebLink: suttacentral: Sanidāna Sutta \(SN 14.12\)](#)”: “*Kāmadhātum, bhikkhave, paṭicca uppajjati kāmasaññā, kāmasaññam paṭicca uppajjati kāmasaṅkappo, kāmasaṅkappaṃ paṭicca uppajjati kāmacchando, kāmacchandaṃ paṭicca uppajjati kāmapariḷāho, kāmapariḷāhaṃ paṭicca uppajjati kāmapariyesanā.*” OR “**Attachment to kāma dhātu leads to kāma saññā, attachment to kāma saññā leads to kāma saṅkappa, attachment to kāma saṅkappa leads to kāmacchanda..and so on to kāma pariyesanā.**”

- That verse explains why *Arahants* and *Anāgāmis* also have *kāma saññā*. That step does not involve “*rāga, dosa, moha,*” or “*saṇ*” (alternatively written as “*sañ*” or “*sañ*”). Here, “*kāma*” does not refer to “*assāda*” (or “placing a value on sensual pleasures”) but only to be associated with “*kāma loka.*” This is discussed below.
- But *Arahants*’ minds don’t go through the rest of the steps in that verse: *kāma saṅkappa, kāmacchanda, kāmapariḷāha, kāmapariyesanā*. *Kammic* energies are generated in these steps.
- However, the mind of anyone below the *Arahant/Anāgāmi* stages may attach and automatically generate *kāma saṅkappa*. **That is the “upaya” step.**

2. If that *ārammaṇa* is strong enough, the mind may keep attaching to it repeatedly (remember that thousands of *citta vīthi* run through a mind in a second), leading to *kāmacchanda, kāmapariḷāha, kāmapariyesanā*. **That is the “upādāna” step.**

- Strong attachment starts at the *kāmacchanda* stage; then, the mind becomes agitated and wants to pursue the *ārammaṇa* urgently (*kāma pariḷāha*); then it starts thinking, speaking, and doing things seeking maximum pleasure (or avoiding any hindrance) at the *kāma pariyesanā* stage (here, *pariyesanā* means “to investigate/actively engage.”)
- The above chart summarizes those steps and points to key concepts (like *ajjhata kāya/bahiddha kāya, purāṇa kamma/nava kamma*, etc. that we will discuss in upcoming posts. Please print this chart and have it ready when reading any post in this section.

3. “Attachment to *kāma dhātu*” in the above verse does not imply “attachment with a defiled mind” but rather a consequence of still living with a “human body,” i.e., “living in the human realm.” *Dhātu* is usually the “barebone” initial state of an entity. [*dhātu*: [f.] an element; **natural condition**; a relic; root of a word; humour of the body; faculty of senses.]

- That can be easily explained with the concept of *bhavaṅga*. A living *Arahant* is still with the “*uppatti bhavaṅga*” (or the “natural state of mind”) that they were born with human birth. When exposed to a sensory input (*ārammaṇa*), a *citta vīthi* flows starting with that “*uppatti bhavaṅga*,” and the initial *saññā* arises according to that “*uppatti bhavaṅga*.” See “[Bhava and Bhavaṅga – Simply Explained!](#)”
- Those unfamiliar with the concept of *bhavaṅga* do not need to worry. Just keep this fact in mind that while *Arahants* are in *kāma dhātu*, they are NOT in *kāma bhava*. They are free of all three *bhava* (*kāma*, *rūpa*, and *arūpa*.)
- It is a good idea to examine the sequence of events in mind upon receiving sensory input. A sensory input “before attachment” is a *nimitta*.

An Arahant Is in Kāma Dhātu but Not Kāma Bhava

4. An *Arahant* has been released from all three *bhava*: *kāma bhava* (or *kāma loka* with 11 realms), *rūpa bhava* (or *rūpa loka* with 16 *rūpāvacara Brahma* realms), and *arūpa bhava* (or *arūpa loka* with the 4 *arūpāvacara Brahma* realms.)

- However, an *Arahant* was born into the *kāma bhava* (human realm), and thus, until the death of the physical body, he has to live in “*kāma dhātu*.” **That means living in the *kāma loka* (human realm) without generating “*saṇ*” (*rāga*, *dosa*, *moha*).**
- When a sensory input comes in for any living being, the mind starts in one of the three *bhava/lokās*. A human’s or an animal’s mind starts at the corresponding *uppatti bhavaṅga* state (in the *kāma dhātu*) in which they were born. A *rūpāvacara Brahma*’s mind will start at corresponding *uppatti bhavaṅga* (in *rūpa bhava*), etc.

Kāma Dhātu to Kāma Bhava Transition Requires a Kamma (Saṅkappa)

5. Generating “*kāma saññā*” at this initial “*kāma dhātu* stage” does not mean one is already in the “*kāma bhava*.” Generating “*kāma saññā*” happens just before *kāma bhava* while in the “*kāma dhātu*” stage. **An Arahant’s mind does not go beyond the “*kāma dhātu*” stage. A *kamma* (with defiled intention or *sañcetanā*) must happen** to get to the *kāma bhava*, as the Buddha explained in the “*Paṭhamabhava Sutta* (AN 3.76).”

- The “[WebLink: suttacentral: Paṭhamabhava Sutta \(AN 3.76\)](#)” states “*Kāmadhātuvapakkaṇṇa, ānanda, kammaṃ nābhavissa, api nu kho kāmabhavo paññāyethā*”ti?” OR “**If no *kamma* took place** (*kammaṃ nābhavissa*), **would the transition from *kāma dhātu* to *kāma bhava* come about?**” The answer was “no.”
- That *kamma* happens in the “*kāmasaññaṃ paṭicca uppajjati kāmasaṅkappo*” step in #1 above. As we know, *kamma* is done with (*abhi*)*saṅkhāra* and “*saṅkappa*” means “*citta saṅkhāra*.”
- As the verse in #1 shows, “*kāma saṅkappa*” arises (*kāma saññaṃ paṭicca uppajjati kāma saṅkappo*) in the second step. Let us carefully go through the steps involved.

Kāma Dhātu to Kāma Bhava = Nimitta to Ārammaṇa

6. A *nimitta* (sensory input) COULD trigger *rāga*, *dosa*, or *moha* in the mind according to the types of *anusaya/saṃyojana* associated with that mind. If that *nimitta* is grasped/embraced, it becomes “*nimittaggāhī hoti*” and is an *ārammaṇa*.

- An *Arahant*'s mind will **not** latch onto a *nimitta* (“*na nimittaggāhī hoti.*”) Anyone below the *Arahant* stage may or may not grasp a *nimitta*, depending on the *nimitta* and one's remaining *anusaya/saṃyojana*.
- The key to stop “grabbing hold of defiled *nimitta*” is to gradually ease up on one's tendency to attach to sensory inputs. That is cultivating moral discipline or “*indriya saṃvara.*” See, “[WebLink: suttacentral: Saṃvara Sutta \(AN 4.14\).](#)”

7. When a *nimitta* (sensory input) comes in, the mind breaks loses from the *uppatti bhavaṅga* (or the “temporary *bhavaṅga*”) and instantaneously attaches to the *nimitta* if at least one *saṃyojana* makes it possible.

- Since *Arahant*'s mind is devoid of any *saṃyojana*, it will not grasp ANY *nimitta*.
- We can get a good indication of possible attachment by looking at the type of *vedanā* generated by the *nimitta*.

Only Bodily *Vedanā* Are “Real” – Others Are “Mind-Made”

8. As discussed in #6 of the post, “[Contamination of a Human Mind – Detailed Analysis](#),” only bodily feelings (*sāṃsārika vedanā*) are real *vedanā* felt by the physical body. Those are the *sukha* and *dukkha vedanā* that even the Buddha experienced.

- **The other sense doors cannot cause bodily *sukha* and *dukkha vedanā*.** They come in as “*adukkhamasukkha* (neither *sukha* nor *dukkha*)” *vedanā*.
- The above facts are pretty clear in *Abhidhamma*; **all sense doors other than the physical body (i.e., eyes, ears, nose, tongue, mind) initially generate *adukkhamasukkha vedanā* (Ref. 1).**
- **A *nimitta* coming through the other sense doors can generate various types of *saññā* depending on the realm, and those give rise to *somanassa* (mind-made pleasant) and *domanassa* (mind-made unpleasant) *vedanā*.**
- For example, a human will experience a horrible taste and a foul smell of rotting meat. For pigs, it is the other way around! **Both taste and smell are generated purely with *saññā*.** However, both humans and pigs experience the same *dukkha vedanā* upon being injured. **Only bodily contact leads to real *dukkha* and *sukha vedanā*.**
- The minds of different beings in different realms in the *kāma loka* are naturally built to generate various types of “*saññā*” according to the “*gati*” corresponding to that realm. Thus, the *saññā* of a pig and that of a human for rotting meat or feces is exactly the opposite. A pig would generate *somanassa vedanā*, and a human would generate *domanassa vedanā*. An *Arahant* will have the same unpleasant *saññā* for rotting meat (as an average human) but will not generate *domanassa vedanā*. Furthermore, an *Arahant* will experience the physical *dukkha vedanā* from an injury but will not generate *domanassa vedanā* because of it (unlike an average human.)

Nimitta Turning to an *Ārammaṇa*

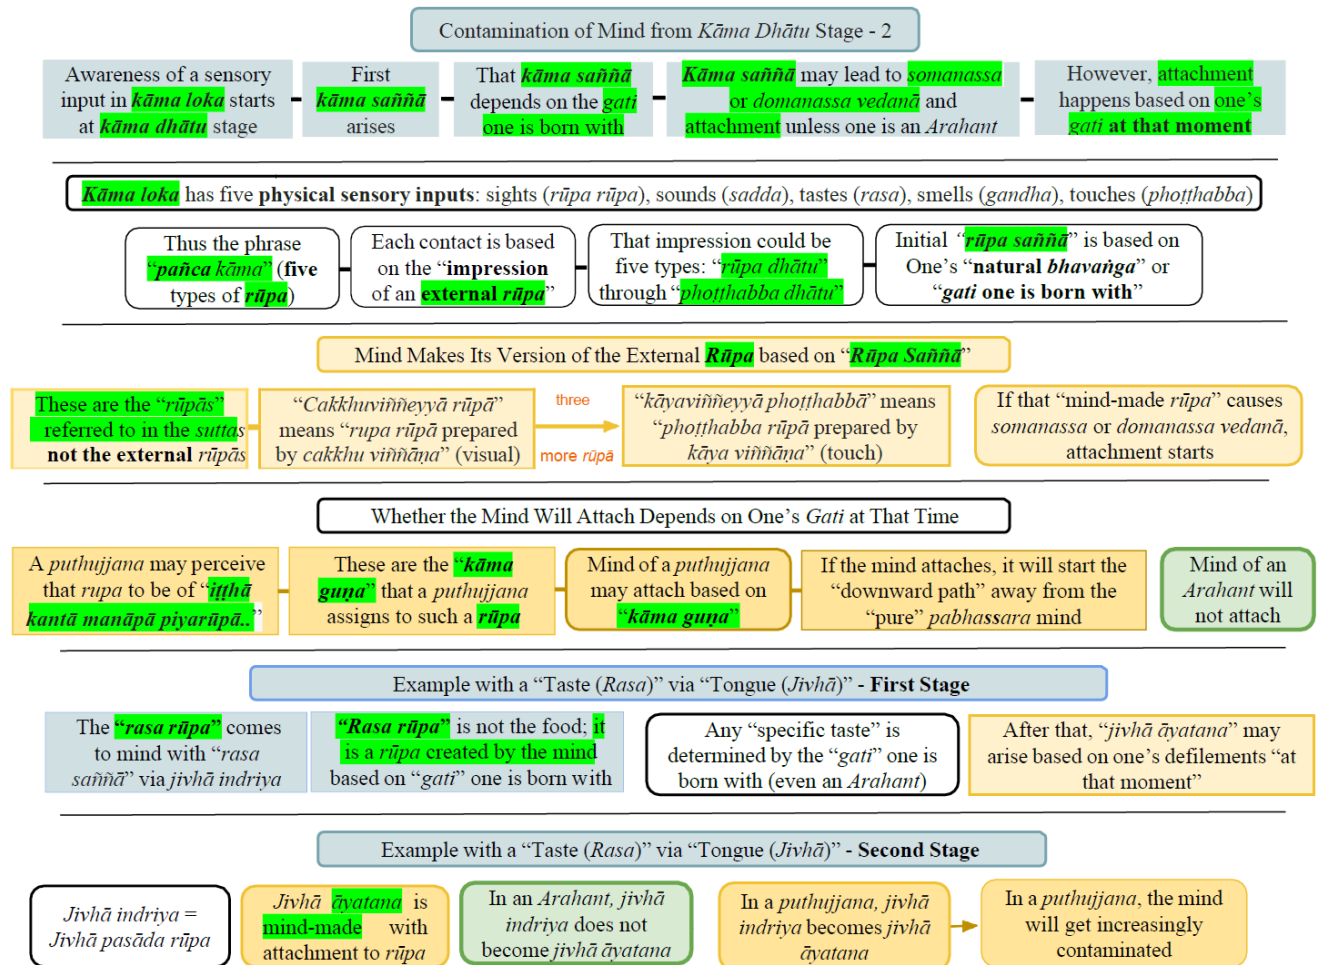

9. **Based on ANY sensory input and the *uppatti bhavaṅga*, a mind will start at a particular DEFILED STATE (*pañcupādānakkhandha*) unless one is an *Arahant*. Even if an average human may not strongly attach to a sense input, “distorted *saññā*” is automatically generated; the reason is not realizing the *anicca* nature, but we will discuss that later.**

- Therefore, any mind (other than that of an *Arahant*) will be somewhat contaminated, even from the beginning, due to wrong views and defiled *saññā* associated with that mind. Thus, the “suffering-free pure mind” (*pabhassara citta*) ALWAYS remains hidden. I had discussed this in a separate section earlier and have extracted relevant posts to “[Recovering the Suffering-Free Pure Mind](#)” under the main section “[Is There a “Self”?](#)”

- In other words, any attachment is to *pañcupādānakkhandha* and NEVER to *pañcakkhandha*.
- The sequence of events after a sensory input becomes an *ārammaṇa* has been discussed in “[Sensory Experience – Basis of Buddha’s Worldview](#)” (Extracted from “[Origin of Life](#)”)
- In the current subsection, “[Does “Anatta” Refer to a “Self”?](#)” we discuss how a *nimitta* becomes an *ārammaṇa* (It is the same as the “*kāma dhātu*” to “*kāma bhava*” transition.)
- It is a good idea to follow the flow in the re-arranged main section, “[Is There a “Self”?](#)”

10. I discussed some of the concepts in this post in the subsection “[Recovering the Suffering-Free Pure Mind.](#)” In particular, see “[Contamination of a Human Mind – Detailed Analysis.](#)”

- I have revised the main chart in that post slightly to follow the discussion above.

- Similarly, *arūpāvacara Brahma*'s mind starts at the “*arūpa dhātu*” stage. Only after getting attached to “defiled *arūpa saññā*” does it get to the “*arūpa bhava*.”
- That is clearly stated in the “[WebLink: suttacentral: Paṭhamabhava Sutta \(AN 3.76\)](#).”

12. Furthermore, within each *bhava*, one will get into one's unique “*bhava*” according to the “*gati*” (or “*uppati bhavaṅga*”) one is born with.

- For example, if we consider a human and a pig, both are in *kāma bhava*. However, they have very different *gati* (or “*uppati bhavaṅga*.”)
- Therefore, upon seeing a pile of feces, a pig's mind automatically gets a “likable *saññā*,” and a “*somanassa* (mind-made joyful) *vedanā*” arises.
- An *Arahant* and a *puthujjana* (average human) **were** born in the “human *bhava*.” Therefore, upon seeing the same pile of feces, “unpleasant *saññā*” arises in both. However, a “*domanassa* (mind-made distressful) *vedanā*” arises ONLY in the average human, whose mind automatically dislikes the pile of feces. Even though the *Arahant* was born in the human *bhava*, he/she does not belong to the “human *bhava*” or any “*bhava*.” Thus, no “attachment with *somanassa* or *domanassa*” happens to the *Arahant*.
- **In other words, while *Arahant*'s mind gets to the “*kāma dhātu*” stage, it will never get to “*kāma bhava*.”**
- I repeated that to make sure to get the point across. It is critical to understand these concepts if one needs to understand the *Satipaṭṭhāna Sutta* fully and also to have a deeper understanding of *saññā vipallāsa* and *anicca* nature.

10.2.1 Citta – Basis of Our Experience and Actions

September 22, 2019; revised November 14, 2019; November 30, 2022

What we conventionally call a “thought” is the cumulative effect of billions of *citta*. A *citta* is the fundamental unit of cognition in Buddhism.

Introduction

1. We have been discussing the first few verses of the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” in the series on, “[Buddhist Worldview – Introduction?](#).” It is a good idea to take a break and look at what we have learned from a different point-of-view.

- The Buddha called himself a “*vibhajjavādi*.” That means he explained things in great detail by diving into and subdividing a given entity or concept to examine it at more fundamental levels.
- That is very much like what the scientists are doing today. They first explained the matter in terms of molecules and then atoms. Later, they found that an atom has a nucleus and electrons in orbitals around it. Then they probed the nucleus and discovered that more fundamental particles (with names like gluons and quarks) make up the nucleus.
- By probing deeper, physicists also came up with Quantum Mechanics. Matter and energy are “quantized” on a small scale. That means they come in “packets” or “quantā” (the singular is “quantum.”)
- More than 2500 years ago, the Buddha taught that matter and energy are quantized. The smallest “quantum” in Buddha Dhamma is a *suddhatthaka*. But that is not relevant to the present discussion.

Sensory Experience is Quantized – It comes in “Packets”

2. I am not going to discuss Quantum mechanics here. But I want to look at the “Chachakka Sutta (MN 148)” from a different point-of-view. That will break the tradition of providing boring translations of *suttā*, and I hope will also provide better insights into the material in the *sutta*. This discussion would be beneficial before we move to the next section of the *sutta*.

- As you will see below, scientists are just beginning to take mental phenomena seriously. They have made a bit of progress. But they are not even close to having a detailed analysis of mental phenomena that the Buddha did over 2500 years ago.
- Mental energy is also quantized, even though we may feel like thoughts are continuous. The smallest unit in Buddha Dhamma is a “*citta*.” A *citta* lasts less than a billionth of a second. **We cannot experience a single *citta*.** Even though it is conventionally translated as “a thought,” that is incorrect.
- What we usually think of as a “thought” consists of billions of *cittā* (The plural of *citta* is *cittā*, but sometimes I tend to write that as *cittā* just because that is easier for most people.) By the way, *citta* is pronounced “chiththa.”

What is a Thought?

3. Let us first see the progress that science has made over the past 50 years. Science is still at a very early stage regarding the mind. But they have made some progress recently and we will show them to be entirely consistent with Buddha Dhamma. Those findings help explain more profound concepts in Buddha Dhamma.

- Only fifty years ago, scientists thought computers could “become conscious” by increasing processing speeds. Now some computers are much faster, but they do not have consciousness. We will discuss later why computers will never become conscious.
- The following is a presentation entitled, “What is a Thought?” by Henning Beck, a scientist studying brain phenomena.

[WebLink: youtube: What is a Thought? How the Brain Creates New Ideas | Henning Beck | TEDxHHL](https://www.youtube.com/watch?v=...)

A Computer Does Not Have Perception (*Saññā*)

4. At 4:00 minutes, we see a “face” made up of fruits and vegetables. Even though it is not a natural human face, it takes us just a second to realize that it represents a face.

- But as Mr. Beck points out, a computer will never be able to recognize the representation of the human face depicted there.
- At 9:20 minutes he starts discussing on the identification of a chair. Again, a computer has difficulty identifying “less obvious” structures that can serve as chairs.
- In both these instances, what the computer is missing is *saññā* (loosely translated to English as “perception”). Even animals can recognize objects relevant to their survival. A dog, for example, can instantly recognize its owners and any other pets living in the house. It can recognize foods that it likes, etc. See “[Saññā – What It Really Means.](#)”

Vedanā, Saññā, Joy, Sadness, etc. Cannot Arise in a Brain

5. Around 6:00 minutes, Mr. Beck starts talking about human thought. All he (and other scientists) know right now is that our thoughts rise very fast. But they do not explain how thoughts with feelings (*vedanā*), perception (*saññā*), joy, etc. can arise from a brain made of inert atoms and molecules.

- A brain is not that different from a computer because atoms and molecules are the building blocks of both. Both can process information. But a brain processes information in a very different way compared to a computer. It involves billions of neurons working as a team. Scientists are not even close to figuring out how the brain processes information.
- In the future, scientists may be able to figure out how those neurons can process information much faster than a computer with a thousand-times higher processing speeds.
- However, they will still NOT be able to figure out how a human or animal can recognize their surroundings AND generate emotions (happy, sad, etc.)

- Around 11:00 minutes, he discusses the difference between learning and understanding. That is an excellent point.

Vedanā, Saññā, Joy, Sadness, etc. Arise in the “Mental Body”

In a previous post, “[Contact Between Āyatana Leads to Vipāka Viññāna](#),” I mentioned that plants and trees have a basic form of *vedanā* and *saññā* (see #3,#4 there.) However, plants and trees CANNOT generate emotions like joy and sadness. A tree does not have a mind or a “mental body” created by kammic energy.

6. Similarly, a brain cannot generate a thought. How can feelings and emotions come from an entity made of inert atoms and molecules? The “mental body” of a living being is created by *kammic* energy.

- There has to be a LIVING BEING to generate a *citta*, the basic unit of consciousness. For a human being, the essence of that LIVING ENTITY is not the physical body, but the mental body.
- **That “mental body” is alternatively called a *manomaya kāya* or *gandhabba*.** It consists of a *hadaya vatthu* (seat of mind) and five *pasāda rūpa* located around it (for seeing, listening, smelling, tasting, and touching.) The mental body is not like the “physical body.” It is more like an “energy body” that gives life to the inert and dense physical body.
- A *manomaya kāya* may be visualized as an “energy field” within the physical body with the *hadaya vatthu* and five *pasāda rūpa* overlapping the region of the physical heart.

7. Our brains cannot identify objects. It cannot generate emotions like joy and sadness. As discussed in #4 above, animals without brains can identify things and generate feelings and emotions.

- It is the **mental body (*manomaya kāya* or *gandhabba*)** that generates emotions like joy and sadness as well as *vedanā*, *saññā*.
- **More precisely, those mental phenomena arise in the *hadaya vatthu* (seat of mind) of the *gandhabba*.**

8. The details are not critical, but the primary mechanism is essential to understand. A brain does not see, hear, smell, taste, or touch. The seat of the mind (*hadaya vatthu*) experiences all those. A *hadaya vatthu* can be created ONLY by *kammic* energy.

- That is why the human body is just a shell that supports the mental body (*manomaya kāya* or the *gandhabba*). At the death of the physical body, that *manomaya kāya* leaves the body instantly. When we touch a dead body, it is evident that there is no “life.”
- **A living body is like a “live wire” with an electric current flowing through.** One will get an “electrical shock” by touching it. But if there is no electric current, it is just a metal wire.
- **In the same way, a *manomaya kāya* gives “life” to an inert physical body.**

The Manomaya Kāya Changes from Existence to Existence

9. What happens to the *manomaya kāya* at the end of existence? To clarify, let us take the case of a *Brahma* dying and getting a human existence. That transition from a *Brahma* to a human happens at the moment of death of that *Brahma*. It is called the “*cuti-paṭisandhi*” moment (“*cuti*” means dying and “*paṭisandhi*” means getting a new existence.)

- That *Brahma* had a seat of the mind (*hadaya vatthu*) and two *pasāda rūpa* (for seeing and hearing). On the other hand, in the new existence, humans would have five *pasāda rūpa* (for seeing, listening, smelling, tasting, and touching). Furthermore, the *hadaya vatthu* of the human would be different from that of a *Brahma*.
- Therefore, the *manomaya kāya* of the new human existence differs from that of the *Brahma*.

- Suppose that at the end of that human existence, that human gets an animal existence. Then at that “*cuti-paṭisandhi*” moment, that new animal existence would have its own set of *hadaya vatthu* and five *pasāda rūpa*.

10. Those three existences are very different, even though it is the same “lifestream.” So, what can be taken as a “soul” or a “self”?

- That is why the Buddha said there is no “soul” or a “self” or a “*ātma*” going from one birth to another. In the above example, the same “lifestream” that started as a *Brahma* became a human, and then an animal. **What is the ESSENCE that defines a “soul” or a “self” or a “*ātma*”?**
- The details are in the post “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).” First, let us look into the mechanism of *citta* generation.

A *Citta* Has *Vedanā*, *Saññā*, and Many Other “Built-In” Mental Factors

11. A *citta* is the fundamental unit of cognition, which we do not feel by itself. It comes in bunches of 12 or more *cittā*. Those “bunches” or series of *cittā* are *citta vīthi*. What we “feel” or “experience” is the cumulative effect of numerous such *citta vīthi*.

- Any *citta vīthi* that arises due to sensory input from one of the five physical senses has 17 *cittā*. It is a *pañcadvāra citta vīthi*.
- On the other hand, a *citta vīthi* arising directly in mind (due to *dhammā*) may have varying numbers of *cittā*, with a minimum of 10 *cittā*. That is a *manodvāra citta vīthi*.

12. What we usually call a “thought” is the cumulative effect of billions of such *citta vīthi* that arise PER SECOND.

- Each of those *cittā* has at least seven mental factors (*cetasikā*). Those universal *cetasikā* include *vedanā* and *saññā*. *Vedanā cetasika* makes one FEEL a sensory input. The *saññā cetasika* is the one that recognizes that sensory input.
- **Only a living being can generate that fundamental unit of cognition (*citta*) within a billionth of a second, with built-in seven or more *cetasikā*.**
- That is why a computer or a robot will NEVER become conscious. **Only Kammic energy can create a *manomaya kāya* with the seat of the mind (*hadaya vatthu*).**
- That is why there will NEVER be true Artificial Intelligence (AI)! There can only be sophisticated robots capable of, for example, autonomous driving.

Important Role of the Brain

13. Even though the brain cannot generate *citta*, it plays a critical role in getting the information about the sense object to the *hadaya vatthu*. More details at “[Brain – Interface between Mind and Body](#).” Let us briefly discuss the series of events following the capture of an image by our eyes.

- The retinas at the back of the eyes send the captured image to the visual cortex in the brain through the optical nerve. That part of the brain then analyzes the signal to a form the mind can understand. That information is sent to the *cakkhu pasāda rūpa* in the *manomaya kāya*. Then the *cakkhu pasāda rūpa* makes contact with *hadaya vatthu*, which vibrates 17 times due to that “impact.”
- Those 17 vibrations of the *hadaya vatthu* correspond to the generation of a *citta vīthi* with 17 *cittā*. That is the origin of a *cakkkhudvāra citta vīthi*. It is not necessary to learn those details. But those interested can find details at “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#).”
- Sensory inputs coming through the other four physical senses (ears, nose, tongue, and the body) work the same way.

14. Remember that the sensory input comes to a *pasāda rūpa* in the mental body AFTER the brain processes the sensory signal. For example, when we see a tree, the image of the tree received by the eyes is processed by the brain first.

- Then the brain transmits that processed signal to the *cakkhu pasāda rūpa*, which in turn transfers it to the *hadaya vatthu*.
- It is the *hadaya vatthu* that “feels” or “experiences” that image and “sees” the tree.
- But even a sensory experience that we “feel” arises from a series of “sensory packets.” For example, when we see a tree, that image does not come in continuously. It comes in “packets” or “snapshots.”
- That is similar to how a video camera or a movie film works. We will discuss that in the post “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”

The complete set of posts at “[Origin of Life.](#)”

10.2.2 Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event

September 29, 2019; revised November 15, 2019; August 28, 2022; August 5, 2023; August 31, 2023; September 22, 2023

Vedanā arises with a sensory input or an *ārammaṇa*. A sensory input may give rise to two types of *vedanā*: *vipāka vedanā* (unavoidable) and “*samphassa-jā-vedanā*” which may arise if the mind is attached to that sensory input.

All Our Activities Start With a Sensory Trigger

1. We know we are alive because we experience the external world. We can see an object, hear a sound, smell an odor, taste food, and feel the touch of something or someone. Furthermore, we can recall past events (part of *dhammā*).

- All our sensory experiences start with a “trigger event” that comes through one of our six sense faculties. If we see, hear, smell, taste, or touch something that grabs our attention, we start thinking, speaking, and taking action on that particular sight, sound, odor, taste, and touch.
- Also, a thought about a past event or a planned event (*dhammā*) may come to our mind, and we could get started that way too.

2. We usually go through our daily chores based on what we do routinely. We get up in the morning and prepare for work (school) on a working day. Those “to do tasks” come to our minds automatically as *dhammā*.

- Such a “planned or routine day of work” could be disrupted by an unexpected event. One may get a phone call from the boss asking to go to a meeting at a different location. A child may have a fever, and a hospital visit may be required. Again, a sensory trigger is there.
- We may also set an alarm to get up at a particular time. When the alarm goes off in the morning, we wake and recall having to get ready for a specific task.
- It is a good idea to contemplate what one goes through during the day. We can see that all activities start with “sensory triggers.”

A Sensory Trigger is an “*Ārammaṇa*”

3. Each activity starts with a “trigger,” a sensory event. **That is a “*ārammaṇa*” in Pāli.** We consciously and deliberately start looking at an object when we become interested in that object. Then it becomes a new “*ārammaṇa*.” That may prompt us to take further action.

- For example, a short interaction with a person may trigger an interest in that person. Then that may lead to further contact.
- We get exposed to many sensory inputs as we go through the day. But only specific sensory inputs catch our attention and make us think about them. A strong sensory input that gets our attention is a *ārammaṇa*.
- If X listens to the television in the background while eating, X focuses on the meal. However, if X hears on the TV that a terrorist attack just took place in a large city, X's attention would focus on that news story. X may stop eating and go and watch the television to get more information. That is a new *ārammaṇa*.

4. There is always an “*ārammaṇa*” to initiate an action, and **there are only six types of *ārammaṇa*** per “Chachakka Sutta (MN 148).” *Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, sotañca paṭicca sadde ca uppajjati sotavīññāṇaṃ, ghāṇañca paṭicca gandhe ca uppajjati ghānavīññāṇaṃ, jivhāñca paṭicca rase ca uppajjati jivhāvīññāṇaṃ, kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyavīññāṇaṃ, manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ.*”

- For example, the second on the list says that “ear-consciousness (*sota viññāṇa*) happens when ears (more precisely *sota pasāda*) come to contact with a sound (*sadda*).” In the above example, X heard about a terrorist attack.
- That sensory event could then start a whole series of new actions. In the example of #3 above, X stopped eating and went to the television to watch it.
- You should think about this basic idea of how a sensory event (seeing, hearing, etc. leads to a whole set of actions during a given day. This idea was first introduced in the post, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).”

Two Different Meanings of *Paṭicca*

5. We translated the verse, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” as “..*cakkhu viññāṇa* arises when a *rūpa* makes contact (*Paṭicca*; pronounced “patichcha”) with *cakkhu pasāda rūpā*.” See, #7 of “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).” That was further elaborated in the next post, “[Indriya Make Phassa and Āyatana Make Samphassa](#).”

- Some English translations state that as “dependent on the eye and forms, eye-consciousness arises.” They translate *Paṭicca* as “dependent on,” presumably because *Paṭicca Samuppāda* is translated as “Dependent Origination.”
- But *Paṭicca* is a Pāli word with somewhat different meanings depending on the context. Let us clarify that first.

6. It is fine to translate *Paṭicca Samuppāda* as “Dependent Origination.” That is because the steps in *Paṭicca Samuppāda* are CONDITIONAL statements. For example, “with *avijjā* (ignorance) as **condition**, *saṅkhāra* arise.” One could also state that the “arising of *saṅkhāra* is dependent on the presence of *avijjā*.” However, conditionality comes from the word “*paccayā*,” not from “*Paṭicca*.” See, “[What Does “Paccayā” Mean in Paticca Samuppāda?](#).”

- Therefore, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” should not be translated as “**dependent on the eye and forms, eye-consciousness arises.**” It is **more than just dependence**. It is “coming together” or “coming to contact” of *cakkhu* and *rūpa* that gives rise to *cakkhu viññāṇa*. “***Paṭicca* happens with only those events that grab our attention.**”
- **There is also a deeper meaning of *Paṭicca* in *Paṭicca Samuppāda***, where it combines the two words “*patī*” + “*icca*” (pronounced “ichcha.”) When one attaches willingly to moral (or immoral) deeds, one ends up with corresponding “births” (“*sama*” + “*uppada*.”) See, “[Paticca Samuppāda – “Pati+ichcha” + “Sama+uppāda”.](#)” That is why I do not translate *Paṭicca Samuppāda* as “Dependent Origination.” There is more than “just dependence” in *Paṭicca Samuppāda*.

- However, in verse “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*,” *Paṭicca* means “coming together” or “contact.” Here there is no “intention.” It is *cakkhu* and *rūpa* making contact. That is very clear in SN 12.53 and SN 12.54, in verse, “*telañca paṭicca vaṭṭiñca paṭicca telappadīpo jhāyeyya*.” OR, “an oil lamp (*telappadīpo*) burns while the wick (*vaṭṭiñca*) is together with oil (*telañca*).” The wick will burn out quickly if one does not add oil to the lamp. There is no involvement of the mind there. Thus, the “*patī*” + “*icca*” etymology does not apply here.

Where Does *Paṭicca* Happen?

7. It is essential to remember that “*cakkhu*” (or *cakkhāyatana*) is not physical eyes (the Pāli word for the physical eye is “*nayana*”). The brain processes an image the eyes receive and then sends it to the “*cakkhu*.” We discussed in the post, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#),”

- “*Cakkhu*” could be taken as the *cakkhu pasāda rūpa* (or *cakkhu indriya*) that lies close to the *hadaya vatthu* (seat of the mind) and *hadaya vatthu* in some cases. However, the “eye faculty” or *cakkhu indriya* becomes *cakkhāyatana* when one is looking at a *rūpa* with attachment to it. Then, the “mental impression” of an external *rūpa* (“*cakkhuvīññeyyā rūpā*”) is not a true version of the external *rūpa*; see #10 of “[Contamination of the Human Mind Based on a Sensory Input](#).”

The “[Cakkhu Sutta \(SN 25.1\)](#)” says “*Cakkhum, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvi*”

- Here, “*cakkhu*” is the “defiled eye faculty” or the “*cakkhāyatana*.” Both have “*aniccaṃ vipariṇāmi aññathābhāvi*” nature. See “[Aniccaṃ Vipariṇāmi Aññathābhāvi – A Critical Verse](#)” for details.
- Furthermore, as pointed out above, the “*rūpa*” is a “mind-made version” of the external object (*rūpa āyatana*).
- When that *rūpa* makes contact with the *cakkhu*, that contact gives rise to the *cakkhu viññāṇa* in mind: “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*.”
- Therefore, that sensory experience arises in the mind close to the physical heart. It does not occur in the brain (or in the eyes)! You may want to refresh your memory by reading #12 of the post, “[Buddhist Worldview – Introduction](#).”

8. The example discussed in #3 involves an *ārammaṇa* coming through as a sound (*sadda rūpa*). Here the “sound *rūpa*” received by the *sota pasāda rūpa* (shortened to just “*sota*”) is the “*sadda*” in “*sotañca paṭicca sadde ca uppajjati sotaviññāṇam*.”

- Any external sensory input is a form of energy. That is why they are all *rūpa*. There is some confusion because most times, a “*rūpa rūpa*” or a “*vañṇa rūpa*” is just written as a “*rūpa*.”
- A sound is a *sadda rūpa*. You can figure out the other three: *rasa rūpa*, *gandha rūpa*, and *phoṭṭhabba rūpa*.
- A thought coming directly to the mind is a “*dhammā*” or a “*dhamma rūpa*.” There is no separate “*pasāda rūpa*” for *dhammā*, which directly contacts the *hadaya vatthu*.
- All those entities (*cakkhu*, *sota*..., *mano* and *rūpa*, *sadda*..., *dhamma*) are all defiled versions as discussed in “[Contamination of the Human Mind Based on a Sensory Input](#).”

Vipāka Vedanā Arise With That Initial Vipāka Viññāṇa

9. Let us consider “hearing a sound.” That is “*sotañca paṭicca sadde ca uppajjati sotaviññāṇam*.” This *sotaviññāṇa* is a *vipāka viññāṇa*, as we discussed in “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).”

- As we have discussed, *vedanā* and *saññā* arise with each *citta*. Therefore, there are a *vedanā* and *saññā* associated with that *sota viññāṇa* (which is a *citta*.) In other words, we know that we heard the

sound (*vedanā*), and we recognize what the sound is (*saññā*). The *vedanā* that arises with that *vipāka viññāṇa* is a *vipāka vedanā*.

- At this stage, the mind receives the sensory event. All *vedanā* associated with that initial sensory event (other than the physical body) is a neutral (*upekkhā*) *vedanā*. However, some *somanassa* or *domanassa vedanā* arise due to *kāma guṇa* (even in an *Arahant*). The following post, “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#),” will discuss this issue. However, no *dukkha/sukha vedanā* arise in this step of, “*sotañca paṭicca sadde ca uppajjati sotaviññāṇam*.” That also holds for other sensory faculties, except for the physical touch (*kāya*).
- Therefore, the only exception is “*kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇam*.” The sensory contact through the physical body can generate a *dukkha vedanā* due to an injury. It can lead to a *sukha vedanā* due to a body massage.
- Below, we will discuss *sukha*, *dukkha*, *somanassa*, *domanassa*, and *upekkhā vedanā* below.

The Second Type of *Vedanā* is “*Samphassa jā Vedanā*”

10. In the post, “[Indriya Make Phassa and Āyatana Make Samphassa](#),” we looked further into the “Chachakka Sutta (MN 148): “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam, tiṇṇaṁ saṅgati phasso, phassa paccayā vedanā*.” There we discussed the second type of *vedanā* due to “*phassa paccayā vedanā*.” There we discussed how the second type of *vedanā* arises due to “*samphassa*.” It is a good idea to review that post.

- That second type of *vedanā* is due to “contact with defilements in mind” or “*saṃ*” or “*anusaya*.” And that depends on each person, i.e., how strong a *taṇhā* is generated via greed, anger, or ignorance. **Therefore, this “*samphassa-jā-vedanā*” is mind-made.**
- An *Arahant* would experience the first type of *vedanā*, the *vipāka vedanā*. The second type of *vedanā* would NOT arise in an *Arahant* because he/she does not have a defiled mind.
- Now, we can categorize *vedanā* using a different scheme. That will show that *dukkha/sukha vedanā* arises ONLY due to the physical body. Other types of sensory contacts lead to unpleasant/pleasant *vedanā* (*domanassa/somanassa*) in the MIND.

Sārīrika Vedanā Are *Vipāka Vedanā*

11. As we saw above, ALL *vedanā* belong to those two types discussed above: *vipāka vedanā* and *samphassa-jā-vedanā*.

- The painful or pleasurable *vedanā* felt by the physical body are *sārīrika vedanā*; they are *vipāka vedanā*, and *Arahants* also feel them.
- On the other hand, *samphassa-jā-vedanā* are “mind-made” and arise when a mind attaches to an *ārammaṇa* with *rāga*, *dosa*, or *moha*.
- **Note (August 5, 2023):** In the previous versions, I had used the term *kāyika vedanā* to represent *vedanā* felt by the physical body. However, “*kāya*” is used in other contexts, too, for example, as “an aggregate.” Furthermore, the following *sutta* specifically used *sārīrika vedanā* to describe the physical pain felt by the Buddha with an injury: “[WebLink: suttacentral: Sakalika Sutta \(SN 1.38\)](#).”

Three Types of *Sārīrika Vedanā*

12. Then the *sārīrika vedanā* can be three types: *dukkha vedanā*, *sukha vedanā*, *adukkhamasukha vedanā*.

- We can see that *dukkha vedanā* due to injuries, body aches, etc. are *sārīrika vedanā*. Those *vedanā* are felt AT A LOCATION in the body. We feel a finger cut at the finger. Similarly, a back massage gives a *sukha vedanā* on the back.

- We remember that *vedanā* means “becoming aware of.” So, those *vedanās* due to bodily contacts that do not generate *dukkha* or *sukha* (i.e., neutral) are “*adukkhamasukha*” (neither painful nor pleasant), and that rhymes with “*adukkhamasukha*.”

Three Types of “Mind-Made *Vedanā*” (*Samphassa-jā-Vedanā*)

13. *Samphassa-jā-vedanā* similarly belong to three major types: *domanassa vedanā*, *somanassa vedanā*, and *upekkhā vedanā*.

- The word “*domanassa*” comes from “*do + manasa*” or “a depressed mind.” Similarly, “*somanassa*” comes from “*so + manasa*” or “a pleasant mind.” Of course, *upekkhā vedanā* is neither *domanassa* nor *somanassa*. It is neutral, and we feel that sensory input.
- Note that while the *adukkhamasukha vedanā* is associated with body touches, *upekkhā vedanā* is associated with all other sensory inputs.

Relationship to *Vipāka Vedanā* and “*Samphassa-jā-Vedanā*”

14. Therefore, *vedanā* can be either *vipāka vedanā* or “mind-made *vedanā*.” i.e., “*samphassa-jā-vedanā*.”

- As we have discussed, *samphassa-jā-vedanā* depends on the person’s mindset (more precisely, on one’s *anusaya* or *gati*.) Three people looking at the same person X may generate different types of *samphassa-jā-vedanā*. A friend of X will generate a *samphassa-jā-vedanā* that is of *somanassa* type. An enemy of X will generate a *samphassa-jā-vedanā* that is of *domanassa* type. A third person who does not know X may only feel a *samphassa-jā-vedanā* of *upekkhā* type.
- Since there are six types of *samphassa-jā-vedanā*, we can see that 18 types of *vedanā* could be associated with them. Each one could be *domanassa*, *somanassa*, or *upekkhā*.
- In the “[WebLink: suttacentral: Atthasata Sutta \(SN 36.22\)](#),” the Buddha has discussed 108 types of *vedanā*. But for many situations, the above types of *vedanā* are sufficient for our discussions.

10.2.3 Kāma Guṇa – Origin of Attachment (*Taṇhā*)

October 6, 2019; revised October 9, 2022; August 5, 2023; rewritten January 19, 2024

Kāma guṇa refers to “false, mind-made characteristics” that an ignorant mind assigns to sensory inputs (visuals, sounds, odors, tastes, touches, and *dhammā*.) Because of *kāma guṇa*, we attach (*taṇhā*) to worldly things, thinking they can bring us happiness. Minds of *Arahants* do not generate *kāma guṇa*.

Most *Vedanā* Are Mind-Made

1. In the post, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#),” we first categorized *vedanā* into two types: *vipāka vedanā* (*sukha*, *dukkha*, and *adukkhamasukha vedanā*) and *samphassa-jā-vedanā* (*somanassa* and *domanassa vedanā*.) **The latter category is mind-made and absent in *Arahants*.**

- *Sukha* and *dukkha vedanā* are felt ONLY in the physical body; they are ***sārīrika vedanā*** (“*sārīra*” means “physical body.”) *Sārīrika vedanā* can also be “neutral” or *adukkhamasukha vedanā*. Anyone born with a physical body (including *Arahants*) experiences them; the following *sutta* specifically used *sārīrika vedanā* to describe the physical pain felt by the Buddha with an injury: “[WebLink: suttacentral: Sakalika Sutta \(SN 1.38\)](#).”
- **All other sensory inputs of sights, sounds, tastes, smells, and memories (*dhammā*) only lead to *adukkhamasukha vedanā*.**

- However, based on those three types of initial *vedanā*, a mind could generate “mind-made” *samphassa-jā-vedanā*.
- **We recently identified the origin of such “mind-made” *samphassa-jā-vedanā* to be “distorted” *saññā*.** Sensory inputs of sights, sounds, tastes, smells, and memories generate likable or repulsive “distorted” *saññā*, and a mind may attach to such *saññā* and generate *samphassa-jā-vedanā*.
- **For example, the “sweetness of sugar” and the “bad smell of feces” are “distorted *saññā*” and not *vedanā*. But they can lead to *samphassa-jā-vedanā*.** Furthermore, *sārīrika vedanā* may also give rise to mind-made *samphassa-jā-vedanā*. For example, in the case of an injury, in addition to physical pain, there is usually “mental pain” when one worries about recovering from that injury.

***Samphassa-jā-Vedanā* Have Their Origins in “Distorted *Saññā*”**

2. The concept of “distorted *saññā*” is discussed in detail in [“Sotāpanna Stage via Understanding Perception \(*Saññā*\)”](#). There, it was shown **that sensations like “sweetness of sugar, attractiveness of a person, the smell of a rose, etc.” are not *sukha* or *dukkha vedanā*. They are “distorted *saññā*.”**

- Anyone born in *kāma loka* automatically generates specific “*kāma saññā*” for a given sensory object. Thus, such “distorted *saññā*” arise in *Arahants* as well as in average humans (*puthujjana*).
- However, while the mind of a *puthujjana* will automatically attach to such “distorted *saññā*,” the mind of an *Arahant* would not.
- When the mind of a *puthujjana* attaches to such “distorted *saññā*,” that is immediately followed by “mind-made *vedanā*” or *samphassa-jā-vedanā*.
- This sequential (and rapid) attachment process is discussed in detail in several posts, the last being [“Purāṇa and Nava Kamma – Sequence of Kamma Generation.”](#)

Steps in *Kamma* Accumulation

3. Attachment to an *ārammaṇa* does not happen in “one-shot.” For example, when looking at an external object, our eyes capture the image not in one shot (like with a camera) but in many shots, each providing only an incomplete picture. That process is described in [“Vision Is a Series of “Snapshots” – Movie Analogy”](#) and [“Seeing Is a Series of ‘Snapshots.’”](#)

- However, it happens so fast that we feel like we see an object in “one-shot.” The Buddha analyzed that process on an even faster time scale. That is an “ultra-fast process” (occurring within a billionth of a second) and is discernible only to the mind of a Buddha. Let us first look at the time sequence described by the Buddha in several *suttās* and *Abhidhamma*. **They provide a self-consistent picture compatible with recent scientific findings.**
- The steps are as follows: *Kāma dhātu* TO *kāma saññā* TO *kāma saṅkappa* TO *kāmacchanda* TO *kāma pariḷāha* TO *kāma pariyesanā*, which leads to *kamma* accumulation via the mind, speech, and body, i.e., *mano*, *vacī*, and *kāya kamma*. These steps were briefly discussed using the chart below in the post [“Purāṇa and Nava Kamma – Sequence of Kamma Generation.”](#)

Purāṇa and Nava Kamma - 2

Download/Print: [“WebLink: Image Download: Purāṇa and Nava Kamma – 2 \(3\)”](#)

Steps in Kamma Accumulation Stops Automatically for Arahants

4. The chart shows that the mind starts at the “kāma dhātu” stage upon receiving an ārammaṇa (Note: I have revised the previous chart to indicate the difference in “viññāṇa expansion” for two types of ārammaṇa.) The sequence of kamma accumulation is in the “[WebLink: suttacentral: Sanidāna Sutta \(SN 14.12\)](#)” and was discussed in detail (especially the beginning steps) in the post “[Upaya and Upādāna – Two Stages of Attachment](#).” **I highly recommend reading it again. At the time of its posting, many people probably did not understand it.** That sequence is:

- “Kāma dhātun, bhikkhave, paṭicca uppajjati kāma saññā, kāma saññāṃ paṭicca uppajjati kāma saṅkappa, kāma saṅkappaṃ paṭicca uppajjati kāmacchando, kāmacchandaṃ paṭicca uppajjati kāma pariḷāho, kāma pariḷāhaṃ paṭicca uppajjati kāma pariyesaṇā.” OR “Attachment to kāma dhātu leads to kāma saññā, attachment to kāma saññā leads to kāma saṅkappa, attachment to kāma saṅkappa leads to kāmacchanda..and so on to kāma pariyesaṇā.”

5. The critical point that needs to be pointed out is the following. “Kāma saṅkappa” starts arising only AFTER the “kāma saññā” step. As stated in the “[WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#)” kāma rāga arises ONLY with kāma saṅkappa: “**Saṅkappa rāgo purisassa kāmo**” OR “kāma rāga is defined as kāma saṅkappa (mano saṅkhāra contaminated with rāga.)”

- Such mano saṅkhāra arise within a billionth of a second without us realizing it. **The arising of kāma rāga cannot be avoided if “kāma rāga anusaya/saṃyojana” is intact.**
- Since Arahants and Anāgāmis have eliminated “kāma rāga anusaya/saṃyojana,” that second step DOES NOT occur for them. Thus, their minds DO NOT proceed beyond the kāma saññā step. The rest of the steps occur for only those below the Anāgāmi stage.

6. The reason for *Arahant*'s mind not proceeding beyond the “*kāma saññā*” step was discussed using a different way in the post “[Saññā – All Our Thoughts Arise With ‘Distorted Saññā’](#).” See #9 – #12 in that post. The following is a brief overview.

- The “[WebLink: suttacentral: Upavānasanditthika Sutta \(SN 35.70\)](#)” states, “*Idha pana, upavāṇa, bhikkhu cakkhunā rūpaṃ disvā rūpappaṭisaṃvedī ca hoti rūparāgappaṭisaṃvedī ca*” OR “Upavāṇa, take the case when a *bhikkhu* sees a sight with their eyes and also generates the **desire** for the sight.”
- In the verse “*rūpappaṭisaṃvedī*” means “*rūpa paṭisaṃvedī*” and “*rūparāgappaṭisaṃvedī*” means “*rūpa rāga paṭisaṃvedī*.” Just seeing (without attachment, but still with “**distorted saññā**”) happens with “*rūpa paṭisaṃvedī*,” and **the attachment happens** with “*rūpa rāga paṭisaṃvedī*.”
- Thus, an *Arahant* will only go through the “*rūpa paṭisaṃvedī*” but NOT the “*rūpa rāga ppaṭisaṃvedī*” step. A *bhikkhu* below the *Arahant/Anāgāmi* stages goes through both steps in the above verse. Note that “*rūpa*” here means all five types of *rūpa* present in the *kāma loka* and does NOT refer to “*rūpa loka*.”

Steps in Kamma Accumulation for a Puthujjana

7. **The first two steps in #3 and #4 take place simultaneously in the mind of a puthujjana upon receiving the sensory input, i.e., in the first citta vīthi.** Thus, at the step “*Kāma dhātum, bhikkhave, paṭicca uppajjati kāma saññā*” in the “[WebLink: suttacentral: Sanidāna Sutta \(SN 14.12\)](#)” BOTH “*rupapaṭisaṃvedī*” and “*rūpa rāga ppaṭisaṃvedī*” occur for anyone with “*kāma rāga anusaya/saṃyojana*.”

- Therefore, the two *suttās* (“[WebLink: suttacentral: Sanidāna Sutta \(SN 14.12\)](#)” and the “[WebLink: suttacentral: Upavānasanditthika Sutta \(SN 35.70\)](#)”) state the same thing but in different ways.
- Let us now discuss the “expansion of *viññāṇa*” for a *puthujjana* in the subsequent steps, as shown in the chart above.

Two Stages of “Viññāṇa Expansion”

8. The increasing contamination of a mind (*viññāṇa*) with time is shown as two “expansions” (represented by two “cones” in the above chart):

- i. In the “*purāṇa kamma*” stage, contamination happens slowly, and we are not even aware of the sensory input yet.
 - ii. The contamination is stronger in the “*nava kamma*” stage, where *kamma* accumulation happens consciously (with *javana citta*.)
- That second stage of expansion occurs ONLY IF we consciously attach to the *ārammaṇa* with the mindset that it can provide us with happiness. **That is where “*kāma guṇa*” comes into play.**
 - First, let us clarify the arising of “*bahiddha viññāṇa*” and “*ajjhata viññāṇa*” in the “*purāṇa kamma*” stage using the above chart.

Arising of “Bahiddha Viññāṇa” and “Ajjhata Viññāṇa”

9. As we noted above, the mind of a *puthujjana* gets attached to ANY sensory input (*ārammaṇa*) in *kāma loka* at the very first instance. At the outset of that process, a “defiled *viññāṇa*” arises as “*bahiddha viññāṇa*” and strengthens to “*ajjhata viññāṇa*” via only “*kāma saṅkappa*” which are “*mano kamma*.” **No *javana citta*s arise at these steps.**

- The first instance of “weak attachment” is said to occur with “*bahiddha viññāṇa*.”

- In the next step of “*kāma saññaṃ paṭicca uppajjati kāma saṅkappo*” that *viññāṇa* gets a bit stronger at the “*ajjhata viññāṇa*” stage; see the chart above.
- Right after the “*ajjhata viññāṇa*” stage, the mind starts attaching to “its version of the external *rūpa*” (“*cakkhuvīññeyyā rūpa*” means a “*rūpa* prepared by *cakkhuvīññāṇa*.”)

Transition to the “*Nava Kamma*” Stage with *Kāma Guṇa*

10. If that “*cakkhuvīññeyyā rūpa*” is tempting to the mind, it will examine whether that “mind-made *rūpa*” has enough “*kāma guṇa*,” i.e., whether it is “enticing enough.” Note that “*kāma guṇa*” is NOT in the external object.

- The “[WebLink: suttacentral: Kāmaguṇa Sutta \(AN 9.65\)](#)” states: “*Pañcime, bhikkhave, kāmaguṇā.*” It is misleading to translate that as “There are five *kāma guṇā*.”
- Here, “*pañca kāma guṇa*” does not mean “five types of *guṇa*.” The five refers to the five types of *kāma* (sensual pleasures with five physical senses) available in *kāma loka*. There are six types of “*guṇa*.”
- Those six types are: “*īṭhā, kantā, manāpā, piyarūpā, kāmūpasamhitā, and rajanīyā.*”

11. The concept of *kāma guṇā* and the six types are discussed in #10 through #13 in the post “[Kāma Rāga Dominates Rūpa Rāga and Arūpa Rāga](#).” and quoted below.

- The first one, *īṭhā* means “promise of fulfillment,” which goes with our perceived “*nicca* nature of this world.” However, the world is of *anicca* nature, and thus, this “*īṭhā* characteristic” is based on the ignorance of the real nature.
- The three characteristics *kantā, manāpā, and piyarūpā* express similar meanings: desirable, agreeable, and pleasant (and emphasize the *īṭhā* characteristic.) The fifth, “*kāmūpasamhitā*,” means “**induce sensuality**.” The last one, “*rajanīyā*,” means “**generating defilements**” and thus can make one do immoral things to fulfill one’s desires.
- The last two clarify that “*kāma guṇa*” refers mainly to the *kāma loka*.

Kāma Guṇa Come Into Play After “*Ajjhatta Viññāṇa*”

12. At the “*ajjhata viññāṇa*” stage, a specific person’s “*gati*” comes into play. “*Ajjhatta*” means “one’s own.”

- While the “*bahiddha viññāṇa*” is triggered with *kāma raga anusaya/samyojana*, the “*ajjhata viññāṇa*” also depends on one’s *gati* at that time.
- Furthermore, even for the same person, “*kāma gati*” will manifest at different levels depending on the conditions. While watching an erotic movie, “*kāma gati*” will be strengthened, but while listening/reading Dhamma, it will be non-existent.
- Depending on the strength of the “*kāma guṇa*” generated for that sensory input (*ārammaṇa*), it leads to further contamination of the *viññāṇa*. **This is where the “second cone” starts in the chart above, signifying the “*nava kamma*” stage.**

Mind Starts Consciously Accumulating *Kamma* in the “*Nava Kamma*” Stage

13. As shown in the chart, **attachment to the “mind-made *rūpa*” strengthens with “*kāma guṇa*” and “*kāmacchanda*” (or *kāma chanda*) arising in the mind.**

- That means one is strongly attached, and now the mind is in a “state of agitation” (“*kāma pariḷāha*”) until its desire to enjoy “more of it” is satisfied. Thus, it starts investigating ways to fulfill that desire, i.e., one engages in “*kāma pariyesana*.”

- That is when one starts doing *kamma* with speech and actions, i.e., now, one is fully engaged with *mano*, *vacī*, and *kāya kamma*.

An Example

14. For example, consider person X going to a meal at a friend's house. X is offered a dish he has not tasted before and finds it quite tasty.

- The taste of the food was the “*kāma saññā*” (in this case, “*rasa saññā*”) that triggered *kāma saṅkappa* automatically (the first step generating “*bahiddha viññāṇa*.”) As more *kāma saṅkappa* arise, his “*jivhā indriya*” becomes “*jivhā āyatana*” at the second of “*ajjhata viññāṇa*.” See the above chart.
- If the dish is enticing (i.e., if it triggers strong “*kāma guṇa*”), X's mind will attach to the “*rasa rūpa*” created in his mind by the “tasty dish.” That is the “*kāma chanda*” stage in the chart.
- Now, X wants to know more about the dish and starts asking the friend how to make it or where to buy it. Those involve the rest of the steps leading to *kāya*, *vacī*, and *mano kamma*.
- If X got really attached to that meal, he may tell others about it the next day and even try to make it himself. All those involve *vacī* and *kāya saṅkhāra*. If that is the case, the “*viññāṇa*” (expectation of enjoying the meal again) that arose in his mind was strong.

Kāma Rāga Means Getting Attached to “Mind-Made *Vedanā*”

15. The human world has abundant enticing sights, sounds, tastes, odors, and bodily comforts. Those are not *kāma*. They are *kāma guṇa* that we had created by being born with this physical body; **this birth occurred only because we had craved such a body in the past**. Comprehending that requires understanding how the “*bhava paccayā jātī*” step in *Paṭicca Samuppāda* led to the birth of the present physical body. That is *vipassanā*!

- This physical body is created by *kammic* energy to provide that “distorted *saññā*.” That is why even an *Arahant* will taste the “sweetness of a tasty meal.” **But his mind has fully comprehended how that “distorted *saññā*” arises and that it is a “mirage” or a “magic show.”** The Buddha called *saññā* a mirage and *viññāṇa* magician in the “[WebLink: suttacentral: Phenapindūpama Sutta \(SN 22.95\)](#),” and we discussed that in the post, “[Sotāpanna Stage and Distorted/Defiled Saññā](#).”
- Therefore, the next step of generating *kāma saṅkappa* and getting to the “*bahiddha viññāṇa*” stage does not occur for an *Arahant*.
- Anyone not released from the *kāma loka* will get to the first steps of generating “*bahiddha viññāṇa*” and the “*ajjhata viññāṇa*” stages, i.e., will go through the “*purāṇa kamma*” stage.
- But the second stage of “*nava kamma*” will be initiated only if the *ārammaṇa* is strong enough to trigger the conscious attachment (*taṇhā*) to that “mind-made *rūpa*.” If that happens, then the “standard *Paṭicca Samuppāda*” process will kick in at the “*taṇhā paccayā upādāna*” step, leading to a “rapid and strong expansion of *viññāṇa*”; see the chart above.

First Step for Removing *Kāma Rāga* Is To Remove *Kāma Guṇa*

16. First, one must stop the “*nava kamma*” stage from starting. That requires getting rid of *kāma guṇa* by losing one's attachment to “sensual sensory events” or mind-pleasing *ārammaṇa*.

- The “[WebLink: suttacentral: Yogakkhemi Sutta \(SN 35.104\)](#)” states that the Buddha has cut-off *kāma guṇa* at their roots. Of course, that is true for *Arahants* and *Anāgāmis* too.
- That becomes easier when one realizes that all mind-pleasing *ārammaṇa* are “fake” or a “magic show” as explained in #15.

10.2.4 Vision Is a Series of “Snapshots” – Movie Analogy

October 13, 2019; revised November 15, 2019; April 4, 2022; January 13, 2023; May 16, 2023; August 19, 2023 (#3)

It is essential to understand that the mind can capture only one sensory input at a time. This helps one understand that no “person” is involved in *Paṭicca Samuppāda* in an ULTIMATE SENSE.

Vision – How Do We See an Object?

1. Vision or “seeing” appears to us as continuous. We see people moving around, vehicles moving, animals running around, etc. However, in reality, “seeing” happens due to a series of “snapshots” our physical eyes take. Please bear with me as I set the stage with the following Pāli terms. Knowing these Pāli terms in detail is unnecessary; try to get the basic idea. If you have not read the post, [“Seeing Is a Series of ‘Snapshots,’”](#) it could be helpful to read that first.

- A key idea behind Buddha Dhamma is that we experience only one *citta* (loosely translated as a thought) at a time and that *citta* focuses on ONE *ārammaṇa*. In other words, while the mind registers a visual event, it cannot hear, smell, taste, or feel a touch. The keyword *ārammaṇa* was introduced in the post, [“Vipāka Vedanā and ‘Samphassa jā Vedanā’ in a Sensory Event.”](#)
- “Seeing” does not happen continuously since the mind can process only one *cakkhudvāra citta vīthi* (with 17 *cittā*) at a time.. The mind processes that *cakkhudvāra citta vīthi* with three more *manodvāra citta vīthi*. At the end of those *citta vīthi*, the mind has captured a ‘snapshot’ of the object and recognized it. Those four *citta vīthi* define one “snapshot” of a moving object.
- Our “seeing of a moving external object” involves many “snapshots” within seconds. Our perception of a moving object results from many such “snapshots.” We do not see the individual “snapshots.”

Movie Analogy – Series of Snapshots

2. We can simplify and understand the above process using an analogy. What I stated above is — in principle — what happens when we watch a movie.

- **To make a movie, a video camera captures many static pictures (snapshots) of a scene.** Then those snapshots are projected to a screen at a specific rate. If the playback speed is too slow, we can see individual pictures, but above a certain “projection rate,” it looks like natural motion. Here is a video that illustrates this well:

[WebLink: youtube: Animation basics: The optical illusion of motion - TED-Ed](#)

- A movie projector projects static pictures to the screen at a rate of about 30 frames a second, and we see the movie as a continuous progression of events. If the projection rate is low, we can see it frame by frame or as individual “snapshots.” We do not perceive those static pictures when projected at 30 frames a second, instead, we perceive a continuous progression without any gaps.
- More details in the post, [“Citta and Cetasika – How Viññāna \(Consciousness\) Arises.”](#)
- **That is why the Buddha said that the mind (or *viññāṇa*) is a magician.** We perceive a streamlined world, even though the reality is that our sensory faculties detect only a series of “snapshots,” **It is the mind that conceals the reality and gives us a perception of a continuous progression of events.**

- It is critical to understand this point. It helps get rid of *sakkāya diṭṭhi*; see “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”

Mind and the Brain – Two Different Entities

3. In an early post on this series, I pointed out that *cakkhāyatana* and *cakkhu pasāda rūpa* are not the physical eyes. Visual signals received by eyes are processed by the brain and detected by *cakkhu pasāda rūpa*; see #12 of “[Buddhist Worldview – Introduction](#).”

- That *cakkhu pasāda rūpa* (or simply *cakkhu*) is part of the *gandhabba*, our “mental body.” The *gandhabba* has the seat of the mind (*hadaya vatthu*) surrounded by the five *pasāda rūpa* corresponding to vision, hearing, taste, smell, and touch.
- When our physical eyes capture an image of an external object, that image goes to the visual cortex in the brain. The signal is processed there and then transmitted to the *cakkhu pasāda rūpa*, making contact with the *hadaya vatthu*. That contact (*phassa*) leads to the arising of *cakkhu viññāṇa* at the *hadaya vatthu*. More details in “[Brain – Interface between Mind and Body](#).”
- By the way, that is the step, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*” discussed in #7 in the post, “[Contact Between Āyatana Leads to Vipāka Viññāna](#).”

4. Therefore, the brain works like a computer. It converts the image from the eyes to a form “processable” by *hadaya vatthu* (seat of the mind.) Therefore, vision involves a somewhat complex process.

- Similar processes take place for the other four sensory events. For example, when the physical ears capture a sound, that signal goes to the auditory cortex in the brain for processing. That signal then goes to the *sota pasāda rūpa*, which makes contact with *hadaya vatthu* to transfer. That gives rise to *sota viññāṇa* via, “*sotañca paṭicca sadde ca uppajjati sotaviññāṇam*.”

Reviewing the Whole Series Could Be Helpful

5. It may need some effort to understand this sequence of events. But it is necessary to comprehend the overall process before we get to the next post.

- It is good to print all the posts in the “[Worldview of the Buddha](#)” subsection and review them carefully.
- It is unnecessary to understand the DETAILS of #6 and #7 below. But it is good to get the general ideas involved. I am providing this information to illustrate the following. New findings in science are not only compatible with Buddha Dhamma but also help explain critical concepts in Buddha Dhamma.

The Brain Processes Visual Signals at About 30 Frames per Second

6. A recent study has reported that the minimum time to recognize a static picture is about 13 milliseconds ([Ref. 1](#)). That means we should be able to see such snapshots projected at 77 frames per second at the highest rate. However, that is probably “pushing it” and uncomfortable for the brain to handle. That is why movies use a projection rate of about 30 frames per second, as mentioned in #2 above.

- Interestingly, the time for neural information to reach the brain takes about 15 to 30 milliseconds (References 49, 50 in [Ref. 2](#)). Therefore, a projection rate of 30 to 50 frames is compatible with that measurement too.
- A millisecond is a thousandth of a second.
- Also, note that the eyes do not capture an image “in one shot.” It takes many frames taken via automatic “saccadic movements of the eyes.” See the Wikipedia article “[WebLink: wikipedia.org: Saccade](#).”

The same Analysis Holds For the Other Four Physical Senses

7. A similar set of rules are valid for hearing as well. Another recent study ([Ref. 2](#)) found that sounds could be recognized at rates up to 30 sounds per second. That corresponds to a “sound packet” of about 33 milliseconds that can be detected and recognized.

- However, people speak at a much slower rate of 150 words per minute. That is about two words per second, much less than 30 possible words per second that would be possible according to the above study. So, there is no problem with hearing what other people speak, even if someone talks faster than the average rate.
- Currently, no studies are available from science for the other three sensory events (taste, smell, and body touches). But the same process holds for those as well.

Aside – Cognition (*Saññā*) Requires More Than Detection

The following points (#8, #9) are “asides.” It is not necessary information, but it could help those familiar with *Abhidhamma*.

8. We must remember that “experiencing a sensory input” is much more complex than just receiving that sensory input. For example, the mind needs to see an object or hear a sound, recognize what it is, and generate a *vedanā*.

- For example, upon hearing the sound “apple,” the mind needs to know what an “apple” is. Someone who does not speak English would not know what is meant by the word “apple.” But those who speak English AND have had an experience eating apples would have MEMORIES of those. Therefore, the mind must compare the received sensory with memories to recognize it!
- The mind does that very fast with the help of the *manasikāra cetasika*. As you may know, *manasikāra* is one of the seven universal *cetasika* that arises with each *citta*. Thus, the mind can recognize a sensory input instantaneously, as soon as it receives a “data packet.”
- More details in [“Citta and Cetasika – How Viññāna \(Consciousness\) Arises.”](#)

Aside – Process In Abhidhamma Language

9. Actual “seeing” or vision takes place at *hadaya vatthu*. Same for the other four types of sensory events. For example, consider a “packet of data” sent from the physical eye to the brain. The brain processes that information and transmits it to the *cakkhu pasāda*. As you may remember, the five *pasāda rūpā* (*cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*) surround the *hadaya vatthu*. Now the *cakkhu pasāda* makes contact with the *hadaya vatthu* by hitting it. That causes the *hadaya vatthu* to vibrate 17 times, like a gong struck by an iron rod vibrating for a certain fixed number of times.

- The 17 vibrations of the *hadaya vatthu* correspond to the 17 *cittā* in a *citta vūthi*. Such a *citta vūthi* is a *pañcadvāra citta vūthi* because one of the five physical senses or *pañcadvāra* (“*pañca*” or five + “*dvāra*” or “door”) initiates it.
- Imagine a blade clamped at one edge and hit on the un-clamped side. The blade will vibrate. It vibrates a certain FIXED number of times. For a given material, that is a fixed number.
- The same happens when a *pasāda rūpa* strikes the *hadaya vatthu*. The *hadaya vatthu* vibrates 17 times, with each vibration leading to the arising of a *citta*. **That is the origin of a *citta vūthi* with 17 *cittā*.** Those 17 vibrations are a form of energy called a *hadaya rūpa*.

10. The misconception that any *rūpa* has a lifetime of 17 thought moments arose because of not understanding the difference between a *rūpa* (the image of an external object) and a *hadaya rūpa* (which is just the 17 vibrations of the *hadaya vatthu*).

- In other words, this information packet is received and processed by the *hadaya vatthu* within the 17 *cittā*. The information is complete by the fourth *citta* (fourth vibration of the *hadaya vatthu*), and then the rest of the *citta* in that *citta vūthi* deal with this information. Three more *citta vūthi* run by the

hadaya vatthu itself completes the process. The additional *citta vīthi*, initiated by the mind, are *manodvāra citta vīthi*. Here, *manodvāra* means the “mind-door.”

- Details of #9 and #10 at “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#).”

The mind is Fast, and the Brain is Slow

11. Thus, we can see a vast **difference** in time between the two processes involved. The physical body acquiring data takes time of the order of 10 milliseconds. The mind processes that information within a billionth of a second (using one *pañcadvāra citta vīthi* and three *manodvāra citta vīthi*.) [Read [WebLink: PDF Download: Process Of Consciousness And Matter – Bhaddanta Dr. Rewata Dhamma](#) in **Chapter III – Mind-Door Cognitive Process (Manodvāra Vīthi)** under the topic **Consequent Mind-Door Process (Tadanuvattika-manodvāra Vīthi)**.]

- Even if the five senses keep sending data continuously, the mind is “just sitting there” most of the time. Let us examine this in more detail: Suppose the brain keeps sending data from the eye non-stop. Since each “packet” takes, say ten milliseconds, then in a second, there will be 100 “data packets” of vision coming in. If the brain is going at full speed, it can send at most 500 (=100×5) “data packets” from all five physical senses in a second. **Then the mind will spend less than a millionth of a second processing all that data.** Thus, if we add actual “active times of the mind” for a movie that lasts two hours, it is probably less than a second.
- In other words, the brain spends a lot of energy processing the data streams during a two-hour movie. But the “seat of the mind” or the *hadaya vatthu* absorbs that information at an unimaginable speed. That is why we might only get a headache watching too many movies.

12. During those “gaps,” the *hadaya vatthu* also interacts (both ways) with the *mana indriya* in the brain. **In particular, it gives instructions to the brain (via *mana indriya*) on how to control the physical body in response to sensory inputs.**

- Thus, for the most part, the mind (or, more precisely, the *hadaya vatthu*) is sitting there idly. That “idle state” of the mind is the “*bhavaṅga*” state.
- **A key point here is that the mind spends only a VERY SHORT TIME experiencing the SENSORY INPUTS. There is no “self” watching a movie.** The mind gives the illusion that a “self” is watching the movie. Details are in the next post, “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”
- The above is a very brief discussion. Of course, there are more details, but one can hopefully get the basic idea. Please ask questions if something is not clear. It is critical to understand this post.

Summary

13. The critical point embedded in the [WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#) is **that there is no “self” experiencing the external world**. It is just a series of events, and the mind MAKES IT APPEAR that a “person” is watching a movie. We discussed the initial steps in sensory events addressed by that *sutta*.

- The key message in the *sutta* is that the mind DOES NOT experience the external world CONTINUOUSLY. Instead, the mind is active only for brief periods when receiving inputs from the five *pasāda rūpa*. As mentioned above, the brain is “on” much longer than the mind. **Once the brain processes information packets, the mind absorbs that information within a “blink of an eye.”**
- On the other hand, the brain has a heavy workload while watching a movie. It has to process audio and video inputs rapidly for the movie’s duration. One could get a headache if one watches two movies at a stretch. But even during that time, the mind is mainly in the *bhavaṅga* state. There is no “self” watching the movie. It is just a series of events taking place. **The mind is “putting all those “events” together and giving the appearance of a continuous progression of events.** Thus, one perceives “I am watching a movie” and NOT “watching a series of static pictures.”
- Details are in the next post, “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”

- **Later , we will discuss why it is also incorrect to say there is “no-self.”** As long as *Paṭicca Samuppāda* is not understood, there is a “self” or a “person” going through the rebirth process and experiencing much suffering!

10.2.5 Do I Have “A Mind” That Is Fixed and “Mine”?

August 30, 2018; revised October 3, 2022; November 28, 2022

You may first read the post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” to have the proper background.

1. Let us systematically see what happens when we “see” a tree for example. Please don’t just read through, but stop and think about each point. This post condenses much information (as for most posts, but especially this one).

- Light reflected off the tree falls on our eyes and forms an image of that tree on the retina in the back of the eye. As you can imagine, that image is tiny. But we “see” its numerous leaves, individual flowers, and fruits in great detail. How is that possible?
- Anyway, that image is transmitted to the brain through a chemical signal. How does the brain “see” the tree?
- Jeff Hawkins has thought a lot about this issue, is actively engaged in artificial intelligence. His book, “[WebLink: PDF Download: On Intelligence](#)” discusses current scientific knowledge on vision and other sensory inputs.

2. Starting on p. 55 of his book, Hawkins discusses how the image that falls on the back of the eye is transmitted to the brain: “Visual information from the outside world is sent to your brain via a million fibers in your optic nerve...”

- “You can visualize these inputs as a bundle of electrical wires or a bundle of optical fibers...” and “The inputs to the brain are like those fibers, but they are called axons, and they carry neural signals called ‘action potentials’ or ‘spikes,’ which are partly chemical and partly electrical...”
- As discussed, not only visual signals but all sense inputs (sounds, taste, smell, and body touch) to the brain are the same type. You hear a sound, see the light, and feel pressure, **but inside your brain, there isn’t any fundamental difference between these different types of neural signals.** An action potential is an action potential.
- **Scientists have not figured out how the brain distinguishes those different types of signals.** Moreover, they have no idea how the mind “sees the light” or an image of that tree.

3. To quote more from that book: “There is no light inside your head. It is dark in there. There is no sound entering your brain either; it is quiet inside. The brain is the only part of your body that has no senses itself. A surgeon could stick a finger into your brain, and you would not feel it. All the information that enters your mind comes in as spatial and temporal patterns on the axons.”

- **So, it is a mystery how the mind senses those chemical and electrical signals coming to the brain as vision, sound, taste, smell, and body touch.**

- Scientists are trying to solve this puzzle by looking for answers in the brain. They have come to the end of the line here.
- Now let us see how the Buddha described these processes.

4. **Actual “seeing” (and hearing, smelling, etc) goes on at the *hadaya vatthu* located in the *gandhabbā* or the mental body.** The *gandhabbā* is like a fine mesh overlapping the physical body, with the *hadaya vatthu* located close to the physical heart. That is what gives life to the physical body.

- At the death of the physical body, that fine *gandhabbā* is pulled off the physical body like a ghost. It is so fine that we cannot see it. But we all know that a body can be alive one moment and become inert (like a piece of wood) at death a moment later.
- Of course, when the *gandhabbā* comes out **temporarily (as in the case of those who can do astral travel or in the case of out-of-body experiences)**, it is still “attached” to the physical body and keeps the physical body alive. In “astral travel” terminology, the mental body is attached to the physical body via an invisible “silver cord.”
- Such cases are discussed in “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

5. Another critical point is that in the subtle body of the *gandhabbā*, there are five “*pasāda rūpa*” located around the *hadaya vatthu*: *cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya*, that correspond to seeing, hearing, smelling, tasting, and touch. **Here is the “missing part” of the puzzle that scientists will never be able to solve just by dealing with the brain:**

- The brain is like a very sophisticated computer that analyzes those chemical and electrical signals discussed in #2 and #3.
- **Those chemical and electrical signals (which come in packets of about 10 millisecond duration per scientist) are converted to electromagnetic (EM) waves and are transmitted through the air to the *pasāda rūpa* located around the *hadaya vatthu*.**
- **This is what the Buddha taught 2000 years ago, and until scientists make this connection, they will not be able to proceed too far from where they are now.**

6. The Buddha did not explain it in terms of EM waves. These waves are called “*kiraṇa*” in Pāli or Sinhala.

- This is explained in the post “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#)” and other posts in the following subsection: “[Mind and Consciousness](#).”
- It takes a real effort to understand the details. But it will be worthwhile for those who are serious about learning *Abhidhamma*. Otherwise, try to get the basic idea.

7. As an example, let us consider seeing a tree. A continuous series of “data packets” (chemical and electrical signals per #3, #4 above) that come to the brain from the eyes are processed by the brain and converted to EM waves (*kiraṇa*).

- Those waves then travel to the *cakkhu pasāda* situated close to the *hadaya vatthu*. These waves from the brain to the heart area of the body travel in the air much faster than those chemical/electrical signals traveling from the eyes to the brain via axons.

8. When an EM wave (*kiraṇa*) packet arrives at the *cakkhu pasāda*, it hits the *hadaya vatthu* and “transfers” that visual information about the tree to the mind. **The mind is born momentarily during this transition for the duration of that signal.**

- This is what is meant by “*cakkhuṇṇa paṭicca rūpe ca uppajjati cakkhu viññāṇam*.” Here *cakkhu* is the *cakkhu pasāda rūpa* (**not the physical eye**), and *rūpa* (in “*rūpe ca*”) **is the signal from the brain that carries the visual signal about the tree (not the actual tree!)**. [*uppajjati* : [u + pad + ya] to be born; **arises**.]
- See “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”

9. This is CRITICALLY important to realize. What is meant by a “*rūpa*” is NOT the same as what our visual object is. We DO NOT see a man, a woman, or a tree. What comes to the mind is a “*rūpa* signal” that is generated by the brain. That signal has all the INFORMATION about that visual object.

- The reception of the visual signal (*rūpa*) by the *cakkhu pasāda* (*cakkhu*) happens at the very moment that the *cakkhu pasāda* transfers that signal to the *hadaya vatthu* by “hitting it.” And at that very moment, *cakkhu viññāṇa* arises: “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇam.*”

10. These are critical points to understand, even if all the details are not comprehended by modern science yet. Visual consciousness arises **briefly** when that information about the visual object is transferred to the mind.

- However, within that split second, not only the object (the tree in this case) is recognized, but also *vedanā*, *saññā* (recognition), and other mental factors also arise.
- For example, if we have seen that tree in the past, the *manasikāra cetasika* can feed that information too, so that we will know the name of the tree instantly; see “[Amazingly Fast Time Evolution of a Thought \(Citta\).](#)”

11. In another example, let us consider what happens when we tap a glass with a spoon. Of course, we will hear the tapping sound.

- Where did that sound come from? Was it in the glass? No. Was the sound in the spoon? No.
- The sound was emitted as a result of the spoon hitting the glass. If the spoon did not hit a glass, there would not be a tapping sound.
- In the same way, unless a “*rūpa*” or an image taken in by the eyes came to *cakkhu pasāda* and made it hit the *hadaya vatthu*, there would not be a “seeing event” or a *cakkhu viññāṇa*.

12. **So, there is no “entity” called an ever-present mind.** The mind arises when we receive sensory inputs via the five physical senses, as described above.

- What we loosely call the “mind” is the *viññāṇakkhandha* that arises in a billionth of a second after going through a fast process of *citta*, *mano*, *mānasam*, ...: See “[Amazingly Fast Time Evolution of a Thought \(Citta\).](#)”
- We can not only hear the tapping sound, but we can also see the glass and the spoon simultaneously. But those two events do not happen “at exactly the same time.” They just appear to be simultaneous.
- What comes to the mind is a series of sense inputs (via all five physical senses) in rapid succession. We perceive it all to happen at the same time.

13. How this is possible is explained in the post, “[Citta and Cetasika – How Viññāṇa \(Consciousness\) Arises](#)” and other posts in the following sub section: “[Mind and Consciousness.](#)”

- As explained there, the process is similar to how a motion picture works. When making a movie, the producers take many static pictures (with a video camera) and then play them back at a fast enough speed. If the playback speed is too slow, we can see individual pictures, but above a specific “projection rate,” it looks like actual motion. Here is a video that illustrates this well:

[WebLink: youtube: Animation basics: The optical illusion of motion - TED-Ed](#)

14. When we see the outside world, what happens is very similar to the above. At the end of the video it is stated that the “movie” we see is an illusion. **As the Buddha explained, that holds for real life as well.** When we see someone coming toward us, a series of “static pictures” or *citta* is projected at a very fast rate in our minds, giving us the illusion of a “movie like experience.”

- The mind is very fast. The Buddha said that nothing in this world is faster than the mind. That is why we feel that all types of sense inputs come to “one’s mind” simultaneously. **In reality, they are discrete snapshots, just like movie frames!**

- But just like we see a continuous movie (a large number of individual picture frames), **we feel like we have a continuous mind.**

15. Now to the second issue about the mind. Why do we experience the outside world our way, and have our feelings and perceptions about a given sense input (love or anger when seeing the same person, for example)? That is why we feel like “I have **my own mind.**”

- The key is to realize that our response to the external sense inputs is unique because we have our “own way” of perceiving and evaluating those sensory inputs based on the set of *gati* we have.

16. As we discussed in the previous post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#),” **our feelings and initial responses, reflect our personality or *gati*.**

- There we also discussed why the type of sensory input also plays an important role. So, our INITIAL response to an external sensory input depends on BOTH one’s *gati* AND the type of sensory input.
- That was an important post, so it may be beneficial to review it again. In this series of posts, I will try to highlight some critical features of Buddha Dhamma that will help get rid of *sakkāya diṭṭhi*. That is the key to the *Sotāpanna* stage.

17. Our “state of mind” depends on our *gati* and the sensory inputs we receive. Furthermore, we don’t have “a fixed mind”; it can change rapidly.

- If you think back, I am sure you can remember times when you felt like your mind was filled with greed; other times with love, yet another time with anger, etc.
- As one progresses on the Path, these extreme swings of “one’s mind” will become less, which is the key to *nirāmisā sukha*, eventually leading to *Nibbāna*.
- Each of us does not have a fixed mind. That means we don’t generate “our own” *saññā*, *vedanā*, *saṅkhāra*, *viññāṇa*. In other words, we do not have our *saññākkhandha*, *vedanākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*.
- Moreover, it is not fruitful to take any of them as “mine.” That perception is part of *Sakkāya diṭṭhi*.

18. *Sakkāya diṭṭhi* can be stated as the following wrong assumptions. “I am my body”, “I am my *vedanā*,” “I am my *saññā*,” “I am my *saṅkhāra*,” and “I am my *viññāṇa*.” The last four can be lumped together as “I am my mind.” But a better way to remove *Sakkāya diṭṭhi* is to realize that: “All those entities are not worthwhile to be taken as mine.”

- We tend to think automatically that “I have my own body,” “I have my own mind,” and “it is fruitful to be taken them as mine.”
- Let us first analyze the mind and see whether that statement is true. In the next post, we will address “I have my own body” and “it is fruitful to be taken as mine.”
- The Buddha analyzed **how the mind arises** step-by-step, by breaking down the process. That is why he called himself a “*Vibhajjavādī*”; see, “[WebLink: suttacentral: Subha Sutta \(MN 99\)](#)”: “*Vibhajjavādo kho ahamettha, māṇava; nāhamettha ekamsavādo..*” or “Young man, I am a *Vibhajjavādi* (one who analyzes from many aspects by dividing a given process to parts), I do not hold a fixed view based on just one aspect.”

In the next post, we will discuss why it is not fruitful to take one’s body as “one’s own.” But it is essential to know that the perception of “me” goes away only at the Arahant stage; see, “[Sakkāya Diṭṭhi is Personality \(Me\) View?](#).”

10.2.6 Chachakka Sutta – Six Types of Vipāka Viññāṇa

October 19, 2019; revised #12 on September 28, 2020; April 3, 2021; Title revised December 30, 2021; August 29, 2022

[Old Title : **Chachakka Sutta – No “Self” in Initial Sensory Experience**]

Cha chakka – Six Sets of Sixes

1. We have finished discussing the six steps in the *Chachakka Sutta*. See “[Worldview of the Buddha](#).” Let us briefly summarize the “six sets of sixes” (*Cha chakka*.)

- The *sutta* first lists the “six sets” or “six collections.” “*Cha ajjhakkāni āyatanāni veditabbāni, cha bāhirāni āyatanāni veditabbāni, cha viññāṇakāyā veditabbā, cha phassakāyā veditabbā, cha vedanākāyā veditabbā, cha tanhākāyā veditabbā.*”

That means: “One needs to understand the following “six sets of sixes”: Six **internal āyatana**, six **external āyatana**, six classes of (**vipāka**) **viññāṇa**, six classes of **phassa**, six classes of **vedanā**, six classes of **tanhā**. Let us briefly state what they are. I have explained them in detail in the preceding posts.

- Six internal āyatana are: “*Cakkhāyatanaṃ, sotāyatanaṃ, ghāṇāyatanaṃ, jivhāyatanaṃ, kāyāyatanaṃ, manāyatanaṃ.*”
- Six external āyatana are: “*Rūpāyatanaṃ, saddāyatanaṃ, gandhāyatanaṃ, rasāyatanaṃ, phoṭṭhabbāyatanaṃ, dhammāyatanaṃ.*”
- Six classes of (*vipāka*) *viññāṇa* are: “*cakkhuvīññāṇa, sotavīññāṇa, ghānavīññāṇa, jivhāvīññāṇa, kāyavīññāṇa, manovīññāṇa.*”
- The six classes of *phassa*: “*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso*” and similarly for the other five (**i.e., they are six types of “saṅ phassa”**),
- Six classes of *vedanā*: “*phassa paccayā vedanā*” arising from each of the preceding six types of “*saṅ phassa*.”
- Six classes of *tanhā*: “*vedanā paccayā tanhā*” due to the preceding six types of *vedanā*.
- It could be a good idea to print out the Pāli version of the *sutta* so that you can track which section of the *sutta* a verse under discussion is.

Chachakka Sutta Describes Initial Sensory Experiences Based on a New Ārammaṇa

2. About the first fourth of the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” discusses the following steps: “*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā, vedanā paccayā tanhā.*” (**repeated for all six sense faculties.**)

The *sutta* describes the automatic and instantaneous response to a new ārammaṇa. In several posts, we discussed in detail all those steps. Very briefly, those steps are (just focusing on the *cakkhu viññāṇa*):

- With the coming together (contact) between *cakkhu* (or *cakkhu pasāda rūpa*) and a *rūpa* (which is a “snapshot” of that external *rūpa*), *cakkhu viññāṇa* arises. ***Cakkhu* is NOT the physical eyes; “seeing” happens only when a rūpa makes contact with cakkhu pasāda.** Please review previous posts as needed.
- If that *rūpa* has a *kāma guṇa*, one may get interested in it (if one has the corresponding “*saṅ gati*”). The next step takes place ONLY IF one has such matching *gati* for that *rūpa* or that *ārammaṇa*.
- If one has matching “*saṅ gati*,” then a corresponding “*samphassa-jā-vedanā*” arises AUTOMATICALLY. See, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”
- The next step, “*vedanā paccayā tanhā*,” happens if that “*samphassa-jā-vedanā*” is strong enough to take further action. We discussed that last step in, “[Kāma Guṇa – Origin of Attachment \(Tanhā\).](#)”

A Ārammaṇa triggers sensory Experiences

3. Therefore, the *sutta* describes the events that occur when a new *ārammaṇa* comes to mind via one of the six internal sense bases (internal *āyatana*).

- **It is essential to see that ALL these activities happen AUTOMATICALLY and INSTANTANEOUSLY. They do not require CONSCIOUS thinking. There is no INTENTION involved.**
- That is a critical point to understand. You might say, “I can use any sensory faculties (internal *āyatana*) anytime I want to.” That is true. But think about any event, and you can ALWAYS trace it back to a *ārammaṇa* that comes to mind on its own.
- For example, you may see and hear many things when walking down a crowded street. But one sight or sound could stop you and start doing something else. You may see an eye-catching item in a store window, stop to look at it, and then go inside to buy it. That was triggered via, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*.” **The *sutta* describes what happens ONLY at the MOMENT that you saw the item.** Once you get “attached to it,” you start generating *vacī saṅkhāra* (consciously thinking about the item) and *kāya saṅkhāra* (go inside the store). That is the “*kamma* generation” stage. We will discuss that in later posts.
- Even in the middle of a discussion, one may get a new idea, and then everyone may start talking about that new idea he/she presented. The conversation changes to a new topic with the new *ārammaṇa*. That happened with a *dhammā* (an idea) that came to the mind via “*mañña paṭicca dhamme ca uppajjati manovīññāṇam*.”

Chachakka Sutta* Describes Only *Kamma Vipāka

4. All the steps in #2 above happen within a fraction of a second. There is no conscious thinking involved. **They are all *kamma vipāka*.**

- Of course, that process describes only those events immediately following the INITIAL sensory contact. One can deliberately experience that sensory contact again and again after the initial experience. For example, one may keep looking at an interesting sight or keep listening to a pleasing sound. **That is when one accumulates a new *kamma* (if done with greed, anger, or ignorance).** We will discuss those steps in future posts involving *Paticca Samuppāda*.
- **Results of past *kamma* automatically lead to *kamma vipāka*. Based on them, we create a new *kamma*. That is how the rebirth process continues.**

Sensory Inputs – One “Packet” At a Time

5. As I discussed in detail in the previous post, all our sensory inputs are first processed by the brain in “packets.” The brain can process those six types of data in parallel (at the same time). Each “packet” is about one-hundredth of a second (10 milliseconds) in duration. Those processed signals arrive at the seat of the mind (*hadaya vatthu*) located on the mental body (*manomaya kāya* or *gandhabba*). The mind, in turn, analyzes only ONE packet of information at a time. See the previous post, “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”

- For example, while the mind is processing a “sight” or *rūpa rūpa*, it CAN NOT process a “sound” or a “*sadda rūpa*.” After analyzing that “snapshot” of sight the mind switches to another sensory input. **Of course, our eyes and ears do not “die” moment-to-moment. It is just that “*cakkhu*,” for example, is ALIVE (or ACTIVE) only while the mind is processing input from the physical eyes.**
- Therefore, ONLY ONE internal *āyatana* is “ALIVE” at a given moment. Our “*cakkhu*” comes alive while the mind receives a “snapshot” of an external *rūpa*. The “*sota*” is alive (or active) only during a brief moment of receiving a “bit of sound” like just a word. **They come to the mind in “packets,” not as a**

continuous stream. But it SEEMS that we experience them all simultaneously since the mind processes all inputs very quickly.

- The following example may help to get the basic idea. We have seen those signposts where a message runs one letter at a time, but at a fast rate. Only one letter is on display at a given moment. But within a fraction of a second, that letter turns off, the next letter turns on, and so on. Since it happens fast, we can read the message.
- The mind is swift. It can — not only put together such a stream of incoming signals — but also separate the six sensory inputs. In the previous post (see #8 there), I briefly mentioned that the mind does this with the help of the *manasikāra cetasika*.
- More details in [“Citta and Cetasika – How Viññāna \(Consciousness\) Arises.”](#)

If Cakkhu Is “Attā,” It Must Be Alive (or Operational) All The Time

Now let us discuss the next verse in the *sutta*. It helps understand what is meant by the critical Pāli words *attā* and *sakkāya diṭṭhi*.

6. We have the perception that there is a “self” that sees, hears, tastes, smells, touches, and recalls *dhammā* all simultaneously.

- However, we do not experience all six sensory inputs simultaneously. Even with just one sensory input, the mind receives only a brief “snapshot” of it at a time. See, [“Vision Is a Series of “Snapshots” – Movie Analogy.”](#)
- In other words, our six internal *āyatana* of *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*, and *mano* arise ONLY if a corresponding *ārammaṇa* appears. As I have emphasized, our physical eyes, ears, nose, tongue, and body are not our internal *āyatana*. See, [“Buddhist Worldview – Introduction.”](#)
- Therefore, “one’s self” is not in ANY of those 36 entities. All those come to existence momentarily and pass away. That happens from time-to-time only when a *ārammaṇa* is registered.
- That is a critical conclusion that is related to “*anattā*.” It will also become clear that *anattā* differs from *anatta* (without the long “*ā*”). Let us discuss *anattā* in detail now.

A “Self” Is Not Involved in The Preceding Processes

7. After going through the steps in #2 above, the next part of the *sutta* starts with the verse, “‘*Cakkhu attā’ti yo vadeyya taṃ na upapajjati. Cakkhussa uppādopi vayopi paññāyati. Yassa kho pana uppādopi vayopi paññāyati, ‘attā me uppajjati ca veti cā’ti iccassa evamāgatam hoti. Tasmā taṃ na upapajjati: ‘cakkhu attā’ti yo vadeyya. Iti cakkhu anattā.*’”

Loosely translated: “If anyone says, ‘The *cakkhu* is self,’ (or “seeing” is mine or “it is I who sees”) that is not tenable. An arising and disappearing of *cakkhu* (not the physical eye) is evident. If *cakkhu* is ‘self,’ that would imply: ‘my self arises and disappears’ OR ‘I come into being momentarily and disappear.’ That is why it cannot be argued that ‘The eye is self.’ Thus *cakkhu* is ‘not-self’ or ‘*anattā*.’ (“*na attā*” for “not *attā*” rhymes as “*anattā*,” just as “*na āgāmi*” rhymes as “*Anāgāmi*.”)

- That verse is then repeated for the other five entities related to *cakkhu*, i.e., *rūpa*, *cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, *taṇhā* (due to *cakkhu samphassa-jā-vedanā*.) The last verse in that series is, “*Iti cakkhu anattā, rūpā anattā, cakkhuvīññāṇam anattā, cakkhusamphasso anattā, vedanā anattā, taṇhā anattā.*”
- Then that is repeated for the six entities associated with *sota*, *ghāna*, *jivhā*, *kāya*, and *mano* (6 x 6). The last verse is, “*Iti mano anattā, dhammā anattā, manovīññāṇam anattā, manosamphasso anattā, vedanā anattā, taṇhā anattā.*” At this point, we are about halfway through the text in the *sutta*.
- Therefore, “self” can be found in any of those.

- Now let us discuss two other *suttā* briefly to make those points clear.

Bāhiya Sutta – “Diṭṭhe Diṭṭhamattaṃ Bhavissati”

8. In the “[WebLink: suttacentral: Bāhiya Sutta \(Udāna 1.10\)](#),” the Buddha tells Bāhiya, “*Tasmātiha te, bāhiya, evaṃ sikkhitabbāṃ: ‘diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati’*ti.

Translated: “Bāhiya, you should train yourself the following way. At any moment, what you see (*diṭṭhe*) is just a snapshot (*diṭṭhamattaṃ* is literally, “trace of a sight.”) What you hear (*sute*) is a brief sound (*sutamattaṃ*.) What you experience with taste, smell, and touch (*mute*) is a trace of that (*mutamattaṃ*.) Your *viññāṇa* (*viññāte*) is a trace of *viññāṇa* (*viññātamattaṃ*.)

Then the Buddha further explains, “*Yato kho te, bāhiya, diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati, tato tvaṃ, bāhiya, na tena; yato tvaṃ, bāhiya, na tena tato tvaṃ, bāhiya, na tattha; yato tvaṃ, bāhiya, na tattha, tato tvaṃ, bāhiya, nevidha na huraṃ na ubhayamantarena. Esevanto dukkhassā*” ti.

Translated: “**Since what you see (*diṭṭhe*) is just a snapshot** (and similarly for others), Bāhiya, **there is no “you” (involved) there**; because of that, Bāhiya, you should not get attached (*na tattha*); if you do that, **Bāhiya, “you” are not in this existence (*nevidha*) or another existence (*na huraṃ*) or in between those two (*na ubhayam antarena*.”)** That (understanding) is the end of suffering (*Esevanto dukkhassā*” ti.)

My comments:

- **That means it is incorrect to say there is a “self” experiencing those traces of sensory events. Those are just results (*vipāka*) of past *kamma*, i.e., causes bring corresponding results.** We will explain this further with the *Mālukiyaputta Sutta* below.
- **However, the above description may give the impression that everything is deterministic. That is not so, and that will become clear when we address what happens following the initial “vipāka stage.”**
- Many people incorrectly translate “*mattaṃ*” to English as “only.” For example, most current translators translate “*diṭṭhe diṭṭhamattaṃ*” as “seeing is only seeing.”
- *Diṭṭhamatta* means “a snapshot” (literally a “trace of seeing.”). For example, *appamatta* means “insignificant.” “*appa*” means “little” and “*matta*” means “a trace.” *Matta* is “*mātra*” in Sanskrit and “මත්‍ර” in Sinhala. As we discussed in the previous post, the mind (or the *viññāṇa*) gives us the illusion of a continuous sensory experience implying an “experiencer.” That is why the Buddha said that *viññāṇa* is a magician. See #2 of, “[Vision Is a Series of “Snapshots” – Movie Analogy](#).”

Mālukiyaputta Sutta – Same Verse In More Details

9. Those above verses in #8 are also in the “[WebLink: suttacentral: Mālukiyaputta Sutta \(SN 35.95\)](#),” where the Buddha tells *bhikkhu* Mālukiyaputta, “*Ettha ca te, mālukiyaputta, diṭṭhasutamutaviññātabbesu dhammesu diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati. Yato kho te, mālukiyaputta, diṭṭhasutamutaviññātabbesu dhammesu diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati; tato tvaṃ, mālukiyaputta, na tena. Yato tvaṃ, mālukiyaputta, na tena; tato tvaṃ, mālukiyaputta, na tattha. Yato tvaṃ, mālukiyaputta, na tattha; tato tvaṃ, mālukiyaputta, nevidha, na huraṃ, na ubhayamantarena. Esevanto dukkhassā*”ti.

- That is very similar to *Bāhiya Sutta* above. However, now *bhikkhu* Mālukiyaputta recounts what he understood. That is very informative.

***Mālukiyaṭṭa Sutta* – What Happens If One Gets Attached**

10. *Bhikkhu* Mālukiyaṭṭa then says that he understood what the Buddha meant by the above verse. He explains his understanding:

*‘Rūpaṃ disvā sati muṭṭhā,
Piyaṃ nimittaṃ manasi karoto;
Sārattacitto vedeti,
Taṇca ajjhosa tiṭṭhati.*

*Tassa vaḍḍhanti vedanā,
anekā rūpasambhavā;
Abhijjhā ca vihesā ca,
cittamassūpahaññati;
Evaṃ ācīnato dukkhaṃ,
ārā nibbāna vuccati.’*

Translation:

“When one sees a form (*rūpa*) without mindfulness (i.e., without knowing that it is just a trace of “seeing”), one gets attached to that (*nimitta* or *ārammaṇa*),
One experiences it with an infatuated mind (with greed)
And **remains** bound to it.

“Many feelings flourish within,
Originating from the mind thinking about many related *rūpa* (*anekā rūpasambhavā*);
Greed and anger as well
By which one’s mind becomes disturbed;
For one who accumulates suffering thus
Nibbāna is far away.

***Mālukiyaṭṭa Sutta* – What Happens If One Does Not Get Attached**

11. *Bhikkhu* Mālukiyaṭṭa then says the following about how one needs to train oneself to attain *Nibbāna*:

*‘Na so rajjati rūpesu,
rūpaṃ disvā paṭissato;
Virattacitto vedeti,
taṇca nājjhosa tiṭṭhati.*

*Yathāssa passato rūpaṃ,
sevato cāpi vedanāṃ;
Khīyati nopacīyati,
evaṃ so caratī sato;
Evaṃ apacīnato dukkhaṃ,
santike nibbāna vuccati.’*

Translation:

“When one sees a form with mindfulness (with proper understanding)
One is not inflamed by lust for forms;
One experiences it with a dispassionate mind
And does not hold on to it tightly.

“For one acting mindfully in such a way
Without attaching to the form,
Even while one experiencing those feelings;

Suffering is exhausted, not built up
For one not piling up suffering thus,
Nibbāna is near.

Next Post

12. From what *bhikkhu* Mālukiya putta stated above, we can see that it is not correct to say that it is “no-self,” either. After the “*vipāka* stage” that comes with a new *ārammaṇa* is over, it is possible to “take control” of the sensory experience. **That is possible ONLY IF one comprehends that *anattā* nature is involved in the *vipāka* stage.** Without that understanding, one would have *sakkāya diṭṭhi* as the *sutta* points out next.

- **Aside from those who are anxious to see why it is not correct to say that it is “no-self,” either:** At the end of the *vipāka* stage (at the step, “*vedanā paccayā taṇhā*”), a new phase of the sensory experience starts. That is the “*kamma* accumulation” stage. That new phase could last a long time if the mind is firmly attached to that *ārammaṇa*. One may think about more ways of enjoying that *ārammaṇa*, speak about it, and do things to pursue that *ārammaṇa*. **All those are *saṅkhāra*, and they lead to *kamma viññāṇa* via, “*saṅkhāra paccayā viññāṇa*.”**
- However, *Chachakka sutta* starts at the *vipāka* stage (with a sensory experience) and shows how one starts accumulating *kamma* ONLY IF one has *saṅgati* (if one has the corresponding “*saṇ gati*”). See #2 above. That decision to “get attached” is made at the *voṭṭhapana* stage of a *citta vūthi*. See, #15 of [“Avyākata Paticca Samuppāda for Vipāka Viññāṇa.”](#)
- That is what *bhikkhu* Mālukiya putta explained in #10 and #11 above. We will discuss that in detail after finishing the discussion on the *Chachakka Sutta*.
- Details of that “*kamma* accumulation” process will depend on whether one would still have *sakkāya diṭṭhi*. That means one does not realize that there is no “self” or “*attā*” involved in that initial sensory experience due to *kamma vipāka*.
- That is the next verse in the *Chachakka Sutta*, which we will discuss in the post [“Sakkāya Diṭṭhi in Terms of Attā or “Self” or “Ātma”.](#)”

10.2.7 Sakkāya Diṭṭhi in Terms of Attā or “Self” or “Ātma”

October 26, 2019; revised November 1, 2019; October 9, 2022

Summary of *Chachakka Sutta* Up to This Point

1. The *Chachakka Sutta* (MN 148) describes in detail what happens when a new *ārammaṇa* (thought object) comes to the mind. The mind may “attach” (*taṇhā*) to that *ārammaṇa* via greed, anger, or ignorance. Let us briefly summarize those steps. All relevant posts are at, [“Origin of Life.”](#)

- First, depending on the specific internal *āyatana* involved, one of six *vipāka viññāṇa* arises. Those are *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, or *mano viññāṇa*. Such a *viññāṇa* does not create *kammic* energy. It is just “seeing,” “hearing,” “smelling,” “tasting,” “touching,” or “recalling a memory or an idea.”
- **Then the mind “makes contact” with “*saṇ gati*.”** If one has *gati* to attach to that *ārammaṇa* via greed, anger, or ignorance, then the mind GENERATES corresponding *somanassa*, *domanassa*, or *upekkhā vedanā*. They are *samphassa-jā-vedanā* or mind-made *vedanā*.
- The mind “attaches” to that *ārammaṇa* if such a “mind-made” *vedanā* arises. One can attach (*taṇhā*) via greed, hate, or ignorance.
- The keyword *ārammaṇa* was introduced in the post, [“Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.”](#)

The Unique Situation For an *Arahant*

2. Only the first step happens in an *Arahant*. There is no attachment to any *ārammaṇa*. Only the experience of *kāma guṇa* (such as the sweetness of sugar or the bitterness of lemon) is there. See, “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#).”

- However, an *Arahant* would also feel *sārīrika* (bodily) *vedanā* due to injuries, sicknesses, etc. Those are *dukkha*, *sukha*, or *adukkhamasukha vedanā*. Note that an *Arahant* does not experience *somanassa/domanassa vedanā* (*Samphassa-jā-vedanā*) based on those *sārīrika* (bodily) *vedanā*.
- [Note (August 5, 2023): In the previous versions, I had used the term *kāyika vedanā* to represent *vedanā* felt by the physical body. However, “*kāya*” is used in other contexts, too, for example, as “an aggregate.” Furthermore, the following *sutta* specifically used *sārīrika vedanā* to describe the physical pain felt by the Buddha with an injury: “[WebLink: suttacentral: Sakalika Sutta \(SN 1.38\)](#).”]
- Anyone other than an *Arahant* MIGHT attach to a particular *ārammaṇa*. Whether or not that attachment happens depends on the “*saṇ gati*.” It is not that everyone attaches to every *ārammaṇa*.

Deeper Aspects of the *Chachakka Sutta*

3. We also discussed the “deeper aspects” involved in those steps.

- Only one of the six types of *viññāṇa* arises in mind at any moment due to a specific *ārammaṇa*. When we see, do not hear, smell, taste, touch, or think AT THAT BRIEF MOMENT. That is because only one *citta vīthi* focused on one sensory input can be present at any moment. Put another way, **only one *pasāda rūpa* can contact the *hadaya vatthu* (seat of the mind) at a given time**. The mind analyzes that sensory contact with four *citta vīthi* JUST FOCUSED ON that particular sensory input.
- For example, when the mind analyzes a “packet of sound,” it focuses on that sound. The mind DOES NOT and CANNOT see, taste, smell, etc. during that brief time. Thus sensory inputs are analyzed in “packets.” Each “packet” is only one of six possible types (sight, sound, taste, smell, touch, or recall of *dhammā*.)
- We analyzed that in terms of recent findings from modern science. The mind takes “snapshots” of each sensory input separated by about a hundredth of a second (10 milliseconds.) Since that happens very fast, we “feel like” we are “seeing continuously.” That is an illusion created by the mind, just like we perceive a set of snapshots as a continuous movie. See, “[Vision Is a Series of “Snapshots” – Movie Analogy](#).”
- Not only that, but we feel that we are seeing, hearing, tasting, smelling, touching, and thinking simultaneously. But the reality is that the mind receives only one “snapshot” at a time. The mind has the astounding capability to combine “data packets” from the “six doors” without mixing them up!

What is *Ghana Saññā*?

4. The fast mind gives the illusion that there is a “person” or a “self” or an “*attā*” experiencing those sensory events. That incorrect perception is “*ghana saññā*” or a “perception of solidity.”

- I had not used the term “*ghana saññā*” previously. It is a word that describes the illusion that the mind creates by taking a series of “snapshots” and linking them together to provide a “continuous sensory experience.”
- As we discussed, that happens when we watch a movie too. The illusion of continuous motion results in the projection of a series of “static pictures.” See, “[Vision Is a Series of “Snapshots” – Movie Analogy](#).”

5. **Any sensory event is just a brief “snapshot.” It lasts a brief moment and goes to the past. That is the critical point to understand.** Bāhiya understood that point instantly and attained *Arahanthood*. But

he had cultivated the path almost to the end and needed a “little push” to get there. We discussed that in the previous post, “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”

- The mind has the astounding capability to recall preceding “snapshots,” and to put it all together to present a “continuous sensory experience.” That is why the Buddha called *viññāṇa* a magician.

6. We also have a “*ghana saññā*” about our physical body. We perceive our bodies as solid, but as I have explained in a previous post, our bodies are “mostly empty.” That is because those atoms and molecules which make up our bodies are mostly empty. see, #7 – #10 of the post, “[Mystical Phenomena in Buddhism?](#)”

- I keep summarizing the discussion since there is a lot of material embedded in those verses. Now, let us discuss the next verse in the *sutta*.

Next Verse in the *Chachakka Sutta – Sakkāya Samudaya*

We have discussed up to the verse which ends with, “*Iti mano anattā, dhammā anattā, manoviññāṇam anattā, manosamphasso anattā, vedanā anattā, taṇhā anattā*.” Now we are getting to the critical conclusion reached from those earlier verses.

7. The next verse in the *sutta* starts with, “*Ayaṃ kho pana, bhikkhave, sakkāyasamudayagāminī paṭipadā—cakkhuṃ ‘etaṃ mama, esohamasmi, eso me attā’ ti samanupassati; rūpe ‘etaṃ mama, esohamasmi, eso me attā’ ti samanupassati; ...*”

- *Sakkāya* here refers to *sakkāya diṭṭhi*. *Samudaya* (“*saṃ*” + “*udaya*”) means “arising (due to) *saṃ*.” *Gāmini* means “path.” *Patipada* means an “action plan” or simply one’s behavior. Thus, *sakkāyasamudayagāminī paṭipadā* means, “the behavior that leads to the arising of *sakkāya diṭṭhi*.”
- Then it says, *sakkāya diṭṭhi* arises because one believes that “*cakkhu* is mine, *cakkhu* is what I am, *cakkhu* is my “self.”
- The *sutta* then repeats that for all other five entities associated with “seeing.” They are *rūpa*, *cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, and *taṇhā* (that results from *cakkhu samphassa-jā-vedanā*.)
- Then it is repeated for the other five internal *āyatana*: *sota*, *ghāṇa*, *jivhā*, *kāya*, *mano*.

Re-cap on the Initial Sensory Experience Due to *Kamma Vipāka*

8. All our discussions on the first half of the *sutta* led to the CRITICAL conclusion in the above verse. In simple terms, “there is no EXPERIENCER” experiencing those initial sensory inputs. As we remember, those INITIAL sensory inputs come in as *kamma vipāka*.

- Let me emphasize this point. Any sensory experience starts without direct initiation by the “experiencer.” For example, one FIRST sees an object via “*cakkhuṃ ca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*.” But that does not happen by chance. It is ALWAYS a *kamma vipāka*.
- A *kamma vipāka* experienced through the physical body (*kāya*) can be comforting (*sukha*), painful (*dukkha*), or neutral (*adukkhamasukha*). For example, one gets to lie on a comfortable bed due to a good *kamma* done in the past. A bad *kamma* done in the past leads to an injury. Both happen via “*kāyaṃ ca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇam*.”

9. All other INITIAL sensory EXPERIENCES START with *adukkhamasukha vedanā*. We see, hear, smell, taste, or a thought comes to the mind. The last one is, “*manāṃ ca paṭicca dhamme ca uppajjati manoviññāṇam*.” All those generate *adukkhamasukha vedanā* (neutral feeling).

- **However, based on all six initial sensory contacts, we may instantly generate *somanassa* or *domanassa vedanā* due to *kāma guṇa*.** For example, it is natural for a human (including *Arahants*) to experience an appealing taste when tasting sugar or seeing an attractive person.
- Based on those are “mind-made” feelings or “*samphassa-jā-vedanā*.” They are different from *dukkha/sukha vedanā* associated with sensory contacts with the body (*kāya*.)
- Now, based on such ***somanassa* or *domanassa vedanā* due to *kāma guṇa***, an average human MAY generate ***samphassa-jā-vedanā***. That will happen IF the mind “get stuck” (*taṇhā*) on that sensory input. Of course, an *Arahant* WILL NOT generate those ***samphassa-jā-vedanā***.
- That was discussed in, “[Kāma Guṇa – Origin of Attachment \(Taṇhā\)](#).”

Taṇhā* Leads to *Upādāna* via *Paṭicca Samuppāda

10. That is a critical step in *Paṭicca Samuppāda*, not discussed in the *Chachakka Sutta*. That *sutta* explains only the *KAMMA VIPĀKA* stage. That step of “*taṇhā paccayā upādāna*” starts the “new *kamma* GENERATION” process.

- I hope you can see that ALL of our *kamma* generation activities start when a new *ārammaṇa* comes to mind. That starts with the “*salāyatana paccayā phasso*” step in the *Paṭicca Samuppāda* cycle. It is the “*taṇhā paccayā upādāna*” step that starts a new *Paṭicca Samuppāda* cycle with “*avijjā paccayā saṅkhāra*.”
- That is a CRITICAL point. I will take the time to explain this “*taṇhā paccayā upādāna*” step. That way, one can get insights into how *Paṭicca Samuppāda* operates. Then one can begin to get an idea of the importance of understanding key concepts of Buddha Dhamma.

A New *Paṭicca Samuppāda* Process Starts Only if One Starts Acting with *Avijjā*

11. Next, The *Chachakka Sutta* states the REASONS why a given person may START to going through the *kamma* generation stage starting with *avijjā*. See, “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”

- **One would pursue a given *ārammaṇa* (the sight, sound, etc.) ONLY IF one perceives that it is worthwhile or beneficial to him or her.** That perception comes from the wrong view that those sensory experiences are one’s own. As we discussed, that wrong view is *sakkāya diṭṭhi*.
- One with *sakkāya diṭṭhi* does not realize that those experiences are just results of causes from the past. That they are *kamma vipāka*. Then one tries to get control of the situation by either trying to maintain a “good experience” or avoid a “bad experience.” **Therefore, it is POSSIBLE for ANYONE with *sakkāya diṭṭhi* to go through the “*taṇhā paccayā upādāna*” step.**
- However, a *Sotāpanna* (who has removed *sakkāya diṭṭhi*) may still do immoral deeds. A *Sotāpanna* would NOT do *apāyagāmī* deeds. But he/she may still do less-strong immoral deeds. That is because a *Sotāpanna* still has wrong perceptions (*viparita saññā*.) **At the *Arahant* stage, one would have removed both wrong views and perceptions.** I will explain this in a future post after concluding the discussion on the *Chachakka Sutta*.

12. **However, not everyone with *sakkāya diṭṭhi* will go through the “*taṇhā paccayā upādāna*” step.** Different people “attach” to different types of *ārammaṇa*.

- For example, if a beautiful woman starts working at a workplace, everyone will see her as beautiful. But only a few will get “attached” and start thinking about asking her for a date. There could even be a person who may “fall in love head over heels” at first sight of her.
- That is why we cannot say there is “no-self” either. Until one attains *Arahanthood*, there will be a “dynamic self” who gets attached to some things in this world. I say a “dynamic self” because there is no “fixed self” in the sense of a soul or a “*ātma*.” See “[What Reincarnates? – Concept of a Lifestream](#).”

Attachment (*Taṇhā*) Can Happen Due to Greed, Anger, or Ignorance

13. In the above example, we discussed getting attached to the sight of a beautiful woman. But as we have discussed, one can “attach” to a *ārammaṇa* via anger or ignorance.

- Seeing an enemy, one will instantly generate anger in mind via the steps in the *Chachakka Sutta*. Here, the *samphassa-jā-vedanā* generated is a *domanassa vedanā*. It is a stressful *vedanā*. But still one “attaches” to that *ārammaṇa*, and will start making bad *vacī saṅkhāra* (i.e., conscious thoughts of anger) in mind.
- On the other hand, the *samphassa-jā-vedanā* generated in the example discussed in #12 above (upon seeing a beautiful woman) is a *somanassa vedanā*. That person is “attached” via greed.
- In some situations, there could be confusion on how to respond to a *ārammaṇa* and still get “stuck.” That is due to *avijjā*.

Taṇhā Leads to *Upādāna* Depending on One's Level of *Avijjā*

14. Having one or more of the following views leads to *sakkāya diṭṭhi*.

- The physical body (*kāya*) is mine, it is what I am, and it is my “self.” Furthermore, all associated bodily functions are mine; they are what I am and my “self.” Those are: seeing or *cakkhu*, hearing or *sota*, tasting or *jivhā*, smelling or *ghāṇa*, touching or *kāya*, and thinking or *mana*. See #6 above.
- Then one also tends to associate some external *rūpa* the same way. Those are *rūpa rūpa* (or *vaṇṇa rūpa* or simply *rūpa*), *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, and *dhamma rūpa* or *dhammā*. For example, “this is my house; my song; this is my cake; my favorite scent; my comfy bed; these are my thoughts.”
- One may also perceive that all of one's mental aspects (*cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, and *taṇhā*) are all one's “self.” Of course, the same with other mental aspects associated with other sense faculties. There are 36 (6 X 6) such entities that the *sutta* lists. See, [“Chachakka Sutta – Six Types of Vipāka Viññāṇa.”](#)

Pañcupādānakkhandhā as *Sakkāya Diṭṭhi*

15. Those 36 entities are also known as “*pañcupādānakkhandhā*.” Here, *Pañcupādānakkhandhā* comes from “*pañca*” + “*upādāna*” + “*khandha*” or the five aggregates, to which one gets attached. See [“Chachakka Sutta – Six Types of Vipāka Viññāṇa.”](#)

- If you carefully look at those 36 entities, they include *rūpakkhanda*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and the *viññāṇakkhandha*. However, one does not consider all of those to be “mine.” For example, out of all the houses in this world, one may claim to own one or a few homes. Out of all humans, one may have a set of people that one considers “mine.” For example, my parents, wife, children, friends, etc.
- Therefore, only a tiny fraction of the *pañcakkhandha* one has “attachments to.” Those attachments can vary from very strong (my body is the strongest) to decreasing levels for friends, neighbors, etc.
- Thus, *pañcupādānakkhandhā* is a small fraction of the *pañcakkhandha*.
- The [“WebLink: suttacentral: Sakkāyapañhā Sutta \(SN 38.15\)”](#) DEFINES *sakkāya* as *pañcupādānakkhandhā*: “*Sakkāyo, sakkāyo'ti, āvuso sārīputta, vuccati. Katamo nu kho, āvuso, sakkāyo'ti? “Pañcime, āvuso, upādānakkhandhā sakkāyo vutto bhagavatā, seyyathidaṃ—rūpupādānakkhandho, vedanupādānakkhandho, saññupādānakkhandho, saṅkhārupādānakkhandho, viññāṇupādānakkhandho. Ime kho, āvuso, pañcupādānakkhandhā sakkāyo vutto bhagavatā”ti.*”

Other Ways of Describing *Sakkāya Diṭṭhi*

16. It is possible to describe *sakkāya diṭṭhi* in somewhat different ways. However, all of those are inter-consistent. The following posts discuss some of those. Please let me know if you find any inconsistencies (lal@puredhamma.net) or we can discuss it at the discussion forum.

- [Sakkāya Diṭṭhi is Personality \(Me\) View?](#)
- [Sakkāya Diṭṭhi and Tilakkhana](#)
- [Sakkāya Diṭṭhi – Getting Rid of Deeper Wrong Views](#)

Wrong Views of *Nicca* and *Sukha* Lead to the Wrong View of *Attā*

17. **One gets attached to things one perceives to be *nicca* and *sukha*.** *Nicca* (pronounced “nichcha”) means we believe we can keep them in the way we want or like. *Sukha* means we think we will be happy by getting “ownership” of them.

- Then one takes “ownership” of them. One considers those to be “one’s own” or “*attā*.” That attachment can vary from very strong to less intense. One’s own body and mental qualities (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* regarding one’s own body) give the strongest sense of *attā*.
- Then comes one’s spouse, children, house, cars, etc., relatives and friends, etc.
- Therefore, the hardest thing to remove is the sense of *attā* about one’s body.
- IT CANNOT be removed by willpower. It comes only from understanding this world’s *anicca*, *dukkha*, and *anatta* nature. What we discussed up to now plays a significant role in that understanding. There is no “experiencer.” A sensory input comes in as a result (*kāma vipāka*) of a previous cause (*kamma*.)

10.2.8 An Apparent “Self” Is Involved in Kamma Generation

November 2, 2019; revised November 6, 2019; September 10, 2022; October 14, 2022 (#18); February 3, 2023

Introduction

1. Here, we will discuss why someone with *sakkāya diṭṭhi* believes in a “self” (knowingly or unknowingly) and **accumulates *kamma* with that wrong view.**

- In previous posts in this series, we discussed why there is no “Experiencer.” Thus, there is no need for the existence of a “self” to describe an INITIAL sensory experience.
- However, anyone with *sakkāya diṭṭhi* has the wrong view of a “self” experiencing sensory inputs. Based on that mistaken view, steps are taken to maintain a “good experience” or to stop a “bad experience.” Therefore, we could say there is a wrong view of a “Doer” as long as there is *sakkāya diṭṭhi*. **That is why it is incorrect to say that there is “no-self” either.**
- That does not mean we do not need to take action to prevent bad outcomes. The key idea is to realize the unfruitfulness of doing immoral deeds (including conscious thoughts and speech) in response to sensory inputs.
- The *Chachakka Sutta* (MN 148) describes in detail what happens when a new *ārammaṇa* (thought object) comes to the mind. **The mind may “attach” (*taṇhā*) automatically** to that *ārammaṇa* via greed, anger, or ignorance. Let us briefly summarize those steps. It is critical to follow these steps. All relevant posts are at “[Worldview of the Buddha](#).” The main subsection is “[Origin of Life](#).”

Posts on the Background Material

2. In earlier posts, we discussed that INITIAL sensory experiences DO NOT require a “self.” However, they do not happen arbitrarily or randomly either. Those sensory experiences have causes (or reasons); they are *kamma vipāka*.

- Some *kamma vipāka* bring in suffering, such as injuries, sickness, etc., while other *vipāka* results in pleasurable experiences, such as good food, comfortable living, etc. Those are ALL experienced via the physical body (*kāya*.) They are NOT illusions. There is real suffering (and some pleasures too.)
- All other INITIAL sensory experiences do not DIRECTLY lead to pain or pleasure. Seeing, hearing, smelling, tasting, and recalling memories are “neutral” sensory experiences at that moment.

3. However, based on those sensory inputs, *somanassa* or *domanassa vedanā* arise automatically in mind. Those are “mind-generated” *vedanā* based on “*kāma guṇa*.” All humans (including *Arahants*) experience the sweetness of sugar or bitterness of some medicines. These are not “*samphassa-jā-vedanā*.” However, for others, “*samphassa-jā-vedanā*” arise due to such *somanassa* or *domanassa vedanā*. See “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#).”

- Thus, based on *somanassa* or *domanassa vedanā* due to “*kāma guṇa*,” a given person may attach (*taṇhā*) to that particular sensory event (*ārammaṇa*) and generate *samphassa-jā-vedanā*. Only an *Arahant* is guaranteed not to attach.
- That is the summary of about a fourth of the Pāli text in the *Chachakka Sutta* (MN 148). That completes the six sets of six.

No “Self” Involved in the Initial Sensory Experiences

4. As we have discussed, the next verse in the *sutta* is, “*Cakkhu attā’ti yo vadeyya taṃ na upapajjati. Cakkhussa uppādopi vayoṇi paññāyati. Yassa kho pana uppādopi vayoṇi paññāyati, ‘attā me upapajjati ca veti cā’ti iccassa evamāgataṃ hoti. Tasmā taṃ na upapajjati: ‘cakkhu attā’ti yo vadeyya. Iti cakkhu anattā.*”

Loosely translated: “If anyone says, ‘*cakkhu* is self,’ (or “seeing” is mine or “it is I who sees”) that is not tenable. **An arising and ceasing of *cakkhu* (not the physical eye) is evident.** If *cakkhu* is ‘self,’ that would imply the following: ‘my self arises and ceases’ OR ‘I come into being momentarily and cease to exist.’ **That is why one cannot argue that ‘*cakkhu* is self.’** Thus *cakkhu* is ‘not-self’ or ‘*anattā*.” (“*na attā*” for “not *attā*” rhymes as “*anattā*,” just as “*na āgāmi*” rhymes as “*Anāgāmi*.”)

- Then the next fourth of the Pāli text in the *Chachakka Sutta* (MN 148) states that the above conclusion holds for all 36 entities (“six sets of sixes”) involved in the initial sensory experience. Six **internal āyatana**, six **external āyatana**, six classes of (***vipāka***) *viññāṇa*, six classes of ***phassa***, six classes of ***vedanā***, six classes of ***taṇhā***.
- See, “[Chachakka Sutta – Six Types of Vipāka Viññāṇa](#)” for details on that.
- Then we discussed the following verse in the *sutta* starting with, “*Ayaṃ kho pana, bhikkhave, sakkāyasamudayagāminī paṭipadā.*”

Attā Translated as “Self” Is Not Correct

5. The Pāli word “*attā*” does not mean “self,” even though I used that translation above. That translation is quite common these days. **We will go with that until we finish discussing *Paṭicca Samuppāda* because it does help to get the idea of *sakkāya diṭṭhi* across below.** If I try to discuss the real meaning of *attā* right now, that could lead to confusion.

That is why the Buddha refused to answer Vaccagotta’s question about whether or not there is an “*attā*.” See “[WebLink: suttacentral: Ānanda Sutta \(SN 44.10\)](#).”

- Vacchagotta comes to the Buddha asked “*kiṃ nu kho, bho gotama, atthattā ti?*” OR “Master Gotama, is it correct to say that there is an “*attā*”?”.
- Note that “*atthattā*” is “*atthi attā*” where “*atthi*” means “exists.” Vacchagotta meant in this case “*attā*” to be “self.” Thus, Vacchagotta meant: “Is it correct to say that a “*self*” exists?”
- The Buddha remained silent, and Vacchagotta asked the question in the negative form. The second time, he asked: “*Kiṃ pana, bho gotama, natthattā ti?*” or, “Master Gotama, is it **not** correct to say that there is a “*self*”?”. The Buddha refused to answer his question, so Vacchagotta got up and left.
- Note that “*natthattā*” is made up of three words: “*na atthi attā*,” which negates “*atthattā*.” Just as these days, many people are confused about the Pāli word “*attā*” and the Sanskrit word “*ātma*.” The latter meaning is closer to a “soul”
- I will discuss this *sutta* when I will discuss “*attā*” in detail, after discussing *Paṭicca Samuppāda*. By the way, Vacchagotta understood the concept later on and became an *Arahant* too.

The Origin of the Wrong View of *Sakkāya Diṭṭhi* – *Sakkāya Samudaya*

6. The *sutta* then states that the wrong view of *sakkāya diṭṭhi* arises BECAUSE one does not realize the above facts. Without knowing those facts, one tends to BELIEVE that a “self” is experiencing those first sensory events.

- Then, if it were a “good experience,” one would try to maintain that pleasant experience and also plan to experience it again in the future. In the case of a “bad experience,” one would do the opposite to avoid such “bad experiences.”
- The more one engages in either activity, the wrong VIEW of a “self” (*sakkāya diṭṭhi*) grows.

7. That explanation is in a short verse starting with, “*Ayaṃ kho pana, bhikkhave, sakkāyasamudayagāminī paṭipadā—cakkhuṃ ‘etaṃ mama, esohamasmi, eso me attā’ ti samanupassati; rūpe ‘etaṃ mama, esohamasmi, eso me attā’ ti samanupassati; ...*”

- We discussed this verse in detail in the last post, “[Sakkāya Diṭṭhi in Terms of Attā or ‘Self’ or ‘Ātma](#).”
- So far I have summarized the discussion up to now. Now, we can discuss the next verse of the *sutta*.

Next Verse in the *Chachakka Sutta* – *Sakkāya Nirodhaya*

The verse in #7 above explains how *sakkāya diṭṭhi* ARISES. The new verse below explains HOW *sakkāya diṭṭhi* WILL STOP FROM ARISING.

8. The next verse in the *Chachakka Sutta* (MN 148) starts with, “*Ayaṃ kho pana, bhikkhave, sakkāyanirodhagāminī paṭipadā—cakkhuṃ ‘netam mama, nesohamasmi, na meso attā’ ti samanupassati. Rūpe ‘netam mama, nesohamasmi, na meso attā’ ti samanupassati...*”

The word *Nirodha* comes from “*nir*”+“*udaya*,” where “*nir*” means to stop and “*udaya*” means “arise.” Thus *nirodha* means to prevent something from arising.

- *Gāmini* means “path.” *Paṭipadā* means an “action plan” or one’s behavior. Thus, *sakkāyanirodhagāminī paṭipadā* means, “the behavior that leads to STOPPING the arising of *sakkāya diṭṭhi*.”
- Then it says, that will happen when one “SEES” that “*cakkhu* is NOT mine, *cakkhu* is NOT what I am, *cakkhu* is NOT my “self.” Here, “*netam*” means “*na*” + “*etaṃ*” or “it is not.”
- That is because, in reality, there is no “self” or a “soul” or a “*ātma*” that is associated with a living being. The sensory experiences arise due to past causes. Yet, we cannot explain the response of an average human to those sensory experiences without the assumption of a “self.” The response of an average

human to such sensory inputs can only be explained by taking into account his/her mindset of believing in a “self.”

- (Once we discuss *Paṭicca Samuppāda*, it will become clear why future suffering arises BECAUSE of that wrong view of *sakkāya diṭṭhi*. **That is how *sakkāya diṭṭhi* can be removed. Only then can we also understand the real meaning of *atta/attā* (and *anatta/anattā*).** I do not want to get into that issue right now because that will confuse many people.)

9. The *sutta* repeats that for all other five entities associated with “seeing.” They are *rūpa*, *cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, and *tanhā* (that results from *cakkhu samphassa-jā-vedanā*.)

- Then it is repeated for the other five internal *āyatana*: *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano*. Please go through those verses.
- **However, it may NOT be easy to “see” that no “self” is involved in sensory experiences.** We have had the wrong view of *sakkāya diṭṭhi* virtually forever! That is why we are in this never-ending rebirth process.
- **To remove that strong *diṭṭhi*, we need to see the “true nature,” i.e., we need to cultivate “*yathābhūta ñāṇa*.”** A big part is realizing that there is no “experiencer,” as we have discussed in detail using the movie analogy. There are only causes and results. But, of course, the feelings are real; any suffering is real. But those results are according to the causes AND conditions at the time of bringing the results. That is *Paṭicca Samuppāda*. See, “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”
- We will focus on that in detail in upcoming posts. However, this *sutta* briefly states the primary process.

Sakkāya Nirodhaya Starts With Vedanā

10. The key to arriving at that UNDERSTANDING is stated in the following verse of the *sutta*, starting with, “*Cakkhuñca, bhikkhave, paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassapaccayā uppajjati vedayitaṃ sukhāṃ vā dukkhāṃ vā adukkhamasukhāṃ vā.*”

Translated: “*Bhikkhus*, dependent on the eye and forms, eye-consciousness arises; then the mind makes contact with “*saṅ gati*”; that contact with “*saṅ gati*” leads to the arising of “mind-made” feelings **felt as** pleasant or painful or neither-painful-nor-pleasant.”

- Regardless of the sense faculty, those “mind-made” *vedanā* or “*samphassa-jā-vedanā*” CAN ARISE based on *kāma guṇa* AND one’s *gati*.
- We discussed this part of the verse already in the posts, “[Indriya Make Phassa and Āyatana Make Samphassa,](#)” “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event,](#)” and “[Kāma Guṇa – Origin of Attachment \(Tanhā\).](#)”

Getting Attached to *Vedanā* Leads to the Growth of *Anusaya*

11. Then the subsequent verses introduce a critical word, *anusaya*. Based on *sukha vedanā*, *dukkha vedanā*, and *adukkhamasukha vedanā*, three corresponding types of *anusaya* result: *rāgānusaya*, *paṭighānusaya*, and *avijjānusaya*.

- Let us start with the verse that explains the origins of *rāgānusaya*: “*So sukhāya vedanāya phuṭṭho samāno abhinandati abhivadati ajjhosāya tiṭṭhati. Tassa rāgānusayo anuseti.*”
- **Translated:** “When one experiences a *sukha vedanā*, if one delights in it, welcomes it, and thinks and speaks highly of it, gets absorbed in it, then the underlying tendency for *rāga* (*rāgānusaya*) gets stronger (i.e., *rāgānusaya* will grow).”
- Here, *rāgānusaya* comes from “*rāga*” + “*anusaya*.” Now we need to get an idea about the meaning of *anusaya* first.

What is *Anusaya*?

12. *Anusaya* is usually translated as “**latent tendencies**.” That does give the basic idea. Such “latent tendencies are in our *gati*. *Anusaya* and “*gati*” are closely related. See, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\)](#)” and “[Āsava, Anusaya, and Gati \(Gathi\)](#).”

- Everyone has a set of *gati* (habits/character qualities). Each person has his/her own set of things/activities that she likes and dislikes. Some of these are not moral or immoral.
- But we also have moral (ethical) *gati* and corrupt (bad) *gati*. Here moral/immoral have a wide range, and we will discuss that later. But those deeds have *kammic* consequences. Those are the *gati* that are relevant.

13. **By the way, notice that now we are talking about a “person” or a “self” who has *sakkāya diṭṭhi* (and *gati* and *anusaya*)!** That is why it is incorrect to say that there is “no-self” either.

- When we keep doing what we are used to, that habit will only GROW. That also means *anusaya* will grow and that growth due to the activity is “*anuseti*.”
- *Arahants* do not have moral/immoral *gati* but *kammically* neutral *gati* (habits). Such practices include doing things in specific ways.

Rāga Anusaya Grows by Getting Attached to Mind-Made *Sukha Vedanā* or *Somanassa Vedanā*

14. What the *sutta* states in verse #10 are the following. When a “pleasing *ārammaṇa*” comes to the mind, it may delight in that *ārammaṇa*. If so, it will welcome that *ārammaṇa* and “get absorbed in it.” That means the person would think highly about it, speak highly about it, and act on it to sustain that *ārammaṇa*.

- For example, if X sees an object that X likes, X will keep looking at it and start thinking about how good it is. X may tell another how good it is. Even later on, X may plan to experience that sight again. Those activities involve *vacī* and *kāya saṅkhāra*.
- That is how the *Paṭicca Samuppāda* starts with “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.”
- Here, *avijjā* is the ignorance of believing that there is a “self” experiencing that sensory input.

Those *Viññāṇa* Are *Kamma Viññāṇa*

15. We remember that there could be six types of *viññāṇa* in the INITIAL sensory event that takes place due to *kamma vipāka*. Those are *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, or *mano viññāṇa*. They are ALL *vipāka viññāṇa*, which makes one aware of the sensory input.

- **However, *viññāṇa* in “*saṅkhāra paccayā viññāṇa*” generates *kamma viññāṇa*.** Such *saṅkhāra* are specifically *abhisāṅkhāra*. Such *kamma viññāṇa* can ONLY be *mano viññāṇa*, i.e., they involve only the mind. They have embedded energy because that person has decided to take further steps to enjoy that sensory experience again and again.
- In the *Abhidhamma* language, *saṅkhāra* have *javana* power. They create *kammic* energy for that *kamma viññāṇa*.
- In other words, that “person” has to spend time and effort to enjoy that sensory experience again. He has now created a “*kamma bīja*” or expects a specific outcome.

16. For example, if a person X saw and “attached” to an expensive item in a store, X would talk about it with the spouse and make plans to come up with the money to pay for it. Until X buys that item, that “*viññāṇa*” will be there. The critical point here is that X already HAD a *rāga anusaya* for it, and by engaging in those follow-up activities, X “added” more energy to that. That addition is “*anuseti*.”

- Different people have different types of *anusaya*. That is why not everyone attaches to a given *ārammaṇa*. Furthermore, each person's levels of *anusaya* CAN change with time. That *anusaya* can be REMOVED too, which is the way to *Nibbāna*.
- As you can imagine, the other two types of *anusaya* will “build up” the same way. With a “bad” *ārammaṇa*, *dosa* or anger arises, and *paṭighānusaya* (*paṭigha anusaya*) strengthens.
- Finally, the *avijjānusaya* (*avijjā anusaya*) builds up when acting with *avijjā*. We will discuss more of that in the next post.

Difference Between *Diṭṭhi Vipallāsa* and *Saññā Vipallāsa*

I do not want to leave this post without clarifying the following point.

17. In the discussion forum at puredhamma.net, a legitimate question was asked: “Since a *Sotāpanna* has removed *sakkāya diṭṭhi*, why is that a *Sotāpanna* would still value sensory pleasures, and may even commit some immoral deeds?”

- As we know, a *Sotāpanna* is incapable of doing ONLY “*apāyagāmi*” deeds that could lead to rebirths in the *apāyā* (plural of *apāya*.)
- There is a difference between “SEEING” (*diṭṭhi*) the real nature of this world and having corresponding PERCEPTIONS (*saññā*) about that real nature. It is essential to understand what is meant by *saññā*; see “[Saññā – What It Really Means.](#)”
- The Pāli word “*vipallāsa*” means “confusions” or “distortions.” Wrong views lead to *diṭṭhi vipallāsa* and wrong perceptions lead to *saññā vipallāsa*. More details at “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”
- With that terminology, a *Sotāpanna* has removed *diṭṭhi vipallāsa* but still has *saññā vipallāsa*.

18. In other words, the wrong views about a “self” (*sakkāya diṭṭhi*) go away at the *Sotāpanna* stage. But the perception of a “self” (*asmi māna*) goes away in stages and disappears only at the *Arahant* stage.

- *Saññā vipallāsa* goes away at the *Anāgāmi* stage, and *citta vipallāsa* (together with *asmi māna*) is removed at the *Arahant* stage. See “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”
- That is also why we CAN NOT say that “there is no-self.” Until the attainment of *Arahanthood*, there is a perception of a “self.”
- The critical point is that It is wrong to approach the analysis of sensory experiences based on a “self” or “no-self.” **Instead, we can explain everything regarding causes and effects or *Paṭicca Samuppāda*.**
- Then it will also become clear that the Pāli word “*attā*” does not really mean a “self” or a “soul” or a “*ātma*.”

XI Dhamma and Philosophy

- [Dhamma and Philosophy – Introduction](#)
- [Philosophy of the Mind](#)
- [Is Buddha Dhamma \(Buddhism\) a Religion?](#)
- [The Infinity Problem in Buddhism](#)
- [Free Will in Buddhism – Connection to Saṅkhāra](#)
- **Subsection:** [Book Reviews](#)
 - [““Why Does the World Exist?” by Jim Holt”](#)
 - [““Waking Up” by Sam Harris”](#)
 - [““The Language of God” by Francis Collins”](#)
 - [““Spark” by John Ratey”](#)
 - [““The Life of the Buddha” by Bhikkhu Ñānamoli”](#)

11.1 Dhamma and Philosophy – Introduction

1. One may ask the question: “What does Buddhism have to do with philosophy?”

The Merriam-Webster online dictionary defines philosophy as:

- the study of ideas about knowledge, truth, the nature and meaning of life, etc.
- a particular set of ideas about knowledge, truth, the nature and meaning of life, etc.
- a set of ideas about how to do something or how to live

Other dictionaries and books define philosophy in a similar manner.

2. The origin of the word “philosophy” comes from the Greek words “phila” (meaning love) and “sophia” (meaning wisdom). Thus philosophy is “love of wisdom”. It is said that Pythagoras (570 BCE) coined the term, and that is basically the time the Western philosophers started looking for “natural explanations” instead of accepting that a Creator needed to be invoked to explain phenomena that we see around us.

- This method of “acquiring knowledge” was supposed to be based on reason, argument, and observation. **But as we discuss at this website, any knowledge gained by that method is necessarily limited, because we have senses faculties that are very limited, and whatever deductions we make with unpurified minds are faulty and incomplete;** see, “[Dhamma and Science](#)” section for an introduction. Science actually branched off from philosophy, first as “natural philosophy”.
- Therefore, Buddha Dhamma has a lot to say about philosophy, even though there is no such thing as “Buddhist philosophy”; there is only “Buddha Dhamma” which describes the nature. The Buddha did not speculate on anything like philosophers. He said he experienced everything that he taught. One time a *Brahmin* asked the Buddha whether he believed *devas* and hell beings exist. The Buddha said he KNOWS they exist and could see those beings.
- Buddha Dhamma can sort out the philosophical arguments that have gone back to the Buddha’s time (in the Western world); philosophical views have evolved over the intervening time, but Buddha Dhamma has not. Ironically, “the pure form of Dhamma” had been left out of the discussion mainly because “Mahāyāna forefathers” like Nagarjuna, Asanga, and Vasabandhu made up a “Buddhist philosophy”.

3. **Since Buddha Dhamma is a complete set of nature laws only for its faithful followers, it is logical to present it as a philosophy to those who are not familiar with it or who have not seen enough evidence to believe that claim.** In presenting Buddha Dhamma as a philosophy the second definition is a more valid one, because these are not evolving ideas; rather, they were laid down 2500 years ago, and have been documented in the *Tipiṭaka*, the Pāli Canon.

- It is a set of ideas about knowledge and truth not only about human existence, but ALL that exists in the seen and unseen parts of “this world”, which also encompasses not only the Solar system, but an infinite number of such planetary systems.
- This may sound as an arrogant claim, but it is not. One could scan different sections of this site and see that there is a complete theory about the whole existence; it may take another year or more to get even the “basics” of the Dhamma published. As of mid-2015, I have not yet been able to present even a fraction of the Abhidhamma material.

4. My basic incentive for creating this section is to make a request to the philosophy community: It is time to take a close look at Buddha’s world view, and see how it compares with existing philosophical arguments on various topics. No one has done a serious study on the worldview of the Buddha.

- It has been difficult to make a true assessment of what the “real Buddha Dhamma” is, because there are so many different versions out there.

- I hope to make a logical presentation to convince the philosophy community. Please make any comments/requests, and I will try to address any serious request.

5. Perhaps as important, I want anyone reading the site to appreciate the significance of what the Buddha told us 2500 years ago. Compared to the pure Dhamma, all philosophical theories are at very early stages. Any interested reader can learn about the current philosophical arguments (and those going back to the early Greek philosophers) and then compare with Buddha Dhamma presented at this site.

6. Within the framework of the Buddha Dhamma all standard philosophical questions have been answered.

- These include, “the relation between the brain and mind”, “the nature of death”, “whether we have free will”, etc. Thomas Nagel’s short book listed below gives an introduction to some of such topics.
- Most existing literature on Buddhist philosophy says some of these questions are in the category of “questions that the Buddha refused to answer”, which itself is an incorrect statement; see, [“Misconceptions on the Topics the Buddha ‘Refused to Answer’](#). The Buddha refused to answer questions posed by a person who was not capable of comprehending the answers. But he has given the answers in other places.
- We will discuss how Buddha Dhamma provides answers to these philosophical questions one by one, as sufficient background material is added to site.

REFERENCES

For those who are interested on the subject, here are some references (both for philosophy in general and also on “Buddhist philosophy”; not in any particular order). Among those on “Buddhist philosophy”, I have not read a single book that provides a true description of the Buddha’s world view.

For those who are not familiar with the subject, I would recommend the first two introductory books on philosophy:

“What does it all mean?” by Thomas Nagel (1987) – Excellent introductory book and only 100 pages.

“The Making of a Philosopher”, by Colin McGill (2003) – Another excellent introductory book.

“Buddhist Philosophy – Essential Readings”, ed. by William Edelglass and Jay L. Garfield (2009).

“Mahāyāna Buddhism: The Doctrinal Foundations”, by Paul Williams (2009)

“Buddhism as Philosophy”, by Mark Siderits (2007).

“Buddhist Philosophy – A Historical Analysis”, by David J. Kalupahana (1976).

“Causality: The Central Philosophy of Buddhism”, by David J. Kalupahana (1975).

“A History of Buddhist Philosophy”, by David J. Kalupahana (1992).

“Nagarjuna – The Philosophy of the Middle way”, by David J. Kalupahana (1986).

“Causality and Chance in Modern Physics”, by David Bohm (1957).

“Conversations on Consciousness”, by Susan Blackmore (2006) – input from a number of philosophers.

“Mind – A Brief Introduction”, by John R. Searle (2004).

“The Character of Consciousness”, by David J. Chalmers (2010).

“Consciousness Explained”, by D. C. Dennett (1991).

“The Quest for Consciousness: A Neuroscientific Approach”, by C. Koch (2004).

“Rocks of Ages: Science and Religion” by Stephen Jay Gould (2002).

“The Self and Its Brain”, by Karl R. Popper and John C. Eccles (1977).

Next, “[Philosophy of the Mind](#)”,

11.2 Philosophy of the Mind

1. One nice thing about Buddha Dhamma is that there are no separate theories for the mind, meaning of existence, the physical world, or ANYTHING in this world. Thus I can refer to the section on “[Buddha Dhamma](#)” when I talk about the mind, the same way I refer to that section when I discuss “[Dhamma and Science](#).”

2. There seems to be three basic problems that the philosophers are trying to tackle regarding the mind (there are many others, but let us start with these):

- How does the mental experience arise in a physical body? Most scientists and philosophers say that it originates in the brain, but they have not been able to make the connection. This is the “mind-body problem”.
- How can non-physical mental states of consciousness cause something in the physical world? For example, how can your intention ever cause a movement of your hand? This is the “problem of mental causation”. Yet, the case for “physicalism” — that everything in this world is matter-based — is made with this as a premise.
- Finally, how your thoughts refer to something that is happening (or happened) in a distant city? This is called the “problem of intentionality”. If you are thousand miles away from home, you can take “tour” of the home, room by room, in your mind.

3. The philosophers are divided into two camps in addressing the above problems:

- One camp says the “physical” and “mental” are two distinct realms. They do not think “mental” can arise from ‘physical’; This camp is mostly religious and attribute the “mental” to the concept of a “soul”. They are “dualists”.
- The other camp is ‘materialistic’: they say the ‘mental’ arises from “physical”. In the worst case, some materialists deny even the existence of a mental reality, even though I cannot quite understand what that means. Because they are obviously thinking about these concepts, which is “mental”.

4. Let us look at the current status of these two camps:

- Following the extreme dualism of Rene Descartes, there have been many dualists, including Stephen Jay Gould whose “non-overlapping magisteria” in the late 1990’s put matter and mind into non-overlapping disciplines: matter can be handled by science and morality and mind can be left to religion. However, these days only dualists left seem to be those who hold a dualist view for religious reasons, i.e., a soul.
- These days most philosophers are materialists. With the amazing progress of science and technology, it is hard for most people to believe anything that is not “confirmed” by science. And they think science, based on a purely materialistic approach, should be able to explain everything about ‘this world’. They believe that it is only a matter of time before brain activity will be able to explain the workings of the mind; see the reference list in “[Dhamma and Philosophy – Introduction](#).”
- The inadequacy of the materialist approach is detailed in a comprehensive manner by Thomas Nagel in his recent book, “Mind and Cosmos” (2012); it is an easy read with no fluff and only 128 pages. I was impressed by how close he came to advocating a “mind first” approach, just like in Buddha Dhamma (apparently he does not know anything about Buddha Dhamma and does not even mention it).

5. Mind is the ultimate cause of everything in this world. The Buddha said, “*mano pubbangama dhamma, mano setta manomaya...*”. “Mind precedes all dhamma, all dhamma are mind made...”. But Buddha’s is not a dualist world view. Mind and matter are intimately connected.

- This is in sharp contrast to both the “dualistic” and “materialistic” views.
- Most people translate the above Pāli verse as, “mind precedes all mental phenomena.....” So, we need to examine what “dhamma” means here.

- Dhamma explains how anything and everything in this world comes about “dhamma” means “to bear” or “to explain” or “how anything “comes about”. Nothing happens without (multiple) causes.
- In the *Sabba Sutta*, the Buddha clearly defines what “*sabba*” or “all” that in “in this world”: It is everything that can be experienced via the five physical senses and the mind. Specifically, eye and visible objects, ear and sound, nose and smells, tongue and tastes, body and touch, and the mind and concepts (these are the six internal and corresponding six external “*āyatana*s”), this is “the all”.
- Is there anything that is not included within those 12 *āyatana*s? There is nothing else in the whole world that is not included in those 12 *āyatana*s. Six of those are “internal”; eye, ear, nose, tongue, body, and mind, and the other six are external, they exist “out there”.
- Therefore, it is NOT correct to say that “dhamma” in the above verse includes only mental phenomena, as many translators of the *suttā* have done. This is why I keep saying that we need to check consistency all the time. If one thing is not defined properly, then that error propagates and lead to contradictions.
- This “all” can also be expressed as the 31 realms of existence; of those 31 realms, normal humans experience only two realms (human and animal); see, “[The Grand Unified Theory of Dhamma](#)”. But it is possible to experience other realms via developing mental power, i.e., *jhānā*: see, “[Power of the Human Mind – Introduction](#)” and the follow-up posts. Thus, the Buddha’s world view is much more expansive than the ones that are subjected to current scientific and philosophical investigations.

6. According to Buddha Dhamma, the ultimate realities in this world are just 28 types of *rūpa* (matter), *citta*, and 52 types of *cetasika*. Then different combinations of the *cetasika* in *citta* gives rise to 89 (121) types of *citta*.

- Of course *citta* and *cetasika* constitute the mind, and 28 types of *rūpa* constitute matter.
- Another way to state the same thing is in terms of the six *dhātus*: *pathavi*, *āpo*, *tejo*, *vāyo*, *ākāsa* (space), and *viññāṇa*. The 28 types of *rūpa* mentioned above (including *ākāsa dhātu*) are derived from the *cattāro mahā bhūta*: *pathavi*, *āpo*, *tejo*, *vāyo*. *Viññāṇa* constitutes of *citta* and *cetasika*.
- All inert things and plants in this world (31 realms) are made of *rūpa*. All sentient beings “are made of” *rūpa* and have *viññāṇa* (*citta* and *cetasika*), i.e., a mind.
- As I will explain in a separate post, *rūpa* are ultimately caused by the mind; see, “[The Origin of Matter – Suddhatthaka](#).” But *rūpa* are inherently unstable (this is basically the root cause for suffering in the material world), and there is a fundamental law in physics which states the fact that matter is unstable and the universe itself “runs down”; see, “[Second Law of Thermodynamics is Part of Anicca!](#).”
- When the mind is released from the material body, one attains *Nibbāna*, i.e., one is never reborn “in this world”. It is the material body that is subject to decay and death, and lead to suffering.

7. The reason that I started this website is that it is not possible to provide a reasonable explanation of the Buddha’s world view in an essay or even in several essays. At the website, I can make references to related posts. I hope it would be a rewarding experience for anyone who is willing to allocate some time to read AND contemplate.

- Another reason to start the website is that I want to have it all out in the open, so anyone can challenge any inconsistency. I want to find the truth myself, and the only way to do that is to get as many as possible to look at the emerging picture and make corrections to any errors anyone can find.
- Therefore, I would appreciate any comments pointing to any errors or inconsistencies anywhere on the site, in addition to suggestions for relevant topics to discuss.
- There is more to follow. This is an introduction.
- How “physical” arises from “mental” in the most fundamental sense is really complex and we may not get to that for a while. First we will concentrate on how physical bodies of the living beings arise *with causes from* the “mental”. I will be building up the Abhidhamma section and then will refer frequently to that section as we proceed.

8. It is time to make a paradigm change: Consciousness is not only ontologically fundamental, it takes precedence over matter. Mind can create matter. Right now we have evidence that the mind can change the brain; see, "[Truine Brain – How the Mind Rewires the Brain via Meditation/Habits.](#)" **If the brain creates the mind, how can the mind alter the brain?**

9. Here are a couple of papers on the subject related to the "mind body problem" for those who are interested (click on them to open):

11.3 Is Buddha Dhamma (Buddhism) a Religion?

October 21, 2015; revised November 8, 2015; rewritten December 7, 2022

Buddhism (Buddha Dhamma) is a self-consistent worldview. That worldview explains the origin of suffering in this world and the way to be liberated from suffering. In that sense, it can be called a religion too.

Buddha Dhamma – A Self-Consistent Worldview and a Religion

1. It is best to learn (or even scrutinize) Buddha Dhamma with a mindset pretty much the same as when trying to learn about a new concept, say in mathematics or science. Some key assumptions (axioms) are involved, which cannot be proven but do make sense, especially if one takes time to contemplate. That is the approach followed in mathematics and science as well.

- That worldview has embedded in it the root causes and conditions for suffering to arise and the way to stop that suffering. In that sense, it is a religion, too, even though without the concept of a Creator.
- That is contrary to conventional religions, which are rooted in a “Creator God” based entirely on faith.
- The foundation of Buddha Dhamma, *Paṭicca Samuppāda*, describes the entirety of this world (including mental phenomena).
- However, if one needs to treat Buddha Dhamma (teachings of the Buddha) as a worldview, then learning *Abhidhamma* would be required. Finer details are in *Abhidhamma*.

What Is a Religion?

2. Merriam-Webster defines “religion” as:

- The belief in a Creator God or a group of Gods
- An organized system of beliefs, ceremonies, and rules used to worship a god or a group of gods
- An interest, a belief, or an activity that is very important to a person or group

The Oxford dictionary has the following definitions:

- The belief in and worship of a superhuman controlling power, especially a personal God or gods
- A particular system of faith and worship
- A pursuit or interest to which someone ascribes supreme importance

Buddhism Is an “Atheistic Religion”

3. Thus, the word “religion” invokes the idea of a Creator God in most people’s minds. Even though this is correct for most major religions of the world, it is not correct for Buddha Dhamma.

- The foundation of Buddha Dhamma is that the world has existed “forever” (no First Cause, and thus it was not created). Planetary systems like our Solar system (*cakkavāla*) come and go, but there have always been living beings. See “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”
- It may appear inconsistent with the current “Big Bang Theory,” which says our universe started some 14 billion years ago in a “Big Bang”. Religions embraced the idea of the Big Bang when it was first proposed since it had connotations of creation. However, the inflationary theory that describes the Big Bang (proposed in the 1990s) says there could be multiple parallel universes. Thus, the hope for a unique “event of creation” fizzled. The point is that modern science has no clear picture of how the universe behaves.
- Of course, the “Big Bang Theory” is a theory; it is not yet proven. Some scientists do not believe everything “popped up” suddenly in a Big Bang. They believe that universes are cyclic, i.e., transform and

evolve; see, for example, “Endless Universe – Beyond the Big Bang” by P. J. Steinhardt and N. Turok (2007).

4. Buddha Dhamma does not count as a religion if one takes the first two definitions from either Merriam-Webster or Oxford dictionary. Yet, it can be included in the category of #3 above.

- **One could say that the prominent religions are theistic**, i.e., based on the belief in a Creator.
- Buddha Dhamma can be categorized as an **atheistic religion** because there is no assumption of a Creator, yet it can lead to the end of suffering.
- It must be noted that in Buddha Dhamma, there are beings called “*Devā*” (sometimes translated as “gods”) in other realms; they cannot affect our lives in a significant way, much less than creating universes.

Buddha Dhamma Is the Grand Unified Theory Sought by Science

5. However, I prefer to label Buddha Dhamma as the “ultimate science.” It encompasses all of nature’s laws, not only about material phenomena but also about the mind. It is the Grand Unified Theory that scientists strive to discover, but they only focus on the material aspects. See “[The Grand Unified Theory of Dhamma](#).”

- Scientists are beginning to realize the importance of the mind. Many scientists are attempting to connect quantum theory and the mind. This will NOT work because any “matter-based theory” cannot explain the mind. Mind is the forerunner: “[Manopubbangamā Dhammā](#).”
- The mind takes precedence over matter; see the “[Abhidhamma](#)” section. Those who can spend time and learn Abhidhamma will realize no scientist can ever come close to a Buddha.
- The presence of innumerable planetary systems in our universe was known to the Buddha and is described in the *Tipiṭaka* even though science discovered that only within the past two hundred years; see “[Dhamma and Science](#).”

Current Debates Between Philosophers and Theologians

6. When I listen to current debates between those who believe in a Creator and those who don’t (atheists), I think the following summarizes the key ideas from each group:

- Atheists correctly point out that there is no evidence supporting the idea of a Creator God. Our ancestors could not fathom the workings of our complex world and envisioned a Creator who was supposed to have created humans and a suitable habitat for them. But many “mysteries” of our world have been resolved with the advancement of science, and these findings contradict key ideas in prominent religions.
- Those on the other side insist that the idea of a “totally physical world” goes against our experiences and innate feelings that cannot be denied. That there must be something in addition to a physical body, i.e., a “conscious experience” cannot be attributed to atoms and molecules in our bodies. Furthermore, they point out that science has not been able to explain even the working of a single living cell.
- I have discussed that in detail at the beginning of the “[Origin of Life](#)” section.

Buddha Dhamma Has the Explanatory Power and Is Self-Consistent

7. Buddha Dhamma addresses both of those critical points. First, on the side of the atheists, there is no need for a Creator. Natural processes can account for not only what happens on Earth but an uncountable number of habitable planetary systems in a vast universe.

- On the other hand, science can account for only how the material world evolves. As the theologians argue, there is something other than inert matter in this world, and that is consciousness. Consciousness cannot be derived from inert matter.

- However, consciousness was not imparted by a Creator either. Furthermore, contrary to what most theologians believe, animals are also conscious (even though their ability to make decisions is much lower than humans).
- Introductions are at [“Buddha Dhamma: Non-Perceivability and Self-Consistency”](#) and [“Gödel’s Incompleteness Theorem.”](#)
- This is why one could say Buddha Dhamma is an “atheistic religion.” It describes the way to liberation (from suffering) without the concept of a “Creator God.”

8. Some people tell me that Buddha Dhamma is not that different from other religions because certain “assumptions” need to be believed “on faith,” for example, that there is a rebirth process.

- However, the axiom of a rebirth process is not to be taken as a belief, like in the case of the Ten Commandments. It is up to oneself to examine and accept or reject that concept. Even a Buddha cannot make anyone be “forced to believe” in anything. See [“Evidence for Rebirth.”](#)
- Thus, there is a difference in what is meant by “faith” in Buddha Dhamma compared to that in theistic religions. In any theistic religion, one has to accept the idea of a Creator without question; it is THE basis of any prominent theistic religion.
- Furthermore, mathematics and sciences have built-in assumptions too. New theories must be developed if new findings contradict a given assumption. Buddha Dhamma (represented by the Tipiṭaka) has not changed over the past 2500 years.
- Buddha Dhamma describes the nature of this world; [The Grand Unified Theory of Dhamma](#) has some fundamental axioms, like geometry or the theory of relativity. These “assumptions” can be verified to be correct if one takes the time to examine the evidence.

9. Buddha Dhamma has the explanatory power to explain anything in this world, ranging from the existence of innumerable planetary systems (which was only accepted within the past few hundred years by science) to how morality comes about without a Creator; see, [“Dhamma and Science”](#) and [“Origin of Morality \(and Immorality\) in Buddhism.”](#)

- It took us the workings of many brilliant scientists, from Galileo to Newton to Einstein, to realize the vastness of this universe, which the Buddha described 2500 years ago.
- But the even more astounding fact is that the Buddha described in detail how consciousness arises in a living being, in addition to describing the material world. Science is still under the “wrong view” that consciousness can arise in the brain out of inert matter.
- See the [“Origin of Life”](#) and [“Abhidhamma”](#) sections for details.

Main Points Against Both Materialism and “Creator-Based” Religions

10. There are many videos on YouTube explaining the shortcomings of modern science (based on a materialistic world) and “Creator-based” religions. Both sides are correct about the shortcomings of the other side. I will highlight only one key obstacle to be overcome by each side.

- The critical issue with “Creator-based religions” is why a Creator would let the man he created suffer. He could have created a suffering-free world. See [“Wrong View of Creationism \(and Eternal Future Life\) – Part 2.”](#)
- On the other hand, modern science cannot explain how human life begins or prove that consciousness originates in the brain. See [“Views on Life – Wrong View of Materialism.”](#)

Arguments Against a Creator (Prominent Religions)

11. For those who would like to look into arguments on why theistic religions do not make sense, below is a compilation of arguments by Sam Harris, a prominent atheist.

[WebLink: youtube: Sam Harris: Best Arguments against Religion #1](#)

First segment (up to 2 minutes): Buddha Dhamma is incompatible with any other religion.

Second segment (up to 5 minutes): Buddha Dhamma agrees with Mr. Harris' points.

Third segment (up to 10 minutes): Buddha Dhamma agrees with Mr. Harris' points. Some assumptions of prominent religions have no basis. However, science does not explain everything either.

Final Segment: Yes. God's will has nothing to do with the suffering present in this world.

- I will skip the other videos in the series, which do not have anything contradictory to Buddha Dhamma.
- In the third video, at one point, he mentions Buddhism by name, lumped with other religions. That is because he has not been exposed to the correct version of Buddhism. Just because Mr. Harris has practiced "breath meditation" does not make him knowledgeable on Buddha Dhamma. As I have explained, *Ānāpānasati* meditation in Buddhism is not "breath meditation." See "[Is Ānāpānasati Breath Meditation?](#)"

Arguments Against Materialism

12. Modern science can explain many phenomena involving inert matter. But it cannot explain mental phenomena, including the origin of consciousness. The following video provides critical arguments against "materialism" because it cannot explain the origins of the human body's complex biology (the video starts at 30 minutes, where this point is discussed.) Dr. Stephen Meyer believes in a "Creator God," but his arguments against materialism are valid. (Some scientists have moved to the "creation" camp simply because they cannot explain such phenomena any other way; they are unaware of the correct version of Buddhism.)

[WebLink: youtube: James Tour: The Mystery of the Origin of Life](#)

- Modern science cannot also explain when or how sentient life begins in a zygote; see, "[Buddhist Explanations of Conception, Abortion, and Contraception](#)." This is why I am saying that science is incomplete; it does not know about the "*gandhabba* state" of a human. By the way, a "*gandhabba*" is not a soul; see, "[Ghost in the Machine – Synonym for the Manomaya Kāya?](#)"
- Regarding the mind, science is still at the same stage as it was 400 years ago regarding the material world. Before Galileo discovered the existence of planets, stars were believed to be embedded in a celestial sphere around the Earth; see "[Dhamma and Science – Introduction](#)."

Buddha Dhamma can explain all the aspects being debated by both sides. It can fully explain the material world and mental phenomena, including consciousness. See "[Origin of Life](#)."

11.4 The Infinity Problem in Buddhism

July 15, 2017; Revised February 5, 2018; Re-written March 23, 2021; revised August 13, 2022; August 14, 2022; re-written September 24, 2022

The infinity problem in Buddhism is the following. “Each of us” has been in the rebirth process for an infinite time. Thus, “each of us” has been exposed to Buddha Dhamma countless times, i.e., made infinite attempts to attain *Nibbāna*. How is it possible that all of “us” have not attained *Nibbāna*?

Introduction – “Infinite Monkey Problem”

1. The question is based on the following statement in several *suttā* in *Anamatagga Samyutta* starting with the “[WebLink: suttacentral: Tinakattha Sutta \(SN 15.1\)](#)”: “There is no discernible beginning to the rebirth process.” In other words, we have had an infinite time to attain *Nibbāna* (because an infinite number of Buddhas must have been born too.) So, why have we all not attained *Nibbāna* yet?”

- This issue has been discussed in discussion forums without a conclusion. See “[WebLink: dhammalwheel.com: The problem of infinity in Buddhism](#)” at Dhamma Wheel and “[WebLink: suttacentral: The infinity problem in Buddhism](#)” at the Sutta Central forum in 2017.
- This question seems to have its origin in the “[WebLink: wikipedia.org: Infinite Monkey Theorem](#),” which states that a monkey hitting keys at random on a typewriter keyboard for an infinite amount of time will almost surely type any given text, such as the complete works of William Shakespeare.
- By the way, this infinite monkey theorem is another evidence of how unimaginably large infinity is: “[Infinity – How Big Is It?](#).”

Detailed Analysis of the Infinite Monkey Theorem

2. First, the monkey theorem is based on a monkey typing on a keyboard and generating random letters. It is assumed that the same monkey will keep typing on the keyboard non-stop for an infinite time.

For example, the probability that the monkey will come up with the word “banana” would be **less than 1 in 15 billion, but not zero**. Thus it is a theoretically **possible** outcome, even though improbable.

- But the enormity comes to view when you realize that you have to get a WHOLE TEXT correctly without making too many errors at a stretch (in one continuous period.) For example, to get TWO words correctly, like “yellow banana,” has a probability that is the multiplication of the probabilities of getting each word right. The probability that a monkey gets those two words correctly is less than 1 in a billion-billion (1 in 10^{18}). That is extremely small.

3. The above Wikipedia article says: “..the probability that **monkeys filling the entire observable universe** would type a single complete work, such as Shakespeare’s *Hamlet*, is **so tiny that the chance of it occurring during a period hundreds of thousands of orders of magnitude longer than the age of the universe** is *extremely* low (but technically not zero).”

- That is because scientists estimate the age of our current universe to be only about 14 billion years. Infinity cannot be assigned a number. Any large number you can think about CAN NOT BE the largest number because you can just add 1 to that number to make it bigger. There is no ending! Thus, given an infinite time, it is theoretically possible that a monkey could type out the complete works of William Shakespeare.
- However, as we see below, the rebirth process involving a “lifestream” can not be compared to the **same monkey** typing on a keyboard for an eternity.

Two Relevant Issues

4. We will discuss **TWO aspects of this issue**.

- **First**, we will show that the infinite monkey theorem's MECHANISM does not apply to the rebirth process. The rebirth process DOES NOT involve a “person/soul/ātman” traveling the *Samsāra* (like a single monkey typing for an infinite time.) Nothing like a soul “moves” from this life to the next. Even the next moment in life arises based on causes and conditions based on the present moment, i.e., via the *Paṭicca Samuppāda* process.
- **Second**, we will show that even if an infinite number of living beings has attained *Nibbāna*, there will still be an infinite number left!

First Issue

There Is No “Person” Traveling the Rebirth Process

5. During the rebirth process, various forms of life manifest. Even though we live human lives now, we have lived in most of the 31 realms described by the Buddha. **We have been born a Deva, a Brahma, an animal, a hell-being, etc. countless times!**

- The concept of a “lifestream” moving from life in one realm to another (rather than a soul incarnating or appearing in different forms) is what the Buddha described. See “[What Reincarnates? – Concept of a Lifestream.](#)”
- **No “unchanging/permanent essence” like a soul moves from one life to the next.** If that were the case, stopping the rebirth process and attaining *Nibbāna* would be impossible! How can a permanent entity cease to exist?
- What is taken to the next life is *anusaya/gati/saṃyojana*. None of those is permanent. Each one can change even momentarily!
- Furthermore, all those entities are associated with suffering. Elimination of *anusaya/gati/saṃyojana* is the end of suffering, not the end of an entity like a soul or an *ātman*. See “[Yamaka Sutta \(SN 22.85\) – Arahantship Is Not Annihilation but End of Suffering.](#)”

6. When one understands that by comprehending “[Paṭicca Samuppāda, Tilakkhana, Four Noble Truths,](#)” one becomes a *Sotāpanna* by removing significant parts of *anusaya/gati/saṃyojana*. **That is getting rid of the wrong view of a “soul/ātman” or “sakkāya diṭṭhi.”** See “[Sakkāya Diṭṭhi and Tilakkhana.](#)”

- As that *Sotāpanna* progresses on the Noble Eightfold Path, more of the *anusaya/gati/saṃyojana* are removed. See “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma](#)” and “[Anusaya, Gati, Bhava – Connection to Manomaya Kāya \(Gandhabba\).](#)”
- With the attainment of the *Arahant* stage, ALL *anusaya/gati/saṃyojana* will be lost from the mind. At the death of the *Arahant*, there is nothing left that can initiate another birth, and thus, the rebirth process stops.

Path to *Nibbāna* Is Not a Mechanical Process

7. Therefore, reaching *Nibbāna* CANNOT be considered a mechanical process and, thus, CANNOT be compared to a monkey hitting arbitrary keys on a keyboard to generate Shakespeare's *Hamlet*.

- We can consider a monkey typing a single letter to a living-being hearing the correct Buddha Dhamma. Therefore, we can call that a “single-shot” at *Nibbāna*, corresponding to a single keystroke by a monkey.
- However, a mathematician could still say that there will be an infinite number of such “single-shots” by a living being over an INFINITE time.

8. But the key issue is that it is NOT **the same person** who heard the correct Buddha Dhamma infinite times!

- Therefore, the problem is with the question itself. The infinity problem in Buddhism is phrased as follows: “**Each of us**” has been in the rebirth process for an infinite time. How is it possible that all of us have not attained *Nibbāna*?
- That question assumes that a **fixed person/soul/ātman** is repeatedly reborn! *Paṭicca Samuppāda* explains that there is no such permanent entity being reborn. See “[What Reincarnates? – Concept of a Lifestream.](#)”
- We went through the above discussion to show that the two processes cannot be equated. Now, we address the SECOND issue mentioned in #4 above.

Second Issue

Infinite Number May Have Attained *Nibbāna*

9. It is indeed possible that an infinite number of living beings HAVE ATTAINED *Nibbāna* in the past.

- Not only that, **an infinite number of living beings may have attained *Buddhahood* in the past.** Of course, attaining the *Buddhahood* is infinitely more difficult than attaining *Arahanthood*.
- Therefore, the infinite set of living beings who have attained *Nibbāna* is “much larger” than the infinite set of living beings who have attained *Buddhahood*.
- **The key to this puzzle is to realize that “many levels of infinity” exist.** It has been revealed by mathematicians within the past hundred years, thanks to the pioneering work of the mathematician George Cantor. See “[WebLink: storyofmathematics.com: George Cantor – The Man Who Founded Set Theory.](#)” The following video provides good insights too.

[WebLink: youtube: Cantor's Infinity Paradox | Set Theory](#)

A Nice Visualization of Infinity Within Infinity – The Infinite Hotel Paradox

10. The following video explains why there can be “smaller infinities” types within infinity. In particular, the set of positive integers is a “smaller infinity.” Those who have attained *Nibbāna* fall under that category. Regardless of how many have attained *Nibbāna*, more could attain *Nibbāna*.

- The following video discusses an infinite number of buses filled with an infinite number of guests arriving at an infinite hotel. It is shown that the infinite hotel can accommodate all of them and more!

[WebLink: youtube: The Infinite Hotel Paradox - Jeff Dekofsky](#)

- I have set the video to stop around 2:10 minutes. It is enough to see that the hotel can accommodate an infinite number of guests at any time. During the presence of a *Buddha Sāsana*, only a finite number of living beings (humans, *Devas*, and *Brahmas*) attain *Nibbāna*.
- The rest of the video is more mathematical and shows that even an infinite number of buses with an infinite number of passengers in each bus can be accommodated! You can watch the whole video by clicking “watch on Youtube.”

Other Related Issues

11. Of course, several other questions now arise: Where do all these infinite numbers of living beings live? Do they all live in our Solar system? It will take many more future posts to explain these fully, but we can summarize them as follows.

- Brief answers to those questions are as follows: According to the Buddha, an uncountable number of planetary systems are populated with living beings. While an uncountable number of living beings live in our Solar system, there are an uncountable number of such planetary systems (*cakkavāla*) in the world.

Each cluster of 10,000 such *cakkavāla* can have a Buddha appearing periodically. Thus, there could have been an infinite number of Buddhās.

- Such details are in suttas in the *Tipiṭaka*, mostly in the *Dīgha Nikāya*. I briefly discussed one *sutta*: “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

Summary/Additional Resource

12. Infinity is a very complex concept. There are many levels of infinity. Infinity minus infinity can still be infinity.

- Therefore, even as there have been an infinite number of Buddhā and an even higher infinity of those who attained *Arahanthood*, there are still an infinite number of living beings (including us) who have not yet attained *Nibbāna*.
- Even more importantly, there is no contradiction per the “infinite monkey theorem” because the premise/assumption of that theorem does not hold for the rebirth process.
- **Thus, there is no contradiction in either case.**

11.5 Free Will in Buddhism – Connection to Saṅkhāra

November 3, 2018; revised July 6, 2019; June 11, 2022; November 20, 2022

Free will is at the core of Buddhism (Buddha Dhamma). Without free will, attaining *Nibbāna* is not possible. Connection to *vacī* and *kāya saṅkhāra* discussed.

Introduction

1. Free will is at the core of Buddhism (Buddha Dhamma). If one does not have free will, one cannot not attain *Nibbāna*.

- In a mundane sense, the applicability of free will should be obvious. Free will determines (within certain limits) whether one will become a successful businessman or a master thief.
- When I said “within limits”, we can only compare situations for two people born with comparable capabilities. For example, one born with an “*ahetuka* birth” (born with brain defects) will never be able to achieve much success.
- However, a person born with a “normal level of intelligence” (*tihetuka* or *dvihetuka* births) can make decisions that can lead to a wide variety of possible outcomes in the future. For example, one could become a great scientist or a ruthless dictator. Both require a “sharp mind”.

2. In the following video by Sam Harris, we can see where modern philosophers get stuck on the issue of free will.

[WebLink: youtube: Sam Harris on the Illusion of Free Will](#)

- He agrees that things happen due to causes, but he cannot figure out the causes of many things. He says, “you don’t pick your parents; you don’t pick your body...”. **But we do, in a way. That is explained with *Paṭicca Samuppāda* in Buddha Dhamma.** We even choose our rebirths too; see “[Upapatti Paṭicca Samuppāda \(How We Create Our Own Rebirths\)](#).”
- As long as he does not believe in rebirth, Sam Harris will never be able to understand those “missing causes”. The rebirth picture provides those “missing causes”. **Laws of *kamma* (causes and effects) operate over many rebirths. One cannot analyze the current life in isolation.**
- **Furthermore, we need to include animals and beings in the other 29 realms to explain the laws of *kamma* fully.**
- Nature treats every living being fairly, according to what they have done in the past.
- One is born into a given existence (human, animal, *Deva*, etc), a given family (good, bad), under different conditions (healthy, handicapped, poor, etc), and so on based on one’s *gati*. **One’s *gati* are based on the types of *saṅkhāra* that one cultivates (basically how one thinks, speaks, and acts).**

Background Material in Buddha Dhamma

3. **Continuing with the critical points in #2:** Another key point is that “*kammic* energy” that leads to future *vipāka* (results) is generated in one’s *javana citta*. Don’t be put off by that word. *Javana citta* are thoughts that arise in one’s mind when generating conscious thoughts about speaking/doing **moral or immoral deeds**.

- *Vacī* and *kāya saṅkhāra* become *abhisāṅkhāra* (strong *saṅkhāra*) that can lead to future *vipāka*, **ONLY IF** those actions or speech are either **moral (good *vipāka*) or immoral (bad *vipāka*)**.
- That is the difference between *saṅkhāra* and *abhisāṅkhāra*; see, “[Saṅkhāra – What It Really Means](#).”

4. *Vacī saṅkhāra* are responsible for our speech (either out loud or just to ourselves). When we do something (walk, play, etc) we move our bodies with *kāya saṅkhāra* that arise in our mind (basically in the *gandhabba*). We have control over both of those.

- On the other hand, when thoughts arise automatically due to sensory input, those are *mano saṅkhāra*.
- That is the difference between *mano saṅkhāra* (which arises without our DIRECT control) and *vacī saṅkhāra/kāya saṅkhāra* (which we have control over).
- Whether just *saṅkhāra* or *abhisāṅkhāra*, this distinction holds. For example, we can stop saying anything at any time. We can stop raising our hand anytime we want to, whether it is to say “Hi” to someone (*saṅkhāra*) or to hit someone (*abhisāṅkhāra*).

5. As we have discussed before, the word “*saṅkhāra*” comes from “*saṇ*” + “*khāra*” or actions that involve “*saṇ*”; see, [“What is ‘Saṇ’? Meaning of Sansāra \(or Saṁsāra\).”](#)

- “*Saṇ*” is responsible for getting things done to live the current life (even everyday activities).
- However, if they involve **moral/immoral actions** that can bring results (*vipāka*) in future lives, then those arise due to **“strong *saṇ*” or “*abhi saṇ*” and thus become “*abhisāṅkhāra*.”**
- ***Kammā* are actions (done with *saṅkhāra* that arise in mind).** Most are neutral *kamma*: They do not bring significant *vipāka*.
- Such moral or immoral **strong *kamma*** — done with ***abhisāṅkhāra*** — are the ones that lead to ***kamma vipāka* in the future** (either in this life or in future lives).

Key Idea: *Vacī/kāya Saṅkhāra* are Willful

6. Let us look at some examples now.

- Thinking about going to the bathroom is a *vacī saṅkhāra* (*kammically* neutral). One gets the body to move to the bathroom using *kāya saṅkhāra*.
- Thinking about killing a human being involves *abhisāṅkhāra* with high *kammic* consequences or *vacī abhisāṅkhāra*; doing the actual killing is done with *kāya abhisāṅkhāra*. Those can lead to rebirth in the *apāyā* because both are based on immoral or *apuñña abhisāṅkhāra* (or *apuññābhisāṅkhāra*).
- On the other hand, *puñña abhisāṅkhāra* (or *puññābhisāṅkhāra*) (thoughts responsible for good speech and actions) have good *kammic* consequences and can lead to “good births” (human, *Deva*, or *Brahma*). Even more importantly, they are essential for making progress on the Path.

7. I keep repeating these because it is imperative to understand these fundamental ideas.

- All *saṅkhāra* arise in the mental body (*gandhabba*).
- Then the brain helps to put those into action/speech (i.e., moving body parts).
- Most of those actions/speeches are *kammically* neutral.
- Good *kammā* that will have good *vipāka* in the future is done with *abhisāṅkhāra* that have ***sobhana cetasika* (compassion, non-greed, etc)**. Bad *kammā* that will have bad *vipāka* in the future is done with *abhisāṅkhāra* that have ***asobhana cetasika* (anger, greed, etc.)**; see, [“Living Dhamma – Fundamentals.”](#)
- ***Saṅkhāra* is the generic word used in the *suttā*, even if it could be *abhisāṅkhāra*. One needs to be able to see which ones are *abhisāṅkhāra* based on the actual situation.**

8. *Mano saṅkhāra* are those that automatically arise in the mind due to a sensory input, based on one’s *gati*.

- **We don’t experience those initial *mano saṅkhāra*, and we only experience them when it comes to the next stage called *vacī saṅkhāra* (“talking to oneself”).**

- This is an important point. Even if one does not say a word when “thinking to oneself” that is called *vacī saṅkhāra*. If one gets interested, one may speak out, which is still a *vacī saṅkhāra*.
- If one's interest builds up, one may even take bodily action. Those bodily actions are done with *kāya saṅkhāra* that arise in mind.
- I strongly urge everyone to re-read the posts: “[Difference Between Tanhā and Upādāna](#)” and “[Correct Meaning of Vacī Saṅkhāra](#).”
- The strength of *kammic* energy created increases in the following order: *mano*, *vacī*, *kāya saṅkhāra*.

Mano Saṅkhāra Arise Based on Our Gati

9. As we discussed many times, we get “attached” to something AUTOMATICALLY based on our *gati* and arise as *mano saṅkhāra*. It is essential to understand the concept of “*gati*” (character/habits); see, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#).”

- If the attachment is strong enough, the mind will now start thinking about it consciously, i.e., *vacī saṅkhāra* arise and we become aware of these *vacī saṅkhāra*.
- Now, we can be mindful, think about the consequences of such thoughts, and move away from them as soon as we become aware of this “attachment” to something. Therefore, we can stop such thoughts at the *vacī saṅkhāra* stage; see, “[Correct Meaning of Vacī Saṅkhāra](#).”
- However, our minds like to enjoy such *vacī saṅkhāra*. It is easy to do and is very tempting. Many people get their sexual satisfaction from just “daydreaming” about either an event in the past or sexual encounters that they would like to have in the future.
- To change *mano saṅkhāra*, we need to change our *gati*; see, “[Difference Between Tanhā and Upādāna](#).”

10. Please read #9 again. That is the key to understanding “free will”.

- We have total control over *vacī saṅkhāra* and *kāya saṅkhāra*.
- The reason is that there is a “time delay” between the mind (in the *gandhabba*) deciding to speak or make a bodily movement and the time takes for the brain to carry out those commands and to move parts of the physical body; see, “[Brain – Interface between Mind and Body](#).”
- However, animals do not have this “safety barrier”. Lower animals do not have a neocortex. Even in monkeys, the neocortex is only partially developed. Thus, their *mano saṅkhāra* automatically continue as *vacī* and *kāya saṅkhāra*. Also, see, “[Truine Brain: How the Mind Rewires the Brain via Meditation/Habits](#).”
- Those are the reasons why humans have free will and animals do not.

Key Concepts in Satipaṭṭhāna and Ānāpāna

11. Therefore, the concept of free will becomes clear if one can understand the concepts of *mano*, *vacī* and *kāya saṅkhāra*.

- To have a firm grasp of *Satipaṭṭhāna* and *Ānāpānasati* meditations, it is essential to understand what is meant by “mindfulness” and how *vacī* and *kāya saṅkhāra* are different from *mano saṅkhāra*.
- The bottom line is this: **Once we become aware of an action we are about to take, we have the freedom to choose to either go ahead with it or stop it.**
- We should stop any wrong actions we are about to do and continue with any good ones. That is the basis of *Satipaṭṭhāna* and *Ānāpāna* meditations.
- We must cultivate the habit of “catching one's response early enough”. “Being mindful” is just that; see, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#)” and “[Mahā Satipaṭṭhāna Sutta](#).”

12. If one can understand the post, “[Difference Between Tanhā and Upādāna](#),” one can not only see that free will is “built-in” for humans, but one will also be able to see how one can purify one’s mind and make progress on the Noble Path.

- As explained in that post — and the reference posts mentioned there — only *mano saṅkhāra* arise without our control.
- We have total control over *vacī* and *kāya saṅkhāra*, at least when one gets better at practicing *Satipaṭṭhāna/Ānāpāna*.
- This is also why humans differ from animals: Humans can think for themselves and make rational decisions.

Libet Experiments on Free Will

13. Scientists misinterpret the experiments on the famous “Libet experiments” simply because they believe that the mind resides in the brain. Therefore, they wrongly conclude that the “brain activity starts” before one makes a decision; see, “[Neuroscience says there is no Free Will? – That is a Misinterpretation!](#).”

- Libet’s experiment is straightforward: A person was asked to move his/her finger whenever at his/her will, and scientists monitored that person’s brain activity. They concluded that the brain started the “finger moving” process before the person decided to move the finger!
- If the brain started the decision-making process, that would confirm that humans do not have free will. But then the question arises what triggered that brain activity? Of course, scientists or philosophers do not have an answer to that question. **If human decisions were random, this world would be chaotic.**
- However, the explanation is simple with the concept of a mental body (*gandhabba*) controlling the physical body with the help of the brain.
- As explained in the above post, the decision made by the *gandhabba* started brain activity. Scientists did not correctly monitor the time the person decided because their “model” was incorrect.

14. *Gandhabba* or the “mental body” or the “*manomaya kāya*,” is a critical concept that has been neglected in the current Theravāda texts. This concept is ironically somewhat similar to the “ghost in the machine” concept; see, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”

- There are several subsections on the website that discuss this concept: “[Mental Body – Gandhabba](#),” “[Gandhabba \(Manomaya Kāya\)](#),” and “[The Grand Unified Theory of Dhamma](#).”

11.6 Book Reviews

[“Why Does the World Exist?” by Jim Holt](#)

[“Waking Up” by Sam Harris](#)

[“The Language of God” by Francis Collins](#)

[“Spark” by John Ratey](#)

[“The Life of the Buddha” by Bhikkhu Ñānamoli](#)

11.6.1 “Why Does the World Exist?” by Jim Holt

Revised October 1, 2021

1. I started writing this post while reading the popular book “Why Does the World Exist? – An Existential Detective Story” by Jim Holt (2012). It is a good book with many thought-provoking questions. Here I would like to point out that most of those questions have answers in Buddha Dhamma.

- On p. 269, equating the *Nibbānic* bliss to the annihilation of a person, he asks, “...But how can you enjoy something if you do not exist?”. To address this question, I initially started the post with the title, “Does Nibbāna Mean Annihilation of a “Person”?”. Still, I started addressing other issues in the book and eventually changed the title to be the same as the book title.
- Even many Buddhists are terrified of the idea of *Nibbāna*, thinking that it means destruction. That is why even many *Bhikkhus* like to give “blessings” to the effect, “May you attain *Nibbāna* at the end of much pleasures in the heavenly worlds”. That illustrates a total lack of understanding of the profound message of the Buddha.

2. The problem is in the question itself. If a person is to be annihilated, a “person” needs to exist in the first place. Now this is a very deep issue that needs some knowledge of Buddha Dhamma to understand. As the Buddha said in his first sermon, his Dhamma is, “*pubbe ananussutesu dhammesu.....*” or “a concept that has not been known to the world before...”

- To annihilate, something “concrete” must exist. The Brahmins of the day of the Buddha believed there is a permanent “*āthma*” associated with a person (a “soul” in the present day.). It is very difficult for all of us to get rid of the perception of “me” or “myself”. **In fact, that perception is totally removed only at the Arahant stage of Nibbāna; it keeps decreasing as one advances on the Path.**
- Thus as long as one “belongs to this world of 31 realms”, one always thinks in terms of “me” and “the external world”. This is why the Buddha rejected the concept of “no-self” even though most people incorrectly translate *anatta* as “no-self”; see, [“The Grand Unified Theory of Dhamma.”](#)
- On the other hand, the Buddha said that it is also incorrect to say there is “self”. This is because any “person” changes even moment-to-moment; see, [“What Reincarnates? – Concept of a Lifestream.”](#)
- In rejecting both “self” and “no-self” extremes, the Buddha said, “this changing being” or “a lifestream” changes moment-to-moment due to changes in the causes that support that lifestream. This is not something that I can explain in one essay and is explained via many posts at the site, including the important section on *Paṭicca Samuppāda*.
- In the book there is a separate chapter on, “The Self – Do I Really Exist?”. I will discuss that chapter below, and point out a few more related facts.

3. The book’s main theme is “why is there something rather than nothing?” or “how did the world get started?”. It summarizes most of the arguments that have accumulated over thousands of years, and of course, come to the inevitable question on “the nature of the Creator God who would not need a cause for being there”.

- However, regarding the two questions on existence as expressed above, the Buddha's answer is the simplest: The world has existed forever and it is not possible to pinpoint a specific first cause. The proof is very simple: Suppose there is a first cause; then what caused that? QED.
- Thus in the scientific basis of cause and effect, the absence of a first cause is built in.
- On p. 82 of the book, Jim Holt did point out, “*..Scientific thinkers, by and large, have not shared such qualms about eternity. Neither Galileo nor Newton nor Einstein had any problem conceiving of a universe that was infinite in time. Indeed, Einstein added to his field equations a fudge factor – the infamous “cosmological constant” – to ensure that they would yield a universe that was static and eternal.*”
- And a few philosophers have discussed the problem with “first cause” arguments, as Jim Holt noted. Talking about the late philosopher John Mackie on p. 206, “*..Obviously, as Mackie observed, no explanation in terms of a “first cause” could answer the ultimate question of existence, for such an explanation would merely raise the further question of why that first cause -whether it be God, an unstable chunk of false vacuum, or some still more exotic entity- itself existed.*”

4. If one accepts that the world has existed forever, then many other questions discussed in the book do not even arise. Thus 100% of the questions discussed are answered if we start off with the premise that the world has existed forever AND the root causes (greed, hate, and ignorance) for the existence of the world given by the Buddha.

- For example, on p. 7, Leibniz's Principle of Sufficient Reason is discussed: For every truth, there must be a reason why it is so and not otherwise; and for every thing, there must be a reason for that thing's existence. This is basically “cause and effect”. The Buddha said that the world exists because of greed, hate, and ignorance; and those causes have no beginning.
- This is related to the issue of the mind taking precedence over matter, and I am slowly building evidence for that in the website. There are some introductory posts in the “Abhidhamma” and “Dhamma and Philosophy” sections.
- On p. 188, Jim Holt discusses the fact that all science says about the “stuff that makes up our world” is that mass is equivalent to energy, “*....but it gives us no idea of what energy really is...*”. This is exactly what is explained in Abhidhamma, and I will get to it eventually. He goes on to say, “*...As Bertrand Russell noted in his 1927 book, The Analysis of Matter, when it comes to the intrinsic nature of the entities making up the world, science is silent.*”
- He also briefly discuss another big issue in philosophy on p. 192: “*The conclusion of the philosophersthat there is more to consciousness than the mere processing of information. If this is true, then science, insofar as it describes the world as a play of information states, would seem to leave out a part of reality: the subjective, irreducibly qualitative part.*”. Actually, as we will see, Buddha's answer solves both this and the issue above in one fell swoop.
- A world without a beginning also gives an answer to the question of “why do I exist” (p. 18). We all have “existed” forever; there is no beginning so the question has no meaning. Another frequently asked question is, “what is the meaning of life?”. There is no meaning to life: The bottom line is that we all suffer in this existence ON THE AVERAGE, IN THE LONG TERM while we meander aimlessly among the 31 realms of existence; see, “[Evidence for Rebirth.](#)”

5. Now the only critical question is how do we know that the Buddha's world view is correct? The answer is that it can explain the complex world around us; it has the “explanatory power”. Also see, “[Vagaries of Life and the Way to Seek Good Births](#)” and “[Good Explanations – Key to Weeding out Bad Versions of Dhamma](#),” among many other posts.

- Furthermore, one can EXPERIENCE the truth of Buddha's teachings and the results for oneself. I have described part of my experience in following the Path in, “[11. Magga Phala via Cultivation of Saptha Bojjanga.](#)” Do not be discouraged by the title of the post.

6. Now let me briefly discuss the late chapter on, “The Self – Do I Really Exist?”. Here Jim Holt comes across the answer himself (p. 256): Talking about Descartes’ famous phrase, “I think, therefore I exist”, he says, “... *..Did Descartes here infer more than he was entitled to? As many commentators have pointed out (beginning with Georg Lichtenberg in the eighteenth century), the “I” in his ultimate premise is not quite legitimate. All Descartes could assert with certainty was “there are thoughts”. He never proved that thoughts require a thinker.....*” (bold face mine).

7. This is exactly what the Buddha said. There are thoughts, but no REAL thinker; there is the PERCEPTION of a thinker in “one’s mind” until one’s mind is purified to the level of an *Arahant* and it becomes clear that there is no “thinker”. However, the irony is that until that wisdom is gained, “one’s suffering” is real. The suffering is there simply because one thinks there is a real thinker!

- But one cannot honestly say, “there is no-self” as most people try to do unless one is an *Arahant*; one is just trying to fool oneself in saying that. When something bad happens to “anything that belongs to oneself” one INEVITABLY feels the pain associated with it; see, “[Anatta and Dukkha – True Meanings.](#)”
- When the mind is purified (i.e., is absent of greed, hate, and ignorance) perception of “self” goes away at the *Arahant* stage, then the suffering associated with “one’s stuff” is not there anymore. When one comprehends the concept of *anicca* to some extent, this will become clear to some extent. In other words, *Nibbānic* bliss or *nirāmisā sukha* increases as one advances on the Path, with the mind being purified at each step; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#),” and “[Nirāmisā Sukha.](#)”
- Thus we cannot forcibly get rid of the sense of “I”. Only through the true understanding of the Three Characteristics of this world, *anicca, dukkha, anatta*, that one can slowly start getting rid of that sense of “I” or “self”. Until then there is neither a “self” nor “no-self”, but just a stream of thoughts; see, “[What Reincarnates? – Concept of a Lifestream.](#)” Only at the death of an *Arahant* that stream of thoughts is ended and the mind becomes free of any attachment to the material world of the 31 realms; see, “[Nibbāna – Is it Difficult to Understand?](#),” and “[What are Rūpa? Relation to Nibbāna.](#)”

11.6.2 “Waking Up” by Sam Harris

Revised August 28, 2022; January 31, 2023

Sam Harris, “Waking Up: A Guide to Spirituality Without Religion” (2014).

1. I am quite encouraged by the fact that many people are beginning to see through something contrary to basic human instincts: That it is possible to find a different and more permanent form of happiness that is not related to material things.

- Right at the start of the book, when he talks about his first “meditation retreat” at the age of 16 under harsh conditions in the wilderness, the author says he was puzzled by the positive reaction of the older people in the group, “...*How could someone’s happiness increase when all the material sources of pleasure and distraction had been removed?*” (p.2).
- But now, with many years of experience in meditation and studies on human nature as a neuroscientist, he can understand it: “...*Unlike many atheists, I have spent much of my life seeking experiences of the kind that gave rise to world’s religions. Despite the painful results of my first few days alone in the mountains of Colorado, I later studied with a wide range of monks, lamas, yogis, and other contemplatives, some of whom had lived for decades in seclusion doing nothing but meditating. In the process, I spent two years on silent retreat myself (in increments of one week to three months), practicing various techniques of meditation for twelve to eighteen hours a day*” (pp. 13-14).

2. Harris, like many others, has found that something about human life cannot be explained away just in terms of the workings of the material world. But he cannot pinpoint the source of that “something extra.”

- As Harris explains, modern science has obliterated the concept of a “divine influence” as has been put forth by various religions. So I was interested to see his conclusion on the “source of this extra something.”

3. On p.8, he makes a very valid statement: *“Spirituality must be distinguished from religion – because of people of every faith, and of none, have had the same sorts of spiritual experiences....Nothing that a Christian, a Muslim, and a Hindu can experience – self-transcending love, ecstasy, bliss, inner light – constitutes evidence in support of their traditional beliefs, because their beliefs are logically incompatible with one another. A deeper principle must be at work”*. (my highlighting).

- This is precisely what I have been trying to emphasize on this website.
- In the very following paragraph, he says what he found that more profound principle to be: *“That principle is the subject of this book: The feeling that we call “I” is an illusion”* (p. 9). This is probably the “no-self” theory that is erroneously presented as Buddha’s concept of “*anatta*”; see, [“Anicca, Dukkha, Anatta – Wrong Interpretations.”](#)
- However, on that same page, he also summarizes most of my conclusions about religions in general, including “Buddhism,” as it is practiced by most in both Theravāda and Mahāyāna sects.

4. I will quote the relevant sentences from pp. 9-10: *“I am often asked what will replace religion. The answer, I believe, is nothing and everything. Nothing need replace its ludicrous and divisive doctrines....But what about love, compassion, moral goodness, and self-transcendence? Many people will imagine that religion is the true repository of their virtues. To change this we must talk about the full range of human experience in a way that is as free as the best science already is”*.

- And through the rest of the book, he goes through that process. I agree with most, except that while “Buddhism” may be a religion, Buddha Dhamma is certainly not (if religion is defined as providing salvation via following set rituals or having blind faith in an entity or a supreme being).

5. The key to Mr. Harris’s not understanding Buddha Dhamma becomes apparent on p. 28: *“We can also grant that Eastern wisdom has not produced societies or political institutions that are any better than their Western counterparts. In fact, one could argue that India has survived as the world’s largest democracy only because of institutions that were built under British rule. Nor has the East led the world in scientific discovery. Nevertheless, there is something to the notion of uniquely Eastern wisdom, and most of it has been concentrated in or derived from the tradition of Buddhism”*.

- The problem is that Mr. Harris has not been exposed to Buddha Dhamma, the “non-religious” original teachings.
- The focus of Buddha Dhamma, as delivered by the Buddha, was not on enhancing mundane life and on building a better society. It was focused on the fact that it is a “waste of time” to try to build large cities, develop technology, and in general, to spend too much time on “making things better for this life” because this life is only a brief stop-over in a much longer journey.

6. If one understood the primary message of the Buddha, one would see that this life is too short to be “wasted” on such things. This is due to three critical foundational aspects of Buddha Dhamma:

- Even though wrought with some suffering, human life is the best in all of the 31 realms of this world for attaining Nibbāna. It takes an effort to understand the Buddha’s broader worldview; see [“Origin of Life”](#) and [“The Grand Unified Theory of Dhamma.”](#)
- In the process of rebirth, we spend only a tiny amount of time in this life of about 100 years; see [“Evidence for Rebirth.”](#)
- And immersing in mundane sense pleasures becomes only a hindrance to attaining the “true and permanent happiness” of Nibbāna; see [“Three Kinds of Happiness – What is Nirāmisā Sukha”](#) and [“Nirāmisā Sukha?”](#).

- Of course, the Mahāyāna version of “Buddhism,” or even the Theravāda version, has veered away from this crucial message of the Buddha.

7. Yet, I must hasten to point out two additional points:

- The Buddha stated that not everyone could comprehend this key message. Thus, he did provide advice for those who did not wish to pursue *Nibbāna* and asked for advice on how to live a moral and fulfilling family life while enjoying sensual pleasures. In Chapter IV of Bhikkhu Bodhi's popular book, *“In the Buddha's Words”* (2005), such advice from different *sutta* has been extracted into one place; this book also has other categories separated like good rebirths, mind, etc.
- The Buddha never tried to change or influence the political systems that were in place, even though he praised the democratic system that was in place in the tiny autonomous region of *Vajji*, which was a republic similar to the one we have now in the United States. Other than openly criticizing the caste system, he stayed away from politics.

8. I am impressed that Mr. Harris has been able to catch at least a glimmer of the uniqueness in Buddha Dhamma even though he has not been exposed to the correct teachings of the Buddha: *“Buddhism in particular possesses a literature on the nature of the mind that has no peer in Western religion or Western science. Some of these teachings are cluttered with metaphysical assumptions that should provoke our doubts, but many aren't. And when engaged as a set of hypotheses by which to investigate the mind and deepen one's ethical life, Buddhism can be an entirely rational enterprise”* (p. 29).

- The author is highly impressed with the Buddhist “*vipassanā*” meditation. However, what he describes is just breath meditation or “*Samatha* meditation”; see, [“Bhāvanā \(Meditation\)”](#).

9. And he has the concept of Enlightenment (*Nibbāna*) all wrong (this says a lot about the Mahāyāna “Buddhism” that he has been exposed to): *“...the state of “full enlightenment” – is generally described as “omniscient.” Just what this means is open to a fair bit of caviling. But however narrowly defined, the claim is absurd”* (p. 43).

- To understand the concept of *Nibbāna*, one must understand the worldview of the Buddha as described in the posts mentioned above. Then, one needs to read other posts on this site describing *Nibbāna* (just search with the keyword *Nibbāna* at the box on the top right on Keyword Search).

10. Interestingly, there is no mention of purifying the mind of defilements, which is key to true Buddhist meditation; see [“The Importance of Purifying the Mind.”](#)

- I do not blame the author, of course, but it is sad to see how far “Buddhism” has veered off from the original message of the Buddha.
- It is these three root causes of greed, hate, and ignorance (and the counterparts of non-greed, non-hate, and wisdom) that clarify the basis of morality that he has puzzled over in two other books, *“The Moral Landscape”* (2011) and *“Free Will”* (2012).
- As Mr. Harris correctly points out in *“The Moral Landscape,”* “*there is no such thing as Christian or Muslim morality.*” There is no “Buddhist morality” either. Morality is universal and comes out naturally based on benevolence, compassion, and wisdom having precedence over greed, hate, and ignorance; see [“Origin of Morality \(and Immorality\) in Buddhism.”](#)

11. Chapter 2 is on consciousness. The author has a good introduction, and his thinking about consciousness may be expressed here: *“I am sympathetic with those who, like the philosopher Colin McGinn and the psychologist Steven Pinker, have suggested that perhaps the emergence of consciousness is simply incomprehensible in human terms”* (p. 57).

- The Buddha has fully explained consciousness. Consciousness is NOT an emergent property, it is a fundamental entity. I have several introductory posts on consciousness on the site; see [“What is Consciousness?”](#) and follow-up posts.

- I hope those who are interested will read the comprehensive description of the mind provided by the Buddha in the *Abhidhamma* section of this site, which may not be ready for a comprehensive analysis for several more months. But there are a few introductory posts there.

12. The rest of the book is about the author's experience of trying different meditation types. It is too bad that he was not exposed to real Buddhist meditation. On the other hand, even in countries where *Theravāda* Buddhism is practiced, breath meditation is widely taught.

- Overall, I am impressed that even with the minimum exposure Mr. Harris had to Buddha Dhamma, he has been able to see that "there is something hidden there." I am glad to say that the Buddha did teach a much deeper doctrine, and I am sure he and many others in the West will be enthusiastic about finding the actual message of the Buddha.
- The author knows that as an atheist, he was treading into unknown territory in talking about spiritual experiences: "...*many of my fellow atheists consider all talk of spirituality to be a sign of mental illness, conscious imposture, or self-deception. This is a problem, because millions of people have had experiences for which spiritual and mystical seem the only terms available*" (p.11).
- However, once one understands the correct message of the Buddha, one can see that there is nothing in his doctrine that goes against the beliefs and convictions of most atheists; Buddha Dhamma describes Nature's laws at a fundamental level.
- The only difference between science and Buddha Dhamma is that science assumes that mental phenomena can be derived from material phenomena. In Buddha Dhamma, the mind is at the forefront; see "[Philosophy of the Mind](#)."

13. I encourage those interested to read the book because the author has not only contemplated the subjects of morality, questions on existence, world religions, etc. but has also tried to experience different meditation techniques. I only wish he had been exposed to the true teachings of the Buddha so that he could perhaps make more assertive statements about the value of the Buddha Dhamma in addition to finding much more benefits for himself.

11.6.3 "The Language of God" by Francis Collins

Revised August 9, 2019; August 28, 2022; January 25, 2024

This is a top-rated book (published in 2007), as apparent from many reviews on Amazon. The author is a respected scientist and director of the National Institutes of Health (NIH).

- I have read numerous books to find solid arguments for believing in a Creator. The author has put together the best case using previous ideas of C. S. Lewis and others. The main points in the book can be summarized as follows (not in the order presented in the book):

1. God is responsible for the "Big Bang," i.e., the creation of the universe, and for creating the just right physical parameters (fine-tuning) that enabled human life on planet Earth.
2. The "Intelligent Design" theory must be abandoned since it may undermine the case for God's existence (a scientist actually says that!)
3. Darwin's theory of evolution does account for leading to the appearance of a "human-like" creature, even though the theory explains the evolution of more complex animals.
 - He leaves it open whether this creature further evolved to be human or whether at some point, God directly instilled a conscience in it.
 - Either way, God is responsible for the existence of morality in humans. He prefers to call "BioLogos" the theory of "Theistic Evolution."

4. The existence of “Moral Law” (the ability to differentiate right from wrong) is the fundamental basis for his belief in God.
5. The issue of “pain and suffering” was problematic for C. S. Lewis, and the present author also encountered difficulties addressing it.

My comments are as follows:

1. Stephen Hawking, whose book “A Brief History of Time” the author quoted to make a case for God’s role, has since published a new book, “The Grand Design” (2010). In that book, he clearly states that the need for a Creator God is no longer there based on new evidence.
 - Also, in the inflationary theory, Big Bangs occur constantly, and there is no need to invoke a fine-tuning of physical parameters; see “The Beginning of Infinity” by David Deutsch.
2. Actually “Intelligent Design” is a somewhat better theory than the hypothesis of a God because its proponents have put forth some formidable arguments for it. For example, see Stephen C. Meyer’s “Signature in the Cell,” which provides a scientific analysis.
 - Of course, I do not subscribe to that theory (which some say is making a case for a Creator God without admitting it). However, Collins does not make a better case for the Creator God hypothesis.
 - The problem with the “Intelligent Design” theory is that, of course, the question arises about how that designer came into being! Many people say it is the same as the God hypothesis.
 - If anyone is interested in learning about the “Intelligent Design” theory, a good book is “Signature in the Cell” by Stephen Meyer (2009).
3. The question is, “In this sequence did God instill moral values in the evolving creature?”. Is there a clear-cut transition from a robotic animal to a human with moral values?
 - The “uniqueness of a human,” according to the author, is the ability to know right from wrong. Humans indeed have this quality stronger than animals. Some animals also have at least a glimpse of this quality. If you have a pet, especially a dog, you know that it has feelings and even its mind to do things, i.e., it is not like a robot.
 - While people sometimes sacrifice their own lives to save others, people like Hitler and Pol Pot have committed unmentionable atrocities. And that was with planning (not just on impulse).
 - In Buddha Dhamma, both moral and immoral choices are in the “human psyche”; based on many complex factors (*sansāric* habits or “*gati*,” family, friends, associates, etc.), people choose to be moral or immoral at different times depending on the situation. Of course, greed, hate, and ignorance play a significant role; see, “[Living Dhamma](#).”
4. Now on the existence of “moral law”: From #3 above, it is clear that even though morality is in the human psyche, it does not have a “binding effect” on humans. Humans are, in general, more “moral” than animals. But within the broader world described by the Buddha Dhamma, other sentient beings (*Devas* and *Brahmā*) are more “moral” than humans.
 - If the man is to be judged by just one life, why is everyone not given the same chance (including “same morality”)? People are born poor, rich, healthy, unhealthy, etc., and some die even before getting a chance to prove their worthiness.
 - These apparent “vagaries of life” are a strong argument for the case that this life is only one of many. Furthermore, the diversity that we observe is due to the effects of past actions (*kamma vipāka*); see “[Vagaries of Life and the Way to seek “Good Rebirths](#).”
 - The basis of morality (and immorality) comes naturally in Buddha’s Dhamma. See “[Origin of Morality \(and Immorality\) in Buddhism](#).”

5. Of course, according to Buddha Dhamma, “pain and suffering” — not only in this life but also in the cycle of rebirths — is the fundamental problem of existence.

- **Again, the “pain and suffering” issue is unexplainable by any approach based on just one life.** Like modern science, Buddha Dhamma has a foundation in “causes and effects.” Suffering and happiness arise due to past causes, and since most of these effects (e.g., disability at birth, poverty) are even apparent at birth, “past” means past lives.

11.6.4 “Spark” by John Ratey

Early post of 2014; revised August 28, 2019

1. There is a good book, “Spark: The Revolutionary New Science of Exercise and the Brain” by John J. Ratey (2013). It discusses new findings on the effects of regular exercise on the brain as well as the body. (Most of the books I review are likely to be available at public libraries).

2. The book discusses how exercise can keep the brain working at higher efficiency and lower stress and anxiety. Also, regular exercise can rid of addictions, and even Attention Deficit Hyperactivity Disorder, ADHD. It also talks about women’s hormonal changes and aging too.

3. The key is to engage in a moderate exercise program up to 6 days a week. And to ratchet it up to high-intensity once-in-a-while, even for a minute at a time. For example, if you jog, try to run fast for 30 seconds to 1 min once-in-a-while. That is called “interval running.”

- The maximum heart rate for a person is 220-AGE.
- low-intensity exercise: 55%-65% of max rate
- moderate: 65%-75%
- high intensity: 75%-90%

4. There are “wristwatch type” heart rate monitors available. But you basically “know” when you are at low intensity (walking), moderate (jogging/slow running), and high (dashing to catch a bus or running a 100-meter race).

- Should not do high intensity unless you have been active for a while.
- In the anaerobic range (high intensity), the brain releases human growth hormones (HGH). **That is a natural way to “get high.”**
- Even low-intensity workouts release many other beneficial chemicals. But in high-intensity workouts, they all get a boost. All these are good for the sustenance/growth of neurons so that your memory can be improved.
- But should not do high-intensity regularly unless one is in great shape.
- He also mentions yoga as an enjoyable activity. Any exercise, i.e., just walking, is better than none.
- He discusses how children in a school district in PA are avoiding obesity and health problems and getting good grades because the schools have good exercise programs.
- I find that the best time to meditate is after a good workout and a shower. The body and the mind are refreshed and alert.

5. We are born with a body and a mind that are results of specific *kamma vipāka* in the past. But we are not bound by either; we can improve both. That does not mean we should try to “beautify” the body; we should make it healthy. The physical body is a “temporary shell” that will be with us for about 100 years, and if we do not take care of it, that will lead to much discomfort.

- We can make conditions conducive to get “good *kamma* seeds” and to prevent “bad *kamma* seeds” from bearing fruits; see, “[Anantara and Samanantara Paccaya](#).” Do not be discouraged by those Pāli words. The post is easy to understand.

6. Exercise and meditate! That is key to a long healthy life as well for “cooling down” in the sense of getting some long-lasting peace-of-mind or attaining one of the four stages of *Nibbāna*.

- As we get old, it is imperative to keep both body and mind in good condition. It is hard to concentrate, let alone meditate, with an aching body or a defiled mind.
- Walking a mile or two a day can keep one reasonably healthy. For the mind, solving word puzzles or reading a book is better than watching television.

11.6.5 “The Life of the Buddha” by Bhikkhu Ñāṇamoli

October 13, 2018; revised November 15, 2020

“The Life of the Buddha” Is a Good Resource

1. “[The Life of the Buddha](#)” by Bhikkhu Ñāṇamoli is good to read and even to keep as a reference (page numbers quoted are for the 2001 First BPS Pariyatti edition). It is a good book for two reasons:

- A chronological record of the Buddha’s life (after the Buddhahood),
- Detailed accounts of events that are not in the *suttā* (taken from the *Vinaya Piṭaka*).

Need to Consult All Three *Piṭaka*

2. The Buddha said that if there is any doubt or a concept that is not clear, one should check with *Sutta*, *Vinaya*, and *Abhidhamma*. These basically refer to the *Tipiṭaka* (three baskets) of *Sutta Piṭaka*, *Vinaya Piṭaka*, and *Abhidhamma Piṭaka*.

- Most people refer to the *Sutta Piṭaka* and forget about the other two. *Abhidhamma Piṭaka* is a bit hard to understand, and without a firm grasp of basics it is harder.
- Most people think that the *Vinaya Piṭaka* is just for the *bhikkhus* and *bhikkhunis*. But there are sections in the *Vinaya Piṭaka* that have details that are not in the *suttā*. Furthermore, those sections in the *Vinaya Piṭaka* are easy to understand, as we see below.

An Example

3. I will provide the following as an example of what is in this book that is not available in any *sutta*. It describes how the five ascetics attained the *Sotāpanna* stage over several days with the delivery of the *Dhammacakkappavattana Sutta*.

Here is a direct quote from p. 45 of the book (starting from the point where the Buddha had just finished the first delivery of the *Dhammacakkappavattana Sutta*):

“Then *Aññata Koṇḍañña*, who had seen and reached and found and penetrated the *Dhamma*, whose uncertainties were left behind, whose doubts had vanished, who had gained perfect confidence and became independent of others in the Teacher’s Dispensation (**My Comment:** i.e., became a *Sotāpanna*), said to the Blessed One: “Blessed One, I wish to go forth under the Blessed One and to receive the full admission?”

“Come, *bhikkhu*,” the Blessed One said, “The *Dhamma* is well proclaimed. Live the holy life for the complete ending of suffering.” And that was his full admission.

Then the Blessed One taught and instructed the rest of the *bhikkhus* with a talk on the *Dhamma*. As he did so, there arose in the venerable Vappa and the venerable Bhaddiya, the spotless, immaculate vision of the

Dhamma (**My Comment:** i.e., became *Sotāpannas*). All that is subjected to arising is subjected to cessation. They, too, asked for and received the full admission.

These, having seen *dhamma*, attained *dhamma*, knowing *dhamma* ... having attained without another's help to full confidence in the teacher's instruction, spoke thus to the Blessed One: "May we, Blessed One, receive the going forth in the Blessed One's presence, may we receive ordination?"

Then living on the food they brought to him, the Blessed One taught and instructed the rest of the *bhikkhus* with a talk on the *Dhamma*. All six lived on the food brought back by the three of them. Then there arose in the venerable Mahānāma and the venerable Assaji the spotless, immaculate vision of the *Dhamma* (**My Comment:** i.e., became *Sotāpannas*), and they too asked for and received the full admission".

Important Deductions

4. We can learn several important facts from the above account.

- Only Ven. Koṇḍañña attained the *Sotāpanna* stage in the first round in the first night of the delivery of the *sutta*. It actually took several days for all five ascetics to attain the *Sotāpanna* stage.
- Buddha actually did not just recite the *sutta* as it appears in the *Tipiṭaka*. That recital would have been finished within 15 minutes!
- So, we can see that what is in the *Tipiṭaka* are HIGHLY CONDENSED summaries of those discourses and possibly many discussions.

Many *Suttā* Provide Only Concise Summaries

5. What we see as the *Dhammacakkappavattana Sutta* today is a highly condensed version of the material that was taught by the Buddha over several days, as is clear from #3 above.

- It appears that the Buddha himself summarized the material in each *sutta* in a short concise way to a limited number of verses that were suitable for oral transmission (easy to remember). **A *sutta* is supposed to be explained in detail;** see, "[Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa.](#)"
- We must remember that all the *suttā* in the *Tipiṭaka* were transmitted down several generations over about 500 years before it was written down. It was not even remotely possible to include all that was discussed over those several days!

Word-by-Word Translation is a Terrible Practice

6. What happens these days is that even highly condensed *suttā* are translated word-by-word into English. This is a terrible practice. It is no different from just reciting a *sutta*!

- One can finish reading a *sutta* in 15 minutes, and ONE would not understand any of the deep concepts embedded in the *sutta*.
- **Then how could one understand the *sutta* by just reading a word-by-word translation of a *sutta*?**

7. In fact, this could be why many people to believe that one can attain *Nibbāna* by just reciting a *sutta* or a set of verses. This practice is sometimes called "*mantra* chanting." But there is no basis for that belief.

- *Nibbāna* can be attained ONLY by cleansing one's mind.
- The MENTAL stress arises ONLY due to *lobha*, *dosa*, *moha* in one's mind.
- As one cleanses one's mind, the mental stress will decrease. This decrease is gradual in the beginning. It will have significant drops at the *Sotāpanna Anugāmi* stage and then more drops at *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi* stages.

- An *Arahant* does not have any mental stress. He/she may have physical suffering, but that also will end at death. No more physical or mental suffering!

There is Value in Chanting Suttā

8. Of course, there is a value in even chanting a *sutta*. They have been formulated in a format to “calm down the mind,” even if one did not understand the meaning; see, “[Buddhist Chanting](#).”

- It would be much better if one understood the basic message of the *sutta*.
- One could get to the *Sotāpanna* stage ONLY BY fully understanding the concepts discussed in a major *sutta* like the *Dhammacakkavattana Sutta*.

But Some verses Need Detailed Explanations

9. A related key point is that upon attaining the *Buddhahood*, the Buddha wondered whether the humans will ever be able to understand the deep *Dhamma* he had just uncovered.

- This is stated on p. 37 of this book. The Buddha was really doubtful whether humans will comprehend his *Dhamma*, and *Brahma Sahampati* made an invitation to the Buddha, saying that many beings in the world can understand Buddha Dhamma. He would know because he had become an *Anāgāmi* by listening to Dhamma by a previous Buddha.
- So, the point is that if one thinks one can make progress on the Path by just chanting *suttā* or even learning the word-by-word translations, one would be very much mistaken.
- **In some cases, it can take a book to really do justice in explaining a single verse in some of the deep *suttā*!**
- However, some long *suttā*, especially in the *Dīgha Nikāya*, can be translated word-by-word for the most part, since there may not be any deep concepts discussed there.

Other Good Aspects of the Book

10. Another good aspect of the book is that it provides the background for delivering of some major *suttā* or verses.

- For example, there is a detailed account (pp. 55-60) of how the Buddha had to perform even a few miracles to convince Uruvela Kassapa, his two brother, and 1000 of their followers before they agreed to listen to the *Aditta Pariyaya Sutta* or the Fire Sermon.
- So, we can see that it was not easy in those early days for the Buddha to even convince some of the ascetics who had their own beliefs of what *Nibbāna* was about.

11. The subsequent chapters provide a good chronological account of what happened until the *Parinibbāna*. One can get a sense of which major *suttā* were delivered at around what time.

- There are accounts on the two chief disciples, and short accounts of other important personalities such as Anāthpīṇḍika, Aṅgulimāla, Visākha, etc. Chapter 7 describes the formation of the order of *bhikkhunis*.
- Several encounters with the *Māra Devaputta* are scattered throughout the book.
- One paragraph on p. 109 is on how the Buddha visited the *Tāvātimsa deva* realm and delivered *Abhidhamma*. A summary was conveyed to Ven. Sariputta, who expanded it with the help of his students, to the form that we have today.
- There is a chapter on Devadatta, which describes events that are not found in *suttā*, how he attained (*anāriya*) *jhānā* and *iddhi* (super-normal powers) powers, how he appeared on the lap of Prince Ajatasattu as a baby using his *iddhi* powers.

- It provides a good account of Devadatta's efforts to take the life of the Buddha, and how he lost all those super-normal powers and *jhānā* at the end.

12. There is a relatively long chapter on "The Doctrine", including the Four Noble Truths and the Noble Eightfold Path.

- Then, there is another relatively long chapter on the final year of the Buddha's life, including *Parinibbāna*.
- The final chapter is on the First Buddhist Council (*Sangāyanā*) that took place 3 months after the *Parinibbāna* of the Buddha.

XII Bhāvanā (Meditation)

The numbered posts are to be read in that order. Even for those who are practicing Buddhists, I recommend starting at the Introduction (#1), and going down the list of topics at least the first time.

- It would be a good idea to read the posts in the following subsection at some point, in order to get an idea about the reasoning behind this approach: [“Essential Buddhism.”](#)

12.1 1. Introduction to Buddhist Meditation

Revised September 7, 2019; March 16, 2021; June 20, 2022

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

Rāgakkhayo Nibbānan, Dosakkhayo Nibbānan, Mohakkhayo Nibbānan

1. Buddhist meditation is based on gradually reducing greed, and anger/hate, developing wisdom by getting rid of wrong views, and following the Noble Eightfold Path.

- We can get an idea of what “Buddhist Meditation” is by looking at the Path described by the Buddha to achieve various stages of *Nibbāna*. *Nibbāna* is not an esoteric concept many people believe. That is why I like the synonyms “*niveema*” or “cooling down.” *Nibbāna* can be EXPERIENCED even in the early stages.

2. The Buddha defined *Nibbāna* as “*Rāgakkhayo Nibbānan, Dosakkhayo Nibbānan, Mohakkhayo Nibbānan*.” ***Nibbāna is the removal of greed, anger, and ignorance from one's mind.*** That gives the essence of how this “cooling down” results. [[SN 38.1 A Question About Extinguishment - Nibbānapaṇhāsutta](#) “Friend, the ending of greed, hate, and delusion is called extinguishment.” “*Yo kho, āvuso, rāgakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan*”ti.]

- The more one gets rid of greed, hate, and ignorance, the more one experiences *Nibbāna* or “*niveema*” or “cooling down.”
- One does not, and one cannot, get rid of greed, hate, and ignorance in a few days. It is a gradual process. One can experience the “cooling down” to the extent one can purify the mind. **And there will be ups and downs, especially in the early days. Thus ONE MUST HAVE THE RESOLVE to stay on the Path.**
- **Some people stay with breath meditation for “stress reduction” and avoid anything to do with *Nibbāna*.** They equate *Nibbāna* with extinction, but there is no need to worry; **one has that mindset means that one is nowhere close to *Nibbāna*.** I am not saying this in a derogatory way, but just as a fact. Until one experiences some “cooling down” and gets some idea about *anicca*, *dukkha*, and *anatta*, it is tough to get an idea of what *Nibbāna* is.

3. Meditation provides ways to achieve this “cooling down” for any person. There are three types of people who are interested in meditation:

- Many people want to practice some basic meditation that the Buddha advocated for achieving some “inner peace.”
- Some are convinced about the rebirth process but are mainly concerned about getting a “good birth” in the next life.
- **This site's main goal is to provide enough material for one to attain the first stage of *Nibbāna*, the *Sotāpanna* stage.** After that, one does not need outside help to complete the rest of the journey. However, many people are either not ready to take that task yet. They have doubts about the existence of 31 realms, the process of rebirth, or *Nibbāna*.

Nibbāna Is Cooling Down

4. In several posts, I have tried to explain what this “cooling down” is. You may want to read them. They vary from a basic description to more in-depth details. They all deal with reducing greed, hate, and ignorance from our minds.

- The words greed and hate are clear, but many do not understand what is meant by ignorance. The post, “[What is Avijjā \(Ignorance\)?](#)” gives a bit deeper description. But since it is essential, I want to say a few words here about ignorance.
- The “traditional method” for achieving some “cooling down” or “calming sensation” is to do “breath meditation” or “*kaṣiṇa* meditation.” **As I questioned in several posts, how can greed, hate, or ignorance be removed via concentrating on one’s breath or some *kaṣiṇa* object? Such meditation techniques DO NOT remove ignorance and only SUPPRESS greed and hatred.**

5. We need to start gradually reducing greed and hate from our minds; this is called “*sīla*” (pronounced “seela”) or moral living. Then one’s mind becomes clear, and one starts feeling the *nirāmisā sukha*. Then it will become easier to grasp Dhamma concepts and get rid of *avijjā*.

- Buddha Dhamma is for the wise; it is not to be followed by blind faith but with understanding. One needs to learn and “see” Dhamma first. A sustained “Cooling down” cannot be attained via following a set procedure like watching the breath.
- One could go a long way (up to the *Sotāpanna* stage) just by learning Dhamma and comprehending the key concepts. When one grasps the key concepts, it dawns on one that it does not make sense to be too greedy. Or hate someone with a level of hatred that makes one’s heart “heat up” to uncomfortable degrees.
- Thus through a better understanding of Dhamma (i.e., removing ignorance), one automatically “cools down.” **Removing ignorance via learning Dhamma leads automatically to reducing greed and hate.**

Correct World View is Critical

6. That is why “*Sammā Diṭṭhi*” or “Correct Vision” comes first in the Noble Eightfold Path. **Actually “*sammā*” means “*saṃ*” + “*mā*” or “removing defilements”; but for brevity, we will use the word “correct.” But keep in mind that “*sammā diṭṭhi*” means “removing defilements through correct vision.”** I cannot emphasize enough the importance of learning Dhamma. That is the first BIG step. Without understanding the message of the Buddha, how can one follow his Path?

- When one starts to understand the key Dhamma concepts, one regularly thinks about such ideas and how they should be kept in mind while going through daily chores. That is “*sammā saṅkappa*” or “correct concepts.” That automatically leads to “*sammā vācā*” (correct speech), “*sammā kammanā*” (correct action), and *sammā ājīva* (correct livelihood).
- When those five steps, one becomes attuned to correct mindfulness (“*sammā sati*”). Yes. There is “incorrect mindfulness” (“*micchā sati*,” pronounced “michchā sathi”) too, like when a master thief plans a robbery. One needs to be “engaged” or focused on accomplishing any task, either good or bad.

7. With cultivated “*sammā sati*,” one will be able to “see” the consequences of any action very quickly. Then one can decide whether to go ahead with it (since only good can come out of that action) or to abandon it (because it is not beneficial for oneself or to others).

- When one sees the benefits of these steps (i.e., “cooling down”), one will be motivated to work harder on all these steps, i.e., one cultivates “*sammā vāyāma*” (correct effort).
- The culmination is “*sammā samādhi*” (correct calm state of mind). Yes. There is a “*micchā samādhi*” too. When that master thief is planning a big robbery, he gets into a kind of *samādhi* also. He feels a sense of calm too, but that will have terrible consequences down the road.
- The latter three develop at the same time. One could get into “*sammā samādhi*” just via “*sammā diṭṭhi*.” When one listens attentively to a Dhamma talk or gets absorbed in reading about a key Dhamma concept, one could get into “*samādhi*.” A *jhānic* state is a deeper *samādhi* state.

Reading About Concepts Is Not Enough

8. That is why I recommend everyone to read these posts during quiet time. **One will absorb more, and just by contemplating the material while reading, one could quickly get into *samādhi*.** That is what meditation is all about. “Absorbing the good” will automatically force the “bad” out, and one gets into *samādhi* automatically; we will talk about this “*ānāpāna*” process in the following posts.

- It may get to the point where one can sit down and get into a *jhāna* within a minute or two. But not all can get into *jhāna*, and that is not necessary either. Any *jhāna* attained will be *anāriya jhāna*, until one attains the *Anāgāmi* stage. What is necessary is to get to *samādhi* or “calmed mind.”
- I hope you will experience the LONG TERM benefits from the procedures we discuss in this post and the follow-up posts. Initially, it will be a bit slow. But if one sticks with it for a few months, one should see a change in oneself that is not merely temporary relief. For some, it will be faster.

9. In this life, we feel two kinds of suffering: bodily pains and aches and various diseases and mental distress (disappointments to depression).

- Bodily ailments take time to recover. But even those can be reduced by careful planning and being mindful too. If one engages in physical activity (ranging from walking to rigorous exercise) and be cognizant of what one eats, many such ailments will reduce over time.
- Mental suffering could have direct causes in greed, hate, and ignorance. While some are due to past *kamma*, most can be avoided or reduced by being mindful of what one thinks, speaks, and does. Any thought, speech, or bodily action arising from a greedy, hateful, or ignorant view will cause mental anguish sooner or later.
- The easiest way to determine whether any action is inappropriate is to contemplate the consequences. An action rooted in greed, hate, or ignorance can harm oneself or another being.

Buddhist meditation Is The Noble Eightfold Path

10. Thus, Buddhist meditation is basically to cultivate the Noble Eightfold Path.

- **By preventing killing, stealing, verbal abuse, etc., what we are effectively doing is to “put out existing fires” in our minds and prevent such “future fires” from starting. That is “*niveema*” or “cooling down” or *Nibbāna*.**
- **We should also do things conducive to a calm mindset — associating with like-minded people, actively engaging in moral behavior that makes the heart joyful, etc.**
- **The most important thing is to learn Dhamma to “see” how all this will permanently liberate one’s mind. Then the change will become “permanent”.**

11. **When perfected, one will be doing meditation all day long while doing daily chores. That is what is stated as “*āsevitāya, bhāvitāya, bahuleekathāya*.” That means, “associate and use what is good, and do that as much as possible.”**

[See, [AN 8.1 Mettāsutta](#) *āsevitāya bhāvitāya bahulikatāya*

“Friends, the emancipation of heart's (*cetovimutti*) by loving-kindness (Metta) expected eight good results: **associated, developed, and practiced frequently, made a habit of, made a basis of (practised thoroughly), has been implemented, acquainted with, and thoroughly undertaken.**

“*Mettāya, bhikkhave, cetovimuttiyā āsevitāya bhāvitāya bahulikatāya yānikatāya vatthukatāya anuṭṭhitāya paricitāya susamāraddhāya aṭṭhānisamsā pāṭikaṅkhā.*

cetovimutti: [f.] emancipation of heart.

āsevitā : [pp. of *āsevatī*] associated; practised; frequented.

bhāvitā : [pp. of *bhāveti*] increased; cultivated; developed.

bahulikata : [pp. of *bahulīkaroti*] took up seriously; increased. (adj.), practised frequently.

yānīkata : [adj.] made a habit of; mastered.

vatthukata : [adj.] made a basis of; practised thoroughly.

anuṭṭhita :a. [anuṭṭhahati's pp.] has been implemented, has been affected, has been experienced (to).

paricita : [pp. of paricināti] practised; attended; acquainted with; accumulated; accustomed.

susamāradha : [pp.] thoroughly undertaken.

ānisaṃsa :[m.] profit; merit; good result.

pāṭikaṅkha :[adj.] to be desire or expected.]

- In a formal meditation session, one does the same. It is best to read a post or two on a given Dhamma concept before (or during) the meditation session and then contemplate those ideas. It is important to compare those concepts with one's life experiences. Then things will become clear with time. For example, why it is unfruitful to "live life lavishly, especially if that involves hurting oneself or others."
- You will be surprised that this process itself will get you to *samādhi*, and even *jhānā* in the long term. But we will discuss some other variations too.
- As I have mentioned in several posts, one could even get to the *Sotāpanna* stage just by comprehending the key Dhamma concepts to some extent.

Mind Is At The Forefront

12. Buddha Dhamma is all about the mind; Anything we say or do also starts with a thought. The Buddha said, "*manopubbaṅgamā dhammā...*", "the mind takes precedence over everything else..".

- It should be clear from the above discussion that Buddha's meditation techniques are compatible with Nature's laws. Regardless of whether one has a religious background or is an atheist, one can follow those guidelines.
- One becomes a "*Bhauddhayā*" or a "Buddhist" in his/her mind. If one understands some basic Dhamma concepts and lives by them, then one is automatically a Buddhist. When one gets started on the Path with a firm determination, Dhamma will guide one to be on the right path. ("*Dhammo have rakkhati dhammacāriṇi.*")
- The foremost goal is to live a moral life without causing harm to oneself or others and to seek some "peace of mind" from the hectic modern life. That is our starting point.

13. I also recommend listening to the following discourse for anyone seriously considering Buddhist meditation (You may need to adjust the volume control on your computer):

"The Hidden Suffering that We All Can Understand"

[WebLink: The Hidden Suffering that We All Can Understand](#)

That is in the post "[Starting on the Path Even without Belief in Rebirth](#)" in the "[Living Dhamma Overview](#)" subsection of the "[Living Dhamma](#)" section.

Next, "[2. The Basics in Meditation](#)",

12.2 **2. The Basics in Meditation**

Revised August 17, 2019; March 16, 2021; June 29, 2022

We discuss EIGHT elements of a firm foundation for Buddhist meditation. These are EIGHT steps to be followed at all times, not just during formal meditation.

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. Those who are doing breath meditation or “watching the stomach rise and fall” know that it is relatively easy for some to calm the mind compared to others. Some cannot even keep a calm mind for more than a few minutes; distractions start “popping up.”

- This “popping up” is due to the five hindrances (*pañca nīvaraṇa*) that I have described in “[Key to Calming the Mind – The Five Hindrances](#).” These are the “residues” or “gunk” that we have deep inside our minds that start bubbling up to the surface when we sit down to meditate.

2. Let us take the simile of water well contaminated with all the rotten stuff fallen into it over many years; our minds have accumulated gunk over repeated births, not just in this life. When we are engaged in stressful day-to-day activities, those activities stir up the “gunk,” and the mind gets clouded. It is like taking a long pole and stirring the well water; the “gunk” at the bottom comes up.

- The two “primary rotten things” we have are the first two on the list of the five hindrances: *kāmacchanda* (excessive greed) and *vyāpāda* (deep hate). Even though the word *vyāpāda* is commonly used, the correct Pāli word is *byāpāda*.
- *Vicikicchā* is the uncertainty about how to properly respond to external stimuli (sensory inputs.) The natural tendency is to attach to mind-pleasing stimuli and do whatever it takes to enjoy them. One does these because of the ignorance of *anicca*, *dukkha*, and *anatta*. *Vicikicchā* is sort of like a “favorite list” from the main ingredients of excessive greed and deep hate, the first two hindrances. ***Kaṅkhā vicikicchā* is a worse form of *vicikicchā* manifested as having doubts about the Buddha’s teachings (because they discourage such attachments.)**
- *Thina middha* or inability to concentrate on *Dhamma* concepts; one feels lethargic when reading/listening to *Dhamma*. That is because one does not understand the basic concepts of Buddha *Dhamma*. An “unsettled” or “excited” mind (*uddhacca-kukkucca*) is also personal and arises when one feels “superior” or “inferior” compared to others.
- The five hindrances are discussed in “[Key to Calming the Mind – The Five Hindrances](#).”

3. When we engage in day-to-day activities, we see, hear, smell, taste, touch, and also think about all sorts of things. If such things cause *kāmacchanda* or *vyāpāda* to arise, then some combination of five hindrances can burden our minds. All these are “external stirrers” that make our minds look like whirlpools. All these gang up to get the mind to stress out and “heat up.” That is the tension that we feel on a busy day. We need to “cool down”; we need “*niveema*.”

- One way to “cool down” is to turn off those external stirrers temporarily. Some people do this in a “breath meditation” session: One goes to a quiet place and closes their eyes; this will turn off mainly the five physical senses (i.e., we do not see, hear, smell, taste, or touch). That helps to calm the mind of some people, especially if they have practiced it.
- But it is not possible to turn off the sixth one, the mind itself. The mind likes to move around and not to be focused. Many people try to fix their minds on one object, say the breath or the rising of the stomach. That provides only a temporary solution. See, “[8. The Basic Formal Ānāpānasati Meditation](#).”
- Some people try to “turn off the mind” or try to stop thoughts from arising. That is DANGEROUS. We need to PURIFY the mind, not turn it off. The Buddha had a perfectly pure but very active mind. When one follows the Path, one’s mind will become sharper, not inactive.

The “Big Eight” to Avoid

4. However, if our minds have too much gunk (defilements), then they can disturb/stress our minds even without the aid of “a stirrer.” It is like an abandoned old well. It has dirty water, and one needs to REMOVE the existing dirty water first.

- Similarly, if one is engaged in immoral behavior, then the mind is like a well that has dirty and turbulent water. That is due to the **BIG EIGHT defilements**: killing, stealing, sexual misconduct, lying, gossiping, slandering, harsh speech, and constantly thinking about “mind-made” or “planned” sensual or immoral activities.
- Good examples of the last one: “making up sexual activities” or “how to retaliate to an enemy.” it is VERY important to stay from silently engaging in generating angry/lustful thoughts. Many people tend to do that because they think “I am not hurting anyone.” But that is not true. You are hurting yourself! A deeper analysis of this issue in [“Correct Meaning of Vacī Saṅkhāra.”](#)

5. **The mind calms down (or gets to *samādhi*) when one lives a moral life (*sīla*.)** Stopping the BIG EIGHT is the start of a moral life (*sīla*.) With that calmed mind (*samādhi*), one can comprehend deeper aspects of Buddha Dhamma and cultivate wisdom (*paññā*.) That is the initial order: *sīla*, *samādhi*, *paññā*. See, [“Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi.”](#)

- However, one must take a gradual approach: [“Is It Necessary for a Buddhist to Eliminate Sensual Desires?”](#).
- Just focusing the mind on one object, like the breath, **cannot remove** those defilements. It can only **suppress them temporarily**. That is the fundamental problem with “breath meditation.”

6. **Thus, it would be hard to achieve calmness even with breath meditation if one is actively engaged in the BIG EIGHT.**

- What we discussed above is a simple version of *Kāyānupassanā*, the first step in *Satipaṭṭhāna*; see, [“Satipaṭṭhāna – Introduction.”](#)
- If one is habitually engaged in one or more of those eight activities, the first thing to do is try to get rid of them. First, start with the worst habit and proceed gradually until all are bad habits removed. It is like emptying the well of the dirty water.
- That is a BIG STEP. It may take a little while, depending on how much “gunk” is there. But one thing is not to rush out and try to do much. That could be stressful too. The best thing to do is abstain from one or two big ones and experience the “cooling down” that results from it.
- Vain talk is a habit that should be gotten rid of early. It does not do any good for oneself or others. One will inevitably say something inappropriate (possibly slandering and lying too, which are also in the BIG EIGHT) when one gets carried away during the vain talk. Getting rid of it will help with being able to calm the mind quickly.
- The mind needs to see the benefits of doing something before it gets on board. That is why, initially, it may take a firm determination to stick with the plan.
- **It is important NOT to get used to “breath meditation.”** If you are used to it, I urge you to gradually stop and try the procedures described here at least for a couple of months. We want LONG TERM results. Many people get addicted to “breath meditation” to get temporary relief. **THAT IS A MISTAKE.**

7. Getting rid of bad old habits and installing new good habits is a KEY in the meditation practice; we will talk about habits (“*gati*,” which become “*āsavas*” over time) in more detail in the next section. Here are some basic ideas that would be helpful:

- To form a new habit takes some effort initially. I tried it out by making a new habit of peeling oranges with my left hand (I am right-handed). Initially, it was hard, and the main problem was that I kept forgetting to use my left hand. I had to set the alarm to remind myself first. But after a few days, I started

remembering, and after a week or two, the new habit was working. Now I automatically do it, and now it is a bit strange to try to peel oranges with the right hand!

- When we make a new habit, a set of neurons in the brain start to wire together for that task; the more we do it, the stronger the neural connections become. That is what happens when we learn to ride a bike, drive a car, or zillions of other things that we do without even thinking about it; see, “[True Brain: How the Mind Rewires the Brain via Meditation/Habits](#)” and “[How Habits are Formed and Broken – A Scientific View](#).”
- In breaking a habit, one needs to do the reverse. When one starts to smoke less and less, the neural connections for that task will become weaker. After a while, it will become more natural NOT TO smoke. The brain will stop giving that signal. So it is critical to have the determination to hold off the urge in the beginning. Try to replace that activity with something else at that time. One can remove any bad habit that way. It is the same principle.

8. The primary formal meditation technique is in the next section. Those who need time to get rid of the BIG EIGHT can also monitor the progress by doing such formal meditation sessions. It is essential to realize that all defilements (bad habits) are removed only at the *Arahant* stage. So, there is no point in getting discouraged if it takes time to stop bad habits; **the key is to make progress and not go backward.**

- Sometimes when one starts on the *Ariya Bhāvanā*, things may look worse before getting better. It is like trying to cool a hot iron by sprinkling water on it when all that smoke comes out and may appear to be getting worse. But one needs to be persistent. One needs to keep in mind that uncountable beings have attained “cooling down” by having faith in the Buddha.

Next, “[3. The Second Level – Key to Purify the Mind](#)”,

12.3

3. The Second Level – Key to Purify the Mind

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. Let us go back to the example of the abandoned well. Now we have done a decent job of cleaning the dirty water that had been there for a long time, i.e., we have reduced at least some of the main immoral acts, the BIG EIGHT.

- Now we need to make sure that things do not fall into the well while we try to make the water even more cleaner; if there is no barrier around it, when it rains mud water can fall into the well. As with the well, we need to make sure that we keep those BIG EIGHT out of our minds as much as possible. **This is ‘sīla’ (pronounced “seela”) or moral living.**

2. In order to make sure that we will not drift back to the old ways, we need to cultivate moral mindfulness (“*sati*”): we need to be on the “lookout” for any temptations to break the BIG EIGHT. But there is a catch that most people do not comprehend: bad habits and cravings or “*gati/āsavas*” that we have are not only from this life, but possibly from previous lives as well.

3. Again, we can use the old water well as an example: When we drained the water out of the well, the well starts filling up with water from underground fresh water oozing through cracks (from underground aquifers) which is pure.

- However, if there is a rotten stuff at the bottom of the well that had been there for a long time, then that pure water gets contaminated. Our bad habits (*gathi/āsavas*) are like the dirt at the bottom of the well.

4. The water in the above well will now look relatively more clear if it is undisturbed, i.e., when we let the water to settle down. **This is effectively what we do in breath meditation or any such *samatha* meditation.** When someone is abstaining from the BIG EIGHT, it is relatively easy to calm the mind by going to a quiet place, closing the eyes, and then focusing one object, say the breath.

- Such meditations are *anāriya* meditations; they provide only temporary relief. One could also get into *anāriya jhānā* this way, with lots of practice, especially if one could live a secluded life. Ancient *yogis* who lived moral lives and stayed away from other humans in forests could attain higher *jhānā*.
- What happens here is that the five hindrances are kept SUPPRESSED. It is like the rotten stuff kept undisturbed at the bottom of the well.
- If one takes a long pole and stir the well, those contaminants start coming up.

5. In the same way, when someone comes out of the quiet place, one gets “disturbed” with external sense stimuli (i.e., when a particularly strong sense object is presented). For someone with a lot of lust, it could be a picture of an attractive person. If someone has a lot of hate towards another, then hateful thoughts can come to the surface just by someone mentioning that person’s name.

- This “bubbling up of bad stuff to the surface” is called “*anusaya*.” To stop such *anusaya*, those *gathi/āsava* need to be removed (gradually).
- These terms are explained in, “[Gathi \(Gati\), Anusaya, and Āsava.](#)”
- This is why people who have a very calm and peaceful experience at a meditation resort come back to regular hectic life and see that experience fade away gradually. That is because it WAS a temporary solution. **What we have in mind here is a more permanent solution. But this approach takes a bit more time.**

6. So, how do we really clean the well? It is not enough to let the gunk to sink back to the bottom; we need to remove the gunk that has accumulated at the bottom of the well. There could even be toxic things down there. Thus it takes an effort to remove all those. Once those are removed, there is nothing down there that

can contaminate the fresh water coming out. When the well fills up we only need to make sure that things do not fall back in to contaminate the well.

- Similarly, what we need to do with our minds is to remove the bad habits (*gathi/āsavas*) that have been accumulated over countless past lives and reinforced in this life. If we have hate in our minds, that hate can triggered easily. This is why some people are prone to “flare-ups” than others. If we have extreme greed, we can be tempted easily to act immorally for sense satisfaction through any of the six senses.
- Even though the main ones are greed and hate, there are uncountable number of combinations (when included with ignorance). That is why we see uncountable number of habits/personalities/tendencies in different people. **No two persons are alike, even identical twins.**

7. Looking at the five hindrances, the main culprits are of course, greed, hate, and *vicikicchā* (the particular set of things one has a liking for, which can be things liked or disliked). The other two help bring out these: the “lazy mind” will not take any effort to suppress bad thoughts; the “dispersed mind” is too dispersed to be focused, to think clearly. All these are intimately connected to the habits (*gati/āsavas*).

- By the way, if one can remove all the *gati/āsavas*, that is when one attains *Nibbāna*. The Buddha realized the “*āsavakkhaya nana*” just before attaining the Buddhahood. *Āsavakkhaya* is “*āsava*+”*khaya*” or removing the temptations; “*khaya*” is the getting rid of “*saṇ*”; see, “[What is “Saṇ”? – Meaning of Sansāra \(or Samsāra\).](#)”
- Here we are trying to remove some easily removable less potent habits, and at least try to reduce the big ones. The good news is that we can EXPERIENCE the relief or “cooling down” or “*niveema*” each time we either remove a small bad habit or lessen the severity of bigger ones. We don’t have to remove ALL bad habits/cravings in order to experience the “cooling down”.

8. After making a commitment to abstain from the BIG EIGHT as much as possible, we need to sort out our bad habits.

- Make a list with little things on the top and more serious things towards the bottom. We all have greed and hate; those are the “big ones”; what we need to do here is try to remove easily identifiable smaller bad habits; for example, explosive temper, stinginess, seeking too much sense pleasures (i.e., being addicted to alcohol, drugs, even excess eating).
- It is important to get rid of the ones at the top (the easy ones), and that will provide incentive to continue. If one tries to tackle the big ones straight away, one might get discouraged and give up the whole effort.

9. Of course, focusing on the BIG EIGHT is very important. If one is engaging in killing animals for pleasure (eg., fishing), then that needs to be stopped if one is serious about meditation. If one is making a living by stealing from others, that needs to be stopped. If one is engaged in sexual activities with other married people, that needs to be stopped, etc.

- Those are common sense things too. If one looks at one’s actions and see that it can cause harm for oneself AND/OR others, then one needs to seriously start thinking ways to initially reduce and eventually to stop such actions.

10. There are several posts on habits and *gati/āsavas*; you may want to find and read them. And contemplate on those ideas. An English discourse on this topic is given in the post, “[How Are Gati and Kilesa Incorporated into Thoughts?](#).”

- As I emphasized at the beginning, one has to make an effort; even the Buddha could only show the way. We need to examine what he suggested, think through to make sure they make sense. Then the mind gets on-board, especially when it starts seeing the benefits, even small benefits.
- The key is to get started; when one accomplishes even a small goal that provides the fuel to go further.

11. One could and should use the “four bases of mental power (*cattāro iddhipāda*)” in accomplishing these goals. Tackle one goal at a time. As you accomplish more and more goals, the *iddhipāda* (*chanda, citta*,

virīya, *vīmaṃsā*) will grow as well. These are the critical factors that the *yogis* used to cultivate mundane (*anāriya*) *jhānā* and gain extraordinary mental powers too.

- *Chanda* is the desire to achieve the goal. *Citta* is the determination one makes and the *virīya* is the effort that one puts in to get it done. *Vīmaṃsā* is careful examination of the benefits of breaking the habit and the possible repercussions of keeping the habit. As the four *iddhipāda* grow (with accomplishment of more and more goals), the *vīmaṃsā* faculty grows in particular; this is a facet of wisdom (*paññā*).

12. In trying to remove any bad habit, it is essential to look at the negative repercussions or bad consequences (called *ādeenava* or *ādīnava*) from that activity. Let us take the bad habit of getting into a rage as an example:

- Think about the unpleasant feeling of getting “heated up” in a moment of rage. Of course, at the moment of rage one may actually enjoy it: In extreme cases, this is why there are people dead with 30-40 stab wounds, when all it takes to kill a person a couple of stabs; such is the danger of getting into a rage. One feels bad about it only later, and then it is too late.
- Even worse are the *samsāric* consequences: If rage becomes a dominant characteristic of one’s personality, it is possible that this is what will be grasped at the moment of death and a birth of a “similar kind” could result, i.e., birth in a burning hell (this is the principle of *Paṭicca Samuppāda*: “*pati+ichcha*” leading to “*sama+uppada*”).

13. Let us take a few examples to see how some bad habits can be tackled:

- Many people have bad temper (which could develop into hate) which is a result of *vyāpāda*. Yes. This is a *samsāric* habit, and unlike many other habits, this one is hard to control when triggered. This is one that needs to be dealt with when the anger is absent. The best is do the *Mettā Bhāvanā*. We will use the *Ariya Mettā Bhāvanā* later. For now, one could close the eyes at a quiet time, and sincerely say, “May all beings be free of suffering, free of ailments, free of anger, and be happy”. If you have a particular person that you are not in good terms, repeat with his/her name. We cannot remove the anger in the mind of that person. We can only remove the anger within ourselves. Do this a couple of times a day and if you do it sincerely it will give results (for YOU to have a peace of mind).
- If you are a person with cravings for sense pleasures (I do not mean necessities), your mind is likely to be frequently seeking such things. Try to cut down on such activities, and also try to do more giving. Donate to charities, give a few dollars to a homeless person. All these will make you feel better; this is called *pīti* (“*preethi*” in Sinhala or joy).
- Also, when you simplify your life, the burden on your mind will be less, and you will get a different kind of joy than that from sense pleasures; this is “*niveema*” or “cool down,” or *nirāmisā sukha*; see, “[Nirāmisā Sukha](#).”
- Alcohol or cigarette addiction is another example. Instead of trying to stop such a habit “cold turkey,” it is better to cut down gradually. But one MUST have the discipline (the importance of cultivating the *iddhipāda* comes here) to stick to the plan, and not go back. It also helps to find a replacement activity at that time (taking a less potent drink or chewing a gum, etc). One of the four *iddhipāda* that is essential here is *citta* or determination.

14. Now we are at a point where I can introduce the real *ānāpānasati bhāvanā* that was described by the Buddha.

Next, “[4. What do all these Different Meditation Techniques Mean?](#)”,

12.4 **4. What do all these Different Meditation Techniques Mean?**

Revised April 11, 2020; September 4, 2022

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help to gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. Buddha Dhamma is focused on purifying the mind of greed, hatred, and ignorance. As the mind is purified, it gains *nirāmisa sukha* which can be experienced at various levels from the beginning. If one can “stick to” this program for a couple of months, one can look back and see the change in oneself. One should have a more peaceful, calm mind that has “cooled down”.

- A mind is impure because it attaches to “things in this world” with the misconception that things in this world (31 realms) can be maintained to one’s satisfaction, i.e., with the perception of *nicca*. Thus the prevailing mindset is that happiness (*sukha*) should be attained by employing any means. And once attained it can be maintained and thus one is in total control of one’s affairs (*atta*).
- These three misconceptions of *nicca*, *sukha*, and *atta* are the three culprits that keep us bound to “this world” of 31 realms, i.e., the endless rebirth process or *samsāra*. The Buddha showed that the actual reality of “this world” is described by the three characteristics of *anicca*, *dukkha*, and *anatta*: No matter how hard we try, we cannot maintain things to our satisfaction in the long term (*anicca*). Thus we get distraught (*dukkha*), and thus we are not in control and become helpless when born in bad realms like the animal realm (*anatta*).
- More details in the first discourse at, [“Tilakkhana – English Discourses.”](#)

2. I am NOT saying that one should not work hard to get a good education and job. That MUST be done. It is impossible to have peace of mind if one is hungry and homeless. But we also need to be aware of the FACT that all mundane achievements are temporary. Even if we get to live this life without a major catastrophe, we have to leave all behind when we die.

- One acts with greed, hate, and ignorance and makes the mind impure because of the wrong perceptions of *nicca*, *sukha*, and *atta*. Then one is capable of immoral acts to get some temporary satisfaction because the bad consequences of such actions may not be clear. However, when one truly understands the reality (i.e., *anicca*, *dukkha*, *anatta*), such immoral actions become unlikely.
- For that stage to be reached, one has to train one’s mind to “take in the good” and “reject the bad”. For that, a change in one’s habits (with *Ānāpānasati* meditation) is necessary.

The following is a logical sequence for meditation:

3. First, one must sort out what is good and bad and the consequences of good and bad actions. This is why the vision, *Sammā Diṭṭhi*, comes first in the Noble Eightfold Path. To get to *Sammā Diṭṭhi*, one needs to “sort out the good from the bad.”

- *Vipassanā* (*vi+passa* means “to see clearly” and discard. Here, where “*vi*” means “special” and “*passa*” is to “see.” *Vidassana* (*vi+dassana* means sort out by clear vision, whereas “*dassana*” means the vision) means the same thing. Understanding Buddha Dhamma and acquiring the vision are needed to sort out the “good” from the “bad”.
- I cannot emphasize enough the importance of *vipassanā* (*vidassana*) or insight meditation. **Without the “correct” vision, one could strive for the whole life and not get anywhere:** one has to understand the true nature of this world (*anicca*, *dukkha*, *anatta*), the Four Noble Truths, and the Noble Eightfold Path. It is not memorization, but understanding that counts.

4. A huge amount of defilements are removed from one’s mind with this insight meditation. The key is to understand the “*anicca* nature of this world”. It is the first type of meditation that is needed. One can attain the *Sotāpanna* stage without doing any other types of meditation discussed below.

The Buddha once took a bit of soil to a fingertip and told the *bhikkhus* that, “if the amount of defilements a *Sotāpanna* needs to get rid of is comparable to this amount of soil, then a normal human being has to get rid of an equivalent to the soil in the whole Earth”.

- That is not a misprint or an exaggeration. A *Sotāpanna* is bound to attain *Nibbāna* within a maximum of seven “*bhava*.” A normal human being could be trapped in the rebirth process for trillions of years to come. We have been through the rebirth process for countless trillions; see “[Infinity -How Big is It?](#)”.
- Many say, “I do like my life. Why would I not want to be reborn?”. **The problem is, that future rebirths may not be in the human realm.** We have no idea what we have done in our past lives. Thus even if we live a perfectly moral life, there are no guarantees that we will get a good rebirth. This is why understanding *kamma*, rebirth, etc via insight meditation is important.

5. How does one do insight meditation? Listening to discourses and reading Dhamma concepts are the two main forms of getting the correct information. Then one could contemplate those concepts in sitting meditation. **But reading up on Dhamma concepts during a quiet time is meditation; also see, “[How to Cultivate the Anicca Sañña](#)”** and the follow-up post.

- Once some understanding is reached via *vipassana* (*vidassana*) *bhāvanā* or insight meditation, one can start the next two key steps. *Mettā bhāvanā* and various forms of *anupassanā bhāvanā*.
- Once one understands the true status of affairs in the wider world of 31 realms, one can really comprehend the amount of suffering that has been hidden. With that understanding, one can engage in the *Ariya mettā bhāvanā*, an excellent way to pay back our old debts to other beings. **This is the second way to purify our minds too.**
- I hope I have conveyed the idea that the bulk of work can be done with just insight meditation, contemplating “*anicca, dukkha, anatta*.” However, doing the other two types of *bhāvanā*, i.e., *mettā bhāvanā* and *ānāpānasati*, can be helpful for insight meditation too.

6. The last and third way to purify the mind is via *anupassana*. *Anupassana* means “discard according to the principles learned” (“*anu*” means according to, and “*passana*” means to “see.” Another meaning of “*anu*” is defilements, which is “to be able to see one’s defilements”). *Anupassanā* can take various forms.

- *Ānāpānasati bhāvanā* is the foundation. Once “*ana*” and “*pana*” are sorted out by *vipassana* (*vidassana*), one needs to engage in *Ānāpānasati* all the time. This means one needs to be mindful of what one is about to do and ensure it is the “right thing to do”.
- When one starts understanding *anicca, dukkha*, and *anatta*, one can start doing the *aniccānupassanā*, *dukkhānupassanā*, and *anattānupassanā*, and four more related “*anupassanā*”. I will elaborate on this later.
- *Satipaṭṭhāna bhāvanā* (with *kāyānupassanā*, *vedanānupassanā*, *cittānupassanā*, and *dhammānupassanā*) includes all the *bhāvanā* techniques that we have discussed so far. It is THE ultimate encompassing everything needed to attain stress relief. It can take one to *Arahanthood*. *Ānāpānasati* (not breath meditation) is essentially the same as *Satipaṭṭhāna*, and that is the first step to attaining the *Sotāpanna* stage. See “[Elephant in the Room 3 – Ānāpānasati](#).”

7. Thus one could make things simpler by just doing insight meditation, *Ānāpānasati*, and the *mettā bhāvanā*. That is all one needs to do to have a “better state of mind” or even to become a *Sotāpanna*.

8. The problem with meditation techniques taught even in *Theravāda* schools these days is the following. They are either breath meditation or chantings. How can one remove defilements by watching the breath? Even though it can calm the mind, there are no long-term benefits. Watching the breath CANNOT reduce defilements from the mind.

- Another popular technique is just to contemplate impermanence. They keep repeating, “my body is impermanent; it is subjected to decay and death.” Has anyone achieved any progress doing that for even

twenty, or thirty years? A Buddha does not need to tell us that. All people, belonging to any religion, know impermanence is a fact of life!

- Yet another popular “chanting” is to contemplate the “foulness of the body”. That is not what the Buddha meant by the “*patikula manasikāra bhāvanā*.” Again, everyone knows that our bodies are subject to decay and death; see “[Mahā Satipatṭhāna Sutta](#).”

Next, “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#)”,

12.5 **5. Ariya Mettā Bhāvanā (Loving Kindness Meditation)**

Revised February 11, 2020

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section are on possible meditation subjects. They can be used to clarify unresolved questions, and to get to *samādhi*. The first 11 posts should be followed in that order, at least initially.

Introduction

1. We all have acquired innumerable “bad *kamma vipāka*” in this cycle of rebirths (*samsāra*) that has no beginning. There is a very simple recipe for stopping many of such “bad *kamma vipāka*” from coming to fruition by “wearing out” and ultimately removing the “*kamma seeds*” (*kamma bīja*) associated with them.

- We acquire a bad “*kamma seed*” when we do something wrong to a living being, and we become indebted to that being. Just like we can become “debt-free” by paying off debts, we can pay off that debt. The problem is that we have become indebted to innumerable beings in previous rebirths. In the *Mettāsaṃhagata Sutta* (SN46.54) and other *suttā*, the Buddha has explained how much of this debt can be paid off by doing the *Ariya metta bhāvanā* and also by transferring merits to “all beings” when we do a good deed; see, “[Transfer of Merits \(Pattidana\) – How Does it Happen?](#).”
- Here we focus on the *Ariya Mettā Bhāvanā*. First some background material to clarify what this means. Also see, “[Karaniya Mettā Sutta – Mettā Bhāvanā](#).”

Mundane Mettā Bhāvanā

2. The standard or mundane *Mettā bhāvanā* (loving kindness meditation) goes something like, “May myself and all beings be free of suffering, healthy, happy, and be free of all suffering”, or some similar (longer) passages.

- Any type of such meditation is of course good. It makes your own mind calm down, and makes you think about the (mundane) welfare of the other beings.

Ariya Mettā Bhāvanā

3. However, the *Ariya Mettā Bhāvanā* has a much more deeper meaning. It is done with at least some idea of the complexity of “this world” with 31 realms and the status of the beings in those realms. In order to cultivate true compassion and loving-kindness one NEEDS TO FEEL the possible suffering in all those realms; see, “[The Grand Unified Theory of Dhamma](#)”:

- The beings in the lowest four realms (*apāyā*) undergo unimaginable suffering, both physical and mental.
- In the lowest five realms (the *apāyā* and the human realm), beings have physical bodies that are subject to sicknesses, body aches, and getting old before dying.
- The sixth through eleventh realms are that of the *devas*. They have spontaneous births with fully formed (but less dense) bodies that are not subjected to sickness, aches and pains. There are no visible signs of old age until close to death. But they also have all five physical senses just like the lower five realms. But their physical bodies are much more dense, “[Body Types in 31 Realms – Important of Manomaya Kāya](#).”
- The higher 20 realms that include *rūpa loka* and *arūpa loka* have even less dense bodies than the *devas*, and do not have the physical sense faculties for taste, smell, and body touch. Thus any suffering they have is all mental, and not as intense as in the lower realms.

The Difference With the *Sotāpanna* stage

4. Therefore, no living being is free of FUTURE suffering in any of the 31 realms, because unless the *Sotāpanna* stage of *Nibbāna* has been attained, even the beings in the highest realm can end up even in the *apāyā* (lowest four realms) in future rebirths.

- And the only way to attain the *Sotāpanna* stage of *Nibbāna* is by comprehending the Three Characteristics of this world of 31 realms: *anicca*, *dukkha*, *anatta*.
- The first level of understanding of *anicca*, *dukkha*, *anatta* leads to the *Sotāpanna* stage; when one attains the *Sotāpanna* stage, one becomes free from the *apāyā* FOREVER. This happens via the inability of the mind of a *Sotāpanna* to generate certain *cittā* with “*apāyagāmī*” kammic power; see, “[Akusala Citta – How a Sotāpanna avoids Apayagami Citta](#)” and “[Conditions for the Four Stages of Nibbāna](#)”.

Higher Stages of *Magga Phala*

5. When the next stage of *Nibbāna* (*Sakadāgāmī* stage) is attained, one becomes free of births in the lower five realms where suffering due to physical ailments and diseases are possible. Thus one PERMANENTLY becomes “healthy” by attaining the *Sakadāgāmī* stage.

- At the *Anāgāmī* stage, one removes more *akusala citta* (and other fulfill other conditions; see, “[Conditions for the Four Stages of Nibbāna](#)”), and will never be born again in *kāma loka* including the *deva* realm. Thus one becomes PERMANENTLY free of any physical suffering.
- Then at the *Arahant* stage, all defilements are removed from the mind, and one will never be reborn in any of the 31 realms. The mind truly becomes free and one attains permanent *nirāmisa sukha*; see, “[Three Kinds of Happiness – What is nirāmisa sukha?](#)” and other posts on *nirāmisa sukha*.
- As you can see, the *Ariya Mettā Bhāvanā* is similar in structure to the conventional one, but the words have deeper meanings. For example, by saying “be healthy” now it is meant to be healthy forever. That means not to be born ever with a body that is subject to diseases and old age.

Elements of the *Ariya Mettā Bhāvanā*

6. Now we can see how the *Ariya Mettā Bhāvanā* is formulated:

- “May myself and all living beings attain the *Sotāpanna* stage and be free from suffering in the *apāyā* forever”
 “May myself and all living beings attain the *Sakadāgāmī* stage and be healthy forever”.
 “May myself and all living beings attain the *Anāgāmī* stage and be content (attain peaceful happiness) forever”.
 “May myself and all living beings attain the *Arahant* stage and be free from all suffering and attain the full *Nibbānic* bliss”.
- All four *Brahma Vihāra* (*mettā*, *karuṇā*, *muditā*, *upekkhā*) cultivate with this *bhāvanā*.
- Off course, the *Bhāvanā* becomes increasingly effective as one starts to comprehend *Tilakkhaṇa* better.

Just Chanting Is Not Enough

7. What matters is not the particular set of word used, but what is felt in one's heart. In order to do that one needs to truly comprehend that there is REAL SUFFERING in this world, not only at the human or animal realms but in many other realms.

- The impact of the *Mettā Bhāvanā* increases gradually with an increased understanding of *anicca*, *dukkha*, *anatta*, because then one realizes the dangers and suffering that all living beings face in future lives.

- The potential of the *Mettā Bhāvanā* is enormous. The Buddha said one could attain the *Anāgāmi* stage by correctly doing the *Mettā Bhāvanā*. But that entails understanding *anicca*, *dukkha*, *anatta*, i.e., attaining the *Sotāpanna* stage or at least embark on the path to *Sotāpanna* stage.
- However, even before attaining the *Sotāpanna* stage, one could reap many benefits by doing this correct *Ariya Mettā Bhāvanā*; see, “[Kamma, Debt, and Meditation](#).”

Essential of Meditation

8. It is best to do *Ariya Mettā Bhāvanā* and *Vipassanā Bhāvanā* (meditation on *anicca*, *dukkha*, *anatta* and other dhamma concepts) in a sitting meditation session every day; see, “[4. What do all these Different Meditation Techniques Mean?](#).”

- Initially, 10-15 minutes would be good for formal meditation. That time will automatically increase as the *nirāmisā sukha* sets in one starts seeing the benefits. Later on, one could stay in meditation for hours.
- Of course, *Ānāpānasati* needs to be practiced the whole day. *Ānāpānasati* means being aware of what is “taken in” (*āna*) and what is “discarded” (*āpāna*.) See, “[7. What is Ānāpāna?](#)” and other related posts in the meditation section.
- Listening to discourses and reading about Dhamma are also forms of meditation. That should be done during quiet times so the key concepts can be absorbed.

Results Will Grow With Better Understanding

9. The *Ariya Mettā Bhāvanā* is one of the most POTENT tools that we have. It is a simple concept, but the main difficulty is with the “*Ariya*” part. One needs to comprehend *anicca*, *dukkha*, *anatta* for the *bhāvanā* to be fully effective.

- Still, even the mundane version stated in #2 above is a good start. As one follows the Path and understands the concepts better (not the book knowledge), the *javana* power in one’s thoughts become strong, and the *bhāvanā* becomes stronger and more effective.
- In the *Abhidhamma* language, the most potent *kusala citta* is the “*somanassa sahaḡata ñāṇa sampayutta asaṅkhārika citta*,” i.e., the “thought that arises with joy and wisdom automatically”. This thought also gets stronger with increasing wisdom and gets stronger as one gets to *Sotāpanna magga*, *Sotāpanna phala*, etc and optimum only at the *Arahant* stage.
- Yet even when one is following the mundane eightfold path, this *citta* is there, at a lower strength. One needs to be cultivate it. See, “[Buddha Dhamma – In a Chart](#),” and “[What is Unique in Buddha Dhamma](#).”

Next, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#)”,

12.6 6. Ānāpānasati Bhāvanā (Introduction)

Revised July 22, 2020

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. I hope that several key points are clear from the discussion in the post, "[3. The Second Level – Key to Purify the Mind](#)":

- Bad habits (*gati/āsava*) are associated with one more immoral or unworthy acts, speech, or thoughts. We need to discard those.
- To counter the bad habits, one needs to cultivate good habits. For this, we need to improve moral behavior by engaging in ethical activities that bring joy to the heart.
- AND we need to do this all the time; we cannot let bad habits come back, which means we need to be on the lookout for any lapses in our practice. And we need to be on the lookout for opportunities to do moral acts that are beneficial for oneself and others.

2. In a general sense the Pāli word *ānāpāna*, “*āna*” includes anything that needs to “taken in” for the betterment of life, and “*āpāna*” the opposite. For example, we should eat only foods that are good for the body and stay away from or discard bad foods.

- Nowadays, “*āna*” is taken to be “breathe in” and “*āpāna*” is assumed to be “breathe out.” Now, “*sati*” means mindfulness, and thus, the word “*ānāpānasati*” interpreted as “mindfully breathing in and mindfully breathing out.” That is the mundane (or “*padaparama*”) interpretation of “*ānāpāna*.”
- Buddha meant something deeper that would help cleanse the mind.

3. The Buddha described *bhāvanā* as follows: “*āsevitāya, bhāvitāya, bahuleekathāya,...*” or “keep close association, use often, and use all the time (what is good).....”. **When one is making an effort to form a new habit, one should be thinking about it and doing things to support that whenever possible. Trying to do it in a formal meditation session will not be enough.**

- We discussed the current scientific explanation of how repeated acts help form habits by strengthening a set of neural connections in the brain. See, “[Truine Brain: How the Mind Rewires the Brain via Meditation/Habits](#).” The same thing works to break bad habits by NOT doing it whenever that comes to the mind. Then existing neural connections will get weaker.
- **What is to contemplate: To be mindful to “take in good things (*kusala* or moral things), and to “discard bad things (*akusala* or immoral things).” That is the real meaning of *ānāpānasati bhāvanā*.**

4. Now, with all the discussion we have had up to this point, how can just a process of “breathing in” and “breathing out” mindfully GET RID OF either the bad habits (*gati/āsāvā*) or the five hindrances?

- Of course, that is not possible.
- But it CAN do one thing, as we mentioned before. If we sit in a quiet place with the eyes closed (i.e., turn off the five physical senses in effect), AND fix the mind on the breath, we can get the five hindrances to settle down and not come up (assuming that we are staying away from committing the BIG EIGHT immoral acts).
- However, this calming down or getting to *Samatha* is a TEMPORARY solution. The moment we come back to the real world with all its distractions and temptations, those habits take over.

5. The breath meditation needs to be used appropriately, with the understanding that it can provide only temporary relief. This breath meditation is the same meditation that was used by the Hindu *yogis* to attain mundane (*Anāriya*) *jhānā* even before the Buddha.

- Since the time Buddhaghosa's Visuddhimagga was accepted as the basis of Theravāda Dhamma (in the fifth century CE), this "literal interpretation" of the *ānāpānasati* has been used.
- The real *ānāpānasati bhāvanā* is not described in the *Visuddhimagga* and is not described in any Mahāyāna or even Theravāda texts today. One needs to go directly to the *Tipiṭaka* to find it; it is described in many *suttā*, for example, the *Assāsa sutta*. I could not find an English translation of this *sutta*. Another one *Arittha Sutta*, and the translation published at the Access to insight site is not complete, even though it does contain Buddha's admonition to Ven. Arittha that in and out-breathing is only one version of *Ānāpānasati* (in the *sutta* it says it is NOT the *Ariya* or Noble version) : [WebLink: ACCESSTOINSIGHT: Arittha Sutta: To Arittha](#)
- [Arittha Sutta: To Arittha \(On Mindfulness of Breathing\)](#)

6. Thus there are two interpretations of the *Ānāpānasati Bhāvanā*. One is the conventional "breathing" version and the other is the real version recommended by the Buddha, which has a wider interpretation, including breathing to a minor extent.

- The correct meaning is in many *suttā*. Of course, the main *sutta* is "[WebLink: suttacentral: Ānāpānasati Sutta \(MN 118\)](#)." The *Ānāpānasati sutta* is the condensed version of the Buddha's discourses on *Ānāpānasati Bhāvanā*. As with most main *suttā*, the discourse was condensed into the form for easy transmission. Other *suttā*, mostly by Ven. Sariputta, have explained the terms like "āna" and "āpana" in detail (like the *Assāsa Sutta*).
- I have discussed the *sutta* at a bit deeper level in "[7. What is Ānāpāna?](#)" and "[8. The Basic Formal Ānāpānasati Meditation](#)."
- See, "[Is Ānāpānasati Breath Meditation?](#)," where I provide a detailed discussion based on the *Tipiṭaka*.
- Furthermore, Sinhala commentaries (*Atthakathā*) were also written to explain the main *suttā*. Unfortunately, these *atthakathā* were burned down shortly after Buddhaghosa wrote his *Visuddhimagga* and other books. However, three important ones (*Paṭisambhidā Magga Pakarana*, *Pitakopadesa*, and *Netthipakarana*) have survived because they had been included in the *Tipiṭaka*. What I describe here is from those books in the *Tipiṭaka*.
- Buddhaghosa was a Hindu before converting to be a Buddhist later on; see, "The Life and Work of Buddhaghosa" by B. C. Law (1927). Some say he became a Buddhist in order to introduce Hindu concepts to Buddha Dhamma. Either that or he just used whatever he understood to be the *Ānāpānasati* without any malicious intentions. Either way, the correct interpretation had been hidden for all these years; see, "[Buddhaghosa's Visuddhimagga – A Focused Analysis](#)."

7. The key message of the Buddha was that we need to remove the greed, hate, and ignorance that we all have in our minds, and by doing that we can experience the *nirāmisā sukha* that is of better quality and of permanent nature. Let us now discuss the basic meditation technique that will start us on the correct path to achieve lasting happiness.

- More evidence from the *Tipiṭaka*: "[Is Ānāpānasati Breath Meditation?](#)"

Next, "[7. What is Ānāpāna?](#)",

12.6.1 Arittha Sutta - To Arittha (On Mindfulness of Breathing)

SN 54.6

PTS: [S v 314](#)

CDB ii 1768

Arittha Sutta: To Arittha
(On Mindfulness of Breathing)
translated from the Pāli by
Thanissaro Bhikkhu

[© 2006](#)

At Savatthi. There the Blessed One said, "Monks, do you develop mindfulness of in-&-out breathing?"

When this was said, Ven. Arittha replied to the Blessed One, "I develop mindfulness of in-&-out breathing, lord."

"But how do you develop mindfulness of in-&-out breathing, Arittha?"

"Having abandoned sensual desire for past sensual pleasures, lord, having done away with sensual desire for future sensual pleasures, and having thoroughly subdued perceptions of irritation with regard to internal & external events, I breathe in mindfully and breathe out mindfully."^[1]

"There is that mindfulness of in-&-out breathing, Arittha. I don't say that there isn't. But as to how mindfulness of in-&-out breathing is brought in detail to its culmination, listen and pay close attention. I will speak."

"As you say, lord," Ven. Arittha responded to the Blessed One.

The Blessed One said, "And how, Arittha, is mindfulness of in-&-out breathing brought in detail to its culmination? There is the case where a monk, having gone to the wilderness, to the shade of a tree, or to an empty building, sits down folding his legs crosswise, holding his body erect, and setting mindfulness to the fore.^[2] Always mindful, he breathes in; mindful he breathes out.

"[1] Breathing in long, he discerns, 'I am breathing in long'; or breathing out long, he discerns, 'I am breathing out long.' [2] Or breathing in short, he discerns, 'I am breathing in short'; or breathing out short, he discerns, 'I am breathing out short.' [3] He trains himself, 'I will breathe in sensitive to the entire body.'^[3] He trains himself, 'I will breathe out sensitive to the entire body.' [4] He trains himself, 'I will breathe in calming bodily fabrication.'^[4] He trains himself, 'I will breathe out calming bodily fabrication.'

"[5] He trains himself, 'I will breathe in sensitive to rapture.' He trains himself, 'I will breathe out sensitive to rapture.' [6] He trains himself, 'I will breathe in sensitive to pleasure.' He trains himself, 'I will breathe out sensitive to pleasure.' [7] He trains himself, 'I will breathe in sensitive to mental fabrication.'^[5] He trains himself, 'I will breathe out sensitive to mental fabrication.' [8] He trains himself, 'I will breathe in calming mental fabrication.' He trains himself, 'I will breathe out calming mental fabrication.'

"[9] He trains himself, 'I will breathe in sensitive to the mind.' He trains himself, 'I will breathe out sensitive to the mind.' [10] He trains himself, 'I will breathe in satisfying the mind.' He trains himself, 'I will breathe out satisfying the mind.' [11] He trains himself, 'I will breathe in steadying the mind.' He trains himself, 'I will breathe out steadying the mind.' [12] He trains himself, 'I will breathe in releasing the mind.' He trains himself, 'I will breathe out releasing the mind.'^[6]

"[13] He trains himself, 'I will breathe in focusing on inconstancy.' He trains himself, 'I will breathe out focusing on inconstancy.' [14] He trains himself, 'I will breathe in focusing on dispassion.'^[7] He trains himself, 'I will breathe out focusing on dispassion.' [15] He trains himself, 'I will breathe in focusing on cessation.' He trains himself, 'I will breathe out focusing on cessation.' [16] He trains himself, 'I will breathe in focusing on relinquishment.' He trains himself, 'I will breathe out focusing on relinquishment.'

"This, Arittha, is how mindfulness of in-&-out breathing is brought in detail to its culmination."

Notes

¹. The Commentary reads this statement as indicating that Arittha has attained the third level of Awakening, non-return, but it is also possible to interpret the statement on a more mundane level: Arittha is simply practicing mindfulness in the present moment, having temporarily subdued desire for past and future sensual pleasures, and having temporarily subdued any thought of irritation with regard to the present.

2. To the fore (*parimukham*): The Abhidhamma takes an etymological approach to this term, defining it as around (*pari-*) the mouth (*mukham*). In the Vinaya, however, it is used in a context (Cv.V.27.4) where it undoubtedly means the front of the chest. There is also the possibility that the term could be used idiomatically as "to the front," which is how I have translated it here.
3. The commentaries insist that "body" here means the breath, but this is unlikely in this context, for the next step — without further explanation — refers to the breath as "bodily fabrication." If the Buddha were using two different terms to refer to the breath in such close proximity, he would have been careful to signal that he was redefining his terms (as he does below, when explaining that the first four steps in breath meditation correspond to the practice of focusing on the body in and of itself as a frame of reference). The step of breathing in and out sensitive to the entire body relates to the many similes in the *suttā* depicting *jhāna* as a state of whole-body awareness (see [MN 119](#)).
4. "In-&-out breaths are bodily; these are things tied up with the body. That's why in-&-out breaths are bodily fabrications." — [MN 44](#).
5. "Perceptions & feelings are mental; these are things tied up with the mind. That's why perceptions & feelings are mental fabrications." — [MN 44](#).
6. [AN 9.34](#) shows how the mind, step by step, is temporarily released from burdensome mental states of greater and greater refinement as it advances through the stages of *jhāna*.
7. Lit., "fading."
- See also: [MN 118](#); [SN 54.8](#).

12.7 7. What is Ānāpāna?

Revised April 2, 2017 (#4); September 2, 2019; July 23, 2020; June 6, 2022; October 11, 2022

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. The “[WebLink: suttacentral: Ānāpānasati Sutta, \(MN 118\)](#)” has the following verse:

“*Ānāpānassati, bhikkhave, bhāvitā bahulikatā mahapphalā hoti mahānisamsā. Ānāpānassati, bhikkhave, bhāvitā bahulikatā cattāro satipaṭṭhāne paripūreti. Cattāro satipaṭṭhānā bhāvitā bahulikatā satta bojjhaṅge paripūrenti. Satta bojjhaṅgā bhāvitā bahulikatā vijjāvimuttiṃ paripūrenti.*”

That means: “*Ānāpānasati, Bhikkhus, when practiced frequently bears many fruits and leads to many benefits. Ānāpānasati, Bhikkhus, when cultivated and pursued, brings the four Satipaṭṭhānā to their completion. The four Satipaṭṭhānā, when cultivated and pursued, bring the seven Bojjhaṅgā to their completion. The seven Bojjhaṅgā, when cultivated and pursued, bring vijjā (opposite of avijjā) and vimutti (or Nibbāna) to their completion.*”

- Now, if *ānāpāna* means “breathing in and breathing out”, how can that lead to the completion of the four *satipaṭṭhānās*, the seven *bojjhaṅgas*, removal of *avijjā*, and the attainment of *Nibbāna*? Can anyone seriously think that is possible?
- Instead, *ānāpāna* MEANS cultivating *Satipaṭṭhāna*, *Satta Bojjhaṅga*, etc., by “taking in morals” and “expelling immoral” as we discuss below.

2. *Satipaṭṭhāna Bhāvanā* is a more detailed version of the *Ānāpānasati Bhāvanā*. Thus it is essential to learn the correct version of the *Ānāpānasati*. If one does *Ānāpānasati* correctly, it can be easily turned into *Satipaṭṭhāna Bhāvanā*.

- Section 4 on “Dhammānupassanā” describes how the cultivation of the four types of *Satipaṭṭhāna* leads to the removal of the five hindrances and fulfillment of the seven *Bojjhaṅga* to their completion. See, “[WebLink: suttacentral: Satipaṭṭhāna Sutta \(MN 10\)](#).” That confirms the statements in the *Ānāpānasati Sutta* mentioned above.

3. First, let us figure out exactly what the Buddha meant by “āna” and “āpāna” in “āna+āpāna+sati” which rhymes as *ānāpānasati*; of course “sati” is mindfulness.

- “Āna” is taking in; In Sinhala, “*ānayānaya*” is “import”. “*āpāna*” is discarding; In Sinhala, “*apānayānaya*” is “export”. Thus “āna”+“āpāna” or *ānāpāna* is “taking in/discarding” or import/export.
- “Assa” is the same as “āna”, and “passa” is the same as “āpāna”. In Sri Lanka, parents tell their child to clean his/her room by saying, “*kāmaraya* (room) *assa passa* (or *aspas*) *karāganna*” (කමරය අස්ස පාස්ස කරගන්න)
- When cleaning the room, the child needs to get rid of the clutter (*passa*) but also can take in (*assa*) something like a flower vase to make the room look more pleasant, or to take in a chair that can be useful.

4. During the time of the Buddha itself, auxiliary *suttā* as well as commentaries (“*Atthakatha*”) were written to explain the keywords/phrases in the main *suttā* that were abbreviated for easy transmission; see, “[Preservation of Dhamma](#).”

There are two crucial *suttā*, “[WebLink: suttacentral: Assāsappatta Sutta \(SN 38.5\)](#)” and the “[WebLink: suttacentral: Paramassāsappatta Sutta \(SN 38.6\)](#)” that describe how one should “take in” *kusala* thoughts and “discard” *akusala* thoughts; that is “āna” + “āpāna” (*ānāpāna*) or “*assa/passa*”, for cleaning up (the

mind). The English translation there is hopeless, but one can get the idea by looking at the Pāli version. You don't need to be an expert on Pāli to see that.

- In the *Mahasaccaka Sutta*, “*assa/passa*” was also used to indicate “in and out breathing” when the Buddha was describing to Saccaka how he engaged in the “breath meditation” per instructions by Ājāra Kālāma and Uddaka Rāmaputta while he was searching for the truth as Bodhisatta.
- But the following verses of that *sutta* describe how he gave up on that technique and moved onto the correct path.
- So, we must ensure a given phrase is used in the proper context, depending on the situation.
- For example, there are several conventional and deeper meanings to the keywords “*atta*” and “*anatta*,” and one needs to be able to figure out which meaning to use for a given case; see, “[Attā Hi Attano Nātho](#),” “[Anatta – the Opposite of Which Atta?](#),” and links in those posts.

5. When one knows what *kusala/akusala kamma* are, the first thing to do is to prevent from doing *akusala kamma* and to make an effort to do *kusala kamma* by engaging in meritorious actions (*puñña kriya*); see, “[Ten Immoral Actions \(Dasa Akusala\)](#),” and “[Punna Kamma – Dāna, Sīla, Bhāvanā](#).”

- Thus when one leads a moral life, one automatically engages in the primary form of *Ānāpānasati*.
- AND, one cannot do a proper formal *Ānāpānasati* meditation and get to even *samādhi*, let alone a *jhāna* unless one leads a moral life. The five hindrances are too strong to be suppressed; see, “[Key to Calming the Mind – Five Hindrances](#).”

6. **Formal *Ānāpānasati Bhāvanā*** can be done in a formal sitting or walking meditation session while engaging in the basic version (taking in what is good/discarding what is evil) all the time.

- There is no need to do *Samatha Bhāvanā* separately. If one does a formal *Ānāpānasati* session with the eyes closed in a quiet place, one will automatically get into *samādhi*. **Let good thoughts grow, and discard evil thoughts. Very simple.**
- Another thing to do in a formal meditation session is to **contemplate a particular dhamma concept like *anicca*, *dukkha*, or *anatta*. That means focusing on “āna”.**
- When one gets to *samādhi*, the mind goes on “auto-pilot”; you will feel that your mind is taking charge and you need to exert less effort to keep the focus.

7. When one does the basic version while engaged in other activities, one is only mindful of what one is engaged in, i.e., the task at hand. That task presumably does not involve any of the BIG EIGHT we discussed previously; see “[The Basics in Meditation](#).” It could be a technical task or a daily chore like washing dishes or driving. **Be mindful of just the task (washing, driving, etc).** Here one will NOT get into *samādhi*, so there is no danger of injuring oneself; Many people get into accidents while driving because they are not being mindful of driving.

- However, if one does not have a specific task (say, when riding a bus or waiting at the doctor's office), one could be engaged in *Ānāpānasati Bhāvanā*. When our minds are not focused on something (like in the cases mentioned above,) all sorts of ideas bubble up. As we discussed in “[The Basics in Meditation](#).” These are due to deeply-ingrained habits or *āsavā* that we have acquired not only in this life but also from previous lives.

8. The more we keep reviving or re-living this habit (i.e., doing *āna/apāna* or *assa/passa*), we strengthen that good habit (*gati*).

- We have come all this way in the cycle of rebirths that are mostly filled with suffering because of our bad habits (*gati*) that have been percolated into a very dense state of deep-seated cravings (*āsavā*). It may take some time to develop this “*āna/pāna*” but you will see results in a few weeks to a few months.

9. In the *ānāpānapabba* of the *Satipaṭṭhāna sutta*, it says, “..so *sato vā assa sati*, *sato vā passa sati*. *Dīghaṃ vā assasanto dīghaṃ assasāmī ti pajānāti*, *dīghaṃ vā passasanto dīghaṃ passasāmī ti*

pajānāti,” Here it DOES NOT mean “take long breaths in, expel long breaths out”; instead, it means, “get rid of **long-established (deeply-rooted)** bad habits, and cultivate the **long-established** good habits”.

- Similarly, the next sentence (“*..rassam vā assasanto...*”) is not about short breaths, but about those good habits that you started to work on recently, and those bad habits that started to creep into your mind recently (if there are any).
- One cannot purify one’s mind by breathing in/out, even though it can get one’s mind to calm down (*Samatha*). The correct way of doing it is doing both *Samatha* and *Vipassanā* together.

10. When we think a bit more about this, we realize that what needs to be discarded are *micchā diṭṭhi* (wrong views), *micchā saṅkappa* (wrong thoughts or ideas), *micchā vācā* (incorrect, harmful speech), *micchā kammanta* (incorrect/harmful actions), *micchā ājīva* (incorrect/harmful way of living), *micchā vāyāma* (tendency to strive on immoral activities), *micchā sati* (tendency to focus on immoral activities); when one does all that *micchā samādhi* (tendency to get absorbed in immoral ideas/actions) is the result.

- In the same way, what we need to “take in” are *sammā diṭṭhi*, *sammā saṅkappa*, *sammā vācā*, *sammā kammanta*, *sammā ājīva*, *sammā vāyāma*, *sammā sati*, and when one keeps doing that one automatically gets to *sammā samādhi*.
- Put in another way, *Ānāpānasati* is nothing but “taking in” the Noble Eightfold Path and “discarding” the opposite.

11. The longer one “takes in” or “lives” the Noble Eightfold Path and “rejects” the opposite, the easier it becomes to get to *samādhi* in a formal meditation session. As *samādhi* grows little by little, one day, one will automatically get into the first *Ariya jhāna*. However, one more thing is needed before getting to the *Ariya jhānā*, an understanding of *anicca*, *dukkha*, and *anatta*. See “[Is Ānāpānasati Breath Meditation?](#)”

- Keep practicing “*ānāpāna*” as much as possible throughout the day. With time, you will feel the “cooling down” or “*nivāna*” or “a taste of *Nibbāna*.”
- Buddha Dhamma is NOT about following rituals. It is all about cleansing one’s mind, which takes effort and concentration. Initially, it could be challenging, but as one gains *samādhi* bit by bit, one gets motivated. In a few months, one can look back at one’s life and see that it has changed for the better.
- Even though one can start with discarding immoral deeds and cultivating or taking in morals, one needs to know the real meanings of “*saṇ*,” *anicca*, and *anatta* to do the *Ānāpānasati Bhāvanā* in a deeper sense: (i) One needs to comprehend which “*saṇ*” or defilements to be discarded; see, “[Saṇ](#).” (ii) One needs to know the deeper meanings of *Tilakkhaṇa*; see, “[Anicca, Dukkha, Anatta](#).”

Te ca navā bhikkhū therehi bhikkhūhi ovadiyamānā anusāsiyamānā ulāraṃ pubbenāparaṃ visesaṃ jānanti.

Tena kho pana samayena bhagavā tadahuposathe pannarase komudiya cātumāsiniya puṇṇāya puṇṇamāya rattiya bhikkhusaṅghaparivuto abbhokāse nisinno hoti. Atha kho bhagavā tuṇhībhūtaṃ tuṇhībhūtaṃ bhikkhusaṅghaṃ anuviloketvā bhikkhū āmantesi:

“Apalāpāyaṃ, bhikkhave, parisā; nippalāpāyaṃ, bhikkhave, parisā; suddhā sāre paṭiṭṭhitā. Tathārūpo ayaṃ, bhikkhave, bhikkhusaṅgho; tathārūpā ayaṃ, bhikkhave, parisā yathārūpā parisā āhuneyyā pāhuneyyā dakkhiṇeyyā añjalikaraṇīya anuttaraṃ puññakkhettaṃ lokassa. Tathārūpo ayaṃ, bhikkhave, bhikkhusaṅgho; tathārūpā ayaṃ, bhikkhave, parisā yathārūpāya parisāya appaṃ dinnāṃ bahu hoti, bahu dinnāṃ bahutaṃ. Tathārūpo ayaṃ, bhikkhave, bhikkhusaṅgho; tathārūpā ayaṃ, bhikkhave, parisā yathārūpā parisā dullabhā dassanāya lokassa. Tathārūpo ayaṃ, bhikkhave, bhikkhusaṅgho; tathārūpā ayaṃ, bhikkhave, parisā yathārūpaṃ parisāṃ alaṃ yojanagaṇaṇāni dassanāya gantuṃ puṭosenāpi.

Santi, bhikkhave, bhikkhū imasmiṃ bhikkhusaṅghe arahanto khīṇāsava vusitavanto katakaraṇīya ohitabhārā anuppattasatthā parikkhīṇabhavaśaṇiyojanā sammadaññāvimuttā—evarūpāpi, bhikkhave, santi bhikkhū imasmiṃ bhikkhusaṅghe. Santi, bhikkhave, bhikkhū imasmiṃ bhikkhusaṅghe pañcannaṃ orambhāgiyānaṃ saṇiyojanānaṃ parikkhayā opapātikā tattha parinibbāyino anāvattidhammā tasmā lokā—evarūpāpi, bhikkhave, santi bhikkhū imasmiṃ bhikkhusaṅghe. Santi, bhikkhave, bhikkhū imasmiṃ bhikkhusaṅghe tiṇṇaṃ saṇiyojanānaṃ parikkhayā rāgadosamohānaṃ tanuttā sakadāgāmino sakideva imaṃ lokaṃ āgantvā dukkhassantaṃ karissanti—evarūpāpi, bhikkhave, santi bhikkhū imasmiṃ bhikkhusaṅghe. Santi, bhikkhave, bhikkhū imasmiṃ bhikkhusaṅghe tiṇṇaṃ saṇiyojanānaṃ parikkhayā sotāpannā avinipātadhammā niyatā sambodhiparāyanā—evarūpāpi, bhikkhave, santi bhikkhū imasmiṃ bhikkhusaṅghe.

Santi, bhikkhave, bhikkhū imasmiṃ bhikkhusaṅghe catunnaṃ satipaṭṭhānaṃ bhāvanānuyogamanuyuttā viharanti—evarūpāpi, bhikkhave, santi bhikkhū imasmiṃ bhikkhusaṅghe. Santi, bhikkhave, bhikkhū imasmiṃ bhikkhusaṅghe catunnaṃ sammappadhānaṃ bhāvanānuyogamanuyuttā viharanti ... pe ... catunnaṃ iddhipādānaṃ ... pañcannaṃ indriyānaṃ ... pañcannaṃ balānaṃ ... sattannaṃ bojjhaṅgānaṃ ... ariyassa aṭṭhaṅgikassa maggassa bhāvanānuyogamanuyuttā viharanti—evarūpāpi, bhikkhave, santi bhikkhū imasmiṃ bhikkhusaṅghe. Santi, bhikkhave, bhikkhū imasmiṃ bhikkhusaṅghe mettābhāvanānuyogamanuyuttā viharanti ... karuṇābhāvanānuyogamanuyuttā viharanti ... muditābhāvanānuyogamanuyuttā viharanti ... upekkhābhāvanānuyogamanuyuttā viharanti ... asubhabhāvanānuyogamanuyuttā viharanti ... aniccaññābhāvanānuyogamanuyuttā viharanti—evarūpāpi, bhikkhave, santi bhikkhū imasmiṃ bhikkhusaṅghe. Santi, bhikkhave, bhikkhū imasmiṃ bhikkhusaṅghe ānāpānassatibhāvanānuyogamanuyuttā viharanti. Ānāpānassati, bhikkhave, bhāvitā bahulikatā mahapphalā hoti mahānisaṃsā. Ānāpānassati, bhikkhave, bhāvitā bahulikatā cattāro satipaṭṭhāne paripūreti. Cattāro satipaṭṭhānā bhāvitā bahulikatā satta bojjhaṅge paripūrenti. Satta bojjhaṅgā bhāvitā bahulikatā vijjāvimuttiṃ paripūrenti.

Kathaṃ bhāvitā ca, bhikkhave, ānāpānassati kathaṃ bahulikatā mahapphalā hoti mahānisaṃsā? Idha, bhikkhave, bhikkhu araṇṇagato vā rukkhamaṇḍalagato vā suññāgāragato vā nisīdati pallaṅkaṃ ābhujitvā ujuraṃ kāyaṃ paṇidhāya parimukhaṃ satiraṃ upaṭṭhapetvā. So satova assasati satova passasati.

Dīgham vā assasanto 'dīgham assasāmi'ti pajānāti, dīgham vā passasanto 'dīgham passasāmi'ti pajānāti; rassam vā assasanto 'rassam assasāmi'ti pajānāti, rassam vā passasanto 'rassam passasāmi'ti pajānāti; 'sabbakāyapaṭisaṁvedī assasissāmi'ti sikkhati, 'sabbakāyapaṭisaṁvedī passasissāmi'ti sikkhati; 'passambhayaṁ kāyasaṅkhāraṁ assasissāmi'ti sikkhati, 'passambhayaṁ kāyasaṅkhāraṁ passasissāmi'ti sikkhati. (1)

'Pīṭipaṭisaṁvedī assasissāmi'ti sikkhati, 'pīṭipaṭisaṁvedī passasissāmi'ti sikkhati; 'sukhapaṭisaṁvedī assasissāmi'ti sikkhati, 'sukhapaṭisaṁvedī passasissāmi'ti sikkhati; 'cittasaṅkhārapaṭisaṁvedī assasissāmi'ti sikkhati, 'cittasaṅkhārapaṭisaṁvedī passasissāmi'ti sikkhati; 'passambhayaṁ cittasaṅkhāraṁ assasissāmi'ti sikkhati, 'passambhayaṁ cittasaṅkhāraṁ passasissāmi'ti sikkhati. (2)

'Cittapaṭisaṁvedī assasissāmi'ti sikkhati, 'cittapaṭisaṁvedī passasissāmi'ti sikkhati; 'abhippamodayaṁ cittaṁ assasissāmi'ti sikkhati, 'abhippamodayaṁ cittaṁ passasissāmi'ti sikkhati; 'samādahāṁ cittaṁ assasissāmi'ti sikkhati, 'samādahāṁ cittaṁ passasissāmi'ti sikkhati; 'vimocayaṁ cittaṁ assasissāmi'ti sikkhati, 'vimocayaṁ cittaṁ passasissāmi'ti sikkhati. (3)

'Aniccānupassī assasissāmi'ti sikkhati, 'aniccānupassī passasissāmi'ti sikkhati; 'virāgānupassī assasissāmi'ti sikkhati, 'virāgānupassī passasissāmi'ti sikkhati; 'nirodhānupassī assasissāmi'ti sikkhati, 'nirodhānupassī passasissāmi'ti sikkhati; 'paṭinissaggānupassī assasissāmi'ti sikkhati, 'paṭinissaggānupassī passasissāmi'ti sikkhati.

Evam bhāvitā kho, bhikkhave, ānāpānassati evaṁ bahulikatā mahapphalā hoti mahānisaṁsā. (4)

Kathaṁ bhāvitā ca, bhikkhave, ānāpānassati kathaṁ bahulikatā cattāro satipaṭṭhāne paripūreti? Yasmiṁ samaye, bhikkhave, bhikkhu dīgham vā assasanto 'dīgham assasāmi'ti pajānāti, dīgham vā passasanto 'dīgham passasāmi'ti pajānāti; rassam vā assasanto 'rassam assasāmi'ti pajānāti, rassam vā passasanto 'rassam passasāmi'ti pajānāti; 'sabbakāyapaṭisaṁvedī assasissāmi'ti sikkhati, 'sabbakāyapaṭisaṁvedī passasissāmi'ti sikkhati; 'passambhayaṁ kāyasaṅkhāraṁ assasissāmi'ti sikkhati, 'passambhayaṁ kāyasaṅkhāraṁ passasissāmi'ti sikkhati; kāye kāyānupassī, bhikkhave, tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. Kāyesu kāyāññatarāhaṁ, bhikkhave, evaṁ vadāmi yadidaṁ—assāsapassāsā. Tasmātiha, bhikkhave, kāye kāyānupassī tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. (1)

Yasmiṁ samaye, bhikkhave, bhikkhu 'pīṭipaṭisaṁvedī assasissāmi'ti sikkhati, 'pīṭipaṭisaṁvedī passasissāmi'ti sikkhati; 'sukhapaṭisaṁvedī assasissāmi'ti sikkhati, 'sukhapaṭisaṁvedī passasissāmi'ti sikkhati; 'cittasaṅkhārapaṭisaṁvedī assasissāmi'ti sikkhati, 'cittasaṅkhārapaṭisaṁvedī passasissāmi'ti sikkhati; 'passambhayaṁ cittasaṅkhāraṁ assasissāmi'ti sikkhati, 'passambhayaṁ cittasaṅkhāraṁ passasissāmi'ti sikkhati; vedanāsu vedanānupassī, bhikkhave, tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. Vedanāsu vedanāññatarāhaṁ, bhikkhave, evaṁ vadāmi yadidaṁ—assāsapassāsānaṁ sādhuṁ manasikāraṁ. Tasmātiha, bhikkhave, vedanāsu vedanānupassī tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. (2)

Yasmiṁ samaye, bhikkhave, bhikkhu 'cittapaṭisaṁvedī assasissāmi'ti sikkhati, 'cittapaṭisaṁvedī passasissāmi'ti sikkhati; 'abhippamodayaṁ cittaṁ assasissāmi'ti sikkhati, 'abhippamodayaṁ cittaṁ passasissāmi'ti sikkhati; 'samādahāṁ cittaṁ assasissāmi'ti sikkhati, 'samādahāṁ cittaṁ passasissāmi'ti sikkhati; 'vimocayaṁ cittaṁ assasissāmi'ti sikkhati, 'vimocayaṁ cittaṁ passasissāmi'ti sikkhati; citte cittānupassī, bhikkhave, tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. Nāhaṁ, bhikkhave, muṭṭhassatissa asampajānassa ānāpānassatiṁ vadāmi. Tasmātiha, bhikkhave, citte cittānupassī tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. (3)

Yasmiṁ samaye, bhikkhave, bhikkhu 'aniccānupassī assasissāmi'ti sikkhati, 'aniccānupassī passasissāmi'ti sikkhati; 'virāgānupassī assasissāmi'ti sikkhati, 'virāgānupassī passasissāmi'ti sikkhati; 'nirodhānupassī assasissāmi'ti sikkhati, 'nirodhānupassī passasissāmi'ti sikkhati; 'paṭinissaggānupassī assasissāmi'ti sikkhati, 'paṭinissaggānupassī passasissāmi'ti sikkhati; dhammesu dhammānupassī, bhikkhave, tasmīṁ samaye

bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassari. So yaṃ taṃ abhijjhādomanassānaṃ pahānaṃ taṃ paññāya disvā sādhucaṃ ajjhupekkhitā hoti. Tasmātiha, bhikkhave, dhammesu dhammānupassī tasmīṃ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassari. (4)

Evam bhāvitā kho, bhikkhave, ānāpānassati evaṃ bahulikatā cattāro satipaṭṭhāne paripūreti.

Kathaṃ bhāvitā ca, bhikkhave, cattāro satipaṭṭhānā kathaṃ bahulikatā satta bojjhaṅge paripūrenti? Yasmiṃ samaye, bhikkhave, bhikkhu kāye kāyānupassī viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassari, upaṭṭhitassa tasmīṃ samaye sati hoti asamuṭṭhā. Yasmiṃ samaye, bhikkhave, bhikkhuno upaṭṭhitā sati hoti asamuṭṭhā, satisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti. Satisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, satisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (1)

So tathāsato viharanto taṃ dhammaṃ paññāya pavicinati pavicayati parivīmaṃsaṃ āpajjati. Yasmiṃ samaye, bhikkhave, bhikkhu tathāsato viharanto taṃ dhammaṃ paññāya pavicinati pavicayati parivīmaṃsaṃ āpajjati, dhammavicayasambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, dhammavicayasambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, dhammavicayasambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (2)

Tassa taṃ dhammaṃ paññāya pavicino pavicayato parivīmaṃsaṃ āpajjato āraddhaṃ hoti vīriyaṃ asallīnaṃ. Yasmiṃ samaye, bhikkhave, bhikkhuno taṃ dhammaṃ paññāya pavicino pavicayato parivīmaṃsaṃ āpajjato āraddhaṃ hoti vīriyaṃ asallīnaṃ, vīriyasambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, vīriyasambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, vīriyasambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (3)

Āraddhavīriyassa uppajjati pīti nirāmisā. Yasmiṃ samaye, bhikkhave, bhikkhuno āraddhavīriyassa uppajjati pīti nirāmisā, pītisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, pītisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, pītisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (4)

Pītiṃanassa kāyopi passambhati, cittampi passambhati. Yasmiṃ samaye, bhikkhave, bhikkhuno pītiṃanassa kāyopi passambhati, cittampi passambhati, passaddhisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, passaddhisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, passaddhisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (5)

Passaddhakāyassa sukhino cittaṃ samādhīyati. Yasmiṃ samaye, bhikkhave, bhikkhuno passaddhakāyassa sukhino cittaṃ samādhīyati, samādhisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, samādhisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, samādhisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (6)

So tathāsamāhitaṃ cittaṃ sādhucaṃ ajjhupekkhitā hoti. Yasmiṃ samaye, bhikkhave, bhikkhu tathāsamāhitaṃ cittaṃ sādhucaṃ ajjhupekkhitā hoti, upekkhāsambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, upekkhāsambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, upekkhāsambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (7)

Yasmiṃ samaye, bhikkhave, bhikkhu vedanāsu ... pe ... citte ... dhammesu dhammānupassī viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassari, upaṭṭhitassa tasmīṃ samaye sati hoti asamuṭṭhā. Yasmiṃ samaye, bhikkhave, bhikkhuno upaṭṭhitā sati hoti asamuṭṭhā, satisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, satisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, satisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (1)

So tathāsato viharanto taṃ dhammaṃ paññāya pavicinati pavicayati parivīmaṃsaṃ āpajjati. Yasmiṃ samaye, bhikkhave, bhikkhu tathāsato viharanto taṃ dhammaṃ paññāya pavicinati pavicayati parivīmaṃsaṃ āpajjati, dhammavicayasambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, dhammavicayasambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, dhammavicayasambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (2)

Tassa taṃ dhammaṃ paññāya pavicinato pavicayato parivīmaṃsaṃ āpajjato āraddhaṃ hoti vīriyaṃ asallīnaṃ. Yasmiṃ samaye, bhikkhave, bhikkhuno taṃ dhammaṃ paññāya pavicinato pavicayato parivīmaṃsaṃ āpajjato āraddhaṃ hoti vīriyaṃ asallīnaṃ, vīriyasambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, vīriyasambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, vīriyasambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (3)

Āraddhavīriyassa uppajjati pīti nirāmisā. Yasmiṃ samaye, bhikkhave, bhikkhuno āraddhavīriyassa uppajjati pīti nirāmisā, pītisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, pītisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, pītisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (4)

Pīṭimaṇassa kāyopi passambhati, cittampi passambhati. Yasmiṃ samaye, bhikkhave, bhikkhuno pīṭimaṇassa kāyopi passambhati, cittampi passambhati, passaddhisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, passaddhisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, passaddhisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (5)

Passaddhakāyassa sukhino cittaṃ samādhīyati. Yasmiṃ samaye, bhikkhave, bhikkhuno passaddhakāyassa sukhino cittaṃ samādhīyati, samādhisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, samādhisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, samādhisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (6)

So tathāsamāhitaṃ cittaṃ sādhuṃ ajjhupekkhitā hoti. Yasmiṃ samaye, bhikkhave, bhikkhu tathāsamāhitaṃ cittaṃ sādhuṃ ajjhupekkhitā hoti, upekkhāsambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, upekkhāsambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, upekkhāsambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. Evaṃ bhāvitā kho, bhikkhave, cattāro satipaṭṭhānā evaṃ bahulīkatā satta sambojjhaṅge paripūrenti. (7)

Kathaṃ bhāvitā ca, bhikkhave, satta bojjhaṅgā kathaṃ bahulīkatā vijjāvimuttiṃ paripūrenti? Idha, bhikkhave, bhikkhu satisambojjhaṅgaṃ bhāveti vivekanissitaṃ virāganissitaṃ nirodhanissitaṃ vossaggapariṇāmaṃ. Dhammavicayasambojjhaṅgaṃ bhāveti ... pe ... vīriyasambojjhaṅgaṃ bhāveti ... pītisambojjhaṅgaṃ bhāveti ... passaddhisambojjhaṅgaṃ bhāveti ... samādhisambojjhaṅgaṃ bhāveti ... upekkhāsambojjhaṅgaṃ bhāveti vivekanissitaṃ virāganissitaṃ nirodhanissitaṃ vossaggapariṇāmaṃ. Evaṃ bhāvitā kho, bhikkhave, satta bojjhaṅgā evaṃ bahulīkatā vijjāvimuttiṃ paripūrenti⁷ti.

Idamavoca bhagavā. Attamaṇā te bhikkhū bhagavato bhāsitaṃ abhinandunti.

Ānāpānassatisuttaṃ niṭṭhitaṃ aṭṭhamāraṃ.

12.8 Is Ānāpānasati Breath Meditation?

June 2, 2017; revised September 2, 2017; April 25, 2020; August 20, 2022

Introduction

1. If you Google “Ānāpānasati”, almost all websites that come up identify it as “Buddhist breath meditation” or “mindfulness of breathing”. But *Tipiṭaka suttā* lead to the conclusion that breath meditation is not Buddhist *Ānāpānasati Bhāvanā*.

- Breath meditation was practiced by *yogis* even at the time of the Buddha. **So, breath meditation predates Buddha’s *Ānāpāna Bhāvanā*.** Buddha rejected it because it does not lead to *Nibbāna* or PERMANENT relief from suffering.
- There are many *suttā* in the *Tipiṭaka* that clearly state that *Nibbāna* can be attained with the *Ānāpāna Bhāvanā*. It automatically fulfills *Satipaṭṭhāna*, *Satta Bojjhaṅga*, and all 37 Factors of Enlightenment. **Therefore, *Ānāpānasati* is infinitely deeper than just focusing on one’s breath.**
- I will provide evidence for those two statements below. First, let us see what can be accomplished with Buddhist *Ānāpānasati bhāvanā*.

Ānāpānassati by Itself Is Sufficient to Attain Nibbāna

2. According to the [WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#): “..*Ānāpānassati, bhikkhave, bhāvitā bahulīkatā cattāro satipaṭṭhāne paripūreti. Cattāro satipaṭṭhānā bhāvitā bahulīkatā satta bojjhaṅge paripūrenti. Satta bojjhaṅgā bhāvitā bahulīkatā vijjāvimuttiṃ paripūrenti.*”

- Translated, “..*Ānāpānassati*, when used (*bhāvitā*) and used frequently (*bahulīkatā*), completes (*paripūreti*) four types of *Satipaṭṭhāna*. *Cattāro satipaṭṭhāna*, when used and used frequently, completes *Satta Bojjhaṅga*. *Satta Bojjhaṅga* when used and used frequently, completes the full release (*Nibbāna* or *Arahanthood*)”.
- The same statement was made in the [WebLink: suttacentral: Ānanda Sutta \(SN 54.13\)](#). Most of the *suttā* in [WebLink: suttacentral: Ānāpāna Saṃyutta \(SN 54\)](#) have that phrase or the phrase: “..*Ānāpānassati, bhikkhave, bhāvitā bahulīkatā mahapphalā hoti mahānisaṃsā.*” **Here, “mahapphalā” (“mahā” + “phala”) means the four Noble stages: *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, *Arahant*.**
- Therefore, it is clear that *ānāpānassati*, **by itself**, can lead to all the way to the *Arahanthood*. Thus, one does not need to do “**separate vipassanā (insight) meditation after getting to Samatha with *Ānāpānassati***” as some suggest.

Can Nibbāna be Attained With Breath Meditation?

3. **The key question is: “Can breath-meditation, by itself, lead to *Arahanthood*?** That is the critical question that needs to be contemplated by those who equate *Ānāpānassati* to breathing meditation.

- *Nibbāna* is the removal of greed, hate, and ignorance: “*rāgakkhayo dosakkhayo mohakkhayo idaṃ vuccati nibbānanti.*” This verse is in many *suttā*, for example, in [WebLink: suttacentral: Nibbāna pañhā Sutta \(SN 38.1\)](#).
- If *Ānāpānassati* means breath meditation, how could keeping the mind on one’s breath **by itself** REMOVE *rāga*, *dosa*, and *moha* from one’s mind?

4. **The conventional (and erroneous) teaching in many texts today is that one needs to get to *samādhi* with *Ānāpānassati* and then one needs to do *Vipassanā* or insight meditation to attain *magga phala*.**

- However, from the above-discussed *suttā*, it is quite clear that *Ānāpānassati* by itself can lead to even *Arahanthood*!
- Of course, this erroneous interpretation — that breath meditation is Buddhist *Ānāpāna bhāvanā* — is not something that current practitioners came up with. It can be traced back to Buddhaghosa's *Visuddhimagga*, see "[Buddhaghosa's Visuddhimagga – A Focused Analysis](#)."

The *Ariṭṭha Sutta*

5. The incorrect version of *Ānāpānassati* was there even before the Buddha. In the [WebLink: suttacentral: Ariṭṭha Sutta \(SN 54.06\)](#), the Buddha, upon finding out that *Bhikkhu Ariṭṭha* was practicing the incorrect breath meditation as *Ānāpānassati*, told him the following. “..*Atthesā, ariṭṭha, ānāpānassati, nesā natthi'ti vadāmi. Api ca, ariṭṭha, yathā ānāpānassati vitthārena paripuṇṇā hoti taṃ suṇāhi, sādhu kaṃ manasi karohi; bhāsissāmi'ti*.”

- Translated, “..**There is that *ānāpānassati*, Ariṭṭha**. I don't say that there isn't. But I will describe the real (*yathā*) *ānāpānassati*, listen and pay close attention. I will speak.”
- Furthermore, breath meditation was used by *yogis* at that time even to attain higher *jhāna*. However, those *anāriya jhāna* are attained by just SUPPRESSING defilements (*kilesa*) and will not lead to ANY *maggā phala*. Those who cultivate such *anāriya jhāna* will also have their next birth in *Brahma* realms, but after that they can be reborn even in the *apāyā*.

Assāsa/Passāsa And Āna/Āpāna

6. The main reason for the incorrect interpretation of *Ānāpānassati* as breath meditation is that in many *suttā* it is described as *assāsa/passāsa*, which conventionally means taking in/putting out of something, and particularly breathing in/breathing out.

- *Āna/āpāna* (which rhymes as *ānāpāna*) in general means taking in/putting out something. It can be breath or anything else.
- However, in the *suttā* on *Ānāpānassati*, *assāsa/passāsa* or *āna/āpāna* specifically mean taking in *kusala*/getting rid of *akusala*, or, equivalently, taking in the Noble Eightfold Path/discarding the *micchā* eightfold path.
- That should be clear to anyone who knows that *Nibbāna* is attained via getting rid of *dasa akusala*.

Evidence from the *Tipiṭaka*

7. The [WebLink: suttacentral: Assāsappatta Sutta \(SN38.5\)](#), it specifically says what needs to be “taken in” (*assāsa*):

- “*Katamo panāvuso maggo katamā paṭipadā etassa assāsassa sacchikiriyāyāti* (what needs to be “taken in”). *Ayameva kho, āvuso, ariyo aṭṭhaṅgiko maggo etassa assāsassa sacchikiriyāya* (it is the Noble Eightfold Path that needs to be “taken in”). *Seyyathīdam* (namely): *sammādiṭṭhi sammāsaṅkappo sammāvācā sammākammanto sammāājīvo sammāvāyāmo sammāsati sammāsamādhi*”. [*paṭipadā* : [f.] line of conduct; mode of progress. *sacchikiriyā* : [f.] realisation; experiencing.]
- [WebLink: suttacentral: Parama assāsa Sutta \(AN38.6\)](#) has the same statement, emphasizing the term “*parama*” or “superior.”
- Therefore, there should not be any confusion about what *assāsa* means.

8. A detailed description of how the cultivation of correct *Ānāpānassati* leads to *Ariya jhāna* as well as *maggā phala* is described in the [WebLink: suttacentral: Paḍipopama sutta \(SN 54.8\)](#), also called the *Dīpa Sutta*.

- “*So satova assāsati, satova passāsati*” means “He maintains his mind on *dhamma* that should be taken in (*kusala* or moral) and those that should be gotten rid of (*akusala* or immoral)”.
- “*paṭinissaggānupassī assasissāmī’ti sikkhati, ‘paṭinissaggānupassī passasissāmī’ti sikkhati*” means, “one cultivates discipline (*sikkhati*) by removing bonds that bind one to the rebirth process (*patinissaganupassī*) by taking in morals (*assasissāmī*) and getting rid of immoral (*passasissāmī*)”.

Meaning Embedded in *Ānāpāna*

9. As is the case with many Pāli words, the meaning of the word *Ānāpāna* is embedded in the word itself. The two words “*āna*” and “*āpāna*” combine to rhyme as *ānāpāna*. When “*sati*” is added for being mindful of that, it becomes *ānāpānassati*.

- “*Āna*” is taking in; In Sinhala, “*ānanaya*” is “import”. “*Āpāna*” is discarding; In Sinhala, “*apānanaya*” is “export”. Thus “*āna*” + “*āpāna*” or *ānāpāna* is “taking in/discarding” or import/export.
- “*Assa*” is the same as “*āna*”, and “*passa*” is the same as “*āpāna*”. In Sri Lanka, parents tell their child to clean his/her room by saying, “*kāmaraya* (room) *assa passa* (or *aspas*) *karāganna*” (“කමරය අසාපාස්ස කරගන්න”)
- When cleaning the room, the child needs to get rid of the clutter (*passa*) but also can take in (*assa*) something like a flower vase to make the room look more pleasant or to take in a chair that can be useful.
- So, one does not throw away everything or take in everything. One needs to be selective in taking in “good things” and throwing away “bad things.” That is where mindfulness comes in. That cannot be done with breath.

Breath Meditation Can be Harmful

10. Most people are reluctant to give up the wrong “breath meditation” practice simply because they are attached to a “state of well-being” that can be reached with it. But that relief is only temporary.

- It is even possible to attain *anāriya jhānā* with breath meditation. Yet, those *jhānā* are also temporary because the defilements are only SUPPRESSED. On the other hand, the *Ariya jhānā* attained via correct *Ānāpānasati Bhāvanā* are permanent. That is because even to attain the first Ariya jhāna, one MUST have first removed *kāma rāga*, not merely suppressed it. See “[Samādhi, Jhāna, Magga Phala – Introduction](#)” and “[Mundane versus Supramundane Jhāna](#).”
- It must also be mentioned that breath meditation can be used to calm down one’s mind. But one should not expect to make much progress towards *Nibbāna* using it. **If one gets “addicted” to it (as I have seen many people do), it could be a serious distraction to the Noble Path.** See “[Breath Meditation Is Addictive and Harmful in the Long Run](#).”

Ānāpānasati Bhāvanā Is Not Only a Formal Meditation

11. As I have emphasized in the “[Bhāvanā \(Meditation\)](#)” section and the subsection “[Mahā Satipatṭhāna Sutta](#),” one should not restrict either *Ānāpānasati* or *Satipatṭhāna bhāvanā* to formal sessions conducted sitting down at an isolated place.

- When the Buddha said, “*..Ānāpānassati, bhikkhave, bhāvitā bahulīkatā..*” in #2 above, he meant doing it as much as possible, anywhere possible. That means basically all the time! One just needs to be mindful of one’s actions, speech, and thoughts, stopping bad ones and cultivating good ones.
- This is the fundamental approach to practice, see the “[Living Dhamma](#)” section for a step-by-step process that can be used by even those who do not believe in the basic tenets of Buddha Dhamma, like rebirth or *kamma*.

- In particular, see, “[Ānāpānasati Eliminates Mental Stress Permanently](#)” and “[Ānāpāna and Satipatthāna – Fundamentals](#).”

Mistranslated Verses

12. Some people believe that *Ānāpānasati* or *Satipatthāna bhāvanā* should be done in formal sessions. That belief has origins in the verse, “*Idha, bhikkhave, bhikkhu aranna gato vā rukkhamūla gato vā sunnāgāra gato vā nisidati pallankaṃ ābhujitvā, ujum kāyaṃ paṇidhāya, parimukhaṃ satim upaṭṭhapetvā*”, that appears in multiple *suttā* explaining both *Ānāpānasati* and *Satipatthāna bhāvanā*.

- **In most English translations** this verse is written as, “There is the case where a monk, having gone to the wilderness, to the foot of a tree, or an empty building, sits down folding his legs crosswise, holding his body erect, and setting mindfulness to the fore.”
- But there is a deeper meaning to this verse. For example, in the word “*rukkhamūla*,” “*rukkha*” is “tree” and “*mūla*” is the “root”; even though the top of a tree sways back and forth with the wind, the tree trunk close to the root is very stable. Thus “*rukkhamūla gato vā*” means getting to a stable mindset. The conventional interpretation says, “having gone to the foot of a tree”.
- The **deeper meaning** of that complete verse is discussed in detail in “[Prerequisites for the Satipatthāna Bhāvanā](#).” Then the verse can be stated something like, “get into a calm and stable mindset that is devoid of greed, hate, and ignorance; keep a modest attitude without any sense of superiority; be forthright and honest, and keep the mind on the main object of cooling down the mind.” That can be done anywhere, a formal session is not needed, even though that could be helpful.
- One could also use conventional meaning for formal sessions. But the deeper meaning is much more important even in formal sessions.

Only Three Commentaries Can be Trusted

13. If anyone has any evidence to the contrary **from the *Tipiṭaka***, please comment on the “[Discussion Forum](#).” I will be happy to address any such issues.

- Only three commentaries ([Patisambhidāmagga](#), [Petakopadesa](#), and [Nettipakaraṇa \[Netti\]](#)) can be trusted. Those are in the *Tipiṭaka*. All other later commentaries have many inconsistencies and outright misinterpretations; see, for example, “[Buddhaghosa's Visuddhimagga – A Focused Analysis](#).”

12.9 **8. The Basic Formal Ānāpānasati Meditation**

Revised June 17, 2022

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. As we discussed in the previous posts of this series, it is important to live a moral life without engaging in the BIG EIGHT in order to achieve the full benefits of meditation. One could start even while making progress on the BIG EIGHT, and these formal sessions will help with those as well.

2. Now let us talk about how to do the correct *Ānāpānasati* meditation as taught by the Buddha; see, “[7. What is Ānāpāna?](#).”

- First pick out a quiet time slot that you can allocate without having to worry about other tasks. Initially, 10-15 minutes a day would be fine and you can extend the time to several hours when the benefits of proper meditation become clear and you start feeling the *nirāmisā sukha*.

3. Pick out a room away from external disturbances as much as possible. A room that can be darkened and the door can be closed would be ideal. Sit in a comfortable chair with an armrest, and this becomes important when one starts getting into *samādhi*, because the body could become less rigid and tends to slide off (however, some people tend to “freeze” just like in *samādhi* statues in the beginning).

- Anyway, do not make the chair too comfortable because you may fall asleep. With practice this sleepiness will automatically go away, when the mind starts liking the meditation sessions, i.e., when one of the *pañcanīvaraṇa*, *thina-middha*, is automatically removed. One comes out of *samādhi* energized.

4. Sit in the chair with the hands-on lap and eyes closed. What we will be trying to do is to ward off any thoughts of lust, cravings, etc. (*kāmacchanda*), any thoughts of hate (*vyāpāda*) in particular, and also any stray thoughts such as on kids or other pending tasks. We want to experience the “cooling down” due to the absence of *kāmacchanda* and *vyāpāda*, and also to focus the mind on a Dhamma concept. For those who are starting out, it may be good to do the following first:

- In order to keep the mind from running away, keep saying in your mind, “May all beings be happy and healthy”. Or, you could think about some act of generosity that you did recently. But all of a sudden you may drift to a thought of some type of sensual pleasure (involving any of the senses). Deliberately get rid of that thought and focus the mind back on the original task.
- If a hateful thought (towards someone or something) comes to mind, forcefully stop that thought as well. Here you should deliberately think good thoughts about that person. It is important to remember that even the vilest person has friends/family that love that person. Sincerely say, “May X be happy and healthy”. Even if you have good reasons to despise that person, it is important to realize that our task is to remove the hateful feelings that WE have. When we do that, in the future we will not generate strong hateful feelings even if someone does something that may appear to be against us.
- Thinking about the serenity of a Buddha statue helps in the case of both *kāmacchanda* and *vyāpāda* (and any stray thought).

5. Once one gets some practice sitting in one place with a focused mind for a little while, one should start meditating or contemplating on Dhamma concepts. **It may be a good idea to start with the introductory posts (posts above this post).**

- After that, one could read one of the posts from the “[Key Dhamma Concepts](#)” on the top menu just before the meditation session and then contemplate those concepts; for example, one could think about examples on “*anicca*”: We cannot maintain anything to our satisfaction over the long term. If you are old enough you have many examples on your own. If you are young, you can still maintain your body, hair, teeth, etc to your liking but when you get to middle age, you will see that it is an impossible task. The

easiest is to think about your parents/grand parents and see how their bodies have changed, how they are unable to keep their bodies the way they would like.

- For this purpose, I have also added new posts on how one can look at the world through Buddha Dhamma in this section. The posts that I have added after the “[Myths about Meditation](#)” are good ones to read before the session and then to meditate on those ideas; for example, “[A Simple Way to Enhance Merits \(Kusala\) and Avoid Demerits \(Akusala\)](#).” The other three posts below that one may be a bit advanced for some; if so, browse around and find ones that are suitable. Eventually, the key concepts in the “[Key Dhamma Concepts](#)” section need to be grasped. I encourage everyone to read the posts in the “[Moral Living and Fundamentals](#)” section first.
- You could actually read any post from any area of the site and use that as a “focal point” on the meditation session later on. Not all sections are relevant to everyone. **Different people can get to samādhi focusing on different topics. The only posts that is absolutely necessary are the ones on *anicca*, *dukkha*, and *anatta*. But if they are hard to grasp, one should probably start at the “[Moral Living and Fundamental](#)” section. It is a matter of getting used to new concepts. In meditation, one will automatically “drift to *samādhi*” when the concepts become clear; the mind becomes awake and clear.**

6. Inevitably, your mind will try to wander off during the session. **Stopping lustful and hateful thoughts is the main task of this formal meditation session. If any distracting thought comes to the mind, DO NOT let it “run wild”; this is what is called “being mindful”. Keep a sharp eye on such stray thoughts and put a stop soon as they surface.**

- The other three hindrances (*thina-middha*, *uddhacca-kukkucca*, and *vicikicchā*) will automatically come down. You will be surprised how refreshed you feel after a “good meditation session”.
- Initially, it may be hard, but if you are persistent you should be able to see the results within a week to a month depending on the situation with the BIG EIGHT. Those will also gradually diminish too.
- Once one gets the mind to calm down some, one could start focusing on the good/bad habits that one has, in addition to “taking in” Dhamma concepts.

7. In the *Anapanapabba* of the *Satipaṭṭhāna sutta*, it says, “*..so sato va assa sati, sato va passa sati. Digham va assasanto digham assasami ti pajanati, digham va passasanto digham passasami ti pajanati,*” Here it DOES NOT mean “take long breaths in, expel long breaths out”; rather it means, “get rid of old bad habits, and cultivate the old good habits.”

- Similarly, the very next sentence (“*..rassam va assasanto...*”) is not about short breaths, but about those good habits that you started to work on recently, and those bad habits that started to creep in to your mind recently (if there is any).
- This is why understanding how habits are formed and become āsavā is important; there are several posts on this subject.
- There is no way that one can purify one’s mind by breathing in/out, even though it can get one’s mind to calm down (*samatha*). The correct way of doing it does both *Samatha* and *Vipassana* together.
- In the above verse, ***sati* is a very important term; it is not mere concentration, but contemplation with an understanding of *anicca*, *dukkha*, and *anatta*** (actually any form of meditation cannot be done effectively without at least some understanding of *anicca*, *dukkha*, *anatta*).

8. The key to success is to do this as often as possible. You do not need to be in a quiet place either, even though it helps especially initially. As you make progress, try to do it while riding the subway or a bus (but not while driving!), while waiting at the doctor’s office, during a lunch break, etc.

9. When one starts on *Ariya Bhāvanā*, sometimes things may look worse before getting better. It is like trying to cool a hot iron by sprinkling water on it when all that smoke comes out and may appear to be

getting worse. But one needs to be persistent. One needs to keep in mind that uncountable beings have attained “cooling down” by having faith in the Buddha.

- Understanding key Dhamma concepts is key to any type of meditation. Whenever you have time, try to read on different topics. Things will start “falling into place” at some point if it hasn’t yet. From that point on, one will start feeling the joy of Dhamma and will be seeking to clarify things with enthusiasm. It is a good addition to have!

Next, “[Key to Ānāpānasati – How to Change Character and Habits \(Gati\)](#)”,

12.10 Possible Effects in Meditation – Kundalini Awakening

June 25, 2016; revised July 19, 2016; August 9, 2021

In the post, “[Can Buddhist Meditation be Dangerous?](#)” in the Section “[Myths or Realities](#),” I discussed some possible effects of meditation, both in conventional and in true Buddhist meditations. Here I will focus on Buddhist meditation and explain the physical and mental changes that one may experience. However, this does not mean everyone will experience these; these symptoms cannot be generalized, and some may not even feel them.

1. It is possible that one may encounter some soothing physical sensations first and then even some discomforts when one starts seriously cleansing one's mind. I did not want to discuss this topic until I had enough background material to explain the origins of such effects.

- Some people may feel such first experiences to be not bad at all and even get attached to them. I believe that what is known in Hinduism as “*kundalini* awakening” manifests this effect. Those are supposed to be encountered in *anāriya* meditation techniques, where one stops the cleansing process at this stage. It is the **goal** of most of those non-Buddhist meditators.
- In genuine Buddhist meditation also one may experience certain such effects. However, they will not be painful.
- **Before reading this post, it is advisable first to read the introductory post, “[Can Buddhist Meditation be Dangerous?](#),”** because certain body sensations encountered in the early stages of meditation are discussed in that post.

2. Fully understanding the current post requires some background material on the concept of *gandhabba*; Click to hear pronunciation:

[WebLink: Listen to “Gandhabba” pronunciation](#)

The inert physical body is made alive by the *gandhabba* (or “*manomaya kāya*”) that comes out of the physical body in the case of “out-of-body experiences”; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

- There are many posts at the site that explain various aspects of the *gandhabba*; see the sections “[Gandhabba \(Manomaya Kāya\)](#),” “[The Grand Unified Theory of Dhamma](#),” and “[Udayavaya Ñāna](#).”
- While it is not necessary to learn about the *gandhabba* to attain *Nibbāna*, if one needs to understand the mechanisms underlying these “meditation experiences,” it is the bridge between mind and the physical body. **In any case, it is good to know about these possible effects (more of which are discussed below), so that if one gets to experience them, one would not be perplexed.**

3. The *gandhabba* has an “energy body,” an invisible blueprint of the physical body. And that fine body is the one that controls the heavy physical body according to the commands from the mind, which is also located in the *gandhabba* (at the *hadaya vatthu*).

- **The best way to visualize this is to imagine the *gandhabba* is a fine mesh that overlaps the physical body. It can move any part of the physical body, and is able to move any part that it wishes to move. For example, when the *gandhabba* moves its fine arm, the physical arm moves with it.**
- This is how we control our physical bodies. Of course, there are more details with the brain acting out as an intermediary; see, “[Brain – Interface between Mind and Body](#).”
- For example, most of the energy to move the heavy body parts comes from the our food. Gandhabba sends the “control signals”.

4. The nervous system of the physical body overlaps the fine nervous system of the *gandhabba* and tries to maintain that overlap all the time. If one sits down cross-legged, for example, the nervous system of the

physical body may shift from that of the *gandhabba*. Then the physical nervous system will try to adjust for that shift, pulling the attached muscles with it.

- That is why it could become uncomfortable, especially for those not used to sitting cross-legged (when one gets used to it, the physical system will learn to adjust quickly).
- Therefore, this effect does not indicate progress in the meditation program. Significant effects are discussed below.

5. Our thoughts (i.e., the *cittaja kāya*) can influence the fine body (*utuja kāya*) of the *gandhabba*. In fact, the *utuja kāya* arises out of *suddhaṭṭhaka* produced by the *cittaja kāya* and the *kammaja kāya*.

- **Thus the fine body of the *gandhabba* can be affected by two methods: by the *kammaja kāya* (i.e. by *kamma vipāka*) AND by the *cittaja kāya* or according to how we think.**
- **The first effect** can bring about aches and pains in the physical body due to *kamma vipāka* (by shifting the *gandhabba*'s body to out-of-balance in a short time, so we can feel the shift). **These are mostly experienced as we get old (e.g., chronic back pains) and are, of course, not due to meditation.** Some of these may get better with meditation.

6. **In addition to the shifts caused by *kamma vipāka*, we can change the equilibrium position of the *gandhabba*'s fine nervous system with consistent thoughts over long periods of time.** For example, if we think hateful thoughts a lot, the nervous system of the *gandhabba* may twist in a certain way; if we think mostly greedy thoughts, it may shift differently.

- Thus, as we think defiled thoughts and act on them regularly, it leads to gradual twisting nerve bundles [meridians being repaired for easy access by the *gandhabba*] in the *gandhabba*, and physical muscles also get twisted accordingly. Since it is a gradual process compared to the first effect, we do not normally feel it (until we get old).
- However, when we start cleansing our minds the fine body of the *gandhabba* tries to come back to its equilibrium position. **During a good meditation session, this can happen fairly quickly, and that is when one starts feeling such nerve [meridian - any of the pathways along which the body's vital energy flows according to the theory behind acupuncture] (and muscle) movements.** We are basically trying to “undo” those twists in nerve bundles that occurred over years and years.
- This is why this effect is much less in young children. Their nerves have not yet being shifted too much.

7. **Thus, the second effect has its origins in our thoughts.** Normally such effects occur above the waist, along the spine, neck, and in the head. This is related to the fact that nerve bundles [meridians] propagate through the spine and also there are cranial nerves in the brain. Thus “*Kundalini* awakening” is an example of this category.

- This effect is experienced by different meditators somewhat differently. But the dominant feature is the “pressure waves” that arise above the waist and are normally located around the spine, neck, throat, and head. These have been attributed to energy centers or “*chakras*” in *Kundalini* awakening; see, “[WebLink: wiki: Kundalini.](#)”
- That is why they say that the *kundalini* energy is “uncoiled” (or “awakened”) during meditation. But this is nothing more than the out-of-balance nervous systems coming back to the equilibrium position. In *anāriya* meditations, there is not much further cleansing is possible. To proceed further, one needs to comprehend the *anicca* nature of this world.

8. In Buddhist or *Ariya* meditations, one should start contemplating the *anicca* nature when one starts any body sensations. **Body sensations indicate that the mind is beginning to affect the body and has made progressed in the cleansing process.** Of course, those Hindu yogis who got to this stage had prevented from immoral acts and suppressed such thoughts, and thus had gained a tranquility of mind at least temporarily.

- But if one does not permanently cleanse one's mind, with the comprehension of the true nature of this world (*anicca, dukkha, anatta*), such corrections are temporary. They can go right back to the twisted positions. Thus one may experience such effects to varying degrees.

9. When one starts comprehending the *anicca* nature, this “unwinding process” can accelerate (and the body sensations too). This is when one may even start feeling significant discomfort or even mild pain.

- If the body is really “out-of-alignment,” the realignment process can lead to different types of sensations; some may be mild, but some could be even a bit painful.

10. Many people experience sweating, which is definitely part of the “cleansing process.” Our defiled thoughts lead to the generation of “impurities” in various body sites. The pure *citta* generated in meditation can burn them, and the body will get rid of the waste via sweat. Thus sweating is also possible during a good meditation session (in the early stages of progress; of course, all these go away eventually).

- Another related symptom is becoming thirsty during a good session; the mouth can get dry. It is good to keep a glass of water close by if that is the case.
- By the way, one can move around even while in a *jhāna*. In fact, when one cultivates the *jhāna*, one can open eyes and not be bothered by it. I can confirm that. In fact, those who have *abhiññā* powers are said to be able to do regular work while using *abhiññā* powers.
- For example, a famous story in the *Tipiṭaka* describes how Ven. Cūllapanthaka had created a thousand copies of himself with *abhiññā* powers and how they were all sweeping the temple premises.

11. Here is another experience that I have heard people described according to my teacher *Thero's* recorded *desanās*:

- “Something propagated from the neck area to the top of the head and stayed there during the session. This happened during subsequent sessions too”. Such a “propagation” is probably more like a “pressure wave”. This is another “*kundalini* type” effect.
- When these “pressure waves” are strong, it may be a bit painful too. But be rest assured that those effects will gradually go away as one continues when the nervous system comes back to equilibrium. However, if such sensations persist outside the meditation session, it may be a good idea to go for a medical examination since it could be due to a medical condition.

12. There is actually a way to reduce these sensations to some extent. This was suggested by my teacher *Thero* in a *desanā* that I listened to. Even if one meditates with the eyes closed (as most people should do in the early stages), the eye balls inside eyelids are in constant motion; they move around a lot.

- One should try to focus the eyes on the nose area. This is done sort of by one's mind, but the eyeballs keep steady, pointing towards nose. In my case, it stopped most of the sensations in the head. Eventually, of course, these sensations go away, once one attains “equilibrium.” Then one can proceed even with the eyes open but still focused towards the nose/mouth area.
- Now I do not have any of those “pressure waves” that experienced in the throat area and recently those in the head area also went away. Some of these effects had been there for the past year and a half.
- Getting to the first *Ariya jhāna* means one has reached the *Anāgāmi* stage, where one loses desire for all sense pleasures (i.e, transcend *kāma loka*). See #9 of “[Power of the Human Mind – Ariya Jhānā](#).”

13. Our thoughts or our “*cittaja kāya*” are the most important of the four types of “*kāya*” that we have. For a discussion of those four types of bodies, see, “[Āhāra \(Food\) in Udayavaya Nāna](#),” in the Section: [Udayavaya Nāna](#).

- As discussed there, our physical bodies (*karaja kāya*) that we value so much are there only for about 100 years, while our human *bhava* or human existence can last many hundreds of years. The other three types of bodies of *kāya* that we have are *kammaja kāya*, *cittaja kāya*, and *utuja kāya*. All three of

these prevail through the whole human *bhava* (of course, they undergo constant change); they make a “big transition” when a new *bhava* is grasped at the *cuti-paṭisandhi* moment).

- And it is this *cittaja kāya* (or basically our thought stream) that is the most important. If we use the *cittaja kāya* wisely, we can make progress in our mundane lives as well as in pursuing *Nibbāna*. We will discuss this in detail in the last post on the [Udayavaya Ñāna](#) in an upcoming post.

14. The key point here is that if one starts feeling these body sensations, one has cleansed the mind to the point of being able to comprehend *anicca*, *dukkha*, *anatta* (or any other Dhamma concept) with more ease; see, “[Buddha Dhamma – In a Chart](#),” and the post discussed there.

- At this stage (i.e., when feeling thirst, sweating, body sensations, etc.), one is likely to be somewhere around “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#)” in the meditation section.
- Of course it is also possible that one could have already comprehended *anicca*, *dukkha*, *anatta* and has attained the *Sotāpanna* stage without any such symptoms. Each person needs to decide that for themselves; see, “[How Does One Know whether the Sotāpanna Stage is Reached?](#).” **The fundamental guide is whether one has removed those “*apāyagāmī gati*” via cleansing the mind.** The physical body may or may not give those clues that we discussed above.
- For attaining *magga phala*, *jhānā* are not necessary. Furthermore, *Ariya jhānā* cannot be attained without attaining at least the *Sotāpanna* stage first; see, “[11. Magga Phala and Ariya Jhānā via Cultivation of Saptha Bojjhaṅga](#).”
- **Mental (and associated physical) phenomena are highly personal. Thus above discussed symptoms may or may not be experienced by a particular person.**

12.11 9. Key to Ānāpānasati – How to Change Habits and Character (Gati)

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section are on possible meditation subjects. They can clarify unresolved questions, and lead to *samādhi*. But one must contemplate on them.

Meditation is all about purifying one's mind. We all have individualized cravings and habits that we have acquired in our past lives that continue during this life unless we act to change or stop them. We need to cultivate good habits and stop bad ones. The only way to do this is to be mindful of our actions and stop bad actions as they start as thoughts in our minds. **Most bad thoughts arise due to bad habits; they just “pop up”.**

- [Introduction to Character or Personality \(Gati\)](#)
- [A Broad View of the “Person” Trying to be a “Better Person”](#)
- [How Character \(Gati\) Leads to Bhava and Jāti](#)
- [How Habits are Formed and Broken – A Scientific View](#)

12.11.1 Introduction to Character or Personality (Gati)

1. Here is a good place to see why the Buddha rejected both the concept of a “self” AND a “no-self” (or “soul” AND “no-soul”). We first need to realize that the task of purifying the mind is very personal; only you know about your mind and only you can purify it. The perception of a “no-self” is a bad starting point to do this cleansing.

- We can easily see that “a person” changes over time, both physically and mentally (see the next post). Thus it is easy to see that a concept of a “soul” or “self” does not hold water.
- However, each of us is DIFFERENT, and UNIQUE; no two are the same even at a fixed time. Even though each person changes, the change itself is unique to “that person” and CAN BE initiated by that person. What makes one person different from another is his/her character (*gati*).
- For those people who say, “there is no-self” or “there is no real me”, I ask: “Then is it OK if someone hits you with a stick or hurt you badly in some way?”. Obviously, that is not fine. Just by denying something that is as real as suffering itself, will not make the problem go away. Just being philosophical is not going to make the problem disappear.
- This is why the Buddha rejected both extremes of “self” and “no-self”.

2. Actually as one increasingly realizes the fruitlessness of struggling to seek sense pleasures, the feeling of “self” starts to decrease. An *Arahant* is the closest to a “self-less person”; but even an *Arahant* has some unique character qualities: nothing to do with greed, hate, and delusion, but more like kammically neutral habits.

- For example, there is this story about a very young *Arahant*. One day a man came to take this *bhikkhu* to his house for a “dāna”, which consists of a lunch followed by a gift (usually things that are needed for a *bhikkhu* like a robe, a towel, etc). On the way, they ran into some puddles on the ground and the young *bhikkhu* jumped over one. The man thought, “Oh, this *bhikkhu* is not even disciplined let alone having any *magga phala*; maybe I should not give him the gift”. They came across a few more puddles and the *bhikkhu* went around them. So, the man asked, “Why did you jump over only that one?”. The *bhikkhu* told him, “If I jumped over anymore puddles, I would probably lose my lunch too”. It turned out that the *bhikkhu* was an *Arahant* with *abhiññā* powers and read the man's mind! Also it is said that the *bhikkhu* was born a monkey for many lives in the recent past, and he still had that *sansāric* “monkey habit” of jumping over things.

3. Habits are formed via repeated use. The Buddha said, “*yā yan taṇhā pono bhavitha.....*” or “*bhava* or habits are formed by *taṇhā* for various things, activities. Remember that *Taṇhā* means “getting attached to something via greed, hate, of ignorance”; see, “[Tanhā – How we Attach via Greed, Hate, and Ignorance.](#)”

4. What we are concerned about is only getting rid of immoral habits and cultivating moral habits. This will make oneself a “better person” long before one even thinks about attaining Nibbāna. This can be done with simple process called “*āna-āpāna*” or “taking in good habits” and “discarding bad habits”.

- The Buddha said, “*bhāvetabbañca bhāvitam; pahātabbam pahīnam me*” [MN 91, MN 92, KN Thag 16.6, KN Snp 3.7] or “keep doing what is good, get rid of those that are not good”. The meaning is a bit deeper than that because “*bhāve*” there refers to making “*bhava*”. The more one does something, it becomes one’s “*bhava*”. And the less one willfully stops doing, that “*bhava*” tends to go away. This is what the neurologists are re-discovering today; see, “[How Habits are Formed and Broken – A Scientific View.](#)”

5. The bad habits need to be stopped each time it surfaces, right there. The Buddha said, “*ette san uppajjamānā uppajjati, pahīyamāna pahīyati*” or “each time a “*saṇ*” (a bad habit) resurfaces, it needs to be recognized and stopped right then.” [19.5 *Yam loke piyarūpaṃ sātārūpaṃ, etthesā taṇhā uppajjamānā uppajjati, ettha nīvisamānā nīvisati. ... 20.4 Yam loke piyarūpaṃ sātārūpaṃ, etthesā taṇhā pahīyamānā pahīyati, ettha nirujjhamānā nirujjhati.* [WebLink: suttacentral: Mindfulness Meditation – Mahāsatipatthānasutta DN 22](#)]

- Therefore, one must do this not only in sitting meditation sessions, but as much as possible, whenever possible.
- This is what the Buddha also meant by “*āsevitāya, bhāvitāya, bahulikatāya,*” [MN 119, AN 8.1, AN 8.4] or “associate, use, and do as much as possible whenever possible” everything that helps with *Ānāpānasati*. These are described in the post, “[Habits, Goals, and Character \(Gati\)](#)”.

6. I cannot emphasize enough the importance of understanding what is truly involved in *ānāpānasati*. The recent findings on the workings of the brain really helps clarify and highlight some key points that the Buddha emphasized. I think it will help anyone understand the process much better. But first we will take a brief look at how these character qualities are inherited.

Next, “[A Broad View of the “Person” Trying to be a “Better Person”](#)”,

12.11.2 A Broad View of the “Person” Trying to be a “Better Person”

Revised November 28, 2018

1. Let us see how and why we act with greed, hate, and ignorance. Stated simply, all we do during a day does not happen by chance.

- **Our actions are based on our “character” (more correctly *gati*) AND “our way of thinking about this world based on our views about the world”;** “*gati*” is pronounced as “gati”.
- For example, if one does not believe in a rebirth process, or the law of *kamma* (that each action has consequences), then it may be easier to seek enjoyment at the expense of other beings.

2. What our character or world view today is due to a complex combination of many things, but the main factors are: (i) *sansāric* habits (also called *gati* and *āsavas*), (ii) biological parents who provide parts of the physical body (this is also related to *kamma vipāka*), (iii) the environment that one grew up AND the current environment (i.e., physical environment and people one associates with).

- Even though the complexity of a “person” cannot be reduced to simple things, those are major ones. As the Buddha pointed out in the *Sabbāsava sutta* [MN 2] (see, “[Habits, Goals, and Character \(Gati\)](#)”), the main things that CAN BE changed NOW are “physical environment and people one associates with” which is a part of (iii) above. If we are talking about a child, then (iii) applies in its entirety.

- Once these “external influences” are taken care of, next is to purify the mind by “taking in” good things and “discarding” bad things or “*ānāpāna*”; see, “[7. What is Ānāpāna?](#).”

3. When we are conceived in the mother’s womb, a “blueprint” of the new life is in the form of a *manomaya kāya* (which is made of undetectably fine matter) descends to the womb and combines with the zygote formed by the combination of an egg from the mother and the sperm from the father.

- This *manomaya kāya* is the same as *gandhabba* or *paṭisandhi viññāṇa*.

4. The *manomaya kāya* comes with three *rūpa kalapas* called the *kāya dasaka* (blueprint for the physical body), *bhāva dasaka* (whether male or female), and *vatthu dasaka* (mind element, which has the “*gati*” in it) that were determined by the *kamma vipāka* that led to the birth; we will discuss these later in the Abhidhamma section.

- Thus the physical body of the new life is now going to be affected by not only the *kāya dasaka*, but also the genetic material in the egg and the sperm (DNA of the parents). As the fetus grows, it will also be affected by the food intake by the mother as well as her mental state, home environment, etc. After the birth until death, the physical body (as well as the mind) will be affected by many other factors including the diet and the environment.

- This is discussed in detail at: “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”

5. Thus there is no “unchanging self” either mentally or physically; everything is in constant flux. But one cannot say “there is no-self” either because the character qualities (*gati* and *āsava*) that comes in with the *manomaya kāya* will keep “evolving”; even though they change, there is a continuation of a particular lifestream.

- Each person or animal that born is unique with a complex set of mental and physical parameters that evolve moment-to-moment like a flowing river; see, “[What Reincarnates? Concept of a Lifestream](#)”.
- We will discuss some of these factors in various sections, but the key point I wanted to get across is the fact that each person has a unique set of character qualities (*gati* and *āsava*) that have evolved over uncountable number of lives in the past. And those are the key to one’s destiny. **One has the power to change those.**

6. What makes one person different from another is this set of “*gati* and *āsava*”, which can be loosely translated as, “character qualities and deep-seated cravings”. Some people are calm and quiet while others are rough and boisterous; some like music while other like to watch things or engage in physical activities; the possibilities are endless and there are innumerable combinations of them. That is why each person is different.

- Hidden in these apparently harmless “habits” and “cravings” are the defilements or the tendencies to engage in certain types of activities that are harmful to oneself or the others.
- The key is to focus on the glaring character flaws first: if one engaged in activities such as fishing or hunting, that means willfully taking the life of other beings for one’s pleasure. Does that makes sense within the wider world view of any given being repeatedly born in any of the 31 realms? Within that broader view, we can see that any animal, how small or insignificant, has an attachment to its life; and we could have had that very life in the past.
- Take another example of a transaction between two people. The goal should be to make a decent profit for oneself making sure one covers the cost and make enough profit to “stay in business and provide for the family”, but not to make the transaction too burdensome on the other party. As we discussed in the post, “[Kamma, Debt, and Meditation](#)”, one could get into deep debt to other people and beings by exploiting them in many different ways.

7. The easiest way to deal with this is to look at each action mindfully and decide whether that act is “fair” to everyone involved. Of course one could check to see any of the ten defilements (*dasa akusala*) are committed by that action; see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”

- As I keep saying, one needs to focus on the more extreme violations first. There is no point in worrying about inadvertently killing some insects while gardening if one is engaged in lying and deceit or killing animals for pleasure. It is good to get an idea of the severity of different acts; see, “[How to Evaluate Weights of Different Kamma](#)”.

8. **This is why it is important to learn Dhamma as much as possible, while engaging in meditation. The Path becomes clear as one learns the subtleties in key Dhamma concepts.**

- I am amazed how much I learn each and every day; it is like a picture becoming clearer by the day. You start to see the even smallest detail, and instead of becoming distraught you get a sense of clarity and peacefulness by cleansing the mind. You realize that no one is perfect until the *Arahanthood* and the key is to make progress, no matter where you are. Each step in the right direction makes you feel better.

Next, “[How Habits are Formed and Broken – A Scientific View](#)”,

12.11.3 How Character (Gati) Leads to Bhava and Jāti

Revised August 9, 2021; February 15, 2023

Jāti (births) depend on *gati* (habits/character.) Therefore, it is critical to cultivating “good *gati*.”

1. A unique knowledge that the Buddha gained during the Enlightenment was the *āsavakkhaya ñāṇa*. This is the key to stopping the suffering FROM ARISING via getting rid of the deep-seated cravings (*āsava*) that we all have. *Āsavakkhaya ñāṇa* (“*āsava*” + “*khaya*,” where “*khaya*” is the opposite of “*saṇ*”; see, “[What is “Saṇ”?](#)”) is the knowledge on how to remove those cravings (*āsava*).
2. Throughout the site, I keep emphasizing the importance of understanding (not memorizing) the meanings of the key Pāli words like *gati*, *anusaya*, *āsava*, *bhava*, *jāti*, *saṃsāra*, and *dukkha*; they are intimately inter-connected in many ways including *Paṭicca Samuppāda*. The way to stop future suffering (*dukkha*) from arising and reaching Nibbāna is to break the perpetual cycle that leads to a new *jāti* (birth) at each death.
 - Our problems do not go away at death (committing suicide is a bad idea); they merely get started in a new phase with a new body, which could be worse than what we have now; see, “[What Reincarnates? – Concept of a Lifestream](#).”
 - The connections among *bhava* and *jāti* on one side and *āsava*, *anusaya*, and *gati* on the other side are intimate, and need to be understood well; see, “[Samsāric Habits, Character \(Gati\), and Cravings \(Āsava\)](#),” before reading the rest of this post.
3. **This understanding is needed even if one is not seriously thinking about Nibbāna. In general, the real key to suffering is embedded in these intricate relationships.**
 - *Bhava* and *jāti* also happen during this very life; *jāti* could mean the birth of a new desire; see, “[Idappaccayatā Paticca Samuppāda](#)” and “[Bhava and Jāti – States of Existence and Births Therein](#).”
 - It may be confusing for a new person to this site, but have patience and read the inter-connected posts. I have links everywhere to pertinent posts/material. Once you understand the underlying connections, it will clarify everything, like a fog being lifted.
 - I have set up links to open them in new windows so that you can go back and forth between posts quickly and try to “fill-in-the-gaps.”
4. A perpetual cycle that is ever-present in the *samsāric* cycle of rebirths is described in the following verse:

“*uppado pavattam, pavatta nimittam*

nimitta paṭisandhi, paṭisandhi gati”

- “*Uppada*” means arising. When *āsava* (cravings) arise due to the triggering of *anusaya* (hidden temptations,) we need to stop that temptation and break the cycle at “*pavattam*” (which means keeping it or going with it).
- If we go along with the temptation (“*pavatta*”), then it becomes a *nimitta* (literally a “sign”). A *nimitta* is a characteristic that is associated with that particular act. For example, for an alcoholic, a picture of an alcohol bottle or a bar (or where one normally drinks), or even seeing a friend with whom one drinks often, can be a *nimitta*; when any of such a “symbol” comes to the mind, it reminds of the drinking act and gets one in the “mood.”

5. Most times, the *paṭisandhi* (linking the next rebirth) takes place via a *nimitta*; this is what is meant by “*nimitta paṭisandhi*” above. At the dying moment, what comes to the mind is likely to be something that one often does, which could become the link to the next life.

- A drug addict, if lucky to be born human again, will be attracted to a mother who is a drug addict.
- For a person with a lot of hate, what comes to the mind at the dying moment could be a picture of an arch enemy; then the kammic power shows him a gun or a knife and he will be likely to attack the person with that weapon (in a dream-like state); the next moment he will be in an *apāya* (hell), which is the “matching place.”

6. The worst thing is that the old habits continue and even strengthen in this new life; this is why “*paṭisandhi gati*” is meant above. Suppose a drug addict born to an addicted mother is adopted by another family and raised in a drug-free environment. Still, if that child becomes exposed to drugs later in life, he could be tempted to use drugs because of his *sansāric* habit.

- This is the danger in the rebirth process or *samsāra*; one keeps going down the slippery slope unless one changes one’s habits with effort. And reversing that trend can be done only in human life.
- Sentient beings in most realms do not act willfully but according to their *sansāric* habits. We can see only the animal realm. Animals do things mechanically (**almost like robots, but not entirely only because they have FEELINGS**). Only the beings in higher realms have genuine free will, which is optimum for humans.
- You can see that many animals have unique characteristics: such characteristics and habits are associated with that particular existence (*bhava*). For example, some birds have been building the same type of nests from beginningless time through countless world cycles; **but they cannot make it any better**. Migrating birds know exactly where to fly. Newborn turtles head to the sea right after the eggs are hatched; see the video:

[WebLink: YOUTUBE: New Born, Baby Sea Turtles Race to the Ocean!](#)

7. However, humans can change their destiny. They have free will and the ability to develop “new ideas.” We keep building new things, discovering new things, and making progress.

- We must remember that we can also purify our minds and become free of this unending and suffering-laden rebirth process. If we ever get birth in one of the lower realms, we will be stuck there for a long time.
- The way to purify our minds is to get rid of bad habits. Excessive greed (this includes addictions to anything, including food, money, property, alcohol, drugs, etc.) and anger are the first two things one needs to work on.
- This does not mean one has to give away one’s wealth; just don’t be too attached to them. One has “earned” that wealth from previous good deeds, so one does not need to feel bad about it. But those things last only about 100 years, and who knows what we will inherit in the next life.

8. And the key to being permanently free of the *apāyā* is to get rid of those bad character qualities (*gati*) that can give us birth in those four realms.

- We can avoid the *niraya* (hell) by getting rid of hate; we can stay away from *peta* (hungry ghost) worlds by getting rid of greed; we can make sure not to get a birth in the *asura* realm by not getting “free rides,” and making our living honestly (“*a*”+“*sūra*” means “not able” or those who depend on others).
- An animal’s birth results from *gati* that have all three roots of greed, hate, and ignorance. The animal realm is called “*thirisan*” in Pāli or Sinhala: “*thiri*” is three and “*saṇ*” is greed, hate, and ignorance. Thus animal birth is caused by *gati* that have all three immoral roots.
- In the same way, we can make it possible to be born a deva by being generous to others; we can make it possible to become a *Brahma* by cultivating *mettā*, *karuṇā*, *mudī tā*, *upekkhā*; and we can optimize chances for a human birth by cultivating wisdom as well.

9. But no matter how well we live this life, we do not know what kind of “*kammic* baggage” we carry from previous lives. Thus the only way to avoid the four lower realms (*apāyā*) with CERTAINTY is to attain the *Sotāpanna* stage of *Nibbāna*. And we can do this by comprehending *anicca*, *dukkha*, and *anatta*, the true nature of this world.

- When one truly comprehends *anicca*, *dukkha*, and *anatta*, one’s mind automatically rejects actions bound to maintain and cultivate bad *gati*, and encourages actions that will cultivate good *gati*. If this is done to the level of getting rid of the four greedy *citta* with wrong vision and the *citta* with *vicikicchā*, then one becomes PERMANENTLY free of the *apāyā*; see, “[Akusala Citta – How a Sotāpanna Avoids Apāyagāmi Citta.](#)”

10. Finally, another exciting video from the animal world shows how ants build sophisticated cities. But unlike humans, the ability to do that does not come from ingenious minds; ants have been doing the same for eternity. It is a “characteristic” that is naturally associated with the “ant *bhava*.” Each ant “knows” what to do, like the baby turtles who race to the sea just after being hatched. It is the same with how birds know where to fly in their long migrations.

- There is so much that the Buddha explained to the world, but the world is still unaware of it.

[WebLink: YOUTUBE: Giant Ant Hill Excavated](#)

11. More details on the importance of *gati* in the rebirth process are discussed in “[Patisandhi Citta – How the Next Life is Determined According to Gati.](#)”

12.12 Karaniya Metta Sutta – Metta Bhāvanā

October 7, 2018; revised September 6, 2019; revised #5 on February 11, 2021

Karaniya Metta Sutta is one of the popular *suttā* in Buddhist countries. However, like many *suttā*, it has not been appropriately translated in most current English translations.

1. First of all, the actual name of the *sutta* is *Karaniyamattha Sutta*. It comes from “*karaniyama*” meaning “essential to do” (කලයුතුම (kalayutuma means “requires”) in Sinhala) and “*attha*” meaning “oneself.” That means this *sutta* summarizes what one must do (to make progress on the Path). But this is not a significant error since Metta *bhāvanā* is there too.

- Those “requirements” are in the first three verses.
- The actual “Metta *bhāvanā*” part is in verses 4 through 8.
- Verse 9 says that one should do this *bhāvanā* in all four postures. This *bhāvanā* is the “*Brahma Vihāra*” or “living like a *Brahma*” or “living with the mindset of a *Brahma*.”
- Verse 10: When one fulfills the “requirements” at the basic level, one will get to the *Sotāpanna* stage. With the cultivation of Metta *bhāvanā*, one will get to be an *Anāgāmi* (not born in a womb again).

	Pali	English
1	<i>Karaṇīyamattha kusalena, Yantam santam padam abhisamecca; Sakko ujū ca suhujū ca, Sūvaco cassa mudu anatimānī</i>	What <i>kusala</i> should be done by one who is seeking cooling down (by seeing the unfruitful nature of this world) : moral, upright and disciplined, with pleasing manners and humble .
2	<i>Santussako ca subharo ca, Appakicco ca sallaukavutti; Santindriyo ca nipako ca, Appagabbho kulesuananugiddho</i>	Always happy, bearing only good (<i>gati</i>), with few mundane duties and simple life , with senses calmed and a cooled mind, with few burdens (possessions), and treating everyone the same (regardless of race, color, etc.).
3	<i>Na ca khuddamsamācare kiñci, Yena viññū pare upavadeyyum; Sukhino va khemino hontu, Sabbe sattā bhavantu sukhittatā</i>	Not engaging in harmful/lowly actions (and this thought that one always holds), may all beings attain Nibbāna (and get to the ultimate happiness) .
4	<i>Ye keci pāṇabhūtatti, Tasā vā thāvarā vā anavasesā; Dīghā vā ye mahantā vā, Majjhima rassakāṇukathulā</i>	Whoever there may be with a breath of life , trapped by greed for so long in <i>saṃsāra</i> , may they be free of fear and greed without exception.
5	<i>Diṭṭhā vā ye va adiṭṭhā, Ye ca dūre vasanti avidūre; Bhūtā vā sambhavesī vā, Sabbe sattā bhavantu sukhittatā</i>	Those who are seen or unseen, those dwelling far or near, those born as well as those seeking birth (<i>gandhabbā</i>), may all beings attain Nibbāna .
6	<i>Na paroparam nikubbetha, Nātimaññetha katthacinam kañci; Byārosanā paṭighasañña, Nāññamaññassa dukkhamiccheyya</i>	May no one deceive another, treat everyone like close relatives. May they not wish each other harm, and by seeing the unfruitful nature of this world, may they be free of suffering .
7	<i>Mātā yathā niyaṃputtam āyusā ekaputtamanurakkhe; Evampi sabbabhūtesu, Mānasambhāva ye aparimāṇam</i>	Just as a mother would protect her only child with her life, may this protection affect all beings on an equal footing .

	Pali	English
8	<i>Mettañca sabbalokasmim, Mānasambhāva ye aparimāṇaṃ; Uddhaṃ adho ca tiriyañca, Asambādhaṃ averam asapattaṃ</i>	May all cultivate <i>mettā</i> towards all beings on an equal footing , those who live above, below, or across. May all be unhindered and without enmity.
9	<i>Titṭhaṃ caraṃ nisinno vā, Sayāno vā yāvatassa vighatamiddho; Etaṃ satim adhiṭṭheyya, Brahmametaṃ Vihāraṃ idhamāhu</i>	Whether standing, walking, sitting or lying down, may all sustain this <i>mettā</i> mindset (what the Buddha called Brahma Vihāra).
10	<i>Diṭṭhiñca anupaggaṃma, Sīlavā dassanena sampanno; Kāmesu vinaya gedhaṃ, Na hi jātugabbaseyyam punareti”ti</i>	Being moral based on right vision (a Sotāpanna) , and by removing <i>kāma rāga</i> with effort one will never again be in a womb (Sakadāgāmi or higher) .

Note: The pdf file of the *sutta* itself can be downloaded here: “[WebLink: PDF File: Karaniya Metta Sutta.](#)”

2. Deeper explanations are in some words like “*abhisamecca*” (“*abhi*” + “*saṇ*” + “*avecca*”), and “*dukkhamiceyya*” (“*dukkham*” + “*aveceyya*”).

- *Avecca* is the keyword in both cases, and I discussed the deep connection to “*icca*” and thus *Tilakkhaṇa* in the post, “[Sotapatti Anga – The Four Qualities of a Sotāpanna](#)” (starting at #9 in the post).
- If anyone needs more explanations of other words, we can discuss it at the discussion forum, but we will look at one more next.

3. Another keyword is “*mānasambhāva*,” which comes from “*mānasā*” and “*bhava*,” meaning one’s mind (ideally) does not contaminate beyond the “*mānasā*” stage.

- When thoughts (*citta*) arise, they get contaminated within a fraction of a second due to one’s *gati*. That is discussed in the post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”
- Therefore, the goal is to improve one’s *gati*, so that one’s *citta* will not contaminate beyond the “*mānasā*” stage (reached the *Arahant* stage). **One should strive to approach that mindset right now, at least while meditating.**
- As one gets closer to that stage, one will have true *mettā* AUTOMATICALLY for increasingly more and more living beings. At *Arahanthood*, one will have boundless *mettā* to all: “*mānasambhāva ye aparimāṇaṃ*.”

4. The first three verses in the *sutta* state how one gets to the *Sotāpanna* stage by getting to the *Ariyakanta sīla* (unbreakable moral conduct). That is when one will have *aveccappasāda* (unbreakable faith in the Buddha, Dhamma, Saṅgha). That is discussed in detail in the post, “[Sotapatti Anga – The Four Qualities of a Sotāpanna](#).”

- Then by cultivating *mettā*, one can gradually get rid of *kāma rāga* and get to the *Sakadāgāmi* and *Anāgāmi* stages.
- However, this is an excellent *sutta* to listen to and to recite even before getting to the *Sotāpanna* stage. It is better **to recite Pāli verses with an understanding of the meaning of those verses. The sound itself is beneficial, especially when pronounced correctly, as done by the Thero in the recording below.**
- It is also good to play the recording in the background while doing other things or during meditation. In Asian countries, this is common practice to play this *sutta* in the mornings, while everyone is getting ready to go to school or work.

5. A recital of the *sutta* by Waharaka Thero is below:

[WebLink: Karaniya Metta Sutta in mp3](#)

Note: In the recital, the *sutta* ends around 4:45. The Thero starts reciting the following verse:

*“Nakkhatta-yakkha-bhūtānaṃ
Pāpaggahā nivāraṇā
Parittassāmbhāvena
Hantu mayhaṃ upaddave”*

It is a verse from “*Mahā Jayamaṅgala Gāthā*” where merits are offered to other beings. See, p. 42 of the following booklet, which is a useful guide:

12.13 10. Attaining the Sotāpanna Stage via Removing Diṭṭhāsava

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

July 30, 2015: I have re-written the two posts #10 and #11 (previously titled, “10. Magga Phala and Ariya Jhānā via Cultivation of Satta Bojjhaṅga” and “11. How to Select and “Grow” Meditation Procedures for Magga Phala”) that were written some time back with different titles. Over the past two months, I have clarified some subtle issues in my experience and technical details. **Revised August 5, 2017; September 19, 2018 (updated links).**

- First, the order of things: *samādhi*, *magga phala*, and then *Ariya jhānā* in that order; see, [“Possible Outcomes of Meditation – Samādhi, Jhāna, Magga Phala.”](#)
- Thus *jhānā* (*Ariya* or *anāriya*) are not necessary to attain the *Sotāpanna* stage; see the posts in the [“Sotāpanna Stage of Nibbāna”](#) section for details on this and many other aspects.

1. First, it would be challenging to get to even a state of *samādhi* if one is not keeping up the “conventional” five precepts: abstaining from killing, stealing, sexual misconduct, lying, and using drugs or getting intoxicated. Those things make the mind restless, and hard for the mind to focus attention (the five hindrances “cover the mind”). Just strictly obeying the five precepts may not be effective if one’s mind is full of jealousy, extreme greed, hate, etc.; see [“The Five Precepts – What the Buddha Meant by Them.”](#)

- Just like one cannot see the bottom of a well if it is highly contaminated, the mind (and the body) will not “feel anything” even in a formal meditation session if the mind is “highly contaminated.” And there is no point in trying to take out the “small defilements” (such as abstaining from taking a glass of wine) if one is engaged in immoral activities.
- With the “big defilements” removed, one starts seeing a little bit further down the well; similarly, one’s mind will become lighter, with less stress, even when not in a formal meditation session. Sitting down in a quiet place makes it easier to get to some state of “*samādhi*,” or tranquility.
- The Buddha said that “*kusala sīla*” leads to the tranquility of the body and mind, leading to *samādhi*. The “*kusala sīla*” accomplished via gaining *Sammā Diṭṭhi* (to some extent) is all that is needed to attain the *upacāra samādhi* needed for the *Sotāpanna magga/phala*. All three *saṃyojana* removed at the *Sotāpanna* stage (*sakkāya diṭṭhi*, *vicikicchā*, *sīlabbata parāmāsa*) are associated with the wrong vision or *diṭṭhi*.

2. Many believe one needs to “get to *samādhi*” using a separate meditation technique such as conventional breath meditation. Even though one could do that, it would be a waste of time. One can get to *samādhi* by listening or reading attentively to CORRECT dhamma.

- There is not even a single reference in the *Tiṭṭaka* where the Buddha asked anyone to do a “*Samatha Bhāvanā*” first and then to “*vipassana bhāvanā*.” When one comprehends Dhamma, one’s mind gets calm, and through that *Samatha* state, one can get to *magga phala*.
- After attaining the *Sotāpanna* stage, one can get to *Ariya jhānā* by focusing on that “state of cooling down” that one has already achieved to some extent, to get to *jhānā*.
- One needs formal meditation techniques to attain **higher** *magga phala*, i.e., above the *Sotāpanna* stage; the reason will become clear shortly. However, it is fine to do formal meditation even to attain the *Sotāpanna* stage. In the following, I will describe what I went through.

3. To get to *samādhi*, contemplating Dhamma concepts will make it easier and faster. Also, one can stay in “meditation” for a longer time. Different names used are insight meditation (*vipassana*), many forms of “*anupassanā*,” and cultivating the “*dhamma vicaya*” *sambojjhaṅga*. Concomitantly, one must do the correct version of “*Ānāpānasati*” at all times.

- In principle, working towards the *Sotāpanna* stage does not require formal meditation techniques even though meditation can help; countless people attained the *Sotāpanna* or even higher stages of *Nibbāna* just by listening to a Dhamma discourse.
- It is quite essential to understand this point. Many people have one or more misconceptions about reaching the *Sotāpanna* stage. (i) Giving up all worldly possessions, (ii) Becoming a *bhikkhu* or living in seclusion, and (iii) One needs many meditation techniques.
- To clarify this issue, let us examine what is involved in attaining the *Sotāpanna* stage.

4. Removal of cravings for worldly pleasures or *āsavas* (*āsavakkhaya*) leads to *Nibbāna*; see, “[Āsava, Anusaya \(Temptation\), and Gati \(Gathi\)](#).”

- Out of the four *āsavās* that we have, only one goes away at the *Sotāpanna* stage: ***diṭṭhāsava* or the craving for wrong worldviews**. In the *Sabbāsava Sutta* [MN 2], this is referred to as removal by clear vision (“*dassanena pahātabbā*,” where *dassanena* is vision and *pahātabba* is removal).
- The other three *āsavas* of *kāmāsava* (craving for sense pleasures), *bhavāsava* (desire to live somewhere in the 31 realms of this world), and *avijjāsava* (ignorance of *anicca*, *dukkha*, and *anatta*) go away at the higher stages of *Nibbāna*; see the above post.

5. The critical point is that one does “*apāyagāmi apuññābhisaṅkhāra*” (or strong immoral deeds that make one eligible to be born in the lower four realms) only when one has wrong worldviews. Contrary to most people’s beliefs, one does not need to lose the craving for sense pleasures to attain the *Sotāpanna* stage. *Kāma āsava* is reduced in stages in the *Sotāpanna* and *Sakadāgāmī* stages and is removed only at the *Anāgāmī* stage.

- That is why learning dhamma concepts and getting rid of “*diṭṭhi*” or “wrong views” is key in attaining the *Sotāpanna* stage, as I emphasized in several posts; if you enter “*diṭṭhi*” in the Search box on the top right, you will see many relevant posts.
- We all have many *diṭṭhis*. These can be removed only by learning the world’s true nature, i.e., by learning Dhamma.
- One meaning of *Sotāpanna* (“*sota*” + “*paññā*”) is “one who has cultivated wisdom by listening to Dhamma”; in the days of the Buddha, that was how one learned Dhamma, by listening.

6. Even before meeting my teacher *Theros*, I had been thinking about dhamma concepts for 3-4 years and trying to get a consistent picture in my mind. Even at that time, I could focus my mind and quickly get to *samādhi*.

- When I “got stuck” trying to figure out what a particular concept means concerning others, I would look through books and listen to *desanās* (discourses) on the internet. At this stage, I realized that most of the explanations did not make sense and were not consistent with other key concepts.
- For example, I struggled to explain the rebirth stories to many children. If “being born human” is so difficult as explained in many *suttā* (see, “[Rebirth – Connection to Suffering in the First Noble Truth](#)”), then how can all those children remember their recent past lives? Furthermore, there were “gaps” from the time they died in their previous life to the time they were born in this life.
- Once I met my teacher *Thero*, I clarified that issue along with numerous others: Birth is different from “human *bhava*”; see, “[Bhava and Jāti – States of Existence and Births Therein](#).” Also, when one dies and has energy left in the “human *bhava*,” one becomes a *gandhabba* and has to wait until a suitable womb becomes available; see “[Mental Body – Gandhabba](#).”
- Thus rebirth in the human realm does not happen instantaneously. One could be in the *gandhabba* state for years before being directed to a suitable womb. And one can be born in the human realm many times before the *kammic* energy for that “human *bhava*” is exhausted.

7. However, I could get to *samādhi* even before resolving many of these issues. I was making steady progress with the concepts that I could quickly grasp. I would sit at the desk, contemplate, and feel my body lighter and my mind calm. It was much better than just wasting time doing “breath meditation.”

- If I sat in a quiet place and meditated (contemplating a Dhamma concept), my mind would “latch on to it,” and I could get to an *anāriya jhānic* experience. That started a year before I learned the true meanings of “*anicca, dukkha, and anatta*.”
- It started with “tingling sensations inside my brain”; I could feel things happening there. And then I could feel “needle pricks” all over the body, and my body would start “freezing,” mostly the upper body. These “symptoms” are not common to all.
- Learning Dhamma is a critical part of “*kusala sīla*,” especially for the *Sotāpanna* stage. *Kusala sīla* automatically leads to *samādhi*, as discussed in the “[Na Cetanākaraṇīya Sutta](#).”

8. After I heard the “true meanings of *anicca, dukkha, anatta*,” I made progress very quickly. Looking back now, I may have attained the *Sotāpanna* stage while listening to that first *desana*. However, it took me some time to realize and convince myself. One needs to look back at the progress one has made and see that one is now incapable of committing immoral deeds that would make one eligible for rebirth in the *apāyā*.

- I was overjoyed with comprehending the “foundation of Buddha Dhamma.” It does not make sense to struggle to seek more worldly pleasures and possessions. That is guaranteed to be a failure in the long run. One spends one’s whole life making money to enjoy such “pleasures,” and before one realizes it, one has come to old age. I would call or e-mail my friends and tell them they needed to listen to *desanas* by those *Theros*.
- It took me a little while to realize that most of them could not figure out what I was excited about. Now, looking back, I realize that their minds were not ready. They were too busy making “more money.” It was a revelation for me, who had been seriously struggling for a few years. But most people who just spent a bit of their time reading critical concepts do not “connect.” **Reading Dhamma should not be done the same way as reading a newspaper or a novel; one needs to be engaged.**
- After getting the true meaning of “*anicca, dukkha, anatta*,” I spent the next few months scouring the internet for the *desanas* of those *Theros*. After five months, I traveled to Sri Lanka and brought back more material to listen to. It was so fulfilling and exciting; I was learning at a very rapid pace. At that time I didn’t even think about *jhānā*, but I could feel “*jhānic* effects,” i.e., my *samādhi* was getting intense, even though I was not trying to cultivate them.
- **September 19, 2018 update:** I have been listening to only those *desanas* by Waharaka Thero for the past few years. They are available only in the Sinhala language at “[සද්ධම්මදර්ශන](#)”; also see: “[Parinibbāna of Waharaka Thero](#).”

9. Even though I had an inkling about reaching the *Sotāpanna* stage soon after listening to that *desanā*, I developed the *jhānā* some months later. However, **those turned out not to be *Ariya jhānā* though, since they can be attained only by an *Anāgāmi***; see, “[11. Magga Phala and Ariya Jhānā via Cultivation of Satta Bojjhaṅga](#).”

- These and other aspects of *Ariya* and *anāriya jhāna* are discussed in the section: “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”
- Once I finished investigating and “filling the gaps,” the *jhānā* came almost automatically. The meditation experience I described in #7 became much stronger; I could close my eyes and “feel the change in the head and the body” within minutes (and, nowadays, within seconds).

10. The above is what I mean when I say, “feel the results of meditation.” **One can feel it in the body as well as in mind.** Let us first discuss the reasons for the “body effect” and the “mind effect.”

- We have a very complex nervous system that the brain uses to control various body parts and communicate with the five physical senses. A “duplicate nervous system” is associated with the

manomaya kāya, and as we grow up, those two systems get somewhat displaced. The displacement becomes more prominent when we start enhancing all types of bad habits; they go “out of sync.”

- When we start learning Dhamma and avoid the most egregious acts, the two nervous systems try to get to the ideal overlap positions, and one could feel that. That becomes noticeable during meditation. Some people may feel aches and pains, sweating, etc. That is why I had said in other posts that things MAY look worse before getting better. In a way, such “body signals” are a good sign; it means the body is starting to respond.

11. Now to the “mind effect.” Many people tell me that they cannot keep their minds focused on even their breath for too long. That is a *samsāric* habit; the mind does not like staying in one place. It wants to “know” about everything happening in the vicinity and randomly think about past events or plans.

- The only way to remove this “bad habit” is to start thinking about Dhamma concepts slowly. And that cannot be forced either. Unless and until the mind sees the benefits of learning Dhamma, it can be a “chore” to some people. But once one gets some traction, one starts enjoying the “taste of Dhamma,” and it is easy to stay focused.
- The key here is that when one learns Dhamma, “*diṭṭhāsava*” (or craving for wrong worldviews) starts to dissolve, initially slowly, but picks up speed as one starts grasping concepts.
- The two critical components of *pañca nīvaraṇa* (*kāmacchanda* and *vyāpāda*) reduce as *diṭṭhāsava* reduced. That, in turn, lead to the reduction of the other three of the *pañca nīvaraṇa*. This process goes all the way to the *Sotāpanna* stage.

12. Of course, I did not realize until after meeting my teacher *Thero* (online) that what I had been doing all along was a crude version of the *Satta Bojjhaṅga Bhāvanā*. The crucial part of that is *dhamma vicaya* (contemplating Dhamma concepts). [*vicaya* :[m.] investigation.]

- That is how one cultivates the “*anicca saññā*” which is the key to removing defilements permanently. See “[What is the only Akusala Removed by a Sotāpanna?](#)” and “[How to Cultivate the Anicca Saññā](#).”
- The formal *Satta Bojjhaṅga bhāvanā* is discussed in the next post, “[11. Magga Phala and Ariya Jhānā via Cultivation of Satta Bojjhaṅga](#).”
- It is also important to realize that even an *Arahant* will not lose the sense of taste; one increasingly will lose CRAVINGS for them; see “[Kāma Rāga Dominates Rūpa Rāga and Arūpa Rāga](#).”

13. **November 11, 2016:** I get many questions on this topic, i.e., how to verify one is progressing towards the *Sotāpanna* stage. The new section, “[Living Dhamma](#),” provides a systematic way to achieve that goal and provides guidelines on checking one’s progress.

- **January 23, 2020:** The new “[Origin of Life](#)” section attempts to start “at the beginning” and get to more in-depth concepts of *anicca*, *dukkha*, and *anatta*. The deeper I get into the fundamental concepts, I realize there is much more! **However, basic comprehension becomes more natural too.** I may need to go back and revise many of the old posts. So, I would encourage everyone to read the new series with a deeper understanding.

12.14 11. Magga Phala via Cultivation of Satta Bojjhaṅga

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions, and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

Revised August 5, 2017; September 19, 2018; revised April 24, 2020; May 15, 2023

Introduction

1. There are many ways to get to *magga phala*. What I have followed is *Bojjhaṅga Bhāvanā* and *metta Bhāvanā*. As explained in the previous post, I first did a crude version of the *Bojjhaṅga Bhāvanā* for a few years without even realizing that it was effectively a *Bojjhaṅga Bhāvanā*.

- Now I practice *Bojjhaṅga Bhāvanā/Ariya Mettā Bhāvanā* in sitting meditation and *ānāpānasati* (and *satipaṭṭhāna*) during other times, i.e., suppressing any thoughts/speech/actions that should be discarded and cultivating the opposite. Nowadays, It has become a habit and the moment something inappropriate comes to my mind, I become aware of it. As I keep saying, cultivating good habits (*gati*) is the key to progress.

Ānāpānasati Bhāvanā Comes First

2. *Ānāpānasati* (and *Satipaṭṭhāna*) helps one to get rid of bad habits/cultivate good habits, and thus change one's *gati* and *āsavā*; see, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#),” and “[Is Ānāpānasati Breath Meditation?](#).”

- *Bojjhaṅga Bhāvanā* helps the mind to get to *samādhi* while also cultivating the *Bojjhaṅga dhamma*. *Satta Bojjhaṅga* (Seven Factors of Enlightenment) are listed in the “[37 Factors of Enlightenment](#)”; a brief description is given below.
- The other part of my sitting meditation is *Ariya Mettā Bhāvanā*; see “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#).” This routine works well for me.
- Of course, there are many paths to *Nibbāna* (and to the *Sotāpanna* stage), and this is the one I took (almost inadvertently). **Still, it is critical to realize that attaining the *Sotāpanna* stage ONLY REQUIRES removing wrong world views or *diṭṭhi*, i.e., getting rid of *ditthāsava*.** But this may not be an easy step, because one needs to realize the *anicca* nature of this world.

What Are *Bojjhaṅga*?

3. The word *Bojjhaṅga* comes from “*Bodhi*” + “*aṅga*.”) Of course, “*Bodhi*” means “*bhava uddha*” or “Enlightenment” and “*aṅga*” means “part.”

- Thus, the seven factors in the *Satta Bojjhaṅga* are seven factors (*satta* means seven) conducive to attaining *Nibbāna*.

4. The key here is that during the *Bojjhaṅga Bhāvanā*, one only does “*āna*” or “taking in good things”; see, “[7. What is Ānāpāna?](#).” However, “*pāna*” or “removing the bad” happens automatically via wisdom gained, i.e., via enhanced vision or *sammā diṭṭhi*. One's mind is automatically focused on thinking about a Dhamma concept, and once one gets some traction, the mind will get “latched on to it”.

- In the early days, when I started contemplating a Dhamma concept I automatically got to *samādhi* (not *jhāna*), i.e., the mind became concentrated on that and the body and the mind both became lighter. I also experimented with breath meditation) at that time.
- This habit of contemplating dhamma concepts naturally got established as cultivating *dhamma vicaya* in *Satta Bojjhaṅga Bhāvanā* once I met my teacher *Thero*.

The necessity to Comprehend *Tilakkhaṇa*

5. I was able to make real progress only after learning the true meanings of *anicca*, *dukkha*, and *anatta*; see, “[10. Attaining the Sotāpanna Stage via Removing Ditthāsava](#).”

- Waharaka Thero has explained how to cultivate the seven *Bojjhaṅga dhamma* systematically. That involves establishing *sati* (moral mindfulness) based on those correct interpretations of *anicca*, *dukkha*, and *anatta*. See “[Anicca, Dukkha, Anatta](#),” and the follow-up posts.
- Of course, one must remove the ten types of *micchā diṭṭhi* before comprehending *Tilakkhaṇa*. See, “[Micchā Ditthi, Gandhabba, and Sotāpanna Stage](#).”

The Seven [*Satta*] *Bojjhaṅga*

6. The seven *Bojjhaṅga Dhamma* are *sati* (mindfulness), *dhamma vicaya* (investigation of *dhamma* concepts; pronounced “dhamma vichaya”), *virīya* (effort), *pīti* (joy), *passaddhi* (tranquility), *samādhi* (one-pointedness), and *upekkhā* (equanimity). I will post it later, but I have discussed most of these terms in other posts.

- It is essential to clarify what *sati* is. Many think *sati* is “concentration” or just “paying attention”. It is much more than that. It is “paying attention” WITH a frame of mind based on understanding *anicca*, *dukkha*, and *anatta*: One has contemplated the “big picture” of the Buddha with 31 realms and a rebirth process that has led to much suffering in the long run.
- Even though one may enjoy life now, one knows that it will be of negligible duration compared to the *saṃsāric* (or *saṃsāric*) time scale. This is the theme of this website, and there are many posts that one can read.

Sati Comes First

7. During the whole time of the *Bojjhaṅga Bhāvanā*, *sati* must be there; that frame of mind must be there. *Dhamma vicaya* is a critical evaluation of a given *dhamma* concept. One can choose a topic or two for a session and then contemplate it. **One could do this not only in a formal way, but also just while reading a web post or a book on the subject.** Each individual is different, so one must determine which is more suitable.

- One can compare the concept with one’s own life experience, and others that one can see. For example, when contemplating on *anicca*, there are several video clips on various posts giving visuals on the inability of anyone to maintain anything, including one’s own body, to one’s satisfaction in the long run. Also, one can contemplate the rebirth process and see whether it makes sense, one can contemplate different applications of *Paṭicca samuppāda*, etc.
- When one comprehends a given concept, that leads to the cultivation of the *pīti* (pronounced “peethi” or “preethi” in Sinhala) *sabbojjhaṅga*. This is part of *nirāmisā sukha* that I have talked about; one starts feeling happiness or a “lightness” making the mind serene. I am sure some of you have experienced this while reading posts. This gives one confidence that one is on the right path, and thus one will be motivated to make more effort, i.e., it cultivates the *virīya sabbojjhaṅga*.

First Phase – Learning and Contemplation

8. Thus *dhamma vicaya*, *pīti*, and *virīya sabbojjhaṅga* are cultivated together (of course *sati* must be there too). At some point, though, the mind and especially the body (head) may get tired. If one is making a lot of progress, one may start to experience some pressures in the head or body (not headaches, but just pressure.) Some feel like “ants crawling in the head”; the brain and the body (including the nervous system) are adjusting and there is nothing terrible about this.

- When this happens one is making progress; the body feels the effective meditation. Our minds and bodies have been contaminated too, and the nervous systems have been distorted with respect to that in the *manomaya kāya*. Some of the “pressures” one feels are due to the “twisting back” of the nervous system to the proper place. **These effects may be minimal for some people; this is what I experienced.**
- And this burning of defilements leads to a buildup of contaminants in the body that need to be expelled and cleansed, via proper breathing (this is not “*ānāpāna*”). We should not focus on the breath like in the mundane “breath meditation”. We are just getting rid of certain “*utuja rūpa*” accumulating in the body due to greed, hate, and ignorance.
- At this point one should stop the contemplation process and start breathing in and out to cleanse the body; sometimes the body automatically gets rid of those things via a long out-breath. This will lead to *passaddhi* (tranquility) of both the body and the mind, and one gets to *samādhi* gradually. One needs to think about the lightness of the body and the mind (*passaddhi*) and the *nirāmisā sukha* (from *samādhi*) results. One also should think about *upekkhā* (equanimity) too.
- When the body and the mind calm down enough and when one feels relaxed, one should go back to cultivating the previous three *sambojjhaṅga*, i.e., start on the contemplation process of *dhamma vicaya*.

Second Phase – Relaxation

9. Thus one should go back and forth between the two routines with three *sambojjhaṅga* each. The *sati sambojjhaṅga* must be there all the time. This is called the two-step cultivation of *Bojjhaṅga dhamma*.

- The Buddha compared this process to the washing of dirty cloth by hand. One needs to apply soap and wring the cloth to release the contaminants. But then, one must soak it in clean water and remove the released dirt. After that, if the cloth is still dirty, one applies soap again, and then again wash it. This process must be repeated until all the dirt is gone and the cloth becomes clean. And one needs to do it with mindfulness: if there is a stubborn stain left in one place, one may need to use a different chemical to get rid of that spot (i.e., use the appropriate *Bhāvanā*: *asubha Bhāvanā* to get rid of sense cravings, *Mettā Bhāvanā* to get rid of hateful thoughts, *dhamma* concepts to get rid of *micchā diṭṭhi*, etc) and wash in clean water again. Thus one needs to be mindful (*sati*) during the whole process.
- In the same way, one goes back and forth between the two routines with *sati*. The time takes to get to *magga phala* depends on the individual. *Ariya jhānās* can be attained only after getting to the *Anāgāmi* stage; see, “

Continuing With *Ānāpānasati Bhāvanā*

10. The *Bojjhaṅga Bhāvanā* is formal meditation. As we have seen, one must sit comfortably in a quiet place and contemplate.

- However, *Bojjhaṅga Bhāvanā* cannot be done in isolation. One needs to do the *Ānāpānasati Bhāvanā* at all times to get rid of bad habits and cultivate good habits, and live a moral life.
- Once one gains some traction and sees some benefits, one will become motivated.

Alternating Between the Two Phases

11. Initially one should focus on *anicca*, *dukkha*, or *anatta* as the *dhamma vicaya* subject. Then once some understanding is gained, one’s mind attains a certain level of cleanliness. After that, like using different chemicals to get rid of coffee or tar stains, one needs to choose different topics (or even meditation techniques) to broaden the understanding/remove a particular obstacle. Buddha Dhamma is all about cleansing the mind via wisdom and understanding this world’s true nature.

- Also, it helps to do the *Mettā Bhāvanā* as a part of the daily routine. The Buddha stated that If appropriately done (i.e., with an understanding of *anicca*, *dukkha*, *anatta*), the *Mettā Bhāvanā* can lead to the *Anāgāmi* stage; see, “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#).”
- If one has too many cravings, one could use the “*asubha anussati*”; if one tends to procrastinate, one could cultivate the “*maranānussati*”. We will talk about these in the future.
- But first, it is essential to focus on *anicca*, *dukkha*, and *anatta*. At the same time, it may be a good idea to get some idea of the “big picture”, i.e., the rebirth process, the 31 realms, etc., and then some idea about *kamma*, *saṅkhāra*, *Paṭicca samuppāda*, etc. All these are pieces of a puzzle; even though it may look daunting at the beginning when the big pieces are in place, one starts to get a better idea of where small pieces may fit in. *Anicca*, *dukkha*, and *anatta* are the most significant pieces.
- Thus contemplating *anicca*, *dukkha*, and *anatta* is a crucial topic for *dhamma vicaya*. I still do it every day, at least for a short time. **One starts “seeing the *anicca* nature” (i.e., gets to *Sammā Dīṭṭhi* on the Noble Path) at the *Sotāpanna* stage, but fully perceives the *anicca* nature of this world (i.e., removes *saññā vipallāsa*) only at the *Arahant* stage.** See “[Vipallāsa \(Dīṭṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”

Attainment of the *Phala* Moment

12. The *Sotāpanna* stage (*magga/phala*) is attained in two consecutive *citta*. However, it is not noticeable at that time. One realizes that with time, mainly by realizing that one's outlook on life has changed. In particular, the tendency to socialize is likely to be reduced, but there may be exceptions; one realizes how important it is to spend the little remaining time in this life on making spiritual progress and enhancing the “cooling down”.

- In trying to attain the first *Ariya jhāna*, one could start with the *Satta Bojjhaṅga Bhāvanā* with the frame of mind of the unfruitfulness of anything in this world in the long run (*anicca*, *dukkha*, *anatta*). All mundane thought objects (based on greed and hate) are suspended from the mind. Then one can think about the peacefulness of *Nibbāna* (the partial effect one experiences upon attaining the *Sotāpanna* stage), i.e., the change in one's state of mind.
- I use the phrase, “*etaṃ santaṃ etaṃ paṇītaṃ yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānaṃ*” in the “[WebLink: suttacentral: Mahāmālukya Sutta \(MN 64\)](#).” I emphasize that I have not yet attained the first *Ariya jhāna* yet, as of August 5, 2017. It is not possible to attain the first *Ariya jhāna* until one completely removes *kāma rāga*, as I have realized recently; see, “[Dasa Saṃyojana – Bonds in Rebirth Process](#).” Whatever *jhāna* that I had must be *anāriya jhāna*.
- Here is a recording of the Pāli verse by the Venerable *Thero* (you need to set the volume control on your computer):
[WebLink: Listen to verse on Ethan santhang ethan panithang](#)
- One could say in English, “It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*”, OR “This is peaceful, this is excellent, that is achieved by calming all *saṅkhāra*, breaking all bonds leading to rebirth, *ceasing of all attachments, stopping of the saṃsāric journey, cessation of all causes*, which is *Nibbāna*”.
- What matters is not the actual words, but the understanding one has in one's mind. **It is best to recite the Pāli verse and recall the meaning while chanting.**

Attainment of *Jhāna* Is a Possibility

13. One could attain *anāriya jhāna* before or after the *Sotāpanna* stage. However, even the first *Ariya jhāna* is possible by removing *kāma rāga anusaya* at the *Anāgāmi* stage.

- *Jhāna* are mental states corresponding to *rūpāvacara Brahma* realms, which are realms in this world. They can be attained by SUPPRESSING or REMOVING *kāma rāga*, corresponding to *anāriya* and *Ariya jhāna*. Either way, one will get to a similar *jhānic* state. However, subtle differences exist due to *anusaya* being present in *anāriya jhāna*. See #8, #10, etc. in “[Tapussa Sutta \(AN 9.41\)– Akuppā Cētōvimutti](#).”
- Since even to get to the first *Ariya jhāna* by REMOVING *kāma rāga*, one would have to be an *Anāgāmi* to attain the first *Ariya jhāna*. **That is easy to verify for oneself, since one would lose the craving for any sensory pleasures, including sex.**
- These and other aspects of *Ariya* and *anāriya jhāna* are discussed in the section: “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”
- It is also important to realize that even an *Arahant* will not lose the sense of taste; one increasingly will lose CRAVINGS for them; see “[Kāma Rāga Dominates Rūpa Rāga and Arūpa Rāga](#).”

14. **November 11, 2016:** I get many questions on this topic, i.e., how to verify one is progressing towards the *Sotāpanna* stage. The new section, “[Living Dhamma](#),” provides a systematic way to achieve that goal and provides guidelines on checking one’s progress.

- **April 24, 2020:** I recently finished a long discussion at a deeper level in the new “[Origin of Life](#)” section. This is a bit more advanced section.
- These are just different ways of trying to understand the Buddha Dhamma. It is a vast subject.

12.15 12. Key Factors to be Considered when “Meditating” for the Sotapanna Stage

November 13, 2015; revised August 28, 2022

1. **First**, one needs to understand what is meant by the *Sotāpanna* stage of *Nibbāna*. Many people start meditating without an idea of the goal: It is fine to do breath meditation if one only needs to calm down. Others are doing things needed to attain the *Arahant* stage, which will not work either because one needs to understand the concept of *anicca* first, i.e., learning the key concepts comes first (*dassanena pahātabba*).

- If one's goal is to attain the *Sotāpanna* stage, then one should first read the posts in the “[Sotāpanna Stage of Nibbāna](#)” section to get an idea of what is meant by a *Sotāpanna* and what is involved in getting there.
- There are many misconceptions about the *Sotāpanna* stage, and those posts could clarify them. I spent a lot of time doing unnecessary things, so I just wanted to make it easier for those who are just starting or doing the wrong things to get there. Of course, one should decide whether what I say is consistent with Buddha Dhamma.

2. I must also point out that many have been “brainwashed” to think that the *Sotāpanna* stage is impossible to achieve now. It is disheartening to see even some “*mahā Theros*” in Sri Lanka have given up striving for even the *Sotāpanna* stage (presumably because they had used the wrong concepts for many years and could not make any progress). But the Buddha clearly stated that his *Buddha Sāsana* will be there for 5000 years, and we are only halfway through. There will be numerous *Arahants* also in the near future.

- Many have attained the *Sotāpanna* stage and beyond within the past few years, and that number is growing. Pure Buddha Dhamma that had been hidden is out and is beginning to spread. Many who have reaped the benefits are trying their best to get the message out. Most of those efforts are in Sri Lanka or the Sinhala language at this early stage.
- Even though it may not be possible for some (those with *dvihetuka* births) to attain the *Sotāpanna* stage in this lifetime, an all-out effort will help at least in their future lives. Those who can make it (with *tihetuka* births) simply have done more in past lives. **By the way, if you come across any unknown Pāli words, just enter that word in the Search box, and there will be relevant posts listed.**
- In any case, any efforts will have tangible outcomes in this life itself.
- The Buddha clearly stated that there are no language, race, cultural, caste barriers in attaining *magga phala*, or the four stages of *Nibbāna*. The critical thing is that one needs to follow the original, pure Dhamma of the Buddha and comprehend his message.
- The key message of the Buddha is that nothing in this material world (31 realms) can be maintained to our satisfaction in the long run (*anicca* nature.) Thus through uncountable rebirths, we mainly encounter suffering. Some of us may not be experiencing suffering in this life right now, but that does not mean it will be the same in future lives (or even at old age in this life).

3. **Secondly**, having a road map is NECESSARY to reach an unknown destination. Starting to meditate without an idea of what to meditate on, like just getting in the car and driving without a map showing where the destination is.

- Again, the posts in the “[Sotāpanna Stage of Nibbāna](#)” section will be useful.
- The “map” to reveal *Nibbāna* is the comprehension of the key concepts like *anicca*. **When one reaches the *Sotāpanna* stage, it is like finding the correct map.** Then only one can start driving (i.e., *kammaṭṭhāna* or “meditation recitals”) to reach the final destination. **Reciting things without understanding is fruitless.**
- Please contemplate this aspect; I cannot emphasize it enough. Finding the map is the hardest and most important part.

- I have started a new section where a step-by-step process is described to follow; see “[Living Dhamma](#).” It can also help one figure out where one is on the Path and clarify many fundamental issues.

4. **Third point** — related to the second point — is that we need to examine what “*bhāvanā*” (meditation) means when striving for the *Sotāpanna* stage. **It is NOT a formal meditation technique (reciting a given *kammaṭṭhāna*) that is mainly needed here.**

- However, the Buddha said that even listening to discourse is *bhāvanā*. One could attain the *Sotāpanna* stage just by listening to a discourse. When listening attentively, one’s mind gets focused on it, comes to *samādhi*, and can get to *magga phala* via *upacāra samādhi*.
- What is needed to get to the *Sotāpanna* stage is the contemplation of the key Dhamma concepts, in particular *anicca*, *dukkha*, and *anatta*, but also to try to get an understanding of the Buddha’s world view, with 31 realms of existence, beginningless rebirth process, infinite number of planetary systems (*cakkavāla*), *Paṭicca Samuppāda*, etc. This is how to “find the correct map” mentioned in #3 above.
- As explained in those posts in the “[Sotāpanna Stage of Nibbāna](#)” section, this meditation (*bhāvanā*) involves mainly the contemplation (*citta*) and examination of dhamma concepts (*dhamma vicaya* and *vīmaṃsā*). The four bases of mental power (*chanda*, *citta*, *virīya*, *vīmaṃsā*) are very helpful to be cultivated; see “[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#).”
- In the above, “*chanda*” is the liking to attain *Nibbāna* cultivated by learning and forming a desire to learn more Dhamma. I can assure you there is no other pleasure like the “pleasure of knowing the truth, the pleasure of discovering true Dhamma.”
- Formal meditation techniques are needed mainly after the *Sotāpanna* stage, as described in the subsection **Key Points from the *Sabbāsava Sutta*** under the post, “[The Sotāpanna Stage](#).”

5. **Fourth** is to have a clear idea of the priority items to get done regarding *sīla* (moral behavior). In one of the early meditation posts, I pointed out that one needs to sort out the “big problems” to take care of before tackling smaller problems. If a vessel leaks due to multiple holes, one needs to seal the big leaks first. Spending precious time trying to plug smaller holes when the water is pouring out through the big holes is a waste of time.

- In the following, I will address the fact that many people have misconceptions about the relative weights of *kamma*. Please bear with me and read carefully, because some of these ideas go against established and common wrong views. I have discussed some in “[How to Evaluate Weights of Different Kamma](#).”

6. For example, many people are afraid of even accidentally killing a mosquito but do not have any problem making plans to hurt another human or spread rumors about another.

- Then others think taking an occasional alcoholic beverage is immoral but spend hours thinking about other sense pleasures. **By the way, it is not the sensory pleasures that is the problem, it is constantly thinking about them; this is a subtle but important point;** see, “[Assāda, Ādinava, Nissaraṇa – Introduction](#).”
- Of course, killing any living being should be avoided, and it is best to avoid drinking alcohol (especially if one tends to get drunk; the problem with drinking is that it makes the mind more exposed to the *pañca nīvaraṇa*; one’s ability to think is diminished when drunk).
- My point is that hurting another human will have much more potent *kamma vipāka* than killing many mosquito or taking an occasional drink.

7. We can get some ideas on these issues by looking at the *Vinaya* rules for the *bhikkhus*. These are the rules of conduct for the *bhikkhus*. There are 227 rules for fully ordained monks (*bhikkhus*) and 311 for nuns (*bhikkhunīs*).

- These rules are called *patimokkha* (“*pati*” is getting bonded and “*mokkha*” or “*moksha*” in Sanskrit is “*Nibbāna*”) because they help stay out of trouble and stay on the path to *Nibbāna* for the *bhikkhus*. Remember that in the *Satipaṭṭhāna sutta*, “*mukha*” in “*mukha nimitta*” also means *Nibbāna*.

These rules are categorized according to their importance (or the severity of consequences for breaking them). The top four belong to the class called “*pārājika*,” meaning a *bhikkhu* who breaks any one of the four has been “defeated” and thus needs to leave the monastic order. [*pārājika* : [adj.] one who has committed the gravest transgression of the rules for bhikkhus.]

1. **Sexual intercourse:** any voluntary sexual interaction between a *bhikkhu* and a living being, except for mouth-to-mouth kissing, which falls under the *Saṅghādisesa* (next level below the *pārājika* level). [*saṅghādisesa* : [unexplained as regards etym. ; Geiger, P. Gr. § 383, after S. Lévi, = *saṅgh’âtisesa*; but *atisesa* does not occur in Pāli] requiring suspension from the Order; a class of offences which can be decided only by a formal *saṅgha-kamma*.]
2. **Stealing:** the robbery of anything worth more than 1/24 troy ounce of gold (as determined by local law).
3. Intentionally bringing about the **death of a human being**, even if it is still an embryo — whether by killing the person, arranging for an assassin to kill the person, inciting the person to die, or describing the advantages of death.
4. **Deliberately lying to another person that one has attained a superior state**, such as claiming to be an *arahant* when one knows one is not, or claiming to have attained one of the *jhānā* when one knows one has not.

8. The next level is the *Saṅghādisesa*. The thirteen *Saṅghādisesa* rules require an initial and subsequent meeting of the *saṅgha* (communal meetings). If the monk breaks any rule here, he has to undergo a period of probation or discipline, after which, if he shows himself to be repentant, he may be reinstated by a *saṅgha* of not less than twenty monks.

- Like the *pārājikas*, the *Saṅghādisesa* can only come about through the monk’s intention and cannot be accidentally invoked. However, if the *bhikkhu* does not go through this to absolve him/herself, then the consequences will be even harsher. These thirteen rules are not relevant to our discussion here, but you can read them at: [WebLink: WIKI: Patimokkha](#)
- Two more layers, *aniyata*, and *Nissaggiya pacittiya*, pertain to *bhikkhus* and are again irrelevant to our discussion. They are even less potent and can be overcome by confessing to another *bhikkhu* and deciding not to repeat.

9. The last set of rules is the “weakest,” i.e., with the least consequences compared to all others. They are the 92 “*pacittiya*” rules, which are minor violations and can be overcome by confessing to another *bhikkhu* and deciding not to repeat them. The ones relevant to our discussion are:

- 10. *Should any bhikkhu dig soil or have it dug, it must be confessed (to avoid killing small animals/insects).*
- 51. *The drinking of alcohol or fermented liquor is to be confessed.*

10. Many people think “life is a life,” but that is not so. Here digging soil is not allowed for *bhikkhus* because many lifeforms (insects, worms) are killed in that process. But this act is listed under the last section of the *Vinaya* rules (with the least consequences).

- We know that killing an *Arahant* or one’s parents is an “*ānantariya kamma*,” a very potent *kamma* that will send one to the *apāyā* in the next birth.
- And as we saw in #7 above, killing or giving the advice to kill even a fetus is a *kamma* that makes a *bhikkhu* lose his/her ordination. Killing small insects (inadvertently) by digging soil is a much less potent *kamma*, as listed in #9 above.
- Human life is precious because only a human can strive and attain *magga phala*, AND it is very difficult to get a “human *bhava*.” But even among humans, there is great variation: an *Arahant* or one’s parents are ranked way higher. The importance of parents is related to the fact that it is extremely hard for a *gandhabba* to find a suitable womb. I will discuss this in detail later. [Need to find a reference.]

- We also see that drinking alcohol is a minor offense, even for a *bhikkhu*, as listed in #9 above. *Bhikkhus* do not drink alcohol anyway, but this rule came about because of a particular incident at the time of Buddha.

11. It can also be deduced that stealing is a misdeed with harsh consequences since it is included as a “*pārājika*” for the *bhikkhus*.

- We must realize that stealing has many subtle forms, in addition to “taking something that belongs to another without permission.” In society, not doing one’s part is also a form of stealing. One is benefiting from others’ work without contributing to it.
- We also become indebted automatically to our parents, teachers, friends, etc. Even though they may not expect a “payback,” we must “respond in kind” whenever an opportunity arises.
- More can be found in the post, [“Kamma, Debt, and Meditation.”](#)

12. Finally, I would like to point out that it is difficult to quantify the weight of a given *kamma* generically. For example, “killing an animal” is a very generic statement, and such an act has a broad range of *kamma vipāka*.

- When you slap a mosquito that bit you while reading a book almost without realizing it, it has very little *kammic* power. On the other hand, when one aims a gun at a deer and fires to kill it, that will have much more *kammic* power.
- One way to easily figure out the difference between those two acts is to think in terms of “*javana* power” of a *citta*. This goes together with the “intention” and “how bad one wants to get it done.” In the above example, you can almost visualize the difference in the mindsets of killing a mosquito versus deer. For more details, see [“Javana of a Citta – The Root of Mental Power”](#) and [“Details of Kamma – Intention, Who Is Affected, Kamma Patha.”](#)
- Hitting a person to cause minor pain is done with less *javana* in the *citta*. But hitting a person with an iron rod intending to kill has much more *javana* power, as you can imagine.

13. These are things one needs to contemplate to truly understand the Buddha Dhamma; that is the real *vipassana* or insight meditation. Getting to the *Sotāpanna* stage requires learning about such basic things on one’s own by thinking about real life.

- Buddha Dhamma is not a “set of rules and rituals” to blindly follow. That is exactly why many people have not been able to make any progress and have even given up.
- When one starts thinking critically and attentively, one develops the four types of (*cattāro*) *iddhipāda* discussed in #4 above. Once one gets traction by understanding a few basic things, Dhamma will be the guiding force to generate *chanda* (desire) to investigate more and to find more. It is boring and fruitless to blindly follow precepts and rituals that will not get one anywhere.

14. **November 11, 2016:** I get many questions on this topic, i.e., how to verify one is progressing towards the *Sotāpanna* stage. The new section, [“Living Dhamma,”](#) provides a systematic way to achieve that goal and guidelines for checking one’s progress.

12.16 13. Kammattana (Recitations) for the Sotāpanna Stage

December 5, 2015

1. There are two ways to look at the effectiveness of recitations. First, one could gain some benefit when LISTENING TO recitations (such as recorded chanting of *sutta*), even without understanding what is said in the *suttā*. However, that benefit will increase if one understood the content.

- The effectiveness of recitations in MEDITATION SESSIONS is somewhat similar. There are many people who have been practicing various types of recitations (*kammaṭṭhāna*) for 10, 20, 30, or more years without significant results (i.e., *magga phala*), even though they are likely to feel some calming effect.
- Reciting phrases (in any language) can be quite beneficial if the meanings of those phrases are understood in either of the above cases. Recitation in Pāli can be a bit more effective, since Pāli words tend to condense a lot of meaning. If one starts off with at least some understanding, recitation on a regular basis will help understand the concept at a deeper level.
- For example, the concept of *anicca* is understood gradually — with a glimpse of it grasped on the way to the *Sotāpanna* stage, getting a firm foothold at the *Sotāpanna* stage, strengthening at the *Sakadāgāmi* and *Anāgāmi* stages — and is fully comprehended at the *Arahant* stage.
- A systematic procedure to get to *sammā samādhi* to be able to comprehend *anicca*, *dukkha*, *anatta*, is described in the “[Living Dhamma](#)” section. It can also help one figure out where one is in the Path, and to clarify many fundamental issues. **It is not possible to comprehend *Tilakkhaṇa* until one's mind is purified to some extent. Then one's mind can easily grasp concepts rather than just memorizing them.**

2. A mundane example is learning the multiplication table. Some get it easier than others. But with practice anyone can master it. All one needs is to spend some time reciting and memorizing the table, even though only memorization may not be helpful in the final objective, i.e., solving a bit more complex problems.

- We know that this “learning process” can be speeded up by using what one learned in solving some problems. Rather than just memorizing the multiplication table, if one applied it to solve some multiplication problems, the learning time can be drastically reduced and also it is easier to keep in the memory for longer time.
- This is what the Buddha meant by “*bhāvanāya bahulīkatāya.....*” *Bhāvanā* (or meditation) [DN 33, DN 34, MN 62, MN 119, SN 42.8, SN 46.57, SN 46.76, SN 54.5, AN 6.13, AN 8.1.] is **what one uses frequently: one needs to be thinking about it and examine it in many different situations as much as possible.** Then the concept starts to “sink in”. Formal recitations can be part of this process. [*bahulīkata*: [pp. of bahulīkaroti] took up seriously; increased. (adj.), practiced frequently.]
- Reciting a phrase repeatedly while contemplating on it (*kammaṭṭhāna*) is an excellent way to retain and comprehend a given concept, **once the concept is at least vaguely understood.**

3. Another important benefit of a good recitation session is in subsiding the five hindrances (*pañcanīvaraṇa*) that makes the mind agitated and not receptive; see, “[Key to Calming the Mind – The Five Hindrances.](#)” When one is focusing on Dhamma — even by just reciting verses — those greedy, hateful, and irrelevant thoughts are at least temporarily subsided and the mind will not be lethargic or agitated.

- In this respect, just listening to *Pāli suttā* could be beneficial too. In many Buddhist countries, many people start off the day with chanting of *suttā* (*pirith*) in the background. When I was little, I used to wake up to the chanting of *pirith* on the radio (my mother used to do turn it on the first thing in the morning).
- If the *suttā* are recited the right way, just listening to them can make the mind calm. I have posted audio files of several *suttā* by my teacher *Thero* including a 75 minute session in the post: “[Sutta Chanting \(with Pāli Text\).](#)”

4. Yet another critical benefit is to make the conditions conducive to attract previous “good *kamma*,” and make the mind “tune into” receiving such merits. Each of us has done innumerable good and bad *kamma* in our previous lives, and they are waiting for “right conditions” to bring their results (*vipāka*).

- For example, there may be a good TV (or radio) program being broadcast. But if the television (or the radio) is not “tuned in” to the right station, one would not be able to watch (or listen to) the program.
- “Making the conditions right” can bring about both good and bad *kamma vipāka* too. If one associates with bad friends, that is making conditions for bad *kamma vipāka* to bring fruits. On the other hand associating with good friends and listening/reading Dhamma can make one’s life better. This is discussed in detail in the posts, “[Anantara and Samanantara Paccaya](#)” and “[Transfer of Merits \(Pattidana\) – How Does it Happen?](#).”
- I have mentioned in many posts that the effectiveness of absorbing material at this website can be much improved by reading them at a quiet time. In the same way, a meditation session can be made more effective by calming the mind by doing some well-planned recitations. That itself can be a meditation session. What I do is, in the middle of recitations contemplate about relevant Dhamma concepts or my own daily experiences, i.e., do insight meditation in the middle of the recitation itself.

5. One should tailor the recitation session to match one’s own personality and needs. For example, if one has a temper, one should spend more time doing *metta bhāvanā*; if one has excessive greed (for sense pleasures) one could spend more time doing *asubha bhāvanā* (unfruitful nature of things), which is basically to contemplate on the fact that ANY object that is providing sense pleasure is going to decay and destruct at the end.

6. I have thought a lot about how to present a “*kammaṭṭhāna* program”. But it is difficult to decide what *kammaṭṭhāna* to discuss because each individual is different, and has own preferences and needs. I may still do that in pieces in the future, and I have discussed basic features of some in other posts.

- Here, I think it is better to just provide an audio of recitation session that I go through each day. This is just to give an example of how it can be done, and I know that it helps me in calming my mind and making it more receptive and alert.
- This is somewhat modified compared to what I actually do, because I do some parts in Sinhala which most of you will not understand, and I have also tailored this for those who are seeking the *Sotāpanna* stage of *Nibbāna*.

7. It is best to do these recitations in a quiet room, sitting comfortably — but not too comfortably — so that one would not fall asleep initially. Once one gets used to it, one will never fall asleep. Also, it may be better to actually say the words initially to avoid the mind to wander around; one could just recite in the mind later on.

October 13, 2016: I have removed the audio file temporarily until I make a better one. After I started the “[Living Dhamma](#)” section, I realized a way to present material in a better way.

But I leave the pdf of the text file:

[WebLink: PDF File: Kammattana Example](#)

Notes:

1. I am assuming that anyone who is interested in these *kammaṭṭhāna* (i.e., those who have the desire to strive for the *Sotāpanna* stage) have already read the relevant key posts at [Sotāpanna Stage of Nibbāna](#). Now, let us discuss different sections of the [WebLink: PDF File: Kammattana Example](#).

- Also, the Search button on the top right is very useful for finding relevant posts for any given keyword or a phrase that is not clear.

2. In reciting precepts, instead of the “*Pānātipātā Veramani Sikkāhāpadam Samādiyāmi*”, which says “I promise not take another life of a living being”, it is more truthful to say, “I promise not to take another life with any liking for it” (*Pānātipātā pativirato hoti*), unless one is dedicating a day to strictly observe the precepts.

- For example, if one needs to apply a medication to a wound, that will kill many microscopic living beings; yet, one has to do that in order to heal the wound; **thus in day-to-day life, we may have to take actions like that we would not like to; this is what is meant by “pativirato hoti”, i.e., one would not do it unless necessary.** But if one is observing precepts, one could avoid applying the medication on that day.
- Same for the other four precepts.

3. Note the break in between “*itipi so bhagava...*”. Many people recite it as “*itipiso bhagava...*”, which has a very different and inappropriate meaning.

- I really need to discuss the meanings of these three phrases, and hope to get it done in the “Buddhist Chanting” section in the future.

4. The phrase, “*Natti me sanaran annan Buddhho me saranan varan*” means, “I have no other refuge than that of the Buddha”.

- “*etena sacca vajjena sotti me hotu sabbada*” means something to the effect of “may the truth in my refuge in Buddha, Dhamma, Saṅgha lead to my well being and success in **my** efforts”.
- “*etena sacca vajjena sotti te hotu sabbada*” means something to the effect of “may this truth lead to the well being and success in **others’** efforts”.

5. The next phrase (in Sinhala, I am unable to come up with a suitable English or Pāli phrase) means, “I will be truthful to myself, see things as they are, be pure in mind, and endeavor to generate only pure thoughts (*prabhasvara* or *pabasara citta*). I plan to write separate posts discussing some of these *kammaṭṭhāna*. Even a single phrase is so condensed that one could write many posts on each.

- For example, “*avanka*” comes from “*vanka*” or “bent” or “not straightforward”. If someone is not truthful, then that is “*vanka*”; “*avanka*” is the opposite of “*vanka*.”

6. The next three phrases are also very important. I recite it every day. The phrase, “*Kayena vaca cittena pamadena maya katan, accayam khama me Bhante bhuripanna Tathagata*”, means: “If I have done any wrong inadvertently (or due to ignorance) by thoughts, speech, or mind to the Buddha, may I be forgiven for that”.

- And then the same phrase directed to Dhamma and Saṅgha. For example, I always worry about inadvertently explaining some concept in a way which may not be quite right. Also, when dealing with people, we don’t know whether we inadvertently hurt their feelings or do something that they see as inappropriate (and it is possible that such a person may be a Noble person).

7. The next set of phrases are for cultivating *anicca saññā* and related other factors. The phrase, “*Aniccamupassi viharati, nicca saññā pajahati*” means “I will live my life cultivating the *anicca saññā* and reject that things in this world can be kept to my satisfaction (i.e., reject the *nicca saññā*)”. Similar meaning can be deduced for the following three phrases.

- In the phrase, “*Nibbidamupassi viharati, abhinandana pajahati*”, *nibbida* means “stay away from valuing sense pleasures” and *viharati* means “live accordingly”. *Abhinandana* means “valuing sense pleasures”, and *pajahati* means “avoid”.
- “*Nirodhanupassi viharati, samudayan pajahati*”, means stop the wheeling process and reject generating more “*saṇ*” (“*saṇ*” + “*udaya*” combines to give “*samudaya*”); see, “[What is ‘San’?](#)”.
- “*Patinissagganupassi viharati, sambhavan pajahati*” means “I will endeavor to break all bonds to this world, and stop making new *bhava*.”

- The last three recitals in this section with “*Anissitoca viharati, na ca kinci loke upadiyati*” confirm one’s conviction that “it is unfruitful to stay in this world of 31 realms, there is nothing in this world that worth craving for (*upādāna*)”.

8. The set of three phrases that come next also help cultivate *anicca saññā*, and one could review or do insight meditation on *anicca, dukkha, anatta* right after that.

9. The next section is on *metta bhāvanā*. I normally recite this in Sinhala, but these English phrases give almost the same meaning. This is also discussed in the post, “[5. Ariya Metta Bhāvanā \(Loving Kindness Meditation\)](#).”

- The relevance to different types of *akusala citta* is discussed in the post, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#).” The 12 types of *akusala citta* are discussed in, “[Akusala Citta and Akusala Vipāka Citta](#).”

10. The next phrase is the standard phrase to use when cultivating *jhāna*: see, “[11. Magga Phala and Ariya Jhānā via Cultivation of Saptha Bojjanga](#).” Even though it is supposed to be fully effective only after attaining the *Sotāpanna* stage, it can be used by anyone who has been exposed to the true meanings of *anicca, dukkha, anatta*, and is pursuing the *Sotāpanna* stage.

- One could get into at least some kind of *samādhi* by this time, and do some insight meditation here. Actually, at any of the above *kammaṭṭhāna* sections, one could do insight meditation related to that section. I normally do this and my sessions sometimes last for much longer times.

11. In the subsequent sections, we start giving merits to all living beings. The phrase, “*Idam me nati nan hotu Sukhita hontu natayo*”, means “May all my relatives (which does include all living beings in the through *samsāra*) attain peace and happiness due to these merits”.

- The next phrase, “*Idam vo nati nan hotu Sukhita hontu natayo*”, can have multiple meanings. If one is doing a group session, it could mean “relatives of others in the group”. If one is by oneself, it could mean “distant relatives”, who may even be in worlds far away from the Earth.
- Thus when one recites both phrases, it does include all living beings.

12. The next section gives merits to *devas* (which include *brahmā* as well), *bhūta*, and *preta*, and then to all beings (*sabbe satta*). It is another way of giving merits as in #11.

- Then the next phrase in English is straightforward. I specifically included this so that anyone can use this with full understanding. If one had (even inadvertently) done a bad deed to someone that day, one could be thinking about that person and ask for forgiveness. This is a very effective way to calm the mind and reduce tensions, and I hope to write a post on this. If done sincerely, one should be able to see the effects in real life. You may notice that the tensions with that person automatically reduced.
- What happens is that those strong *javana citta* that you generate can produce *cittaja rūpa* that can affect that person even over long distances. It is again related to what we discussed in #4 of the main section (above the current “Notes” section).

13. Then we end the session with the phrase “*Idam me puññaṃ āsavakkhaya vahaṃ hotu, sabba dukkha nirujjati*” that is recited three times. It means, “May the merits that I have acquired help remove my *āsava* (cravings), and lead to the end of all suffering”.

- It is to be noted here that “*āsavakkhaya vahaṃ hotu*” is really, “*āsavakkhaya ahaṃ hotu*” or “may (these merits) be *hetu* for cleansing of my *āsava*.” It just rhymes as, “*āsavakkhaya vahaṃ hotu*”.

14. Of course the above is an example of what one could do. One could use all the *kammaṭṭhāna* (and add more), or use only the ones that one likes. I don’t use them all in a given session, but do use some of them all the time. I just start the session with the first few and select phrases as I proceed. Sometimes, I get into insight meditation (contemplating relevant ideas, connecting with other concepts, etc) following a given phrase and just do that for the whole session.

15. **November 11, 2016:** I get many questions on this topic, i.e., how to verify one is making progress towards the *Sotāpanna* stage. The new section, “[Living Dhamma](#),” provides a systematic way to achieve that goal, in addition to providing guidelines on how to check one's progress.

12.17 New Approach to Meditation

This section has been moved to, “[Living Dhamma](#).” Please check there for the follow-up posts.

12.18 Anussati and Anupassanā – Being Mindful and Removing Defilements

April 16, 2018; revised August 10, 2022

Anussati and Anupassanā

1. *Anussati* and *anupassanā* are two Pāli words that have related but different meanings. It helps to understand the difference because many people today incorrectly use various types of *anussati* as *kammaṭṭhāna* (meditation subjects). [*anussati* : [f.] recollection; memory; mindfulness. *anupassanā* : [f.] 1. consideration; 2. realisation.]

- If one understands *Ānāpāna* and *Satipaṭṭhāna*, they are other ways of saying the same thing. They are all different angles of looking at the goal (*Nibbāna*) and how to get there, i.e., how to cultivate the Path.
- It is ALWAYS good to remember that *Nibbāna* is attained via getting rid of greed, hate, and ignorance (*lobha*, *dosa*, and *moha*) from one's mind. The only thing to remember is that without comprehending *Tilakkhaṇa*, that process cannot be completed. Everything else is just more details on how to get there.
- “*Anu*” can have two different meanings. One is “according to” or “via this process.” The other is “food” for bad *viññāṇa*, which are essential “*keles*” or “*kilesa*” or “defilements.” But here, it is the first meaning that is mainly relevant.

[*kilesa* : ‘defilements’, are mind-defiling, unwholesome qualities. Vis. M. XXII, 49, 65: **There are 10 defilements**, thus called because they are themselves defiled, and because they defile the mental factors associated with them. They are: (1) greed (*lobha*), (2) hate (*dosa*), (3) delusion (*moha*), (4) conceit (*māna*), (5) speculative views (*diṭṭhi*), (6) skeptical doubt (*vicikicchā*), (7) mental torpor (*thīna*), (8) restlessness (*uddhacca*); (9) shamelessness (*ahirika*), (10) lack of moral dread (fearlessness) or unconscientiousness (*anottappa*). For 1-3, s. *mūla*; 4, s. *māna*; 5, s. *diṭṭhi*; 6-8, s. *nīvaraṇa*; 9 and 10, s. *ahirika* - *anottappa*.]

[*upakkilesa* : ‘impurities’, corruptions, imperfections (a frequent rendering by ‘defilements’ is better reserved for *kilesa*, q. v.). A list of **16 moral ‘impurities of the mind’** (*cittassa upakkilesa*) is mentioned and explained in M. 7 & 8 (WHEEL. 61/62): 1. covetousness and unrighteous greed (*abhijjhā-visamaloḥa*), 2. ill will (*byāpāda*), 3. anger (*kodha*), 4. hostility (*upanāha*), 5. denigration (*makkha*), 6. domineering (*palāsa*), 7. envy (*issā*), 8. stinginess (*macchariya*), 9. hypocrisy (*māyā*), 10. fraud (*sāṭheyya*), 11. obstinacy (*thambha*), 12. presumption (*sārambha*), 13. conceit (*māna*), 14. arrogance (*atimāna*), 15. vanity (*mada*), 16. negligence (*pamāda*).]

- Now we can see the origins of those two words (*pada nirutti*).

Buddhānussati, Mettānussati, Asubhānussati, Maranānussati

2. **First, let us discuss *anussati***, which comes from “*anu*” + “*sati*.” Of course, *sati* is a mindset (with the *Tilakkhaṇa* in the background); therefore, *anussati* means **the mindset focused on attaining *Nibbāna***.

- There are several types of *anussati*, but four are lumped together as “*caturārakkhā*” or “**Four Protections**” that one should try to keep with oneself all the time, which will help one to stay out of trouble.
- This is expressed in the following verse (I have not found the source in the *Tiṭṭaka*):

“*Buddhānussati metta ca, asubham maranānussati; iti ima caturārakkhā, Bhikkhu bhaveyya silava*”

Translated: “*Buddhānussati, mettānussati, asubhānussati, maranānussati*; these are the **Four Protections** for a *Bhikkhu* cultivating *sīla* (moral behavior).”

- These are four things that one should ALWAYS keep in mind to protect one's mind from getting defiled.

3. We already know that “*Buddha*” comes from “*bhava*” + “*uddha*,” or uprooting *bhava*, i.e., stopping the rebirth process to stop future suffering. So, *Buddhānussati* means keeping that key message in mind.

- *Asubha* means “unfruitful” and even “harmful.” Getting attached to sense pleasures is harmful in the long run, just like a fish biting on a tasty worm on a hook will be subjected to suffering. So, *asubhānussati* means always to be mindful of the bad consequences of material things that are appealing at the first sight.
- *Mettānussati* is to keep in mind always that all living beings are in the same boat, suffering in the long run, and thus to have compassionate thoughts about all of them. Of course, that can be implemented at various levels depending on one’s progress (mundane *mettā* to *Ariya mettā*).
- Especially when one becomes aware of the true meanings of *Tilakkhaṇa*, one realizes not only the fruitlessness of seeking happiness in this world, but one becomes AFRAID of possible future suffering. When that realization comes, one will make an accelerated effort to cultivate the Path because death can come at any time.

4. Therefore, these four types of *anussati* are the four types of “mindfulness” that one should always keep in mind. Not only when meditating but even more important when interacting with society.

- These Four Protections, with practice, will help enormously in maintaining *Satipaṭṭhāna* or *Ānāpāna* while interacting with others.
- For example, suppose someone says something nasty. Instead of getting mad and retaliating, one should immediately recall that one’s goal is “*bhava uddha*,” which requires seeing the *asubha* nature and cultivating *mettā*. That one may not have much time left to get this done (*maranānussati*).

5. As is the case in many cases, those Four Protections have mundane meanings too. These could also be helpful. Following are the mundane meanings.

- *Buddhānussati* is to contemplate the nine supreme qualities of the Buddha. This is, of course, a good thing to do.
- *Asubhānussati* as contemplating the “foulness for the body.” That is a misinterpretation. One could do *asubha bhāvana* to contemplate the real nature of the body. A given male or female body can be enticing when the body is young, but they will both degrade with time.
- *Mettānussati* is to keep repeating, “May all beings be happy and healthy.” Again, not a bad thing to do.
- *Maranānussati* as reciting “*jīvitam aniyataṃ, maraṇaṃ niyataṃ*” or “this life is impermanent, death is a certainty.” While the statement is true, recitation alone cannot do much to remove defilements and purify the mind.

Aniccānupassanā, Dukkhānupassanā, Anattānupassanā, Asubhānupassanā

6. **Now let us discuss *anupassanā*.** In contrast to *anussati*, *anupassanā* is more relevant to formal meditation.

- “*Passa*” means to “get rid of,” as we mentioned while interpreting “*assa passa*” in discussing *ānāpāna bhāvanā*.; see #3 of “[7. What is Ānāpāna?](#).”
- Therefore, *anupassanā* means getting rid of defilements according to the prefix used in front.
- While there are four types of *anupassanā*, three are associated directly with *Tilakkhaṇa*: *aniccānupassanā*, *dukkhānupassanā*, *anattānupassanā*, and fourth is *asubhānupassanā*. [See; [WebLink: suttacentral: Patisambhidāmagga Paññāvagga 3.9. Vipassanākathā](#) for *aniccānupassanā*, *dukkhānupassanā*, *anattānupassanā* and [WebLink: suttacentral: Itivuttaka 85 Asubhānupassīsutta](#) for *asubhānupassanā*]

- Normal humans take this world to be of *nicca*, *sukha*, *atta*, and *subha* nature. The key to *Nibbāna* is to realize the true nature: *anicca*, *dukkha*, *anatta*, and *asubha*.

7. Thus, *aniccānupassanā* means getting rid of defilements by contemplating on *anicca* nature.

- Similarly, *dukkhānupassanā* and *anattānupassanā* mean getting rid of defilements by contemplating *dukkha* and *anatta* nature.
- We have not discussed *asubhānupassanā* up to this point. This becomes more important for a *Sotāpanna* to get to the *Sakadāgāmi/Anāgāmi* stages by contemplating the bad consequences of sense pleasures that appear so enticing.

8. Therefore, for one trying to get to the *Sotāpanna* stage, the first three *anupassanā* are more important. However, *asubhānupassanā* cannot hurt (and even could be beneficial) because that helps calm the mind.

- We need to remember that the *tāpa* (or burning or “excited-ness of the mind”) comes from *kāmacchanda* and *vyāpāda*: greed and hate. Both arise due to excess greed or “blindness due to excess desire for sense pleasures”; see, “[The Cooling Down Process \(Nibbāna\) – How Root Causes are Removed](#)” and “[Kāma Rāga Dominates Rūpa Rāga and Arūpa Rāga](#).”
- For anyone interested in meditation, such basics need to be understood: “[Living Dhamma – Fundamentals](#).” I can see from the discussion forum that many people worry too much about “deep concepts” without a proper understanding of fundamentals.

Understanding *Dhamma*: A Step-by-Step Process

9. We also need to keep in mind that one cannot just start doing formal meditations on these *anupassanā*. It is a step-by-step process. One needs to understand *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*): “[Anicca, Dukkha, Anatta](#).”

- Even before that, one needs to get rid of the ten types of *micchā diṭṭhi* by cultivating the mundane eightfold path: “[Buddha Dhamma – In a Chart](#).”

The reason for that was discussed in the recent post, “[Buddha Dhamma for an Inquiring Mind – Part I](#).” **If one has either of the following two views, then it is NOT possible to comprehend *Tilakkhaṇa*:**

- The next life is going to be forever, in heaven or hell.
- This life is all one has. When one dies, it is over. No rebirth or hell or heaven.

10. There are many reasons why those two views will block the path to *Nibbāna*. Following are a few key reasons:
